

8. The circumstances during the emergency that appeared to justify the course(s) of action taken, including the probable consequence of failing to take action:
9. Method and preventive work required to address the emergency situation (e.g., rip rap, sandbags, etc.):
10. Timing of emergency work (estimate as to when work will be performed – generally a period of 24 to 72 hours after the emergency occurrence):

**ATTACHMENTS** – Please provide the following:

1. If time permits, evidence of approval by local planning department.
2. Site plan showing proposed and existing development on the subject parcel.
3. Vicinity map (road map) with location of project site marked. For rural areas, please also provide a parcel map.
4. Site photos and any relevant reports supporting the existence of an emergency and the need for the proposed action.
