ELIZABETH A. FUCHS, AICP, MANAGER, STATEWIDE PLANNING

SUBJECT: **Recommended Priorities for FY2013 Local Coastal Program (LCP) Grant Program**

---

## SUMMARY OF STAFF RECOMMENDATION

The Budget Act of 2013 provides an appropriation of \$1 million dollars for Coastal Commission grants to local governments to support Local Coastal Program (LCP) planning. There is a need to complete LCPs that have not yet been certified and to update LCPs that may no longer reflect changed circumstances and new scientific information, including new understandings and concern for the effects of climate change. This staff report recommends the Commission adopt eligibility priorities and criteria for the review of grant applications and awarding of funds. Once adopted, staff will develop a request for proposals from local government. Recommendations for individual awarding of grants will return to the Commission for adoption at a later date.

Staff is recommending that priority for grants be given to new LCP Certification, including LCPs for Areas of Deferred Certification, LCP updates, and LCP amendments that address issues related to the effects of climate change. The Commission currently has a steady load of LCP amendment work, ranging from comprehensive LCP updates, to more targeted LCP amendments, and project-driven amendments. In assessing grant applications, lower priority would be placed on more narrow amendment proposals as opposed to more comprehensive updates that address new information, changed conditions, scientific knowledge, etc. Stand-alone project-driven LCP amendments would not be eligible.

Staff is also recommending that the priority grants be evaluated based on a number of criteria including: the public benefit and statewide Coastal Act significance of issues addressed by the amendment or submittal; the relative need for, and extent of, a proposed LCP update; the extent to which the proposal would address climate change concerns; the likelihood of success and effectiveness of the effort; the potential for reduction of Commission permit workload in uncertified areas; and the relationship of the application to other related planning work or other

## FY2013 Local Coastal Program (LCP) Grant Program

state or regional planning efforts and the availability and amount of local or other matching funds.

Staff recommends that the California Coastal Commission **adopt the priorities and criteria** for eligibility for, and allocation of, LCP Grant Program funds for the period July 1, 2013-June 30, 2014.

## I. MOTION AND RESOLUTION

### Motion:

*I move that the Commission adopt the priorities and criteria for allocating the \$1 million in LCP Planning Grant funds for FY 2013-2014, as set forth in the staff recommendation.*

Staff recommends a YES vote. Passage of this motion will result in adoption of priorities and criteria for the review and recommended awards of LCP planning grant applications. The motion passes only by affirmative vote of a majority of the Commissioners present.

### Resolution:

*The Coastal Commission hereby approves the eligibility, priorities and evaluation criteria for the review and administration of the LCP grant applications for FY 2013 as set forth in this report and authorizes staff to solicit and evaluate proposals, subject to the condition that the Coastal Commission shall approve final award of any grants under this program.*

## II. FINDINGS AND DECLARATIONS

### A. PROGRAM DESCRIPTION

The Budget Act of 2013 provides an appropriation of \$1 million dollars for Coastal Commission grants to local governments to support Local Coastal Program (LCP) planning. There is a priority need to complete LCPs that have not yet been certified and to update older LCPs that may no longer reflect changed circumstances and new scientific information, including addressing the effects of climate change.

Over the past 40 years, when funds were appropriated, the Coastal Commission was able to provide substantial financial and technical support to local governments for the preparation and implementation of their Local Coastal Programs. But FY 01/02 was the last year the Commission's budget included funds (\$500,000) for LCP Local Assistance grants. At that time, the grant awards ranged from \$30,000 to \$124,000. The current LCP Grant program includes \$1,000,000 in FY 13 for LCP Grants, with the focus on completing new and updating previously certified LCPs to reflect changed conditions, new issues and scientific information. A list of the remaining uncertified jurisdictions is shown in Attachment A and the Areas of Deferred Certification in Attachment B. Few LCPs have been entirely and comprehensively updated, but several (roughly 20%-30%) have been updated in part. However, through coordination with local governments, Commission staff is aware of significant local planning underway to update LCPs and this grant program could provide an additional incentive for local governments to pursue such updates. In addition, the Ocean Protection Council, in coordination with the State Coastal Conservancy and the Coastal Commission, is awarding \$2.5 million in grants to update LCPs to address sea level rise. This Commission LCP Grant program will complement and be coordinated with that effort.

## **Consistency with the Coastal Act**

The LCP Program is an essential component of the Coastal Act. LCPs implement the statewide goals and policies of the Coastal Act at the local level. Section 30500 of the Coastal Act requires that local governments prepare LCPs:

### **Section 30500 Preparation**

*(a) Each local government lying, in whole or in part, within the coastal zone shall prepare a local coastal program for that portion of the coastal zone within its jurisdiction. However, any local government may request, in writing, the commission to prepare a local coastal program, or a portion thereof, for the local government. Each local coastal program prepared pursuant to this chapter shall contain a specific public access component to assure that maximum public access to the coast and public recreation areas is provided.*

*(b) Amendments to a local general plan for the purpose of developing a certified local coastal program shall not constitute an amendment of a general plan for purposes of [Section 65358 of the Government Code](#).*

*(c) The precise content of each local coastal program shall be determined by the local government, consistent with Section [30501](#), in full consultation with the commission and with full public participation.*

Under the Coastal Act, the Commission may provide assistance to local governments in their LCP planning efforts:

### **Section 30336 Planning and regulatory assistance to local governments**

*The commission shall, to the maximum extent feasible, assist local governments in exercising the planning and regulatory powers and responsibilities provided for by this division where the local government elects to exercise those powers and responsibilities and requests assistance from the commission, and shall cooperate with and assist other public agencies in carrying out this division. Similarly, every public agency, including regional and state agencies and local governments, shall cooperate with the commission and shall, to the extent their resources permit, provide any advice, assistance, or information the commission may require to perform its duties and to more effectively exercise its authority.*

The Coastal Act also provides for procedures for awarding planning grants:

### **Section 30351 Local coastal program implementation grants; purpose; procedures**

*The commission shall, not later than July 1, 1980, prepare and adopt procedures for the issuance and management of local coastal program implementation grants. The*

## FY2013 Local Coastal Program (LCP) Grant Program

*purpose of the grants program is to provide, to the extent funds are available, financial assistance for local governments and, in cases the commission deems appropriate, other public agencies to carry out certified local coastal programs. The procedures required by this section shall specify, consistent with the criteria set forth in subdivision (a) of Section 30350, the categories of expenditures eligible for implementation grants and shall include procedures for application, review, approval, and disbursement of grant funds.*

The Commission's regulations outline the common methodology for developing a new LCP. These procedures for new LCP development, which would pertain to any grant application for an uncertified area, are outlined in the California Code of Regulations Section 13505, and subpart (d) outlines the required findings for approval of work programs:

- (d) *The Commission shall approve the work program and authorize the grant for disbursement of state or federal funds to the local government where it finds, after public hearing, that: (1) the scope of tasks outlined appears to address adequately the policies of Chapter 3 of the Coastal Act, including uses of more than local importance and potential cumulative impacts or conflicts with other jurisdictions; (2) the costs of undertaking such tasks are reasonably related to the amount of work needed to resolve coastal planning issues; (3) tasks to be contracted for under such grants are not already required under other statutes or more appropriately undertaken by other agencies; and (4) the work program includes measures for involving the public and other agencies adequate to comply with the Coastal Act and with the requirements of the funding authority. If any issues not included in the work program are later determined to require further analysis as part of the local coastal program preparation, the work program shall be renegotiated to include the additional items and any additional funding assistance that may be required.*

Financial assistance has, and will continue to be, a critical means to assist local governments in their coastal planning. Such financial assistance can serve as an incentive for local government to undertake such planning work. The applications for these LCP grant funds will require a complete work program and timeline for completion of the LCP planning work. The Commission will review and approve the recommended award of any grant funds and the proposed work programs will be part of that future action. Thus, as proposed, this grant program will facilitate the completion and update of LCPs consistent with the provisions of the Coastal Act and California Code of Regulations.

### Consistency with the Strategic Plan

Goal 4 of the Commission's adopted Strategic Plan<sup>1</sup> is to Strengthen the LCP Program. One of the important LCP strategies concerns completing the certification of LCPs. While most of the coast (approximately 85% of the geographic area) is governed by a certified LCP, the remaining uncertified areas continue to pose a significant coastal permit workload for the Commission. In

<sup>1</sup> California Coastal Commission, Strategic Plan 2013-2018, Approved April 2013. Accessed on 8/1/2013 at <http://www.coastal.ca.gov/California%20Coastal%20Commission%20Final%20Strategic%20Plan%202013-2018.pdf>

## Priorities for FY2013 Local Coastal Program (LCP) Grant Program

addition, many important public access, coastal resource protection, and priority coastal development issues remain to be more comprehensively addressed by an LCP in these areas, as contemplated by the Coastal Act. In addition to the uncertified areas, most of the LCPs that were certified in the 1980s and 1990s are out of date, and need updating to reflect changed conditions and new information and knowledge, new programs and policies and other significant changes.

This grant program addresses the following Objectives and Action items of the Strategic Plan:

***Objective 4.1 Pursue Completion of LCP Certification for uncertified segments and Areas of Deferred Certification where feasible.***

***Action 4.1.3 Where local jurisdictions are willing, work together to identify funding and workload management strategies to support development and certification of LCPs and ADCs***

***Objective 4.2 Work with local governments to Update LCPs where feasible***

***Objective 4.4 Continue to Improve Communication and Planning with Local Government Action***

***Action 4.4.6 Pursue joint LCP funding strategy with local government (see Action 7.4.2).***

***Action 7.4.2 Prepare a Budget Change Proposal (BCP) to request enhanced support for LCP planning. Work with partners, including local governments, on a joint budget enhancement strategy to secure additional funds***

### **B. ELIGIBLE GRANTEES AND PROJECTS**

These grants are intended to provide assistance to local governments responsible for developing and amending Local Coastal Programs. Because the funds were appropriated to focus on LCP completion and update, project-specific LCP Amendments are not eligible for these grants unless such proposals will result in certification of an LCP for a complete ADC or complete LCP segment. Also, completion of updated resource studies or other potential components necessary to an LCP submittal or LCP amendment may only be eligible if they are part of an LCP Amendment or submittal that otherwise ranks high on the criteria for grant awards, such as a high likelihood of success to address an important coastal resource issue or set of issues.

### **C. PROPOSED PROGRAM PRIORITIES AND SELECTION CRITERIA**

#### **PRIORITIES**

Applications for FY 13 LCP planning grants will be evaluated for their ability to complete or update an LCP. This will include:

## FY2013 Local Coastal Program (LCP) Grant Program

- Completion of land use plan and/or zoning work to achieve certification of a Local Coastal Program (LCP) or an Area of Deferred Certification (ADC) resulting in the new transfer of coastal development permit authority to the local government in these areas;
- Planning and/or zoning work to significantly update certified LCPs or LCP segments in whole or in part to reflect changed conditions, new information and scientific knowledge, new programs and policies, or other significant changed circumstances. Updates that address the effects of climate change, such as sea level rise, will be given special consideration.

Applicants will be expected to identify the specific elements of their LCP that they expect to complete or to update through this grant program, and a work program and timeline.

### EVALUATION CRITERIA

Staff will evaluate the grant applications against the following selection criteria. The criteria will be considered as a whole (not weighted) and compared across the applications received. Grant applications recommended for award of funds will be brought back to the Commission for approval.

#### **Public Benefit/Significance**

The Commission will consider the extent to which the proposed LCP planning effort will address issues of statewide significance and maximize public benefits of the coast. These can include: preserving and enhancing coastal habitat, protecting, providing and enhancing public access, protecting priority land uses such as agriculture, coastal dependent development or recreation, protecting and providing lower cost visitor and recreational opportunities, and addressing climate change.

LCPs are the means to implement the policies of Chapter 3 of the Coastal Act at the local level and when submitted are reviewed by the Commission for conformance with the Coastal Act. As LCPs have become more dated, their ability to provide an up to date framework to govern coastal development in light of changed circumstances and new scientific information may be weakened. As one purpose of this grant program is to update LCPs, the Commission will must consider the extent to which priority Coastal Act resources are addressed and the public benefits maximized.

#### **Relative Need for LCP Update/Extent of Update**

Related to the public benefits of a proposal, the Commission will consider the relative need for an LCP update, considering the length of time since an LCP or LCP segment has been updated and the significance of the issues proposed to be updated. For example, many sensitive species and habitats have been identified since the time of certification of many LCPs. A proposal to update an LCP's environmentally sensitive habitat (ESHA) policies, ordinances, resource maps, etc. may be an important update in specific jurisdictions. Other jurisdictions may benefit from updates in policy areas that will resolve known deficiencies or sources of conflict and/or appeals of local coastal development permits to the Commission. In addition, the extent or scope of an update is an important consideration, with higher priority being placed on proposed updates of greater extent/scope, such as a complete LUP/IP update, or an update that results in comprehensive updating of one or more policy areas or a geographic sub-area.

#### **Addressing the Effects of Climate Change**

Climate change is one of the most significant policy areas to emerge since many of the LCPs have been certified. The Commission is seeking LCP updates that address the effects of climate change, including sea level rise and other coastal hazards, as well as other issue areas affected by climate change, such as changes in habitat, fire hazards, and transportation and land use policy to facilitate reductions in greenhouse gas emissions and vehicle miles travelled. Special consideration will be given to LCP amendment proposals to address this policy area.

### **Likelihood of Success/Effectiveness**

The Commission has had past grant programs where the investment of public funds has not resulted in completed certified LCPs or LCP Amendments. In a few cases, funding has been awarded but reverted. Overall, the success of the Commission's grant program will be measured by the progress made toward LCP certification or update.

The Commission thus will consider the likelihood of success of each proposal, including evaluating the practicality, feasibility, and effectiveness of a proposed work program that may lead to successful implementation. Proposals should address the need for coordination with the public and the Commission, and provide for practicable benchmarks for LCP amendment development and review. Other evidence in support of this criteria may include resolutions of intent and endorsement for the proposed work from the jurisdiction and other organizations, matching funds or other complementary efforts (see below), or other factors that may affect the likelihood that an LCP amendment will be successfully completed. Applicants will be asked to describe any LCP planning work that has been initiated or is already underway at the local level and how this grant program is needed to substantially further that effort. A resolution from the applicant committing to completing an LCP Amendment submittal to the Commission will be required as part of the application.

For new LCP development, the local government should demonstrate its willingness and capacity to assume local coastal development permit processing. Related, some areas of the coastal zone remain uncertified because the Commission and local government have been unable to reach agreement on the resolution of issues or the issue is particularly intractable. The Commission will consider the likelihood that such areas and specific policy questions can be successfully addressed, leading to certification of the area.

### **Workload**

The Commission will consider the level of existing permit workload generated by uncertified jurisdictions and thus the relative statewide benefits of certification of any particular jurisdiction.

While most of the geographic area of the coastal zone is under certified LCPs, there are 36 segments that are not yet certified and 44 specific Areas of Deferred Certification. The Commission is responsible for review of all coastal development permits in these uncertified areas. If LCPs were certified for these areas, then most coastal development permits would be reviewed at the local level and the Commission's staff resources could be reallocated to assist matters of more statewide significance and importance, such as early coordination with local government on LCP planning matters, as well as oversight, review, and coordination with local governments on LCP implementation.

## FY2013 Local Coastal Program (LCP) Grant Program

### **Project Integration/Leverage/Matching Funds**

The Commission will consider the relationship of the LCP work program to other planning work being undertaken by the jurisdiction. Applicants will be asked to describe any other related grant awards (such as through the Ocean Protection Council, Coastal Conservancy or the Strategic Growth Council) that may support the LCP planning work and any availability and amount of local matching funds.

There are several related grant programs underway which may positively integrate with this LCP Planning Grant program. For example, the Ocean Protection Council is currently processing applications for grants to update LCPs to address Sea Level Rise. The Coastal Conservancy is administering a Climate Ready grant program ([http://scc.ca.gov/files/2013/07/Climate-Ready-grant-announcement-July-18\\_FINAL.pdf](http://scc.ca.gov/files/2013/07/Climate-Ready-grant-announcement-July-18_FINAL.pdf)). The Strategic Growth Council provides a Sustainable Communities Planning Grant and Incentives Program to fund efforts to conduct planning activities that will foster sustainable communities, lead to reduced greenhouse gas emissions, and achieve other sustainability objectives, and for which coastal jurisdictions are eligible to apply. The Commission will consider the ability to integrate and leverage any additional program funds available that could help support a comprehensive LCP certification effort or update.

### **D. REVIEW OF APPLICATIONS**

As a competitive grant program, staff will review and rank applications according to the adopted priority and criteria, and will prepare recommendations for CCC authorization of individual grant awards. The level of funding that staff will recommend to the Commission for a particular award will be determined by evaluating the grant requests against other considerations including:

- the amount of available grant funds (\$1,000,000) and the number of competing applications;
- the sequence of tasks and likelihood of timely completion of the work program;
- the necessity of each task; and,
- the reasonableness of costs proposed for specific tasks.

### **III. TENTATIVE SCHEDULE**

The tentative proposed schedule for the grant program (subject to change) is presented below.

Announce 2013 Application Requirements and Deadlines	August 19, 2013
Deadline for Submittal of Grant Applications	November 15, 2013
CCC public hearing on Recommendations for Awards	January 9-11,2014
Execute Contracts	January-March, 2014
Contract Start Dates	March 2014
Deadline for Completion of Work Products	July 1 2016
