Table. The California Offshore Wind Gateway is a portal in Data Basin (https://caoffshorewind.databasin.org). BOEM and the State of California have asked stakeholders to submit relevant data sets relevant to offshore wind development. BOEM is currently using this to access data discussed in their National Environmental Policy Act Environmental Assessment on commercial wind lease issuance offshore Morro Bay (https://www.boem.gov/renewable-energy/state-activities/morro-bay-wind-energy-area). This table lists the datasets described in Environmental Assessment and status in Data Basin. Datasets are still being imported into Data Basin now using ArcMap format or as a ArcGIS service.

Table. The California Offshore Wind Gateway is a portal in Data Basin (https://caoffshorewind.databasin.org). BOEM and the State of California have asked stakeholders to submit relevant data sets relevant to offshore wind development. BOEM is currently using this to access data discussed in their National Environmental Policy Act Environmental Assessment on commercial wind lease issuance offshore Morro Bay (https://www.boem.gov/renewable-energy/state-activities/morro-bay-wind-energy-area). This table lists the datasets described in Environmental Assessment and status in Data Basin. Datasets are still being imported into Data Basin now using ArcMap format or as a ArcGIS service.
