

The Clean Marinas program was developed by marine industry volunteers to create a marina facility stewardship program for the purpose of protecting our waters from pollution. Through education and the use of Best Management Practices (BMP'S) we work with marina operators, yacht clubs and municipal port authorities to gain certification. In turn they volunteer to help mentor others as a synergistic approach to growing the membership of certified clean marinas.

This program would not be possible without the support and dedication of all the volunteers working on the Clean Marinas Program.

Mission Statement

The Clean Marinas program is an ongoing endeavor, by a marina industry alliance, determined to provide environmentally clean facilities and protect the states' coastal and inland waters from pollution through compliance of best management practices.

CLEAN MARINAS

Ride the Wave!

Jack Gregg, PHD, California Coastal Commission

"I would like to thank you for the great strides your program has made in reducing the impacts of marinas and recreational boating on our coastal waters."

It is the objective of our partnership that all marinas in the state obtain Clean Marinas designation, proudly fly the Clean Marinas burgee or flag and display the Clean Marinas Designation Certificate and window decals. All marinas and yacht clubs are encouraged to participate in the Clean Marinas program. The Best Management Practices are written in a clear and concise manner to assist the owners/operators in being a Clean Marina.

The Clean Marina Program collaborates with a number of agencies in order to keep the Clean Marinas Program current with the latest information in environmental and educational BMP's. This partnership has provided support from the many environmental and regulatory agencies as they have offered many suggested changes and improvements that have been integrated into the program. This important partnership has proven most successful as we strive to continue the educational process of keeping our boaters up to date with educational material and programs. Going forward the members of the Clean Marina Program will continue to evaluate its program and enhance its partnerships.
