## STAFF REPORT: CONSENT CALENDAR

**APPLICATION NO.:** 

5-98-001

**APPLICANT:** The Oceanstrand Collection, LLC.

AGENT: Gerald Marcil

110 & 113 Galleon Street, Venice, City of Los Angeles, PROJECT LOCATION: Los Angeles County.

PROJECT DESCRIPTION:

Construction of two 35 foot high (each with a 44 foot high roof access structure) two-unit condominiums (4 units total) on two vacant lots with ten parking spaces.

> Lot Area 4,280 sq. ft. (two lots) Building Coverage 2,460 sq. ft. (two buildings) Pavement Coverage 1,820 sq. ft. Landscape Coverage 0 sq. ft. 10 Parking Spaces R3-1 Zoning Medium Density Residential Plan Designation Ht abv fin grade 44 feet

# SUMMARY OF STAFF RECOMMENDATION:

Staff recommends that the Commission grant a permit for the proposed development with conditions relating to density and building height. The applicant agrees with the staff recommendation.

# LOCAL APPROVALS RECEIVED:

- City of Los Angeles Local Coastal Development Permit No. 97-008. 1.
- City of Los Angeles Tentative Parcel Map LA No. 7203-C, 11/7/97. 2.
- 3. City of Los Angeles Yard Variance Case Nos. 97-0416(YV) &
  - 97-0417(YV), 11/7/97.

#### SUBSTANTIVE FILE DOCUMENTS:

- 1. California Coastal Commission Regional Interpretive Guidelines for Los Angeles County, 10/14/80.
- 2. City of Los Angeles Venice Interim Control Ordinance (ICO) #170,556.

#### STAFF RECOMMENDATION:

The staff recommends that the Commission adopt the following resolution:

# I. Approval with Conditions

The Commission hereby <u>grants</u>, subject to the conditions below, a permit for the proposed development on the grounds that the development, as conditioned, will be in conformity with the provisions of Chapter 3 of the California Coastal Act of 1976, will not prejudice the ability of the local government having jurisdiction over the area to prepare a Local Coastal Program conforming to the provisions of Chapter 3 of the Coastal Act, is located between the sea and first public road nearest the shoreline and is in conformance with the public access and public recreation policies of Chapter 3 of the Coastal Act, and will not have any significant adverse impacts on the environment within the meaning of the California Environmental Quality Act.

# II. Standard Conditions

- 1. <u>Notice of Receipt and Acknowledgment</u>. The permit is not valid and development shall not commence until a copy of the permit, signed by the permittee or authorized agent, acknowledging receipt of the permit and acceptance of the terms and conditions, is returned to the Commission office.
- 2. <u>Expiration</u>. If development has not commenced, the permit will expire two years from the date this permit is reported to the Commission. Development shall be pursued in a diligent manner and completed in a reasonable period of time. Application for extension of the permit must be made prior to the expiration date.
- 3. <u>Compliance</u>. All development must occur in strict compliance with the proposal as set forth in the application for permit, subject to any special conditions set forth below. Any deviation from the approved plans must be reviewed and approved by the staff and may require Commission approval.
- 4. <u>Interpretation</u>. Any questions of intent or interpretation of any condition will be resolved by the Executive Director or the Commission.
- 5. <u>Inspections</u>. The Commission staff shall be allowed to inspect the site and the project during its development, subject to 24-hour advance notice.

6. <u>Assignment</u>. The permit may be assigned to any qualified person, provided assignee files with the Commission an affidavit accepting all terms and conditions of the permit.

5-98-001 Page 3

7. <u>Terms and Conditions Run with the Land</u>. These terms and conditions shall be perpetual, and it is the intention of the Commission and the permittee to bind all future owners and possessors of the subject property to the terms and conditions.

#### III. Special Conditions

1. Number of Units

The permitted use of each proposed structure is limited to two residential condominium units.

#### 2. <u>Height</u>

Σ.

The height of the roofs shall not exceed 35 feet above the centerline of the Galleon Street right-of-way. Only roof deck railings, parapet walls, chimneys, roof access housings, air conditioning equipment, and solar collectors may extend above the 35 foot roof height limit (as shown on the approved plans). No portion of the structures shall extend more than 44 feet above the centerline of the Galleon Street right-of-way.

#### IV. Findings and Declarations

The Commission hereby finds and declares:

#### A. <u>Project Description</u>

The applicant proposes to construct two four-level, 35 foot high condominium buildings on two vacant lots in the Marina Peninsula area of Venice (Exhibit  $\sharp$ 2). Each proposed structure will contain two 2,100 square foot (approx.) residential condominium units (Exhibit  $\sharp$ 3). The four proposed condominium units will be served by ten parking spaces: five parking spaces on each lot (Exhibit  $\sharp$ 4). The parking spaces will be accessed from the rear and side alleys, not from Galleon Street.

The Commission has recognized in both prior permit and appeal decisions that the Marina Peninsula area of Venice area is a special coastal neighborhood. In 1980, when the Commission adopted the Regional Interpretive Guidelines for Los Angeles County, a set of building standards was adopted for the Marina Peninsula area of Venice in order to protect public access to the beach and community character. These building standards, which apply primarily to density, height and parking, reflect conditions imposed in a series of permits heard prior to 1980. Since then, these density, height and parking standards 5-98-001 Page 4

have been routinely applied to Coastal Development Permits in the area in order to protect public access and community character. Special conditions are imposed on Coastal Development Permits ensure that the projects are consistent with the Coastal Act and the Commission's guidelines. In order to mitigate the identified impacts, the appropriate special conditions have also been applied to this permit.

#### B. <u>Community Character</u>

551 La - 12

Section 30251 of the Coastal Act states:

The scenic and visual qualities of coastal areas shall be considered and protected as a resource of public importance. Permitted development shall be sited and designed to protect views to and along the ocean and scenic coastal areas, to minimize the alteration of natural land forms, to be visually compatible with the character of surrounding areas...

In order to protect public access, community character and visual quality in the Marina Peninsula area of Venice, the Commission has consistently limited residential density and structural height. The Commission's building standards for the Marina Peninsula area of Venice are contained in the Regional Interpretive Guidelines for Los Angeles County.

Residential density in this area of Venice is limited to two units per lot. The applicant proposes to construct two residential condominium units on each of the two subject parcels. City of Los Angeles Tentative Parcel Map LA No. 7203-C approved two condominium units on each lot in compliance with the density limit for the area. A condition of approval on this permit states that the permitted use of each of the proposed structures is limited to two residential condominium units.

The Commission has consistently limited new development in the Marina Peninsula area of Venice to a height of 35 feet measured above the fronting right-of-way. The Commission has, however, allowed portions of some structures to exceed the 35 foot height limit by up to ten feet if the scenic and visual qualities of the area are not negatively impacted.

Both of the proposed structures have a roof height of 35 feet (Exhibit #5). However, some parts of the proposed structures exceed the 35 foot roof height. These portions of the proposed structures include roof equipment boxes, chimneys, and two roof access housings. These structures do not extend more than 44 feet above the fronting right-of-way (Exhibit #4).

The City of Los Angeles Venice Interim Control Ordinance (ICO) also limits building heights in the area to 35 feet. The City may grant exceptions to its height limit for specific parts of structures like chimneys, roof equipment, roof access structures, deck railings, parapet walls, and skylights. In this case, the City has approved Local Coastal Development Permit No. 97-008 for the proposed project.

The Commission must, however, determine whether the proposed project conforms to the visual resource policies contained in Section 30251 of the Coastal

Act. Section 30251 of the Coastal Act requires that the scenic and visual qualities of coastal areas shall be considered and protected.

As previously stated, the Commission has allowed portions of some structures to exceed the 35 foot height limit by up to ten feet if the scenic and visual qualities of the area are not negatively impacted. The portions of structures which have been previously allowed to exceed the 35 foot height limit include parapet walls and railings around roof decks, roof access structures, chimneys, air conditioning equipment and skylights. These rooftop structures shall be sited upon the roof in a manner which minimizes their visibility from public areas. Roof access structures have been permitted to exceed the height limit only if they contain no living or storage space and if they do not negatively impact the visual resources of the area.

As proposed, the design of the proposed project adequately protects the visual resources along Venice Beach. The proposed project complies with the visual resource policies of the Coastal Act by minimizing the bulk of the rooftop structures. The proposed rooftop structures do not extend above the heights of nearby roof deck structures and will not be visible from the beach which is located approximately three hundred feet west of the site. In addition, the proposed project does not include any enclosed living or storage space over the 35 foot height limit. Therefore, the Commission finds that the proposed project will not negatively impact the visual resources of the area, and that the proposed proposed project conforms to the Commission's height requirements and previous approvals in the Marina Peninsula area of Venice.

In order to ensure that the proposed project is constructed as approved, the approval is conditioned to limit the roof height of the two proposed structures to 35 feet above the centerline of the Galleon Street right-of-way. Only roof deck railings, parapet walls, chimneys, roof access housings, air conditioning equipment, and solar collectors may extend above the 35 foot roof height limit (as shown on the approved plans). No portion of the structures shall extend more than 44 feet above the centerline of the Galleon Street right-of-way. Only as conditioned is the proposed project consistent with the Coastal Act's visual resource policies.

Another community character issue is the provision of front yard areas in newly designed homes in the Marina Peninsula area. Most of the existing homes in the area provide a small front yard area between the structure and the fronting street. Garage access is typically provided by the alleys, not the fronting streets (Exhibit #3). The landscaped front yard areas that already exist in the neighborhood give the area a more attractive appearance than it would have if all of the street fronting areas were paved over for driveways. In addition, any curb cuts on the fronting streets would reduce the amount of public on-street parking that is used for beach access and guest parking.

The proposed project does provide front yard areas along Galleon Street for both proposed structures. No curb cuts are proposed on Galleon Street. The ten required on-site parking spaces are accessed from the side and rear alleys (Exhibit #4). Therefore, the proposed project conforms with the character of surrounding area, and as conditioned, is consistent with the Coastal Act's visual resource policies.

÷.

# C. Parking

The Commission has consistently found that a direct relationship exists between residential density, the provision of adequate parking, and the availability of public access to the coast. Section 30252 requires that new development should maintain and enhance public access to the coast by providing adequate parking facilities.

Section 30252 of the Coastal Act states, in part:

The location and amount of new development should maintain and enhance public access to the coast by... (4) providing adequate parking facilities....

Many of the older developments in the Venice area do not provide adequate on-site parking. As a result, there is a parking shortage in the area and public access has been negatively impacted. The small amount of parking area that may be available for the general public on the surrounding streets is being used by guests and residents of the area. Because of the shortage of parking in the Venice area, the protection of existing public parking is of primary importance.

To help mitigate the shortage of parking in the area, the Commission has consistently conditioned new development within the Marina Peninsula area of Venice to provide two parking spaces per residential unit and provide provisions for guest parking. The proposed project provides five on-site parking spaces on each of the two lots for ten total parking spaces (Exhibit #4). Two parking spaces are provided for each proposed residential unit (four condominium units), and two additional spaces are proposed for guest parking. As stated above, the proposed parking spaces are accessed from the alleys and no curb cuts are proposed on Galleon Street.

In order to maximize public parking opportunities in this coastal area, the Commission finds that the lot frontage on Galleon Street shall not be utilized for private garage access, but reserved for public on-street parking. Garage access should be taken from the side or rear alleys. Most of the existing buildings in the area are designed with garage access in the rear only. Curb cuts for garage access are prohibited in order to preserve the possibility of maximum on-street public parking for beach access.

The project proposes adequate on-site parking spaces to meet the needs of the proposed condominium units. In addition, the design of the proposed parking supply is compatible with community character and will not result in the loss of any on-street public parking along Galleon Street. Therefore, the proposed project consistent with the Commission's parking standards for the Marina Peninsula area and the public access policies of the Coastal Act.

# D. Local Coastal Program

94

Section 30604(a) of the Coastal Act provides that the Commission shall issue a Coastal Permit only if the project will not prejudice the ability of the local government having jurisdiction to prepare a Local Coastal Program which conforms with Chapter 3 policies of the Coastal Act:

(a) Prior to certification of the Local Coastal Program, a Coastal Development Permit shall be issued if the issuing agency, or the commission on appeal, finds that the proposed development is in conformity with the provisions of Chapter 3 (commencing with Section 30200) of this division and that the permitted development will not prejudice the ability of the local government to prepare a Local Coastal Program that is in conformity with the provisions of Chapter 3 (commencing with Section 30200). A denial of a Coastal Development Permit on grounds it would prejudice the ability of the local government to prepare a Local Coastal Program that is in conformity with the provisions of Chapter 3 (commencing with Section 30200) shall be accompanied by a specific finding which sets forth the basis for such conclusion.

The proposed project, only as conditioned, is consistent with the Chapter 3 policies of the Coastal Act. Therefore, the Commission finds that approval of the proposed development, as conditioned, will not prejudice the City's ability to prepare a Local Coastal Program consistent with the policies of Chapter 3 of the Coastal Act, as required by Section 30604(a).

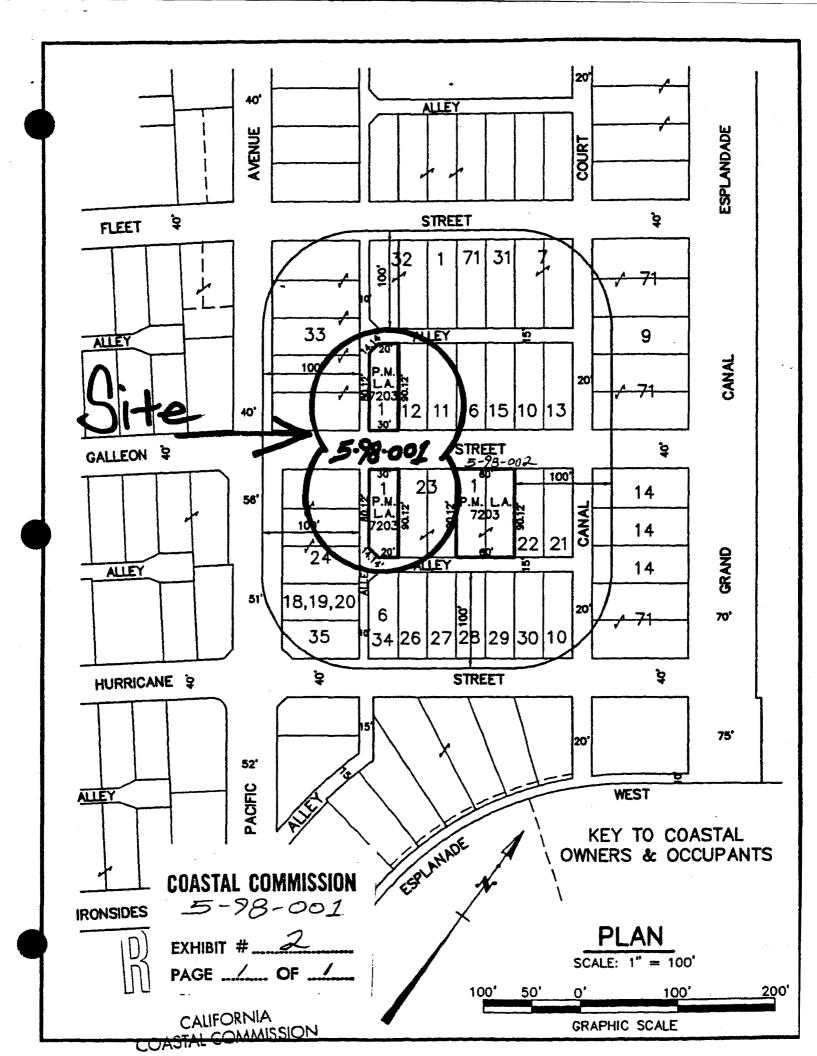

### E. California Environmental Quality Act

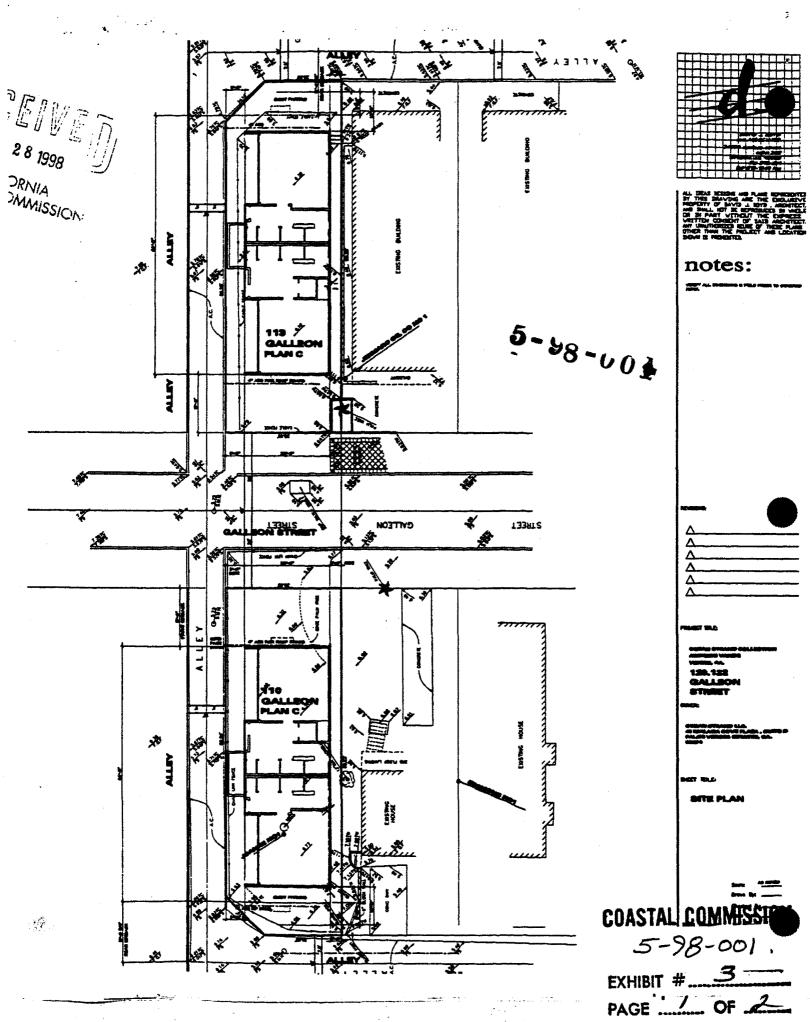

Section 13096 of the California Code of Regulations requires Commission approval of Coastal Development Permit application to be supported by a finding showing the application, as conditioned by any conditions of approval, to be consistent with any applicable requirements of the California Environmental Quality Act (CEQA). Section 21080.5(d)(2)(i) of CEQA prohibits a proposed development from being approved if there are feasible alternatives or feasible mitigation measures available which would substantially lessen any significant adverse impact which the activity may have on the environment.

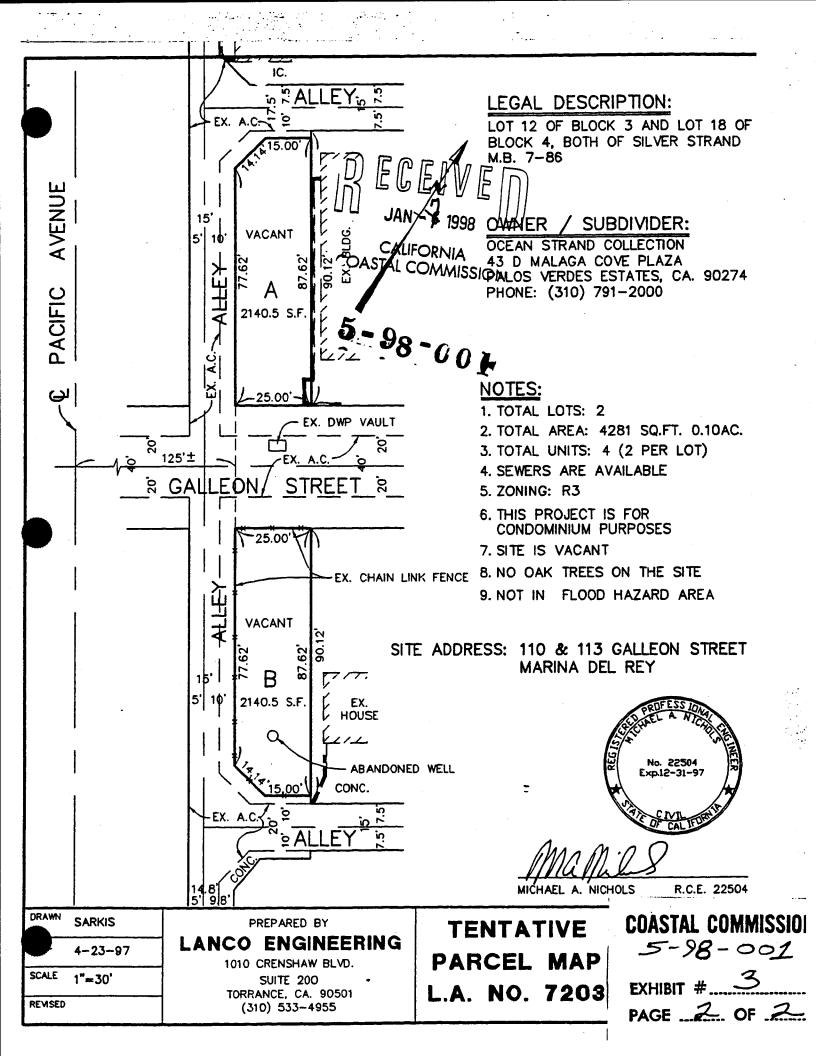

The proposed project, only as conditioned, is consistent with the Chapter 3 policies of the Coastal Act. Therefore, the Commission finds that the proposed project, as conditioned to mitigate the identified impacts, is the least environmentally damaging feasible alternative and can be found consistent with the requirements of the Coastal Act to conform to CEQA.
