Commission Action:

**STAFF REPORT: PERMIT AMENDMENT****AMENDMENT**

**APPLICATION NUMBER:** 5-99-223-A1

**APPLICANTS:** Rodger Cosgrove & M.M. Collins, Newport Coast, LLC

**AGENT:** Swift Slip Dock and Pier Builders

**PROJECT LOCATION:** 1705 & 1707 E. Bay Avenue, Newport Beach (Orange County)

**DESCRIPTION OF PROJECT PREVIOUSLY APPROVED:** Construct new boat dock consisting of a new pier including an 8 by 4 foot walkway with a 10 by 14 foot platform area and a 3 by 22 foot gangway, and install a 55 by 5 foot float at 1705 E. Bay Avenue. The pier (including walkway and platform) will be supported by two 14 inch diameter T-piles. The float will be anchored by two 16 inch and one 14 inch guide piles. The proposed uses for the 10 by 14 foot platform are installation of storage lockers in which boating equipment such as life preservers, life jackets, boat cushions, boat covers, and other miscellaneous boating equipment will be stored; as a placement area to facilitate loading and unloading of equipment and provisions on or off the boat prior to departure or arrival; storage of kayaks and/or other smaller marine vessels such as sabots, etc.; staging area to facilitate safe entry and departure to and from the boat; and as a staging area for performing maintenance and/or repairs to the boat.

**DESCRIPTION OF AMENDMENT:** Remove two existing boat docks and construct two new boat docks consisting of two piers including two 10 by 10 foot platforms and two 3 by 22 foot gangways, and install a new float with two 52 by 4 foot fingers and one 52 by 5 foot finger connected by a 45 by 8 foot backwalk at 1705 and 1707 E. Bay Avenue. The piers (including platforms) will be supported by four 14 inch diameter T-piles. The floats and gangways will be anchored by five 14 inch guide piles. The proposed uses for the two new platforms will be consistent with those approved previously.

**APPROVALS RECEIVED:** City of Newport Beach Fire and Marine Department approval-in-concept dated October 5, 1999 (Harbor Permit #107-1707) and California Regional Water Quality Control Board approval dated November 22, 1999.

**SUBSTANTIVE FILE DOCUMENTS:** Coastal development permits 5-99-223 (WMC Development); City of Newport Beach Certified Land Use Plan, City of Newport Beach Harbor Permit Policies, Coastal Development Permits 5-98-523 (Bridges), 5-99-120 (Sutherland), 5-99-121 (Vance), 5-99-123 (Bradburne).

**SUMMARY OF STAFF RECOMMENDATION:**

Staff recommends the Commission **approve** the proposed development subject to one special condition. The major issue of this staff report is the inclusion of a second property (1707 E. Bay Avenue) and the reconfiguration of the proposed dock design. Special condition No. 1 establishes that all prior conditions imposed by coastal development permit 5-99-223 remain in effect.

**PROCEDURAL NOTE:**

The Commission's regulations provide for referral of permit amendment requests to the Commission if:

- 1) The Executive Director determines that the proposed amendment is a material change,
- 2) Objection is made to the Executive Director's determination of immateriality, or
- 3) The proposed amendment affects conditions required for the purpose of protecting a coastal resource or coastal access.

If the applicant or objector so requests, the Commission shall make an independent determination as to whether the proposed amendment is material. 14 Cal. Admin. Code 13166.

The current application is being referred to the Commission as a result of the Executive Director's determination that the proposed amendment is a material change to the original permit and affects conditions required for the purpose of protecting a coastal resource. The previously approved project involved new dock construction at only one property (1705 E. Bay Ave.), whereas the currently proposed project involves new dock construction at two properties (1705 and 1707 E. Bay Ave.). The new project design includes shared dock features between the subject properties.

The original permit conditioned the project for 1) Storage of Construction Materials, Mechanized Equipment and Removal of Construction Debris and 2) Use of Platform Limited to Boating Related Uses. The proposed amendment is a material change to the original permit because an additional property will be added to the permit and the proposed dock design has been significantly modified from its previously approved form. Conditions imposed on development at the original permit site (1705 E. Bay Ave.) will be extended to development at the second site (1707 E. Bay Ave.).

**STAFF RECOMMENDATION:**

Staff recommends that the Commission APPROVE the amendment application with special conditions.

**MOTION:**

*I move that the Commission approve permit amendment No. 5-99-223 A1 pursuant to the staff recommendation.*

Staff recommends a **YES** vote. This will result in adoption of the following resolution and findings. The motion passes only by affirmative vote of a majority of Commissioners present.

**RESOLUTION:**

**I. APPROVAL WITH CONDITIONS:**

The Commission hereby **APPROVES** an amendment to coastal development permit 5-99-223-A1, subject to the conditions below, for the proposed development on the grounds that the development will be in conformity with the provisions of Chapter 3 of the California Coastal Act of 1976, is between the first public road and the sea and is consistent with the access and recreation policies of the Coastal Act, will not prejudice the ability of the local government having jurisdiction over the area to prepare a Local Coastal Program conforming to the provisions of Chapter 3 of the Coastal Act, and will not have any significant adverse effects on the environment within the meaning of the California Environmental Quality Act.

**II. STANDARD CONDITIONS:**

1. Notice of Receipt and Acknowledgment. The permit is not valid and development shall not commence until a copy of the permit, signed by the permittee or authorized agent, acknowledging receipt of the permit and acceptance of the terms and conditions, is returned to the Commission office.
2. Expiration. If development has not commenced, the permit will expire two years from the date this permit is reported to the Commission. Development shall be pursued in a diligent manner and completed in a reasonable period of time. Application for extension of the permit must be made prior to the expiration date.
3. Compliance. All development must occur in strict compliance with the proposal as set forth in the application for permit, subject to any special conditions set forth below. Any deviation from the approved plans must be reviewed and approved by the staff and may require Commission approval.
4. Interpretation. Any questions of intent or interpretation of any condition will be resolved by the Executive Director or the Commission.
5. Inspections. The Commission staff shall be allowed to inspect the site and the project during its development, subject to 24-hour advance notice.
6. Assignment. The permit may be assigned to any qualified person, provided assignee files with the Commission an affidavit accepting all terms and conditions of the permit.
7. Terms and Conditions Run with the Land. These terms and conditions shall be perpetual, and it is the intention of the Commission and the permittee to bind all future owners and possessors of the subject property to the terms and conditions.

**III. SPECIAL CONDITION:**

1. Prior Conditions

Unless specifically altered by this amendment, all regular and special conditions attached to coastal development permit 5-99-223 remain in effect and shall apply to both properties.

**IV. FINDINGS AND DECLARATIONS:**

The Commission hereby finds and declares:

**A. Project Location, Background, and Amended Project Description**

The proposed development will occur at 1705 and 1707 E. Bay Avenue, in the City of Newport Beach, County of Orange. The project has been modified from its previously approved form by the addition of a second dock site, a reconfiguration of the dock design and the placement of additional piles. The newly proposed dock configuration includes a shared finger float and backwalk between the two subject properties. The subject site is located on the harbor side of the Balboa Peninsula. (Exhibit 1) The City inspected the subject site for eelgrass and none was found. In addition, the Regional Water Quality Control Board has determined that the proposed project will not adversely impact water quality if standard construction methods and materials are used.

1. Previously Approved Project

Coastal development permit 5-99-223 approved the following development at 1705 E. Bay Avenue: Construction of a new boat dock consisting of a new pier including an 8 by 4 foot walkway with a 10 by 14 foot platform area and a 3 by 22 foot gangway, and the installation of a 55 by 5 foot float. The pier including walkway and platform will be supported by two 14 inch diameter T-piles. The float will be anchored by two 16 inch and one 14 inch guide piles. (See page 10 of Exhibit 2) The proposed uses for the 10 by 14 foot platform are installation of storage lockers in which boating equipment such as life preservers, life jackets, boat cushions, boat covers, and other miscellaneous boating equipment will be stored, as a placement area to facilitate loading and unloading of equipment and provisions on or off the boat prior to departure or arrival, storage of kayaks and/or other smaller marine vessels such as sabots, etc., staging area to facilitate safe entry and departure to and from the boat, and as a staging area for performing maintenance and/or repairs to the boat.

2. Proposed Amendment Description

The subject amendment would modify the previously approved development at 1705 E. Bay Avenue and would result in new development at 1707 E. Bay Avenue. The proposed project involves the removal of the two existing docks and the construction of two new boat docks consisting of two new piers including two ten by ten foot platforms and two new 3 by 22 foot gangways and the installation of a new float with two 52 by 4 foot fingers and one 52 by 5 foot finger connected by a 45 by 8 foot backwalk. The piers (including platforms) will be supported by four 14 inch diameter T-piles. The floats and gangways will be anchored by five 14 inch guide piles. (See Exhibit 3) The proposed uses for the two platforms will be consistent with those approved previously.

The proposed development requires an amendment to coastal development permit 5-99-223 because a second property has been included and the project design has been significantly modified from its previously approved form. However, the proposed amendment does not result in any changes to the previously imposed special conditions.

On August 10, 1999, the Commission granted to WMC Development CDP No. 5-99-223, subject to two special conditions. Special condition No. 1 requires minimization of construction impacts on harbor bottom and intertidal areas, appropriate storage of construction materials, removal of construction debris, and no mechanized equipment, except a barge or land-mounted crane, seaward of the bulkhead. Special condition No. 2 limits the use of the 10 by 14 foot platform solely to boating related uses. The Commission-approved findings are attached as Exhibit 2. These findings establish the basis for the imposition of the original special conditions. The conditions remain wholly applicable to the currently proposed project. The permit amendment will not lessen or eliminate the need for the previously approved special conditions. Therefore, Special condition No. 1 of the proposed permit amendment establishes that the previously imposed special conditions remain in effect and will now apply to both properties.

B. Local Coastal Program

Section 30604(a) of the Coastal Act provides that the Commission shall issue a coastal permit only if the project will not prejudice the ability of the local government having jurisdiction to prepare a Local Coastal Program which conforms with Chapter 3 policies of the Coastal Act.

The Commission certified the Land Use Plan for the City of Newport Beach on May 19, 1982. As conditioned, the proposed development is consistent with the policies contained in the certified Land Use Plan and with the Chapter 3 policies of the Coastal Act. Therefore, approval of the proposed development will not prejudice the City's ability to prepare a Local Coastal Program for Newport Beach that is consistent with the Chapter 3 policies of the Coastal Act as required by Section 30604(a).

**C. California Environmental Quality Act**

Section 13096(a) of the Commission's administrative regulations requires Commission approval of Coastal Development Permit applications to be supported by a finding showing the application, as conditioned by any conditions of approval, to be consistent with any applicable requirements of the California Environmental Quality Act (CEQA). Section 21080.5(d)(2)(A) of CEQA prohibits a proposed development from being approved if there are feasible alternatives or feasible mitigation measures available which would substantially lessen any significant adverse effect which the activity may have on the environment.

The proposed project is located in an urban area. All infrastructure necessary to serve the site exist in the area. The proposed project has been conditioned to assure that the project will not have a significant adverse impact on coastal resources. No further mitigation measures are required for the proposed amendment.

As conditioned, no feasible alternatives or feasible mitigation measures are known, beyond those required, which would substantially lessen any identified significant effect which the activity may have on the environment. Therefore, the Commission finds that the proposed project, as conditioned, is the least environmentally damaging feasible alternative and is consistent with CEQA and the policies of the Coastal Act.

**APPLICATION NUMBER:** 5-99-223

**APPLICANT:** WMC Development

**AGENT:** Pete Swift, Swift Slip

**PROJECT LOCATION:** 1705 E. Bay Ave., Balboa (Newport Beach), Orange County

**PROJECT DESCRIPTION:** Construct new boat dock consisting of a new pier including an 8 by 4 foot walkway with a 10 by 14 foot platform area, a 3 by 22 foot gangway, and install a 55 by 5 foot float. The pier including walkway and platform will be supported by two 14 inch diameter T-piles. The float will be anchored by two 16 inch and one 14 inch guide piles. The proposed uses for the 10 by 14 foot platform are installation of storage lockers in which boating equipment such as life preservers, life jackets, boat cushions, boat covers, and other miscellaneous boating equipment will be stored, as a placement area to facilitate loading and unloading of equipment and provisions on or off the boat prior to departure or arrival, storage of kayaks and/or other smaller marine vessels such as sabots, etc., staging area to facilitate safe entry and departure to and from the boat, and as a staging area for performing maintenance and/or repairs to the boat.

**LOCAL APPROVALS RECEIVED:** City of Newport Beach Fire and Marine Department approval in concept, Harbor Permit Number 109-1705.

**SUBSTANTIVE FILE DOCUMENTS:** City of Newport Beach certified Land Use Plan, City of Newport Beach Harbor Permit Policies, Coastal Development Permits 5-98-523 (Bridges), 5-99-120 (Sutherland), 5-99-121 (Vance), 5-99-123 (Bradburne).

**SUMMARY OF STAFF RECOMMENDATION:**

Staff recommends approval of the proposed development subject to two special conditions. Special condition No. 1 requires minimization of construction impacts on harbor bottom and intertidal areas, appropriate storage of construction materials, removal of construction debris, and no mechanized equipment, except a barge or land-mounted crane, seaward of the bulkhead. Special condition No. 2 limits the use of the 10 by 14 foot platform solely to boating related uses.

**STAFF RECOMMENDATION:**

The staff recommends that the Commission adopt the following resolution:

**I. APPROVAL WITH CONDITIONS**

The Commission hereby **GRANTS** a permit, subject to the conditions below, for the proposed development on the grounds that the development will be in conformity with the provisions of Chapter 3 of the California Coastal Act of 1976, will not prejudice the ability of the local government having jurisdiction over the area to prepare a Local Coastal Program conforming to the provisions of Chapter 3 of the Coastal Act, and will not have any significant adverse effects on the environment within the meaning of the California Environmental Quality Act.

**II. STANDARD CONDITIONS:**

1. **Notice of Receipt and Acknowledgment.** The permit is not valid and development shall not commence until a copy of the permit, signed by the permittee or authorized agent, acknowledging receipt of the permit and acceptance of the terms and conditions, is returned to the Commission office.
2. **Expiration.** If development has not commenced, the permit will expire two years from the date this permit is reported to the Commission. Development shall be pursued in a diligent manner and completed in a reasonable period of time. Application for extension of the permit must be made prior to the expiration date.
3. **Compliance.** All development must occur in strict compliance with the proposal as set forth in the application for permit, subject to any special conditions set forth below. Any deviation from the approved plans must be reviewed and approved by the staff and may require Commission approval.
4. **Interpretation.** Any questions of intent or interpretation of any condition will be resolved by the Executive Director or the Commission.
5. **Inspections.** The Commission staff shall be allowed to inspect the site and the project during its development, subject to 24-hour advance notice.
6. **Assignment.** The permit may be assigned to any qualified person, provided assignee files with the Commission an affidavit accepting all terms and conditions of the permit.
7. **Terms and Conditions Run with the Land.** These terms and conditions shall be perpetual, and it is the intention of the Commission and the permittee to bind all future owners and possessors of the subject property to the terms and conditions.

III. SPECIAL CONDITIONS

EXHIBIT # 2  
PAGE 3 OF 10

1. Storage of Construction Materials, Mechanized Equipment and Removal of Construction Debris

The permittee shall comply with the following construction-related requirements:

- (a) No construction materials, debris, or waste shall be placed or stored where it may be subject to wave erosion and dispersion;
- (b) Any and all debris resulting from construction activities shall be removed from the project site within 24 hours of completion of construction;
- (c) No machinery, with the exception of a barge or land-mounted crane, shall be allowed at any time seaward of the bulkhead;
- (d) Disturbance of the harbor bottom and intertidal areas shall be minimized.

2. Use of Platform Limited to Boating Related Uses

By acceptance of this permit the applicant agrees and acknowledges that the sole use of the 10 by 14 foot platform area is limited to boating related uses and shall not be used for any other uses including but not limited to private residential patio amenities.

IV. FINDINGS AND DECLARATIONS:

The Commission hereby finds and declares:

A. Project Description and Location

The applicant proposes to construct new boat dock consisting of a new pier including an 8 by 4 foot walkway with a 10 by 14 foot platform area, a 3 by 22 foot gangway, and install a 55 by 5 foot float. The pier including walkway and platform will be supported by two 14 inch diameter T-piles. The float will be anchored by two 16 inch and one 14 inch guide piles. The proposed uses for the 10 by 14 foot platform are installation of storage lockers in which boating equipment such as life preservers, life jackets, boat cushions, boat covers, and other miscellaneous boating equipment will be stored, as a placement area to facilitate loading and unloading of equipment and provisions on or off the boat prior to departure or arrival, storage of kayaks and/or other smaller marine vessels such as sabots, etc., staging area to facilitate safe entry and departure to and from the boat, and as a staging area for performing maintenance and/or repairs to the boat.

The subject site is located in the City of Newport Beach on the harbor side of the Balboa Peninsula. The subject site was inspected for eelgrass and none was found.

B. Marine Environment

Section 30233 of the Coastal Act states, in pertinent part:

(a) The diking, filling, or dredging of open coastal waters, wetlands, estuaries, and lakes shall be permitted in accordance with other applicable provisions of this division, where there is no feasible less environmentally damaging alternative, and where feasible mitigation measures have been provided to minimize adverse environmental effects, and shall be limited to the following:

(4) In open coastal waters, other than wetlands, including streams, estuaries, and lakes, new or expanded boating facilities and the placement of structural pilings for public recreational piers that provide public access and recreational opportunities.

In addition, the City's certified Land Use Plan states:

Residential and commercial structures (except piers and docks used exclusively for berthing of vessels) shall not be permitted to encroach beyond the bulkhead line.

The Coastal Act limits the fill of open coastal waters. Section 30233 of the Coastal Act allows fill of open coastal waters, such as Newport Harbor, for recreational boating purposes. The proposed project requires piles, which constitute fill. The piles necessary to support the proposed float are allowable because they are necessary to support a recreational boating facility. The project proposes to use two T-piles to support the pier and platform area. The question has arisen of whether or not the proposed 10 by 14 foot platform constitutes a bona fide boating use or would serve as private residential patio area. If not a legitimate boating facility, the platform would be inconsistent with the uses allowed under Section 30233. In addition, the City's certified Land Use Plan (LUP) policy cited above precludes residential and commercial structures (except piers and docks used exclusively for berthing of vessels) from encroaching beyond the bulkhead line.

Existing private, residential boating facilities in Newport Harbor often consist of a pile-supported pier with platform area, a gangway, and a rectangular or "U" shaped float. The City's Harbor Permit Policies limit the size of the platforms to 10 by 14 feet. Piers are fixed, pile-supported structures which extend from dry land areas to water areas connecting to a gangway which leads to a float. The length of a pier depends on the size of the boat, the amount of draft the boat needs, and the depth of the water. The overall length of a boat dock is limited by the City's Harbor Permit Policies (HPP). The HPP do not allow docks to extend channelward of the adjudicated U.S. Pierhead Line, except in certain specified areas where, due to the bottom configuration and/or the width of the channel, they are allowed to extend to the adjudicated U.S. Project Line.

The piers and gangways are typically 3 to 4 feet wide. The docks or floats vary in size and configuration depending largely upon the type and size of boat to be docked. The majority of boat docks in Newport Harbor have platforms. Based upon a site visit, review of aerial photos of the harbor, conversations with the Newport Beach Fire and Marine Safety Department staff, and review of prior waivers and coastal development permits, Commission staff confirmed the approval of several platforms. Commission staff observed that while some of the existing platforms in Newport Harbor contained lockers, small boats, kayaks, and boating equipment or were empty, others had tables and chairs or benches, flower pots, etc. Staff also observed that while some of the platforms were supported by pilings at each corner, other platforms and piers were supported by a single row of "T" shaped piles.

The applicant has indicated that the platform will be used solely for boating purposes. More specifically installation of storage lockers in which boating equipment such as life preservers, jackets, boat cushions, boat covers, and other miscellaneous boating equipment will be stored, as a placement area to facilitate loading and unloading of equipment and provisions on or off the boat prior to departure or arrival, storage of kayaks and/or other smaller marine vessels such as sabots, etc., staging area to facilitate safe entry and departure to and from the boat, and as a staging area for performing maintenance and/or repairs to the boat. Also backflow devices would be mounted on the platform. Based on the uses proposed by the applicant, the Commission finds that the proposed platform does constitute a boating facility. As a boating facility, the proposed platform is a use specifically allowed under Section 30233(a)(4) of the Coastal Act.

Although as proposed the platform constitutes a bona fide boating facility, there is the possibility that additional uses may be contemplated in the future. If a future use did not constitute a legitimate boating use, the issue of fill (in the form of piles supporting the platform) for a non-allowable use is raised. For example, the platform area could be converted to private residential patio use by the placement of chairs or tables. In order to assure that this does not happen, special condition No. 2 is required. Special condition No. 2 limits the use of the platform solely for boating related purposes.

Section 30233 also requires that any project involving fill of open coastal waters, in addition to being an allowable use, must also be the least environmentally damaging feasible alternative. One way to reduce environmental damage is to minimize the amount of fill. Some platforms in Newport Harbor have been constructed using two T-piles centered under the platform area rather than a single pile at each of the four corners. Although the T-piles have a slightly larger diameter than the single piles, the use of two T piles rather than four single piles results in less fill. In addition, the project has been designed in conformance with the Department of Boating and Waterways Guidelines, and uses only the piles necessary to support recreational boating facilities. Therefore, the Commission finds that as proposed the design of the project, including the platform, is the least environmentally damaging feasible alternative.

Section 30233 also requires that any project which results in fill of open coastal waters also provide adequate mitigation. The proposed project meets this requirement because the pilings provide habitat for marine organisms. Therefore, the Commission finds that the proposed project is consistent with Section 30233 of the Coastal Act.

### C. Public Access

Section 30604(c) of the Coastal Act requires that every coastal development permit issued for any development between the nearest public road and the sea includes a specific finding that the development is in conformance with the public access and recreation policies of Chapter 3 of the Coastal Act. The proposed development is located between the sea and the first public road.

Section 30212 of the Coastal Act states, in relevant part:

- (a) Public access from the nearest public roadway to the shoreline and along the coast shall be provided in new development projects except where:
  - (2) adequate access exists nearby.

Section 30224 of the Coastal Act states:

EXHIBIT # 2  
PAGE 6 OF 10

Increased recreational boating use of coastal waters shall be encouraged, in accordance with this division, by developing dry storage areas, increasing public launching facilities, providing additional berthing space in existing harbors, limiting non-water-dependent land uses that congest access corridors and preclude boating support facilities, providing harbors of refuge, and by providing for new boating facilities in natural harbors, new protected water areas, and in areas dredged from dry land.

Sections 30210, 30211 and 30212 of the Coastal Act require that new development provide maximum public access and recreation, not interfere with the public's right of acquired access, and provide public access from the nearest public roadway to the shoreline and along the coast except under certain circumstances. The subject site is on Newport Harbor. Public vertical access to the harbor exists one lot east of the site at the I Street streetend. Vertical access also exists one block west at the J Street streetend. Lateral access exists at the wide sandy ocean beach approximately five blocks south of the subject site.

The proposed development consists of construction of a new boat dock. The proposed development will not adversely impact navigation. The development will not create additional adverse impacts on coastal access and recreation. The proposed development does not constitute an intensification of use. Therefore, the Commission finds that the proposed development does not pose significant adverse impacts on existing public access and recreation and is consistent with Section 30212 of the Coastal Act.

In addition, the proposed development is a recreational boating facility. Recreational boating facilities are an encouraged use under Section 30224 of the Coastal Act. Therefore, the proposed development is consistent with Section 30224 of the Coastal Act.

#### **D. Water Quality**

Section 30230 of the Coastal Act states:

Marine resources shall be maintained, enhanced, and where feasible, restored. Special protection shall be given to areas and species of special biological or economic significance. Uses of the marine environment shall be carried out in a manner that will sustain the biological productivity of coastal waters and that will maintain healthy populations of all species of marine organisms adequate for long-term commercial, recreational, scientific, and educational purposes.

The project site is on the water in Newport Harbor. The applicant is proposing to construct a new recreational boating facility. The approval from the City of Newport Beach indicates that no eelgrass is present at the site.

Because the development is located on the water there is the possibility that materials from construction may end up in the harbor waters. In order to prevent adverse impacts to marine waters from construction, special condition 1 provides for the safe storage of construction materials and the disposal of construction debris.

Only as conditioned for appropriate storage of construction materials and equipment does the Commission find that the proposed development is consistent with Section 30230 of the Coastal Act.

**E. Local Coastal Program**

EXHIBIT # 2  
PAGE 7 OF 10

Section 30604(a) of the Coastal Act provides that the Commission shall issue a Coastal permit only if the project will not prejudice the ability of the local government having jurisdiction to prepare a Local Coastal Program which conforms with Chapter 3 policies of the Coastal Act.

The Commission certified the Land Use Plan for the City of Newport Beach on May 19, 1982. As conditioned, the proposed development is consistent with the policies contained in the certified Land Use Plan and with the Chapter 3 policies of the Coastal Act. Therefore, approval of the proposed development will not prejudice the City's ability to prepare a Local Coastal Program for Newport Beach that is consistent with the Chapter 3 policies of the Coastal Act as required by Section 30604(a).

**F. California Environmental Quality Act**

Section 13096 of the Commission's regulations requires Commission approval of Coastal Development Permit applications to be supported by a finding showing the application, as conditioned by any conditions of approval, to be consistent with any applicable requirements of the California Environmental Quality Act (CEQA). Section 21080.5(d)(2)(A) of CEQA prohibits a proposed development from being approved if there are feasible alternatives or feasible mitigation measures available which would substantially lessen any significant adverse effect which the activity may have on the environment.

The proposed project has been conditioned to assure that the project will not have a significant adverse impact on coastal resources and has been conditioned in order to be found consistent with the marine resource protection policies of Sections 30230 and 30233 of the Coastal Act. Mitigation measures, in the form of a special conditions require 1) removal of construction debris and minimization of construction impacts, and 2) limiting the use of the 10 by 14 foot platform solely for boating related purposes, will minimize all adverse effects. As conditioned, there are no feasible alternatives or feasible mitigation measures available, beyond those required, which would substantially lessen any significant adverse effect which the activity may have on the environment. Therefore, the Commission finds that the proposed project, as conditioned to mitigate the identified effects, is the least environmentally damaging feasible alternative and can be found consistent with CEQA and the policies of the Coastal Act.
