

## EXHIBIT NO. 1

# PROPOSED AMENDED GENERAL PLAN (LUP) WITH SUGGESTED MODIFICATIONS

1. **Suggested Modification No. 1: (General Plan Summary)**  
All changes to Part 1: General Plan Summary

## PART I

### ~~GENERAL~~ COASTAL LAND USE PLAN SUMMARY

#### INTRODUCTION

The Coastal Land Use Plan establishes policies for all land within the Coastal Zone portions of Del Norte County. Approximately one-third of the County of Del Norte is located within the Coastal Zone, including all of the lands lying within 1,000 yards of the high tide line of the Pacific Ocean and most of the lands on the west side of Highway 101, as described in Coastal Act Section 30152 and generally depicted on the Land Use Plan Maps. The County administers a separate General Plan and various titles of the County Code that govern development outside of the Coastal Zone.

This ~~General~~ Coastal Land Use Plan formalizes a long-term vision for the physical evolution of the portions of Del Norte County within the California Coastal Zone and outlines policies, standards, and programs to guide day-to-day decisions concerning Del Norte County's development. Designed to meet state general plan and coastal planning requirements, the ~~General~~ Coastal Land Use Plan consists of two documents: this ~~General~~ Coastal Land Use Plan Policy Document and a *General Plan Background Report*. This *Policy Document* is divided into two main parts. Part I is the ~~General~~ Coastal Land Use Plan Summary, which provides background about the ~~General~~ Coastal Land Use Plan and reviews the plan's major themes and proposals. This section is a summary only, and does not set official policy. The lengthier and more detailed Part II presents Del Norte County's formal ~~General~~ Coastal Land Use Plan policy statements in the form of goals,

**NATURE, CONTENT,  
AND PURPOSE OF ~~THE~~  
GENERAL ~~PLAN~~ PLANS  
AND COASTAL LAND  
USE PLANS**

□

policies, standards, implementation programs, and quantified objectives, expressed in both text and diagrams.

A general plan is a legal document that serves as a community's "blue print" or "constitution" for land use and development. State law requires that every city and county in California adopt a general plan that is *comprehensive* and *long-term*. The plans must outline proposals for the physical development of the county or city, and any land outside its boundaries which in the planning agency's judgment bears relation to its planning (California Government Code Section 65300 et seq.).

General plans must be comprehensive both in their *geographic coverage* and in the *range of subjects* they cover. In the case of the Del Norte County General Plan, the geographic coverage is the unincorporated area of the county, which excludes the incorporated Crescent City urban area.

General plans must be long-term in perspective. General plan time horizons vary, but may range anywhere from 10 to 20 years into the future. In the case of the Del Norte County General Plan Update, the County has established the time horizon as the Year 2015, or just under 20 years

Every general plan in California must address seven topics or "elements." The importance of each of the seven required topics will, of course, vary from community to community. For instance, the general plan for Los Angeles County will have a decidedly different emphasis than Del Norte County's. Following are brief descriptions of what State law requires be addressed in each of the seven elements.

1. The ***Land Use Element*** designates the general distribution and intensity of all uses of the land in the community. This includes residential uses, commercial uses, industrial uses, public facilities, and open space, among others.
2. The ***Circulation Element*** identifies the general location and extent of existing and proposed major transportation facilities, including major roadways, rail and transit, and airports.
3. The ***Housing Element*** is a comprehensive assessment of current and projected housing needs for all segments of the community and all economic groups that also

embodies policies and programs for providing adequate housing.

4. The *Conservation Element* addresses the conservation, development, and use of natural resources including water, forests, soils, rivers, and mineral deposits.
5. Overlapping the conservation element, the *Open Space Element* details plans and measures for preserving open space for: protection of natural resources—as wildlife habitat; the managed production of resources such as agricultural and timber land; outdoor recreation—such as parks, trails, and scenic vistas; and public health and safety—such as areas subject to geologic hazards, tsunamis, flooding, fires.
6. The *Noise Element* identifies and appraises noise problems and includes policies to protect the community from excessive noise.
7. The *Safety Element* establishes policies and programs to protect the community from risks associated with seismic, geologic, flood, and wildfire hazards.

The general plan may also address other topics that the community feels are relevant to its development.

For each locally-relevant mandated issue or optional issue addressed, the general plan must do the following:

- Describe the nature and significance of the issue in the community (*Background Information*)
- Set-out policy in text and maps for how the jurisdiction will respond to the issue (*Policy*)
- Outline specific programs for implementing policies (*Implementation Programs*)

The format and structure of the general plan is left to local discretion, but regardless of the format or issues addressed, all substantive parts of the plan must be consistent with one another (i.e., *internally consistent*).

**By comparison, the California Coastal Act (Public Resources Code Section 30000 et seq.) requires each local government lying, in whole or in part, within the coastal zone to prepare a “local coastal program” for that portion**

of the coastal zone within its jurisdiction. Local Coastal Programs (LCPs) are basic planning tools used by local governments to guide development in the coastal zone, in partnership with the Coastal Commission. LCPs contain the ground rules for future development and protection of coastal resources. The LCPs specify appropriate location, type, and scale of new or changed uses of land and water. Each LCP includes a “land use plan” (LUP) and an “implementation plan” (IP) setting forth measures to implement the plan (such as zoning ordinances). Prepared by local government, these programs govern decisions that determine the short- and long-term conservation and use of coastal resources. While each LCP reflects unique characteristics of individual local coastal communities, regional and statewide interests and concerns must also be addressed in conformity with Coastal Act goals and policies. In contrast with their general plan and development regulation inland counterparts, where the enactment processes terminate upon their approval by the local government’s legislative body, following adoption by a city council or county board of supervisors, an LCP is submitted to the Coastal Commission for review for consistency with Coastal Act requirements.

After an LCP has been certified by the Coastal Commission, coastal permitting authority over most new development is transferred to the local government, which applies the requirements of the LCP in reviewing proposed new developments. The Coastal Commission retains permanent coastal permit jurisdiction over development proposed on tidelands, submerged lands, and public trust lands, and the Commission also acts on appeals from certain local government coastal permit decisions. The Commission reviews and approves any amendments to previously certified Local Coastal Programs.

The “land use plan” portion of an LCP is defined by Section 30108.5 of the California Coastal Act as “...the relevant portion of a local government's general plan, or local coastal element which are sufficiently detailed to indicate the kinds, location, and intensity of land uses, the applicable resource protection and development policies and, where necessary, a listing of implementing actions.” Unlike the seven thematic elements that a general plan must minimally comprise in one layout or another, there are no specific format requirements for land use plan provided they substantively address all the coastal resource policies set forth in Chapter 3 of the Coastal Act (i.e.,

coastal access and recreation, protection of marine and land resources, hazards avoidance and risk minimization, visual resources, etc.)

The development regulations and other measures carrying out the policies of the Coastal Land Use Plan are referred to as the “Implementation Actions” or “Implementation Plan.” Coastal Act Section 30108.4 defines “implementation actions” as “...the ordinances, regulations, or programs which implement either the provisions of the certified local coastal program or the [Coastal Act.]”

**PURPOSES OF THIS  
~~GENERAL~~ COASTAL  
LAND USE PLAN**

Preparing, adopting and maintaining a general Coastal Land Use plan serves several important purposes. These purposes range from the general to the specific, as described below.

**GENERAL PURPOSES**

In updating its General Coastal Land Use Plan, the County achieved several important general objectives related to the way it plans and how the community participates in the planning process. These objectives include the following:

- Establishment within County government the capacity to analyze local and regional conditions and needs in order to respond effectively to the problems and opportunities facing the Del Norte County community;
- Identification of Del Norte County’s environmental, social, and economic goals;
- Recording of the County government's policies and standards for the maintenance and improvement of existing development and the location and characteristics of future development;
- Provision of Del Norte County’s citizens with information about their community and with opportunities to participate in the local planning and decision-making process;
- Improvement of the coordination of community development and environmental protection activities between the County, the City of Crescent City, and other regional, state, and federal agencies; and
- Establishment of a basis for subsequent planning efforts, such as preparation of specific plans, redevelopment plans, and

## REASONS FOR REVISING THE GENERAL PLAN

special studies, to deal with unique problems or areas in the community.

In addition to the County's broader purposes for updating its ~~General~~ Coastal Land Use Plan, as described above, there are several specific reasons that the County chose to update the plan.

### Age of the Current/Previous Plan

The County's previous coastal land use plan was adopted in ~~1976~~ 1984, and has been amended and supplemented numerous times over the years. As a result, the previous plan was unwieldy, and addressed issues from a different era in Del Norte County history. This ~~General~~ Coastal Land Use Plan pulls together the information and policies that had been scattered and updates them to reflect current conditions and address contemporary issues.

### Changing Economic Base

Del Norte County is in the midst of a transition from resource production (timber/lumber-based manufacturing and fishing) to a service sector economy. The timber industry has declined dramatically over the past 25 years, due largely to three critical factors:

- Creation and expansion of Redwood National Park;
- Institution of environmental regulations limiting logging activity; and
- Reduction in the amount of timber available to harvest.

The result of this decline has been the closure of over 35 lumber mills; there are no longer any operating mills in Del Norte County. These closures have left gaps not only in the physical landscape of the county, but also in the economy.

## REGIONAL SETTING AND PLANNING AREA

Del Norte County is the northernmost county on the California Coast. The county, which covers approximately 1,070 square miles, is bounded on the north by Curry and Josephine Counties, Oregon, on the east by Siskiyou County, on the south by Humboldt County, while the Pacific Ocean lies to the west. Crescent City, the County's only incorporated city lies approximately 350 miles north of San Francisco and 330 miles south of Portland, Oregon. Del Norte County's geography ranges from the conifer forests of the Klamath Mountain

Province to the sand beaches and dunes of the pacific coastal plain. Figure 1 shows the county's location within the state and region. ~~By law, the General Plan must cover all territory within the boundaries of the county as well as "any land outside its boundaries which, in the planning agency's judgment, bears relation to its planning." (Government Code Section 65300). For purposes of the Del Norte County General Plan, the Planning Area has been defined as the entire unincorporated area of the county.~~

For purposes of General Coastal Land Use Plan analysis and policy development, the county has been divided into ~~five~~ four subareas, as shown in Figure 2. They are as follows.

### **Crescent City Planning Subarea**

The Crescent City subarea consists of the unincorporated lands which surround the City of Crescent City and is bounded by Jordan Creek and Lake Earl on the north, the Redwood National and State Parks on the east and south, and the Pacific Ocean on the west and south. The area includes a portion of the California Coastal Zone's Lake Earl rural land division market area and all of the Crescent City rural land division market area. The Crescent City Urban Boundary is also located within the subarea boundary.

The Crescent City area is on the coastal plain and is bisected by the Elk Creek drainage. The area consists of a mixture of urban, rural and resource land uses. Outside the city limits is an urban boundary, established in 1983, which encompasses existing and developing urban and rural-transition areas, including residential neighborhoods, commercial and industrial areas, and regional facilities such as the harbor, community college, county high school, hospital and airport. Outside the public service districts and urban boundary areas are established rural residential neighborhoods served primarily by on-site sewage and water systems. Resource lands include agriculture areas where soils limitations transition to wetlands such as Lake Earl or Crescent City Marsh, or to the steeper foothills. A mixture of agriculture and timber areas are also found along the significant drainage of Elk, Jordan and Marhoffer Creeks, each flowing a different direction. Also immediately adjacent to the urban areas are several state and federal resource and recreation areas including Lake Earl Wildlife Area, State Parks Dead Lake Area, Elk Creek Wildlife Area and the Redwood National and State Parks.

Highway 101 provides the only through north/south state highway access for the area, passing from the Redwood Parks on the south, past the harbor, through the City and north to the Highway 199 intersection, the Smith River and the Oregon border. Three former highway routes, Northcrest/Lake Earl and Parkway Drives west of Elk Creek, and Elk Valley road on the east, have historically provided local north/south access. While several roads, such as Washington Blvd, Cooper St., Blackwell, and Howland Hill Road provide east/west collector or arterial access, only Highway 101 crosses the Elk Creek drainage, within the City limits. In the urban areas access is provided primarily by public roads. In rural and resource areas a mixture of public collector roads and private local roads exists. The area is also served by the Redwood Coast Transit bus system.

The Crescent City area contains the largest concentration of people in the county and is the most diverse in neighborhoods and activities. Generally the unincorporated area is divided by Elk Creek with the Harbor, Elk Valley Road, and Bertsch Tract areas to the east and a variety of older and newer neighborhoods to the west. The latter include the Filkens, Pebble Beach, Roosevelt, Washington Park, Old Mill and Blackwell/Lake Earl residential areas. Commercial development is focused at the harbor and along Northcrest Drive and Washington Blvd. Uses range from specialized and visitor serving at the former to larger commercial parcel opportunities in the later area. Industrial uses are focused at the former Standard Veneer millsite off Northcrest/Lake Earl Drive, along Elk Valley road, or at McNamara Field off Washington Blvd. Although most industrial areas are relatively undeveloped, each provides a different setting from small urban lots to larger parcels or airport oriented uses. A mixture of public water and sewer services exist within the Urban Boundary reflecting existing and future service areas for urban density growth. Some neighborhoods, such as Old Mill Road and Northeastern Bertsch are within the Boundary and within a service district yet are not served and appear more rural than urban. It is these areas which have the first opportunity for services and are the primary locations for orderly expansion of urban services and densities as growth occurs.

### **Smith River Planning Subarea**

The Smith River subarea extends from the Oregon state line southward to the Smith River and from the Pacific Ocean eastward to the Smith River National Recreation Area. The area includes two California Coastal Zone rural land division market areas, the Coastal Ocean View Drive area (from the Ship A Shore resort north) and the Smith River area.

The Smith River subarea is a significant resource area with prime agricultural production lands on the gently sloped coastal plain, commercial timber production lands in the easterly hills and the County's primary gravel extraction area on the lower Smith River. Resource recreation activities serving both residents and visitors currently emphasize marine and river activities such as boating, fishing and beachcombing. Access to the Smith River National Recreation Area via Rowdy Creek Road also provides inland resource recreation such as hiking, rafting and hunting. A number of public recreational access points exist including Pelican State Beach, Kamph Park (County), The Beach Access (County), Mouth of Smith River Park (County) Ship A Shore resort (private) and the Smith River Fishing Access(County).

Highway 101 bisects this subarea providing the primary local access corridor and only through north/south traffic route from the Oregon border to the Dr. Fine Bridge. An older parallel highway route along Fred Haight Drive, 1st Street and Sarina Road/Ocean View Drive is maintained by the County as local access serving some rural residential and agricultural areas. Private rural roads also serve rural residential areas. Adjacent to the Smith River, at the southeastern edge of the area, Highway 197 (North Bank Road) intersects with Highway 101 providing the only easterly access upriver to Highway 199.

The community of Smith River is centrally located with older, small lot residential areas, small commercial and light industrial areas, and old millsites, most of, which are vacant. The visitor oriented Ship A Shore-to-Indian Road and Pelican Beach State Park areas are on Highway 101 north of the town. Several rural residential areas are located adjacent to agriculture or timber areas including Stateline/Highway 101, the Ocean View and Smith River Rancheria areas north of Smith River town and in several foothill areas to its south. Sewage disposal is by individual on-site systems with the exception of the Ship-Ashore complex which has a private plant. Water supply is mixed with residential and commercial areas in town and to the north provided water by the Smith

River Community Services District (SRCSD) and agricultural and rural residential areas to the south utilizing individual wells. Expansion of water service to the southern areas is planned by the SRCSD. While opportunities for additional growth exist in residential and commercial/industrial areas, the need to balance between development, resource lands, and physical hazards and constraints such as flood plains and hillsides continues.

### **Fort Dick/ Kings Valley Planning Subarea**

The Fort Dick/Kings Valley subarea extends from the Smith River to Jordan Creek and includes the former Westlog millsite and Aubell Ranch state lands on its south boundary, east of Elk Valley Road. With the Pacific Ocean on the west, the area extends to the Jedediah Smith Redwood State Park boundary on the east. This area includes most of the California Coastal Zones Lake Earl rural land division market area. It also includes the Coastal Zone's Pacific Shores special study area.

The Fort Dick/Kings Valley area is on the coastal plain and consists of a mixture of resource and rural areas. North and west of Fort Dick are prime and general agricultural resource areas which stretch from the south bank of the Smith River along the eastern edge of the 7,000 acre Lake Earl Park project and Wildlife habitat areas. East and south of Fort Dick mineral extraction, timber and general agricultural areas are found in Kings Valley from the river to the golf course just north of Highway 199. Agricultural lands continue south of Highway 199 in the Jordan and Elk Creek drainage's with hard rock mining at the Starry Quarry in the southeast subarea corner. Resource recreational activities include beachcombing, fishing, boating, hunting, horse trail riding and hiking. Public access to recreational areas include beach access via Pala Road and Lake Tolowa (State), various public road rights of way at Pacific Shores, and Kellogg Beach (County). Pala Road provides limited public access to the south bank of the Smith River with other prescriptive access areas further upstream on South Bank Road. Boating and hunting access to Lake Earl are located at Teal Point and Buzzini Road (State). Highway 199 provides access into Jedediah Smith Redwoods State Park however trail access into the park on the western boundary does not exist. Keller Park (County) on Elk Valley Cross Road-provides camping and day use.

Highway 101 bisects the area, providing limited access to

adjacent areas and north-south access from the Dr. Fine Bridge to the Crescent City area. At the southern end of the subarea, Highway 199 provides the entire County access to the east, up the Smith River Canyon to Oregon. As former highway routes Lake Earl Drive and Kings Valley Road north of Highway 199, and Elk Valley Road and Parkway Drive to its south, parallel the current highway, inter-connecting with crossroads. These and several other county maintained roads serve as primary public access for private rural roads in the various neighborhoods. Southerly areas are also served by Redwood Coast Transit bus service.

The Fort Dick community center includes commercial and public facilities which serve Fort Dick residences, the small visitor recreation area on the highway north of Kings Valley Road, employees at nearby Pelican Bay State Prison, and the residential neighborhoods of South Bank Road and northern Kings Valley Road. Lower density rural residential neighborhoods are found east of Lake Earl Drive, along Wonderstump, and Highway 101 where drainage and soils limitations exist. Elk Valley Cross Road serves two mixed use areas. The Lesina Road area includes a plant nursery, produce farm and the Kings Valley Golf Course in a rural residential area, while the western Cross Road area includes a high school, park, drive-in theater and older small lot subdivision within predominately rural residential uses. South of Highway 199, a small commercial area at Parkway Drive serves the Kings and Elk Valley areas including the Meadowbrook and Churchtree residential neighborhoods. While the City water main crosses the area from the Smith River into the Crescent City area, on-site well and septic systems are prevalent throughout most of the subarea. Pelican Bay Prison utilizes its own sewage treatment facility and a connection to the City water main. Properties adjacent to the main also utilize connections. However community water is limited to portions of the Kings Valley and to the Meadowbrook/Churchtree service areas which purchase water from the City main. Although expansion of water service into a few existing rural neighborhoods may be contemplated as infill development occurs, the mixture of resource and rural lands will not significantly change. Opportunities for unique development exist in the area, from small agricultural enterprises in the General Agriculture areas of Fort Dick to expansion of golf facilities or development of a new visitor serving facility in the Kings and Elk Valleys.

### **Smith River Canyons**

~~The Smith River Canyons subarea is bounded by the western boundaries of the Smith River National Recreation Area and Jedediah Smith Redwood State Park, to the eastern Del Norte County line, with the California state line on the north, to the Big Flat area on the southern boundary. This subarea is an inland area and has no Coastal Zone market areas within its area.~~

~~This coastal mountain area primarily consists of timber and recreational resource areas on Federal or State lands. These include the Smith River National Recreation Area (Six Rivers National Forest), Siskiyou National Forest, and Jedediah (Jed) Smith unit of the Redwood National and State Parks system. This area also encompasses most of the upper Smith River watershed, including the North, Middle and South Forks. Resource recreation activities include camping, hiking, swimming, fishing, boating and kayaking, hunting and visitor centers at Hiouchi and Gasquet. Various public access areas are provided and/or planned throughout the park and forestlands. River access is also available to the public at Ruby Van Deventer Park (County) on North Bank Road (Highway 197) and via prescriptive and privately established access routes across private lands found in or around the North Bank Road, Hiouchi, Gasquet and South Fork areas. Related commercial recreation includes RV park campgrounds in Hiouchi and Gasquet and a golf course.~~

~~Following the Middle Fork of the Smith River, Highway 199 provides the only through access for the area connecting to Oregon and Highway I-5 on the northeast and coastal communities on the west. Highway 199 is also the primary access for the National Recreation Area and Jed Smith Park visitors. Highway 197 (North Bank Road) provides an alternate access to the Oregon coast, by-passing the Crescent City area. A mixture of public and private roads provides access from these highways to public and private lands. The County's South Fork Road provides access to scattered residential areas in the South Fork/Big Flat recreational resource areas while Douglas Park Road provides additional access to Jed Smith Park. Ward Field County airport in Gasquet provides access to small planes and emergency use.~~

~~Several small communities are located within the Canyon area. North Bank Road is primarily rural residential with access to timber and recreational areas and the Del Norte Golf Course. Hiouchi consists of residential neighborhoods~~

~~adjacent to a visitor serving highway area comprised of a Redwood National and State Park information center and commercial services. Gasquet, the largest community in the area, includes a variety of residential development, public facilities such as a school and airstrip, the Smith River National Recreation Area visitor center and a mixture of visitor and local commercial uses. Several other clusters of residential development at various densities are scattered throughout the resource lands of the area including Low Divide, Douglas Park, French Hill, Rock and Boulder Creeks, Big Flat, Pioneer Road, Siskiyou Forks/Washington Flat and Stateline/199. Portions of North Bank Road, Hiouchi and Gasquet have community water systems available with wells utilized in other areas. Sewage disposal is on-site and fire protection services are provided by volunteer districts. The Big Flat area is under a California Department of Forestry fire service area. While the potential for additional residential development exists, the potential for expanded recreational resource activities and related visitor serving development such as golf course expansion, lodging, and visitor services is highest in the canyon areas.~~

### **Klamath Planning Subarea**

The Klamath subarea is located in the southern portion of the County from the Redwood National and State Park boundary south of Crescent City to the County boundary south of the Klamath River and from the Pacific Ocean east to the County boundary. This includes the Coastal Zones Klamath rural land division market area and the Klamath urban area.

This area is where the coastal mountains meet the ocean, bisected with small stream corridors and the Klamath River. It is primarily resource oriented with private timberlands and resource recreation lands most of which are in the Redwood National and State Parks. Boating, fishing, beachcombing, hiking, hunting, and camping (public and commercial) are common recreation activities. Some mineral extraction activities occur, primarily on tribal trust lands. The entire coastline and access to it is within the Park boundaries.

Highway 101 is the primary access for the area connecting Klamath to the Crescent City and the rest of the County on the north and the entire County to Humboldt County on the south. Highway 167 provides access on the south bank of the

Klamath from the Klamath Glen to Highway 101. County roads serve those residential and commercial areas not directly on the highway providing access to Highway 101.

The Klamath area consists of several small neighborhoods scattered along the Highway and lower reaches of the Klamath River. Visitor serving commercial areas located at Klamath Glen, Old Klamath and McMillan Road in or adjacent to the river floodplain have limited development. Those areas at Klamath Glen, Requa Road and Woodland Villa-Trees of Mystery outside of the floodplain include adjacent residential neighborhoods and are the focus of most private development in the area. The Margaret Keating School and Hunter Valley areas are residential areas off Highway 101. The New Klamath Townsite, created in an upland location after the 1964 flood, is a mixture of underutilized residential, commercial and industrial lands within a services district which provides water and sewer service. Other areas have a mixture of wells and water systems with a small package sewage treatment system at the Redwood subdivision. Former millsites are located in or near the Terwar Valley, new Klamath Townsite and off Highway 101 on Hamilton Road. Lands within approximately one mile of the Klamath River fall within the boundary of the Yurok Reservation and the Resighenni Rancheria is located on the south bank of the river immediately upstream from Highway 101. Tribal economic programs at Klamath Townsite and elsewhere in the area, private timberland management, residential neighborhood infill, and public and private visitor facilities will be the focus of development in the area.

## **DEL NORTE COUNTY'S HISTORY**

As noted above, Del Norte County's has experienced several changes through the years that have substantially affected the nature of planning in the county. Specifically, changes in the resource production industries have shifted the focus of the economic forces in the community. The following paragraphs establish the historical framework for Del Norte County's current economy.

## **NATIVE SETTLEMENT**

### **AMERICAN**

Prior to the arrival of European settlers, two cultural groups occupied what is now Del Norte County: the Tolowa and the Yurok. Tolowa territory covered the northern part of the county, and Yurok the southern part. Although both groups focused on marine resources, the Yurok also settled inland along the Klamath River. The Tolowa and the Yurok have much in common, but the foci of their cultural contacts are different. Historically, the Tolowa had stronger contacts

with—and similarities to—the aboriginal groups of the Pacific Northwest Coast, while the Yurok were more strongly connected to groups in California.

Although the Tolowa are not a federally recognized tribe, they are among the residents of the Smith River Rancheria, located near the mouth of the Smith River. The Rancheria covers roughly 160 acres and is home to members of a number of northern California and southern Oregon Native American groups. The Smith River Rancheria participates in local government and is currently in the process of drafting a master plan to help manage the cultural resources on its land.

The Yurok Reservation consists of all land within one mile of the Klamath River as it flows through the southwestern corner of the County, while the Prime Service Area consists of all lands within 60 miles of the Reservation. The Prime Service Area is also considered to be ancestral lands by the Yuroks. The total projected tribal member population for 1996 was between 3,500 and 4,000, including members living outside of Del Norte County.

The Yurok tribe has a constitution (1993) and is concerned with events and issues that will affect their community. Yurok tribe members are active in local government, as well as in the tribal government. They are involved in local businesses, including forestry and independent commercial fisheries, traditional arts and crafts manufacturing, construction and related services, computers and related products, trucking and other transportation services, film and entertainment, and recreation- and tourism-related businesses. Additionally, there are tribal-owned businesses, including forestry and timber sales, fisheries, Salmon Festival, and Energy Trust Fund.

Today, some members of the Yurok tribe live on the Resighini Rancheria in Del Norte County. Located on the south shore of the mouth of the Klamath River, this rancheria was established in 1938 and covers 228 acres. The Yurok tribe at the Resighini Rancheria has a master plan in place and is active in the management of cultural resources on its land and in countywide cultural resource issues.

## **TRANSPORTATION AND EUROPEAN SETTLEMENT**

The first Europeans to see Del Norte County were most likely Spanish who had arrived by ship in the 17th and 18th centuries. The locality was described by George Vancouver in his journal in 1792. The first American to explore the country overland

was Jedediah Strong Smith, for whom the Smith River is named. In 1828, Smith and his party of trappers traded with some Native Americans, discovered Lake Earl, and camped at Crescent City. By that time, the Hudson's Bay Company had already been trapping along the Klamath River. From 1827 to the 1850s, trapping continued along the upper Klamath River, and in 1828 Jedediah Smith and his party crossed Del Norte County while blazing a trail from the Sacramento Valley to Oregon. It was not until the late 1850s that a party of miners traversed the entire length of the Klamath.

During the 1840s and 1850s there were a number of sea explorations of Crescent Bay. The town of Crescent City was established in 1853 by J. F. Wendell, who was issued a land warrant for 230 acres.

The first "road" in Del Norte County, the Kelsey Trail from Crescent City to Yreka, was opened in 1855. In 1857, the Crescent City & Yreka Plank & Turnpike Company began construction on a road between Crescent City and Waldo, Oregon (Sailor's Diggings); it was completed in 1860. By 1857, ferries were operating on the Smith and Klamath Rivers and Del Norte County was formed. The survey for the Klamath Road, from Crescent City to Eureka, began in 1887 and, in the summer of 1894, the road was completed. A narrow-gauge railroad was constructed from Crescent City to Smith River by the Hobbs-Wall company in 1890. In 1919, the first contract for the Redwood Highway was granted.

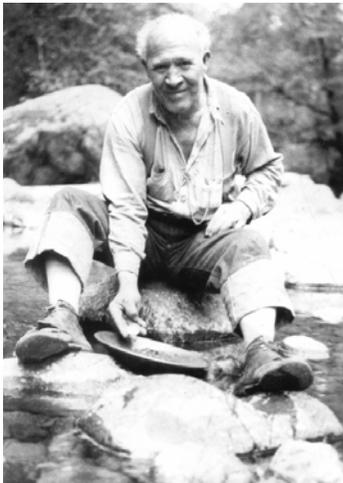

To facilitate the use of Crescent Bay as a harbor, the Battery Point Lighthouse was erected in 1856. It survived the 1964 tsunami and is currently open to the public. Farther north, the St. George Reef Lighthouse was constructed on a small island, seven miles off the coast and 13 miles north of Crescent City. It was completed in 1891 and closed in May 1975 when the beacon light was replaced by a computerized buoy.

Settled in 1853 by James and Daniel Haight, Horace Davis, and Mr. Domini, the community of Smith River Valley was one of the earlier settlements in Del Norte County. Although the first settlers planted orchards and crops, other interests included mining and ranching. A gristmill was established on Rowdy Creek in 1859 to combat the high freight rates to the Bay area, but the mill fell into disuse in the middle 1880s, when economic interests turned toward dairying. Roughly four miles from the village was the Occident & Orient Commercial Company fishery and cannery, which operated until 1896. The

community of Smith River was nicknamed “The Corners” because of its location at the crossroads of several widely used trails. It remained a stopping place until 1932; when State Route 199 was completed.

Generally, the settlers in Del Norte County were non-Native Americans from the east, although a fairly large influx of immigrants from China occurred between 1860 and 1880 (this population was virtually gone by 1900). Del Norte County has never been heavily populated, but the highest population numbers— relative to the overall population of California— probably occurred in the 1850s with the discovery of gold.

## MINING

In 1848, Major Pierson B. Reading discovered gold on the Trinity River and by 1850, northwestern California was teeming with miners. Klamath City, at the mouth of the Klamath River, was founded in 1851 and was intended to be a port city and provide access to the gold-rich back country; however, shifting sand bars at the mouth of the river made navigation uncertain and the town was deserted soon after 1852.

Crescent City was laid out in early 1853 and became a bustling shipping and trade center, catering to and supplying the miners. Gold discoveries in the immediate vicinity of Crescent City and on the south fork of the Smith River fueled the boom. During this period, residents and miners began requesting more transportation routes. Within a few years, however, a decline in the production of local mines and the opening of more promising gold fields elsewhere, drove all but a handful of miners from the area. By the late 1850s the boom was over.

The mining industry in Del Norte County was small compared with that of other California counties. It is estimated that \$140 million in gold has been mined from the Klamath Mountains since 1880. Other mineral resources that have been explored in the area include chromite, copper, nickel, lead, zinc, silver, mercury, and platinum. There are presently hundreds of mining claims held in the county, but there has been little mining activity other than recreational gold panning and dredging. Mining claims exist for gold, cobalt, nickel, and chromium. Nickel laterites in the northwestern portion of the county constitute the world’s largest land-based resource of nickel.

Extraction of aggregate mineral resources make up the majority of mining activities in Del Norte County. Sand and

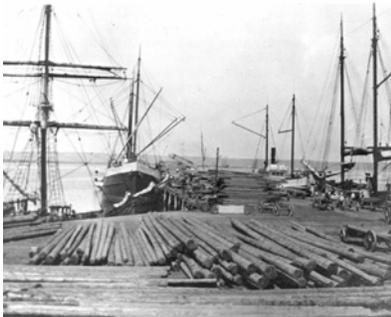

gravel are obtained from river, terrace, and beach deposits. Aggregate mining activities occur primarily along the lower Smith River, with some activity on the Klamath River and its tributaries.

## TIMBER

The timber industry has historically played a critical role in Del Norte County's economy. This dates back to the 1850s, when the area experienced a boom in settlement as a result of lumbering activity that followed the mining industry and the need to supply lumber for mining and housing purposes, not just in the county, but throughout California's mining communities. Locally produced lumber was shipped to Crescent City for reshipment to San Francisco. Because of the county's access problems, the timber business was not particularly profitable. Rugged terrain and the lack of a good harbor made getting the timber to market difficult.

After the gold rush subsided, the timber industry remained quiet until the founders of the Del Norte Company sought to make a fortune in northern California redwoods; however, their plans never came to fruition. The company was organized by three Wisconsin lumbermen, Eugene Shaw, Nathaniel C. Foster, and John S. Owen, in 1902. Originally a timber holding company, by 1904 the Del Norte Company owned 32,000 acres straddling the Smith River, which is now Jedediah Smith Redwoods State Park.

The northern California timber industry peaked in the post World War II years (1945 to 1950) as a result of strong housing and construction demand and an abundance of raw materials. Shortly after 1950, the number of mills began to drop as the industry transitioned from one based on harvesting old growth timber to one that relies on younger, smaller, less valuable second growth that is relatively more expensive to grow. The mill closures were also hastened by timber industry trends toward consolidation of operations, downsizing, and increasing efficiency resulting from technological advancement. In addition, acquisition of land for parks and the introduction of environmental restraints have resulted in lower timber production. The decline in Del Norte County's timber industry is illustrated by the volume of timber harvested, which dropped from 202,986 million thousand board feet (mbf) in 1985 to 65,036 mbf in 1995, a 68.5 percent reduction. The result of this decline has been the closure of over 35 lumber mills; there are no longer any operating mills in Del Norte County. There are, however, over 146,000 acres of privately held redwood and fir forestland capable of ongoing log

production in the county.

## FISHING AND CANNING

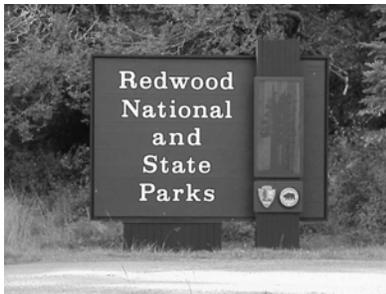

Through its history, Del Norte County has been home to a significant amount of commercial fishing and canning activity, and it continues to be. Over the years, commercial fishers have caught salmon, albacore, shrimp, crab, halibut, cod, and tuna in the coastal waters and rivers of Del Norte County.

Salmon, sometimes referred to as “river silver,” were caught around Point St. George as early as 1877.

In the 1880s, canneries were established on the Smith and Klamath Rivers. By the 1920s, however, few fished either the Smith or the Klamath Rivers for profit and, by 1925, the commercial fishing industry was discontinued on the Klamath River. Beginning in the 1920s, river sports fishing became popular, reaching its peak in the 1960s and 70s.

Marine fishing, both commercial and sport, continues to be important to the Del Norte County economy. In 1995, the annual commercial fish landing at the Crescent City harbor was valued at over \$11.6 million. Harbor-related sports fisheries also contributed significantly to fishery-related businesses and the tourist economy.

## RECREATION AND TOURISM

Today, one of the biggest industries in Del Norte County is tourism. Historic landmarks relating to early settlement in Crescent City area are open to the public. Additionally, the rugged beauty of the Smith River National Recreation Area and the Six Rivers and Siskiyou National Forests attracts hikers and campers. For the truly adventurous, the Coastal Trail runs through the county. Coastal beaches, harbors, and parks provide a variety of water activities. Other natural attractions in Del Norte County include Redwood National Park, Jedediah Smith Redwood State Park, Del Norte Coast Redwood State Park, and the Lake Earl State Park and Wildlife Area. Commercial visitor attractions, a variety of accommodations, and visitor services are located in and adjacent to these recreation areas.

## HOW THIS GENERAL PLAN WAS PREPARED

Del Norte County concurrently initiated its General Plan and Local Coastal Program Update program, when it retained a multi-disciplinary consulting team headed by J. Laurence Mintier & Associates to assist the County in updating the

County's 1976 General Plan and 1984 LCP, respectively. The County used grant funds to complete the first phase of a two-phase program to comprehensively update its General Plan and conduct the necessary environmental analysis.

### Phase I

The first phase efforts focused on revising three elements of the General Plan/Coastal Land Use Plan: the Resources/Conservation Element; the Transportation/Circulation Element; and the Land Use Element as they apply in the rural areas of the county.

In revising these three elements, the County reconsidered parts of the existing General Plan and Coastal Land Use Plan that were based on economic activity that no longer exists. One aspect of this effort was to assess potential reuse of industrial sites left vacant and underutilized by the economic decline of the local timber industry.

As the initial step in the update, the consulting team collaborated with the County's Community Development Department to reach out to the community to identify the important planning issues in Del Norte County. This outreach consisted of a series of four townhall meetings throughout the county to discuss the County's General Plan/Coastal Land Use Plan Revision.

Following-up on these meetings, the first major report produced as part of the General Plan Update, the *Draft General Plan Background Report*, was completed. That report described existing conditions and trends in Del Norte County. After completion of the *Draft Background Report*, the next major step in the Update process was to identify key issues and options for the General Plan and to summarize them for public review. The result was the *Policy Issues Report*, which presented the most critical policy issues to be addressed in the revised General Plan. These issues emerged from the *Draft General Plan Background Report* and the input received at the January/February 1996 townhall meetings and public correspondence.

Following the simultaneous publication of the *Draft Background Report* and the *Policy Issues Report*, the County hosted another round of townhall meetings. These meetings, which took place on October 21<sup>st</sup>, 22<sup>nd</sup>, 23<sup>rd</sup>, and 24<sup>th</sup>, 1996, were held to present the reports and preliminary land use

diagrams to the public and to invite comments concerning the issues raised in the *Policy Issues Report*.

Based on the discussion at the October 1996 townhall meetings and the comments submitted to the County in response to the meetings, the Consultants and County staff began a draft administrative version of this Policy Document. That draft embodied a reorganized, adapted set of goals and policies from the County's 1976 General Plan and 1984 Coastal Element, as well as numerous new policies responding to new County needs.

## **Phase II**

In September 1997, the County kicked-off Phase II of the General Plan Update with a townhall meeting. The focus of this meeting was on filling in the missing pieces from Phase I including completion of the geographic coverage of the county (i.e., the unincorporated Crescent City Area). Elements that were not fully addressed in Part I (Noise; Safety; Non-Coastal Public Access; Scenic Resources; and Public Facilities and Services) were added to the *Background Report* and *Policy Issues Document*.

During Phase II of the General Plan Update program, the County completed the balance of the General Plan, including the *Background Report*, *Policy Issues Summary Document*, *Policy Document*, and *Environmental Impact Report*.

Public Participation was an important element in the creation of the *Policy Document*. Del Norte County utilized townhall meetings to gain community input regarding policy issues for the General Plan Document. County staff subsequently prepared a *Policy Issues Report* that reflects comments from the community from townhall meetings, comments made from written correspondence, and issues identified by staff/consultants. The County released follow-up document entitled *Policy Issues Summary/Responses*. This document outlines County staff responses to the concerns and policy suggestions of other public agencies and the general public.

## **ORGANIZATION OF THE GENERAL PLAN**

As noted in the Introduction, the *Del Norte County General Plan* consists of two documents: the *General Plan Background Report* and this *General Plan Policy Document*.

**GENERAL PLAN  
BACKGROUND REPORT**

The *General Plan Background Report*, which inventories and analyzes existing conditions and trends in Del Norte County, provides the formal supporting documentation for General Plan policy. This report addresses the following seven subject areas:

- Chapter 1: Resources/Conservation
- Chapter 2: Land Use
- Chapter 3: Demographic and Socioeconomic Conditions
- Chapter 4: Transportation and Circulation
- Chapter 5: Public Facilities
- Chapter 6: Health & Safety
- Chapter 7: Noise

**~~GENERAL~~ COASTAL LAND  
USE PLAN POLICY  
DOCUMENT**

This ~~General~~ Coastal Land Use *Plan Policy Document* is divided into two main parts. Part I is a summary of the ~~General~~ Coastal Land Use Plan, describing the nature of the plan, highlighting the key issues addressed in the plan, setting forth a vision of the county's development, and outlining the plan's main proposals. Part I does not constitute formal general plan policy, but is rather a guide to understanding and interpreting Part II of the *Policy Document*.

Part II contains explicit statements of goals, policies, standards, implementation programs, and quantified objectives that constitute the formal policy of Del Norte County for land use, development, and environmental quality. Part II is divided into eight sections corresponding to the relative importance of their subjects in Del Norte County. The sections are as follows:

- Section 1: Natural Resources/Conservation
- Section 2: Safety
- Section 3: Land Use and Community Development
- Section 4: Housing
- Section 5: Recreational and Cultural Resources
- Section 6: Scenic Resources
- Section 7: Public Facilities and Services
- Section 8: Transportation and Circulation

Each section includes goal statements relating to different sub-issues or different aspects of the issue addressed in the section. Under each goal statement, there are policies which amplify the goal statement and set forth mandatory provisions to which development projects must conform. ~~Implementation programs are listed at the end of each section and describe briefly the proposed action, the~~

~~County agencies or departments with primary responsibility for carrying out the program, and the time frame for accomplishing the program.~~

Following the Policies section, an “Other Initiatives” section lists out other, non-binding declarations of intent, support, and encouragement relating to coastal land uses. In addition, Section 3 (Land Use and Community Development) also describes the designations appearing on the Land Use Diagram and outlines the legally required standards of density and intensity for these land use designations. Section 8 (Transportation) describes the proposed circulation system, including a description of the street classification system.

### 1. Policies Comprising the Coastal Land Use Plan

The policies contained within the Coastal General Plan constitute the Land Use Plan portion of the City’s Local Coastal Program and govern the review and approval of coastal development permits include the following:

- Chapter 1: Resources/Conservation

1.A.1., 1.A.2., 1.A.3, 1.A.4., 1.B.1., 1.B.2. 1.B.3., 1.B.4., 1.B.5., 1.B.6., 1.B.7., 1.B.8., 1.B.9., 1.B.10., 1.B.11., 1.B.12., 1.B.13., 1.B.14., 1.B.15., 1.B.16., 1.B.17., 1.B.18., 1.B.19., 1.B.20., 1.B.21., 1.B.22., 1.B.23., 1.B.24., 1.B.25., 1.B.26., 1.B.27., 1.B.28., 1.B.29., 1.B.30., 1.B.31., 1.C.1, 1.C.2., 1.C.3., 1.C.6., 1.C.7., 1.C.8., 1.C.9., 1.E.1., 1.E.2. 1.E.3., 1.E.4., 1.E.5., 1.E.6., 1.E.7., 1.E.8., 1.E.9., 1.E.10., 1.E.11., 1.E.12., 1.E.13., 1.E.14., 1.E.15., 1.F.1., 1.F.2. 1.F.3., 1.F.4., 1.F.5., 1.F.6., 1.F.7., 1.F.8., 1.F.9.,

- Chapter 2: Land Use

- Chapter 3: Demographic and Socioeconomic Conditions

- Chapter 4: Transportation and Circulation

- Chapter 5: Public Facilities

- Chapter 6: Health & Safety

- Chapter 7: Noise

**2. Policies Not Comprising the Coastal Land Use Plan**

**The policies demarcated with the Del Norte County seal (  ) are not part of the certified LCP and do not govern the review and approval of coastal development permits. These policies are not part of the standard of review for coastal development permit purposes, as they are not relevant to indicate the “kinds, location, and intensity of land uses” as required of Coastal Land Use Plans (PRC Section 30108.5). However, the policies demarcated with the City seal are retained in the Coastal General Plan document as the City will apply these policies within the Coastal Zone under its own separate authority.**

**The following policies and associated programs demarcated with the County seal are not considered part of the County’s certified Local Coastal Program for purposes of the review and approval of coastal development permits:**

- Chapter 1: Resources/Conservation

**1.C.4., 1.C.5., 1.D.1., 1.D.2., 1.D.3., 1.D.4., 1.D.5., 1.D.6., 1.D.7., 1.D.8., 1.D.9., 1.D.10.,**

- Chapter 2: Land Use

- Chapter 3: Demographic and Socioeconomic Conditions

- Chapter 4: Transportation and Circulation

- Chapter 5: Public Facilities

- Chapter 6: Health & Safety

- Chapter 7: Noise

## KEY OBJECTIVES

Through the course of preparing this *Policy Document*, several

key objectives have been refined. The basic intent of the General Plan Revision program was established early in the process as a result of the County's understanding of its long-term planning needs, successful implementation of several County planning programs, and changes in the community that had taken place since the 1976 General Plan and 1984 Coastal Plan were adopted. The following are brief descriptions of the four major objectives that set the framework for development of this updated General Plan.

**CONSOLIDATION CONTINUED  
BIFURCATION OF COASTAL  
AND NON-COASTAL  
PLANNING POLICY POLICIES**

In 1984, the County adopted the Coastal Element of its General Plan as part of its Local Coastal Program certification. That action formally divided the County's comprehensive planning approach by establishing two sets of policies, one for the non-coastal and uncertified areas (the 1976 General Plan) () and one for the areas within the Coastal Zone which were certified (the 1984 Coastal Element). ~~This~~ As part of the General Plan and Coastal Land Use Plan Policy Document updates and consolidates the County's consultant recommended that the two sets of planning policies and programs into a single document, unifying policies that had been separated since 1984. ~~This General Plan also supersedes the 1984 Coastal Element. Those policies which remain unique to the Coastal Zone have been identified by the wave symbol~~ () However, significant differences exist between state general plan law and the Coastal Act with respect to how policies are to be read and interpreted. For example, development projects are typically required to be found consistent on balance with an overall or comprehensive reading of the general plan's policies. In contrast, the Coastal Act requires that development projects in the coastal zone must be found to be consistent with all of the policies and standards of the local coastal program. Moreover, if consolidated as initially proposed, amendments to any land use designations or text provisions, initiated solely for development outside of the coastal zone would nonetheless require that the amendment be first certified by the Coastal Commission prior to the amendment becoming legally enacted. As a result, during its Coastal Act consistency review, the Coastal Commission concluded, and the County concurred, that such a consolidation would likely cause more confusion and difficulties in administration than keeping the two documents in separate volumes.

**BALANCE OF LIFESTYLES**

Del Norte County supports a remarkably diverse and rich complement of natural resources within which its communities

have developed. The County's planning policy has always reflected respect and a high level of conservation of its resources, while providing for community development—both urban and rural. This *Policy Document* was prepared with the intent of retaining and highlighting that focus in order to provide for a balance in lifestyle opportunities as the population increases and new development occurs. Rather than presenting resource lands as areas awaiting urban development, this *Plan* establishes a framework of Resource, Rural, and Urban land use designations that are supplemented by policies and programs addressing a range of issues, including land use, transportation, and public facilities.

The Resource category applies to areas where timber and agricultural management, along with related watershed, mining, hazards and incidental recreation uses, are the primary focus. Resource areas provide for continued production of food, clean water, construction materials, and other resource products with limited external pressure for development. The Rural category is specifically intended to support low-density home sites in a self-sufficient rural setting, and for the clustering of visitor services near public or commercial recreational resource areas. The Urban category applies to areas where higher intensity residential, commercial, and industrial are found, as well as regional uses and activities; the costs to provide public facilities and services related to this development are shared among the users of the facilities and services.

## ECONOMIC TRANSITION

Del Norte County is in transition from a resource production base to a service sector economy. Government, retail trade, and services have become the largest employers. Between 1993 and 1995, prior to initiation of this Plan revision, the Del Norte Economic Development Corporation and Chamber of Commerce 2020 Committee prepared economic reports for the community addressing future economic needs and goals. These reports supported pursuit of diversified manufacturing, tourist, and small business development. In requesting Title IX Special Assistance Program funding for Phase I of this Plan revision, the County identified the need to address land use issues at former rural millsites and potential changes in the communities within the newly established Smith River National Recreation Area. In addition to provisions for general commercial activities, this *Policy Document* reflects consideration of these issues and goals in its land use designations and policies.

Figure 3 shows the seven vacant rural and two urban millsite areas. In locations such as North Rowdy Creek, Rellim, or the sites at Klamath, limited timber management support activities (e.g., such as log decks and equipment storage) remain the most likely use. There is potential for diversified manufacturing or light industrial uses at South Rowdy Creek and at Timbers Boulevard in Smith River. In the Crescent City area, the Westlog site could support visitor-serving uses related to Jedediah Smith Redwood State Park while the Standard Veneer and Elk Valley Road areas provide for a variety of industrial properties. Additionally, McNamara Air Field in Crescent City provides the opportunity for air-oriented industrial development, while the former bulk oil storage facility site at Crescent City's South Beach has been identified as having visitor-serving potential.

Reflecting national and local economic trends, the land use section of the *Policy Document* highlights provisions for home-oriented business development. This includes home occupations for owner-residents such as consultants, individual contractors, service providers, Tele-electronic/mail users, and art or crafts people, and home enterprises which provide for expanded home occupations as well as residential and community care services, and bed and breakfast guest lodging.

Figure 4 identifies the location of existing and potential visitor-serving commercial centers. Typically oriented to National or State recreation facilities, or to popular public access to the Smith and Klamath Rivers or Crescent City Harbor, these centralized areas generally have immediate access to the attraction and related businesses. This closeness provides individual business communities the opportunity to enhance such centers through community chosen projects such as advertising, parking, pedestrian-bicycle connections, landscaping, community signs, or other means to encourage longer tourist visits. Coordination with adjacent public facilities such as state parks or beaches and enhancement of visitor facilities have also been identified as desirable.

**ADDRESSING POTENTIAL  
GROWTH**

Modified population projections for the year 2020 estimate an additional 23,800 persons (DOF estimate) or 14,542 persons (historical two percent growth rate) could be experienced countywide, potentially doubling the existing population. Based upon this estimate, an additional 9,154 dwelling units (DOF estimate) or 5,593 dwelling units (historical two percent

growth rate) could be needed within Del Norte County, including both the unincorporated county and Crescent City. In 1998 it was determined that, under the 1976 General Plan/1983 Coastal Plan, the rural subareas of Smith River, Smith River Canyon, Fort Dick/Kings Valley and Klamath had a rural area development potential in the range of 2,000 additional dwelling units. The unincorporated Crescent City subarea was identified as having a remaining potential of 3,200 units (mostly urban units).

The updated General Plan/Coastal Land Use Plan provides a potential for 7,000-8,000 new units. It also strives for moderate growth; for adequate market vacancy factors to help retain reasonable prices; and for flexibility in type, location, and ability to meet unforeseen occurrences in development issues.

**SUMMARY OF MAJOR  
GENERAL COASTAL  
LAND USE PLAN  
PROPOSALS**

As indicated earlier, the formal policy content of this ~~General~~ Coastal Land Use Plan is presented in Part II of this *Policy Document*. Part II is divided into eight sections, each of which deals with a single topical issue and several subissues related to the main topic. Following is a section-by-section summary of the major proposals set forth in Part II.

**SECTION 1:  
NATURAL RESOURCES/  
CONSERVATION**

As indicated above, one of the objectives of this ~~General~~ Coastal Land Use Plan is the protection of Del Norte County's rich natural resources. Recognizing the primacy of this objective, the first section of Part II of this *Policy Document* presents policies addressing the full range of county's natural assets. The section includes goals, policies, and programs addressing the following subjects:

- Marine Resources
- Water Resources
- Soils Resources
- Onshore Fisheries Resources
- Wildlife Habitat Resources
- Air Resources
- Agricultural Resources
- Forestry Resources
- Extractive Resources

In large part, the policies and programs under these headings represent affirmations of the County's historical attention to protecting local natural resources. These policies, in combination with the Land Use Diagram and policies and

programs described in Section 3, result is a system of well-defined natural areas that are protected from development.

## **SECTION 2: SAFETY AND NOISE**

The policies and programs in Section 1 reflect a particularly strong effort to protect the natural terrain, drainage, and vegetation of the community. Del Norte County is located in a region that is subject to some potentially significant natural hazards. Most importantly, the area is vulnerable to earthquakes and their associated seismic effects. Section 2 of Part II of this *Policy Document* addresses a range of health and safety issues (e.g., seismic hazards, geological hazards, fire safety, flooding, hazardous materials and toxic contamination, emergency response, noise). The primary intent of this section is to protect Del Norte County residents, businesses, and visitors from the harmful effects of natural and man-made hazards. In doing so, the County hopes to protect both the physical well-being of Del Norte County residents and visitors and to ensure that development investments fully consider the implications of potentially hazardous conditions in the area. This section includes goals, policies, and programs addressing the following subjects:

- Seismic Hazards
- Geologic Hazards
- Flood Hazards
- Fire Hazards
- Hazardous Materials
- Disaster Planning
- Noise

## **SECTION 3: LAND USE AND COMMUNITY DEVELOPMENT**

This section is the most familiar part of a ~~general~~ coastal land use plan. It contains the Land Use Diagram that prescribes the uses for all of the unincorporated areas of the county, describes standards for each of the land use designations shown on the Land Use Diagram, and presents a series of goals, policies, and programs designed to guide day-to-day decisions concerning land use, development, and environmental protection in Del Norte County.

This section also outlines policies to guide and support

economic development in the county. This includes an emphasis on public-private collaborative efforts to ensure that the County's land use regulations will support the overall objective of local economic adjustment. Also, in the interest of recognizing the diversity of

the county in terms of its physical setting and its socioeconomic needs, Section 3 includes distinct descriptions and policies for each of the county's four planning subareas.

### **Land Use Diagram**

The Land Use Diagram depicts 28 land use designations falling within four major categories, as shown in the following chart:

CATEGORY	DESIGNATION
Resource Lands	Agri-Use Prime (AP)
	Agriculture General-20 ac (AG-20)
	Agriculture Prime (AP) General-5 ac (AG-5)
	Agriculture General-20 ac (AG-20)
Rural Lands	Agriculture General-5 ac (AG-5)
	Timberland (TBR)
	Rural Residential 1 du/ac (RR1A)
	Rural Residential 1 du/2 ac (RR2A)
	Rural Residential 1 du/3 ac (RR3A)
	Rural Residential 1 du/5 ac (RR5A)
	Rural Neighborhood (RN)
	Rural Mobilehome Park (RMP)
	Visitor-Serving Commercial (VSC)
	Golf Course (GOLF)
	General Commercial (GC)
	Light Industrial (LI)
	General Industrial (GI)
	Agricultural Industrial (AI)
Urban Lands	Residential—0 to 2 du/ac (SR)
	Residential—2 to 8 du/ac (UR)
	Medium-Density Residential—6 to 15 du/ac (MF)
	Urban Mobilehome Park (UMP)
	General Commercial (GC)
	Visitor-Serving Commercial (VSC)
	Light Industrial (LI)
	General Industrial (GI)
	Household Enterprise (HE)
	Home-Dependent Commercial (HDC)
	Home-Dependent Recreational (HDR)
	Rural Residential/Relaxation (RR1A)
	Rural Residential/General (RR3A)
	Rural Residential/Industry (RR5A)
	Rural Residential/Recreation (RR1A)
	Rural Neighborhood (RN)
	Resource Conservation Area (RCA)
	Recreation/Uses Park (RUP)
	Visitor-Serving Commercial (VSC)
	General Industrial (GI)
	Golf Course (GOLF)
	General Commercial (GC)
	Light Industrial (LI)
	General Industrial (GI)

Following are summaries of the General Plan's key land use proposals according to the major designation categories that appear on the Land Use Diagram.

**Resource Lands**

The designations under the Resource Lands category are applied to extensive areas of the county where good conservation practices have been identified and geographically locate resource production areas of the county for their conservation, development, and utilization. The Resource category reflects areas where timber and agriculture, along with related watershed, mining, hazards, and incidental recreation uses are the primary focus. Development is minimal and the provision of (miscellaneous) services is very limited. These designations and their associated standards combine with the goals, policies, and programs of Section 1, Natural Resources Conservation, to establish a sound framework for protection of Del Norte County's rich natural assets.

**Rural Lands**

The Rural Lands category reflects areas where a low-density,

rural residential lifestyle prevails, with pockets of visitor or neighborhood commercial uses. The designations in this category are intended to provide for the development of rural homesites and to encourage a suitable environment for a variety of family activities for those who desire a rural residential setting. Commercial or hobby gardens or farm animals, natural drainages, gravel roads, and home businesses oriented to rural/resource lifestyles are also suitable designations under the Rural Lands category. Rural areas also provide opportunities for clusters of visitor services and have historically had industrial areas (typically oriented to resource production). Private commercial services such as roads, wells, and sewage disposal systems are emphasized, with limited public facilities available in some areas.

- Urban Lands Designations**
- Residential—0 to 2 du/ac (SR)
  - Residential—2 to 6 du/ac (UR)
  - Multifamily Residential—8 to 15 du/ac (MR)
  - Light Industrial (LI)
  - General Industrial (GI)
  - Harbor Dependent (HD)
  - Harbor Dependent Commercial (HDC)
  - Harbor Dependent Recreational (HDR)
  - Harbor Related (HR)
  - Greenery (G)

## Urban Lands

Land use designations within the Urban Lands category are applied to areas within a designated urban boundary where higher intensity residential, commercial, or industrial use are planned with maximum services provided or to be expected. These designations are intended to provide for urban lifestyle opportunities and for more diversified sharing of public service costs. Urban areas may include transition areas where rural neighborhoods are within public service boundaries and which, upon development of such services, have the potential for urban density. These areas are the most logical next step in

urban growth. Public roads, fire service, water and sewer lines, and regional activities or services are to be focused in these urban areas.

### **Countywide Designations**

Those designations in the Countywide category have broader applications that may occur anywhere in the county. These include general provision for public facilities of varying types throughout the county, sensitive habitat areas. Since such a large amount of the county is covered by these designations, they are critical in establishing the broad land use framework. Because so much of this land is owned by State and Federal government agencies, the County has very little direct influence over its development; partly through the policies of this General Plan, however, the County is committed to ensuring that its actions and land use decisions are coordinated with those of the agencies with jurisdiction over the land.

### **General Land Use and Development Goals, Policies, and Programs**

To accompany the Land Use Diagram and the standards associated with its designations, Section 2 of Part II of this *Policy Document* outlines several goals and policies focusing on distinct aspects of its land use and development. These are organized according the following topics, each of which has a single goal and several associated policies, some of which are broken into subtopics. Following are the major topics addressed in Section 3:

- Urban/Rural Boundary
- Land Division
- Integrated Land Use, Transportation, and Air Quality Planning
- Public Acquisition of Private Land
- Economic Development

In addition to these general topics, which address countywide issues, Section 3 of this *Policy Document* includes descriptions of the county’s five planning subareas, along with several policies addressing issues unique to each of these subareas. These policies are grouped under the following headings/goals:

- Crescent City Subarea Recommendations;
- Smith River Subarea Recommendations;
- Fort Dick/Kings Valley Subarea Recommendations;
- Smith River Canyons Subarea Recommendations; and
- Klamath Subarea Recommendations.

**SECTION 4: HOUSING**

*(SEPARATE DOCUMENT)*

In August 1992, the County Board of Supervisors adopted the *City of Crescent City & Del Norte County Housing Element* jointly with the City of Crescent City. The element was prepared and adopted according to specific statutory requirements established by the State of California. These requirements include a schedule for periodic updates which calls for the County to update its element in 2003. Because of this schedule, the County’s *Housing Element* was not updated in conjunction with the General Plan Revision Program.

**SECTION 5:  
RECREATIONAL AND  
CULTURAL RESOURCES**

Del Norte County is blessed with an outstanding array of recreational and cultural assets. The county’s physical setting provides vast natural opportunities for outdoor recreation. In addition, Del Norte County has significant historic and cultural

richness. The goals, policies, and programs in Section 5 of Part II of this *Policy Document* articulate Del Norte County's high level of commitment to ensuring high quality recreational opportunities for Del Norte County residents and visitors and to preserving the county's rich cultural heritage. The provision of access to the county's natural areas—both coastal and non-coastal—is an essential focus of the goals and policies in Chapter 5. The policy content of the section is divided into following eight topics:

- County Parks and Recreation;
- State and Federal Lands;
- Recreation Trails;
- Coastal Zone Recreation;
- Coastal Zone Public Access;
- Non-Coastal River Access;
- Private Recreational Facilities and Opportunities; and
- Cultural Resources.

#### **SECTION 6: SCENIC RESOURCES**

An important aspect of the County's efforts to support the transition from a resource production-based economy to a service-based economy is the retention of the scenic qualities that make Del Norte County such an attractive place and to enhance opportunities for tourism development. The goals, policies, and programs of Section 6 of this *Policy Document* will supplement the natural resources policies of Section 1 by identifying scenic resources and outlining policies addressing these assets.

#### **SECTION 7: PUBLIC FACILITIES AND SERVICES**

One of the most important results of any comprehensive planning effort should be the assurance that all facilities and services needed to adequately serve development will be accounted for. While the development of specific plans for facilities and services is beyond the purview of the General Plan, this *Policy Document* does establish a framework for guiding planning decisions related to facility development and service provision. The general emphasis of the policies and programs in Section 7 of Part II is on ensuring adequate services, while discouraging unnecessary, wasteful, or inefficient extension of existing systems or development of new facilities.

The policies and programs articulated in this section would ensure that current and future residents of and businesses in Del Norte County are served by a well-rounded, efficient, and environmentally safe system of public facilities and services.

**SECTION 8:  
TRANSPORTATION  
CIRCULATION**

**AND**

This *Policy Document* addresses several transportation issues that are critical to future development in Del Norte County. The most critical consideration related to transportation in Del Norte County is the assurance that all new and existing development has safe and reliable access. This *Policy Document*, therefore, concentrates on policies that will ensure the development of a complete roadway system consisting of County-maintained roads, State highways, and private roads that serves the needs of both residents and visitors. Section 8 focuses on cooperating with other public agencies to develop strategies that will improve the overall operation of Del Norte County's transportation network, and which are feasible, both physically and fiscally.

In addition to addressing future roadway plans and improvements, Section 3 of Part II of this *Policy Document* contains goals, policies, and programs related to the following issues:

- State Highways;
- County Roads;
- Public Transportation;
- Transportation Control Measures (TCM);
- Non-Motorized Transportation;
- Goods Movement;
- Air Transportation;
- Maritime Transportation ; and
- Tele-transportation.

**PREPARING  
ADOPTING  
GENERAL PLAN**

**AND  
THE**

Local governments have broad latitude in how they prepare their general plans. State law requires local governments in preparing their plans to consult with other affected and interested public agencies and provide opportunities for the public to participate (Government Code Section 65350 et seq.). Under the requirement of the California Environmental Quality Act, general plans must be reviewed for their potential environmental impacts, typically through preparation of an environmental impact report (EIR). Before the plan's adoption, both the planning commission and the local legislative body (in Del Norte County, the Board of Supervisors) must hold public hearings, and the planning commission must make a recommendation to the legislative body.

**IMPLEMENTING  
GENERAL PLAN**

**THE** Carrying out the plan following its adoption requires a multitude of individual actions and ongoing programs involving virtually every County department and many other public agencies and private organizations. The legal authority for these various actions and programs derive from two essential powers of local government: corporate and police powers. Using their “corporate power,” local governments collect money through bonds, fees, assessments, and taxes, and spend it to provide services and facilities such as police and fire protection, streets, water systems, sewage disposal facilities, drainage facilities, and parks. Using their “police power,” local governments regulate the use of private property through zoning, subdivision, and building regulations in order “to promote the health, safety, and welfare of the public.” The general plan provides the formal framework for the exercise of these powers by local officials.

To ensure that the policies and proposals of the general plan are systematically implemented, state law since the early 1970s has increasingly insisted that the actions and decisions of local government concerning both its own projects and the private projects it approves are consistent with its adopted general plan. The courts have supported and furthered this trend through their interpretations of state law. Generally, zoning must be consistent with the general plan. Local government approval of subdivisions must be consistent with the general plan. Local public works projects must be consistent with the general plan. The same is true for development agreements, coastal zoning, redevelopment plans, specific plans, and many other plans and actions of cities and counties.

**ADMINISTERING  
COASTAL LAND  
PLAN** **THE  
USE**

**The policies of the Coastal Land Use Plan are administered primarily through the application of limitations upon and qualifications for development as set forth in the Del Norte County Code. Prior to this LCP update, the regulations were formatted in both coastal zone-specific and county-wide provisions (i.e., building and grading permits, surface mining, subdivisions) and located under numerous different titles of the code. Due to problems in the past with certain of these not submitted to the Coastal Commission for certification, either purposefully (an amendment to a county-wide provision was intended only for inland, non-coastal application) or otherwise, this dispersed format has been modified. This updated LCP includes a consolidation and recodification of all policies regulating development within the coastal zone portion of the county into two titles: Title 21 – Coastal Zoning and**

**Title 22 – Coastal Land Divisions, with the development regulations within all other titles of the County Code (i.e., Title 7 through 16, 18, and 20) relegated to application solely in non-coastal areas of the County.**

2. **Suggested Modification No. 2: (Goals, Policies, and Programs Definitions)**  
All changes to the *PART II: Goals, Policies, and Programs* prefacing definitions

## PART II

### GOALS, POLICIES, AND PROGRAMS

Part II of this *Policy Document* contains explicit statements of goals, policies, standards, implementation programs, and quantified objectives that constitute the formal policy of Del Norte County for land use, development, and environmental quality. Part II is divided into the following eight sections:

- Section 1: Natural Resources/Conservation
- Section 2: Safety
- Section 3: Land Use/Community Development
- Section 4: Housing
  
- Section 5: Recreational and Cultural Resources
- Section 6: Scenic Resources
- Section 7: Public Facilities and Services
- Section 8: Transportation and Circulation

Each section includes goal statements relating to different sub-issues or different aspects of the issue addressed in the section. Under each goal statement, there are policies which amplify the goal statement. Implementation programs at the end of each section describe briefly the proposed action, the County agencies or departments with primary responsibility for carrying out the program, and the time frame for accomplishing the program. Section 3 (Land Use and Community Development) also describes the designations appearing on the Land Use Diagram and outlines the legally-required standards of density and intensity for these land use designations. Section 8 (Transportation) describes the proposed circulation system, including a description of the street classification system.

The following statements define goals, policies, ~~standards~~, implementation programs, and ~~quantified objectives~~ other initiatives as they are used in this document:

**Goal:** The ultimate purpose of an effort stated in a way that is general in nature and immeasurable. A general, overall, aim or end toward which the County will direct its efforts. Goals are a general expression of community values and, therefore, are abstract in nature. Consequently, a goal is not quantifiable, time-dependent, or suggestive of specific actions for its achievement. Goals are not intended for governing the issuance or coastal development permits, or to serve as regulatory standards by which development projects or zoning amendments are to be assessed for their conformity and consistency, and are not a valid basis for appealing a permit action. Examples of goals include: “Maintain the rural atmosphere” or “Diversify the economic base of the County.”

**Policy:** A specific statement in text or diagram guiding action and implying clear commitment. A mandatory declaration of an obligation intended specifically for permit governance. Policies bind the County’s actions and establish the standards of review for determining whether land use and development decisions, zoning changes or other County actions are consistent with the Coastal Land Use Plan. A development project’s demonstrated inconsistency with a Coastal Land Use Plan policy is a valid basis for appealing the permit action (see “Appeals” discussion, below). An example of a policy is: “Development in areas adjacent to environmentally sensitive habitat areas and parks and recreation areas shall be sited and designed to prevent impacts which would significantly degrade those areas, and shall be compatible with the continuance of those habitat and recreation areas.” See Part II – Goals, Policies, and Programs preface for a full numerical listing of these policies.

~~**Standard:** A specific, often quantified, guideline incorporated in a policy or implementation program, defining the relationship between two or more variables. Standards can often translate directly into regulatory controls such as zoning, grading, sign, road, and/or subdivision ordinances.~~

**Other Initiatives:** Nonbinding and/or advisory statements of intent, encouragement, or pledges of support for specific endeavors, programs, or outcomes. Other Initiatives may set guidelines and priorities for County actions, but are not intended for permit governance or to serve as regulatory standards by which development projects or zoning amendments are to be assessed for conformity and consistency, and are not a valid basis for appealing a permit action.

**Implementation Program:** An action, procedure, program, standard, regulation, ordinance, or technique that carries out general coastal land use plan policy or the Coastal Act. Implementation programs ~~also specify primary responsibility for carrying out the action and a time frame for its accomplishment~~ carrying out the policies of this Coastal Land Use Plan consist of Title 21, Chapters 21.00 through 21. of the Del Norte County Code.

~~Quantified Objective (Housing only): The number of housing units that the County expects to be constructed and the number of households the County expects will be assisted through Housing Element programs and based on general market conditions during the time frame of the element.~~

~~To interpret and understand the County's overall land use and development philosophy, users of this Policy Document should remember that the goals, policies, and programs articulated in Part II are as important, if not more so, than the Land Use Diagram. Accordingly, any review of development proposals must consider this Policy Document as a whole, rather than focusing solely on the Land Use Diagram or on particular policies and programs.~~

~~The goals, policies, and implementation programs in this Policy Document are categorized as follows:~~

~~Coastal Policies: Policies that are applicable to the unincorporated land within Coastal Zone are identified by the wave symbol (☪). These policies are formally part of the County Local Coastal Program's Land Use Plan and are subject to Coastal Commission certification.~~

~~Upland Policies: Policies that are applicable to the upland parts of the county outside of the Coastal Zone are identified by a tree symbol (☐). These policies are not part of the County Local Coastal Program's Land Use Plan.~~

~~Both Coastal and Upland Policies: Policies that are applicable to both coastal and upland areas are identified by both wave (☪) and tree (☐) symbols. These policies are formally part of the County Local Coastal Program's Land Use Plan and are subject to Coastal Commission certification.~~ [Struck as part of the suggested modifications that policies and development standards intended for application within the coastal zone be published as separate policy documents and County Code titles, respectively.

**Countywide Policies:** Countywide policies, for which there are no geographic boundaries (e.g., noise issues), are not part of the County Local Coastal Program's Land Use Plan. These policies are identified by the county boundary symbol (☐). See Part I – Coastal Land Use Plan Policy Document for a full numerical listing of these policies.

~~[NOTE: For the purposes of this Policy Document, the Consultants/County Staff developed an alpha-numeric system to track policies that came from the existing General Plan, Local Coastal Program, and Zoning Ordinance. These policies are summarized in the existing policies document (October 1, 1996, revised October 27, 1998). Policies that have been altered from their original language are followed by the word "Revised." Those policies that are completely new are followed by the word "New." These codes will eventually be deleted but will be helpful in the public review process.]~~

### Administering the Coastal Land Use Plan

All land use and development decisions in the Coastal Zone must be consistent with the Local Coastal Program (LCP). In authorizing coastal development permits after LCP certification, the County must make the finding that the development conforms to the certified LCP as well as all other findings required by County Code Title 21 – Local Coastal Program Zoning Enabling Ordinance, Chapters 21.50, and 21.55A through 21.55G.

The following general principles shall provide the framework for the administration and interpretation of the Coastal Land Use Plan:

- The policies of the Chapter 3 of the California Coastal Act (California Public Resources Code Sections 30210 through 30264) shall guide the interpretation of the Coastal Land Use Plan.
- Where policies within the Coastal Land Use Plan overlap or conflict, the policy which is the most protective of coastal resources shall take precedence.
- Prior to the issuance of any development permit required by this Plan, the City shall make the finding that the development meets the standards set forth in all applicable Coastal Land Use Plan policies and Implementation Program regulations.
- Prefacing textual discussion is intended as justification for the enumerated Coastal Land Use Plan policies and map designations. Therefore, the text shall be considered as the findings justifying the specified policies and Land Use Map designations.

### Appeals

In addition, with respect to the finality of the County's delegated coastal development permitting actions, certain types of development, as well as development within certain geographic areas that are acted on by the County after certification of the LCP, are appealable to the Coastal Commission (PRC Section 30603). These include:

- (1) Developments approved by the local government between the sea and the first public road paralleling the sea or within 300 feet of the inland extent of any beach or

of the mean high tideline of the sea where there is no beach, whichever is the greater distance.

- (2) Developments approved by the local government not included in paragraph (1) that are located on tidelands, submerged lands, and public trust lands, within 100 feet of any wetland, estuary, or stream, or within 300 feet of the top of the seaward face of any coastal bluff.
- (3) Developments approved by the local government not included with paragraphs (1) or (2) that are located in a sensitive coastal resource area.
- (4) Any development approved by a coastal county that is not designated as the principal permitted use under the zoning ordinance or zoning district map.
- (5) Any development which constitutes a major public works project or a major energy facility (whether approved or denied by the local government).

The grounds for an appeal of an approval of a permit are limited to an allegation that the development does not conform to the standards set forth in the certified Local Coastal Program or the public access policies of the Coastal Act. In addition, the grounds for appealing of a denial of a permit for a major public works project or major energy facility, referenced in number (5) above, are limited to an allegation that the development conforms to the standards set forth in the certified Local Coastal Program and the public access policies of the Coastal Act. The Coastal Commission retains coastal development permitting jurisdiction on submerged lands, tidelands, and public trust lands (Public Resources Code Section 30519).

#### Amending the Coastal Land Use Plan, Implementation Programs, or Land Use or Zoning Maps

Amendments to any portion of the Local Coastal Program, whether textual or cartographic, are subject to the processes set forth in Chapters 21.50A – California Coastal Zone Entitlement Procedures - General Plan Amendments and Chapter 21.50B – California Coastal Zone Entitlement Procedures - Zoning Amendments of Title 21 - Local Coastal Program Zoning Enabling Ordinance. Any amendments to the certified LCP will require review and certification by the Coastal Commission prior to becoming effective.

3. **Suggested Modification No. 3: (Natural Resources/Conservation Element)**  
All changes to the Natural Resources/Conservation Element

## SECTION 1

### NATURAL RESOURCES / CONSERVATION

This section contains goals, policies, and ~~programs~~ other initiatives that set the basic framework for maintenance and enhancement of Del Norte County's rich natural assets. The section includes goals, policies, and programs addressing the following subjects:

- **1.A. Marine Biological Resources generally and specifically;**
- 1.B. Environmentally Sensitive Habitat Areas (ESHAs);**
- **1.C. Water Resources;**
- ~~**Onshore Fisheries Resources;**~~
- ~~**Soils Resources;**~~
- ~~**Wildlife Habitat Resources;**~~
- **1.D. Air Resources;**
- **1.E. Agricultural Land;**
- **1.E. Forestry Resources; and**
- **1.G. Extractive Resources.**

**The goals and policies of more than one subject may apply to a particular development. The subjects are not mutually exclusive. Development must conform with all of the goals and policies under all subject headings as applicable.**

#### **1.A. MARINE BIOLOGICAL RESOURCES**

##### **Goals**

~~Goal 1.A.1.~~ To maintain and where possible enhance marine resources, coastal waters, and ~~sensitive~~ coastal **fish and wildlife** habitats, thereby recognizing the economic and biologic significance of these resources. ~~CC MWR VI.C.~~

~~Goal 1.C. 1.A.2.~~ To achieve the long-term goal of maintaining viable runs of anadromous fisheries through the protection, maintenance, enhancement, or restoration of anadromous fisheries spawning and nursery habitat.

## Policies

### General

1.A.1. ~~The County shall seek to maintain and where feasible enhance the existing quality of all marine~~ Marine resources shall be maintained, enhanced, and where feasible, restored. Special protection shall be given to areas and species of special biological or economic significance. Uses of the marine environment shall be carried out in a manner that will sustain the biological productivity of coastal waters and that will maintain healthy populations of all species of marine organisms adequate for long-term commercial, recreational, scientific, and educational purposes. ☞ *MWR VI.C.1.* [COMMISSION-COUNTY NEGOTIATED MODIFICATION]

1.A.2. ~~The County shall continue to enforce regulations which require that all surface and subsurface waters be maintained at the highest level of quality to insure the safety of public health and the biological productivity of coastal waters~~ and the quality of coastal waters, streams, wetlands, estuaries, and lakes appropriate to maintain optimum populations of marine organisms and for the protection of human health shall be maintained and, where feasible, restored through, among other means, minimizing adverse effects of waste water discharges and entrainment, controlling runoff, preventing depletion of ground water supplies and substantial interference with surface water flow, encouraging waste water reclamation, maintaining natural vegetation buffer areas that protect riparian habitats, and minimizing alteration of natural streams. ☞ *MWR VI.C.3.* [COMMISSION-COUNTY NEGOTIATED MODIFICATION]

~~1.A.3. The County shall encourage community programs that are designed to improve the quality of coastal fisheries and other marine resources.~~ ☞ *MWR VI.C.2.* [Moved to *BIOLOGICAL RESOURCES – Other Initiatives*]

~~*Offshore Rocks and Islands*~~ [Moved to *ESHA Policies* sub-heading 1]

~~1.A.4. The County shall continue its policy require that offshore rocks and islands, except for permitted navigational aides, be maintained in their existing state to insure the viability of the wildlife inhabiting or utilizing these sites.~~ ☞ ~~*MWR VII.A.4.*~~ [Revised, renumbered as *ESHA – Offshore Rocks and Islands Policy 1.B.10.*]

~~*Intertidal Zone, Beaches, and Bluffs*~~ [Revised, moved to *ESHA Policies* sub-heading 2]

~~1.A.5. The County shall continue its policy that all tidepools and tidal flats be managed to maintain their present characteristics and shall encourage the application of all feasible measures to mitigate uses that might prove harmful~~

~~to the biota inhabiting these areas. ☞ MWR VII.B.4.a. [Revised, renumbered as ESHA – Intertidal Zone Policy 1.B.14.]~~

~~1.A.6. The County shall encourage the California Department of Fish and Game to carefully monitor recreational activities at or near tidepools and tidal flats to insure the continued viability of these habitats. ☞ MWR VII.B.4.b. [Moved to ESHA – Other Initiatives]~~

~~1.A.7. In order to discourage all but light recreational use of tidepool regions, the County shall ensure that shoreline access and recreational facilities are located so as to direct use towards the open, sandy beaches of the county. ☞ MWR VII.B.4.c. (Revised) [Renumbered ESHA – Intertidal Zone Policy 1.B.13.]~~

~~1.A.8. The County shall cooperate with the State to prohibit the collecting of all tidepool organisms with exceptions for scientific purposes on a permit basis. ☞ MWR VII.B.4.d. [Moved to ESHA – Other Initiatives]~~

~~1.A.9. In order to ensure the continued maintenance and productivity of intertidal flat areas, the County will continue to work with the State to develop and implement enforceable regulations to regulate vehicles in the intertidal zone. ☞ MWR VII.B.4.e [Moved to ESHA – Other Initiatives]~~

~~1.A.10. The County shall continue to work with the State to maintain the permit system to allow motorized vehicles on tidal flats for commercial purposes such as fishing and salvage operations. ☞ MWR VII.B.4.f [Moved to ESHA – Other Initiatives]~~

~~1.A.11. The County shall require geologic studies for new construction within the area of demonstration on bluff tops to determine:~~

- ~~i. their suitability for development; and~~
- ~~ii. the necessary setbacks required to avoid hazards associated with bluff failure.~~

~~Note: The area of demonstration of stability includes the base, face, and top of all bluffs and cliffs. The extent of the bluff top considered should include the area between the face of the bluff and a line described on the bluff top by the intersection of a plane inclined at a 20 degree angle from horizontal passing through the toe of the bluff or cliff, or 50 feet inland from the edge of the cliff or bluff, whichever is greater. The County may, however, designate a smaller area of demonstration in specific areas of known geologic stability (as determined by adequate geologic evaluation and historic evidence) or where adequate protective works already exist. The County may designate a larger area of demonstration or exclude development entirely in areas of~~

~~known high instability. ☞ ~~MWR VII.F.4.a~~ [Revised, renumbered as GEOLOGIC HAZARDS – Policy 2.C.\_.]~~

~~1.A.12. The County shall investigate restoration and enhancement projects in the following bluff areas that have experienced excessive vegetation damage from trampling:~~

- ~~e. Pyramid Point to Lopez Creek;~~
- ~~d. Pebble Beach Public Access Points; and~~
- ~~e. Pebble Beach at Murphy Street. ☞ ~~MWR VII.F.4.b~~ [Moved to ESHA – Other Initiatives]~~

~~Estuaries~~ [Revised, moved to ESHA Policies sub-heading 3]

~~1.A.13. New shoreline development shall not be permitted to neither create nor contribute significantly to erosion, geologic instability, or destruction of the site or surrounding area or require the construction of protective devices that would substantially alter natural landforms along bluffs and cliffs. ☞ ~~(New)~~ [Revised, renumbered as GEOLOGIC HAZARDS – Policy 2.C.\_.]~~

~~1.A.14. The County shall strive to ensure that estuarine systems are maintained at their highest feasible level of productivity in order to protect and enhance coastal fisheries and other marine resources. ☞ ~~MWR VII.C.4.a~~. [Revised, renumbered as ESHA – Estuaries Policy 1.B.17.]~~

~~1.A.15. The County shall allow the alteration of existing estuarine water channels through dredging, diking, or filling only when consistent with Coastal Act Policy 30233 A & B and when such activity would enhance the biological productivity of the estuary. ☞ ~~MWR VII.C.4.b~~ [Revised, renumbered as ESHA – Estuaries Policy 1.B.18.]~~

~~1.A.16. The County shall require that all permitted activities in estuaries as identified in Policy 1.A.15. are carried out in a manner that will minimize impacts on the biota and productivity of the area. ☞ ~~MWR VII.C.4.c~~. [Revised, renumbered as ESHA – Estuaries Policy 1.B.19.]~~

~~1.A.17. The County shall permit the extraction of sand and gravel consistent with applicable marine resources, extraction, and habitat policies. ☞ ~~MWR VII.C.4.d~~. [Revised, renumbered as ESHA – Coastal Wetlands Policy 1.B.20.]~~

~~1.A.18. The County supports channel navigational modifications of the Smith and Klamath Rivers that are seasonal and do not require construction of permanent facilities that will adversely affect the flow of the stream if the following determinations are made:~~

- ~~a. The modifications are not permanent and will be removed before or during the following high water period;~~
- ~~b. The modifications are necessary to provide free movement of recreational and/or commercial boating; and~~
- ~~c. The project is consistent with all applicable laws and regulations local, state, and federal. (MWR VII.C.4.e. [Revised, renumbered as ESHA – Coastal Wetlands Policy 1.B.21.]~~

~~1.A.19. The County shall require implementation of approved management measures specified for urban areas in the recently approved State Water Resources Control Board and California Coastal Commission's non-point source pollution control program to minimize polluted runoff from construction activities and land use activities to insure the safety of public health and the biological productivity of coastal waters. (New) [Revised, renumbered as WATER RESOURCES – Policy 1.C.4.]~~

~~1.A.20. The County shall enforce regulations which promote that all subsurface water be maintained at a high level of quality to ensure the safety of public health. (New) [Revised, renumbered as WATER RESOURCES – Policy 1.C.9.]~~

### Wildlife Habitat Resources

~~1.E.1. 1.A.3.~~ The County recognizes the following areas are recognized as major locations of excellent wildlife habitat, native or natural vegetation, and of aesthetic value:

- a. All offshore rocks and islands (seaward of the mean high tide line) excluding Whaler and Battery Islands;
- b. Inland of the mean high tide line to the first line of vegetation (except in the areas of coastal bluffs when the area will be to the crest of the bluff), excluding the Crescent City Harbor area;
- c. Lakes Earl and Talawa and their immediate marshland, allowing continued agricultural uses;
- d. Sand dunes and wet sand areas, ~~excluding limited development in appropriate areas;~~
- e. The tidal-influenced areas of the Smith and Klamath Rivers. Commercial-Recreational and Public-Recreational development consistent with Section 30233 of the Coastal Act and Policy 1.B.22, shall be allowed, but be carefully ~~controlled~~ designed and sited to prevent significant alteration of the habitat areas. Gravel extraction shall be allowed on a scale consistent with local policy and state regulations; and
- f. Riparian corridors which preserve and protect wildlife and fisheries habitat; and
- g. The Crescent City Marsh, Elk Creek Wildlife Area, and their surrounding

wetlands.

These areas ~~should~~ shall be maintained as wildlife habitat and protected from adverse activity. ~~The County shall prohibit further development except that which is in the best interest of the public health, safety, and welfare, or as noted. Those wildlife habitats other than wetlands that also meet the definition of environmentally sensitive habitat areas (ESHAs) shall be protected against any significant disruption of habitat values, and only uses dependent on those resources shall be allowed within those areas, consistent with the requirements of Section 1, Subsection B, Environmentally Sensitive Habitat Areas (ESHAs). Diking, dredging, and filling of wetlands shall be consistent with Policy 1.B.21 and Section 30233 of the Coastal Act. Development entailing channelization, damming, or other substantial alterations of rivers and streams shall be consistent with Policy 1.B.26 and Section 30236 of the Coastal Act.~~ ~~☞~~ ~~☐~~ ~~COS P.WHV.7.~~ [COMMISSION-COUNTY NEGOTIATED MODIFICATION]

### Onshore Fisheries Resources

~~1.C.1. 1.A.4. The County shall, during~~ During the review of new development, ~~protect and maintain~~ the existing level of anadromous fisheries habitat ~~when such development is adjacent to or may affect fisheries habitat~~ shall be protected and maintained. ~~☞~~ ~~☐~~ (New)

### ~~Existing Implementation Programs:~~

- ~~● Restricted Driving Areas Ordinance~~
- ~~● Resource Conservation Area Zoning~~
- ~~● Coastal Area Hazards Zoning~~

### ~~New Implementation Programs:~~

~~Existing programs are deemed sufficient~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

### Other Initiatives

- ~~1.A.3.~~ ● The County shall encourage community programs that are designed to improve the quality of coastal fisheries and other marine resources. ~~☞~~ [Relocated from *MARINE RESOURCES - Policies*]
- ~~1.E.2.~~ ● The County shall support the critical habitat protections for federally listed threatened and endangered species. ~~☞~~ ~~☐~~ (New) [Relocated from *WILDLIFE HABITAT RESOURCES – Policies*]

- ~~1.E.3.~~ ● The County shall support the beneficial improvement and/or reestablishment of fisheries in the rivers and streams within the county, whenever feasible.  (New) [Relocated from *WILDLIFE HABITAT RESOURCES – Policies*]
- ~~1.E.4.~~ ● The County should recognize and encourage the various uses of wildlife and their habitat, including such activities as passive watching, scientific studies, educational purposes, and hunting and fishing.  ~~COS P.WHV.6.~~ [Relocated from *WILDLIFE HABITAT RESOURCES – Policies*]
- ~~1.C.4.~~ ● The County shall seek to improve the quantity and quality of anadromous fisheries habitat through a variety of means including but not limited to:
- a. Seeking funding to inventory, identify, and remove drainage facilities on county maintained roads which are barriers to fish migration;
  - b. Seek a variety of funding sources for stream restoration including innovative methods of stream restoration for streams or stream reaches identified as in need of restoration;
  - c. Politically support the development and continuation of programs, which improve or restore fish habitat;
  - d. Provide a mechanism for the distribution of educational material, which promotes a better understanding of the importance of habitat to support anadromous fisheries.
  - e. Provide training for county road workers, which will provide the latest techniques to reduce impacts on anadromous fisheries from maintenance or construction activities on county roads; and
  - f. Support legislative changes to the self-imposed limitations of the Federal Management Agency in granting and approving emergency repair funds, which have a negative impact on anadromous fisheries.  (New) [Relocated from *ONSHORE FISHERIES RESOURCES – Policies*]
- ~~1.C.5.~~ ● The County shall review and revise its road surfacing, grade slope, crown slope, culvert, ditch, bridge, and other maintenance practices to reflect techniques to reduce impacts on anadromous fisheries and be institutionalized so that such practices become standard for daily activities of the road crew.  (New) [Relocated from *ONSHORE FISHERIES RESOURCES – Policies*]
- ~~1.C.13.~~ ● The County encourages the review of forest practices by the California Board of Forestry and adoption of updated Forest Practice Rules to protect anadromous salmonoid fisheries populations.  (New) [Relocated from *ONSHORE FISHERIES RESOURCES – Policies*]

## 1.B. ENVIRONMENTALLY SENSITIVE HABITAT AREAS (ESHAs)

Goals

~~Goal 1.E.~~ 1.B. To protect, restore, and enhance ~~habitats that support fish and wildlife species~~ environmentally sensitive habitat areas throughout Del Norte County. [Relocated from to *WILDLIFE HABITAT RESOURCES – Goals*]

PoliciesGeneral

~~1.E.12.~~ 1.B.1. The ~~County shall continue to define the~~ following are designated as specific environmentally-sensitive habitat areas. This list of habitats is not inclusive of all environmentally sensitive habitat areas as defined by Section 30107.5 of the Coastal Act, either as may be currently present within the City, or as might be identified as environmentally sensitive habitat areas at some future time. Any areas not specifically designated in the LCP as environmentally sensitive habitat areas that meet the definition of environmentally sensitive habitat areas in Section 30107.5 of the Coastal Act shall be accorded all the protection provided for environmentally sensitive habitat areas in the LCP.

Offshore Rocks and Islands – All of the generally exposed, solid land surfaces and rocks, of any size, seaward of the mean high tide line. ☞ *MWR VII.A.1.*

Intertidal Zone – That region of the coastline lying below the high tide mark and above the low tide mark. Specialized biologic communities occupying this zone include tidepools and tidal flats, defined further as follows:

- Tidepool: A tidepool is a depression in the substrate of the intertidal zone where an accumulation of seawater occurs after the tide recedes. Typically a tidepool contains a wide variety of specially adapted plant and animal species.
- Tidal Flat: A tidal flat is a sandy or muddy flatland within the intertidal zone subject to an alternating exposure to the tide's ebb and flow. ☞ *MWR VII.B.1.*

**Coastal Sand Dune** – Ridges of sand created by wind deposited materials carried from ocean beaches. An active dune is one in the process of gaining or losing sand, commonly unvegetated or covered with sparse grasses and low-growing succulents. Stabilized dunes are usually covered by woody vegetation such as the beach pine. ☞ *MWR VII.G.1.*

**Coastal Estuary** – A coastal water body usually semi-enclosed by land, but which has open, partially obstructed, or intermittent exchange with the ocean and in which ocean water is at least occasionally diluted with fresh water runoff from the land. ☞ *MWR VII.C.1.*

**Coastal Wetland** – Lands within the coastal zone which may be covered periodically or permanently with shallow water such as marshes, swamps, mudflats, bogs, and fens. Farmed wetlands shall be defined as wetland areas, which are used for agricultural purposes such as grazing, planting or forage during parts of the year. Maintained roadside ditches of five feet or less in width and excavated in historic upland areas that have not been reclaimed or otherwise diked, drained, or altered from a preceding wetland condition, shall not be deemed to be a coastal wetland unless within an area directly subject to tidal influence; ~~in any case,~~ existing roadside ditches may be maintained and have improvements made which address safety concerns. Refer to the full definition of wetlands in the glossary for criteria for determining the type and extent of wetlands.

**Riparian Vegetation** – The plant cover normally found along water courses including rivers, streams, creeks, and sloughs, usually characterized by dense growths of trees and shrubs.  *MWR VII.E.1.*

**Rare or Especially Valuable Animal Habitat** – Any animal habitat area that is rare or especially valuable because of their special nature or role in an ecosystem and is easily degraded or disturbed by human activities or developments, including, but not limited to:

- Any habitat area of an animal species designated as rare, threatened, or endangered under State or Federal law; and
- Any habitat area of an animal species designated as Fully Protected or Species of Special Concern under State law or regulations.

**Rare or Especially Valuable Plant Habitat** – Any plant habitat area that is rare or especially valuable because of their special nature or role in an ecosystem and is easily degraded or disturbed by human activities or developments, including, but not limited to:

- Any habitat area of a plant species designated as rare, threatened, or endangered under State or Federal law;
- Any habitat area of a plant species designated as Fully Protected or Species of Special Concern under State law or regulations; and
- Any habitat area of plant species for which there is compelling evidence of rarity, for example, those designated 1b (Rare or endangered in California and elsewhere) or 2 (rare, threatened or endangered in California but more common elsewhere) by the California Native Plant Society. [COMMISSION-COUNTY NEGOTIATED MODIFICATION]

~~1.E.13.~~ 1.B.2. The ~~County shall maintain existing set of Land Use Constraints~~ maps that identify the locations of specific environmentally sensitive coastal sand dunes, coastal estuary, and wetlands, and riparian habitat areas within Del Norte County shall be maintained and updated upon the receipt of new biological data. The Land Use Constraints Maps are not inclusive of all environmentally sensitive habitat areas as defined by Section 30107.5 of the Coastal Act, either as may be currently present within the City, or as might be identified as environmentally sensitive habitat areas at some future time. Any areas not specifically mapped as environmentally sensitive habitat areas that meets the definition of environmentally sensitive habitat areas in Section 30107.5 of the Coastal Act shall be accorded all the protection provided for environmentally sensitive habitat areas in the LCP. Due to the scale of such maps, and the likelihood that other unmapped environmentally sensitive areas may be present on the site, questions may arise as to the specific boundary limits of an identified environmentally sensitive habitat area. Where there is a ~~dispute~~ uncertainty over the boundary or location of an environmentally sensitive habitat area, ~~the County may request~~ the applicant ~~to~~ shall provide the following information as determined by the County to be necessary to establish the boundary or location of the ESHA:

- a. A base map delineating topographic lines, adjacent roads, location of dikes, levees, flood control channels, and tide gates;
- b. Vegetation map;
- c. Soils map; and
- d. A biologist's report, where necessary.

The County shall cooperate with the California Department of Fish and Game to review this information and the County's determination shall be based upon specific findings as to whether an area is or is not an environmentally-sensitive habitat area based on General Plan criteria, definition, and, within the Coastal Zone, criteria set forth by the Coastal Act regarding Environmentally Sensitive Habitat Areas.

In addition, with respect to the appeal status of development within 100 feet of wetlands, determinations concerning the precise location of the boundary of the wetland area and appeal area shall be consistent with Title 14, Sections 13569 and 13577(b) of the California Code of Regulations.  MWR  
VII.D.4.g. (Revised) [COMMISSION-COUNTY NEGOTIATED  
MODIFICATION]

1.B.3. Those areas designated as, and/or meet the definition of environmentally sensitive habitat areas (ESHAs) shall be protected against any significant disruption of habitat values, and only uses dependent on those resources

shall be allowed within those areas. [COMMISSION-COUNTY NEGOTIATED MODIFICATION]

~~1.E.21. 1.B.4. The County shall ensure that development~~ Development in areas adjacent to environmentally sensitive wetland habitat areas and parks and recreation areas shall be sited and designed to prevent impacts which could significantly degrade such areas, and shall be compatible with the continuance of such habitat areas.¶

¶

1.B.5. The primary tool to reduce impacts ~~around wetlands between the development and the edge of the wetland~~ to all types of ESHAs shall be the establishment of a spatial buffer between proposed development and the ESHA. The buffer shall be a minimum of one hundred feet in width except when the buffer is established between proposed development and bald eagle nesting areas, in which case the buffer shall be a minimum of 300 feet. A buffer of less than ~~one hundred feet~~ the minimum width may be utilized where it can be determined that there is no adverse impact on the ~~wetland~~ ESHA, based on biological habitat and geophysical assessments taking into account: (1) the extent type, and sensitivity to disturbance of the subject environmentally sensitive area and/or other inter-connected sensitive resource areas; (2) the intensity of the development and its potential direct and cumulative impacts on the adjacent ESHA; and (3) mitigation measures necessary to reduce any significant impacts to less than significant levels, such as the incorporation of vegetative screening, runoff interceptor berming, and other protective features into the reduced buffer. A determination to utilize a buffer area of less than ~~one hundred feet~~ the minimum width shall be made in cooperation with the California Department of Fish and Game and the County's determination shall be based upon specific findings as to the adequacy of the proposed buffer to protect the identified resource. ☞ *MWR VII.D.4.f.* [COMMISSION-COUNTY NEGOTIATED MODIFICATION] [Revised, relocated from *WILDLIFE HABITAT RESOURCES – Policies*]

~~1.E.9. 1.B.6. The County shall require that new~~ New development ~~is~~ shall be consistent with critical habitat protection for ~~federally~~ Federally and State listed threatened and endangered species, when such critical habitat is specifically identified at the affected project site or the development ~~has identified~~ would have offsite impacts that significantly adversely affect critical habitat. ☞ (New) [Revised, relocated from *WILDLIFE HABITAT RESOURCES – Policies*]

~~1.E.10. 1.B.7. The County shall require clustering~~ The clustering of development shall be required and, ~~work with other public agencies,~~ in the acquisition of conservation easements shall be coordinated with other agencies to provide habitat protection of State or Federally listed rare, threatened, or endangered, and/or other special status species. ☞ (New) [Revised, relocated from *WILDLIFE HABITAT RESOURCES – Policies*]

~~1.C.3.~~ **1.B.8.** When a use is permitted within an estuary, a riparian corridor, or a wetland buffer area and where no feasible, less environmentally-damaging alternative ~~is available exists~~; ~~the County shall require that feasible~~ feasible mitigation measures shall be incorporated into the permitted activity. Such mitigation shall:

- a. Minimize all potential adverse impacts to the estuary, riparian corridor or wetland such as increased peak runoff, sedimentation, increased water temperatures, and loss of shade, to less than significant levels;
- b. Require the siting and design of the permitted activity to be located and configured to reduce or prevent impacts incompatible with the continuance of the habitat function; and
- c. Provide for compensatory replacement of habitat areal loss at a minimum ratio of 2:1 pursuant to an approved restoration and monitoring plan.  (New) [Revised, relocated from *ONSHORE FISHERIES RESOURCES – Policies*]

**1.B.9.** Proposed or required landscaping for development located in proximity to ESHAs where such landscaping could affect the biological integrity of the adjacent ESHA, shall, to the greatest extent feasible utilize native species plantings derived from local stocks. The use of plant species listed as problematic and/or invasive by the California Native Plant Society, the California Invasive Plant Council, as may be identified from time to time by the State of California, or listed as a “noxious weed” by the governments of the State of California or the United States, are prohibited and shall not be allowed to naturalize or persist in landscaped areas.

#### Offshore Rocks and Islands Policies

~~1.A.4.~~ **1.B.10.** ~~The County shall continue its policy that offshore rocks and islands, except~~ Except for permitted navigational aides, offshore rocks and islands shall be maintained in their existing state to insure the viability of the wildlife inhabiting or utilizing these sites.  *MWR VII.A.4.*

~~6.A.8.~~ **1.B.11.** ~~The County shall require lights~~ Exterior lighting fixtures of new development in the Pt. St. George/Pebble Beach area and other shoreline locales ~~to~~ shall be shielded, when feasible, so they are directed down and away from the ocean to minimize impact on off-shore reef and island habitats.  (New) [Revised, reiterated from VISUAL RESOURCES Policy 6.A.4]

#### Intertidal Zone Policies

~~1.A.7.~~ **1.B.12.** In order to discourage all but light recreational use of tidepool regions, ~~the County shall ensure that~~ shoreline access and recreational facilities ~~are~~ shall be located so as to direct use towards the open, sandy beaches of the county.  *MWR VII.B.4.c. (Revised)*

~~1.A.5. 1.B.13.~~ ~~The County shall continue its policy that all~~ All tidepools and tidal flats shall be managed to maintain their present characteristics and ~~shall encourage the application of~~ all feasible measures shall be required to mitigate uses that might prove harmful to the biota inhabiting these areas. ☞ MWR VII.B.4.a.

### Coastal Sand Dunes Policies

~~1.E.16. 1.B.14~~ To ensure their values as groundwater recharge regions and wildlife habitats, ~~the County shall encourage the maintenance in their existing states or return to their natural states where feasible, of~~ coastal sand dunes, shall be maintained as mapped on the County sensitive habitat maps, or, where feasible, restored to their natural state. ☞ MWR VII.G.4.a .

~~1.E.18. 1.B.15.~~ The ~~County shall discourage the removal or unnecessary~~ nonresource-dependent disturbance of dune vegetation is prohibited. ☞ MWR

### Estuaries Policies

~~1.A.14. 1.B.16.~~ ~~The County shall strive to ensure that estuarine~~ Estuarine systems ~~are~~ shall be maintained at their highest feasible level of productivity in order to protect and enhance coastal fisheries and other marine resources. ☞ MWR VII.C.4.a.

~~1.A.15. 1.B.17.~~ The ~~County shall allow the~~ alteration of existing estuarine water channels through dredging, diking, or filling shall be allowed only when consistent with Coastal Act ~~Policy Section 30233 A & B and when such activity would enhance the biological productivity of the estuary.~~ The more specific permissible use provisions of this policy shall control over the more general use provisions for other types of ESHA identified in Policies 1.B.3. and 1.B.29. ☞ MWR VII.C.4.b.

~~1.A.16. 1.B.18.~~ ~~The County shall require that all~~ All permitted activities in estuaries as identified in Policy ~~1.A.15. 1.B.17. are~~ shall be carried out in a manner that will minimize impacts on the biota and productivity of the area. ☞ MWR VII.C.4.c.

### Coastal Wetlands Policies

~~1.A.17. 1.B.19.~~ The ~~County shall permit the~~ extraction of sand and gravel shall be permitted, except in environmentally sensitive areas, only when consistent with applicable marine resources, and mineral extraction, ~~and habitat~~ policies. ☞ MWR VII.C.4.d.

~~1.A.18. 1.B.20.~~ ~~The County supports channel~~ Channel navigational modifications of the Smith and Klamath Rivers that are seasonal and do not require construction of

permanent facilities that will adversely affect the flow of the stream may be authorized if the following determinations are made:

- a. The modifications are not permanent and will be removed before or during the following high water period;
- b. The modifications are necessary to provide free movement of recreational and/or commercial boating; and
- c. The project is consistent with Section 30233 of the Coastal Act, Policy 1.B.21, and all applicable laws and regulations local, state, and federal.  MWR VII.C.4.e.

~~1.E.19, 1.B.21.~~ 1.B.21. The ~~County shall permit the~~ diking, filling, or dredging of wetlands may be permitted in accordance with other applicable provisions of this ~~General Coastal Land Use~~ Plan where there is no feasible less environmentally damaging alternative and where feasible mitigation measures have been provided to minimize adverse environmental effects. Within the coastal zone, such projects shall be limited to: ~~those identified in Section 30233 of the Coastal Act~~

- New or expanded port, energy, and coastal-dependent industrial facilities, including commercial fishing facilities;
- Maintaining existing, or restoring previously dredged, depths in existing navigational channels, turning basins, vessel berthing and mooring areas, and boat launching ramps;
- In open coastal waters, other than wetlands, including streams, estuaries, and lakes, new or expanded boating facilities and the placement of structural pilings for public recreational piers that provide public access and recreational opportunities;
- Incidental public service purposes, including but not limited to, burying cables and pipes or inspection of piers and maintenance of existing intake and outfall lines;
- Mineral extraction, including sand for restoring beaches, except in environmentally sensitive areas;
- Restoration purposes; or
- Nature study, aquaculture, or similar resource dependent activities.

The more specific permissible use provisions of this policy shall control over the more general use provisions for other types of ESHA identified in General ESHA Policy 1.B.3. and Coastal Wetlands Policy 1.B.29.  MWR VII.D.4.a. [COMMISSION-COUNTY NEGOTIATED MODIFICATION]

~~1.E.27, 1.B.22.~~ 1.B.22. The ~~County deems the~~ continuation of existing agricultural uses, such as grazing and pastoral activities, and the raising and harvesting of crops ~~to be a~~ are principle ~~use~~ uses (see Glossary entry) within existing Farmed Wetlands. Maintenance and repair activities auxiliary to the above agricultural uses (i.e., maintenance and repair of existing dikes, levees, drainage ditches, and other similar agricultural drainage systems) are, ~~therefore,~~ allowable uses including drainage related to crop rotation provided they do not significantly alter the

hydrology of the area. Such areas are subject to the other policies of this ~~General Coastal Land Use~~ Plan. ☞ *LR III.C.8.* [Revised for consistency with proposed permitted repair and maintenance activities enumerated in LCPZEO Section 21.11A.030.C.1]

~~1.E.20. 1.B.23.~~ In order to provide ~~that for~~ the maximum amount of agricultural production in existing farmed wetlands and cultivated lands (cultivated within the last ten years), ~~the County shall permit~~ maintenance and repairs ~~for of~~ existing dikes, levees, drainage ditches, and other similar agricultural drainage systems, shall be permitted subject to any and all applicable policies within the ~~General Coastal Land Use~~ Plan. ☞ *MWR VII.D.4.c.*

~~1.E.22. 1.B.24.~~ The portions of the maintenance opening of the sandbar at Lake Talawa within the County's coastal development permitting jurisdiction shall be permitted consistent with agreements negotiated between the County and the California Department of Fish and Game, and the provisions of this chapter regarding development within and adjacent to ESHA. ☞ *MWR VII.D.4.e.*

~~1.E.23. 1.B.25.~~ ~~The County shall require that dredging~~ Sediment management dredging and spoils disposal shall be planned and carried out to avoid significant disruption to marine and wildlife habitats and water circulation. Dredge spoils suitable for beach replenishment when feasible ~~should~~ shall be transported for such purposes to appropriate beaches or into suitable longshore current systems. ☞ *MWR VII.D.4.b.*

~~1.E.24. 1.B.26.~~ ~~The County shall prohibit direct~~ Direct, untreated runoff of pollutants and siltation into wetland areas from development shall be prohibited. Development shall be designed in such a manner that pollutants and siltation will not significantly adversely affect the value or function of wetlands. ☞ *(New)*

~~1.E.25. 1.B.27.~~ ~~The County shall require new~~ New development shall be required to avoid and/or mitigate wetland loss through ~~any a~~ a combination of the following, in descending order of desirability:

- Avoidance of dredging, diking, filling, or other direct, indirect or cumulative impacts to wetland habitat; or
- Where avoidance is not feasibly possible, minimization of impacts on the resource to levels of insignificance through the inclusion of all feasible mitigation measures; or and
- Replacement, including use of a mitigation banking program  
Compensatory replacement of the affected wetland at appropriate replacement ratios pursuant to an approved restoration and monitoring plan. ☞ *(New)* [COMMISSION-COUNTY NEGOTIATED MODIFICATION]

~~1.E.26, 1.B.28.~~ In cases where the County requires Compensatory replacement for a wetland loss, the shall achieve a level of replacement functionally and spatially equal to or greater to that of the wetland lost. Any replacement mitigation to be required with respect to any given project will shall be evaluated according to the following criteria:

1. On-site mitigation shall be preferred to off-site, ~~and~~ in-kind mitigation shall be preferred to out-of-kind, and mitigation that provides for the same function and values as that of the lost wetlands is favored over replacement wetlands with dissimilar functions and values; and
2. ~~Functional replacement~~ Replacement ratios may vary to the extent necessary to incorporate a margin of safety reflecting the expected degree of success associated with the mitigation plan; ~~and,~~
3. ~~Acreage replacement ratios may vary to compensate for functional temporal losses associated with the lag time for establishing the replacement wetland, and~~ depending on the relative functions and values of those wetlands being lost and those being supplied, ~~including compensation for temporal losses.~~  (New)

~~1.E.29, 1.B.29.~~ The County shall require mitigation development Development projects where segments of stream habitat are unavoidably altered modified through channelization, damming, or other substantial alterations shall be limited to: (1) necessary water supply projects; (2) flood control projects where no other method for protecting existing structures in the floodplain is feasible and where such protection is necessary for public safety or to protect existing development; or (3) developments where the primary function is the improvement of fish and wildlife habitat, and incorporate the best mitigation measures feasible. Such impacts should Impacts of such development shall be mitigated on-site with in-kind habitat replacement or elsewhere in the stream system through stream or riparian habitat restoration work pursuant to an approved restoration and monitoring plan.  (New) [COMMISSION-COUNTY NEGOTIATED MODIFICATION]

### Riparian Areas Vegetation Policies

~~1.E.28, 1.B.30.~~ The County shall ensure that Development within riparian vegetation ESHA shall be maintained along streams, creeks, and sloughs and other water courses for their qualities as wildlife habitat, stream buffer zones, and bank stabilization limited to the following uses:

- Resource Dependent Uses. Uses which by their inherent nature require location within the ESHA;
- Restoration projects where the primary purpose is restoration of the habitat;
- Invasive plant eradication projects if they are designed to protect and enhance habitat values; and

- Pipelines and utility lines installed beneath the ESHA using directional drilling techniques designed to avoid significant disruption of habitat values. Where alterations to segments of stream habitat cannot be avoided, policy ~~1.E.29~~ 1.B.29 shall apply. ☞ ~~MWR VII.E.4.a.~~ (Revised) [COMMISSION-COUNTY NEGOTIATED MODIFICATION]

~~1.C.10.~~ 1.B.31. For drainage courses within the county flood control system (which are used for storm water runoff and are identified as streams which support anadromous fisheries), ~~the County shall amend its~~ maintenance practices shall be, to the extent practicable, performed in a manner which provide provides for retention of the riparian canopy and minimizes changes to channel morphology. ☞ (New)

### Other Initiatives

- ~~1.A.6.~~ • The County shall encourage the California Department of Fish and Game to carefully monitor recreational activities at or near tidepools and tidal flats to insure the continued viability of these habitats. ☞
- ~~1.A.8.~~ • The County shall cooperate with the State to prohibit the collecting of all tidepool organisms with exceptions for scientific purposes on a permit basis. ☞ MWR VII.B.4.d.
- ~~1.A.9.~~ • In order to ensure the continued maintenance and productivity of intertidal flat areas, the County will continue to work with the State to develop and implement enforceable regulations to regulate vehicles in the intertidal zone. ☞ MWR VII.B.4.e.
- ~~1.A.10.~~ • The County shall continue to work with the State to maintain the permit system to allow motorized vehicles on tidal flats for commercial purposes such as fishing and salvage operations. ☞ MWR VII.B.4.f.
- ~~1.A.12.~~ • The County shall investigate restoration and enhancement projects in the following bluff areas that have experienced excessive vegetation damage from trampling:
  - a. Pyramid Point to Lopez Creek;
  - b. Pebble Beach Public Access Points; and
  - c. Pebble Beach at Murphy Street. ☞ MWR VII.F.4.b.
- ~~1.E.8.~~ • The County shall continue to consult with the California Department of Fish and Game for identification and protection of rare, threatened, and endangered species

that may be adversely affected by public or private development projects. ☞☞ (New)

- ~~1.E.11.~~ ● The County shall continue to pursue a cooperative role with the U.S. Forest Service and State and National park services in the protection and continued maintenance of all plants and animal species and their habitat. ☞☞ COS P.WHV.10.
- ~~1.E.14.~~ ● The County shall continue to implement the existing Resource Conservation Area program to guide development in and adjacent to environmentally sensitive habitats, both natural and man-made, so as to allow utilization of land areas compatible with other policies while providing adequate protection of the subject habitat. ☞☞ MWR VII.D.4.d.
- ~~1.E.15.~~ ● The County shall encourage the California Board of Forestry to adopt updated Forest Practice Rules which prohibit timber harvest within riparian, wetland, estuary habitat, or related buffer areas, designated by a locally adopted General Plan or Local Coastal Plan. ☞☞ (New)
- ~~1.E.17.~~ ● The County shall develop enforceable regulations to limit the use of motorized vehicles to dunes. ☞☞ MWR VII.G.4.b, RIV I.F.3.
- ~~1.E.31.~~ ● The County should provide for diversified recreational use of fish and wildlife while providing preservation of their habitat. ☞☞ COS P.WHV.4.
- ~~1.E.32.~~ ● The County should seek funding to reestablish riparian vegetation in selected stream corridors. ☞☞ MWR VII.E.4.b.

components of the Implementation Plan within Part I Summary]

## 1.C. WATER RESOURCES

### Goals

~~Goal 1.B.~~ 1.C. To protect and enhance the natural qualities of Del Norte County's streams, creeks, ~~and~~ groundwater, and marine waters to ~~insure~~ ensure sufficient water supplies of good quality for all beneficial uses. ☞☞ ~~COS WR.G.1., COS WR.G.2., COS WR.G.3.~~

### Policies

- 1.C.1.** Development shall be designed and managed to maintain, and restore where feasible, the biological productivity and quality of marine resources and coastal waters, consistent with sections 30230, 30231, and other relevant sections of the California Coastal Act. Coastal Act sections 30230 and 30231 set forth in 1.C.1.a and 1.C.1.b below are incorporated herein as policies of the Land Use Plan:
- a.** Marine resources shall be maintained, enhanced, and, where feasible, restored. Special protection shall be given to areas and species of special biological or economic significance. Uses of the marine environment shall be carried out in a manner that will sustain the biological productivity of coastal waters and that will maintain healthy populations of all species of marine organisms adequate for long-term commercial, recreational, scientific, and educational purposes.
- 1.B.1.** **b.** The County shall seek to maintain, and where feasible, enhance biological productivity and the existing quality of all water resources in order to ensure public coastal waters, streams, wetlands, estuaries, and lakes appropriate to maintain optimum populations of marine organisms and for the protection of human health and safety and the biological productivity of waters shall be maintained and, where feasible, restored through, among other means, minimizing adverse effects of waste water discharges and entrainment, controlling runoff, preventing depletion of ground water supplies and substantial interference with surface water flow, encouraging waste water reclamation, maintaining natural vegetation buffer areas that protect riparian habitats, and minimizing alteration of natural streams.  
~~☞ ■ MWR VI.C.1., MWR VI.C.3., MWR VI.C.4.~~
- 1.C.2.** Development shall be designed and managed to minimize the introduction of pollutants into coastal waters (including the ocean, estuaries, wetlands, rivers, streams, and lakes), to the maximum extent practicable.
- 1.C.3:** Development shall be designed and managed to minimize increases in stormwater runoff volume and rate, to the maximum extent practicable, to avoid adverse impacts to coastal waters.
- 1.B.2. 1.C.4.** ~~The County shall require a domestic~~ Domestic water sampling shall be required prior to a property conversion from an agricultural to residential land use to ensure the usability of the water or a public water connection shall be provided. ☞ ■ (New)

- ~~1.B.3.~~ ~~The County shall continue to follow all existing and future Federal and State water quality standards. ☞ ■ COS WR.P.4. [Moved to WATER QUALITY – Other Initiatives]~~
- ~~1.B.4.~~ ~~The County shall continue its policy that the conversion of the coastal dunes to residential use should be discouraged, recognizing their importance as groundwater recharge areas, barriers to seawater intrusion, and their severe limitation for individual sewage effluent. ☞ ■ COS WR.P.3. [Revised and moved to Section 3 SMITH RIVER SUBAREA SPECIFIC – Policies]~~
- ~~1.B.5.~~ ~~The County shall encourage the providers of potable water to take a coordinated and integrated approach to solving water supply and demand problems. This approach shall include evaluating areas of known groundwater contamination and identifying priorities for cleanup that reflect future areas of increased water demand. ☞ ■ COS WR.P.5. [Moved to WATER QUALITY – Other Initiatives]~~
- ~~1.B.6.~~ ~~The County shall encourage community programs designed to improve the quality of fisheries and other water resources, including the voluntary incorporation of conservation buffers where pesticide and fertilizer application is a regular occurrence and public outreach and awareness related to home and business opportunities to improve fisheries and water resources. ☞ ■ MWR VI.C.2. (Revised) [Moved to WATER QUALITY – Other Initiatives]~~
- ~~1.B.7.~~ ~~The County shall continue to comply with the policies of the Wild and Scenic Rivers Act designations on the Smith River and Klamath River. ☞ ■ (New) [Moved to WATER QUALITY – Other Initiatives]~~
- ~~1.B.8.~~ 1.C.5. ~~The County shall require that proposals~~ Proposals to create new parcels, either by land division or lot line adjustment, shall be required to include adequate space ~~outside of watercourses' setback areas~~ to place improvements (e.g., buildings, sewage disposal where applicable, and appurtenant structures) outside of areas ~~that require~~ required for watercourse and/or other ESHA buffer protection, pursuant to WCQB to meet County or regional water quality control board environmental health standards, and/or to comply with zoning requirements. ☞ ■ (New)
- ~~1.B.9.~~ 1.C.6. The County shall support the use of innovative sewage disposal systems which are proven to be financially feasible and are found to be consistent with State Water Quality Control Board standards. ☞ (New)
- ~~1.B.10.~~ 1.C.7. The County shall use mowing and cutting as the primary technique for controlling excessive vegetation growth along County roads and drainage ways. Other

techniques such as herbicide use (e.g., via spray or stem application) use of beneficial insects, and flaming/torching, may be used for controlling invasive exotic vegetation (as defined by the CA. Exotic Pest Plant Council) if such techniques would be more effective than mowing or cutting and not pose a hazard to the environment.  (New)

~~1.B.11. The County shall work with Caltrans to encourage the use of mechanical vegetation control along its roads and request that the application of chemical spraying on State Highways be minimized.~~  (New) [Moved to WATER QUALITY – Other Initiatives]

~~1.B.12. The County shall support state agency dairy water quality standards, including compliance of local agricultural wells with state well standards and encourage local voluntary compliance.~~  (New) [Moved to WATER QUALITY – Other Initiatives]

~~1.B.13. The County shall advocate the formation of a Soils Conservation District (also known as a Resources Conservation District) for the purpose of monitoring and management assistance for agriculture, timber and water resources.~~  (New) [Moved to WATER QUALITY – Other Initiatives]

~~1.A.19, 1.C.8. The County shall require implementation of approved Stormwater runoff management measures specified for urban areas in the recently approved State Water Resources Control Board and California Coastal Commission's non-point source pollution control program~~ to minimize polluted runoff and minimize increases in runoff from construction activities and land use activities, shall be required to be implemented as part of any authorized development projects to ~~insure~~ ensure the safety of public health and the biological productivity of coastal waters.  (New)

~~1.C.9. Long-term post-construction Best Management Practices (BMPs) that protect water quality and minimize increases in runoff volume and rate shall be incorporated in the project design of developments in the following order of priority:~~

- ~~i. Site Design BMPs: Project design features that reduce the creation or severity of potential pollutant sources, or reduce the alteration of the project site's natural stormwater flow regime. Examples are minimizing impervious surfaces, preserving native vegetation, and minimizing grading.~~
- ~~ii. Source Control BMPs: Methods that reduce potential pollutants at their sources and/or avoid entrainment of pollutants in runoff, including schedules of activities, prohibitions of practices,~~

maintenance procedures, managerial practices, or operational practices. Examples are covering outdoor storage areas, use of efficient irrigation, and minimizing the use of landscaping chemicals.

- iii. Treatment Control BMPs: Systems designed to remove pollutants from stormwater, by simple gravity settling of particulate pollutants, filtration, biological uptake, media adsorption, or any other physical, biological, or chemical process. Examples are vegetated swales, detention basins, and storm drain inlet filters.

Site Design BMPs may reduce a development's need for Source and/or Treatment Control BMPs, and Source Control BMPs may reduce the need for Treatment Control BMPs. Therefore, all development shall incorporate effective post-construction Site Design and Source Control BMPs, to minimize adverse impacts to water quality and coastal waters resulting from the development to the maximum extent practicable.

If the combination of Site Design and Source Control BMPs is not sufficient to protect water quality and coastal waters consistent with Policy 1.C.1, development shall also incorporate post-construction Treatment Control BMPs. Developments of Water Quality Concern (see Policy 1.C.12) are presumed to require Treatment Control BMPs. Treatment Control BMPs may include, but are not limited to, biofilters (e.g., vegetated swales or grass filter strips), bioretention, infiltration trenches or basins, retention ponds or constructed wetlands, detention basins, filtration systems, storm drain inlet filters, wet vaults, or hydrodynamic separator systems.

- 1.C.10. Development projects shall incorporate Low Impact Development (LID) techniques in order to minimize stormwater quality and quantity impacts from development unless a credible and compelling explanation is provided as to why such features are not feasible and/or appropriate. LID is a development site design strategy with a goal of maintaining or reproducing the site's pre-development hydrologic functions of storage, infiltration, and groundwater recharge, as well as the volume and rate of stormwater discharges. LID strategies use small-scale integrated and distributed management practices, including minimizing impervious surfaces, infiltrating stormwater close to its source, and preservation of permeable soils and native vegetation. LID techniques include, but are not limited to, the following:

- a. Development shall be sited and designed to preserve the infiltration, purification, detention, and retention functions of natural drainage systems that exist on the site, to the maximum extent practicable. Drainage shall be conveyed from the developed area of the site in a non-erosive manner.

b. Development shall minimize the creation of impervious surfaces (including pavement, sidewalks, driveways, patios, parking areas, streets, and roof-tops), especially directly connected impervious areas, to the maximum extent practicable. Directly connected impervious areas include areas covered by a building, impermeable pavement, and/or other impervious surfaces, which drain directly into the storm drain system without first flowing across permeable land areas (e.g., lawns).

c. Development shall maintain or enhance, where appropriate and feasible, on-site infiltration of stormwater runoff, in order to preserve natural hydrologic conditions, recharge groundwater, attenuate runoff flow, and minimize transport of pollutants. Alternative management practices shall be substituted where the review authority has determined that infiltration BMPs may result in adverse impacts, including but not limited to where saturated soils may lead to geologic instability, where infiltration may contribute to flooding, or where regulations to protect groundwater may be violated.

d. Development that creates new impervious surfaces shall divert stormwater runoff flowing from these surfaces into permeable areas in order to maintain or enhance, where appropriate and feasible, on-site stormwater infiltration capacity.

e. To enhance stormwater infiltration capacity, development applicants shall use permeable pavement materials and techniques (e.g., paving blocks, porous asphalt, permeable concrete, and reinforced grass or gravel), where appropriate and feasible. Permeable pavements shall be designed so that stormwater infiltrates into the underlying soil, to enhance groundwater recharge and provide filtration of pollutants.

1.C.7. Development shall be designed and managed to minimize the introduction of pollutants into coastal waters (including the ocean, estuaries, wetlands, rivers, streams, and lakes), to the “maximum extent practicable” as defined herein.

1.C.8. Development shall be designed and managed to minimize increases in stormwater runoff volume and rate, to the maximum extent practicable, to avoid adverse impacts to coastal waters.

~~1.A.20. 1.C.9. The County shall enforce regulations which promote that all~~ All subsurface water shall be maintained at a high level of quality to ensure the safety of public health. ~~(New)~~

~~1.E.33, 1.C.10.~~ The County shall continue to require the use Use of feasible and practical best management practices (BMPs) to protect streams and other coastal waters from the adverse effects of construction activities, ~~and~~ urban runoff, ~~and to encourage the use of BMPs for~~ agricultural activities shall be required as part of the authorization of new development. ~~CC~~ ~~■~~ (New)

1.C.11. All development that requires a coastal grading/development permit shall submit a plan to control post-construction stormwater runoff flows, and maintain or improve water quality (“Post-Construction Stormwater Plan”). This plan shall specify Site Design, Source Control, and if necessary, Treatment Control BMPs that will be implemented to minimize stormwater pollution and minimize or eliminate increases in stormwater runoff volume and rate from the development after construction.

~~1.C.6, 1.C.12.~~ The County shall adopt mechanisms grading ordinance shall be amended to restrict winter land grading activities on hillsides through ~~amendments to the grading ordinance,~~ imposition of standardized conditions, ~~or as part of the authorization of new development and~~ through mitigation imposed through the coastal grading/development permit and environmental review process. ~~CC~~ ~~■~~ (New)

1.C.13. Developments of Water Quality Concern, defined as those types and classes of development that have the potential for adverse coastal water quality impacts due to the development size, type of land use, impervious site coverage, or proximity to coastal waters, shall be subject to additional requirements for design and implementation of post-construction treatment control BMPs in order to minimize stormwater pollution and protect coastal waters.

[See also Policy 3.J.3]

~~Existing Implementation Programs~~

- ~~● Wells and Preservation of Ground Water Ordinance~~
- ~~● Onsite Sewage Disposal Systems Ordinance~~
- ~~● Resource Conservation Area Zoning~~

~~New Implementation Programs~~

~~1.1~~ ~~The County shall advocate formation of a Soils Conservation District.~~ (Policy 1.B.15.)

~~Responsibility: Board of Supervisors, community resources agencies~~

~~Time Frame: First five years~~ [Replace with universal cross-reference to Local Coastal Program Zoning Enabling Ordinance and other

development regulation components of the Implementation Plan within Part I Summary]

### Other Initiatives

- ~~1.C.9.~~ ● The County shall continue to utilize natural drainage courses rather than channelizing streams for stormwater runoff. ~~☞~~ ~~■~~ ~~(New)~~
- ~~1.B.3.~~ ● The County shall continue to follow all existing and future Federal and State water quality standards. ~~☞~~ ~~■~~ ~~COS WR.P.4~~
- ~~1.B.5.~~ ● The County shall encourage the providers of potable water to take a coordinated and integrated approach to solving water supply and demand problems. This approach shall include evaluating areas of known groundwater contamination and identifying priorities for cleanup that reflect future areas of increased water demand. ~~☞~~ ~~■~~ ~~COS WR.P.5~~
- ~~1.B.6.~~ ● The County shall encourage community programs designed to improve the quality of fisheries and other water resources, including the voluntary incorporation of conservation buffers where pesticide and fertilizer application is a regular occurrence and public outreach and awareness related to home an business opportunities to improve fisheries and water resources. ~~☞~~ ~~■~~ ~~MWR VI.C.2.~~ ~~(Revised)~~
- ~~1.B.7.~~ ● The County shall continue to comply with the policies of the Wild and Scenic Rivers Act designations on the Smith River and Klamath River. ~~☞~~ ~~■~~ ~~(New)~~
- ~~1.B.11.~~ ● The County shall work with Caltrans to encourage the use of mechanical vegetation control along its roads and request that the application of chemical spraying on State Highways be minimized. ~~☞~~ ~~■~~ ~~(New)~~
- ~~1.B.12.~~ ● The County shall support state agency dairy water quality standards, including compliance of local agricultural wells with state well standards and encourage local voluntary compliance. ~~☞~~ ~~■~~ ~~(New)~~
- ~~1.B.13.~~ ● The County shall advocate the formation of a Soils Conservation District (also known as a Resources Conservation District) for the purpose of monitoring and management assistance for agriculture, timber and water resources. ~~☞~~ ~~□~~ ~~(New)~~
- ~~1.C.12.~~ ● The County shall not support any water diversions that export water from within the county to areas outside the county. The County shall oppose any increase in diversions of water which otherwise would flow into the county and would have a negative effect on local fisheries. ~~☞~~ ~~□~~ ~~(New)~~

- The County shall promote both the protection and restoration of water quality and coastal waters. Water quality degradation can result from a variety of factors, including but not limited to the introduction of pollutants, increases in runoff volume and rate, generation of non-stormwater runoff, and alteration of physical, chemical, or biological features of the landscape.
- The County shall encourage public outreach and education about the water quality impacts of development. The County shall coordinate with other agencies in the watershed area, as feasible, to develop public education programs on urban runoff issues and the appropriate roles of individuals, businesses, and government in the implementation of BMPs for pollution prevention.
- The County shall ensure that municipal maintenance activities and other public projects not requiring a Coastal Development Permit also integrate appropriate BMPs to protect water quality and coastal waters.
- The County reserves the right to inspect and evaluate the effectiveness of installed construction-phase BMPs, and to require that additional BMPs be implemented if the installed BMPs are not effective in minimizing impacts to water quality and coastal waters.
- The County shall develop a water quality checklist to be used in the permit review process to evaluate a proposed development's potential impacts to water quality and coastal waters, and proposed mitigation measures.
- The County shall require markers or stenciling for all new storm drain inlets constructed or modified by development, to discourage dumping and other illicit discharges into the storm drain system.

~~ONSHORE FISHERIES RESOURCES~~ [Moved to *BIOLOGICAL RESOURCES* sub-heading 3]

~~Goal 1.C. To achieve the long term goal of maintaining viable runs of anadromous fisheries through the protection, maintenance, enhancement, or restoration of anadromous fisheries spawning and nursery habitat.~~ [Revised, renumbered as *BIOLOGICAL RESOURCES Goal 1.B.*]

## **Policies**

- ~~1.C.1. The County shall, during the review of new development, protect and maintain the existing level of anadromous fisheries habitat when such development is adjacent to or may affect fisheries habitat. ☞ (New) [Revised, renumbered as *BIOLOGICAL RESOURCES – Onshore Fisheries Resources Policy 1.A.4.*]~~
- ~~1.C.2. This policy number intentionally left blank.~~
- ~~1.C.3. When a use is permitted within an estuary, a riparian corridor, or a wetland buffer area and where no feasible, less environmentally damaging alternative is available, the County shall require that feasible mitigation measures shall be incorporated into the permitted activity. Such mitigation shall:~~
- ~~a. Minimize potential adverse impacts to the riparian corridor or wetland such as increased peak runoff, sedimentation, increased water temperatures, and loss of shade;~~
  - ~~b. Require the siting of the permitted activity to be located to reduce or prevent impacts incompatible with the continuance of the habitat function; and~~
  - ~~c. Provide for replacement of habitat loss at a minimum ratio of 2:1. ☞ (New) [Revised, renumbered as *ESHA General Policy 1.B.8.*]~~
- ~~1.C.4. The County shall seek to improve the quantity and quality of anadromous fisheries habitat through a variety of means including but not limited to:~~
- ~~g. Seeking funding to inventory, identify, and remove drainage facilities on county maintained roads which are barriers to fish migration;~~
  - ~~h. Seek a variety of funding sources for stream restoration including innovative methods of stream restoration for streams or stream reaches identified as in need of restoration;~~
  - ~~i. Politically support the development and continuation of programs, which improve or restore fish habitat;~~
  - ~~j. Provide a mechanism for the distribution of educational material, which promotes a better understanding of the importance of habitat to support anadromous fisheries.~~
  - ~~k. Provide training for county road workers, which will provide the latest techniques to reduce impacts on anadromous fisheries from maintenance or construction activities on county roads; and~~
  - ~~l. Support legislative changes to the self-imposed limitations of the Federal Management Agency in granting and approving emergency repair funds, which have a negative impact on anadromous fisheries. ☞ (New) [Moved to *BIOLOGICAL RESOURCES – Other Initiatives*]~~

- ~~1.C.5. The County shall review and revise its road surfacing, grade slope, crown slope, culvert, ditch, bridge, and other maintenance practices to reflect techniques to reduce impacts on anadromous fisheries and be institutionalized so that such practices become standard for daily activities of the road crew. (New) [Moved to BIOLOGICAL RESOURCES – Other Initiatives]~~
- ~~1.C.6. The County shall adopt mechanisms to restrict winter land grading activities on hillsides through amendments to the grading ordinance, standardized conditions, or through mitigation imposed through the environmental review process. (New) [Revised, renumbered as WATER RESOURCES – Policy 1.C.12.]~~
- ~~1.C.7. This policy intentionally left blank.~~
- ~~1.C.8. The County shall continue to emphasize flood control through the application of appropriate land use densities and uses for flood prone areas rather than the reliance upon expanded flood control structures. (New) [Moved to FLOOD HAZARDS – Other Initiatives]~~
- ~~1.C.9. The County shall continue to utilize natural drainage courses rather than channelizing streams for stormwater runoff. (New) [Moved to WATER RESOURCES – Other Initiatives]~~
- ~~1.C.10. For drainage courses within the county flood control system (which are used for storm water runoff and are identified as streams which support anadromous fisheries), the County shall amend its maintenance practices to the extent practicable, provide for retention of the riparian canopy. (New) [Revised, renumbered as ESHA –Riparian Vegetation Policy 1.B.31.]~~
- ~~1.C.11. The County shall continue to limit development involving significant alteration of the natural landform on slopes greater than 30 percent. (New) [Revised, renumbered/reiterated as GEOLOGIC HAZARDS –Policy 2.C\_. and SCENIC RESOURCES – General Policy 6.A.\_.]~~
- ~~1.C.12. The County shall not support any water diversions that export water from within the county to areas outside the county. The County shall oppose any increase in diversions of water which otherwise would flow into the county and would have a negative effect on local fisheries. (New) [Moved to WATER RESOURCES – Other Initiatives]~~

~~1.C.13. The County encourages the review of forest practices by the California Board of Forestry and adoption of updated Forest Practice Rules to protect anadromous salmonoid fisheries populations.~~  (New) [Moved to BIOLOGICAL RESOURCES – Other Initiatives]

~~[See also Policy 1.E.24]~~

#### ~~Existing Implementation Programs~~

- ~~• Environment Ordinance~~
- ~~• Resource Conservation Area Zoning~~
- ~~• Grading, Excavating & Filling Ordinance~~
- ~~• Subdivision Ordinance~~

#### ~~New Implementation Programs~~

~~1.2 The County shall prepare and adopt an updated road maintenance and drainage systems practice manual and seek funding for its implementation. (Policy 1.C.1)~~

~~Responsibility: Community Development Department  
Time Frame: Years two to five~~

~~1.3 The County shall amend its zoning ordinances and maps reflect the established riparian corridors for stream identified as habitat areas sensitive to anadromous fish productivity to areas outside of the Coastal Zone. (Policy 1.C.2)~~

~~Responsibility: Community Development Department  
Time Frame: First two years~~

~~1.4 The County shall seek funding to determine areas of estuaries, stream corridors, or wetlands which need replacement habitat or restoration. (Policy 1.C.4)~~

~~Responsibility: Community Development Department  
Time Frame: Ongoing~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

~~SOILS RESOURCES~~ [Sub-section goals and policies merged into AGRICULTURAL RESOURCES, FORESTRY RESOURCES, AND SAFETY AND HAZARDS sub-sections as indicated]

~~Goal 1.D. To maintain the productivity of Del Norte County's soils, reduce erosion, and prevent unsafe and unhealthy soil conditions. (New)~~ [Revised and relocated in AGRICULTURAL RESOURCES, FORESTRY RESOURCES, AND SAFETY AND HAZARDS – Goals]

### **Policies**

~~1.D.1. The County shall conserve long term productivity of soil resources shall be protected and conserved to provide a continuing base for agricultural productivity and the county's economy by application of appropriate land use and zoning designations. (COS G.SAG.1. [Revised and renumbered as AGRICULTURAL RESOURCES Policy 1.G.10.]~~

~~1.D.2. The County shall reserve for timber production those Those soils capable of producing commercial timber stands shall be reserved for timber production by application of appropriate land use and zoning designations. (COS G.STP.1. [Revised and renumbered as TIMBERLAND RESOURCES Policy 1.H.2.]~~

~~1.D.3. The County shall utilize low densities of development Development in areas where soils have moderate or severe limitations for sewage disposal shall be limited through the application of low residential land use plan density restrictions and large minimum lot area standards, unless a public sewage system is available for areas within an urban boundary, disposal via a public sewage system is available. (New) [Revised and renumbered as SECTION 3 LAND DIVISION Policy 3.B.4.]~~

~~1.D.4. The County shall utilize a general standard for new subdivisions of one unit per half acre where Where only community water or an equivalent is available, a density standard of one residential unit per one half acre shall apply to new subdivisions, and one unit per acre where both community water and sewer or equivalents are not available, provided the on-site treatment and disposal system meets all site and design criteria set forth in the North Coast Basin Plan. (New) [Revised and renumbered as SECTION 3 LAND DIVISION Policy 3.B.6.]~~

~~1.D.5. In areas of unstable soils and/or steep terrain, the County shall limit the intensity of development shall be limited in order to minimize the potential for erosion and landform instability. (New) [Revised and renumbered as SECTION 2: SAFETY AND HAZARDS – GEOLOGIC HAZARDS Policy 2.C.2.]~~

~~1.D.6. The County shall continue to regulate the grading of land shall be regulated to minimize the impact of soil erosion from wind, water, and landslides in areas with slope instability. (New) [Revised and renumbered as SECTION 2: SAFETY AND HAZARDS – GEOLOGIC HAZARDS Policy 2.C.3.]~~

~~1.D.7. The County shall work with agricultural interests in the continued development and implementation of best management practices to minimize the impacts of tilling and grading on soil erosion. (New) [Moved to AGRICULTURAL RESOURCES – Other Initiatives]~~

### ~~Existing Implementation Programs~~

- ~~• General Plan Land Use Diagrams and Zoning Ordinances~~
- ~~• Grading, Excavating & Filling Ordinance~~
- ~~• Subdivision Ordinance~~
- ~~• Coastal/Hazard Zoning Ordinance~~

### ~~New Implementation Programs~~

~~Existing programs are deemed sufficient.~~

~~WILDLIFE HABITAT RESOURCES [Moved to BIOLOGICAL RESOURCES sub-heading 2]~~

~~Goal 1.E. To protect, restore, and enhance habitats that support fish and wildlife species throughout Del Norte County. [Revised, renumbered as ESHA Goal 1.B.]~~

### ~~Policies~~

~~1.E.1. The County recognizes the following areas as major locations of excellent wildlife habitat, native or natural vegetation, and of aesthetic value:~~

- ~~h. All offshore rocks and islands (seaward of the mean high tide line) excluding Whaler and Battery Islands;~~
- ~~i. Inland of the mean high tide line to the first line of vegetation (except in the areas of coastal bluffs when the area will be to the crest of the bluff), excluding the Crescent City Harbor area;~~
- ~~j. Lakes Earl and Talawa and their immediate marshland, allowing continued agricultural uses;~~
- ~~k. Sand dunes and wet sand areas, excluding limited development in appropriate areas;~~
- ~~l. The tidal-influenced areas of the Smith and Klamath Rivers. Commercial-Recreational and Public-Recreational development shall be allowed, but be carefully controlled to prevent significant~~

- ~~alteration of the habitat areas. Gravel extraction shall be allowed on a scale consistent with local policy and state regulations; and~~  
~~m. Riparian corridors which preserve and protect wildlife and fisheries habitat; and~~  
~~n. The Crescent City Marsh, Elk Creek Wildlife Area, and their surrounding wetlands.~~

~~These areas should be maintained as wildlife habitat and protected from adverse activity. The County shall prohibit further development except that which is in the best interest of the public health, safety, and welfare, or as noted.~~ ~~☞~~ ~~■~~ ~~COS P.WHV.7.~~ [Revised, renumbered as *BIOLOGICAL RESOURCES – Wildlife Habitat Policy 1.A.3.*]

- ~~1.E.2. The County shall support the critical habitat protections for federally listed threatened and endangered species.~~ ~~☞~~ ~~■~~ ~~(New)~~ [Moved to *BIOLOGICAL RESOURCES – Other Initiatives*]
- ~~1.E.3. The County shall support the beneficial improvement and/or reestablishment of fisheries in the rivers and streams within the county, whenever feasible.~~ ~~☞~~ ~~■~~ ~~(New)~~ [Moved to *BIOLOGICAL RESOURCES – Other Initiatives*]
- ~~1.E.4. The County should recognize and encourage the various uses of wildlife and their habitat, including such activities as passive watching, scientific studies, educational purposes, and hunting and fishing.~~ ~~☞~~ ~~■~~ ~~COS P.WHV.6.~~ [Moved to *BIOLOGICAL RESOURCES – Other Initiatives*]
- ~~1.E.5. The County shall require that development on hillsides be design to utility native vegetation when possible or natural vegetation as erosion control measures.~~ ~~☞~~ ~~■~~ ~~(New)~~ [Revised, renumbered as *GEOLOGIC HAZARDS Policy 2.C.\_.*]
- ~~1.E.6. This policy intentionally left blank.~~
- ~~1.E.7. The County shall support use of acquisition, lot consolidation, and transfer of development rights to direct development away from sensitive areas (where possible) and to assure protection of private property rights.~~
- ~~a. Lot Consolidation: Lot consolidation is a procedure by which substandard and/or unbuildable lots are purchased and then merged and resold into lots of suitable size. The revenue from these buildable or useable lots is then used to purchase other substandard lots. This procedure is rather common in more urban areas and is conducted by both the private and real estate industry and various public agencies.~~

~~Key questions are need and availability of funds. In our area need can only be ascertained on a case by case basis. Funds will have to be provided from sources other than local government. Because of its cost, lot consolidation should be limited to existing subdivided areas.~~

- ~~b. **Transfer of Development Rights:** Transfer of Development Rights assigns a ratio of acreage to density and allows the consideration of taking an assigned density value for one area and transferring that development right to another location. This allows for the restriction of development in sensitive areas where development is inconsistent with policies of the Local Coastal Program, yet provides the property owner with an option to sell a right to build to owners of land in areas where such development is either consistent with the Local Coastal Program or would be a more appropriate location of such development. The owner does not have to sell this development potential to another owner, but may in fact transfer this density within the parcel or to another parcel of his/her ownership.  ~~ND 1.H.~~ [Moved to LAND USE AND COMMUNITY DEVELOPMENT – INTEGRATED LAND USE< TRANSPORTATION, AND AIR QUALITY PLANNING – Other Initiatives]~~

### *Listed Species*

- ~~1.E.8. The County shall continue to consult with the California Department of Fish and Game for identification and protection of rare, threatened, and endangered species that may be adversely affected by public or private development projects.  ~~(New)~~ [Moved to ESHA – Other Initiatives]~~
- ~~1.E.9. The County shall require that new development is consistent with critical habitat protection for federally listed threatened and endangered species, when such critical habitat is specifically identified at the affected project site or the development has identified offsite impacts that affect critical habitat.  ~~(New)~~ [Revised, renumbered ESHA – General Policy 1.B.6.]~~
- ~~1.E.10. The County shall require clustering of development and work with other public agencies in the acquisition of conservation easements to provide habitat protection of State or Federally listed rare, threatened, or endangered, and/or other special status species.  ~~(New)~~ [Revised, renumbered ESHA – General Policy 1.B.7.]~~
- ~~1.E.11. The County shall continue to pursue a cooperative role with the U.S. Forest Service and State and National park services in the protection and continued maintenance of all plants and animal species and their habitat.  ~~COS P.WHV.10.~~ [Moved to ESHA – Other Initiatives]~~

~~Environmentally Sensitive Habitat Areas~~ [Elevated to NATURAL RESOURCES/CONSERVATION sub-section heading 1.B]

~~1.E.12. The County shall continue to define the following as specific environmentally sensitive habitat areas:~~

~~Coastal Sand Dune — Ridges of sand created by wind deposited materials carried from ocean beaches. An active dune is one in the process of gaining or losing sand, commonly unvegetated or covered with sparse grasses and low growing succulents. Stabilized dunes are usually covered by woody vegetation such as the beach pine. ☞ MWR VII.G.1~~

~~Coastal Estuary — A coastal water body usually semi-enclosed by land, but which has open, partially obstructed, or intermittent exchange with the ocean and in which ocean water is at least occasionally diluted with fresh water runoff from the land. ☞ MWR VII.C.1~~

~~Coastal Wetland — Lands within the coastal zone which may be covered periodically or permanently with shallow water such as marshes, swamps, mudflats, bogs, and fens. Farmed wetlands shall be defined as wetland areas, which are used for agricultural purposes such as grazing, planting or forage during parts of the year. Maintained roadside ditches shall not be deemed to be a coastal wetland unless within an area directly subject to tidal influence; in any case, existing roadside ditches may be maintained and improvements made which address safety concerns.~~

~~Riparian Vegetation — The plant cover normally found along water courses including rivers, streams, creeks, and sloughs, usually characterized by dense growths of trees and shrubs. ☞ ■ MWR VII.E.1. [Revised, renumbered ESHA – General Policy 1.B.1.]~~

~~1.E.13. The County shall maintain maps that identify the locations of specific environmentally sensitive coastal sand dunes, coastal estuary and wetlands, and riparian habitat areas within Del Norte County. Due to the scale of such maps, questions may arise as to the specific boundary limits of an identified environmentally sensitive habitat area. Where there is a dispute over the boundary or location of an environmentally sensitive habitat area, the County may request the applicant to provide the following information:~~

- ~~a. A base map delineating topographic lines, adjacent roads, location of dikes, levees, flood control channels, and tide gates;~~
- ~~b. Vegetation map;~~
- ~~c. Soils map; and~~
- ~~d. A biologist's report, where necessary.~~

~~The County shall cooperate with the California Department of Fish and Game to review this information and the County's determination shall be based upon specific findings as to whether an area is or is not an environmentally sensitive habitat area based on General Plan criteria, definition, and, within the Coastal Zone, criteria set forth by the Coastal Act regarding Environmentally Sensitive Habitat Areas. ☞ ■ MWR VII.D.4.g. (Revised) [Revised, renumbered ESHA – General Policy 1.B.2.]~~

~~1.E.14. The County shall continue to implement the existing Resource Conservation Area program to guide development in and adjacent to environmentally sensitive habitats, both natural and man-made, so as to allow utilization of land areas compatible with other policies while providing adequate protection of the subject habitat. ☞ ■ MWR VII.D.4.d. [Moved to ESHA – Other Initiatives]~~

~~1.E.15. The County shall encourage the California Board of Forestry to adopt updated Forest Practice Rules which prohibit timber harvest within riparian, wetland, estuary habitat, or related buffer areas, designated by a locally adopted General Plan or Local Coastal Plan. ☞ (New) [Moved to ESHA – Other Initiatives]~~

~~Coastal Sand Dunes~~ [Moved to ESHA Policies sub-heading 3]

~~1.E.16. To ensure their values as groundwater recharge regions and wildlife habitats, the County shall encourage the maintenance in their existing states or return to their natural states where feasible of coastal sand dunes, as mapped on the County sensitive habitat maps. ☞ ■ MWR VII.C.4.a. [Revised, renumbered ESHA – Coastal Sand Dunes Policy 1.B.14.]~~

~~1.E.17. The County shall develop enforceable regulations to limit the use of motorized vehicles to un-vegetated dunes. ☞ ■ MWR VII.C.4.b, RIV I.F.3. [Revised, relocated to ESHA – Other Initiatives]~~

~~1.E.18. The County shall discourage the removal or unnecessary disturbance of dune vegetation. ☞ ■ MWR [Revised, renumbered ESHA – Coastal Sand Dunes Policy 1.B.16.]~~

~~Coastal Estuaries~~ [Moved to ESHA Policies sub-heading 4]

~~[See Policies 1.A.14., 1.A.16., 1.A.17., and 1.A.19]~~

~~Coastal Wetlands~~ [Moved to ESHA Policies sub-heading 5]

- ~~1.E.19. The County shall permit the diking, filling, or dredging of wetlands in accordance with other applicable provisions of this General Plan where there is no feasible less environmentally damaging alternative and where feasible mitigation measures have been provided to minimize adverse environmental effects. Within the coastal zone, such projects shall be limited to those identified in Section 30233 of the Coastal Act. ☞ ~~MWR VII.D.4.a.~~ [Revised, renumbered *ESHA – Coastal Wetlands Policy 1.B.21.*]~~
- ~~1.E.20. In order to provide that the maximum amount of agricultural production in existing farmed wetlands and cultivated lands (cultivated within the last ten years), the County shall permit maintenance and repairs for existing dikes, levees, drainage ditches, and other similar agricultural drainage systems, subject to any and all applicable policies within the General Plan. ☞ ~~MWR VII.D.4.e.~~ [Revised, renumbered *ESHA – Coastal Wetlands Policy 1.B.23.*]~~
- ~~1.E.21. The County shall ensure that development in areas adjacent to environmentally sensitive wetland habitat areas be sited and designed to prevent impacts which could significantly degrade such areas, and shall be compatible with the continuance of such habitat areas. The primary tool to reduce impacts around wetlands between the development and the edge of the wetland shall be a buffer of one hundred feet in width. A buffer of less than one hundred feet may be utilized where it can be determined that there is no adverse impact on the wetland. A determination to utilize a buffer area of less than one hundred feet shall be made in cooperation with the California Department of Fish and Game and the County's determination shall be based upon specific findings as to the adequacy of the proposed buffer to protect the identified resource. ☞ ~~MWR VII.D.4.f.~~ [Revised, renumbered as *ESHA – General Policies 1.B.4. and 1.B.5.*]~~
- ~~1.E.22. The maintenance opening of the sandbar at Lake Talawa shall be permitted consistent with agreements negotiated between the County and the California Department of Fish and Game. ☞ ~~MWR VII.D.4.e.~~ [Revised, renumbered as *ESHA – Coastal Wetlands Policy 1.B.24.*]~~
- ~~1.E.23. The County shall require that dredging and spoils disposal be planned and carried out to avoid significant disruption to marine and wildlife habitats and water circulation. Dredge spoils suitable for beach replenishment when feasible should be transported for such purposes to appropriate beaches or into suitable longshore current systems. ☞ ~~MWR VII.D.4.b.~~ [Revised, renumbered as *ESHA – Coastal Wetlands Policy 1.B.25.*]~~
- ~~1.E.24. The County shall prohibit direct runoff of pollutants and siltation into wetland areas from development. Development shall be designed in such a manner that pollutants and siltation will not significantly adversely affect the~~

~~value or function of wetlands. ☞ (New)~~ [Revised, renumbered as *ESHA – Coastal Wetlands Policy 1.B.26.*]

~~1.E.25. The County shall require new development to mitigate wetland loss through any combination of the following, in descending order of desirability:~~

- ~~• Avoidance of wetland habitat;~~
- ~~• Where avoidance is not possible, minimization of impacts on the resource; or~~
- ~~• Replacement, including use of a mitigation banking program. ☞ (New)~~ [Revised, renumbered as *ESHA – Coastal Wetlands Policy 1.B.27.*]

~~1.E.26. In cases where the County requires replacement for a wetland loss, the level of replacement to be required with respect to any given project will be evaluated according to the following criteria:~~

- ~~a. On-site mitigation shall be preferred to off-site, and in-kind mitigation shall be preferred to out-of-kind;~~
- ~~b. Functional replacement ratios may vary to the extent necessary to incorporate a margin of safety reflecting the expected degree of success associated with the mitigation plan; and~~
- ~~c. Acreage replacement ratios may vary depending on the relative functions and values of those wetlands being lost and those being supplied, including compensation for temporal losses. ☞ (New)~~ [Revised, renumbered as *ESHA – Coastal Wetlands Policy 1.B.28.*]

~~1.E.27. The County deems the continuation of existing agricultural uses such as grazing and pastoral activities and the raising and harvesting of crops to be a principle use within existing Farmed Wetlands. Maintenance activities auxiliary to the above agricultural uses are, therefore, allowable uses including drainage related to crop rotation. Such areas are subject to the other policies of this General Plan. ☞ LR III.C.8.~~ [Revised, renumbered as *ESHA – Coastal Wetlands Policy 1.B.22.*]

~~Riparian Areas~~ [Revised, moved to *ESHA Policies* sub-heading 6]

~~1.E.28. The County shall ensure that riparian vegetation be maintained along streams, creeks, and sloughs and other water courses for their qualities as wildlife habitat, stream buffer zones, and bank stabilization. Where alterations to segments of stream habitat cannot be avoided, policy 1.E.29 shall apply. ☞ MWR VII.E.4.a (Revised)~~ [Revised, renumbered as *ESHA – Riparian Vegetation Policy 1.B.30.*]

~~1.E.29. The County shall require mitigation for development projects where segments of stream habitat are unavoidably altered. Such impacts should be mitigated on-site with in-kind habitat replacement or elsewhere in the stream system through stream or riparian habitat restoration work. (New) [Revised, renumbered as ESHA – Coastal Wetlands Policy 1.B.29.]~~

~~1.E.30. The County shall require development projects proposing to encroach into a creek corridor or creek setback to do one or more of the following, in descending order of desirability:~~

- ~~a. Avoid the disturbance of riparian vegetation;~~
- ~~b. Replace riparian vegetation (on-site, in-kind);~~
- ~~c. Restore another section of creek (in-kind); and/or~~
- ~~d. Participate in a mitigation banking program. (New) [Deleted: Type and location of specific mitigation measures or compensatory replacement habitat areas should be determined based upon site-specific analyses]~~

~~1.E.31. The County should provide for diversified recreational use of fish and wildlife while providing preservation of their habitat. COS P.WIV.4. [Moved to ESHA – Other Initiatives]~~

~~1.E.32. The County should seek funding to reestablish riparian vegetation in selected stream corridors. MWR VII.E.4.b. [Moved to ESHA – Other Initiatives]~~

~~1.E.33. The County shall continue to require the use of feasible and practical best management practices (BMPs) to protect streams from the adverse effects of construction activities and urban runoff and to encourage the use of BMPs for agricultural activities. (New) [Revised, renumbered as WATER RESOURCES – Policy 1.C.10]~~

#### ~~Existing Implementation Programs~~

- ~~• Grading, Excavating, & Filling Ordinance~~
- ~~• Subdivision Ordinance~~
- ~~• Environment Ordinance~~
- ~~• Resource Conservation Area Zoning~~

#### ~~New Implementation Programs~~

~~1.5 The County shall develop regulations limiting motorized vehicles on unvegetated dunes. (Policy 1.E.15.)~~

~~Responsibility: Del Norte County Sheriff's Department, County Counsel~~  
~~Time Frame: Years five to ten~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within Part I Summary]

## 1.D. AIR RESOURCES

### Goals

~~Goal 1.F. 1.D.~~ 1.D. To protect and improve air quality in Del Norte County and the region.

### Policies

- ~~1.F.1. 1.D.1.~~ 1.D.1. The County shall cooperate with other agencies to develop a consistent and effective approach to air quality planning and management. To this end, the County shall coordinate with other jurisdictions on the North Coast to establish parallel air quality programs and implementation measures.  (New)
- ~~1.F.2. 1.D.2.~~ 1.D.2. The County shall support the North Coast Unified Air Quality Management District (NCUAQMD) in its development of improved ambient air quality monitoring capabilities and the establishment of standards, thresholds, and rules to more adequately address the air quality impacts of new development.  (New)
- ~~1.F.3. 1.D.3.~~ 1.D.3. The County shall continue to solicit and consider comments from local and regional agencies on proposed projects that may affect regional air quality.  (New)
- ~~1.F.4. 1.D.4.~~ 1.D.4. The County shall continue to submit major development proposals to the NCUAQMD for review and comment in compliance with California Environmental Quality Act (CEQA) prior to consideration by the appropriate decision-making body.  (New)
- ~~1.F.5. 1.D.5.~~ 1.D.5. The County shall continue to encourage project proponents to consult early in the planning process with the County and the NCUAQMD regarding the applicability of transportation control measures (TCM) programs.  (New)
- ~~1.F.6. 1.D.6.~~ 1.D.6. The County shall encourage development to be located and designed to minimize direct and indirect air pollutants.  (New)

~~1.F.7.~~ 1.D.7. In reviewing project applications, where significant emissions are indicated, the County shall consider alternatives or amendments that reduce significant emissions of air pollutants.  (New)

~~1.F.8.~~ 1.D.8. The County shall support and participate in the air quality education programs of the NCUAQMD.  (New)

~~1.F.9.~~ 1.D.9. Unless otherwise specifically permitted, the County shall require developers to pave all access roads, driveways, and parking areas serving new commercial and industrial development.  (New)

~~1.F.10.~~ 1.D.10. In general, the County shall not accept any unpaved roads into the County-maintained road system.  (New)

~~Existing Implementation Programs~~

~~• Environment Ordinance/CEQA~~

~~New Implementation Programs~~

~~1.6~~ ~~The County shall adopt local ordinance requirements regarding commercial and industrial development paving and restricting the acceptance of any unpaved roads into the county road system. (Policy 1.F.9)~~

~~Responsibility: Community Development Department~~

~~Time Frame: First year~~

1.E. AGRICULTURAL RESOURCES

Goals

~~Goal 1.G.~~ 1.E.1. To designate agricultural land and promote development of agricultural uses to support the continued viability of Del Norte County's agricultural economy.

~~Goal 1.D.~~ 1.E.2. To maintain the productivity of Del Norte County's soils, reduce erosion, and prevent unsafe and unhealthy soil conditions. ~~(New)~~ [Relocated from Section 1: NATURAL RESOURCES / CONSERVATION – SOIL RESOURCES – Goals]

## Policies

Prime Agricultural Lands

~~1.G.1. 1.E.1. a.~~ The County defines prime “Prime agricultural lands” are defined as those lands which meet ~~both any~~ of the following criteria:

1. Qualify for rating as class I or class II in the Natural Resource Conservation Service land use capability classifications;
  2. Qualify for rating 80 through 100 in the Storie Index Rating;
  3. Are capable of supporting livestock used for the production of food and fiber and which has an annual carrying capacity equivalent to at least one animal unit per acre as defined by the United States Department of Agriculture;
  4. Are planted with fruit- or nut-bearing trees, vines, bushes, or crops which have a nonbearing period of less than five years and which will normally return during the commercial bearing period on an annual basis from the production of unprocessed agricultural plant production not less than two hundred dollars (\$200) per acre;
  5. Have returned from the production of unprocessed agricultural plant products an annual gross value of not less than two hundred dollars (\$200) per acre for three of the previous five years; or
  - ~~6.~~ Land of high agricultural value, meeting the following criteria:
    1. Lands “actively used” (lands may be considered “actively used” even though they lie idle for up to ten years) for agricultural production such as nursery crops, pasture crops, dairy products, and/or livestock, ~~or and~~;
    2. Lands which ~~qualify for rating 80 through 100 in the Storie Index.~~
- ~~b.~~ A ~~comprise~~ a minimum of 20 acres in contiguous ownership. (Note: The \$200 per acre amount in subsections 4. and 5. shall be adjusted regularly for inflation, using 1965 as the base year, according to a recognized consumer price index.)  ~~LR II.G.2.e.~~

[See also Section 3: LAND USE AND COMMUNITY DEVELOPMENT – LAND USE DESIGNATIONS – Agriculture Prime]

1.E.2. The maximum amount of prime agricultural land shall be maintained in agricultural production to assure the protection of the areas’ agricultural economy.

~~1.G.13. 1.E.3.~~ The County shall continue to designate as agriculture those lands most suited to agricultural production. Prime agricultural lands shall be protected by restricting inappropriate development on prime agricultural land, including but not limited to housing intended primarily for rural residential occupancy rather than housing for the owner or operator, and other uses not directly

associated with agricultural production, and directing future development to ~~non-prime~~ areas not suitable for agricultural production. ☞ ■ ~~COS P.S.A.G.3.~~

~~1.G.16. 1.E.4. The County shall maintain prime~~ Prime agricultural lands shall be maintained in large parcel sizes (greater than ~~20~~ 40 acres) to retain viable farming units. ☞ ■ (New) [Revised, relocated from below. Note: Parcel size threshold revised for consistency with non-residential intensity and minimum lot area standards for Prime Agricultural (AP) land use category as set forth in *Section 3: LAND USE AND COMMUNITY DEVELOPMENT – LAND USE DIAGRAM AND STANDARDS* and *LAND USE DESIGNATIONS* sub-sections, respectively]

1.E.5. All divisions of prime agricultural lands shall not diminish the productivity of such prime agricultural lands or adjacent agricultural lands.

~~1.G.4. 1.E.6. The County shall continue to conserve prime~~ Prime agricultural soils ~~by review of~~ shall be conserved by requiring permissible development which ~~may~~ would cover-over or displace such soils (i.e., for roads and accessory structures) ~~and require redistribution of~~ to stockpile and redistribute the impacted soils for other agricultural uses as mitigation. ~~The County shall encourage agricultural~~ Permissible structures ~~to~~ shall be placed in ~~a location~~ locations that will have the least impact upon on-site agricultural activity. ☞ ■ (New) [Revised, relocated from below]

#### Other Non-prime Agricultural Lands Suitable for Agriculture

~~1.G.2. The County defines general agricultural land as lands that meet all of the following criteria:~~

- ~~a. A minimum of 5 acres of contiguous ownership;~~
- ~~b. Lands in agricultural use or adjacent to agricultural use; and~~
- ~~c. Lands where small scale agriculture provides or can provide food, fiber, or animal management for the enjoyment or economic benefit of the property owner or renter. ☞ ■ LU III.B., LR III.C.2. [Struck as being inconsistent with Coastal Act Section 30241. See definition of General Agriculture (AG) land use designation in Section 3 – Land Use and Community Development]~~

1.E.7. Subdivisions of non-prime agricultural lands suitable for agriculture into parcel sizes smaller than 20 acres shall only be authorized pursuant to an approved continued viability report and agriculture management plan demonstrating that the parcel(s) will remain viable for, and actively engaged in, agricultural use once subdivided.

**1.E.8.** All divisions of other non-prime agricultural lands suitable for agriculture, shall not diminish the productivity of agricultural lands or adjacent agricultural lands.

~~1.G.3.~~ **1.E.9.** The ~~County deems~~ continuation of existing agricultural uses, such as grazing and pastoral activities and the raising and harvesting of crops, ~~are to be a~~ principle ~~use~~ uses within existing Farmed Wetlands. Maintenance and repair activities auxiliary to the above agricultural uses (i.e., maintenance and repair of existing dikes, levees, drainage ditches, and other similar agricultural drainage systems) are, ~~also,~~ allowable uses ~~including drainage related to crop rotation~~. Such areas are subject to the other policies of this ~~General Coastal Land Use Plan.~~ ~~LR III.C.8.~~ [Note: Revised for consistency with principal permitted repair and maintenance activities enumerated in LCPZEO Section 21.11A.030.C.1.]

[See also Section 3: LAND USE AND COMMUNITY DEVELOPMENT – LAND USE DESIGNATIONS – Resource Conservation Areas - Farmed Wetlands]

~~1.G.4.~~ ~~The County shall continue to conserve prime agricultural soils by review of development which may cover over or displace such soils (i.e., roads and accessory structures) and require redistribution of impacted soils for other agricultural uses as mitigation. The County shall encourage agricultural structures to be placed in a location that will have the least impact upon on-site agricultural activity.~~ ~~(New)~~ [Revised and renumbered as Policy 1.G.6., above]

### New and Expanded Operations

~~1.G.5.~~ **1.E.10.** The ~~County shall designate agricultural industrial~~ areas currently designated as Agricultural Industrial land use category are located along Sarina Road to allow which provide for agricultural service uses (i.e., commercial and industrial uses) ~~to locate in agricultural areas if they relate to the primary agricultural activity in the area. The County shall use the following guidelines to analyze the suitability of a proposed agricultural service use~~ Expansions to, or intensification of, uses within currently-designated AI areas shall only be approved when found to be consistent with all other applicable Coastal Land Use Plan policies and when the expanded or intensified use meet the following criteria:

- a. The use will not adversely affect agricultural production in the area;
- b. The use supports local agricultural production;
- c. It is compatible with existing agricultural activities and residential uses in the area; and
- d. The use will not require the extension of sewer service. ~~(New)~~

**Redesignation of additional agricultural lands to Agricultural Industrial land use category shall require a local coastal program amendment.**

**[See also Section 3: LAND USE AND COMMUNITY DEVELOPMENT – LAND USE DESIGNATIONS – Agricultural Industrial]**

~~1.G.6. The County shall support appropriate efforts by private conservation organizations to use conservation easements as a tool for agricultural preservation.~~ ~~☞~~ ~~■~~ (New) [Moved to AGRICULTURAL LANDS – Other Initiatives]

~~1.G.7. The County shall encourage infill development in urban areas as an alternative to expanding urban boundaries into prime agricultural areas.~~ ~~☞~~ ~~■~~ (New) [Moved to AGRICULTURAL LANDS – Other Initiatives]

~~1.G.8. 1.E.11. In the Coastal Zone, the County defines new New or expanded agricultural operations that involve the removal of major vegetation, excluding agricultural crops, as constitute new development. Accordingly, such operations are subject to the permit requirements and all other applicable policies of this General Coastal Land Use Plan pertaining to new development.~~ ~~☞~~ ~~LR III.C.9.~~

**Conversions**

~~1.G.9. 1.E.12. The County shall permit conversion of land designated for agriculture use only when Conversions of prime agricultural lands or other agricultural lands and lands suitable for agriculture shall only be allowed when all of the following are demonstrated:~~

~~A. For such lands on or near the urban periphery, conflicts between agricultural and urban land uses would be minimized through all of the following:~~

~~1. By establishing stable boundaries separating urban and rural areas, including, where necessary, clearly defined buffer areas to minimize conflicts between agricultural and urban land uses;~~

~~2. By limiting conversions of agricultural lands around the periphery of urban areas to the lands where the viability of existing agricultural use is already severely limited by conflicts with urban uses, agricultural use is no longer feasible and such conversion ~~shall be~~ is subject to Coastal Act priorities for coastal land uses (e.g., recreation, coastal dependent industries), or where the conversion of the lands would complete a logical and viable neighborhood and contribute to the establishment of a stable limit to urban development;~~

~~3. By permitting the conversion of agricultural land surrounded by urban uses where the conversion of the land would result in:~~  
~~(a) New residential, commercial, or industrial development being~~

located within, contiguous with, or in close proximity to, existing developed areas able to accommodate it or, where such areas are not able to accommodate it, in other areas with adequate public services and where it will not have significant adverse effects, either individually or cumulatively, on coastal resources;

(b) Any resulting land divisions, other than leases for agricultural uses, outside existing developed areas being permitted only where 50 percent of the usable parcels in the area have been developed and the created parcels would be no smaller than the average size of surrounding parcels;

(c) New hazardous industrial development being located away from existing developed areas, where feasible; and

(d) Visitor-serving facilities that cannot feasibly be located in existing developed areas being located in existing isolated developments or at selected points of attraction for visitors;

4. By developing available lands not suited for agriculture prior to the conversion of agricultural lands;
5. By assuring that public service and facility expansions and nonagricultural development do not impair agricultural viability, either through increased assessment costs or degraded air and water quality; and
6. By giving ~~Priority shall also be given~~ priority to land uses that are least likely to conflict with agricultural productivity or activity, particularly other resource activities as set forth elsewhere in this ~~General Coastal Land Use~~ Plan. ~~LR III.C.3.~~

B. For all other agricultural lands or lands suitable for agriculture not on or near the urban periphery:

1. Continued or renewed agricultural use is not feasible; or

2. Such conversion would preserve prime agricultural land or concentrate development in the following ways:

(a) New residential, commercial, or industrial development being located within, contiguous with, or in close proximity to, existing developed areas able to accommodate it or, where such areas are not able to accommodate it, in other areas with adequate public services and where it will not have significant adverse effects, either individually or cumulatively, on coastal resources;

(b) Any resulting land divisions, other than leases for agricultural uses, outside existing developed areas being permitted only where 50 percent of the usable parcels in the area have been developed and the created parcels would be no smaller than the average size of surrounding parcels;

(c) New hazardous industrial development being located away from existing developed areas, where feasible; and

(d) Visitor-serving facilities that cannot feasibly be located in existing developed areas being located in existing isolated developments or at selected points of attraction for visitors; and

3. Any such permitted conversion shall be compatible with continued agricultural use on surrounding lands.

~~1.G.10. If a parcel is designated for prime agricultural use, conversion to non-agricultural use shall not be permitted, except where allowed in Section 30241 of the Coastal Act.  LR III.C.1. [Struck as being redundant with Policies 1.G.3. and 1.G.11.]~~

~~1.G.11. The County should support education programs in agricultural sciences to insure a future of well-trained agronomists and informed citizens.  LR III.C.6. [Moved to AGRICULTURAL LANDS – Other Initiatives]~~

### Protective Measures

~~1.D.1. 1.E.13. The County shall conserve long-term productivity of soil resources shall be protected and conserved to provide a continuing base for agricultural productivity and the county's economy by application of appropriate land use and zoning designations.  ~~COS G.S.A.G.1.~~ [Revised, relocated from SOILS RESOURCES – Policies]~~

1.E.14. All structural development and non-agricultural uses on agriculturally zoned lands shall be subject to siting, design and performance standards to protect the maximum amount of agricultural lands and minimize interference with production activities.

1.E.15. Otherwise permissible residential development on agricultural lands shall be subject to appropriate regulations as to maximum size and bulk, requirements for supplemental design review, and/or discretionary consideration of the relative risk of impact to operational sustainability, to ensure that agricultural lands and lands suitable for agricultural use do not lose their long-term productivity, disabling the intergenerational transfer of agricultural lands within farm families.

1.E.16. Off-channel mining of sand and gravel from older deposits associated with paleo-riverine channels and floodplain terraces beneath existing agricultural lands is prohibited.

### Right to Farm

- ~~1.G.12. The County shall adopt a right to farm ordinance that provides that existing agricultural operators are protected from nuisance complaints resulting from normal operations. (C) (New) [Revised and moved to AGRICULTURAL LANDS – Other Initiatives]~~
- ~~1.G.13. The County shall continue to designate as agriculture those lands most suited to agricultural production by restricting inappropriate development on prime land and directing future development to non-prime areas. (C) (New) COS P.S.A.G.3. [Revised and renumbered as Policy 1.G.3.]~~
- ~~1.G.14. The County shall, as part of its right to farm ordinance, require development within or adjacent to designated agricultural areas to include design, construction, and maintenance techniques that protect agriculture and minimize conflicts with adjacent agricultural uses. (C) (New) COS G.S.A.G.3., COS P.S.A.G.2., COS LR.III.C.5. [Struck as being outdated: the right-to-farm ordinance was adopted in 2008 but is yet to be submitted to the Coastal Commission for certification. See Other Initiatives, below.]~~

### Protection from Adjacent Non-Agricultural Development

- ~~1.G.15. 1.E.16. The County shall require new New non-agricultural development immediately adjacent to agricultural areas shall be required to include location, design, construction, and maintenance techniques that protect agriculture uses and minimize conflicts between the agricultural and the non-agriculture uses. (C) (New)~~
- ~~1.G.16. The County shall maintain prime agricultural lands in large parcel sizes (greater than 20 acres) to retain viable farming units. (C) (New) [Revised and renumbered as Policy 1.G.4., above]~~
- ~~1.G.17. The County shall afford parcels of 20 acres or larger committed to agricultural use the opportunity to participate in Williamson Act contracts or an equivalent method of taxation. (C) LU III.D.13. [Moved to AGRICULTURAL LANDS – Other Initiatives]~~

[See also ~~Policy Policies 1.E.25, 1.B.27, 1.H.6, 1.F.6, 3.A.2., 3.B.3., 3.H.3, 3.H.4., 3.H.7., 3.I.2., 3.K.1., 5.D.9., 5.E.5., 5.E.8., 5.E.16., and 6.A.8.~~]

### ~~Existing Implementation Programs~~

- ~~• General Plan~~
- ~~• “AE” and “A” Zoning Ordinance~~
- ~~• “AI” Zoning Ordinance~~

**New Implementation Programs**

~~1.7 The County shall adopt a right to farm ordinance that provides that existing agricultural operators are protected from nuisance complaints resulting from normal operations. (Policy 1.G.12)~~

~~Responsibility: Community Development Department~~

~~Time Frame: First five years~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within Part I Summary]

**Other Initiatives**

~~1.D.7.~~ ● The County shall work with agricultural interests in the continued development and implementation of best management practices to minimize the impacts of tilling and grading on soil erosion. ~~CC-11 (New)~~

~~1.G.6.~~ ● The County shall support appropriate efforts by private conservation organizations to use conservation easements as a tool for agricultural preservation. ~~CC-11 (New)~~

~~1.G.7.~~ ● The County shall encourage infill development in urban areas as an alternative to expanding urban boundaries into prime agricultural areas. ~~CC-11 (New)~~

~~1.G.11.~~ ● The County should support education programs in agricultural sciences to insure a future of well-trained agronomists and informed citizens. ~~LR-III.C.6~~

~~1.G.12.~~ ● The County shall adopt, and seek certification from the California Coastal Commission as part of its local coastal program, a right-to-farm ordinance that provides that existing agricultural operators are protected from nuisance complaints resulting from normal operations. ~~CC-11 (New)~~

~~1.G.17.~~ ● The County shall afford parcels of 20 acres or larger committed to agricultural use the opportunity to participate in Williamson Act contracts or an equivalent method of taxation. ~~LU-III.D.13~~

**1.F. FORESTRY RESOURCES****Goals**

- ~~Goal 1.H.1.~~ 1.F.1. To conserve Del Norte County's forest resources, enhance the quality and diversity of forest ecosystems, reduce conflicts between forestry and other uses, and to encourage a continued yield of forest products.
- ~~Goal 1.D.~~ 1.H.2. To maintain the productivity of Del Norte County's soils, reduce erosion, and prevent unsafe and unhealthy soil conditions. ~~(New)~~ [Revised and relocated from SECTION 1: NATURAL RESOURCES / CONSERVATION – SOIL RESOURCES – Goals]

## Policies

- ~~1.H.1.~~ 1.F.1. The ~~County recognizes~~ long-term productivity of timberlands shall be protected, and conversions of coastal commercial ~~timberland as a resource in its own right as well as a protector of many other resources and shall strive to maintain commercial forest land as such~~ timberlands in units of commercial size to other uses or their division into units of noncommercial size shall be limited to providing for necessary timber processing and related facilities. ☞ ~~COS P.CTP~~
- ~~1.D.2.~~ 1.F.2. ~~The County shall reserve for timber production those~~ Those soils capable of producing commercial timber stands shall be reserved for timber production by application of appropriate land use and zoning designations. ☞ ~~COS G.STP.1.~~ [Revised, relocated from SOILS RESOURCES – Policies]
- ~~1.H.2.~~ 1.F.3. ~~The County shall continue to maintain in a commercial timberland use those lands possessing climate and soils suitable for growing commercial conifer timber crops (including spruce) through the State Timberland Production Zone (TPZ) program.~~ Those upland soils with timber sites I through III which are in parcels of 20 acres or more ~~should~~ shall not be allowed to reduce in parcel size below 20 acres. ☞ ~~COS P.CTP.4., LR V.C.5. (Revised)~~ [Bifurcated, first portion relocated to FORESTRY RESOURCES – Other Initiatives, remaining portion revised]
- ~~1.H.3.~~ 1.F.4. ~~The County shall ensure that other~~ Other timberlands 20 acres or more in size which are within or adjacent to commercial timber production areas, U.S. Forest boundaries, hillside areas, and/or wild land fire risk areas, ~~are~~ shall be designated as Timberland, with their permissible timber related uses ~~and are~~ subject to the restrictions of Policies 1.H.2. and 1.H.4. ☞ ~~LR V.C.3. (Revised)~~
- ~~1.H.4.~~ 1.F.5. For lands not zoned TPZ, ~~the County may consider parcels~~ but designated as Timberland, ~~for~~ may be authorized for division into ~~a parcel~~ parcels of 20 acres or larger in size, provided such divisions comply with other County development standards. The creation of parcels less than 20 acres in size when the one unit / 20 acres density is not exceeded may only be approved subject to the parcel(s) being rezoned to the County's D district combining zone to ensure that there is

no further division than that permitted by this ~~General Coastal Land Use Plan.~~

~~☞ ■ LR V.C.7. (Revised)~~

~~1.H.5. 1.F.5. The County should require the placement of commercial Commercial timberland uses and adjacent uses shall be arranged so that, in general, lower intensity uses are adjacent to commercial timberlands with higher intensity uses placed in a logical transition away from these timberlands. Lower intensity uses shall include other resource activities as set forth in the Agriculture, Marine Resources, and Water Natural Resources / Conservation policies of this General Coastal Land Use Plan. ☞ ■ LR V.C.9.~~

~~1.H.6. 1.F.7. The County shall protect commercial Commercial timberland and timber production activities shall be protected from development practices that erode their economic viability. New non-timber development immediately adjacent to timberlands shall be designed to provide a buffer in the form of a setback of sufficient distance to avoid land use conflicts between timber management and the non-timber uses. ☞ ■ COS P.CTP.1. (Revised)~~

~~1.H.7. Due to a preference to follow lot lines or quarter section lines, some areas designated as timberlands contain large, sizable areas of unforested lands used for low intensive agricultural production (primarily grazing). This is due to the conflicts between the timber yield and taxation legislation and the Coastal Act. Those lands designated as forestlands but used agriculturally are deemed not to be in conflict. Similar lands designated agriculturally but presently zoned TPZ are deemed not to be in conflict. ☞ ■ LU III.D.17.~~

~~1.H.8. The County should continue to cooperate with the Six Rivers and Siskiyou National Forests in the management of all National Forest lands within the county. The County should strongly support the concept of multiple use of all forest lands, emphasizing commercial timber production, recreational, and resource values. ☞ ■ COS P.CTP.5. [Relocated to FORESTRY RESOURCES – Other Initiatives]~~

~~1.H.9. The County shall consider those lands defined as timber growing lands based upon size of parcel criteria and which are designated by this General Plan for urban, rural, or public land use categories to be approved for timberland conversion in order to provide for directed population growth so that Resource designated lands, including Resource Conservation habitat areas, may be protected. ☞ ■ (New)~~

~~1.H.10. The County shall encourage the California Board of Forestry to limit issuance of timber conversion permits to projects which have demonstrated development permit approval. ☞ ■ (New) [Relocated to FORESTRY RESOURCES – Other Initiatives]~~

~~1.H.11. The County supports the productive use of wood waste generated in the county.~~ ~~☞~~ ~~■~~ ~~(New)~~ [Relocated to *FORESTRY RESOURCES – Other Initiatives*]

[See also Policy ~~1.E.15 and 1.A.17~~ 1.B.20]

~~Existing Implementation Programs~~

- ~~● General Plan~~
- ~~● Timberland Production Zoning Ordinance~~
- ~~● CT and AF Zoning Ordinance~~

~~New Implementation Programs~~

~~Existing programs are deemed sufficient.~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within Part I Summary]

Other Initiatives

- ~~1.H.2.~~ ● The County shall continue to maintain in a commercial timberland use those lands possessing climate and soils suitable for growing commercial conifer timber crops (including spruce) through the State Timberland Production Zone (TPZ) program.
- ~~1.H.8.~~ ● The County should continue to cooperate with the Six Rivers and Siskiyou National Forests in the management of all National Forest lands within the county. The County should strongly support the concept of multiple use of all forest lands, emphasizing commercial timber production, recreational, and resource values. ~~☞~~ ~~■~~ *COS P.CTP.5.*
- ~~1.H.10.~~ ● The County shall encourage the California Board of Forestry to limit issuance of timber conversion permits to projects which have demonstrated development permit approval. ~~☞~~ ~~■~~ *(New)*
- ~~1.H.11.~~ ● The County supports the productive use of wood waste generated in the county. ~~☞~~ ~~■~~ *(New)*

1.G. EXTRACTIVE RESOURCES

Goals

~~Goal 1.1.1.G.1.~~ 1.G.1. To encourage commercial mining operations where environmental, aesthetic, and adjacent land use compatibility impacts can be adequately mitigated and to ensure that extractive resource deposits will be accessible when extraction becomes necessary. ~~COS G.ER.1., COS G.ER.2., COS G.ER.3., COS G.ER.4.~~

### Policies

~~1.H.1.1.G.1.~~ 1.G.1. ~~The County shall continue to review mining~~ Mining projects shall be reviewed pursuant to ~~its~~ the surface mining and quarries ordinance ~~which has been reviewed and as~~ certified by the State pursuant to the California Surface Mining and Reclamation Act (SMRA) and the California Coastal Act, its own ordinances, and any other applicable regulations. ~~☞~~ ~~■~~ *(New)*

~~1.H.2.1.G.2.~~ 1.G.2. ~~The County shall continue to require that all~~ All permissible mining operations shall be required to prepare and implement reclamation plans that mitigate environmental impacts and incorporate adequate security to guarantee proposed reclamation. ~~☞~~ ~~■~~ COS P.ER.7

~~1.H.3.1.G.3.~~ 1.G.3. ~~The County shall allow sand~~ Otherwise permissible sand and gravel extractions along local streams and rivers may be permitted as long as the long-term average annual replenishment rate is not exceeded. ~~☞~~ ~~■~~ COS P.ER.5., MWR VI.C.12.

~~1.H.4.1.G.4.~~ 1.G.4. ~~The County shall not allow otherwise permissible extraction~~ Otherwise permissible mineral extraction in areas where it would significantly bar, alter, or destroy wildlife habitat, fisheries, ~~or~~ archaeological or historic sites, adjacent agricultural lands, or public access to the shoreline, shall not be allowed unless mitigated to a less-than-significant level. ~~☞~~ ~~■~~ COS P.ER.3., MWR VI.C.10. (Revised)

1.G.5. Off-channel mining of sand and gravel from older deposits associated with paleo-riverine channels and floodplain terraces beneath existing agricultural lands is prohibited.

~~1.H.5.1.G.6.~~ 1.G.6. ~~The County shall require new~~ Otherwise permissible mining operations ~~to~~ shall be designed to provide a buffer between existing or likely adjacent uses to minimize incompatibility with nearby uses, and adequately mitigate their environmental and aesthetic impacts. ~~☞~~ ~~■~~ *(New)*

~~1.H.6.1.G.7.~~ 1.G.7. ~~The County shall require all~~ All operators of extraction operations shall be required to take all precautions necessary to avoid contamination from waste disposal or general operation activity of the site, nearby streams or rivers, air, and the environment in general. ~~The County shall cooperate with local, State, and Federal agencies to ensure that existing and future regulations will be met or~~

~~exceeded.~~ ~~☞~~ ~~■~~ ~~COS P.ER.2., MWR VI.C.9.~~ [Bifurcated, first portion revised; remaining portion relocated to *EXTRACTIVE RESOURCES – Other Initiatives*]

~~1.H.7. 1.G.8.~~ ~~The County shall require that new~~ New non-mining land uses adjacent to existing mining operations shall be designed to provide a buffer between the new development and the mining operations. The buffer distance will be based upon an evaluation of noise, aesthetics, drainage, operating conditions, topography, lighting, traffic, operating hours, and air quality. ~~☞~~ ~~■~~ ~~(New)~~

~~1.H.8. 1.G.9.~~ The ~~County shall discourage the~~ development of incompatible land uses in areas that have been identified by the State and/or County as having potentially significant mineral resources shall be limited to those land uses which cannot feasibly be located elsewhere. ~~☞~~ ~~■~~ ~~(New)~~

~~1.I.9.~~ ~~The County shall ensure that extractive resource areas are protected from incompatible development that would seriously interfere with extractive operations, now or in the future.~~ ~~☞~~ ~~■~~ ~~MWR VI.C.11., COS P.ER.4.~~ [Struck as being redundant with Policy 1.I.8.]

~~1.I.10~~ ~~The County shall continue to monitor and identify replenishment rates for waterways affected by sand and gravel extraction operations on an annual basis. This information should be reviewed on an overall basis every five years to ensure that unforeseen environmental changes do not inadvertently lead to habitat damage.~~ ~~☞~~ ~~■~~ ~~(New)~~ [Relocated to *EXTRACTIVE RESOURCES – Other Initiatives*]

#### ~~Existing Implementation Programs~~

- ~~• Surface Mining and Quarries Ordinance~~
- ~~• Environment Ordinance/CEQA~~

#### ~~New Implementation Programs:~~

~~Existing programs are deemed~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within Part I Summary]

#### Other Initiatives

~~1.G.6. ●~~ The County shall cooperate with local, State, and Federal agencies to ensure that existing and future regulations will be met or exceeded. ~~☞~~ ~~■~~ ~~COS P.ER.2., MWR VI.C.9.~~

- ~~11.10.~~ 11.10. ● The County shall continue to monitor and identify replenishment rates for waterways affected by sand and gravel extraction operations on an annual basis. This information should be reviewed on an overall basis every five years to ensure that unforeseen environmental changes do not inadvertently lead to habitat damage.  (New)

**4. Suggested Modification No. 4: (Safety and Noise Element)**

All changes to the *Safety and Noise* Element

The following language shall be added to the beginning of the Noise Element:

**The policies of the Disaster Planning and Noise sub-elements are not part of the County of Del Norte certified Local Coastal Program and do not govern the review and approval of coastal development permits.**

## SECTION 2 SAFETY AND ~~NOISE~~ HAZARDS

This section contains the goals, policies, and programs that set the basic framework for the protection of public health and safety related to natural and man-made safety hazards. This section includes goals, policies, and programs addressing the following subjects:

- General;
- Seismic Hazards;
- Geologic Hazards;
- Flood Hazards;
- Fire Hazards; **and**
- Hazardous Materials‡
- **Disaster Planning; and**
- **Noise.**

### 2.A. GENERAL

**Goal 2.A.** To protect the public health, safety, and welfare and minimize the damage to structures, property, and infrastructure as a result of seismic, geologic, fire, and flood hazards.

#### **Policies**

**2.A.1. New development shall (a) minimize risks to life and property in areas of high geologic, flood, and fire hazard and (b) assure stability and structural integrity, and neither create nor contribute significantly to erosion, geologic instability, or destruction of the site or surrounding area or in any way require the construction of protective devices that would substantially alter natural landforms along bluffs and cliffs.**

- ~~2.A.1.2.A.2~~ ~~As available, the County shall evaluate proposed projects~~ Proposed development and land use policy decisions shall be evaluated based on site-specific hazard information and the environmental hazards identified in this element and in FEMA Flood Insurance Rate Maps, California ~~Mines & Geology Division Geology and Geomorphology~~ Geological Survey Geohazard Maps, California Department of Forestry and Fire Protection ~~AB6 Risk~~ Fire Hazard Severity Zone Maps, and U.S. Army Corps of Engineers and/or California Emergency Management Agency Tsunami Run-up maps. Low intensity/occupancy uses (such as timber and agricultural production) shall be preferred in hazard areas when feasible. ~~☞ ■ SSS GP.P.1, SSS SH.P.7. (Revised)~~
- ~~2.A.2.~~ ~~The County shall continue to work with local, State, and Federal agencies to maintain natural hazards information or sources of information that can be used to fulfill the natural hazard disclosure statements.~~ ~~☞ ■ SSS HH.P.12. (Revised)~~ [Moved to *GENERAL – Other Initiatives*]
- 2.A.3. ~~To the extent practicable, the County shall discourage the location of “critical~~ “Critical facilities or uses” ~~from being shall~~ , to the maximum extent feasible, not, to the extent practicable, be located in outside areas subject to natural hazards as identified in this Element. ~~For purposes of the General Plan, “critical facilities or uses” are defined as facilities or uses that would be used to respond to the needs of the County in the event of a natural or manmade hazardous event (i.e., hospitals, fire stations, utility installations, communication centers) or uses with high occupancies, such as schools.~~ ~~☞ ■ SSS SG.P.12, SSS GH.P.4, SSS HH.P.3, HA IV.D.6, HA IV.D.13. (Revised)~~ [Second sentence struck to maintain internal consistency with definition in *APPENDIX A – Glossary*]

#### ~~Existing Implementation Programs:~~

- ~~● FEMA Flood Insurance Rate Maps~~
- ~~● California Mines & Geology Division Geology & Geomorphology Maps~~
- ~~● California Department of Forestry AB6 Fire Risk Maps~~
- ~~● U S Army Corps of Engineers Tsunami Run-up Maps~~
- ~~● Environment Ordinance/CEQA~~

#### ~~New Implementation Programs:~~

~~Existing programs are deemed sufficient.~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

#### Other Initiatives

~~2.A.2. ●~~ The County shall continue to work with local, State, and Federal agencies to maintain natural hazards information or sources of information that can be used to fulfill the natural hazard disclosure statements. ~~☞ ■ SSS HH.P.12. (Revised)~~

## 2.B. SEISMIC HAZARDS

**Goal 2.B.** To minimize the loss of life, injury, and property damage due to seismic hazards.

### Policies

~~2.B.1.~~ ~~The County shall require construction contemplated in low lying coastal areas, or in the zone of possible tsunami run-up, to be designed in accordance with the requirements of the County Flood Hazard Ordinance. ☞ ■ SSS SH.P.10 (Revised)~~ [Revised, Moved to FLOODING HAZARDS – Policies]

~~2.B.2.~~ 2.B.1. The ~~County shall utilize the~~ most current seismic design criteria shall be utilized in the construction of new public buildings. Buildings meant to accommodate activities and equipment related to public safety, especially police, fire, and communications services, ~~should~~ shall be constructed to standards that, as much as is technically possible, would ensure continued operation and availability of services after the maximum credible earthquake. ~~☞ ■ SSS SH.P.2., HA IV.D.8.~~

~~2.B.3.~~ 2.B.2. ~~The County shall require site-specific~~ Site-specific investigations shall be required prior to the construction of all high intensity and/or public use structures. Site-specific investigations ~~should~~ shall include assessment of the potential for liquefaction induced ground failures and suggest measures to mitigate the hazards from vertical and/or horizontal displacement. If it is found that engineering techniques cannot mitigate the hazards to within acceptable risk levels appropriate for the intended land use, the location of the proposed development shall be reconsidered. ~~☞ ■ HA IV.D.10. (Revised)~~

~~2.B.4.~~ ~~The County shall continue to use the California amended Uniform Building Code, and adopt the new version if appropriate to the County's needs. ☞ ■ SSS SH.P.6. (Revised)~~ [Moved to GENERAL –Other Initiatives]

~~2.B.5.~~ 2.B.3. In order to minimize risks, new public roads and bridges ~~should~~ shall be designed to the most current seismic design criteria, and existing bridges should be periodically inspected and improved. ~~☞ ■ SSS SH.P.8. (Revised)~~

~~2.B.6.~~ 2.B.4. To reduce the probability of ruptured utility lines, new major pipes, both for sewer and water, ~~should~~ shall be made of the strongest, most flexible materials available and still be economically feasible. ~~☞ ■ SSS SH.P.9, HA IV.D.11.~~

~~2.B.7. Since no active or potentially active earthquake faults have been identified within Del Norte County, the provisions of the Alquist Priolo Special Studies Zone are not applicable. (C) (S) SSS GP.R.2. [Struck; provides no seismic hazard policy guidance]~~

~~[See also Policy 1.A.11. and 1.A.12.]~~

~~Existing Implementation Programs:~~

- ~~• Flood Damage Prevention Ordinance~~
- ~~• Coastal Zone Hazard Zoning Ordinance~~
- ~~• Uniform Building Code~~

~~New Implementation Programs:~~

~~Existing programs are deemed sufficient. [Replace with universal cross-reference to Local Coastal Program Zoning Enabling Ordinance and other development regulation components of the Implementation Plan within Part I – Summary]~~

Other Initiatives

~~2.B.4. ● The County shall continue to use the California amended Uniform Building Code, and adopt the new version if appropriate to the County’s needs. (C) (S) SSS SH.P.6. (Revised)~~

2.C. GEOLOGIC HAZARDS

Goal 2.C.1. To minimize the loss of life, injury, and property damage due to geologic hazards.

~~Goal 1.D. 1.C.2.~~ To ~~maintain the productivity of Del Norte County’s soils,~~ reduce erosion, and prevent unsafe ~~and unhealthy~~ soil conditions. ~~(New)~~ [Revised and relocated from SECTION 1: NATURAL RESOURCES / CONSERVATION – SOIL RESOURCES – Goals]

Policies

~~2.C.1. The County shall continue the application of its Coastal Hazard overlay zoning program within the Coastal Zone and should consider a similar program for non-Coastal steep sloped and/or bluff areas. (C) (S) (New)~~  
[Moved to GEOLOGIC HAZARDS - Other Initiatives]

~~2.C.2. The County shall continue to require development adjacent to coastline erosion areas to mitigate potential coastal erosion hazards by compliance~~

~~with established coastal bluff hazard setbacks or by providing the following information:~~

- ~~• an assessment of the rates of coastal retreat;~~
- ~~• in the case of bluffs, a detailed examination of underlying geology by a registered geologist or engineering geologist, or licensed civil engineer;~~
- ~~• an analysis of the potential for tsunami run-up where designated in Section 2 (Safety and Noise) of this General Plan; and~~
- ~~• establishing the required building setbacks and/or foundation design for proposed new development based upon the full economic life of the proposed new development (i.e. 75 to 100 years) such that the need for future shoreline protection works is fully precluded. © SSS G.H.P.1., HA IV.D.1. (Revised)~~

2.C.1 All ocean front and blufftop development shall be sized, sited and designed to minimize risk from wave run-up, flooding, and beach and bluff erosion hazards, and avoid the need for a shoreline protective structure at any time during the life of the development.

2.C.2 Geotechnical report required. Applications for development located in or near an area subject to geologic hazards, shall be required to submit a geologic/soils/geotechnical study that identifies all potential geologic hazards affecting the proposed project site, all necessary mitigation measures and demonstrates that the project site is suitable for the proposed development and that the development will be safe from geologic hazards. Such study shall be prepared consistent with the requirements of Coastal Zoning Code.

2.C.3 Blufftop Setback. All development located on a blufftop shall be setback from the bluff edge a sufficient distance to ensure that it will be stable for a projected 200-year economic life. Stability shall be defined as maintaining a minimum factor of safety against sliding of 1.5 (static) or 1.1 (pseudostatic). This requirement shall apply to the principal structure and accessory or ancillary structures. Slope stability analyses and erosion rate estimates shall be performed by a licensed Certified Engineering Geologist or Geotechnical Engineer.

2.C.4 Siting and design of new blufftop development and shoreline protective devices shall take into account anticipated future changes in sea level. In particular, an acceleration of the historic rate of sea level rise shall be considered. Development shall be set back a sufficient distance landward and elevated to a sufficient foundation height to eliminate or minimize to the maximum extend feasible hazards associated with anticipated sea level rise over the expected 100-year economic life of the structure.

**2.C.5** **Land divisions, including subdivisions, lot splits, lot line adjustments, and conditional certificates of compliance which create new shoreline or blufftop lots, shall not be permitted unless the land division can be shown to create lots which can be developed safe from geologic hazard and without requiring a current or future bluff or shoreline protection structure. No new lots shall be created that could require shoreline protection or bluff stabilization structures at any time.**

~~1.D.5.~~ **2.C.6.** In areas of unstable soils and/or steep terrain, ~~the County shall limit~~ the intensity of development ~~shall be limited~~ in order to minimize the potential for erosion and landform instability. ~~☞~~ ~~(New)~~ [Revised and relocated from SECTION 1: NATURAL RESOURCES / CONSERVATION – SOIL RESOURCES – Policies]

~~1.D.6.~~ **2.C.7.** The ~~County shall continue to regulate the~~ grading of land **shall be regulated** to minimize the impact of soil erosion from wind, water, and landslides in areas with slope instability. ~~☞~~ ~~(New)~~ [Revised and renumbered as SECTION 2: SAFETY AND HAZARDS – GEOLOGIC HAZARDS Policy 2.C.2.]

**2.C.8.** **Inundation hazard and evacuation route maps for the areas of the County that have experienced historic tsunami inundation or for areas where tsunami inundation modeling efforts have been undertaken, such as depicted within NOAA Technical Memorandum ERL PMEL-103, “Tsunami Inundation Model Study of Eureka and Crescent City, California” (Bernard, E.N., C. Mader, G. Curtis, and K. Satake, 1994), or “Tsunami Inundation at Crescent City, California Generated by Earthquakes Along the Cascadia Subduction Zone”, (Uslu, B., J. C. Borrero, L. A. Dengler, and C. E. Synolakis, 2007; *Geophysical Research Letters*, Volume 34, L20601), and/or on subsequent superseding investigations, shall be developed and incorporated into the LCP. These maps shall depict maximum credible inundation zones and runup elevations and shall be updated and kept current to include new, peer-reviewed information on Del Norte County tsunami hazards as it becomes available.**

**2.C.9.** **New residential subdivisions situated within historic and modeled tsunami inundation hazard areas, such as depicted on the tsunami hazard maps described in 2.C.2. above, shall be designed and sited such that the finished floor elevation of all new permanent residential units are constructed with one foot of freeboard above the maximum credible runup elevation as depicted on the most recent government prepared Tsunami Hazards Maps, or as developed by local agency modeling, whichever elevation is greater.**

taking into account sea level rise rates of 3 to 6 feet per century. Additionally, all such structures containing permanent residential units shall be designed to withstand the hydrostatic and hydrodynamic loads and effects of buoyancy associated with inundation by storm surge and tsunami waves up to and including the tsunami runup depicted on the Tsunami Hazard Maps, without experiencing a catastrophic structural failure. For tsunami resilient design purposes, a minimum sea level rise rate of 3 feet per century shall be used when combined with a maximum credible tsunami condition. For purposes of administering this policy, “permanent residential units” comprise residential units intended for occupancy as the principal domicile of their owners, and do not include timeshare condominiums, visitor-serving overnight facilities, or other transient accommodations.

2.C.10. All new development entailing the construction of structures intended for human occupancy, situated within historic, modeled, or mapped tsunami inundation hazard areas, shall be required to prepare and secure approval of a tsunami safety plan. The safety plan shall be prepared in coordination with the Del Norte County Department of Emergency Services, Sheriff’s Office, and City or Tribal public safety agencies, and shall contain information relaying the existence of the threat of tsunamis from both distant- and local-source seismic events, the need for prompt evacuation upon the receipt of a tsunami warning or upon experience seismic shaking for a local earthquake, and the evacuation route to take from the development site to areas beyond potential inundation. The safety plan information shall be conspicuously posted or copies of the information provided to all occupants. No new residential land divisions shall be approved unless it be demonstrated that timely evacuation to safe higher ground, as depicted on adopted tsunami hazard maps, can feasibly be achieved before the predicted time of arrival of tsunami inundation at the project site.

2.C.11. The best available and most recent scientific information with respect to the effects of long-range sea level rise shall be considered in the preparation of findings and recommendations for all requisite geologic, geo-technical, hydrologic, and engineering investigations. Residential and commercial development at nearshore sites shall analyze potential coastal hazards from erosion, flooding, wave attack, scour and other conditions, for a range of potential sea level rise scenarios, from three to six feet per century. The analysis shall also consider localized uplift or subsidence, local topography, bathymetry, and geologic conditions. A similar sensitivity analysis shall be performed for critical facilities, energy production and distribution infrastructure, and other development projects of major community significance using a minimum rise rate of 4.5 feet per century. These hazards analyses shall be used to identify current and future site hazards, to help guide site design and hazard mitigation and identify sea level rise thresholds after which limitations in the development’s design and siting would cause the improvements to become significantly less stable. For design purposes, projects shall assume a minimum

sea level rise rate of 3 feet per century and critical infrastructure shall assume 4.5 feet per century; greater sea level rise rates shall be used if development is expected to have an economic life greater than 100 years, if development has few options for adaptation to sea level higher than the design minimum, or if the best available and most recent scientific information supports a higher design level.

~~2.C.3. 2.C.12~~ ~~The County shall continue to apply its steep and hazardous slopes ordinances regarding grading and hillside development. Development involving significant alternation of natural land forms or surface conditions should generally be discouraged, particularly~~ on slopes between 20 and 30 percent which are identified to have high risk soils shall minimize alteration of natural land forms or surface conditions. ~~Development~~ New residential development on slopes greater than 30 percent shall be ~~discouraged~~ prohibited unless it can be demonstrated that no feasible less environmentally damaging site or design exists. ~~The aggregate density for any new hillside subdivision shall not exceed one unit per two acres.~~ ~~☞ ■ HA IV.D.4., SSS GH.P.5. (Revised)~~ [Last sentence moved to Chapter 3 *LAND USE AND COMMUNITY DEVELOPMENT – LAND DIVISION – DIVISION OF COASTAL ZONE RURAL LANDS – Policies*]

~~2.C.4. 2.C.13~~ ~~The County shall continue to require that a~~ A geologic investigation shall be made by a registered geologist, engineering geologist, or Registered Civil Engineer for all proposals in landslide potential areas, coastal or riverbluffs, and development on slopes greater than 10 percent, including road construction. These investigations ~~should~~ shall assess the stability of the site under both normal and seismic conditions as well as recommend mitigation measures. If it is found that the hazards cannot be mitigated to within acceptable risk levels appropriate with the intended land use, the proposal ~~should~~ shall be denied. ~~☞ ■ SSS GH.P.6., HA IV.D.5. (Revised)~~

~~2.C.5. 2.C.14~~ ~~The County shall require that any construction contemplated~~ No development on filled areas ~~be preceded by~~ shall be approved until an analysis of the fill and its capabilities or limitations has been completed. ~~☞ ■ HA IV.D.7.~~

~~2.C.6.~~ ~~The County, in conjunction with other governmental agencies, when feasible, should utilize lands subject to severe geologic hazards for low intensity.~~ ~~☞ ■ SSS GH.P.10., HA IV.D.6.~~ [Revised, moved to *GEOLOGIC HAZARDS - Other Initiatives*]

- 2.C.7. The County should have available to its staff a person qualified in aspects of slope stability to recommend, following on-site investigations, refinements to the landslide potential zones identified in this Element.  SSS GH.P.3.
- 2.C.8. The County should maintain in its public works division a public file of all geological and soil investigations.  SSS GH.P.7.
- 2.C.9. The County should prepare a geologic hazard information packet for public distribution and find other ways to inform the public of how they can minimize slope stability problems on their own property.  SSS GH.P.9.

- ~~1.A.11. The County shall require geologic Geologic studies shall be required for new construction within the area of demonstration on bluff tops to determine:~~
- ~~i. their suitability for development; and~~
  - ~~ii. the necessary setbacks required to avoid hazards associated with bluff failure.~~

~~Note: The area of demonstration of stability includes the base, face, and top of all bluffs and cliffs. The extent of the bluff top considered should include the area between the face of the bluff and a line described on the bluff top by the intersection of a plane inclined at a 20 degree angle from horizontal passing through the toe of the bluff or cliff, or 50 feet inland from the edge of the cliff or bluff, whichever is greater. The County may, however, designate a smaller area of demonstration in specific areas of known geologic stability (as determined by adequate geologic evaluation and historic evidence) or where adequate protective works already exist in areas of known high instability.~~  ~~MWR VII.F.4.a~~ [Relocated from Section 1 MARINE RESOURCES – Policies and deleted as superseded by preceding policies]

~~1.E.5. 2.C.10. The County shall require that development~~ **Development** on hillsides **shall** be ~~design~~ **designed to the maximum extent feasible to** ~~utility~~ **utilize non-exotic/invasive plantings, mulches, hydro-seeding applications, and/or** native vegetation when possible ~~or natural vegetation~~ as erosion control measures.  
 (New)

~~1.C.11. 2.C.11. The County shall continue to limit~~ Development involving significant alteration of the natural landform on slopes greater than 30 percent **shall be prohibited unless it can be demonstrated that no feasible less environmentally damaging feasible site or design exists.**  (New)

[See also Policy 1.A.11. and 1.A.12.]

#### ~~Existing Implementation Programs:~~

- ~~• Coastal Hazard Zoning Ordinance~~
- ~~• Subdivision Ordinance~~
- ~~• Grading, Excavating & Filling Ordinance~~
- ~~• Public and Private Road Standards Ordinances~~

#### ~~New Implementation Programs :~~

~~2.1 The County shall prepare a geologic hazard information packet for public use. (Policy 2.C.8.)~~

~~Responsibility: Community Development Department~~

~~Time Frame: First five years~~

~~2.2 The County shall continue to require development adjacent to coastline erosion areas to mitigate potential coastal erosion hazards by compliance with established coastal bluff hazard setbacks or by providing the following information:~~

- ~~• an assessment of the rates of coastal retreat;~~
- ~~• in the case of bluffs, a detailed examination of underlying geology by a registered geologist or engineering geologist, or licensed civil engineer;~~
- ~~• an analysis of the potential for tsunami run-up where designated in Section 2 (Safety and Noise) of this General Plan; and~~
- ~~• establishing the required building setbacks and/or foundation design for proposed new development based upon the full economic life of the proposed new development (i.e. 75 to 100 years) such that the need for future shoreline protection works is fully precluded.~~  ~~SSS GH.P.1., HA IV.D.1. (Revised)~~  
 [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

#### Other Initiatives

- ~~2.C.1.~~ ● The County shall continue the application of its Coastal Hazard overlay zoning program within the Coastal Zone and should consider a similar program for non-Coastal steep sloped and/or bluff areas. ~~☞ ■ (New)~~
- ~~2.C.6.~~ ● The County, in conjunction with other governmental agencies, when feasible, should utilize lands subject to severe geologic hazards for low-intensity **land uses**. ~~☞ ■ SSS GH.P.10., HA IV.D.6.~~

## 2.D. FLOOD HAZARDS

**Goal 2.D.** To protect the lives and property of the citizens of Del Norte County from hazards associated with development in floodplains.

### Policies

- ~~2.D.1.~~ ~~The County shall maintain and implement the County's floodplain programs which discourage inappropriate development in flood-prone areas.~~ ~~☞ ■ SSS III.P.1.~~ [Moved to FLOOD HAZARDS – Other Initiatives]
- 2.D.2. ~~The County's emphasis on flood control~~ **Flood hazard management** shall ~~continue to be aimed at~~ restricting development in flood-prone areas and not rely on traditional structural flood control techniques. ~~☞ ■ SSS III.P.5.~~ [Revised, merged with Section 1 ONSHORE FISHERIES – Policy 1.C.8]
- 2.D.3. ~~The County land use policy shall continue to recognize that floodplains~~ **Floodplains** have unique and significant public values, including wildlife habitat or recreational, aesthetic and scientific value, open space, and groundwater recharge. The value of the flood plain as an environmental resource and the public benefits to be derived from it ~~should~~ **shall** be considered **in the siting, design, and approval of new development**. ~~☞ ■ SSS III.P.6., HA IV.D.18.~~
- 2.D.4. ~~The County shall require the application of appropriate~~ **Feasible** flood proofing standards ~~to~~ **shall be required for** structures ~~deemed necessary~~ in flood-prone areas **where their application is deemed necessary**. ~~☞ ■ SSS III.P.8.~~
- 2.D.5. ~~The~~ **No new development, including land divisions, shall be authorized in flood-prone areas unless found to be in conformance with the** County's environmental health codes, ~~should be considered important supplements to the County's~~ **and** floodplain zoning and subdivision regulations. ~~☞ ■ SSS SS.P.9.~~
- ~~2.D.6.~~ ~~The National Flood Insurance Program should continue to serve as a framework for the County's flood damage prevention policies and programs.~~ ~~☞ ■ SSS III.P.11. (Revised)~~ [Moved to FLOOD HAZARDS – Other Initiatives]

~~2.D.7. The County public works staff should continue its coordination with the U.S. Army Corps of Engineers so that the structural stability of levees remains adequate to protect local residents. (C) (New) [Moved to FLOOD HAZARDS – Other Initiatives]~~

~~2.B.1. 2.D. The County shall require In addition to compliance with Geologic Hazards Policies 2.C.2, 2.C.3, and 2.C.4, construction contemplated in low-lying coastal areas, or in the zone of possible tsunami run-up, shall to be designed in accordance with the requirements of the County Flood Hazard Ordinance. (C) (New) SSS SH.P.10 (Revised)~~

[See also Policy 2.B.1.]

~~Existing Implementation Programs:~~

- ~~• FEMA Flood Insurance Rate Maps~~
- ~~• Flood Damage Prevention Ordinance~~
- ~~• Flood Zone Area Zoning Ordinance~~

~~New Implementation Programs:~~

~~Existing programs are deemed sufficient. [Replace with universal cross-reference to Local Coastal Program Zoning Enabling Ordinance and other development regulation components of the Implementation Plan within Part I – Summary]~~

Other Initiatives

~~2.D.1. The County shall maintain and implement the County’s floodplain programs which discourage inappropriate development in flood prone areas. (C) (New) SSS HH.P.1~~

~~2.D.6. The National Flood Insurance Program should continue to serve as a framework for the County's flood damage prevention policies and programs. (C) (New) SSS HH.P.11 (Revised)~~

~~2.D.7. The County public works staff should continue its coordination with the U.S. Army Corps of Engineers so that the structural stability of levees remains adequate to protect local residents. (C) (New)~~

2.E. FIRE HAZARDS

**Goal 2.E.** To prevent and minimize the risk of loss of life, injury, and property damage resulting from unwanted fires.

## Policies

~~2.E.1. This policy left intentionally blank.~~

~~2.E.2. This policy left intentionally blank.~~

2.E.3. ~~The County should avoid development~~ **New development** in areas identified as high or extreme fire hazard areas ~~when~~ **shall be avoided to the maximum extent feasible possible**. Where such development is permitted, structures located in extreme or high fire hazard areas ~~should~~ **shall** be constructed with fire-resistant materials, utilizing fire-resistant design standards, and the surroundings ~~should~~ **shall** be irrigated.   **SSS FH.P.1. (Revised)**

2.E.4. **Projects Development** which encroaches into areas which are determined to have a high or extreme fire hazard shall be reviewed by the appropriate fire agency to determine if special fire prevention measures are advisable.   **SSS FH.P.2. (Revised)**

2.E.5. ~~The County should not approve major~~ Developments **shall not be approved** if fire-fighting services are not available or are not adequate for the area.   **SSS FH.P.3.**

2.E.6. ~~The County shall require development~~ **Development** within State Responsibility Areas in Del Norte County ~~to~~ **shall** conform to the fire safe standards adopted by the County and approved by the California ~~Division~~ **Department** of Forestry **and Fire Protection**.   **SSS FH.P.4.**

~~2.E.7. The County shall continue to cooperate with the California Division of Forestry, the Six Rivers National Forest, and local fire districts in their fire prevention programs throughout the county.~~   **SSS FH.P.5.** [Moved to FIRE HAZARDS – Other Initiatives]

2.E.8 The County assigns responsibility for maintenance of private properties, including private roads, in a fire safe manner to the property owner pursuant to California Civil Code, and to those local and State agencies responsible for water and fire code enforcement.

 (New)

~~2.E.9 The County shall encourage local fire districts to develop and implement programs for the identification and upgrading of substandard commercial and/or public facilities to meet current fire codes.~~   (New) [Moved to FIRE HAZARDS – Other Initiatives]

### ~~Existing Implementation Programs:~~

- ~~• California Department of Forestry AB6 Fire Risk Maps~~
- ~~• Uniform Fire Code~~
- ~~• Ordinance 91-2b SRA Fire Safe Regulations~~
- ~~• Subdivision Ordinance~~

~~• Public and Private Road Standards Ordinances~~

~~New Implementation Programs:~~

~~Existing programs are deemed sufficient.~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

Other Initiatives

2.E.7. The County shall continue to cooperate with the California Division of Forestry, the Six Rivers National Forest, and local fire districts in their fire prevention programs throughout the county. ~~☞ ■ SSS-FH.P.5.~~

2.E.9 The County shall encourage local fire districts to develop and implement programs for the identification and upgrading of substandard commercial and/or public facilities to meet current fire codes. ~~☞ ■ (New)~~

2.F HAZARDOUS MATERIALS

**Goal 2.F:** To protect the public health, safety, and welfare through the planning and implementation measures for the siting, reporting, and transportation of hazardous materials in or through the county. ~~☞ ■ (New)~~

**Policies**

~~2.F.1. Protection against the spillage of crude oil, gas, petroleum products, or hazardous substances shall be provided in relation to any development or transportation of such materials. Effective containment and cleanup facilities and procedures shall be provided for accidental spills that do occur.~~

~~2.F.1. The County solid waste agency shall continue to provide educational materials and information to the public regarding the types of household hazardous waste and the proper methods of disposal. ☞ ■ (New) [Moved to HAZARDOUS MATERIALS – Other Initiatives]~~

~~2.F.2. The County solid waste agency shall continue to provide disposal options to the public for the proper disposal of household hazardous waste. ☞ ■ (New) [Moved to HAZARDOUS MATERIALS – Other Initiatives]~~

~~2.F.3. 2.F.2. The County shall require that new New hazardous waste facilities and those commercial and industrial land uses that use or produce hazardous materials or waste are shall be sited and designed in an appropriate manner to maintain an acceptable level of risk to minimize hazard risks to the maximum extent feasible. ☞ ■ (New)~~

~~2.F.4. The County shall continue to maintain a hazardous materials response capability for the control and cleanup of hazardous materials releases and accidents. (C) (New) [Moved to HAZARDOUS MATERIALS – Other Initiatives]~~

~~2.F.5. The County shall continue to cooperate with the Highway Patrol to establish haul routes and procedures for the movement of hazardous wastes within the county. (C) (New) [Moved to HAZARDOUS MATERIALS – Other Initiatives]~~

#### ~~Existing Implementation Programs:~~

- ~~• Underground Storage of Hazardous Substances Ordinance~~
- ~~• Hazardous Materials Response Plan~~

#### ~~New Implementation Programs:~~

~~Existing Programs are deemed sufficient. [Replace with universal cross-reference to Local Coastal Program Zoning Enabling Ordinance and other development regulation components of the Implementation Plan within Part I – Summary]~~

#### Other Initiatives

- 2.F.1. The County solid waste agency shall continue to provide educational materials and information to the public regarding the types of household hazardous waste and the proper methods of disposal. (C) (New)
- 2.F.2. The County solid waste agency shall continue to provide disposal options to the public for the proper disposal of household hazardous waste. (C) (New)
- 2.F.4. The County shall continue to maintain a hazardous materials response capability for the control and cleanup of hazardous materials releases and accidents. (C) (New)
- 2.F.5. The County shall continue to cooperate with the Highway Patrol to establish haul routes and procedures for the movement of hazardous wastes within the county. (C) (New)

#### DISASTER PLANNING

**Goal 2.G.** To provide planning, training, response, and recovery capabilities associated with large-scale disasters that could impact the county.

#### Policies-Other Initiatives

- 2.G.1. The County shall assign high priority to the continued maintenance and updating of the County Emergency Operations Plan and should provide consistent management and training programs so that the community will be able to respond effectively in the face of large-scale disaster.  SSS DP.P1. (Revised)
- 2.G.2. The County Office of Emergency Services shall expand the Emergency Operations Plan to address emergency transportation, shelter, and medical services.  (New)
- 2.G.3. The County shall continue to work with special districts and city, State, and Federal agencies in refinement of the Emergency Operations Plan and shall work to expand coordination with Del Norte School District, Sutter Coast Hospital, and California Department of Corrections facilities.  (New)
- 2.G.4. The County shall continue to coordinate with Humboldt, Curry, Josephine, and Siskiyou Counties with mutual aid agreements and development of programs for disaster planning, training, and response.  (New)
- 2.G.5. The County shall update and maintain an evacuation and access plan coordinated with the City of Crescent City, Crescent City Harbor District, Caltrans, U.S. Forest Service, National Park Service, State Park Service, and other agencies, which address alternative routes for efficient emergency operations following a large-scale disaster.  SSS DP.P.3. (Revised)

[See also Policy 8.A.6.]

**Existing Implementation Programs:**

- ~~• Del Norte County Emergency Operations Plan~~

**New Implementation Programs:**

- ~~2.3 The County shall expand the Emergency Operations Plan to address emergency evacuation routes, transportation, shelter, and medical services. (Policies 2.G.1. and 2.G.2.)~~

---

~~Responsibility: County Office of  
Emergency Services~~

---

~~Time Frame: First five years~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation]

components of the Implementation Plan within *Part I – Summary*]

**NOISE**

**Goal 2.H.** To prevent incompatible land uses, by reason of excessive noise levels, from occurring in the future. This includes protecting sensitive land uses from exposure to excessive noise and to protect the economic base of the county by preventing the encroachment of incompatible land uses within areas affected by existing or planned noise-producing uses.

**Policies**

2.H.1 The following land uses shall be considered to be “noise sensitive”:

- single and multi-family residential;
- hospitals and extended care facilities;
- schools and other learning institutions;
- libraries; or
- similar uses as may be determined by the county.  (New)

2.H.2 Transportation-Related Noise. The development of new noise sensitive land uses adjacent to existing or planned transportation facilities or development of new transportation facilities adjacent to existing or planned sensitive land uses shall require a noise impact analysis in areas where current or future exterior noise levels from transportation sources exceeds 65 CNEL/Ldn. This study shall include recommendations and evidence to establish mitigation which will reduce noise exposure to acceptable levels. Areas subject to this criteria are defined as follows:

- Roadway Noise. For major roadways in the County, the future noise levels estimated on Table 2-1 shall be used to determine the applicability of this policy.
- Aircraft Noise. Until completion and adoption of new noise contours for McNamara Field, the noise contours estimated on Figure 2-1 shall be used to determine the applicability of this policy.  (New)

2.H.3 Stationary Noise. Proposed projects which include potentially significant noise generation (i.e., with the potential to exceed the standards shown on Table 2-2) or development of new land uses adjacent to an existing or proposed stationary source of noise shall be required to submit a noise study that includes specific recommendations for mitigation. This policy does not apply to noise levels associated with agricultural and gravel extraction (but not processing) operations.  (New)

**TABLE 2-2**

<b>MAXIMUM NOISE EXPOSURE FOR NOISE SENSITIVE AND OTHER USES DUE TO STATIONARY NOISE SOURCES (HOURLY L<sub>eq</sub> IN dB<sup>1,2</sup>)</b>		
<b>Duration</b>	<b>Day (7 a.m. to 10 p.m.)</b>	<b>Night (10 p.m. to 7 a.m.)</b>
Sensitive Land Uses (See Policy 2.H.1)		
Residential	62	57
Other Sensitive Land Uses	52	47
Other Land Uses		
Commercial uses	62	57
Industrial and Heavy Commercial uses	67	62
<sup>1</sup> As determined at the property line of the receiver. When determining effectiveness of noise mitigation measures, the standards may be applied on the receptor side of noise barriers or other property-line noise mitigation measures. <sup>2</sup> Sound level measurements shall be made with the noise meter set to the slow response setting.		

2.H.4 In the event that acceptable outdoor noise levels cannot be achieved by various noise mitigation measures, indoor noise levels for residential uses should be designed to not exceed 45 CNEL/Ldn with windows and doors closed.  (New)

2.H.5 The County should encourage the DNUSD to design and locate schools so that interior noise levels in classrooms do not exceed 45 CNEL/Ldn and exterior noise exposures do not exceed 65 CNEL/Ldn at classroom buildings and 70 CNEL/Ldn on playgrounds or athletic fields.  (New)

2.H.6 The County should designate and locate active recreational areas (e.g., sports fields, playgrounds) so that noise levels of the facilities do not exceed 70 CNEL/Ldn or ambient noise levels in the area which they are located.  (New)

2.H.7. The County should cooperate with the City of Crescent City and other agencies active in Del Norte County in noise abatement measures.  N P.5.

~~Existing Implementation Programs:~~

● ~~General Plan~~

~~New Implementation Programs:~~

~~2.4 The County should develop a comprehensive noise ordinance based on quantitative measures of acceptable noise levels identified in this element. (Policies 2.H.2. and 2.H.4.)~~

~~Responsibility: County Health Department~~

~~Time Frame: First five years~~

~~2.5 The County shall have a new noise study prepared for the McNamara Airport. (Policy 3.H.2.)~~

~~Responsibility: Community Development Department~~

~~Time Frame: First five years [Replace with universal cross-reference to Local Coastal Program Zoning Enabling Ordinance and other development regulation components of the Implementation Plan within Part I – Summary]~~

**Suggested Modification No. 5: (Land Use and Community Development Element)**

All changes to the *Land Use and Community Development* Element

## SECTION 3

# LAND USE AND COMMUNITY DEVELOPMENT

This section contains diagrams, designations, standards, goals, policies, and programs that set the basic framework to guide the type, location, intensity, and quality of future development and the protection of Del Norte County's natural and built environment.

### **LAND USE DIAGRAM AND STANDARDS**

The most familiar part of any general plan is the map, or land use diagram, showing the types and locations of development called for in the plan. In order to accurately interpret the development implications of the various designations shown on the diagram, the reader must understand the intent of and the standards for each designation. The following sub-sections first describe how the standards are expressed generally, then outline the standards for each of the designations shown on Del Norte County's **General Coastal Land Use** Plan Land Use Diagram (inserted separately in this document).

#### **~~3-TP.1~~ ALLOWABLE USES AND DEVELOPMENT DENSITIES**

Each of the designations shown on the Land Use Diagram provides for a unique range of allowable uses consistent with the intent of the designation. The uses specified in the subsequent subsections for each designation are indicative, not inclusive, of the range of uses allowed in the designation. Zoning more precisely specifies the permissible uses for individual parcels, consistent with **General Coastal Land Use** Plan prescriptions. **Moreover, for administering the development permit appeal provisions of the California Coastal Act for coastal counties<sup>1</sup>, a singular "principal permitted use" for each zoning district must be identified. Other principally-permitted uses — development types and activities not otherwise requiring securement of a conditional use permit — are typically sequentially enumerated as well.**

In addition to ~~the~~ **these** principal **and conditionally permissible** uses, the Zoning Ordinance typically authorizes similar and compatible uses, such as incidental or accessory uses (e.g., garage in a single family district, **home occupations**) and public and quasi-public uses (e.g., fire station or church in a single-family district). Generally one zoning district is used to implement a land use designation. Some areas may, however, be subject to transitional designations, such as a rural residential zone used within an urban boundary until community services can be provided. Table 3-1 provides a matrix indicating which zoning districts are consistent with the specified **General Coastal Land Use** Plan land use designations.

<sup>1</sup> **California Public Resources Code Section 30603(a)(4)**  
Del Norte County **General Coastal Land Use** Plan ~~Coastal~~ Policies

In some cases, uses are found which were legally established prior to the adoption of a land use designation or zoning and are not in conformance with uses permitted in such designations. These are known as “non-conforming uses.” Existing non-conforming uses may be continued, but may not be expanded except, upon securement of a conditional use permit, and then only once if the expansion increases use density or intensity by less than 20 percent. *LU II.B.*

[INSERT TABLE 3-1]

State law mandates that general plans, including land use plans prepared pursuant to the Coastal Act, include standards of population density and/or building intensity for all of the territory covered by the plan. To satisfy this requirement, this ~~General~~ Coastal Land Use Plan includes standards for each of the land use designations appearing on the Land Use Diagram. These standards are stated differently for residential and non-residential development (see Table 3-2). Additionally, special standards reflect general policy issues such as sewage disposal/lot size requirements or parcel-specific conditions addressing larger issues such as vehicular access.

*See discussion of density incentives under land use designation description.			

### ~~3 TP.1.1~~ Residential Uses and Densities

Standards of development density for residential uses are stated in terms of the allowable range of dwelling units per net acre. For purposes of determining maximum development entitlements, the total area of a particular parcel or lot is calculated. Where public roadways are involved, the total area is determined by subtracting the area dedicated as a public right-of-way; where private roads are involved, the right-of-way is not subtracted, so the total area is synonymous with the gross area. Where multiple designations are found on a property, the density of each designation is calculated individually.

The policies of this **General Coastal Land Use** Plan require that project design reflect and consider natural features, suitability of soils, availability of water, hazards, circulation, and the relationship of the project to surrounding uses. The actual density of residential development and intensity of commercial development, as well as lot patterns, will be determined by these and other factors. As a result, the maximum density specified by land use designations or zoning for a given parcel of land may not always be realized. In order to provide for maximum use of density potential, planned communities or clustered development may be undertaken by special implementation zoning districts. Such zoning provisions for clustering gross land use density on a project-wide basis, thus permitting overall density to be clustered into pockets of higher density development within the project that are balanced by areas of lower density while not changing the overall density of the project area, shall be deemed consistent with the intent of this Plan. Such a program provides for easier mitigation of environmental factors with minimal loss of development density.

~~Pursuant to the Coastal Housing Act local governments are required to encourage the provision of low and/or moderate income housing as a part of residential development projects within the Coastal Zone. Projects that include residential development must be reviewed for consistency with the requirements of the Act for low and moderate income housing. Also, the provision of bonus densities and/or other incentives as outlined in the Act as defined by the State housing regulations for low and moderate income housing shall be permitted, subject to review on a case by case basis. Where bonus densities are provided, environmental impacts shall either be determined to be insignificant or mitigated to less than significant level and a program verifying that the bonus units will be occupied by low and/or moderate income households shall be approved. (ND II.)~~

~~Also pursuant to California Government Code (Sec. 65915 et seq) and the Coastal Housing Act, the granting of a bonus in density for residential development that provides qualifying low and/or moderate income housing shall be permitted, subject to individual project review. As defined by State law, the additional density is to be calculated based on the maximum basic density identified by the Land Use Diagram. No change in the basic permitted density itself shall be necessary for the bonus, provided that the following findings are made:~~

- ~~a. The proposal is found to qualify for bonus units under State guidelines; and~~
- ~~b. A program for insuring continued use as low and/or moderate income units is included in any approval.~~

~~Where bonus units that have been approved and constructed are proposed to be converted to non-low or moderate income use, a General Plan amendment making the Land Use Diagram density and overall (original) project area density consistent with each other shall have been approved first before the conversion is permitted. (LU II.C.5)~~

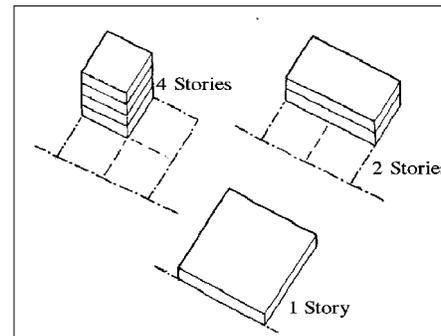

~~Under California Government Code (Sec 65852.1), the County also continues to consider use permits for second dwellings for seniors ("granny housing") which, subject to public health and safety issues, shall be deemed a residential use consistent with the single family and multi-family designations of this Plan. Such units shall not be considered to exceed the allowable density for the lot upon which it is located.~~

Departing from the County's past practices, this **General Coastal Land Use** Plan specifies residential development standards **for urban land use categories** in terms of a *range* of dwelling units per acre. In the past, the County's standards specified **only a range of densities, from zero to** the *maximum* number of units permitted per acre. The difference is that the updated standards also specify a *minimum* density for residential designations. The new approach responds the County's *Housing Element* (adopted in 1992), which includes a policy and a program calling for establishment of minimum residential densities to "limit underutilization of land and maximize development potential." The specification of minimum densities also allows for more certainty with respect the nature of future development and the overall development pattern. This certainty is critical to effective infrastructure planning and financing in urban areas (e.g., sizing of service lines and treatment facilities and establishing financing mechanisms and fee structures). The specification of minimum residential densities is also valuable to private property interests since it allows for a more definitive determination of the type of development likely to occur or be permitted in a particular area.

### ~~3 TP.1.2~~ Non-Residential Uses and Densities

This **General Coastal Land Use** Plan presents standards of building intensity for non-residential uses such as commercial and industrial development in terms of maximum floor-area ratios (FARs). A floor-area ratio is the ratio of the gross building square footage on a lot to the net square footage of the lot (or parcel). For example, on a lot with 10,000 net square feet of land area, an FAR of 1.00 will allow 10,000 square feet of gross square feet of building floor area to be built, regardless of the number of stories in the building (e.g., 5,000 square feet per floor on two floors or 10,000 square feet on one floor). On the same 10,000-square-foot lot, an FAR of 0.50 would allow 5,000 square feet of floor area, and an FAR of 0.25 would allow 2,500 square feet.

The diagram to the right shows graphically how various building configurations representing an FAR of 1.00 could cover a lot.

*Various Building Configurations Representing a Floor-Area Ratio of 1.00 on the Same Lot*

The FAR standards presented in this report were developed based on consideration of factors such as sewage disposal methods, parking requirements, and building height needs or limitations. FAR standards can, in turn, assist in assessing such planning questions as potential traffic generation, or sewer and water line needs in areas not yet fully developed.

Some land use designations, ~~and~~ types of development, ~~and~~ **locales** may not be wholly compatible with the typical density or FAR approaches. These include commercial RV parks and campgrounds, and resource land use designations such as timberland and agriculture. In the former case, special development conditions can be utilized setting a density ratio of spaces to acreage, rather than residential units per acre. Resources lands are generally focused upon resource production with minimum parcel sizes set for management purposes. Residential development can be viewed as accessory activity or as not necessary to the primary use and can be limited or prohibited. Structures associated with resource production activities, such as barns, storage, or milling buildings, are also typically secondary. **Moreover, in areas with significant**

**visual or other coastal resources, and/or special community character, FAR standards may need to be adjusted downward to ensure consistency with Coastal Act and LCP policies and standards and the protection of views to and along the ocean and scenic areas, maintaining compatibility with the character of surrounding areas, and the protection of other coastal resources.**

## **LAND USE DESIGNATIONS**

The Land Use Diagram indicates a variety of land use designations which set the scale, pattern, and types of development for each area of the county. In order to clearly provide opportunities for various lifestyles and economic opportunities, these designations have been grouped into four general categories. These reflect a broad scope of policies, from land use resources to community infrastructure policies.

- The **Resources** category reflects areas where timber and agricultural production are the primary focus. Other development is minimal and the provision of public services is limited.
- The **Rural** category reflects areas where a rural lifestyle prevails and services are provided by a combination of private on-site and limited public facilities.
- The **Urban** category reflects areas of higher intensity residential, commercial, or industrial use with public roads, water, and sewer lines and regional activities or services to be focused in these areas.
- The **Countywide Coastal Zone-wide** category reflects lands that are publicly-owned, **and** resource areas, and hazard areas, which may occur anywhere within the **coastal zone portion of the** county.

The following sections set forth the purpose of each designation appearing on the Land Use Diagram, according to these four general categories.

### **~~3 TP.2~~ RESOURCE LANDS**

This group of designations is applied to extensive areas of the county where good conservation practices are imperative. These designations identify and geographically locate resource production areas of the county for their conservation, development, and utilization. The Resources category reflects areas where timber and agriculture, along with related watershed, mining, hazards, and incidental recreation, uses are the primary focus. Development is minimal and the provision of public services is very limited.

#### **~~3 TP.2.1~~ Agriculture Prime**

This designation applies to prime agricultural lands, **as defined by state law, and other lands** of high agricultural value which are comprised of **actively used lands in** contiguous ownership of 20 acres or more. Its purpose is to support and encourage agricultural production and prevent the

intrusion of incompatible uses. The minimum lot size for the purposes of divisions of land for sale, lease, or financing is 40 acres.

The principal uses in Agricultural Prime areas are as follows: agricultural production (including but not limited to crops, dairies, orchards, apiculture, viticulture, horticulture, nursery, cattle, horse and animal production and management); structures directly related to agricultural production (such as barns, sheds, greenhouses, etc); and related land management activities (such as discing, irrigation, and on-site waste management).

Additionally, a ~~single family residence~~ **farm dwelling and** up to five farmworker units for onsite agricultural employees, ~~home occupation and guest lodging~~ are permitted. Conditional use permits may be considered for additional resident farmworkers, the intensive raising of animals for commercial purposes (feed lots), home enterprise, and animal husbandry services. ~~Other resource management uses such as gravel mining and timber production may also be permitted. LUIC.2, LU13, AE zone~~

[See also Policy 1.G.1]

### ~~3 TP.2.2~~ **Agriculture General (20 acre and 5 acre)**

This designation applies to general agriculture lands which are used for or are adjacent to agriculturally used lands and which are comprised of five or more contiguous acres where small scale agriculture provides or can provide food, fiber or animal management for enjoyment or economic benefit. Its purpose is to provide for small scale commercial and hobby agriculture and, where necessary, to provide a transition between other designated resource areas and higher intensity uses. Based upon land ownership patterns, existing uses and physical conditions (such as soils, drainage, natural hazards, traffic and water quality) the minimum lot size for the purpose of division of land for sale, lease or financing is either 20 acres or 5 acres, depending on the designation on the Land Use Diagram.

The principal uses are agricultural production (including but not limited to crops, dairies, orchards, apiculture, viticulture, horticulture, nursery, cattle, horses and animal production and management), structures directly related to agricultural production (such as barns, sheds or one greenhouse), and related land management activities (such as discing, irrigation, and on-site waste management). Additionally, a ~~single family residence~~ **farm dwelling** and ~~home occupation enterprises which are agricultural in nature~~ are permitted. Conditional use permits may be considered for **multi-unit greenhouses, animal husbandry services, and non-agricultural uses when the development site meets the criteria of the Coastal Act for conversion from an agricultural use to a non-agricultural use, including** a second dwelling where twice the minimum acreage is available, home enterprise, guest lodging, **and** guest ranches, ~~multi-unit greenhouses, and animal husbandry services~~. Other resource management uses such as mineral extraction and timber production may also be **conditionally** permitted. ~~LU III.A.8., LUIC.2., LUIC.3., LU III.C.1., A zone~~

[See also Policy 1.G.2]

### ~~3 TP.2.3~~ **Timberland**

This designation applies to areas which have characteristics for the production of timber and comprise 20 or more contiguous acres, including Timber Production Zone (TPZ) contract lands. Its purpose is to encourage on-going timber production and to prevent the intrusion of incompatible uses. The minimum lot size for the purpose of division for sale, lease, or financing is 20 acres, subject to timber management review.

The principal use of timberland is the growing and harvesting of trees with accessory activities such as logging roads, log landings, or portable chippers or mills. Additional permitted uses include temporary labor camps related to timber harvest or reforestation, watershed and wildlife habitat management. Other resource management uses such as mineral extraction, **subject to County surfacing mining and quarry regulations**, and agricultural grazing may be permitted where conversion of timberland is not required. Where it is demonstrated that there would be no detraction from or conflict with the principal uses, conditional use permits may be considered for public recreational uses such as camping, utility transmission facilities (gas, electric, water, communication, etc.), or one single-family dwelling subject to all other policies and standards for such development. Additionally, on non-TPZ contract lands, where adequate access and minimal timber activity impact is demonstrated, a use permit for a visitor lodge on parcels 20 acres or larger may be considered. Development for purposes other than timber production on land with 30 percent or greater slope ~~should~~ **shall** be severely restricted. *LU I.C.4, LUELU15, TPZ zone.*

### ~~3 TP.3~~ **RURAL LANDS**

The Rural category reflects areas where a low-density, rural residential lifestyle prevails, with pockets of visitor or neighborhood commercial uses. This designation is intended for the development of rural homesites and to encourage a suitable environment for a variety of family activities for those who desire a rural residential setting. Commercial or hobby gardens or farm animals, natural drainages, gravel roads, and home businesses oriented to rural/resource lifestyles are also suitable for some designations under the Rural category. Rural areas also provide opportunities for clusters of visitor services and have historically had industrial areas (typically oriented to resource production). Private on-site services such as roads, wells, and sewage disposal systems are emphasized, with limited public facilities available in some areas.

#### ~~3 TP.3.1~~ **Rural Residential (1 du/ac, 1 du/2 ac, 1 du/3ac, and 1 du/5 ac)**

This designation is intended to maintain the character of rural areas and to minimize the public services required by smaller lot development. Based upon physical conditions such as **slopes**, soils, drainage, natural hazards, traffic, and water quality and quantity—as well as existing lot sizes and uses—residential development density may range from one dwelling unit (du) per one acre to one du per five acres, as designated by the Land Use Diagram.

The principal permitted use in areas designated Rural Residential is single-family residential (one unit per specified minimum parcel). Uses permitted within residential areas include single-family residences with accessory buildings, light agricultural activities (including the keeping of farm animals **including small livestock**), and home occupations. Conditional use permits could be considered for home enterprises, guest lodging, small public facilities, and intensive agricultural uses. *LU I.C.6., RRA zone*

This designation also recognizes neighborhood commercial uses which are small, non-intensive, quiet, non-nuisance commercial uses compatible with and serving residential neighborhoods, such as owner/resident grocery shops. Subject to specific zoning and a conditional use permit, such uses could be found compatible with the Rural Residential designation.

### ~~3 TP.3.2~~ **Rural Neighborhood**

This designation is intended to maintain areas that have developed historically with smaller lots or higher density residential development than those found in surrounding rural lands, including apartments or mobilehome parks where full community services are not available. The purpose of this category is to keep existing pockets of such residential development from expanding into adjacent resource or other rural lands. Within the Rural Neighborhood designation, infilling of parcels at densities specified is permitted subject to any physical limitations. The County discourages expansion of the Rural Neighborhood designation. The residential development density for areas with this designation is shown on the Land Use Diagram based upon existing density, lot size patterns, availability of public services, and physical conditions.

The principal permitted use under the Rural Neighborhood designation is residential. Due to the higher density of development, ~~urban residential zone designations~~ **animal keeping regulations** that limit farm animal use should be applied. **To reduce vehicle miles traveled and for the convenience of residents, small retail shops, small professional offices, personal service shops or grocery stores may also be conditionally permitted subject to Neighborhood Commercial zoning district performance standards.** Home enterprise and small public facilities may **also** be considered by conditional use permit. *LU I.C.7.*

### ~~3 TP.3.3~~ **Rural Mobilehome Park**

This designation is intended to strategically provide locations for low- and/or moderate- income mobilehome park housing outside of the urban area. The development of rural mobilehome parks must consider the availability of on-site water and sewage disposal as primary development constraints; the maximum residential development density with on-site water and sewage disposal shall be one dwelling unit per half acre. While the park spaces themselves may be smaller than ½ acre, the maximum allowable total residential density **within the park** is to be determined by multiplying the gross acreage **of the park property** by two.

The principal permitted use of the Rural Mobilehome Park designation is mobilehome park and is not to include recreational vehicles. A manager's residence and home occupation use are also permitted. Due to the higher density of development, farm animals **including small livestock** are not permitted. *LU I.C.8., RMPH zone*

### ~~3 TP.3.4~~ **Visitor-Serving Commercial**

This designation is intended to cater to the need of visitors, particularly the highway traveler and users of the County's recreational resources and may be found in both rural and urban land areas. The minimum lot size for the purpose of division for sale, lease or financing is one acre.

The principal permitted use shall include, but not be limited to, hotels, motels, restaurants, service stations, convenience stores, unique item shops, boat ramps, docks, hunting and fishing resorts. Uses, buildings, and structures customarily accessory to the above are also permitted. Uses requiring a conditional use permit include, but are not limited to, recreational vehicle parks, ~~mini-storage, small-medical-offices,~~ one single family residence of owner or operator of the site, and small public facilities. Conditional use permit for mobilehome parks are allowed in conjunction with recreational vehicle parks; the number of recreational vehicle spaces shall exceed the number of mobilehome spaces by a ratio of at least two-to-one, resulting in a majority use of recreational vehicle spaces. This policy applies to both new spaces in existing mobilehome parks and development of new parks. A conditional use permit may also be considered for the development of new time share hotel resort facilities where more than 50 percent of the units are made available for transient visitor use (i.e., “hotel/motel” use), where on-site recreational facilities (such as pool, courts, or spa) are provided, and where at least one use available to the general public (such as public recreation facility, access to adjacent public recreation area, or restaurant/shop complex) is provided. New time share hotel resort facilities shall not be allowed in conjunction with the ~~The~~ conversion of existing visitor-serving facilities ~~initially established for another use (i.e., motel, RV Park, etc) shall not be included.~~

*LU I.C.9., CR zone*

### ~~3 TP.3.5~~ Golf

This designation is intended to provide for the specific development of golf facilities that may include a mixture of activities including recreation and residential uses without requiring large tracts of commercial or agricultural designations. It is applied to existing courses in the County and should be required for any other golf course development proposals under a planned community concept. The minimum project size is 25 acres. Course-related residential development could be considered at a density of one unit per two acres of the overall Golf-designated area.

The principal uses under the Golf designation include golf courses and their associated clubhouses, putting greens, pro shops, parking, and unlighted driving ranges. Uses which could also be considered as accessory to the golf facility include restaurant, bar, court facilities (i.e., tennis), swimming pool, and health club. Additionally, residential development in conjunction with the course could be considered subject to clustering of the units, provision of community water to the units, and related environmental review, including assessment of sewage disposal and traffic impacts.

### ~~3 TP.3.6~~ General Commercial

(See ~~3TP.4.6~~ URBAN LANDS General Commercial text, below)

### ~~3 TP.3.7~~ Light Industrial

(See ~~3TP.4.7~~ URBAN LANDS Light Industrial text, below)

### ~~3 TP.3.8~~ General Industrial

(See ~~3TP.4.8~~ URBAN LANDS General Industrial text, below)

### ~~3 TP.3.9~~ — **Agricultural Industrial**

This designation is intended to provide for the continuation and development of those mixed agricultural-commercial-industrial uses which comprise intensive agricultural production. Such agricultural industrial uses are best located ~~within~~ in proximity to agricultural areas, although the provision of some limited public services, such as public water, public roads, and fire protection facilities, may be necessary due to the intensity of the industrial activities. The minimum lot size for the purpose of division for sale, lease, or financing is one acre.

The principal permitted uses in Agricultural Industrial areas include agricultural production (including but not limited to crops, dairies, orchards, apiculture, viticulture, horticulture, nursery, cattle, horses and animal production and management); structures directly related to agricultural production (such as barns, sheds, greenhouses, etc); and related land management activities (such as discing, irrigation, and on-site waste management). Additionally, one residence and home occupation would be permitted. Uses which could be considered by use permit include agricultural products processing, commercial greenhouses, product shipping facilities, energy facilities, farm equipment services, and farm labor housing. *AI zoning*

[See also Policy 1.G.5.]

### ~~3 TP.4~~ — **URBAN LANDS**

Land use designations within the Urban category are applied to areas within a designated urban boundary where higher intensity residential, commercial, or industrial use are planned with maximum services provided or to be expected. Such densities provide for urban lifestyle opportunities and for more diversified sharing of public service costs. Urban areas may include transition areas where rural neighborhoods are within public service boundaries and which, upon development of such services, have the potential for urban density. These areas are the most logical next step in urban growth. Public roads, fire service, water and sewer lines, and regional activities or services are to be focused in these urban areas.

### ~~3 TP.4.1~~ — **Suburban Residential (0 to 2 du/ac)**

This designation is intended to provide for residential areas within or adjacent to the urban area which have few or no community services, or where only public water is available. The need for development of these areas at higher urban densities is dependent upon the extension of urban services. Residential development density may reach two dwelling units per acre where public water is available.

The principal permitted use under the Suburban Residential designation is single family residential, with accessory buildings and home occupations also permitted. The County may grant conditional use permits for home enterprise, guest lodging, and small public facilities. Farm animals including small livestock should be limited generally to ~~larger~~ parcels greater than one acre in size. *LU, LU1, RI zone*

The Suburban Residential designation also allows neighborhood commercial uses that are small, non-intensive, quiet, non-nuisance commercial uses compatible with and serving residential neighborhoods, such as owner/resident grocery shops. Subject to specific zoning and acquisition of a conditional use permit, such uses could be found compatible with the Suburban Residential designation.

### ~~3 TP.4.2~~ — **Urban Residential (2 to 6 du/ac)**

This designation is intended to provide for residential development at low to moderate density in areas within the urban area where community sewer or an equivalent is available or is nearby. The County will consider residential development of up to 6 units per acre, with the maximum density allowed only where both water and sewer systems are available. Where only a water system is available, the general density standard shall be limited to two units per acre until a sewer system is available. If development occurs at the lower density, access and project design shall provide for future maximum density use.

The principal permitted use under the Urban Residential designation is single-family residential with accessory buildings and home occupation. Conditional use permits may be considered for home enterprise, guest lodging and small public facilities. Farm animals should be limited generally to ~~larger~~ parcels greater than one acre in size. *LUELU2, R1zone*

The Urban Residential designation also permits neighborhood commercial uses that are small, non-intensive, quiet, non-nuisance uses compatible with and serving residential neighborhoods, such as owner/resident grocery shops. Subject to specific zoning and a conditional use permit, such uses could be found compatible with the Rural Residential designation.

### ~~3 TP.4.3~~ — **Urban Mobilehome Parks**

This designation is intended to be applied to lands within the urban area developed for mobilehome residential use in a mobilehome park setting. A residential development density of up to eight dwelling units per acre may be developed where public water and sewer are available. Where one or both are not available, on-site communal systems shall be provided pursuant to State and County health regulations; under no circumstances, however, is the density to exceed eight units per acre.

The principal permitted use is mobilehome park including clustered dwelling units, internal private roads, and private recreation, and laundry areas. Uses that may be considered with a conditional use permit include home occupation and recreational vehicle park. Density for the mobilehome park shall not include any area utilized for recreational vehicles. *LUELU4, MHPK zone*

### ~~3 TP.4.4~~ — **Multi-family Residential (6 to 15 du/ac)**

This designation provides for moderate-density residential development, generally duplexes and multiple-dwelling complexes. In higher intensity areas, some transitional light commercial uses may be considered. Residential projects of between six and 15 dwelling units per acre may be developed only where both a water system and sewage disposal systems or equivalent(s) and

access to publicly maintained roads are available. Where only a water system is available, the general density standard shall be limited to two units per acre until sewer is available. If development occurs at the lower end of the density range, access and project design shall provide for ultimate development at the maximum permitted density. No multi-family development shall be permitted without the provision of public water and fire hydrants. Where commercial uses occur, they shall meet the floor area ratio (FAR) requirements of the General Commercial land use designation.

The principal permitted use under the Multi-family Residential designation is multiple dwelling residential development such as duplex and apartment complexes. Conditional use permits may be considered for home occupation, hotels, convalescent hospitals, assisted care facilities, professional offices, and small public facilities. *LUELU3*

### ~~3 TP.4.5~~ — **Visitor-Serving Commercial**

(See ~~3TP.3.4~~ RURAL LANDS Visitor-Serving Facility text, above)

### ~~3 TP.4.6~~ — **General Commercial**

This designation is intended to provide for business areas with general commercial activities that provide rural communities and urban areas with goods, services, and jobs. Where such areas have existing commercial activities or have adequate room for commercial activity, residential uses may be considered as secondary uses. These areas should be served by public roads and, to the extent feasible, public services. Generally, the minimum lot area for the purpose of sale, lease or finance should meet health standards and be of sufficient size to support commercial development and its adjunct activities such as on-site parking. The maximum floor area ratio (FAR) for commercial development is 0.75. Residential development density is to be limited to one unit per acre where on-site water and sewage disposal are utilized, two units per acre where public water is utilized, and up to 12 dwelling units per acre where community water and sewer are utilized. Residential density is to be calculated based upon the area to be used for residential activity.

The principal permitted uses under this designation include, but are not limited to, commercial activities such as small retail sales and personal service shops; regional shopping and service centers; offices; food services; travel and transportation services such as motels and gas stations; entertainment centers; recreation facilities; and medical centers and services including convalescent hospitals. Consideration may be given for a conditional use permit for small public facilities, assisted care facilities, and residential development either accessory to a commercial center, or where it is demonstrated that a residential use would be secondary to the commercial use. *LUELU5, C2, C3 zones*

### ~~3 TP.4.7~~ — **Light Industrial**

This designation is intended to provide for both rural and urban areas of mixed commercial, heavy commercial and light non-nuisance industrial uses which may not require prime retail sales and industrial manufacturing locations. These areas may also serve as transition from general industrial uses to less intense commercial, residential or resource areas. The maximum floor area ratio (FAR) for light industrial designation development is 0.75.

The principal permitted uses include, but are not limited to, general commercial uses (not including residential, hospital, or convalescent hospital uses), storage, warehousing, machine and welding shops, outdoor contractor, sales and storage yards, light manufacturing where no significant air, odor, water, visual or hazard issue is found, retail sales and offices. A conditional use permit may be considered for motels, enclosed kennels, veterinary clinics, mixed use housing per Sec. 11.40.4 California Labor Code, or one residence for security at an established development. *LU I.B.2., LU I.B.3., C4 zone*

### ~~3 TP.4.8~~ — **General Industrial**

This designation is intended to provide areas suitable for normal operations of heavy commercial, industrial and manufacturing industries in both rural and urban areas. This may include existing industrial use areas, which have limited effect on surrounding uses, areas, which have historically served resource production and related product manufacturing, and areas of potential limited industrial use, which would be subject to physical performance standards. Its purpose is to provide for such industry and manufacturing and to prevent the intrusion of incompatible uses, which could curtail economic production. The maximum floor area ratio (FAR) for industrial designation development is 0.75.

The principal permitted uses shall include, but not be limited to, storage, warehousing, machine and welding shops, outdoor contractor, sales and storage yards, light manufacturing where no significant air, odor, water, visual or hazard issue is found, retail sales and offices. Additionally, one residence for security at an established development is permitted. A conditional use permit may be considered for uses such as mineral extraction or processing, animal product processing, wood processing, hazardous materials processing or production, vehicle dismantling, recycled materials processing or other uses which may be objectionable due to air, odor, water, visual or hazardous issues. Non-residential public uses may also be considered. No permanent or transient residential occupancy such as a motel, hospital, mobilehome park, recreational vehicle park, apartment or residence beyond the single security unit shall be permitted. *LU I.C.10., M zone*

### ~~3 TP.4.9~~ — **Harbor Dependent**

This designation is intended to provide for harbor dependent uses, which include harbor dependent commercial and harbor dependent recreational activities that must be dependent upon the activities or products generated by Crescent City Harbor. These activities include any function connected with the fishing process or handling and/or storing of equipment necessary to secure fish. Provision of scenic views for public enjoyment are also harbor dependent activities. These lands may be held by the Harbor District or privately owned. These areas should be served by public water and sewer and public or harbor district roadways. The maximum floor area ratio (FAR) is 0.75.

The principal permitted uses include boat basins, harbor district offices, Coast Guard stations and quarters, marine terminals and docking facilities, ice facilities, fisheries supplies and storage, net repair areas, maintenance dredging and dredge spoils at approved sites, aquaculture facilities, seafood processing, fuel sales, parking areas and publicly owned support facilities. Consideration may be given for a conditional use permit for dredging and filling for new development, oil and fuel storage facilities, marine electronic shops and restaurants and cafes. *LU I.B.6 (Revised)*

### ~~3 TP.4.10~~ — Harbor Dependent Commercial

This designation is intended to provide areas for commercial and industrial activities which require immediate access to harbor waters or to be placed adjacent to harbor waters. Typically, these areas are developed under a land lease with the harbor district. These areas should be served by public water and sewer and public or harbor district roadways. The maximum floor area ratio (FAR) is 0.75.

The principal permitted uses under this designation include, but are not limited to, commercial boat basins, commercial berthing floats, barge boat and ship loading facilities including pipelines, boat and ship building and repair for untrailerable boats, breakwater devices and piers, processing plants for fish or marine products or wastes from such plants, aquaculture and auxiliary facilities, net and gear repair and storage, marine products purchasing and storage facilities, marine electronic repair and sales, ice production and sales, import and export facilities requiring a waterfront location, marine service and supply facilities, maintenance dredging and dredge spoils disposal at approved sites, harbor district offices, Coast Guard docks and quarters, and public facilities such as parking lots. Consideration may be given for a conditional use permit for dredging, diking and filling in conjunction with new development, wastewater treatment plants or facilities, boat ramps and launching facilities, fuel sales, and support or supply facilities for fishermen. *LU I.B.4 (Revised)*

### ~~3 TP.4.11~~ — Harbor Dependent Recreational

This designation is intended to provide areas for commercial-recreational facilities which require immediate access to harbor waters or to be placed adjacent to harbor waters and are directed towards the recreational utilization of the harbor. Typically these areas are owned by the harbor districts or are developed under a land lease with the harbor district. These areas should be served by public water and sewer and public or harbor district roadways. The maximum floor area ratio (FAR) is 0.75.

The principal permitted uses include recreational marinas including beaches, float systems and launching facilities, fuel sales for boats, party boat offices, piers, moorings and breakwaters, recreational boat sales, marine electronic shops, dry storage for trailerable boats, bait and tackle shops, custom fish processing, public parking and sanitation facilities, and maintenance dredging and dredge spoils at approved sites. Consideration may be given for a conditional use permit for dredging, diking and filling for new development, boat ramps and launch facilities, recreational vehicle parks, restaurants, and cafes. *LU I.B.5 (Revised)*

### ~~3 TP.4.12~~ — Harbor Related

This designation is intended to provide for areas in which commercial and light industrial uses are not dependant upon the harbor to function but benefit from, or provide supportive activities to, a harbor location. Typically, these areas are privately owned although some parts of harbor district lands also qualify. These areas should be served by public water and sewer and public or Harbor District roadways. The maximum floor area ratio (FAR) is 0.75.

The principal permitted uses include restaurants and cafes with ocean or harbor views, marine curio sales and manufacture, marine antiques, hotels and motels, visitor related services, fishing support services such as net manufacturing and sales, welding and machine shops, and boat brokerage offices and equipment storage yards. Consideration may be given for a conditional use permit for dredge spoils disposal, recreational vehicle parks, public uses, and bulk fuel storage facilities. *LU I.B.7 (Revised)*

~~3 TP.4.13~~ — **Greenery**

This designation is intended to set aside areas to be used for wind or weather screens and for visual effect. Permitted uses include use as utility corridors where any removed vegetation must be replaced in kind, day use public recreational facilities requiring little or no alteration to existing land forms, public directional or site identification signs, and planting of native trees. *LU I.B.8 (Revised)*

~~3 TP.5~~ — **COUNTYWIDE DESIGNATIONS**

Those designations in the countywide category have broader applications that may occur anywhere in the county. These include general provision for public facilities of varying types throughout the county, wildlife habitat areas, and hazard areas.

~~3 TP.5.1~~ — **Public Facilities**

This designation is intended to identify areas owned by public agencies such as County or State agencies and local districts, or by quasi-public organizations, that serve as significant public facilities. This includes, but is not limited to, local recreation areas, parks, airports, solid waste facilities, correctional facilities, cemeteries, and schools. Due to the nature of the category, no minimum lot size or density is assigned. These facilities are identified on the Land Use Diagram and specifically identified in Table 3-3 and will be subject to and consistent with all other applicable policies of this General Plan. *LU I.E.*

<b>TABLE 3-3</b>	
<b>PUBLIC FACILITIES USE DESIGNATIONS</b>	
<b>Del Norte County</b>	
Public Facilities indicated on the Land Use Diagram are designated for the following areas:	
1. State Agricultural Station	22. (Crescent) Fire/Emergency Services Center
2. (Kamph) County Park	23. (City) Water Storage Tank
3. (Mouth of Smith River Access) County Park	24. Public Utility Center

21. (Bess Maxwell) School	42. (Gasquet) Five/VFW Halls

*Source: Del Norte County Community Development Department, 1998.*

### ~~3 TP.5.2~~ Resource Conservation Areas

This designation applies to sensitive habitat areas within the Coastal Zone including coastal estuaries, coastal sand dunes, coastal wetlands, farmed wetlands, and riparian corridors. Where parcels totally within the RCA designation are contiguous with a parcel outside (or partly outside) the RCA designation, and where all of these parcels have a single owner, the parcels shall be merged as a condition of approving development in the non-RCA area. Development type and intensity on the non-RCA portion of the parcel shall be that specified by other **General Coastal Land Use** Plan policies. Due to the nature of the designation, its density is zero. ~~However, subject to dedication of easement or ownership of undisturbed RCA habitat as part of a development project, an incentive density may be granted for use in non-RCA portions of the same parcel. The incentive shall not exceed the lowest density land use designation immediately adjacent to the habitat areas multiplied by the area of the habitat to be dedicated, divided by three. Dedication should be to a public or quasi-public agency at the time of development.~~

The allowable uses within designated RCAs shall be limited to:

1. In all areas, fish and wildlife management;
2. In all areas, wetland restoration;
3. In all areas, nature study, including minor facilities constructed by hand such as blinds, lookouts and unimproved trails;
4. In all areas, hunting and fishing, including minor facilities constructed by hand such as blinds and unimproved trails;
5. In all areas, those recreational facilities included in a State Park and Recreation or Department of Fish and Game master plan submitted and approved as an amendment to the Local Coastal Plan;
6. In all areas, the maintenance of flood drainage control and drainage channels;
7. In all areas, removal of windblown trees which threaten existing structures;
8. In wetlands, farmed wetlands and estuaries, diking filling or dredging in accordance with other land use plan policies and the Coastal Act, where there is no feasible less environmentally damaging alternative, ~~and where~~ feasible mitigation measures are provided, and the functional capacity of the wetland or estuary are maintained or enhanced, may additionally be considered;
9. In estuaries, maintenance and improvement of boating facilities consistent with other land use plan policies and the Coastal Act may be considered;
10. In estuary and riparian corridors, or unvegetated gravel bars, mineral extraction subject to issuance of a conditional use permit consistent with County surface mining regulations and where no significant habitat conflicts are found;
11. In farmed wetlands, on agriculturally used parcels, uses relating to the continuance of existing agricultural operations are a principal use, but such uses should maintain long-term habitat values, and where feasible, minimize short term degradation;
12. In riparian areas the following additional uses;
  - a. Recreational trails;
  - b. Wells within rural areas;
  - c. Minor diversions exercised under riparian water rights for on-site use only;
  - d. Minor diversions approved by the State Water Resources Control Board for public water systems.
  - e. Maintenance and repair of existing roads. New steam crossings shall be limited when feasible to right angle crossings of streams and steam corridors.

No single-family residences or other structures shall be permitted within an RCA area, unless it would result in denial of substantially all reasonable use of the parcel of land. *LU I.D. (Revised)*

**[See also Policies 1.G.3.]**

### ~~3 TP.5.3~~ **Federal and State Lands**

This designation applies to those State- and Federally-owned parks, forests and/or recreation areas which have adopted management plans. Due to the extensive State and Federal ownership in the county, it is noted that the principal uses of these areas should include: provisions for continued and improved access through and within the county on State Highways ~~101 and 199~~; continued provision of public recreational facilities and access; multi-use management where

applicable; and interconnection or coordination of State, Federal, and local facilities and programs when possible. (See also Policy sub-section 3.D)

### ~~3 TP.5.4~~ **Tribal Lands/BIA**

This designation applies to those Native American lands held in trust by the Bureau of Indian Affairs over which the County has no land use jurisdiction. The County encourages the adoption of tribal management plans for these areas which would include consideration of compatibility with and impacts upon adjacent area facilities and plans.

#### ~~Existing Implementation Programs:~~

#### ~~Zoning Ordinances and Maps~~

#### ~~New Implementation Programs:~~

~~3 TP.1~~ **The County shall update the non-coastal zoning ordinance text and maps as necessary to ensure consistency with the General Plan.  (New)**  
**Responsibility:** ~~Community Development Department~~  
**Time Frame:** ~~First two years~~

~~3.TP.2~~ **The County shall review and update its PO and AF zoning districts for consistency with the updated land use categories, including density and uses and more a specific definition of guest ranch and visitor lodge uses in Resource areas. Zoning map amendments shall also be made to provide consistency with the adopted Plan, applying an updated PO to public lands and AF to non-TPZ timberlands outside the Coastal Zone.**  
**Responsibility:** ~~Community Development Department~~  
**Time frame:** ~~First two years~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

## **DEVELOPMENT GOALS AND POLICIES**

The goals and policies of this section are organized according to the following categories, each of which relates to a key set of related issues pertaining to land use and development in Del Norte County.

- Urban/Rural Boundary
- Land Division
- Integrated Land Use, Transportation, and Air Quality Planning
- Public Acquisition of Private Land
- Economic Development
- Harbor Development
- Crescent City Subarea Recommendations
- Smith River Subarea Recommendations

- Fort Dick/Kings Valley Subarea Recommendations
- ~~Smith River Canyons Subarea Recommendations~~
- Klamath Subarea Recommendations

### 3.A URBAN/RURAL BOUNDARY

#### Goals

- Goal 3.A.1.** To clearly differentiate between areas within Del Norte County appropriate for higher intensity urban services and land uses (i.e., high density residential, high density commercial and industrial) from areas where rural or resource uses should be continued.

#### Policies

- 3.A.1. ~~The County intends that urban~~ Urban boundaries ~~are~~ shall be appropriately demarcated on the Land Use Diagram maps to guide new urban development within or contiguous to or in proximity to existing developed urban areas. An urban boundary may also include areas previously committed to urban uses where it can be shown prior to issuance of a permit that the proposed development will not have a significant adverse effect, either individually or cumulatively on resources.   (New)
- 3.A.2. The County shall not approve amendments of an urban boundary without environmental (CEQA) review and an amendment of the ~~General Coastal Land Use Plan~~ and Land Use Diagram approved by the Coastal Commission. An LCP amendment request for an ~~The County shall not approve~~ extension of the urban boundary into adjacent resource or rural lands ~~unless all the following findings are made~~ shall, at a minimum, demonstrate all of the following:
- a. Necessary urban services and capacity are available;
  - b. The extension of services will not jeopardize the provision of services to areas within the existing urban boundary;
  - c. The extension will not adversely impact, either directly, indirectly, or cumulatively, agricultural or timberlands adjacent to the extension; and
  - d. The proposed extension as approved does not pose any adverse effects on any identified resources values as reflected in the area Land Use Plan.

Exceptions to these provisions are minor adjustments of the line of less than or equal to 100 feet, where the existing line bisects parcels.   ND I.C.3., ND I.C.4.

- 3.A.3. ~~The County may approve removal of~~ An LCP amendment request to remove areas from the urban limit ~~only if~~ shall, at a minimum, demonstrate all of the following:
- a. the area involved is committed to a rural or lesser-density ~~and if the following findings are made;~~

- ~~a.b.~~ The land involved is not capable of urban development at the time of removal and in the foreseeable future;
- ~~b.c.~~ The required urban services are not available at the time of removal nor in the foreseeable future; and
- ~~e.d.~~ The area is not within a water or sewer district boundary.  *ND I.C.5.*  
(Revised)

~~3.A.4. This policy number left intentionally blank.~~

~~3.A.5.~~ 3.A.4. The County shall restrict new parcels created within the urban/rural boundary to a minimum of one acre in size if no public sewer and/or water is provided. If either public water or sewer is provided, the County shall permit the parcels to be ½ acre minimum in size. ~~If both public water and sewer are provided, the land use designation shall determine the maximum density for each area.~~  *LU III.E.5., LU III.D.16.* (Revised)

[See also Policy 1.D.4.]

~~Existing Implementation Programs:~~

~~General Plan Diagram Maps~~

~~New Implementation Programs:~~

~~Existing program are deemed sufficient.~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

### 3.B. LAND DIVISION

#### Goals

**Goal 3.B.1.** To ensure that land division activity does not compromise the development and resource protection objectives of this **General Coastal Land Use** Plan.

#### Policies

- 3.B.1. The County shall continue to implement the California Subdivision Map Act through its subdivision ordinances. In addition, all land divisions shall meet all requirements of the agricultural policies and standards of the certified LCP.  (New)
- 3.B.2. For new parcels or development projects created within the urban boundary at a lower density due to unavailability of community sewer and/or community water, the County shall include as part of project review, reservation of lands for development of future access, public utility and community service infrastructure, building sites, and other project ~~design~~ site improvements

which provides for additional future maximum density development use.   
(New)

- 3.B.3. The division of agricultural lands in order to separate the existing farmhouse from the ranch or farm lands for the purposes of sale, lease, or financing of the lands or the farmhouse may be approved by the Planning Commission for parcels less than the minimum parcel size. This action is subject to the following:
- a. The minimum lot for the farmhouse shall be one acre;
  - b. The subject residence must have existed prior to the County's zoning of the lands to AE; and
  - c. The subject lands are designated Agricultural Prime on the Land Use Diagram, or are larger than 20 acres in a 20 acre minimum area.   
*LU III.E.2.*
  - d. Such division meets all requirements of the agricultural policies and standards of the certified LCP.**

- ~~1.D.3.~~ **3.B.4.** ~~The County shall utilize low densities of development~~ **Development** in areas where soils have moderate or severe limitations for sewage disposal **shall be limited through the application of low residential land use plan density restrictions and large minimum lot area standards,** unless, ~~a public sewage system is available for areas~~ within an urban boundary, **disposal via a public sewage system is available.**  (New) [Revised and relocated from SECTION 1 SOILS RESOURCES – Policies]

*Division of Coastal Zone Rural Lands*

- ~~3.B.4.~~ **3.B.5.** The County shall approve rural land divisions for new development only in cases where ~~such development can prove~~ **it can be factually demonstrated prior to approval that** the subject area's ~~ability~~ **has adequate public services to accommodate such development,** ~~prior to approval~~ **the development meets the rural land division criteria of Section 30250 of the Coastal Act, and the development will not have significant adverse effects, either individually or cumulatively, on coastal resources.**  (New)
- ~~1.D.4.~~ **3.B.6.** ~~The County shall utilize a general standard for new subdivisions of one unit per half acre where~~ **Consistent with all applicable land use density limitations, zoning district minimum lot area standards, and rural land division criteria, where** only community water or an equivalent is available, **a density standard of one residential unit per one-half acre shall apply to new subdivisions,** and one unit per acre where both community water and sewer or equivalents are not available, **provided the on-site treatment and disposal system meets all site and design criteria set forth in the North Coast Basin Plan.**  (New) [Revised and relocated from SECTION 1 SOILS RESOURCES – Policies]

~~3.B.5.~~ **3.B.7.** ~~The County shall permit~~ Rural land divisions, both major and minor subdivisions (not including boundary adjustments and inside the urban/rural boundary), only may be permitted when 50 percent of the useable parcels in the area have been developed and the created parcels would not be smaller than the average size of the surrounding parcels. To determine if this criteria is met, the following shall apply:

- a. Useable parcels do not include parcels committed to agricultural use and designated as such on the Land Use Diagram, parcels committed to timberland and designated as such on the Land Use Diagram, or parcels committed to Resource Conservation Areas or parts of parcels committed to Resource Conservation Areas.
- b. To determine if the 50 percent rule has been met, a survey of the existing parcels in each Rural Market Area, as described in Policy 3.B.3 and shown in Figure 3-1, will need to be conducted. If 50 percent or more of the existing lots are developed, then the land division may be processed.
- c. The Land Use Diagram designates the minimum lot size for parcels in each planning area. As these minimum lot sizes are reflective of the average size of lots in each area, the minimum lot size designated for the land use classification that the land division is proposed establishes the average size. ☞ *ND I.D.2.*

~~3.B.6.~~ **3.B.8.** For purposes of implementing the rural land division criteria described in Policy ~~3.B.5.~~ **3.B.7.**, the County has established five Rural Market Areas within the coastal zone that contain geographic areas of similar physical characteristics, land uses, and planning issues. These areas (shown on Figure 3-1) are as follows:

1. North Coastal Rural Area (Area 1): This area lies from Ship Ashore at the mouth of the Smith River north to the Oregon border.
2. Smith River Rural Area (Area 2): This area is located south of the mouth of the Smith River, north of Morehead Road, west of Highway 101, and east of the ocean.
3. Lake Earl Drive Rural Area (Area 3): Generally, all of these lands lie west of the Lake Earl Drive and south of Morehead Road. The southerly limit bounds the urban area, including Northcrest Incorporated, and the area also extends eastward of Lake Earl Drive at Jordan Creek.
4. Crescent City Rural Area (Area 4): Included within this area are the developing areas outside the urban boundary, including Parkway Drive, Elk Valley Road, Point St. George, and the Humboldt Road/Highway 101 areas.
5. Klamath Rural Area (Area 5): This area consists of the Klamath area from the Humboldt County line north throughout the Redwood National Park and Del Norte Coast Redwood State Park. ☞ *ND I.J.*

~~3.B.7.~~ **3.B.9.** ~~In that timber and agricultural uses do not necessarily require a residence for their primary use, the County shall not apply the 50 percent buildout rule on timberland and agricultural land.~~ ☞ *ND I.D.3. (Revised)*

~~Existing Implementation Programs:~~

~~Subdivision Ordinance~~

~~Wells and Preservation of Ground Water Ordinance~~

~~Onsite Sewage Disposal Systems Ordinance~~

~~New Implementation Programs:~~

~~Existing programs are deemed sufficient.~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

**3.C INTEGRATED LAND USE, TRANSPORTATION, AND AIR QUALITY PUBLIC FACILITY PLANNING**

**Goals**

**Goal 3.C.1.** To integrate land use planning, **and** transportation planning, ~~and air quality planning~~ to make the most efficient use of public resources and to create a healthier and more livable environment.

~~Goal 3.D~~ **3.C.2.** To ~~discourage~~ **encourage appropriate** public land acquisition that ~~may~~ **would not** adversely affect agricultural production activities, **adversely cumulatively** reduce the County’s tax base, and/or result in ~~unnecessary~~ **additional commitment** **and** expenditure of public funds to acquire, maintain, and develop additional land for public use. [Revised, relocated from *PUBLIC ACQUISITION OF PRIVATE LAND – Goals*]

~~Goal 5.b~~ **3.C.3.** To encourage the protection, the use, and the promotion of State- and Federally-owned beaches, forests, rivers, streams, wetlands, estuaries, and cultural resources for the education and enjoyment of Del Norte County residents and visitors.  (New) [Relocated from *Section 5: RECREATIONAL AND CULTURAL RESOURCES - STATE AND FEDERAL LANDS – Goals*]

**Policies**

3.C.1. The County shall consider air quality when planning the land uses and transportation systems to accommodate the expected growth in the county.

 (New)

3.C.2. The County shall ensure that all County submittals of transportation improvement projects to be included in regional transportation plans (RTP, RTIP, CMP, etc.) are consistent with the air quality goals and policies of the General Plan.

 (New)

3.C.3. ~~The County shall consult with transit providers to determine~~ **New development shall evaluate** project impacts on long range transit plans and to ensure that impacts are mitigated.  (New)

*Compact Urban Development*

3.C.4. ~~The County shall continue to~~ **Otherwise permissible** ~~allow~~ non-intensive Neighborhood Commercial uses **shall be directed to**. ~~Such uses~~ **locations** which are deemed compatible with the neighborhood provide local services and thereby reduce vehicular ~~movements~~ **miles traveled**.  (New)

~~3.C.2.~~ **3.C.5** ~~The County shall provide for an orderly outward expansion of~~ New urban development ~~so that it is~~ **shall be** contiguous with existing development and district boundaries, allowing **ing** for the incremental expansion of infrastructure and public services, and minimizing **ing** impacts on the environment.  (New)

~~3.C.3.~~ **3.C.6** ~~The County shall encourage~~ Infill of vacant parcels in otherwise-developed urban areas **shall be encouraged**.  (New)

~~3.C.4.~~ **3.C.7** ~~The County shall encourage~~ Infill within urban areas that will improve the effectiveness of the transit system and will not adversely affect existing development **shall be encouraged**.  (New)

~~3.C.5.~~ **3.C.8** The County shall continue to clearly distinguish between urban and rural areas through the policies and land use designations of this General Plan.  (New)

*Site Design*

3.C.9. ~~The County shall encourage project sites~~ **Development** within an urban boundary ~~to~~ **shall** be designed to increase the convenience, safety and comfort of people using public transportation, walking, or cycling.  (New)

~~Existing Implementation Programs:~~

- ~~● Environment Ordinance/CEQA~~
- ~~● LTCO Regional Transportation Plan~~
- ~~● "NC" Zoning Ordinance~~
- ~~● Urban and Rural Public Road Standards Ordinance~~
- ~~● General Plan~~

~~New Implementation Programs:~~

~~Existing programs are deemed sufficient.~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

Other Initiatives

~~3.D.1.~~ ● The County shall encourage emphasis upon the management and development of existing Federal and State lands pursuant to publicly adopted management plans prior to the acquisition of additional lands for expansion or for new projects. ☞  
 ■ (New) [Relocated from *PUBLIC ACQUISITION OF PRIVATE LAND – Policies*]

~~3.D.3.~~ ● In cases where the State or Federal agencies have an interest in land acquisition in Del Norte County, the County shall encourage development right purchase over fee title purchase for the following reasons:

- a. In many cases the continued (if any) use of a subject area for agricultural purposes can be permitted;
- b. In many cases the watershed (if any) use of a subject area for timber production purposes can be permitted; and
- c. The parcels are continued on the Del Norte County tax rolls at near existing assessed values. ☞ ■ *ND I.G. (Revised)* [Relocated from *PUBLIC ACQUISITION OF PRIVATE LAND – Policies*]

~~3.D.4.~~ ● The following policies shall apply to all acquisitions by a State or Federal agency:

- a. In implementing any and all proposals for expanding recreation or wildlife habitat preservation, the County shall support purchase in fee simple only after all other less costly alternatives have been studied and rejected as inappropriate. Preferred alternatives to fee simple purchase are:
  1. Purchase of Development Rights;
  2. Purchase of Easement;
  3. Preserve Contracts; and
  4. Transfer of Development Rights.
- b. All acquisitions by a State or any federal agency acting in conjunction with the State shall pay an equivalent in-lieu tax to the County equal to the tax revenue yielded by the subject parcel at the time of acquisition and increased each year equal to the applicable County tax rate.
- c. An alternative to the above methods of acquisition is land exchange. ☞  
 ■ *ND I.G.*

[See also ~~Policy 1.E.2~~ **BIOLOGICAL RESOURCES – Onshore Fisheries – Other Initiatives**] [Revised, relocated from *PUBLIC ACQUISITION OF PRIVATE LAND – Policies*]

~~1.E.7.~~ ● The County shall support use of acquisition, lot consolidation, and transfer of development rights to direct development away from sensitive areas (where possible) and to assure protection of private property rights.

- a. Lot Consolidation: Lot consolidation is a procedure by which substandard and/or unbuildable lots are purchased and then merged and resold into lots of suitable size. The revenue from these buildable or useable lots is then

used to purchase other substandard lots. This procedure is rather common in more urban areas and is conducted by both the private and real estate industry and various public agencies. Key questions are need and availability of funds. In our area need can only be ascertained on a case-by-case basis. Funds will have to be provided from sources other than local government. Because of its cost, lot consolidation should be limited to existing subdivided areas.

- b. **Transfer of Development Rights:** Transfer of Development Rights assigns a ratio of acreage to density and allows the consideration of taking an assigned density value for one area and transferring that development right to another location. This allows for the restriction of development in sensitive areas where development is inconsistent with policies of the Local Coastal Program, yet provides the property owner with an option to sell a right to build to owners of land in areas where such development is either consistent with the Local Coastal Program or would be a more appropriate location of such development. The owner does not have to sell this development potential to another owner, but may in fact transfer this density within the parcel or to another parcel of his/her ownership.

☞ **ND I.H.**

**3.F.3.** ●

The present Coast Guard Dock and Station do not allow an immediate view of vessels crossing the entrance bar. The dock locates the cutter in the more congested area of the Harbor, which increases its time to be underway. Construction of personnel quarters and docking facility removed from the congested area of the inner harbor basin should be considered by the Harbor District and the Coast Guard. The dock could be of filled material, which would reduce maintenance and increase available space. The inner side of Whaler Island has been considered as a possible location. ☞ *H HSD.P.3.* [Relocated from *HARBOR DEVELOPMENT – Policies*]

**3.F.4.** ●

With the construction of the Coast Guard Helicopter facility at McKinleyville, a pad facility will be needed in the Harbor area for emergency use. In that this use would be infrequent and not water dependent, the most feasible location, which would allow sufficient room, reduce hazards to landing and take off, and be of reasonable cost, would be east of Highway 101. ☞ *H HSD.P.4.* [Relocated from *HARBOR DEVELOPMENT – Policies*]

**5.B.4.** ●

The County supports the development of the private visitor-serving commercial area adjacent to Pelican State Beach and encourages coordination between private property owners, the County, and State agencies in addressing mutually beneficial access, signage, and/or landscaping programs. ☞ *(New)* [Relocated from *Section 5: RECREATIONAL AND CULTURAL RESOURCES - STATE AND FEDERAL LANDS – Policies*]

**5.B.5.** ●

The County shall ensure that beach development consider existing uses in the area (residential, visitor-serving and public) so that potential conflicts are minimized and existing qualities maintained. ☞ *R.IV.B.2.* [Relocated from *Section 5:*

**RECREATIONAL AND CULTURAL RESOURCES - STATE AND FEDERAL LANDS – Policies]**

- ~~5.B.9.~~** ● The County shall continue to encourage Department of Fish and Game to officially adopt a publicly reviewed Management Plan for the Lake Earl Wildlife Area. Such a plan should include not only wildlife management, but also the development and promotion of taxpayer, resident, and visitor use for educational and enjoyment purposes, and the safety of the community. ☞ (New) [Relocated from *Section 5: RECREATIONAL AND CULTURAL RESOURCES - STATE AND FEDERAL LANDS – Policies*]
- ~~5.B.13.~~** ● The County shall encourage the State to provide the following types of recreational facilities at and near Lakes Earl and Talawa:
1. Day-use facilities, at more than one location;
  2. Expanded trail access with adequate parking areas;
  3. Signs indicating appropriate access points;
  4. Lateral trail access along the ocean shoreline and the Lakes within State-owned lands; and
  5. Overnight facilities adjacent to the Lakes and/or the ocean shoreline in at least one location. ☞ R.VI.G.3. [Relocated from *Section 5: RECREATIONAL AND CULTURAL RESOURCES - STATE AND FEDERAL LANDS – Policies*]
- ~~5.B.22.~~** ● The County shall encourage the State to provide an improved visitor-serving facility at the Nor-Cal site adjacent to Dead Lake. Improved access shall be provided for the public to the dunes and to the shoreline. ☞ LU III.D.21. [Relocated from *Section 5: RECREATIONAL AND CULTURAL RESOURCES - STATE AND FEDERAL LANDS – Policies*]
- ~~5.B.35.~~** ● The County shall encourage Redwood National and State Parks to manage the parks and encourage protection, use, and promotion of the parks for visitor education and enjoyment, pursuant to its adopted Management Plan (1999). ☞ ■ (New) [Relocated from *Section 5: RECREATIONAL AND CULTURAL RESOURCES - STATE AND FEDERAL LANDS – Policies*]
- ~~5.B.38.~~** ● The County supports the development of private visitor-serving commercial areas that are focused within or adjacent to the parks (e.g., ~~Hiouchi, North Bank Road/Tan Oak, Westlog, Harbor/South Beach, and the Trees of Mystery/Woodland Villa~~). The County encourages coordination among private property owners and County, State and Federal agencies in addressing mutually beneficial access, signage, or landscaping programs. ☞ ■ (New) [Revised, relocated from *Section 5: RECREATIONAL AND CULTURAL RESOURCES - STATE AND FEDERAL LANDS – Policies*]

~~**PUBLIC ACQUISITION OF PRIVATE LAND**~~ [Merged with Sub-section 3.C  
*INTEGRATED LAND USE, TRANSPORTATION, AND AIR QUALITY PLANNING*]

~~**Goal 3.D.**~~ ~~To discourage public land acquisition that may adversely affect agricultural production activities, reduce the County's tax base, and/or result in unneeded expenditure of public funds to acquire, maintain, and develop additional land for public use.~~ [Revised, moved to *INTEGRATED LAND USE, TRANSPORTATION, AND PUBLIC FACILITY PLANNING – Goals*]

**Policies**

~~**3.D.1.**~~ ~~The County shall encourage emphasis upon the management and development of existing Federal and State lands pursuant to publicly adopted management plans prior to the acquisition of additional lands for expansion or for new projects.~~ ~~☞ █ (New)~~ [Moved to *INTEGRATED LAND USE, TRANSPORTATION, AND PUBLIC FACILITY PLANNING – Other Initiatives*]

~~**3.D.2.**~~ ~~This policy number left intentionally blank.~~

~~**3.D.3.**~~ ~~In cases where the State or Federal agencies have an interest in land acquisition in Del Norte County, the County shall encourage development right purchase over fee title purchase for the following reasons:~~

- ~~a.~~ ~~In many cases the continued (if any) use of a subject area for agricultural purposes can be permitted;~~
- ~~b.~~ ~~In many cases the watershed (if any) use of a subject area for timber production purposes can be permitted; and~~
- ~~c.~~ ~~The parcels are continued on the Del Norte County tax rolls at near existing assessed values.~~ ~~☞ █ ND I.G. (Revised)~~ [Moved to *INTEGRATED LAND USE, TRANSPORTATION, AND PUBLIC FACILITY PLANNING – Other Initiatives*]

~~**3.D.4.**~~ ~~The following policies shall apply to all acquisitions by a State or Federal agency:~~

- ~~a.~~ ~~In implementing any and all proposals for expanding recreation or wildlife habitat preservation, the County shall support purchase in fee simple only after all other less costly alternatives have been studied and rejected as inappropriate. Preferred alternatives to fee simple purchase are:~~
  - ~~5.~~ ~~Purchase of Development Rights;~~
  - ~~6.~~ ~~Purchase of Easement;~~
  - ~~7.~~ ~~Preserve Contracts; and~~
  - ~~8.~~ ~~Transfer of Development Rights.~~
- ~~b.~~ ~~All acquisitions by a State or any federal agency acting in conjunction with the State shall pay an equivalent in lieu tax to the County equal~~

~~to the tax revenue yielded by the subject parcel at the time of acquisition and increased each year equal to the applicable County tax rate.~~

~~e. An alternative to the above methods of acquisition is land exchange.~~

~~NDIG.~~

~~[See also Policy 1.E.2] [Moved to INTEGRATED LAND USE, TRANSPORTATION, AND PUBLIC FACILITY PLANNING – Other Initiatives]~~

**Implementation Programs**

~~Policy statements only.~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

**3.D COASTAL DEPENDENT, COASTAL-RELATED, AND ECONOMIC DEVELOPMENT**

**Goals**

**Goal 3.D.1 To establish procedures for ensuring that adequate sites are reserved and protected for coastal-dependent development types or uses which require siting on or adjacent to the sea to be able to function at all, and related support facilities.**

~~Goal 3.E.3.D.2.~~ To maintain a healthy and diverse local economy that meets the present and future employment, shopping, recreational, public safety, and service needs of Del Norte County residents and to expand the economic base to better serve the needs of residents.

**Policies**

~~3.E.1. The County shall encourage the retention, expansion, and development of new businesses that provide jobs by designating land in areas where public facilities and services can accommodate employment generators.~~ (New)

~~3.E.2. The County shall promote economic expansion based on Del Norte County's unique recreational opportunities and natural resources.~~ (New)

~~3.E.3. The County shall encourage the retention, expansion and development of agricultural businesses including small businesses such as greenhouse uses, small animal and equestrian activities, and specialty product production.~~ (New)

- ~~3.E.4. The County shall endeavor to protect the natural resources upon which a part of the county's economy (e.g., recreation, forestry, agriculture, mining, and tourism) is dependent.~~ (New)
- ~~3.E.5. The County shall continue to encourage coordination of its economic development efforts the City of Crescent City, the Economic Development Corporation, the Harbor District, and other economic development organizations.~~ (New)
- ~~3.E.6. The County shall actively and regularly solicit the views of the business community in matters affecting Del Norte County's economic climate and development.~~ (New)
- ~~3.E.7. 3.D.1. The County shall prohibit Residential or other incompatible uses which could have an adverse impact on the continued viability of existing coastal-dependent and coastal related industrial development shall be prohibited. When possible, Non-conforming residential uses in industrially designated areas shall be discouraged and not allowed to expand. (ID III.7.~~
- ~~3.E.8. 3.D.2. The County shall designate specific areas suitable for coastal-dependent and coastal related industrial development and reserve such lands in a range of parcel sizes to accommodate a variety of such industrial uses. (New)~~
- ~~3.E.9. 3.D.3. Since almost all of the industrially designated lands in Del Norte County are within the Coastal Zone, the County shall not limit industrial areas to coastal dependent or related uses except Except in the harbor area, the County may allow development of coastal-independent and coastal-nonrelated industrial development at shoreline and shoreline proximate sites provided it can be factually demonstrated that an adequate land inventory exists for development of coastal-dependent and coastal-related uses to meet current and projected future demand for such. (ID IV.~~
- ~~3.E.10. 3.D.4. In the Coastal Zone, the County finds that coastal dependent uses are a. Industrial or heavy commercial located within or nearby the harbor and b. Visitor serving facilities located along the rivers, shoreline, and the sea and its extensions. Coastal-dependent development shall have priority over other developments on or near the shoreline. When appropriate, coastal-related developments shall be accommodated within reasonable proximity to the coastal-dependent uses they support. (NDI.F. (Revised)~~
- ~~3.E.11. The County shall provide opportunities for home businesses such as home occupations (non-intensive, resident only businesses), home enterprise (limited employee, low intensity businesses), residential and community care facilities (as defined in the California Health and Safety Code for residential use), and guest lodging (small bed and breakfasts accessory to residential use). (New)~~

~~3.E.12.~~ 3.D.6. The County ~~encourages~~ shall designate sites for the maintenance and development of existing and potential commercial and public visitor activities and services in the following commercial areas, which are recognized for their historic and potential visitor use:

- Highway 101 at Pelican Beach State Park; 
- Ship Ashore/Mouth of Smith River Road; 
- Highway 101 at Crescent City Harbor/South Beach; 
- Highway 101 at Klamath riverfront; and 
- Requa; and; 

3.E.13. The County further encourages the private development of visitor-serving facilities and supports private/public partnerships that build such facilities or that facilitate visitor activities.  (New)

#### Other New Initiatives

3.E.1. The County shall encourage the retention, expansion, and development of new businesses that provide jobs by designating land in areas where public facilities and services can accommodate employment generators.  (New)

3.E.2. The County shall promote economic expansion based on Del Norte County's unique recreational opportunities and natural resources.  (New)

3.E.3. The County shall encourage the retention, expansion and development of agricultural businesses including small businesses such as greenhouse uses, small animal and equestrian activities, and specialty product production.  (New)

3.E.4. The County shall endeavor to protect the natural resources upon which a part of the county's economy (e.g., recreation, forestry, agriculture, mining, and tourism) is dependent.  (New)

3.E.5. The County shall continue to encourage coordination of its economic development efforts the City of Crescent City, the Economic Development Corporation, the Harbor District, and other economic development organizations.  (New)

3.E.6. The County shall actively and regularly solicit the views of the business community in matters affecting Del Norte County's economic climate and development.  (New)

- 3.E.11.** The County shall provide opportunities for home businesses such as home occupations (non-intensive, resident only businesses), home enterprise (limited-employee, low-intensity businesses), residential and community care facilities (as defined in the California Health and Safety Code for residential use), and guest lodging (small bed-and-breakfasts accessory to residential use).  (New)

#### ~~Existing Implementation Programs:~~

- ~~• Economic Development Plan~~
- ~~• General Plan~~
- ~~• Zoning Ordinances~~

#### ~~New Implementation Programs:~~

~~Existing programs are deemed sufficient.~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

### 3.E HARBOR DEVELOPMENT

#### Goals

- ~~Goal 3.F.3.E.1.~~ **3.E.1.** To address specific development and access issues for continued operation of the Crescent City Harbor.

#### Policies

- ~~3.F.1. The County, City, and Harbor District should continue to petition appropriate Federal and State agencies to accelerate the study of littoral sand movement and its relationship to harbor sanding, beach sand replenishment, and coastal bluff erosion (north of Battery Point).  H HSD.P.1.~~ [Moved to HARBOR DEVELOPMENT – Other Initiatives]

- ~~3.F.2. The Harbor District, City and County should apply for assistance in evaluation the cost-benefit ratio of an extension of the breakwater system in relationship not only to tonnage shipped from the harbor, but also in protecting the substantial investment in local, State, and Federal agencies.  H HSD.P.2.~~ [Moved to HARBOR DEVELOPMENT – Other Initiatives]

- ~~3.F.3. The present Coast Guard Dock and Station do not allow an immediate view of vessels crossing the entrance bar. The dock locates the cutter in the more congested area of the Harbor, which increases its time to be underway. Construction of personnel quarters and docking facility removed from the congested area of the inner harbor basin should be considered by the Harbor District and the Coast Guard. The dock could be of filled material, which would reduce maintenance and increase available space. The inner side of Whaler Island has been considered as a possible location.  H HSD.P.3.~~

[Moved to *INTEGRATED LAND USE, TRANSPORTATION, AND PUBLIC FACILITY PLANNING – Other Initiatives*]

~~3.F.4. With the construction of the Coast Guard Helicopter facility at McKinleyville, a pad facility will be needed in the Harbor area for emergency use. In that this use would be infrequent and not water dependent, the most feasible location, which would allow sufficient room, reduce hazards to landing and take off, and be of reasonable cost, would be east of Highway 101.  *H HSD.P.4.* [Moved to *INTEGRATED LAND USE, TRANSPORTATION, AND PUBLIC FACILITY PLANNING – Other Initiatives*]~~

~~3.F.5. 3.E.1. The wooden construction of Citizens' Dock is expensive to maintain, and costly to insure, and impacts coastal biological resources by the leaching of wood preservatives. Consideration and study should be given to replacing To the maximum extent feasible, the wooden structure shall be replaced with decking, stringers, floats, bumpers, and piers composed of aggregate fill concrete, metal, polymer, ceramics, or other inert, durable, UV- and salt-resistant materials suitable for submerged marine applications. Investigation into the effects of a solid fill would be necessary prior to construction to examine the effects upon currents and sand accretion, and provide for proper design.  *H HSD.P.5.*~~

~~3.F.6. Primary to the ability of the Harbor to function as a port is the maintenance of proper depths within the Harbor. The littoral drift of sand has been interrupted by the construction of the Harbor breakwaters. A study of the Harbor estimates that 80,000 cubic yards per year accumulate within the Harbor of which only 463,500 cubic yards of sand have been removed by the Army Corps of Engineers since 1936. Lack of proper maintenance dredging has discouraged shipment. The Harbor District, City and County should continue to press the Corps of Engineers to fulfill their maintenance obligations for the Harbor depth.  *H HA.P.6* [Moved to *HARBOR DEVELOPMENT – Other Initiatives*]~~

~~3.F.7. The reoccurrence of barge shipments of lumber has strong potential. Increasing cost of fuel and legislation, which is encouraging conservation of fuel are strong influences in the use of water transportation. The instability of governments in the African nations, which supply chrome ore, creates the possibility of the revitalization of chrome ore mining in the county. Waterborne transportation would be the cheapest method of transporting unrefined ore. Present barge use consists of petroleum shipments; however, due to the lack of sufficient depth the barges arrive with only half capacity loads. The Harbor should not allow any development, which would preclude resumption of barge shipping.  *H HA.P.7.* [Struck as redundant with *COASTAL-DEPENDENT, COASTAL-RELATED, AND ECONOMIC DEVELOPMENT Policy 3.D.4*]~~

- ~~3.F.8. 3.E.2.~~ Of the remaining available Harbor frontage within the unincorporated areas subject to County land use regulation, ~~Chamberlain Dock area and the beach strand~~ area between the boat basin and Shoreline Campground ~~should shall~~ be reserved for water dependent recreational development and uses. ~~These sites could be used for temporary, readily removed, uses prior to actual development.~~ ☞ ~~H HA.P.8.~~ [Revised to reflect bi-jurisdictional status of area and current conditions: Chamberlain Dock was razed in mid-1980s]
- ~~3.F.9.~~ ~~The City should improve access to the Harbor by cooperating with the Harbor in extending Howe Drive across Elk Creek to the boat basin, or explore other alternatives as the need arises.~~ ☞ ~~H HA.P.9.~~ [Struck as vertically inconsistent with PRC 30233: impermissible use for fill of coastal waters]
- ~~3.F.10.~~ ~~Harbor expansion east of Highway 101, which will increase cross traffic at Citizens' Dock Road and Highway 101. Improvements in traffic control should be requested from Caltrans.~~ ☞ ~~H HA.P.10.~~ [Moved to Part II, Section 8 *TRANSPORTATION AND CIRCULATION – County Roads – Other Initiatives*]
- ~~3.F.11.~~ ~~The continuing development and expansion of the Harbor should seek to satisfy as reasonably as possible all commercial, recreational and public demands. In planning for the limited area of the Harbor, the plan should consider reserving portions of the Harbor area and its expansion area in the following three categories:~~ ☞ ~~H HD.P.11.~~
- ~~Harbor Dependent~~ ~~Those activities which would require immediate access to the Harbor waters.~~
- ~~Harbor Related~~ ~~Activities which are dependent in some way upon a Harbor location.~~
- ~~Harbor Consistent~~ ~~Activities which would benefit from a Harbor location and would enhance the overall viability of the Harbor.~~ ☞ ~~H HD.P.11.~~ [Struck as vertically inconsistent with PRC 30101, 30101.3, 30222, 30222.5, 30224, 30255; horizontally inconsistent with *LAND USE DESIGNATIONS* (HD, HDC, HDR, HR) provisions]
- ~~3.F.12.~~ ~~The Harbor should develop design criteria for new construction in the Harbor, specifically in regards to establishing a motif for commercial activities.~~ ☞ ~~H HD.P.12.~~ [Moved to *HARBOR DEVELOPMENT – Other Initiatives*]
- ~~3.F.13.~~ ~~The County, City and Harbor District should continue to effectively plan and coordinate for the overall development of the Harbor and its adjacent land.~~ ☞ ~~H HD.P.13.~~ [Moved to *HARBOR DEVELOPMENT – Other Initiatives*]
- ~~3.F.14.~~ ~~The County in conjunction with the Harbor District and City of Crescent City shall ensure that the portion of the harbor identified as environmentally~~

~~sensitive habitat areas shall be protected from any significant disruption of habitat values. Any development proposed adjacent to such identified areas shall be compatible with such habitat areas. H-ESHA.P.1. (Revised) ☞~~  
 [Moved to HARBOR DEVELOPMENT – Other Initiatives]

~~1. Public Access~~ Public Access

~~3.E.3. The Harbor District shall not permit any~~ Development within ~~their jurisdiction that would~~ the harbor shall not impair the public's right to vertical access to and lateral access along the shoreline. ~~The exception being except~~ where access would constitute a hazard to the public. Specific examples being:

- a. Synchro-lift boat repair facility
- b. The existing and designated fish processing plants
- c. The existing and proposed fish buying stations ☞ CCZCC.1.

[See also Policy 5.E.1]

~~2. Water and Marine Resources~~ Water and Marine Resources

~~3.E.4. The Harbor District shall ensure that any All future~~ development ~~that takes place within its jurisdiction shall~~ be the least environmentally damaging development feasibly possible. ~~Any project~~ The environmental impacts of all projects shall be mitigated to the maximum extent possible feasible and ~~should shall~~ not be located in such a way that would seriously impact the water and marine resources of the harbor. The marine resources that exist within the harbor shall be specifically identified in the land use plan and these and any additional resources discovered shall be protected ~~under these~~ consistent with all policies and standards of the certified LCP. ☞ CCZCC.2.  
[See also Policies 1.A.1, 1.A.2, 1.A.3, 1.B.1 through 1.B.10, 1.B.12, 1.B.13, 1.B.17 through 1.B.20, 1.B.26 through 1.B.30]

~~3. Diking, Dredging, Filling and Shoreline Structures~~ Diking, Dredging, Filling and Shoreline Structures

~~3.E.5. The Harbor District shall only allow the~~ Diking, dredging and filling of harbor lands ~~within their boundary for~~ may only be permitted for those uses consistent with Sections 30233 and 30607.1 of the California Coastal Act and ~~their the~~ adopted local coastal program. All projects shall take place in the least environmentally damaging feasible site and only after all feasible mitigation measures have been assured.

[See also Policy 1.B.22]

~~The Harbor District and County of Del Norte in coastal commission staff and Department of Fish and Game shall develop a sand management program for the dispersal of sand on the beach area west of Seaside Hospital. Any plan shall include, but not limited to, amount of sand to be placed yearly, months of the year when placement is possible, hours of operation and the need for annual sand budget. The parties involved should also work~~

~~with the City of Crescent City and Seaside Hospital when developing this plan. CCZCC.3.~~ [Revised, moved to *HARBOR DEVELOPMENT – Other Initiatives*]

~~4. Environmentally Sensitive Habitat Areas~~ *Environmentally Sensitive Habitat Areas*

~~3.E.6. The portion of the harbor identifies, as~~ Environmentally sensitive habitat areas within the harbor shall be protected from any significant disruption of habitat values. Any development proposed adjacent to such identified areas shall be compatible with such habitat areas. CCZCC.4.  
[See also Policies 1.A.1 through 1.A.3, 1.B.1, and 1.B.2]

~~5. Hazard Areas~~ *Hazard Areas*

~~3.E.7. As to specific policies and findings, All development within the portions of the harbor district, as well as Crescent City, will be bound by~~ subject to County jurisdiction shall conform with the policies and standards ~~developed by set forth in~~ Del Norte County's land use plan seismic safety and safety element. ~~This element of the County's land use plan will develop specific hazard policies.~~ CCZCC.5.

~~6. Visual Resources/Special Communities~~ *Visual Resources/Special Communities*

a) ~~3.E.8.~~ Whaler Island – The Island ~~remains as is~~ is a primary recreation area and shall remain undeveloped. The exceptions would be that part of the inner harbor area designated #38, “Coast Guard compound & dock,” on the Port Land Use Plan. ~~It is staff's recommendation that~~ The adjoining item #37, “Parking,” shall be deleted and relocated ~~on~~ southeasterly onto the land side of Whaler's Island being that area which has been quarried and partially leveled.

b) ~~3.E.9.~~ Greenery Strip between Small Boat Basin and Highway 101 – The area shall be designated Greenery ~~Strip~~ and Harbor Dependent, ~~and that the~~ The area shall be the last portion of the harbor land area to be developed to a harbor-pendent use. In the interim period, the area ~~should~~ shall be utilized as a day use only, public recreational zone with ~~little or no~~ minimal alteration to existing landforms. ~~The principal land uses for harbor dependant will be developed during Phase III, Zoning and Implementation.~~

~~7. Public Works~~ *Public Works*

~~3.E.10.~~ As the treatment facility that serves the harbor district has only limited capacity, ~~the~~ coastal (harbor) dependent uses shall have priority over any other type of development within the harbor district's boundaries. ~~The Treatment capacity at the proposed wastewater facility, if constructed, shall first be restricted to reserved, in descending order of priority, for: (1) coastal (harbor) dependent; (2) harbor dependent commercial; (3) harbor related dependent recreational uses; and (4) harbor dependent recreational related uses. and related developments .~~

~~Existing Implementation Programs:~~

- ~~Harbor Zoning Ordinances~~
- ~~Environment Ordinance/CEQA~~

~~New Implementation Programs:~~

~~Existing programs are deemed sufficient.~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

Other Initiatives

- ~~3.F.1.~~ ● The County, City, and Harbor District should continue to petition appropriate Federal and State agencies to accelerate the study of littoral sand movement and its relationship to harbor sanding, beach sand replenishment, and coastal bluff erosion (north of Battery Point). ☞ *H HSD.P.1.*
- ~~3.F.2.~~ ● The Harbor District, City and County should apply for assistance in evaluation the cost-benefit ratio of an extension of the breakwater system in relationship not only to tonnage shipped from the harbor, but also in protecting the substantial investment in local, State, and Federal agencies. ☞ *H HSD.P.2.*
- ~~3.F.6.~~ ● Primary to the ability of the Harbor to function as a port is the maintenance of proper depths with in the Harbor. The littoral drift of sand has been interrupted by the construction of the Harbor breakwaters. A study of the Harbor estimates that 80,000 cubic yards per year accumulate within the Harbor of which only 463,500 cubic yards of sand have been removed by the Army Corps of Engineers since 1936. Lack of proper maintenance dredging has discouraged shipment. The Harbor District, City and County should continue to press the Corps of Engineers to fulfill their maintenance obligations for the Harbor depth. ☞ *H HA.P.6*
- ~~3.F.12.~~ ● The Harbor should develop design criteria for new construction in the Harbor, specifically in regards to establishing a motif for commercial activities. ☞ *H HD.P.12.*
- ~~3.F.13.~~ ● The County, City and Harbor District should continue to effectively plan and coordinate for the overall development of the Harbor and its adjacent land. ☞ *H HD.P.13.*
- ~~3.F.14.~~ ● The County in conjunction with the Harbor District and City of Crescent City shall ensure that ~~the portion of the harbor identified as~~ environmentally sensitive habitat areas ~~shall be~~ within the harbor are protected from any significant disruption of habitat values. Any development proposed adjacent to such identified areas shall be compatible with such habitat areas. *H ESHA.P.1.* (Revised) ☞

- ~~The Harbor District and County of Del Norte, in conjunction with~~ coordination and consultation with coastal commission the City of Crescent City, Coastal Commission, State Lands Commission, staff and Department of Fish and Game, U.S. Army Corps of Engineers, U.S. Fish and Wildlife Service, U.S. Environmental Protection Agency, and National Oceanographic and Atmospheric Administration, shall develop a ~~sand sediment~~ sand sediment management program for the ~~dispersal disposal and reuse of sand dredged sediments on the beach area west of Seaside Hospital. Any~~ The plan shall include, but not limited to: ~~amount of sand to be placed yearly, months of the year when placement is possible, hours of operation and the need for annual sand budget.~~
- Screening criteria for assessment of dredged sediments to determine their appropriateness for reuse in beach nourishment programs, as fill for road base and other construction or landscaping applications, and materials which, due to their physical composition or the presence of elevated levels of contaminants, must be disposed of at appropriate confined on-land or unconfined open ocean disposal facilities;
- Identification of appropriate sites for nearshore beach replenishment reuse (e.g., South Beach, beach cove behind Hampton Inns and Suites);
- Performance standards and mitigation measures (i.e., discharge rates, methods, scheduling parameters, etc.) for ensuring that the application of sediment materials determined suitable for reuse in beach nourishment programs do not significantly impact coastal resources;
- Monitoring provisions and adaptive management prescriptions for ensuring that reuse sediments do not significantly alter the bathymetry and geomorphology of receiving waters and beach strand areas.

The ~~parties involved should plan shall~~ also work with the City of Crescent City and Seaside Hospital when developing this plan include provisions for seeking input from and providing notice to adjoining landowners and residents of disposal sites. ☞ CCZCC.3.

- ~~5.D.11.~~ • The County supports the continued development of day use, trail, recreational boating, and related visitor-serving uses at the Crescent City Harbor and encourages the Harbor District to coordinate and participate with local and State agencies for the provision of connecting access trails and facilities. ☞ (New) [Relocated from Section 5: RECREATIONAL AND CULTURAL RESOURCES – COASTAL ZONE RECREATION – Policies]

### 3.G CRESCENT CITY SUBAREA RECOMMENDATIONS SPECIFIC POLICIES

#### Goals

**Goal 3.G.1.** To address additional specific land use and development issues of the Crescent City subarea.

### Policies

3.G.1. The County Airport (McNamara Field) shall continue to provide aircraft facilities (commercial and private), at this location as its primary use. Auxiliary uses may include storage of aircraft, light industrial and commercial activities directly related to aircraft activities. Other light industrial uses **functionally requiring airport siting** may be allowed subject to the issuance of a conditional use permit.

☞ *LU III.D.1.*

[See also Policies ~~6.A.8.~~ **6.A.6.** and 8.F.1. to 8.F.7.]

3.G.2. The development of the Okeon parcels on Inyo (AP#120-020-31, 33) shall be a combination of single-family homes and multiple family dwellings with areas designated as resource conservation area for Marhoffer Creek and its drainage area. The clustering of units **pursuant to the provisions for planned communities or special building sites** shall have priority and the ~~drainage~~ **biological resources** of Marhoffer Creek shall be maintained **and enhanced, where feasible,** as part of any development on the subject parcels. ☞ *LU III.D.5 (Revised)*

3.G.3. The small family business (assessors parcel number (APN ~~110-300-09~~ **110-300-\_\_\_**), on Elk Valley Road has existed as a historical commercial/light industrial use with no physical impacts on the surrounding lands. The continued use of the light industrial facility shall be permitted. However, the residential use of the parcel may be separated from the plant site on a parcel of not less than one acre in size. ☞ *LU III.D.18*

~~3.G.4. The County shall continue to pursue funding, other assistance, or direct action to consolidate lots to provide the continued maintenance of wetland values while retaining private ownerships. Areas of priority shall be:~~

- ~~• Northerly portion of Crescent Tract #3 (Elk Creek);~~
- ~~• Southerly portion of Dundas Tract (Elk Creek and adjoining pocket wetlands);~~
- ~~• Northerly portions of Crescent Tract #2 (Elk Creek);~~
- ~~• Westerly portion of Crowley Subdivision (Elk Creek);~~
- ~~• The northeast quarter of Harbor View #3 (Elk Creek);~~
- ~~• Overflow areas of Crescent City Manor #2 (Dead Lake);~~
- ~~• Southerly portion Harbor View Tract #2;~~
- ~~• Southerly portion of SE 1/4, NE1/4 of Sec 27 T16N, R1W.; and~~
- ~~• The northerly low areas of the area commonly referred to as the Filkins Tract. ☞ LU III.D.20 [Moved to CRESCENT CITY SUBAREA RECOMMENDATIONS – Other Initiaves]~~

~~3.G.5.~~ **3.G.4.** The four existing residential uses on the west side of Pebble Beach Drive and south of Freeman Street, shall be permitted to continue. The County owned

parcels west of Pebble Beach Drive and south of Washington Boulevard are reserved for public recreational use, road maintenance and slope protection of Pebble Beach Drive. ☞ *LU III.D.6 (Revised)*.

~~3.G.6. This policy number left intentionally blank.~~

~~3.G.7. This policy number left intentionally blank.~~

~~3.G.8. This policy number left intentionally blank.~~

~~3.G.9.~~ 3.G.5. *McNamara Parcel:* The County shall show this parcel, excluding the Vipond Rural Neighborhood extension, at a density of one unit per five acres for the area shown on the County's land use map as one unit per one acre, and the remainder at one unit per twenty acres. ~~It is the intent of the Coastal Commission that Clustering of development should~~ shall be encouraged for all land use designations. It is the intention of the Board of Supervisors of the County of Del Norte, that the wording of this policy shall apply to the entire McNamara parcel as of the Regional Coastal Commission's actions of April 8, 1981, subject to physical development constraints, regardless of future ownership changes of the subject parcel, and including the area designated as one unit per twenty acres. All units on these two areas shall be clustered on the front area (one unit per five acres) totaling a maximum density of thirty-two units. ☞ *LU III.C.15.*

~~3.G.10.~~ 3.G.6. At the time of development of the Wakefield Ranch (APNs 116-020-03, 04, 05 & 040-08, 11 & 17), the County shall require identification of the specific location of the old garbage dumping site so that it may be left undisturbed and clustering of units shall be encouraged to maximize the potential development density of the property. No development of residential or recreational uses on the subject properties shall be approved until such time that all required landfill reclamation and hazardous materials remediation have been completed and "no further action" clearances are obtained from the California Integrated Waste Management Board and the North Coast Regional Water Quality Control Board and/or the Department of Toxic Substances, as applicable. ☞  
(New)

~~[See also Policies 6.A.8. and 8.F.1 to 8.F.7.]~~

#### ~~Existing Implementation Programs:~~

- ~~• Coastal/Special Development Zoning Ordinance~~
- ~~• Grading, Excavating & Filling Ordinance~~
- ~~• Specific parcel General Plan policy statements~~

#### ~~New Implementation Programs:~~

~~Existing programs are deemed sufficient.~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

**Other Initiatives**

**3.G.4.** *The County shall continue to pursue funding, other assistance, or direct action to consolidate lots to provide the continued maintenance of wetland values while retaining private ownerships. Areas of priority shall be:*

- Northerly portion of Crescent Track #3 (Elk Creek);
- Southerly portion of Dundas Tract (Elk Creek and adjoining pocket wetlands);
- Northerly portions of Crescent Tract #2 (Elk Creek);
- Westerly portion of Crowley Subdivision (Elk Creek);
- The northeast quarter of Harbor View #3 (Elk Creek);
- Overflow areas of Crescent City Manor #2 (Dead Lake);
- Southerly portion Harbor View Tract #2;
- Southerly portion of SE 1/4, NE1/4 of Sec 27 T16N, R1W.; and
- The northerly low areas of the area commonly referred to as the Filkins Tract.  LU III.D.20 [Relocated from CRESCENT CITY SUBAREA RECOMMENDATIONS – Policies]

**3.H. SMITH RIVER SUBAREA RECOMMENDATIONS SPECIFIC POLICIES****Goals**

**Goal 3.H.** To address additional specific land use and development issues of the Smith River subarea.

**Policies**

3.H.1. The County shall restrict development on the west-facing slopes adjacent to Ocean View Drive and other Foothill areas to those areas with less than 30 percent slope **through application of slope-density development regulations.**

  LU III.A.2.

3.H.2. The County recognizes the service area of the Smith River Community Services District for community water from the California-Oregon border south to the Smith River. Primary service emphasis is to be the town of Smith River and outlying areas designated for rural residential and commercial uses, including future extension of the rural residential foothill areas south of town. The location of the water sources for this system is consistent with resource land uses. However, any service extension to resource designated lands shall be limited to health and safety relief for existing residences and/or farm labor residences **based upon confirmed significant contamination of private well water sources.** 

 (New)

- 3.H.3. The County shall ~~continue to~~ apply a clustered residential restrictive overlay zone on the Surfbound Subdivision site. The conditions as approved by the Coastal Commission include:
- a. A maximum of 16 units on the site;
  - b. A minimum of 62 acres of open space shall be provided;
  - c. Water diversion from Gilbert Creek for use on the site shall be limited to 22 gallons per minute, however, at all times the site owner shall bypass 150 gallons per minute of natural flow, whichever is lower, to protect fish resources;
  - d. Proof of adequate alternative water sources shall be demonstrated;
  - e. All units shall be clustered and subordinate to the natural environment and viewshed, and all units shall be located on the hillside rather than the flat portion of the site; and
  - f. An adequate agricultural buffer strip, not to be counted in the open space acreage, shall be required. ☞ *LU III.A.9.*
- 3.H.4. ~~The County shall encourage~~ As part of the authorization of any new development or redevelopment of the agricultural-industrial complex on Sarina Road, the County shall require the development to maximize the efficiency of its existing area facilities. This may include, but not be limited to, installation of high-efficiency lighting, space cooling & heating, and cold-storage equipment and off-grid energy generating facilities, utilizing wastewater recovery and recycling systems, and appropriate greenhouse technology. ☞ *LU III.B.3.*
- 3.H.5. ~~The~~ As part of the authorization of the reestablishment of any visitor-serving use or significant improvement to the existing structure, the County shall ~~encourage~~ require the owners of the former fishing equipment and sports store ~~at~~ (“Saxton’s Tackle” (APN 105-050-04), which is surrounded by the County-owned ~~property~~ Smith River Public Fishing Access, to maximize its location at the boat ramp and parking facility. The County shall require a conditional use permit for any franchise- or lease- based use expansion onto County property beyond ~~its~~ the 6,000 square feet of the privately-held parcel. ☞ *LU III.B.4.*
- 3.H.6. The County shall ~~encourage the maintenance and development of~~ protect the existing, and reserve through zoning sites for future potential development, the currently vacant commercial and public visitor activities and services in the Highway 101/Pelican State Beach and Ship Ashore/Mouth of Smith River Road visitor-serving areas. ☞ *(New)*
- 3.H.7. ~~This policy number left intentionally blank. 1.B.4.~~ The ~~County shall~~ continue its policy ~~that the conversion of the~~ conversion of coastal dunes to residential use ~~should~~ shall be ~~discouraged~~ prohibited, recognizing their importance as groundwater recharge areas, barriers to seawater intrusion, and ~~their severe limitation for~~ limitations on development of effective individual sewage effluent treatment and disposal systems. ☞ *COS WR.P.3.*  
[Revised, relocated from Section 1 WATER QUALITY – Policies]

~~3.H.8. This policy number left intentionally blank.~~

~~3.H.9. This policy number left intentionally blank.~~

~~3.H.10.~~ 3.H.7. The Consistent with all other applicable policies and standards of the certified LCP, including biological and water resource protections, the County ~~shall continue to~~ may allow agricultural uses in the floodplain of the Smith River and its adjacent streams. ☞ (New)

~~Existing Implementation Programs:~~

- ~~• Coastal/Special Development Zoning Ordinance~~
- ~~• Grading, Excavating & Filling Ordinance~~
- ~~• Specific parcel General Plan policy statements~~

~~New Implementation Programs:~~

~~Existing programs are deemed sufficient.~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

**3.I FORT DICK/KINGS VALLEY SUBAREA RECOMMENDATIONS SPECIFIC POLICIES**

**Goals**

**Goal 3.I.** To address additional specific land use and development issues of the Ft. Dick/Kings Valley subarea.

**Policies**

3.I.1. The County shall permit the continued use of the five rental structures, containing seven residential units, at the end of Buzzini Road as rentals. The County shall require that the enlargement and/or remodeling of these units ~~be subject to~~ comply with the provisions of County's zoning and ~~subdivision~~ building codes. ~~The County shall permit the subdivision of the property upon which the rental units lie from the remaining parcel as long as the remaining (or larger) parcel is at least 20 acres in size and the smaller parcel is approved for redesignation as a visitor serving use (APNs 106-020-57, 58).~~ ☞ LU III.C.6.

3.I.2. The County ~~recommends that~~ designates the Hunter Ranch (APN 106-020-44, 46), south of Buzzini Road, ~~be designated~~ as prime agricultural land due to its potentially higher productive soils and larger parcel size. ☞ LU III.C.8.

3.I.3. The County shall permit residential development at the Hole Pit parcel (APN 105-260-04) only after closure of the quarry is completed in order to avoid conflicts between new development and daily quarry operations. Utilization of clustered development density shall be encouraged to provide for flexibility around the

quarry/lake site, flood plain areas and access, however transfer of density between any subdivided parcels shall only be permitted where a clustering zoning is applied prior to recordation of any subdivision map. (New)

- 3.I.4. The County designates development of the Westlog mill site (APN 112-020-09) for use of the site as a visitor destination area subject to the following criteria:
- a. The project development shall be oriented to commercial visitor destination resort activities, such as lodge hotel/motel, timeshare, restaurant, retail shops, RV/camping, and/or indoor/outdoor recreation (such as golf or horse stables), with up to 40 permanent residential units additionally provided for under a residential designation as supportive development;
  - b. Prior to any development or subdivision of the property a PC Zone/master plan for development of the property (commercial recreation and residential areas) shall be adopted. The development plan may mix uses within the project however activities shall be clustered in a manner to provide for open areas both within the resort and along the eastern property line boundary with state lands. Lighting shall be located within activity areas and shielded so that it is directed down and away from adjacent properties and open areas;
  - c. The County shall not approve the development of residential or visitor serving uses prior to the closure of the adjacent rock quarry due to potential safety and nuisance problems from daily operations and from blasting;
  - d. The project shall provide its own onsite sewage disposal system; and
  - e. An offer to dedicate public access easement(s) from Elk Valley Road to the Redwood National and State Park Boundary shall be recorded as a part of the project PC Zoning/Master Plan Use Permit. The easement(s) shall provide adequate acres for road, parking and trail head development and the location shall be mutually agreed upon by the property owner/developer, the County, and the Parks. (New)

~~3.I.5, 3.I.3.~~ 3.I.3. The County shall require the provision of a 300-foot structure setback from Lake Earl, as measured from the eight feet lake estuary elevation ~~established by the LEWA Management Plan (1988)~~, to be applied to new parcels created by land divisions approved after December 31, 2000 and on existing parcels lying in proximity to mature trees suitable for raptor nesting, as determined in technical assistance consultations with the California Department of Fish and Game and U.S. Fish and Wildlife Service. (New)

**Suggested Modification No. 6: (Recreation and Cultural Resources Element)**All changes to the *Recreation and Cultural Resources* Element**SECTION 5****RECREATIONAL AND CULTURAL RESOURCES**

This section outlines the County's goals, policies, and programs for the continued development and enhancement of Del Norte County's rich recreational opportunities and cultural assets. The section includes goals, policies, and programs addressing the following subjects:

- **5.A.** County Parks and Recreation;
- **5.B.** State and Federal Lands;
- **5.C.** Recreation Trails;
- **5.D.** Coastal Zone Recreation;
- **5.E.** Coastal Zone Public Access;
- **5.F.** Non-Coastal River Access;
- **5.G.** Private Recreational Facilities and Opportunities; and
- **5.H.** Cultural Resources.

**5.A. County Parks and Recreation**

**Goal 5.A.** To encourage the development and maintenance of existing and new parks and recreational facilities to serve the needs of present and future residents, employees, and visitors.

**Policies**

~~5.A.1. The County shall continue to provide indoor and outdoor parks and recreation program activities directed toward the needs and interest of all county residents and visitors to the county.~~  **REC P.10. (Revised)** [Moved to COUNTY PARKS AND RECREATION – Other Initiatives]

~~5.A.2. The County should strive to provide diverse programs coordinated with the City, the Unified School District, the Harbor District, and the State, Federal, and private agencies.~~  **REC P.11** [Moved to COUNTY PARKS AND RECREATION – Other Initiatives]

~~5.A.3. The County shall encourage its Park and Recreation Commission to review and address the needs for and development of recreational park facilities in~~

~~the communities of Smith River, Hiouchi, Gasquet, Fort Dick, Klamath, and areas of Crescent City.~~  (New) [Moved to COUNTY PARKS AND RECREATION – Other Initiatives]

~~5.A.4. The County shall cooperate with other public agencies to ensure flexibility in the development of park areas and recreational services to respond to changing trends in recreation activities.~~  (New) [Moved to COUNTY PARKS AND RECREATION – Other Initiatives]

~~5.A.5. The County shall ensure that park design is appropriate to the recreational needs and, where feasible, access capabilities of all residents of and visitors to Del Norte County.~~  (New) [Moved to COUNTY PARKS AND RECREATION – Other Initiatives]

~~5.A.6. The County shall encourage public recreational development that compliments the natural features of the area, including the topography, waterways, vegetation, and soil characteristics.~~  (New) [Moved to COUNTY PARKS AND RECREATION – Other Initiatives]

~~5.A.7. Future uses adjacent to the south side of Kamph Park shall mitigate any potential impacts upon the park by such provisions as clustering; on-site recreational improvements; density exchange and open space dedication within the confines of the parcel.~~  ~~R.V.C.3.~~ [Moved to COUNTY PARKS AND RECREATION – Other Initiatives]

~~5.A.8. The County shall encourage public and private park and recreation agencies to acknowledge the natural resource values present at park sites during the design of new facilities.~~  (New) [Moved to COUNTY PARKS AND RECREATION – Other Initiatives]

~~5.A.9. The County shall encourage compatible recreational use of riparian areas along streams and creeks where public access can be balanced with environmental values and private property rights.~~  (New) [Revised and Moved to COUNTY PARKS AND RECREATION – Other Initiatives]

~~5.A.10. The County shall encourage its Park and Recreation Commission to review and address the potential for development or expansion of recreational wildland parks, beaches and/or easements in the Crescent City area at locations such Marhoffer Creek, Elk Creek, Pebble Beach, Pt. St. George,~~

~~and/or South Beach. (C) (New)~~ [Moved to COUNTY PARKS AND RECREATION – Other Initiatives]

~~5.A.11. The County shall continue to support the protection and use of Battery Point and St. George Reef Lighthouses as County parks. (C) (New)~~ [Moved to COUNTY PARKS AND RECREATION – Other Initiatives]

~~5.A.12. The County should seek funding to restore and/or improve facilities at Pebble Beach in disrepair and to revegetate the damaged promontory for recreation use. (C) R.V.I.E.1. (Revised)~~ [Moved to COUNTY PARKS AND RECREATION – Other Initiatives]

~~5.A.13. The County shall support the development of teen activities in the central Crescent City area, near schools, and other entertainment/recreational areas. (C) (New)~~ [Moved to COUNTY PARKS AND RECREATION – Other Initiatives]

~~5.A.14. The County owned lands at Pt. St. George lying west of the airport shall be managed by the County or its designee for the purposes of habitat protection and restoration, cultural resource preservation and interpretation, public access, open space, and safety buffer for the County’s only commercial airport (Jack McNamara Field). A management plan shall be prepared for the property compatible with the purposes listed including agricultural leasing and an interpretive center. Funding for the management plan and implementation of the recommendations of the plan will be sought from a variety of public and private sources. (C) (New)~~ [Struck as outdated policy: The Point Saint George Management Plan was adopted in 2004]

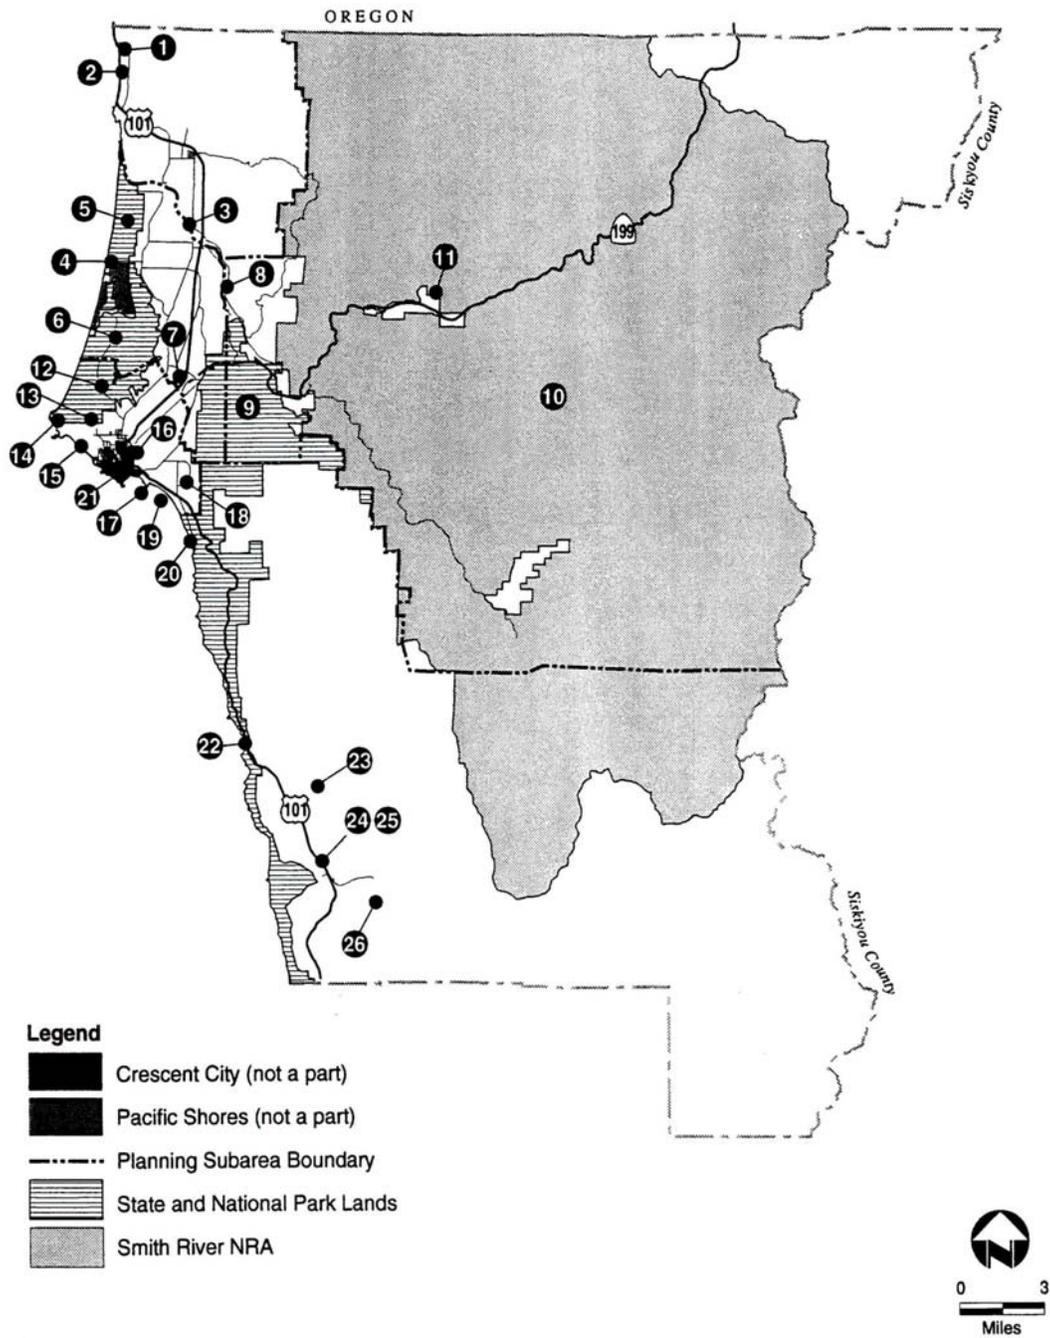

~~5.A.15.~~ 5.A.11. The County shall maintain the recreation areas which the County owns as identified in Table 5-1 and illustrated in Figure 5-1. (C) (New)

TABLE 5-1			
COUNTY RECREATION AREAS			
Del Norte County			
Recreation Area Name	Responsible Agency	Planning Area	Features/Type of Use
1. Pelican State Beach	State of California	Smith River	beach, day use
2. Kamph Memorial Park	Del Norte County	Smith River	day use, Beach access, picnicking, beach combing, surf-fishing
3. Smith River Public Fishing	State of California	Smith River	boating, fishing, day use

Access				
4. Kellogg Beach	Del Norte County	Fort Dick		beach, day use, camping
5. Lake Earl Area - Pala Road	State of California	Fort Dick		hiking, horse camping, river access, wildlife
6. Lake Earl Wildlife Area - Lakes	State of California	Fort Dick		day use camping
7. Florence Keller Regional Park	Del Norte County	Fort Dick		day use
8. Ruby Van Deventer Park	Del Norte County	Smith River Canyons		day use, river beach access
9. Jedediah Smith Redwoods State Park	State of California	Smith River Canyons		day use, fishing, river access, visitor center, kayaking, bicycling, and camping
10. Smith River National Recreation Area	Federal - USFS	Smith River Canyons		day use, fishing, river access, visitor center, kayaking, bicycling, and camping

January 28, 2003

**Other Initiatives**

- 5.A.1. The County shall continue to provide indoor and outdoor parks and recreation program activities directed toward the needs and interest of all county residents and visitors to the county.  ~~REC P.10. (Revised)~~
- 5.A.2. The County should strive to provide diverse programs coordinated with the City, the Unified School District, the Harbor District, and the State, Federal, and private agencies.  ~~REC P.11~~
- 5.A.3. The County shall encourage its Park and Recreation Commission to review and address the needs for and development of recreational park facilities in the communities of Smith River, Hiouchi, Gasquet, Fort Dick, Klamath, and areas of Crescent City.  ~~(New)~~
- 5.A.4. The County shall cooperate with other public agencies to ensure flexibility in the development of park areas and recreational services to respond to changing trends in recreation activities.  ~~(New)~~
- 5.A.5. The County shall ensure that park design is appropriate to the recreational needs and, where feasible, access capabilities of all residents of and visitors to Del Norte County.  ~~(New)~~
- 5.A.6. The County shall encourage public recreational development that compliments the natural features of the area, including the topography, waterways, vegetation, and soil characteristics.  ~~(New)~~
- 5.A.7. Future uses adjacent to the south side of Kamph Park shall mitigate any potential impacts upon the park by such provisions as clustering; on-site recreational improvements; density exchange and open space dedication within the confines of the parcel.  ~~R.V.I.C.3.~~
- 5.A.8. The County shall encourage public and private park and recreation agencies to acknowledge the natural resource values present at park sites during the design of new facilities.  ~~(New)~~
- 5.A.9. ~~The County shall encourage compatible recreational~~ Recreational use of riparian areas along streams and creeks where shall be restricted as necessary to

assure that public access ~~can be~~ is compatibly balanced with environmental values and private property rights. ~~☞~~ (New)

- 5.A.10. The County shall encourage its Park and Recreation Commission to review and address the potential for development or expansion of recreational wildland parks, beaches and/or easements in the Crescent City area at locations such Marhoffer Creek, Elk Creek, Pebble Beach, Pt. St. George, and/or South Beach. ~~☞~~ (New)
- 5.A.11. The County shall continue to support the protection and use of Battery Point and St. George Reef Lighthouses as County parks. ~~☞~~ (New)
- 5.A.12. The County should seek funding to restore and/or improve facilities at Pebble Beach in disrepair and to revegetate the damaged promontory for recreation use. ~~☞~~ R.VI.E.1. (Revised)
- 5.A.13. The County shall support the development of teen activities in the central Crescent City area, near schools, and other entertainment/recreational areas. ~~☞~~ (New)

~~Existing Implementation Programs:~~

- ~~County Parks and Recreation Commission~~
- ~~County Parks and Recreation Plan~~
- ~~Parks Ordinance~~

~~New Implementation Programs:~~

~~5.1 The County shall update the Del Norte County Parks Plan. (Policy 5.A.1.)~~

~~Responsibility: County Parks and Recreation Commission~~

~~Time Frame: First five years~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

5.B. STATE AND FEDERAL LANDS

**Goal 5.B.** To encourage the protection, the use, and the promotion of State- and Federally-owned beaches, forests, rivers, streams, wetlands, estuaries, and cultural resources for the education and enjoyment of Del Norte County residents and visitors. ~~☞~~ (New)

**Policies**

~~5.B.1 The County shall encourage Federal, State, and local agencies currently providing recreation facilities to maintain, at a minimum, and improve, if possible, their current levels of service. ☞ (New) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.2. The County shall encourage the interconnection of pedestrian and bicycle trails between Federal Forest, Park, and Recreation Area lands, State Park lands, State Highway, and County trails. ☞ (New) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

*Pelican State Beach*

~~5.B.3 The County shall encourage the State to maintain Pelican State Beach to include highway signage, parking, and improved pedestrian beach access, and restrict vehicle beach access. ☞ LU III.A.6. [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.4. The County supports the development of the private visitor-serving commercial area adjacent to Pelican State Beach and encourages coordination between private property owners, the County, and State agencies in addressing mutually beneficial access, signage, and/or landscaping programs. ☞ (New) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.5. 5.B.1. The County shall ensure that beach development shall consider existing Existing uses in the area (residential, visitor-serving and public) shall be considered in the permitting of beach development so that potential conflicts are minimized and existing qualities maintained. ☞ R.IV.B.2.~~

~~*Lake Earl Tolowa Dunes State Park at Yontocket*~~

~~5.B.6 The County shall encourage the State to continue to provide public access to the Lake Earl Park Area from Pala Road. Agricultural leasing of the area north of Kellogg Road may relocate or interrupt these access routes to Tolowa Dunes State Park on a seasonal basis. Such changes to the use of land (e.g. introducing grazing to areas without a history of the practice) and/or access to the water constitute development for which a coastal development permit must be secured. ☞ LU III.B.8. (Revised) [Policy bifurcated and revised with portion moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.7 The County shall encourage the State to continue to provide public access northward from Kellogg Road paralleling the beach. Agricultural leasing of the area north of Kellogg Road may relocate or interrupt these access routes Tolowa Dunes State Park on a seasonal basis. Such changes to the use of land (e.g. introducing grazing to areas without a history of the practice) and/or access to the water constitute development for which a coastal development~~

~~permit must be secured. ☞ LU III.B.11.~~ [Policy bifurcated and revised with portion moved to *STATE AND FEDERAL LANDS – Other Initiatives*]

~~5.B.8 The County shall encourage the State to provide improved day-use recreational facilities in the general area of Kellogg Road. ☞ LU III.B.10. [Moved to *STATE AND FEDERAL LANDS – Other Initiatives*]~~

*Lake Earl Wildlife Area*

~~5.B.9. The County shall continue to encourage Department of Fish and Game to officially adopt a publicly reviewed Management Plan for the Lake Earl Wildlife Area. Such a plan should include not only wildlife management, but also the development and promotion of taxpayer, resident, and visitor use for educational and enjoyment purposes, and the safety of the community. ☞ (New) [Moved to *STATE AND FEDERAL LANDS – Other Initiatives*]~~

~~5.B.10 The County shall encourage the State to provide for agricultural leases of its lands for goose habitat. The continued use of the overflow lands for pasture shall be allowed to continue. Should the State acquire any lands, the property owner (or adjacent property owner) shall be offered a lease of the lands for grazing and pastoral uses. Agricultural leases need not be granted where it can be shown that direct conflicts between the agricultural use and the visitors utilizing an improved access would occur. ☞ LU III.C.4, LU III.C.12, LU III.D.14. (Revised) [Moved to *STATE AND FEDERAL LANDS – Other Initiatives*]~~

~~5.B.11 The County shall encourage the California Department of Parks and Recreation to provide a bicycle trail/path from Pt. St. George to Lake Earl with a tie-in to Old Mill Road on the east side. Along the trail, the California Department of Parks and Recreation shall include day use facilities for the bikers and hikers using the trail. The County will provide an easement across the airport property for the bike/path. ☞ LU III.D.23. (Revised) [Moved to *STATE AND FEDERAL LANDS – Other Initiatives*]~~

~~5.B.12 The County shall encourage the State to provide trail access at the west side of Lake Earl on each side of the connecting channel, but not necessarily at the channel, for visitor uses. In addition, the County shall encourage the State to provide at least one improved boat launching facility on the west side of Lake Earl at Teal Pt., pursuant to its Management Plan (1988). ☞ R.VI.G.1. [Moved to *STATE AND FEDERAL LANDS – Other Initiatives*]~~

~~5.B.13 The County shall encourage the State to provide the following types of recreational facilities at and near Lakes Earl and Talawa:~~

~~6. Day-use facilities, at more than one location;~~

- ~~7. Expanded trail access with adequate parking areas;~~
- ~~8. Signs indicating appropriate access points;~~
- ~~9. Lateral trail access along the ocean shoreline and the Lakes within State-owned lands; and~~
- ~~10. Overnight facilities adjacent to the Lakes and/or the ocean shoreline in at least one location. ☞ R.VI.G.3. [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.14. The County shall encourage the State to provide a minimum of two improved trail access ways from Old Mill Road westerly to the ocean shoreline. ☞ LU III.C.11. [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.15 The County shall encourage the State to continue the historic uses of Lakes Earl and Talawa for hunting and fishing. ☞ R IV G.2 [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.16 The County shall encourage the State to consider purchase of conservation easements for the protection of endangered species and/or habitat on private property adjacent to the Lake Earl Wildlife Area rather than the purchase of fee lands. ☞ (New) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.17 The County shall encourage the State to provide opportunities for visitors to the Lake Earl Wildlife Area including continuation of existing developed and prescriptive access areas, expanded access with adequate parking and/or interconnecting trails, an interpretive visitors center, day use facilities at one or more locations, and signage. ☞ LU III.C.9,10, and 11, R IV.G.3. (Revised) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.18. The County shall encourage the State to continue to provide for existing developed and prescriptive boat access points at Lakeview Drive and Buzzini Road and to provide a new boat access on the west side of the lake at Teal Pt. ☞ R IV.G.1. (Revised) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.19. The County shall encourage the State to coordinate and participate with local public agencies for the provision of bicycle, equestrian, and/or public transit access to various locations in the Lake Earl Wildlife Area. ☞ (New) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

*Lake Earl State Park at Dead Lake*

~~5.B.20. The County shall encourage the State to adopt a publicly reviewed management plan for the Dead Lake unit which includes day use facilities, lake recreation, multi-use trail access from the southern entrance to the~~

~~beach and northerly Wildlife Area trails and roads, sand dune activities such as primitive dune camping use, and interpretive programs such as dune habitat, historical millsite use or Native American culture. Additionally, the State may wish to consider renaming the area utilizing its original Native American place name. ☞ (New) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.21. The County shall encourage the State to provide a bicycle trail/path from Point St. George to Lake Earl with a tie in to Old Mill Road. Along the trail, the State shall include day use facilities for the bikers and hikers using the trail. The County will provide an easement across the airport property for the bike trail/path. ☞ LU III.D.23. (Revised) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.22. The County shall encourage the State to provide an improved visitor serving facility at the Nor-Cal site adjacent to Dead Lake. Improved access shall be provided for the public to the dunes and to the shoreline. ☞ LU III.D.21. [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.23. The County shall encourage the State to coordinate and participate with local public agencies for the provision of bicycle and public transit access to the Dead Lake Park unit. ☞ (New) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

*41<sup>st</sup> Agricultural District- Del Norte County Fairgrounds*

~~5.B.24. The County shall encourage the Agricultural District to coordinate and participate in hike/bike/horse trail access in the Elk Creek area with the County, City, and State. ☞ (New) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

*Elk Creek Wildlife Area*

~~5.B.25. The County shall encourage the State to continue to provide for visitor education and enjoyment through trails and interpretive programs at the Elk Creek Wildlife Area and to consider additional day use, signage and entrance improvements. ☞ (New) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.26. The County shall encourage the State to coordinate and participate with local public agencies for the provision of bicycle and public transit access to~~

~~the Elk Creek Wildlife Area. ☞ (New) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

*Crescent City Marsh/South Beach*

~~5.B.27. The recreational use of motorized vehicles should be prohibited from this beach, as it is biologically one of the most productive areas for invertebrates on the Northeast. ☞ R.VI.A.5.a. [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.28. The County shall continue to emphasize the importance of maintaining and retaining Highway 101 as a primary access route which crosses through the Crescent City Marsh/South Beach area to serve the Crescent City area. ☞ (New) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.29. The County shall encourage the State to coordinate and participate with Federal and/or local agencies in the provision of public day use, interpretive, and access facilities, both parallel with and to the beach, west of Highway 101 in the South Beach area. ☞ R.VI.A.1 (Revised) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.30. The County shall encourage the State to consider purchase of easements for the protection of endangered species on private property adjacent to the Crescent City Marsh rather than the purchase of fee lands. ☞ (New) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.31. This policy left intentionally blank.~~

~~5.B.32. This policy left intentionally blank.~~

~~5.B.33. This policy left intentionally blank.~~

*Point St. George*

~~See policy 5.A.14~~

*Redwood National and State Parks*

~~5.B.34. The County shall continue to emphasize the importance of maintaining and retaining Highways 101 and 199 as primary access routes which cross through the parks to serve the County and its communities. ☞ (New) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]~~

~~5.B.35. The County shall encourage Redwood National and State Parks to manage the parks and encourage protection, use, and promotion of the parks for~~

~~visitor education and enjoyment, pursuant to its adopted Management Plan (1999).~~ ☞ ■ (New) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]

~~5.B.36. The County shall encourage Redwood National and State Parks to coordinate and participate with local public agencies for the provision of connecting access to the Redwood Parks, including trails, bicycle routes, and public transit.~~ ☞ ■ (New) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]

~~5.B.37. The County shall encourage Redwood National and State Parks to develop unique, identifiable park entrances, particularly on State highways.~~ ☞ ■ (New) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]

~~5.B.38. The County supports the development of private visitor-serving commercial areas that are focused within or adjacent to the parks (e.g., Hiouchi, North Bank Road/Tan Oak, Westlog, Harbor/South Beach, and the Trees of Mystery/Woodland Villa). The County encourages coordination among private property owners and County, State and Federal agencies in addressing mutually beneficial access, signage, or landscaping programs.~~ ☞ ■ (New) [Moved to STATE AND FEDERAL LANDS – Other Initiatives]

### Other Initiatives

~~5.B.1.~~ ● The County shall encourage Federal, State, and local agencies currently providing recreation facilities to maintain, at a minimum, and improve, if possible, their current levels of service. ☞ ■ (New)

~~5.B.2.~~ ● The County shall encourage the interconnection of pedestrian and bicycle trails between Federal Forest, Park, and Recreation Area lands, State Park lands, State Highway, and County trails. ☞ ■ (New)

~~5.B.3.~~ ● The County shall encourage the State to maintain Pelican State Beach to include highway signage, parking, and improved pedestrian beach access, and restrict vehicle beach access. ☞ LU III.A.6.

~~5.B.4.~~ ● The County supports the development of the private visitor-serving commercial area adjacent to Pelican State Beach and encourages coordination between private property owners, the County, and State agencies in addressing mutually beneficial access, signage, and/or landscaping programs. ☞ (New)

~~5.B.6.~~ ● The County shall encourage the State to continue to provide public access to the Lake Earl Park Area from Pala Road.

- ~~5.B.7.~~ ● The County shall encourage the State to continue to provide public access northward from Kellogg Road paralleling the beach.
- ~~5.B.8.~~ ● The County shall encourage the State to provide improved day-use recreational facilities in the general area of Kellogg Road. ☞ *LU III.B.10.*
- ~~5.B.9.~~ ● The County shall continue to encourage Department of Fish and Game to officially adopt a publicly reviewed Management Plan for the Lake Earl Wildlife Area. Such a plan should include not only wildlife management, but also the development and promotion of taxpayer, resident, and visitor use for educational and enjoyment purposes, and the safety of the community. ☞ *(New)*
- ~~5.B.10.~~ ● The County shall encourage the State to provide for agricultural leases of its lands for goose habitat. The continued use of the overflow lands for pasture shall be allowed to continue. Should the State acquire any lands, the property owner (or adjacent property owner) shall be offered a lease of the lands for grazing and pastoral uses. Agricultural leases need not be granted where it can be shown that direct conflicts between the agricultural use and the visitors utilizing an improved access would occur. ☞ *LU III.C.4, LU III.C .12, LU III.D.14. (Revised)*
- ~~5.B.11.~~ ● The County shall encourage the California Department of Parks and Recreation to provide a bicycle trail/path from Pt. St. George to Lake Earl with a tie-in to Old Mill Road on the east side. Along the trail, the California Department of Parks and Recreation shall include day-use facilities for the bikers and hikers using the trail. The County will provide an easement across the airport property for the bike/path. ☞ *LU III.D.23. (Revised)*
- ~~5.B.12.~~ ● The County shall encourage the State to provide trail access at the west side of Lake Earl on each side of the connecting channel, but not necessarily at the channel, for visitor uses. In addition, the County shall encourage the State to provide at least one improved boat launching facility on the west side of Lake Earl at Teal Pt., pursuant to its Management Plan (1988). ☞ *R.VI.G.1.*
- ~~5.B.13.~~ ● The County shall encourage the State to provide the following types of recreational facilities at and near Lakes Earl and Talawa:
1. Day-use facilities, at more than one location;
  2. Expanded trail access with adequate parking areas;
  3. Signs indicating appropriate access points;
  4. Lateral trail access along the ocean shoreline and the Lakes within State-owned lands; and
  5. Overnight facilities adjacent to the Lakes and/or the ocean shoreline in at least one location. ☞ *R.VI.G.3.*

- ~~5.B.29.~~ ● The County shall encourage the State to coordinate and participate with Federal and/or local agencies in the provision of public day use, interpretive, and access facilities, both parallel with and to the beach, west of Highway 101 in the South Beach area. ☞ *R VI.A.1 (Revised)*
- ~~5.B.30.~~ ● The County shall encourage the State to consider purchase of easements for the protection of endangered species on private property adjacent to the Crescent City Marsh rather than the purchase of fee lands. ☞ *(New)*
- ~~5.B.34.~~ ● The County shall continue to emphasize the importance of maintaining and retaining Highways 101 and 199 as primary access routes which cross through the parks to serve the County and its communities. ☞ *(New)*
- ~~5.B.35.~~ ● The County shall encourage Redwood National and State Parks to manage the parks and encourage protection, use, and promotion of the parks for visitor

education and enjoyment, pursuant to its adopted Management Plan (1999).   (New)

~~5.B.36.~~  The County shall encourage Redwood National and State Parks to coordinate and participate with local public agencies for the provision of connecting access to the Redwood Parks, including trails, bicycle routes, and public transit.   (New)

~~5.B.37.~~  The County shall encourage Redwood National and State Parks to develop unique, identifiable park entrances, particularly on State highways.   (New)

~~5.B.38.~~  The County supports the development of private visitor-serving commercial areas that are focused within or adjacent to the parks (e.g., Hiouchi, North Bank Road/Tan Oak, Westlog, Harbor/South Beach, and the Trees of Mystery/Woodland Villa). The County encourages coordination among private property owners and County, State and Federal agencies in addressing mutually beneficial access, signage, or landscaping programs.   (New)

### **Implementation Programs**

~~Policy statements only.~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

### **5.C. RECREATIONAL TRAILS**

**Goal 5.C.** To develop a system of interconnected hiking, riding, and bicycling trails and paths suitable for active recreation and transportation and circulation.

#### **Policies**

~~5.C.1. The County shall support development of a countywide trail system designed to achieve the following objectives:~~

- ~~a. Provide safe, pleasant, and convenient travel by foot, horse, or bicycle;~~
- ~~b. Link residential areas, schools, community buildings, parks, and other community facilities. Whenever possible, trails should connect to a countywide trail system and regional trails;~~
- ~~c. Provide access to recreation areas, major waterways, and vista points; and~~
- ~~d. Provide for multiple uses (i.e., pedestrian, equestrian, bicycle).~~

 (New) [Moved to *RECREATIONAL TRAILS – Other Initiatives*]

~~5.C.2. The County shall work with other public agencies, such as the City of Crescent City, Local Transportation Commission, Department of Fish and Game, Harbor District, U. S. Forest Service, and State and National Park Services, to coordinate the development of equestrian, pedestrian, and bicycle trails.~~  (New) [Moved to RECREATIONAL TRAILS – Other Initiatives]

~~5.C.3. The County shall continue to promote the development of a regional trail and path system linking residential areas to local recreational areas, such as Crescent City to the Redwood State and National Park or the Lake Earl area, and recreational areas to each other. The County encourages the use of existing public and quasi-public rights of way, including former railroad rights of way.~~  ~~REC P.9. (Revised)~~ [Moved to RECREATIONAL TRAILS – Other Initiatives]

~~5.C.4. This policy number left intentionally blank.~~

~~5.C.5. The County shall continue to coordinate connecting trails with the City of Crescent City, particularly in the Elk Creek, Harbor, and coastline areas through the development of a joint trails plan.~~  (New) [Moved to RECREATIONAL TRAILS – Other Initiatives]

### Other Initiatives

~~5.C.1.~~  The County shall support development of a countywide trail system designed to achieve the following objectives:

- a. Provide safe, pleasant, and convenient travel by foot, horse, or bicycle;
- b. Link residential areas, schools, community buildings, parks, and other community facilities. Whenever possible, trails should connect to a countywide trail system and regional trails;
- c. Provide access to recreation areas, major waterways, and vista points; and
- d. Provide for multiple uses (i.e., pedestrian, equestrian, bicycle).  (New)

~~5.C.2.~~  The County shall work with other public agencies, such as the City of Crescent City, Local Transportation Commission, Department of Fish and Game, Harbor District, U. S. Forest Service, and State and National Park Services, to coordinate the development of equestrian, pedestrian, and bicycle trails.  (New)

~~5.C.3.~~  The County shall continue to promote the development of a regional trail and path system linking residential areas to local recreational areas, such as Crescent City to the Redwood State and National Park or the Lake Earl area, and recreational areas to each other. The County encourages the use of existing public and quasi-

public rights-of-way, including former railroad rights-of-way. ~~☞~~ **REC P.9.**  
(Revised)

- ~~5.C.5.~~ ● The County shall continue to coordinate connecting trails with the City of Crescent City, particularly in the Elk Creek, Harbor, and coastline areas through the development of a joint trails plan. ~~☞~~ (New)

#### ~~Existing Implementation Programs:~~

- ~~● LTCO/County City Bicycle Facilities Plan~~

#### ~~New Implementation Programs:~~

- ~~5.2~~ ~~The County shall prepare and adopt a plan for a countywide trail system plan. (Policy 5.C.1.)~~  
~~Responsibility: County Parks and Recreation Commission~~  
~~Time Frame: First five years~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

### 5.D. COASTAL ZONE RECREATION

- Goal 5.D.** To provide full coastal recreation opportunities for the public while assuring the protection of important coastal resources and the rights of private property owners. ~~☞~~ *R.III.C.*

#### Policies

- ~~5.D.1.~~ ~~The County shall encourage the continued maintenance of coastal recreation areas by both the private sector and public agencies. ~~☞~~ *R.III.C.1.*~~ [Moved to *COASTAL ZONE RECREATION – Other Initiatives*]
- ~~5.D.2.~~ 5.D.1. ~~The County shall ensure that new recreational development is~~ **Public facilities shall be** located and distributed throughout the Coastal Zone in a manner to prevent undue social impacts, overuse, or overcrowding. ~~☞~~ *R.III.C.2.*
- ~~5.D.3.~~ 5.D.2. ~~The County shall grant priority~~ **Priority shall be granted** to visitor-serving facilities that provide recreational opportunities to persons of low- and moderate-income over higher-cost visitor facilities. ~~☞~~ *R.III.C.3.*

5.D.3 Protect encourage, and where feasible, provide lower-cost visitor accommodations. If and when average annual occupancy rates at Del Norte County visitor accommodations exceed 70%, removal or conversion of existing lower cost visitor serving accommodations shall be prohibited unless (1) the converted facility will be replaced with another facility offering the same or a greater number of lower cost visitor serving units, or (2) an in lieu fee in an amount necessary to off-set the cost to replace the lower cost visitor serving units in Del Norte County shall be imposed. Lower cost facilities shall be defined as any facility with room rates that are below 75% of the Statewide average room rate, and higher cost facilities shall be defined as any facility with room rates that are 125% above the State wide average room rate. Statewide average room rates can be calculated by the Smith Travel Research website ([www.visitcalifornia.com](http://www.visitcalifornia.com)) or other analogous method used to arrive at an average statewide room rate value.

~~5.D.4.~~ 5.D.4. The ~~County shall protect the~~ rights of private property owners shall be protected in all provisions for public and private recreation facilities. ☞  
~~R.III.C.4.~~

~~5.D.5.~~ 5.D.5. ~~The County shall allow visitor serving~~ Visitor serving and commercial-recreational facilities on ocean-front parcels shall be permitted only when such development provides an increased opportunity for shoreline access and coastal recreation and enhances scenic and environmental values of the area. ☞  
~~R.III.C.5.~~

~~5.D.6.~~ 5.D.6. ~~The County shall ensure that fragile~~ Fragile coastal resources ~~are~~ shall be considered and protected to the greatest possible extent in all new coastal recreational development. ☞ ~~R.III.C.6.~~

~~5.D.7.~~ 5.D.7. ~~The County should minimize recreational~~ Recreational use conflicts on coastal beaches shall be minimized through provisions separating incompatible activities by time and/or space. Outdoor recreation projects ~~should~~ shall preserve and enhance scenic and environmental values. ☞ ~~R.III.C.7., REC P.5.~~

~~5.D.8~~ ~~The County shall encourage the continued maintenance of existing recreational boating facilities by private operators and public agencies.~~ ☞  
~~R.III.C.8.~~ [Moved to COASTAL ZONE RECREATION – Other Initiatives]

~~5.D.9.~~ 5.D.8. ~~The County shall protect designated~~ Designated agricultural lands shall be protected from inappropriate development, including but not limited to, recreational development. ☞ ~~R.III.C.9.~~

~~5.D.10. The County shall encourage the California State Department of Fish and Game to continue to provide access to Lakes Earl and Talawa for recreational uses to provide adequate day use, parking, and signage for use of the west, east and south wildlife areas. ☞ R IV.G.5.1., R IV.G.5.2. [Moved to COASTAL ZONE RECREATION – Other Initiatives]~~

~~5.D.11. The County supports the continued development of day use, trail, recreational boating, and related visitor serving uses at the Crescent City Harbor and encourages the Harbor District to coordinate and participate with local and State agencies for the provision of connecting access trails and facilities. ☞ (New) [Moved to COASTAL ZONE RECREATION – Other Initiatives]~~

5.D.9. Oceanfront land suitable for recreational use shall be protected for recreational use and development unless present and foreseeable future demand for public or commercial recreational activities that could be accommodated on the property is already adequately provided for in the area.

5.D.9. Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred.

5.D.10. The use of private lands suitable for visitor-serving and commercial recreational facilities designed to enhance public opportunities for coastal recreation shall have priority over private residential, general industrial, or general commercial development, but not over agriculture or coastal-defendant industry.

5.D.11 Adequate parking should be provided to serve coastal access and recreation uses to the extent feasible. Existing parking areas serving recreational uses shall not be displaced unless a comparable replacement area is provided.

5.D.12 Coastal areas suited for water-oriented recreational activities that cannot readily be provided at inland water areas shall be protected for such uses.

### Other Initiatives

~~5.D.1. ●~~ The County shall encourage the continued maintenance of coastal recreation areas by both the private sector and public agencies. ☞ R.III.C.1.

~~5.D.8. ●~~ The County shall encourage the continued maintenance of existing recreational boating facilities by private operators and public agencies. ☞ R.III.C.8.

- 5.D.10. ●** The County shall encourage the California State Department of Fish and Game to continue to provide access to Lakes Earl and Talawa for recreational uses to provide adequate day-use, parking, and signage for use of the west, east and south wildlife areas. ☞ *R IV.G.5.1., R IV.G.5.2.*
- 5.D.11. ●** The County supports the continued development of day use, trail, recreational boating, and related visitor-serving uses at the Crescent City Harbor and encourages the Harbor District to coordinate and participate with local and State agencies for the provision of connecting access trails and facilities. ☞ *(New)*

**The County shall create an inventory and monitor lower cost visitor serving accommodation facilities in the County.**

~~Existing Implementation Programs:~~

~~Coastal/Access Zoning Ordinance  
General Plan Diagram Maps~~

~~New Implementation Programs:~~

~~Existing programs are deemed sufficient.~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

**COASTAL ZONE PUBLIC ACCESS**

**Goal 5.E.** To provide the full benefits of access to coastal recreation resources to all residents of and visitors to Del Norte County. ☞ *PA III.C.*

**Policies**

~~5.E.1. The County shall continue to work actively towards the attainment of~~  
~~m~~Maximum coastal access for the public shall be provided, where it is consistent with public safety, property owner rights, and the protection of fragile coastal resources. ☞ *PA III.C.1.* [Moved to *COASTAL ZONE PUBLIC ACCESS – Other Initiatives*]

~~5.E.2. The County shall strive to protect the rights of private property owners in all considerations of public access. ☞ *PA III.C.2.* [Moved to *COASTAL ZONE PUBLIC ACCESS – Other Initiatives*]~~

~~5.E.3. The County shall require funding assistance to improve and maintain existing access and to acquire and develop any new access and facilities. ☞~~

~~PA III.C.3.~~ [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]

~~5.E.4.~~ 5.E.2. The ~~County shall ensure that the~~ design and construction by any public entity of shoreline access facilities (e.g., parking, trails, stairways, etc.) ~~considers~~ **shall consider** public safety potentials for vandalism and the protection of fragile coastal resources. ☞ PA III.C.4.

~~5.E.5.~~ 5.E.3. ~~The County shall ensure that agricultural~~ **Agricultural** lands ~~are~~ **shall be** protected from adverse effects resulting from public access. The County shall give priority to the maintenance of agricultural productivity. ☞ PA III.C.5.

~~5.E.6.~~ ~~The County shall continue to support the shoreline access program on adjacent major highways and roads. A uniform shoreline access signing system should be developed.~~ ☞ ~~PA III.C.6.~~ [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]

~~5.E.7.~~ ~~The County will continue implementing its Coastal Access zoning ordinance to develop and maintain shoreline access facilities.~~ ☞ ~~PA III.C.7. (Revised)~~ [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]

~~5.E.8.~~ 5.E.4. ~~The County shall ensure that the development~~ **Development** along the immediate shoreline ~~provides~~ **shall provide** public access to the shoreline except where:

- a. Findings are made consistent with Section 30212 of the Coastal Act that access is inconsistent with public safety or that agriculture would be adversely affected; or
- b. Access would have unavoidable adverse impacts on environmentally sensitive habitat areas as designated in the Land Use Policy; or
- c. An existing vertical accessway, adequate to meet anticipated access needs, is located one-half mile or less from the development; or
- d. The parcel is too small to allow for an adequate vertical access corridor without passing within twenty-five feet of a proposed dwelling; or
- e. Project site is too small for the proposed development and the access with improvement related to its use (i.e., parking). ☞ PA III.C.8.

~~5.E.9.~~ 5.E.5. Where other coastal public access policies recommend vertical access, ~~the County shall restrict such~~ access **shall be directed** to sandy beach areas. The ~~County shall discourage development of~~ accessways to rocky beaches shall be **restricted as necessary** in areas where public safety is of concern or where increased visitor pressure on biological areas or areas of unique character, sensitive to visitor pressure, will be degraded. ☞ PA III.C.9.

- ~~5.E.10.~~ 5.E.6. ~~The County shall ensure that existing~~ **Existing** lateral access **shall** be maintained by seeking lateral access easements, inland of the mean high tide line to the first line of vegetation or to the crest of the paralleling bluff in areas of coastal bluffs, for the immediate shoreline. ☞ *PA III.C.10.*
- ~~5.E.11.~~ 5.E.7. ~~The County shall issue no~~ **No** permit **shall be issued** for a project that obstructs lateral access on the immediate shoreline, inland of the mean tide line to the first line of vegetation, or the crest of the paralleling bluff. ~~The County will, however, grant exceptions~~ **Exceptions may be granted** for the placement of navigational aids or shoreline protective devices to protect existing structures (i.e., main residence commercial and industrial buildings, and public owned facilities) **provided equivalent lateral access that is equivalent in time, place, or manner is provided.** ☞ *PA III.C.11. (Revised)*
- ~~5.E.12.~~ 5.E.8. ~~The County shall not allow any~~ **No** development **shall be authorized** between the mouth of the Smith River and Prince Island Court, and from Marhoffer Creek north to the east line of Section 14 at Pt. St. George, that would preempt any prescriptive rights that may exist on a parcel. Upon a determination by the County that prescriptive rights may exist, the County shall pursue a legal determination of the existence of the access easements, consistent with the availability of staff and funds. Any new development shall, ~~when feasible,~~ be sited in such a way that it will not infringe on any existing prescriptive rights accessways. ☞ *PA III.C.12.*
- ~~5.E.13.~~ ~~The County shall have the right of first refusal for coastal access easement offers for a period of two years. After two years, these offers should be made available for acceptance by any public or private organization acceptable to the County after consultation with the Coastal Commission. ☞ PA III.C.18.~~  
[Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]
- ~~5.E.14.~~ 5.E.9. ~~The County shall prohibit~~ opening of any required accessway to public use **shall not be required** until a public agency, including the State, or a private association agrees to accept responsibility for maintenance and liability of the accessway, ☞ *PA III.C.14.*
- ~~5.E.15.~~ 5.E.10. ~~The County shall grant priority~~ **Priority shall be granted** to developments that provide access for the general public over a wide range of income levels, ages, and social groups over other private development. ☞ *PA III.C.15.*
- ~~5.E.16.~~ 5.E.11. ~~In order to reduce impacts upon agriculture and to reduce fishing pressures upon the Smith River, the County shall limit public~~ **Public** accessways to the lower Smith River (below Dr. Fine Bridge) **shall be limited** to the following existing and future sites:  
Simpco Bar (the northwest corner of Dr. Fine Bridge);  
~~Saxton's~~ **Smith River** boat ramp;

Trail’s End (Sarina Road);  
Ship Ashore Resort;  
Mouth of Smith River Road; and  
Pala Road. ☞ PA.III.C.16 (Revised)

~~5.E.17. The County shall seek funding for suitable, improved access points for use by the physically limited. ☞ PA III.C.13. [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]~~

~~5.E.18. Signs indicating shoreline access should be placed on Highway 101. ☞ PA VI.A.2. [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]~~

~~5.E.18a.~~ **5.E.12.** Whenever there is demonstrated evidence of substantial past use of a property for access purposes, ~~the County shall investigate opportunities for an investigation of~~ prescriptive rights ~~for~~ shall be required in the review of new development ~~within the Coastal Zone~~ located between the first public road and the sea. ☞ (New)

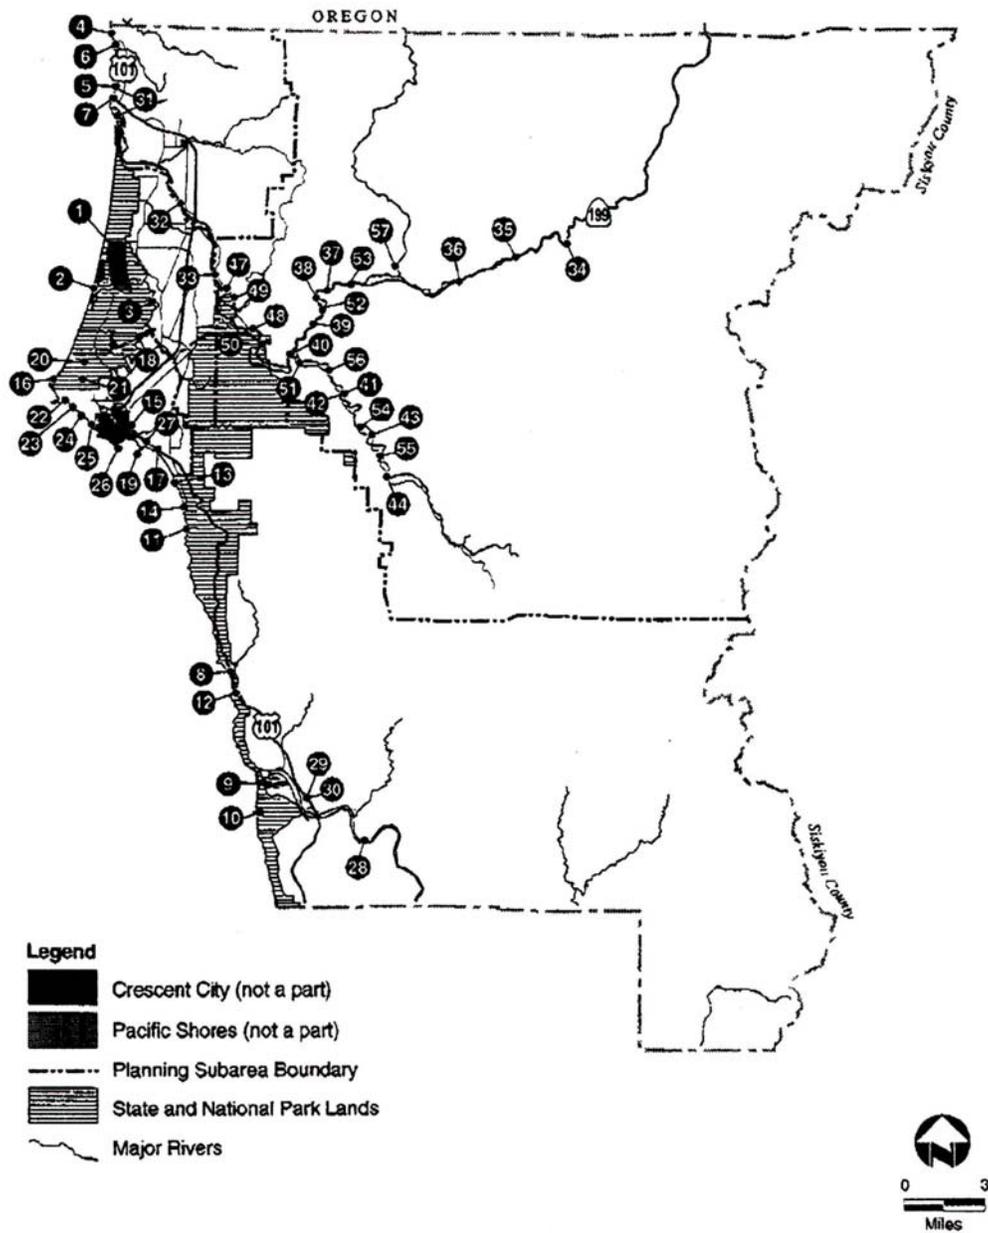

~~5.E.18b.~~ **5.E.13.** The County shall maintain the ~~Coastal~~ **County-owned coastal** access points ~~which the County owns as~~ identified in Table 5-2 and illustrated in Figure 5-2. ☞ (New)

*Del Norte County – Coastal and River Access*

[See also Policy 5.B.2]

*Crescent City Area*

~~5.E.19.~~ ~~The County encourages the continued provision and, where feasible, expansion of public access to coastal beach and river areas on State and Federally owned lands.~~ ~~☞~~ ~~■~~ (New) [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]

~~5.E.20.~~ ~~The County shall encourage the State to seek funds and plan area improvements at Lakeview Road access including 1) day use facilities; 2) signs indicating access; and 3) dedicated lateral access.~~ ~~☞~~ ~~PA VI.I.2.~~ [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]

~~5.E.21.~~ 5.E.13. Due to the fragile nature of rocky habitats and bluff faces in the Pt. St. George area, ~~the County should direct~~ access shall be directed north towards the sandy beaches. ~~☞~~ ~~PA VI.K.2.~~

~~5.E.22.~~ ~~The County shall encourage the State to investigate the prescriptive rights issue at Pt. St. George for access points off Radio Road and, if feasible, acquire and maintain these for public use.~~ ~~☞~~ ~~PA VI.K.3.~~ [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]

~~5.E.23.~~ ~~The County should encourage the State to dedicate vertical and lateral access easements to guarantee public access at Pebble Beach. Upon acquisition of easements in this area, the State shall provide funding assistance for continued maintenance and liability.~~ ~~☞~~ ~~PA VI.L.1. (Revised)~~ [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]

~~5.E.24.~~ 5.E.14. ~~The County should limit access at~~ Access shall be limited as necessary along the high, unstable bluff and dunes north of Marhoffer Creek. ~~☞~~ ~~PA VI.LA, PA VI.LC~~

~~5.E.25.~~ 5.E.15. Improvements should be maintained to insure safe access around Marhoffer Creek and the south end of the bluff-face and repair damage created by present access trails. ~~☞~~ ~~PA VI.LB~~

~~5.E.26.~~ 5.E.16. ~~The County shall prohibit~~ Off-road vehicle use shall be prohibited at Pebble Beach. The County shall ensure that vehicular access ~~is~~ shall be restricted to emergency vehicle access and vehicles on a permit basis. ~~☞~~ (New)

~~5.E.27. The County should seek funds to repair vandalized facilities and revegetate damaged promontories and sea stacks along Pebble Beach. (PA VI.M.2. [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives])~~

~~5.E.28. 5.E.17~~ The County shall prohibit rRecreational off-road vehicle driving on South Beach, as it is biologically one of the most productive areas for invertebrates on the Northcoast. However, ~~the County may maintain provisions to permit~~ off-road vehicles on the beach may be permitted at South Beach for the purposes of commercial surf fishing, clamming, and salvage operations (including fire-wood salvage). (PA VI.N.3, PA VI.N. 4. (Revised))

*Smith River Area*

~~5.E.29. 5.E.18.~~ The County shall encourage ~~new~~ New development projects ~~to~~ shall incorporate appropriate coastal access into the overall project design. This access requirement shall be limited to parcels with 400 feet or more of beach frontage located between the Oregon state line and the Mouth of Smith River, except for the sensitive tidepool areas south of Lopez Creek. In addition, any such requested public access route shall be subject to the provisions of Section 66478.12, Section 66478.13, and Section 66478.14 of the Subdivision Map Act. (LU III.A.1.)

~~5.E.30. 5.E.19~~ The County shall hold the easement for public access from the end of Gilbert Way to Gilbert Creek and the beach (Pelican Beach Palisades) for continued a low intensity public use. (PA VI.B.1. (Revised))

~~5.E.31. 5.E.20~~ The County shall encourage ~~e~~ Continued public access to the Smith River through Ship-Ashore shall be provided. New development shall include provisions for access where appropriate. (LU III.B.1., LU III.A.4.)

~~5.E.32. 5.E.21.~~ The County shall require any Approval of any expansion or major redevelopment of Trails End (APN 103-730-01) shall be conditioned to include river access. ~~The owner/developer shall be encouraged to provide boat launching facilities if physically feasible. (LU III.B.2.)~~

~~5.E.33. 5.E.22.~~ The County should not require access or development Dedication of on-site accessways or the construction of on-site access improvements shall be limited as necessary in the area west of Indian Road due to the fragile nature of the tidal habitat, unconsolidated bluff, archaeological issues, and unresolved prescriptive rights. (PA .IV.D.5.1. (Revised))

~~5.E.34. The County shall encourage the California Department of Parks and Recreation to complete development of the Pelican Beach State Park with improved access, parking, signage and other visitor facilities as needed. (R.IV.B.5.a-c. (Revised)) [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]~~

- ~~5.E.35~~ 5.E.23 The County shall continue to maintain Clifford Kamph Memorial Park as public beach access. ☞ R.IV.C.5.a-c (Revised)
- ~~5.E.36.~~ ~~The County shall encourage the State to continue to maintain the Smith River Public Fishing access on Fred Haight Drive.~~ ☞ (New) [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]
- ~~5.E.37.~~ 5.E.24 ~~The County shall encourage the maintenance and development of~~ Existing and potential commercial and public visitor activities and services shall be maintained and developed in the Highway 101/Pelican State Beach and Ship Ashore/Mouth of Smith River Road visitor-serving areas. ☞ (New)
- ~~5.E.38.~~ 5.E.25. ~~The County shall require dedication~~ Dedication of lateral access ~~from~~ shall be required in the approval of new development situated between the shoreline to the first line of terrestrial vegetation or the bluff top for a minimum of one half mile north and south of the Pelican State Beach. ☞ PA.VI.A.3.
- ~~5.E.39.~~ 5.E.26. In that adequate public access exists near Pelican Beach Palisades (at Kamph Park and Pelican Beach), this area ~~should remain~~ shall be retained in its present status with reservations for acquisition and opening to public ~~if and when forestalled until~~ the adjacent facilities appear inadequate and the liability potential is resolved. ☞ PA.VI.B.1.
- ~~5.E.40.~~ 5.E.27. ~~The County should limit access~~ Access shall be limited as necessary in the Indian Road area because of the fragile nature of the sandy, unconsolidated bluff; parking problems; restrictive rights issues; and the potential archeological significance of the area. ☞ PA.VI.D.1.
- ~~5.E.41.~~ ~~The County shall seek funding from the Coastal Conservancy to restore vegetation on the bluff and to stabilize the dunes in the Indian Road area.~~ ☞ ~~PA.VI.D.2.~~ [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]
- ~~5.E.42.~~ ~~The County shall seek funding to improve trail access at the Mouth of the Smith River from parking area to Smith River to halt erosion and insure public safety.~~ ☞ ~~PA.VI.E.1. (Revised)~~ [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]
- ~~5.E.43.~~ 5.E.28. ~~The County shall require that any~~ Any development proposal for the 32 acre parcel at the north end of Dr. Fine Bridge on Highway 101 (AP# 105-020-38/39), shall provide public access to the river. Access may appropriately be limited to a point vertical access (e.g., limited to non-vehicular modes, walking as an

example) with a lateral access (along the river bar) for the parcel's length. ☞  
*LU III.B.5.*

*Ft. Dick Area*

~~5.E.44. The County shall encourage the State to continue to provide improved recreational access to the Smith River via Pala Road. This access shall be on the south side of the river and along the sand spit. The County shall also encourage the State to provide limited access points for recreational use of Yontocket Slough. Should the state lease these lands for agricultural purposes, the County shall permit these access points to be reduced in scale, depending upon the type of agricultural use. ☞ *LU III.B.9.* [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]~~

~~5.E.45. The County shall continue to maintain Kellogg Beach Park as a public beach access. ☞ *PA IV.G.1 (Revised)* [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]~~

~~5.E.46. The County shall encourage the State of California Department of Parks and Recreation and/or Department of Fish and Game to ensure continued access for the public to the beach and to Lake Talawa in the Pacific Shores subdivision area. ☞ *PA IV.H.1 (Revised)* [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]~~

~~5.E.47. If the State acquires the Pacific Shores subdivision, the California Department of Parks and Recreation should maintain ocean and lake access for a variety of recreational uses. ☞ *R.VI.F.1.* [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]~~

~~5.E.48. If State acquisition of the Pacific Shores subdivision is found not feasible, the State should investigate the prescriptive rights issue to accessways in the area and, if easements are acquired, maintain these accessways for a variety of recreational purposes. ☞ *R.VI.F.2.* [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]~~

~~5.E.49. The County shall encourage the State to investigate prescriptive rights issue at the Pacific Shores Subdivision and, if feasible, acquire and maintain the access points for public use. ☞ *PA.VI.H.1.* [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]~~

~~5.E.50.5.E.29~~ The County shall support the retention of Public ocean and lake access in the Pacific Shores Subdivision area shall be retained. ☞ (New)

~~5.E.51. The County shall continue to provide access to and encourage the State's continued provision of the existing public access to Lake Earl at Buzzini~~

~~Road.~~ ~~☞~~ ~~(New)~~ [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]

~~5.E.52.~~ ~~The County should encourage the State to seek funds and plan area improvements at its Buzzini Road access including: 1) day use facilities; 2) expanded parking; 3) signs indicating access; and 4) dedicated lateral access.~~ ~~☞ PA VII.2.~~ [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]

### *Klamath Area*

~~5.E.53.~~ ~~The County shall encourage the continued provision and, where feasible, expansion of public access to coastal beach and river areas on State and Federally owned lands.~~ ~~☞~~ ~~(New)~~ [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]

~~5.E.54.~~ 5.E.30 The County shall continue to provide for public access to the Klamath River near the old townsite. ☞ (New)

~~5.E.55.~~ ~~The County shall encourage the State to establish a seasonal day use and river access point at its lands (APN 140-110-03) and old highway right of way) at the westerly end of old Highway 101 in the old Klamath Townsite.~~ ~~☞~~ ~~(Revised)~~ [Moved to COASTAL ZONE PUBLIC ACCESS – Other Initiatives]

### Other Initiatives

~~5.E.1.~~ 5.E.1. ● The County shall continue to work actively towards the attainment of maximum coastal access for the public, where it is consistent with public safety, property owner rights, and the protection of fragile coastal resources. ☞ PA III.C.1.

~~5.E.2.~~ 5.E.2. ● The County shall strive to protect the rights of private property owners in all considerations of public access. ☞ PA III.C.2.

~~5.E.3.~~ 5.E.3. ● The County shall require funding assistance to improve and maintain existing access and to acquire and develop any new access and facilities. ☞ PA III.C.3.

~~5.E.6.~~ 5.E.6. ● The County shall continue to support the shoreline access program on adjacent major highways and roads. A uniform shoreline access signing system should be developed. ☞ PA III.C.6.

- ~~6.A.3.~~ ● The County shall encourage the provision of public access to significant natural and cultural resources and scenic vistas through scenic routes, scenic highways, and scenic byways. ☞☞ (New)
- ~~5.E.7.~~ ● The County will continue implementing its Coastal Access zoning ordinance to develop and maintain shoreline access facilities. ☞ PA III.C.7. (Revised)
- ~~5.E.13.~~ ● The County shall have the right of first refusal for coastal access easement offers for a period of two years. After two years, these offers should be made available for acceptance by any public or private organization acceptable to the County after consultation with the Coastal Commission. ☞ PA III.C.18.
- ~~5.E.17.~~ ● The County shall seek funding for suitable, improved access points for use by the physically limited. ☞ PA III.C.13.
- ~~5.E.18.~~ ● Signs indicating shoreline access should be placed on Highway 101. ☞ PA VI.A.2.
- ~~5.E.19.~~ ● The County encourages the continued provision and, where feasible, expansion of public access to coastal beach and river areas on State and Federally owned lands. ☞☞ (New)
- ~~5.E.20.~~ ● The County shall encourage the State to seek funds and plan area improvements at Lakeview Road access including 1) day-use facilities; 2) signs indicating access; and 3) dedicated lateral access. ☞ PA VI.I.2.
- ~~5.E.22.~~ ● The County shall encourage the State to investigate the prescriptive rights issue at Pt. St. George for access points off Radio Road and, if feasible, acquire and maintain these for public use. ☞ PA VI.K.3.
- ~~5.E.23.~~ ● The County should encourage the State to dedicate vertical and lateral access easements to guarantee public access at Pebble Beach. Upon acquisition of easements in this area, the State shall provide funding assistance for continued maintenance and liability. ☞ PA VI.L.1. (Revised)
- ~~5.E.27.~~ ● The County should seek funds to repair vandalized facilities and revegetate damaged promontories and sea stacks along Pebble Beach. ☞ PA VI.M.2.
- ~~5.E.32.~~ ● ...The owner/developer shall be encouraged to provide boat-launching facilities if physically feasible. ☞ LU III.B.2.

- ~~5.E.34.~~ ● The County shall encourage the California Department of Parks and Recreation to complete development of the Pelican Beach State Park with improved access, parking, signage and other visitor facilities as needed. ☞ *R.IV.B.5.a-c. (Revised)*
- ~~5.E.37.~~ ● The County shall encourage the maintenance and development of existing and potential commercial and public visitor activities and services in the Highway 101/Pelican State Beach and Ship Ashore/Mouth of Smith River Road visitor-serving areas. ☞ *(New)*
- ~~5.E.41.~~ ● The County shall seek funding from the Coastal Conservancy to restore vegetation on the bluff and to stabilize the dunes in the Indian Road area. ☞ *PA.VI.D.2.*
- ~~5.E.42.~~ ● The County shall seek funding to improve trail access at the Mouth of the Smith River from parking area to Smith River to halt erosion and insure public safety. ☞ *PA.VI.E.1. (Revised)*
- ~~5.E.44.~~ ● The County shall encourage the State to continue to provide improved recreational access to the Smith River via Pala Road. This access shall be on the south side of the river and along the sand spit. The County shall also encourage the State to provide limited access points for recreational use of Yontocket Slough. Should the state lease these lands for agricultural purposes, the County shall permit these access points to be reduced in scale, depending upon the type of agricultural use. ☞ *LU III.B.9.*
- ~~5.E.45.~~ ● The County shall continue to maintain Kellogg Beach Park as a public beach access. ☞ *PA IV.G.1 (Revised)*
- ~~5.E.46.~~ ● The County shall encourage the State of California Department of Parks and Recreation and/or Department of Fish and Game to ensure continued access for the public to the beach and to Lake Talawa in the Pacific Shores subdivision area. ☞ *PA IV.H.1 (Revised)*
- ~~5.E.47.~~ ● If the State acquires the Pacific Shores subdivision, the California Department of Parks and Recreation should maintain ocean and lake access for a variety of recreational uses. ☞ *R.VI.F.1.*
- ~~5.E.48.~~ ● If State acquisition of the Pacific Shores subdivision is found not feasible, the State should investigate the prescriptive rights issue to accessways in the area and, if easements are acquired, maintain these accessways for a variety of recreational purposes. ☞ *R.VI.F.2.*

- ~~5.E.49.~~ ● The County shall encourage the State to investigate prescriptive rights issue at the Pacific Shores Subdivision and, if feasible, acquire and maintain the access points for public use. ~~☞ PA.VI.H.1.~~
- ~~5.E.51.~~ ● The County shall continue to provide access to and encourage the State's continued provision of the existing public access to Lake Earl at Buzzini Road. ~~☞ (New)~~
- ~~5.E.52.~~ ● The County should encourage the State to seek funds and plan area improvements at its Buzzini Road access including: 1) day-use facilities; 2) expanded parking; 3) signs indicating access; and 4) dedicated lateral access. ~~☞ PA VI.I.2.~~
- ~~5.E.53.~~ ● The County shall encourage the continued provision and, where feasible, expansion of public access to coastal beach and river areas on State- and Federally-owned lands. ~~☞ (New)~~
- ~~5.E.55.~~ ● The County shall encourage the State to establish a seasonal day-use and river access point at its lands (APN 140-110-03) and old highway right of way) at the westerly end of old Highway 101 in the old Klamath Townsite. ~~☞ (Revised)~~

~~Existing Implementation Programs:~~

- ~~● Coastal Access Zoning Ordinance~~
- ~~● Restricted Driving Areas Ordinance~~

~~New Implementation Programs:~~

~~Existing programs deemed sufficient.~~

~~New Implementation Programs:~~

~~5.3 The County in conjunction with the Federal government and Del Norte Unified School District should review the potential for public river access in the Gasquet Area. (Policy 5.F.10.)~~

~~Responsibility: County Parks Department~~

~~Time Frame: First five years [Replace with universal cross-reference to Local Coastal Program Zoning Enabling Ordinance and other development regulation components of the Implementation Plan within Part I – Summary]~~

5.G. PRIVATE RECREATIONAL FACILITIES AND OPPORTUNITIES

**Goal 5.G.** To encourage development of private recreational facilities to supplement public facilities and to provide for economic development opportunities.

**Policies**

~~5.G.1. The County shall encourage development of private recreation facilities to reduce demands on public agencies. (C) (New) [Moved to PRIVATE RECREATIONAL FACILITIES AND OPPORTUNITIES – Other Initiatives]~~

~~5.G.2. The County shall encourage private landowners to develop areas for fee-based recreational use. (C) (New) REC P.7. [Moved to PRIVATE RECREATIONAL FACILITIES AND OPPORTUNITIES – Other Initiatives]~~

~~5.G.3. The County shall encourage the development of private campgrounds and recreational vehicle parks where environmentally appropriate. The intensity of such development should not exceed the environmental carrying capacity of the site and its surroundings. (C) (New) [Moved to PRIVATE RECREATIONAL FACILITIES AND OPPORTUNITIES – Other Initiatives]~~

~~5.G.4. The County shall encourage private recreational development that complements the natural features of the area, including the topography, waterways, vegetation, and soil characteristics. (C) (New) [Moved to PRIVATE RECREATIONAL FACILITIES AND OPPORTUNITIES – Other Initiatives]~~

~~5.G.5. The County encourages the maintenance of existing facilities and the development of commercial and public visitor activities and services. The following commercial areas are recognized for their historic visitor use and their potential visitor use, and shall be reserved for the development of visitor-serving facilities:~~

- Highway 101 - Pelican Beach State Park area; (C)
- Highway 101 - Ship-A-Shore to Mouth of Smith River Road; (C)
- Highway 101 - Crescent City Harbor/South Beach; (C)
- Highway 101 - Klamath riverfront; (C)
- Requa Road - Requa (hotel and resort area); and (C) [Policy bifurcated, revised with portion moved to PRIVATE RECREATIONAL FACILITIES AND OPPORTUNITIES – Other Initiatives]

**Other Initiatives**

~~5.G.1. •~~ The County shall encourage development of private recreation facilities to reduce demands on public agencies. (C) (New)

- ~~5.G.2.~~ ● The County shall encourage private landowners to develop areas for fee-based recreational use. ~~CC~~ ■ *REC P.7.*
- ~~5.G.3.~~ ● The County shall encourage the development of private campgrounds and recreational vehicle parks where environmentally appropriate. The intensity of such development should not exceed the environmental carrying capacity of the site and its surroundings. ~~CC~~ ■ *(New)*
- ~~5.G.4.~~ ● The County shall encourage private recreational development that complements the natural features of the area, including the topography, waterways, vegetation, and soil characteristics. ~~CC~~ ■ *(New)*
- ~~5.G.5.~~ ● The County encourages the maintenance of existing facilities and the development of commercial and public visitor activities and services.

#### ~~Implementation Programs~~

~~Policy statements only.~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

### 5.H. CULTURAL RESOURCES

**Goal 5.H.** To encourage identification, protection, and enhancement of Del Norte County's important historical, archaeological, paleontological, and cultural sites and activities, and their contributing environment. *COS CR.G.1. (Revised)*

#### **Policies**

- 5.H.1. ~~The County shall continue to require appropriate~~ **Appropriate** surveys and site investigations **shall be required** when needed as part of the **permit review and** initial environmental assessment for development projects in accordance with the California Environmental Quality Act (CEQA). Surveys and investigations shall be performed under the supervision of a professional archaeologist or other person qualified in the appropriate field approved by the County. ~~CC~~ ■ *(New)*
- 5.H.2. ~~The County shall continue to require that discretionary development~~ **Development** projects **shall** identify and protect from damage, destruction, and abuse, important historical, archaeological, paleontological, and cultural sites and their contributing environment. Such assessments shall be incorporated into a countywide cultural resource database. ~~CC~~ ■ *(New)*

~~5.H.3. The County should encourage private individuals to preserve or rehabilitate cultural resources rather than destroying or allowing them to deteriorate.~~  ~~COS CR.P.2.~~ [Moved to CULTURAL RESOURCES – Other Initiatives]

~~5.H.4. The County shall assist the citizens of Del Norte County in becoming active guardians of their community's cultural resources.~~  (New) [Moved to CULTURAL RESOURCES – Other Initiatives]

~~5.H.5. The County shall encourage the cooperation of the owners of cultural and paleontological resources to treat these resources as assets rather than liabilities, and encourage the support of the general public for the preservation and enhancement of these resources.~~  (New) [Moved to CULTURAL RESOURCES – Other Initiatives]

~~5.H.6. The County should encourage local and visitor knowledge and enjoyment, where appropriate, of Del Norte County's local cultural heritage.~~  ~~COS CR.P.4.~~ [Moved to CULTURAL RESOURCES – Other Initiatives]

~~5.H.7.~~ 5.H.3. The County shall continue to solicit the views of the local Native American community shall be solicited in cases where development may result in disturbance to sites containing evidence of Native American activity and/or to sites of cultural importance.  (New)

~~5.H.8.~~ 5.H.4 The County shall, within its power, maintain confidentiality regarding the locations of archaeological sites in order to preserve and protect these resources from vandalism and the unauthorized removal of artifacts.  (New)

~~5.H.9.~~ 5.H.5. ~~The County shall continue to require that discretionary development~~ Development projects ~~are~~ shall be designed to mitigate potential impacts to significant paleontological or cultural resources whenever possible. Determinations of impacts, significance, and mitigation shall be made by qualified archaeological (in consultation with recognized local Native American groups), historical, or paleontological consultants, depending on the type of resource in question.  (New)

~~5.H.10.~~ 5.H.6. ~~In cooperation with the State Historic Preservation Office, where~~ Where, in cooperation with the State Historic Preservation Office, it is determined that a development project would adversely affect archaeological resources, ~~the County shall continue to require~~ reasonable mitigation measures shall be required.  ND I.L.

- ~~5.H.11.~~ ~~The County should work with the Del Norte County Historical Society and other organizations interested in establishing a Del Norte County Historical Advisory Committee in identifying the cultural resources of Del Norte County, and process the necessary records and forms for submission of those features worthy of recognition and/or protection by the National Register, State Historic Landmarks program, or other appropriate official record.~~  ~~COS CR.P.1. (Revised)~~ [Moved to CULTURAL RESOURCES – Other Initiatives]
- ~~5.H.12.~~ ~~The County shall support the registration of cultural resources in appropriate landmark designations (i.e., National Register of Historic Places, California Historical Landmarks, Points of Historical Interest, or Local Landmark).~~  ~~(New)~~ [Moved to CULTURAL RESOURCES – Other Initiatives]
- ~~5.H.13.~~ 5.H.7. The County shall continue to refer any development proposals affecting historic resources to a representative of the Del Norte County Historical Society and, when necessary, request an evaluation by a professional historian if the significance of the resource is in question. In conjunction with this evaluation, the County will work with the historian to develop appropriate measures for protection of resources determined to be significant.  ~~(New)~~ [Revised to coastal development permit non-governing “other” development regulation  ]]
- ~~5.H.14.~~ ~~The County shall continue to encourage local cultural events and organizations such as the Del Norte Historical Society, the Del Norte Association for Cultural Awareness, and Native American groups.~~  ~~(New)~~ [Moved to CULTURAL RESOURCES – Other Initiatives]
- ~~5.H.15.~~ ~~The County should continue to provide opportunities for cultural arts and artifact display in the public areas of its facilities and encourage other public agencies to do the same.~~  ~~(New)~~ [Moved to CULTURAL RESOURCES – Other Initiatives]
- ~~5.H.16.~~ ~~The County encourage the development of a performing arts center in proximity to visitor services such as motels and restaurants and other existing performance and arts facilities.~~  ~~(New)~~ [Moved to CULTURAL RESOURCES – Other Initiatives]

### Other Initiatives

- 5.H.3.** ● The County should encourage private individuals to preserve or rehabilitate cultural resources rather than destroying or allowing them to deteriorate.  *COS CR.P.2.*
- 5.H.4.** ● The County shall assist the citizens of Del Norte County in becoming active guardians of their community's cultural resources.  *(New)*
- 5.H.5.** ● The County shall encourage the cooperation of the owners of cultural and paleontological resources to treat these resources as assets rather than liabilities, and encourage the support of the general public for the preservation and enhancement of these resources.  *(New)*
- 5.H.6.** ● The County should encourage local and visitor knowledge and enjoyment, where appropriate, of Del Norte County's local cultural heritage.  *COS CR.P.4.*
- 5.H.11.** ● The County should work with the Del Norte County Historical Society and other organizations interested in establishing a Del Norte County Historical Advisory Committee in identifying the cultural resources of Del Norte County, and process the necessary records and forms for submission of those features worthy of recognition and/or protection by the National Register, State Historic Landmarks program, or other appropriate official record.  *COS CR.P.1. (Revised)*
- 5.H.12.** ● The County shall support the registration of cultural resources in appropriate landmark designations (i.e., National Register of Historic Places, California Historical Landmarks, Points of Historical Interest, or Local Landmark).  *(New)*
- 5.H.14.** ● The County shall continue to encourage local cultural events and organizations such as the Del Norte Historical Society, the Del Norte Association for Cultural Awareness, and Native American groups.  *(New)*
- 5.H.15.** ● The County should continue to provide opportunities for cultural arts and artifact display in the public areas of its facilities and encourage other public agencies to do the same.  *(New)*
- 5.H.16.** ● The County encourage the development of a performing arts center in proximity to visitor services such as motels and restaurants and other existing performance and arts facilities.  *(New)*

~~Existing Implementation Programs:~~

- ~~• California Historical Resources Information System Agreement~~
- ~~• Environment Ordinance/CEQA~~

~~New Implementation Programs:~~

~~Existing programs deemed sufficient.~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

**Suggested Modification No. 7: (Scenic Resources Element)**

All changes to the *Scenic Resources* Element

## SECTION 6 SCENIC RESOURCES

Del Norte County possesses numerous natural and cultural resources that not only provide a pleasant place to live for county residents but are the backbone of the tourism industry. This section contains goals and policies that establish the framework for the protection of these scenic resources within Del Norte County. **These provisions are not categorically mutually exclusive of one another and should be read as a suite of policies (e.g., “visual resources” may also comprise “scenic resources area” and be subject to standards for “scenic drives.”)** These goals and policies will supplement the natural resource policies in Section 1 and **coastal access**, recreation, and cultural resource policies in Section 5.

The goals and policies in this section are organized topically according to the following categories:

- **Scenic Protection of Visual Resources and Scenic Areas (General); and**
- **Scenic Highways; and Drives.**
- ~~• **Scenic Drives; and**~~
- ~~• **Scenic Resource Areas.**~~

### **A. GENERAL PROTECTION OF VISUAL RESOURCES AND SCENIC AREAS**

#### **Goals**

**Goal 6.A.1.** Preserve and enhance the scenic quality of life in Del Norte County for both residents and visitors.  *SH G.1., SH G.5.*

~~Goal 6.D.~~ **6.A.2. To protect specific scenic resources of Del Norte County as important quality-of-life amenities for county residents and a principal asset in the promotion of recreation and tourism.** [Relocated from SCENIC RESOURCE AREAS – Goals]

#### **Policies**

- ~~6.A.1. The County should encourage the continuation of existing land uses, where appropriate, to maintain open views in highly scenic areas. ☞ ■ VR V.C.1. (Revised) [Moved to VISUAL RESOURCES – Other Initiatives]~~
- 6.A.1. The scenic and visual qualities of coastal areas shall be considered and protected as a resource of public importance. Permitted development shall be sited and designed to protect views to and along the ocean and scenic coastal areas, to minimize the alteration of natural land forms, to be visually compatible with the character of surrounding areas, and, where feasible, to restore and enhance visual quality in visually degraded areas. New development in highly scenic areas such as those designated in the California Coastline Preservation and Recreation Plan prepared by the Department of Parks and Recreation and by local government shall be subordinate to the character of its setting. [Suggested new policy]
- ~~6.A.2. The County should discourage the littering of its beaches, roadways, and other public use areas through the following:~~
- ~~a. Seek funds for the placement and maintenance of additional litter receptacles for recreational areas, highway turnouts, and other public use areas; and~~
- ~~b. Encourage public education and community anti-litter programs. ☞ ■ VR V.C.8. [Moved to PROTECTION OF VISUAL RESOURCES AND SCENIC AREAS – Other Initiatives]~~
- ~~6.D.1. 6.A.2. The County shall continue to provide for protection of scenic resources shall be provided~~ through such means as grading standards, sign ordinances, density limitations, and by providing for special designations such as planned units developments and scenic neighborhood zoning. ☞ ■ (New) [Revised, relocated from SCENIC RESOURCE AREAS – Policies]
- ~~6.A.3. The County shall encourage the provision of public access to significant natural and cultural resources and scenic vistas through scenic routes, scenic highways, and scenic byways. ☞ ■ (New) [Moved to Part II, Section 5 PUBLIC ACCESS – Policies]~~
- ~~6.D.2. 6.A.3. The County shall continue to provide an opportunity~~ Opportunities shall be provided for coastal neighborhoods and communities to address specific scenic or historic resources by specific designation through the optional Coastal Areas Combining District’s Highly Scenic Visual Resource Areas zoning program. ~~The County shall also expand the availability of the program to areas outside the Coastal Zone.~~ Neighborhoods which might utilize this program include but are not limited to ~~Gasquet, Hiouchi,~~ Smith River town, Pebble Beach, the Harbor, South Beach, and gateway areas. ☞ ■ VR V.C3, VR V.C 4 (Revised) [Revised, relocated from SCENIC RESOURCE AREAS – Policies]

- 6.A.4. The ~~County shall continue to require the~~ alteration of natural landforms in designated scenic areas shall be required to be minimized, where feasible, in construction projects by:
- a. *Designing roadways, driveways, and other corridors to blend with the natural contours of the landscape by avoiding excessive cuts and fills; and*
  - b. Concentrating development on relatively level areas over steep hillsides. ~~Provisions to be considered include: clustering, density exchange, and open space dedication.~~ ☞ ■ VR V.C.5 [Struck provision revised and moved to PROTECTION OF VISUAL RESOURCES AND SCENIC AREAS – Other Initiatives]
- ~~6.D.7. 6.A.5. The County shall require activities~~ Activities which significantly and permanently alter natural landforms, such as mining and excavation, shall be required to restore disturbed areas to, as close as possible, a natural appearance. ☞ VR V.C.6. [Relocated from SCENIC RESOURCES AREAS – Policies]
- ~~6.A.5. Although timber harvesting will not be eliminated from the scenic area, the County should encourage the State to use selective cutting or thinning, however, patchwork cutting to topography may also be considered.~~ ☞ ■ ~~SH P.6. (Revised)~~ [Moved to PROTECTION OF VISUAL RESOURCES AND SCENIC AREAS – Other Initiatives]
- ~~6.A.6. This policy number left intentionally blank.~~
- ~~6.A.7. The County shall urge State facilities, to use low energy shielded lights to be directed downward for better efficiency and to minimize nighttime glare.~~ ☞ ■ (New) [Moved to PROTECTION OF VISUAL RESOURCES AND SCENIC AREAS – Other Initiatives]
- ~~6.A.8. 6.A.6. The County shall require lights~~ Exterior lighting in the Pt. St. George/Pebble Beach area shall be required to be shielded, when feasible, so they are directed down and away from the ocean to minimize impact on off-shore reef and island habitats. ☞ (New)
- ~~6.A.9. This policy number left intentionally blank.~~
- ~~6.A.10. 6.A.7. The County shall continue to require that all~~ All exterior lighting for discretionary projects, including illuminated signs, shall be arranged so that there will be no annoying glare directed or reflected toward residence building or residence district. ☞ (New)

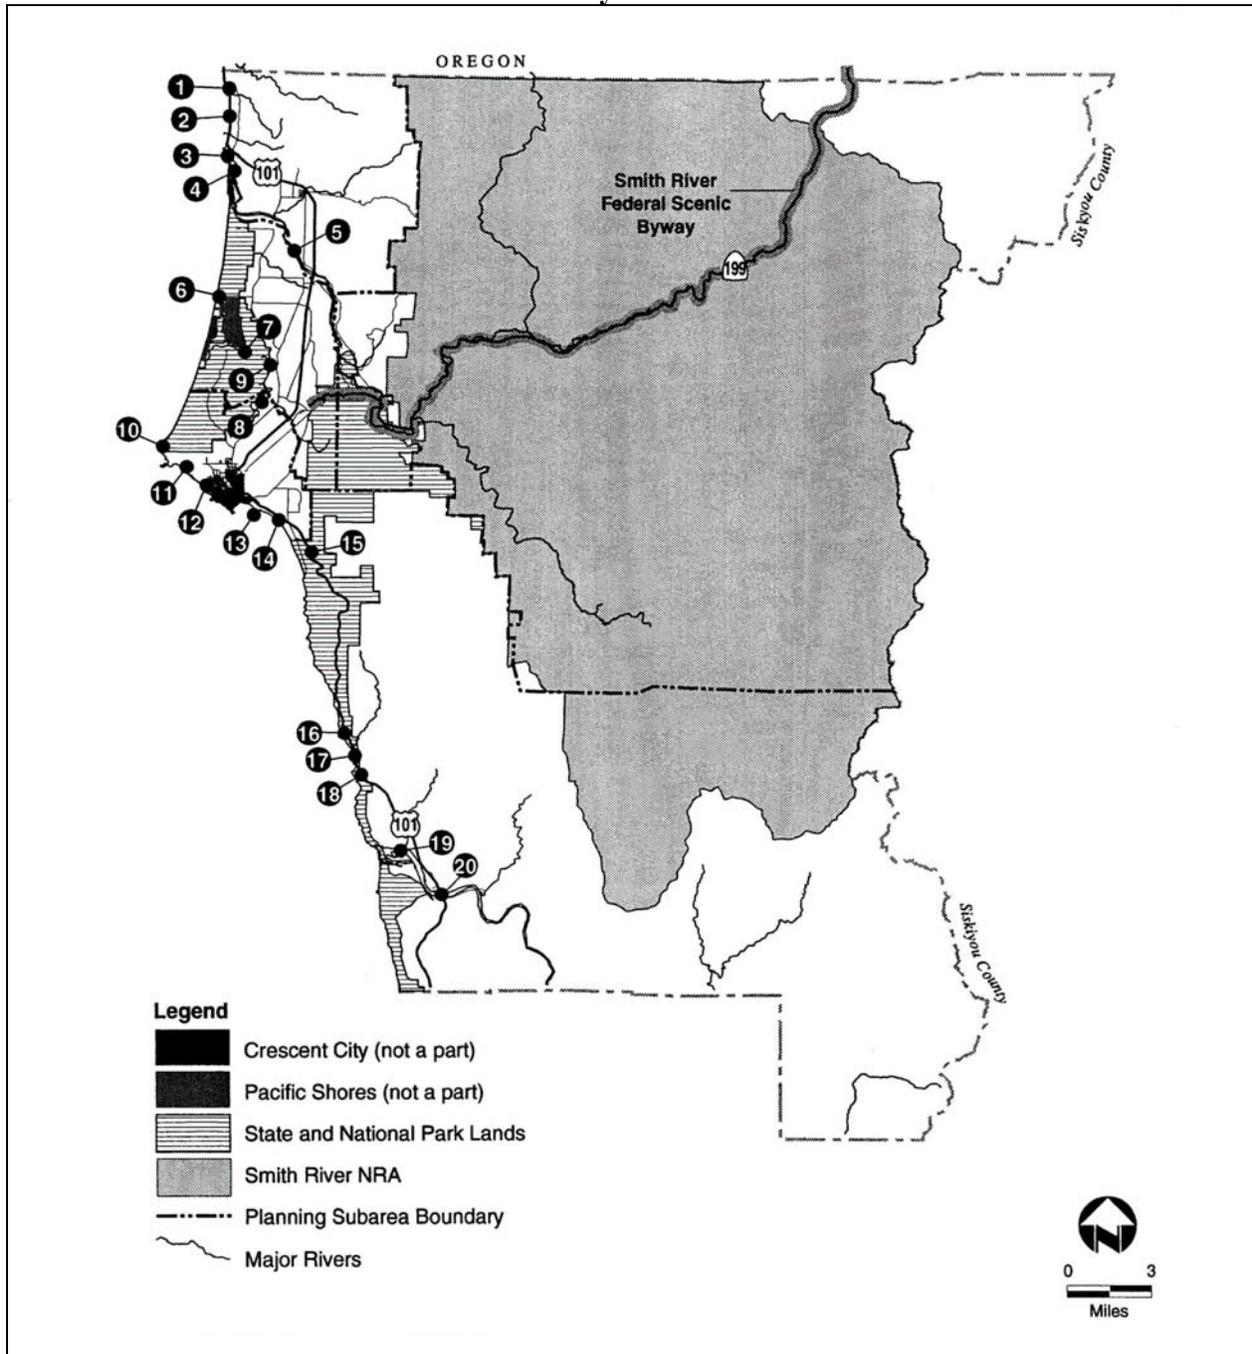

~~6.A.11.~~ 6.A.8. The County shall maintain the coastal scenic viewpoints in scenic corridors which the County owns as identified in Table 6-1 and illustrated in Figure 6-1. ☞  
(New)

~~1.C.11.~~ 6.A.9. ~~The County shall continue to limit development~~ Development involving significant alteration of the natural landform on slopes greater than 30 percent shall be limited to those uses and facilities which cannot be feasibly developed elsewhere. ☞ (New) [Relocated from Part II, Section 1 – *ONSHORE FISHERIES RESOURCES – Policies*]

<b>TABLE 6-1 COASTAL SCENIC VIEWPOINTS AND SCENIC CORRIDORS Del Norte County</b>			
<b>General Area</b>	<b>Special Features</b>	<b>Corridors</b>	<b>Viewpoints</b>
Oregon border to mouth of the Smith River	Views of upland topography, forests, agricultural lands, ocean vistas of off shore rocks, sea cliffs, coastal vegetation, and marine life	- Oceanview Drive - Highway 101 north of Indian Road	1. Pelican Bay Beach State Park 2. Kamph Memorial Park 3. Prince Island Court 4. Mouth of the Smith River
Smith River Bottomlands	Views of agricultural lands, rural landscapes and upland forests Occasional vistas of the Smith River and ocean Views of riparian vegetation and waterfowl	- Highway 101 - Fred Haight Drive - Moseley Road - Lower Lake Road - Lake Earl Drive	5. Smith River Public Fishing Access
Lake Earl Area	Views of Lakes Earl and Talawa, open coastal strands, vast dune systems, ag. lands, and distant mountains	- Westerly end of Kellogg Road	6. Kellogg Road 7. Lake Ave. 8. Lakeview Drive 9. Buzzini Road
Pt. St. George to Crescent City	View of the ocean, offshore rocks and marine life Open scenic vistas of the ocean and surrounding landscape	- Radio Road - Pebble Beach Drive - Westerly end of Washington Boulevard	10. Point St. George Public Fishing Access 11. Pebble Beach Drive Turn Outs 12. Pebble Beach Public Fishing Access
Crescent City to Redwood National Park	Views of the ocean, beach, and maritime features of the harbor area and open_wetland beach areas	- Highway 101 - Bluff Road	13. Citizen's Dock & Anchor Way 14. South Beach 15. Highway 101 Vista Point
False Klamath Cove Area	Elevated view of marine environment, steep coastal bluffs, and forested inland slopes	- Highway 101 (Redwood Highway)	16. Cal Trans Vista Point 17. False Klamath Cove Overlook 18. Lagoon Creek Fishing Access
Lower Klamath	Views of the ocean, estuary,	- Patrick Murphy Memorial	19. Requa Hill

River Area	riparian vegetation and forested upland slopes	Drive (Requa Hill Road) - Klamath Beach Road - Coastal Drive (old Highway 101)	Overlook 20. Douglas Mem. Bridge Overlook

Del Norte County – Scenic Resources**

**Note: See Table 6-1 for identification of numbered areas.**

~~Existing Implementation Programs:~~

- ~~• General Plan Land Use Diagrams~~
- ~~• Grading, Excavating & Filling Ordinance~~
- ~~• Zoning Ordinances~~

~~New Implementation Programs:~~

~~Existing programs are deemed sufficient.~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

Other Initiatives

- ~~6.A.1.~~ ● The County should encourage the continuation of existing land uses, where appropriate, to maintain open views in highly scenic areas. ☞ ■ VR V.C.1. (Revised) [Relocated from *PROTECTION OF VISUAL RESOURCES AND SCENIC AREAS – Policies*]
- ~~6.A.2.~~ ● The County should discourage the littering of its beaches, roadways, and other public use areas through the following:
- a. Seek funds for the placement and maintenance of additional litter receptacles for recreational areas, highway turnouts, and other public use areas; and
  - b. Encourage public education and community anti-litter programs. ☞ ■ VR V.C.8. [Relocated from *PROTECTION OF VISUAL RESOURCES AND SCENIC AREAS – Policies*]
- ~~6.A.4.~~ ● ~~...Provisions to be considered include: clustering,~~ Clustering of building sites, density exchange, and open space dedication shall be considered in developing mitigation measures for protecting visual resources from impacts of new development. ☞ ■ [Relocated from *PROTECTION OF VISUAL RESOURCES AND SCENIC AREAS* Policy 6.A.4.b.]
- ~~6.A.5.~~ ● Although timber harvesting will not be eliminated from the scenic area, the County should encourage the State to use selective cutting or thinning, however, patchwork cutting to topography may also be considered. ☞ ■ SH P.6. (Revised) [Relocated from *PROTECTION OF VISUAL RESOURCES AND SCENIC AREAS – Policies*]
- ~~6.A.7.~~ ● The County shall urge State facilities, to use low-energy shielded lights to be directed downward for better efficiency and to minimize nighttime glare. ☞ ■

(New) [Relocated from *PROTECTION OF VISUAL RESOURCES AND SCENIC AREAS – Policies*]

~~6.D.6.~~ ● The County should coordinate with the City in developing an underground utilities priority list utilizing identified scenic highways, scenic drives and/or scenic areas for use when funding for undergrounding is available. ☞ (New) [Relocated from *SCENIC RESOURCE AREAS – Policies*]

~~6.D.8.~~ ● The County should work with the State and Federal government to establish scenic gateways to Redwood National and State Parks and the Smith River National Recreation Area. ☞ (New) [Relocated from *SCENIC RESOURCE AREAS – Policies*]

~~6.D.9.~~ ● The County shall recognize that the degree of success of this section will depend upon the majority of the public's acceptance of it and the implementation measures utilized. ☞ (New) [Relocated from *SCENIC RESOURCE AREAS – Policies*]

~~8.H.5.~~ ● The County shall develop guidelines criteria for the review and permitting of telecommunication facilities to address potential impacts to coastal resources, especially designated visual resources. The guidelines criteria shall encourage require tower co-location, where feasible, and the submittal of visual simulations (e.g., photo simulations) as part of the permitting process. ☞ (New) [Relocated from Part II, Section 8 *TELETRANSPORTATION – Implementation Programs*, revised, and elevated to nonCDP-governing policy status]

**B. SCENIC HIGHWAYS AND DRIVES** [Consolidated with former *SCENIC DRIVES* sub-heading]

**Goal 6.B.1.** To develop and maintain a system of scenic highways for the enjoyment of residents and visitors to Del Norte County.

~~Goal 6.C.~~ **6.B.2.** To develop and maintain a system of scenic drives along county roads for the enjoyment of residents of and visitors to Del Norte County. ☞ *SH CSD.G.1., SH CSD.G.2., SH CSD.G.3., (Revised)* [Relocated from *SCENIC DRIVES – Goals*]

**Policies**

6.B.1. The ~~County should support the~~ maintenance and enhancement of the scenic qualities of coastal areas visible from Highways 101, ~~197, and 199~~, shall be considered in the authorization of any repair, maintenance, or new

construction thereto, while ensuring the improvement of these routes and the economic viability of the area they serve. ~~CC~~ ~~■~~ SH P.1. (Revised)

6.B.2. ~~The County should continue to limit~~ Except as otherwise preempted, new on- and off-site outdoor commercial advertising, including billboards, shall be limited and ~~shall pursue~~ removal of illegally erected signs within designated scenic highway corridors or in designated gateway areas shall be pursued in the review and conditioning of development projects, where feasible, in order to protect visual quality. ~~The County should support participation in centralized signage programs and develop a sign amortization program if funding is available.~~ ~~CC~~ ~~■~~ (New) [Struck provision moved to SCENIC HIGHWAYS AND DRIVES – Other Initiatives]

~~6.B.3. The County shall continue to work with Caltrans and the States of Oregon and Washington in updating the U.S. Tri-State Pacific Coast Scenic Byway Corridor Management Plan to reflect present conditions.~~ ~~CC~~ ~~■~~ (New) [Moved to SCENIC HIGHWAYS AND DRIVES – Other Initiatives]

~~6.B.4. The County should encourage coordination of scenic route programs among local, regional, and state jurisdictions, recognizing that scenic routes are a resource of more than local importance.~~ ~~CC~~ ~~■~~ (New) [Moved to SCENIC HIGHWAYS AND DRIVES – Other Initiatives]

~~6.B.5.~~ 6.B.3. ~~The County should continue to utilize~~ Except as otherwise preempted, design criteria ~~for~~ shall be utilized in the permitting of outdoor advertising, ~~such as~~ along designated scenic highway or drive roadsides for both onsite business signs and offsite billboards and signage, which include:

- a. The signs ~~should~~ shall be sufficient in size to describe or indicate the service available, but not overly large as to be disharmonious with, or obstruct views to and along, scenic coastal areas;
- b. Off-site signs ~~should~~ shall be restricted to commercial or industrially zoned areas; and
- c. The signs ~~should~~ shall meet or exceed the requirements of the County sign ordinance. ~~CC~~ ~~■~~ SH P.3. (Revised)

~~6.B.6. The County should encourage Caltrans to establish a safe gateway to California on Highway 101 near the state border.~~ ~~CC~~ ~~■~~ (New) [Moved to SCENIC HIGHWAYS AND DRIVES – Other Initiatives]

~~[See also Policy 6.D.8.]~~

~~Existing Implementation Programs:~~

~~• Sign Ordinance~~

~~New Implementation Programs:~~

~~Existing programs are deemed sufficient.~~ [Replace with universal cross-reference to *Local Coastal Program Zoning Enabling Ordinance* and other development regulation components of the Implementation Plan within *Part I – Summary*]

Other Initiatives

• The County should support participation in centralized signage programs and develop a sign amortization program if funding is available. [Relocated from *SCENIC HIGHWAYS AND DRIVES* Policy 6.B.2.]

~~6.B.3.~~ • The County shall continue to work with Caltrans and the States of Oregon and Washington in updating the *U.S. Tri-State Pacific Coast Scenic Byway Corridor Management Plan* to reflect present conditions.  (New)

~~6.B.4.~~ • The County should encourage coordination of scenic route programs among local, regional, and state jurisdictions, recognizing that scenic routes are a resource of more than local importance.  (New)

~~6.B.6.~~ • The County should encourage Caltrans to establish a safe gateway to California on Highway 101 near the state border.  (New)

~~6.C.1.~~ • The County should continue the maintenance, enhancement, and promotion of the scenic qualities of local county roads.  *SH CSD.P.1*

~~6.C.2.~~ • The County should consider the following roads as part of potential scenic drives:

**Suggested Modification No. 8: (Public Facilities and Services Element)**

All changes to the *Public Facilities and Services*

## SECTION 7

### PUBLIC FACILITIES AND SERVICES

This section contains goals, policies, and implementation programs that establish the framework for the provision of public facilities and services to meet the demand created by existing and future development in Del Norte County. The goals and policies in this section are organized according to the following categories, each of which relates to a particular facility or service. They include:

- **7.A.** General Public Facilities and Services;
- **7.B.** Water Supply and Delivery;
- **7.C.** Wastewater Treatment, Collection, and Disposal;
- **7.D.** Solid waste Disposal;
- **7.E.** School Facilities;
- **7.F.** Libraries;
- **7.G.** Law Enforcement;
- **7.H.** Fire Protection;
- **7.I.** Utilities;
- **7.J.** Storm and Surface Drainage; and
- **7.K.** Airports.

#### **7A.** GENERAL PUBLIC FACILITIES

**Goal 7.A.** To ensure the effective and efficient provision of public facilities and services for existing and new development.

#### **Policies**

**7.A.1.** **New residential, commercial, or industrial development, except as otherwise provided in this Coastal Land Use Plan, shall be located within, contiguous with, or in close proximity to, existing developed areas able to accommodate it or, where such areas are not able to accommodate it, in other areas with adequate public services and where it will not have significant adverse effects, either individually or cumulatively, on coastal resources.**

- ~~7.A.1. 7.A.2.~~ ~~The County shall ensure through the development review process that adequate public facilities and services are available to serve new development when required. The County shall not approve new New residential, commercial, or industrial development shall not be approved where existing facilities are inadequate unless the applicant can demonstrate that all necessary facilities will be installed or adequately financed and maintained (through fees or other means) without any significant adverse effect, individually, or cumulatively, on coastal resources. ☞ (New)~~
- ~~7.A.2. 7.A.3.~~ ~~The County shall direct high High density growth shall be directed to those areas that are already served by public infrastructure and utilities.~~ ☞ (New)
- 7.A.3. ~~The County shall encourage new development to contribute its fair share to providing all public services and infrastructure necessary to serve that development.~~ ☞ (New) [Relocated to PUBLIC FACILITIES AND SERVICES – GENERAL PUBLIC FACILITIES – Other Initiatives]
- 7.A.4. ~~The County will limit development~~ Development densities shall be limited in areas where the County determines that emergency response time is excessive. ☞ (New)
- ~~7.A.5. The County shall continue to coordinate with local service districts and utility providers to help ensure provision of services consistent with this General Plan in the most feasible manner possible.~~ ☞ (New) [Relocated to PUBLIC FACILITIES AND SERVICES – GENERAL PUBLIC FACILITIES – Other Initiatives]
- 7.A.6 Where existing or planned public works facilities can accommodate only a limited amount of new development within the Coastal Zone, the priority for public services within the Coastal Zone shall be first to any parcel financially assessed and then to unassessed parcels in the following order:
- a. essential public services
  - b. basic industries vital to the economic health of the region, state or nation, such as agriculture
  - c. coastal dependent land uses
  - ~~d. visitor serving land uses~~
  - ~~e. residential land uses~~
  - ~~f. commercial recreation~~
  - d. public recreation
  - e. commercial recreation
  - f. visitor-serving land uses
  - g. other uses. ☞ (New)

~~7.A.1.7.A.7~~ ~~The County shall ensure through the development review process~~ New development shall demonstrate that adequate public facilities and services are available to serve ~~new development when required~~ it upon completion.

~~7.A.3.7.A.8~~ ~~The County shall encourage~~ New development ~~to~~ shall contribute its fair share to providing all public services and infrastructure necessary to serve that development.  (New)

7.A.9 The location and amount of new development should maintain and enhance public access to the coast by (1) facilitating the provision or extension of transit service, (2) providing commercial facilities within or adjoining residential development or in other areas that will minimize the use of coastal access roads, (3) providing non-automobile circulation within the development, (4) providing adequate parking facilities or providing substitute means of serving the development with public transportation, (5) assuring the potential for public transit for high intensity uses such as high-rise office buildings, and by (6) assuring that the recreational needs of new resident will not overload nearby coastal recreation areas by correlating the amount of development with local park acquisition and development plans with the provision of onsite recreational facilities to serve the new development.

7.A.10 No permit for development shall be approved unless it can be demonstrated that such development will be served upon completion with adequate services, including but not limited to potable water; wastewater treatment; storm drainage; fire and emergency medical response; police protection; transportation; schools; and solid waste collection and disposal as applicable to the proposed development.

a. Demonstration of adequate water and sewer facilities shall include evidence that adequate capacity exists within the system to serve the development and all other known and foreseeable development the system is committed to serving, and that the municipal system will provide such service for the development;

b. Demonstration of adequate road facilities shall include information demonstrating that (i) access roads connecting to a public street can be developed in locations and in a manner consistent with LCP policies and (ii) that the traffic generated by the proposed development, and all other known and foreseeable development, will not cause Levels of Service (LOS) of roads, streets, and intersections with the City to reduce below accepted LOS standards.

- c. Lack of adequate services to serve the proposed development shall be grounds for denial of the development.

### Other Initiatives

- ~~7.A.5.~~ ● The County shall continue to coordinate with local service districts and utility providers to help ensure provision of services consistent with this General Plan in the most feasible manner possible.  (New)

### ~~Existing Implementation Programs:~~

- ~~Wells and Preservation of Ground Water Ordinance~~
- ~~Onsite Sewage Disposal Systems Ordinance~~
- ~~Subdivision Ordinance~~
- ~~General Plan Land Use Diagram Maps~~

### ~~New Implementation Programs:~~

~~Existing programs are deemed sufficient.~~

## 7.B. WATER SUPPLY AND DELIVERY

Goal 7.B. To ensure the availability of an adequate and safe water supply and the maintenance of high quality water for residents of and visitors to Del Norte County.

### Policies

- 7.B.1. New or expanded water supply and delivery public works facilities shall be designed and limited to accommodate needs generated by development or uses planned for and permitted consistent with the provisions of this Coastal Land Use Plan. Special districts shall not be formed or expanded except where assessment for, and provision of, water service would not induce new development inconsistent with this division. Where existing or planned water supply and delivery public works facilities can accommodate only a limited amount of new development, provision of these services to: (1) coastal dependent land uses, (2) essential public services and basic industries vital to the economic health of the region, state, or nation such as agriculture, (3) public recreation, (4) commercial recreation, and (5) visitor-serving land uses shall not be precluded by other development.

- 7.B.1. In areas of identified water deficiency, ~~the County shall approve~~ new development shall only be approved only if it can be demonstrated that an adequate water supply to serve such development will be available upon completion and is demonstrated and require that water supplies serving the new development will meet State water quality standards. ~~☞~~ ~~■~~ ~~(New)~~
- 7.B.2. The County shall restrict public water service in General Plan resource land use areas unless there are health problems in areas of existing development that would restrict use of their own water supply. ~~☞~~ ~~■~~ ~~(New)~~
- ~~7.B.3. The County shall consider provision of a public water system to designated urban areas a high priority. ☞ ■ (New) [Relocated to PUBLIC FACILITIES AND SERVICES – WATER SUPPLY AND DELIVERY – Other Initiatives]~~
- ~~7.B.4. The County shall utilize the state definition of “public water system” when evaluating services and development and shall continue to apply state and local regulations for water well development. ☞ ■ (New) [Relocated to PUBLIC FACILITIES AND SERVICES – WATER SUPPLY AND DELIVERY – Other Initiatives]~~
- ~~7.B.5. The County recognizes the need to have a regional water provider for the Crescent City urban area. However, if the regional provider does not meet this responsibility, the County shall endeavor to provide or in other ways support the provision of water to the unincorporated community. ☞ ■ (New)~~
- ~~7.B.6. This policy number left intentionally blank.~~
- 7.B.7. ~~In the Coastal Zone, there shall be no extension of public~~ Public water services shall not be extended beyond the urban-rural boundary except in the following cases:
- a. The extension of water services beyond the Ship Ashore area north to Mouth of Smith River Road; ~~☞ PW-GEN.1.~~
  - b. The alternate Crescent City water line from booster pump No. 1 to the urban area crossing Jordan Creek at Lake Earl Drive, southerly on Lake Earl Drive and into Northcrest Drive and the urban area; ~~☞ PW-GEN.1.~~
  - c. The extension of water service south of Crescent City approximately ½ mile to serve a pocket of visitor serving commercial development on Highway 101 which include an existing motel, restaurant, residence, shop, and two vacant parcels (shown on page 3 of Assessors Parcel Book 115); ~~☞ PW-GEN.1., PW-CCWS.2.~~
  - d. The extension of the water main on Pebble Beach Dr. from Hemlock to

McNamara Field, without any private hook-ups between, for purposes of serving airport and public facilities and providing additional water pressure by completing the main loop. ~~☞ LUH.D.1.~~

- e. The extension of water services district water outside of the Crescent City Urban Area to the Rural Neighborhood two units per acre density on the west side of Elk Valley Road at the Norris Avenue intersection (Harbor View Subdivision area). ~~☞ PW-GEN.1.~~

7.B.8. When available, the Klamath Community Services District may extend water beyond the Klamath urban boundary to serve the commercial area immediately north of the townsite. ☞ PW-KCSD 2.

~~7.B.9. The County shall encourage all providers of public water to plan for development pursuant to this General Plan.~~ ☞ (New) [Relocated to PUBLIC FACILITIES AND SERVICES – WATER SUPPLY AND DELIVERY – Other Initiatives]

[See also Policy 3.J.3., 3.H.2., 3.K.3.]

### Other Initiatives

~~7.B.3.~~ • The County shall consider provision of a public water system to designated urban areas a high priority. ☞ (New)

~~7.B.4.~~ • The County shall utilize the state definition of “public water system” when evaluating services and development and shall continue to apply state and local regulations for water well development. ☞ (New)

~~7.B.5.~~ • The County recognizes the need to have a regional water provider for the Crescent City urban area. However, if the regional provider does not meet this responsibility, the County shall endeavor to provide or in other ways support the provision of water to the unincorporated community. ☞ (New)

~~7.B.9.~~ • The County shall encourage all providers of public water to plan for development pursuant to this General Plan. ☞ (New)

### ~~Existing Implementation Programs:~~

- ~~• Wells and Preservation of Ground Water Ordinance~~
- ~~• General Plan~~

### ~~New Implementation Programs:~~

~~Existing programs deemed sufficient.~~

7.C. WASTEWATER TREATMENT, COLLECTION, AND DISPOSAL

Goal 7.C. To ensure adequate wastewater collection, treatment, and disposal.

Policies

7.C.1. ~~This policy number left intentionally blank. New or expanded wastewater collection, treatment, and disposal public works facilities shall be designed and limited to accommodate needs generated by development or uses planned for and permitted consistent with the provisions of this Coastal Land Use Plan. Special districts shall not be formed or expanded except where assessment for, and provision of, wastewater service would not induce new development inconsistent with this division. Where existing or planned wastewater collection, treatment, and disposal public works facilities can accommodate only a limited amount of new development, provision of these services to coastal dependent land use, essential public services and basic industries vital to the economic health of the region, state, or nation, public recreation, commercial recreation, and visitor-serving land uses shall not be precluded by other development.~~

~~7.C.2. The County shall promote efficient water and reduced wastewater system use.~~  (New) [Relocated to PUBLIC FACILITIES AND SERVICES – WASTEWATER TREATMENT, COLLECTION, AND DISPOSAL – Other Initiatives]

~~7.C.3. The regional wastewater treatment provider and/or the County Services Area shall investigate establishing or updating satellite wastewater treatment facilities to reduce hydraulic and nutrient loading on the Crescent City Wastewater Treatment Plant.~~  (New) [Relocated to PUBLIC FACILITIES AND SERVICES – WASTEWATER TREATMENT, COLLECTION, AND DISPOSAL – Other Initiatives]

~~7.C.4.~~ 7.C.2. In the Crescent City urban area, ~~the County Services Areas shall consider~~ priority for community sewer system improvements, connections and/or upgrades within existing service boundaries are as follows:

- Highest priority - to areas which are already served and assessed;
- Medium priority - to areas which are not yet assessed but are immediately adjacent to serviced areas such as south of Old Mill Road, northeast Bertsch, multifamily uses at Summer Lane, and southern Parkway; and

- Low priority - to areas which are physically removed from existing development and may not require service for 10-20 years from adoption of this plan.  (New)

~~7.C.5. In order to accommodate projected growth on currently unassessed lands within its Crescent City urban area boundaries, the County Service Area shall plan for additional improvements and either negotiate additional sewage treatment with the City of Crescent City or provide for additional treatment methods.~~  (New) [Relocated to PUBLIC FACILITIES AND SERVICES – WASTEWATER TREATMENT, COLLECTION, AND DISPOSAL – Other Initiatives]

~~7.C.6. This policy number left intentionally blank.~~

~~7.C.7. The County shall encourage all providers of community sewage services to plan for development pursuant to this General Plan.~~  (New) [Relocated to PUBLIC FACILITIES AND SERVICES – WASTEWATER TREATMENT, COLLECTION, AND DISPOSAL – Other Initiatives]

~~7.C.8. 7.C.3. The County may consider approval of projects~~ **Projects** within Rural land use areas which utilize on-site communal or package sewage disposal systems, may only be approved, however, if said systems (1) is sited and designed to avoid all significant adverse effects on coastal resources, (2) shall be is designed to serve only the subject project at its designated land use densities, and (3) ~~shall be~~ is owned and administered by homeowners or other fiscally responsible agency.  (New)

[See also Policy 1.B.10.]

### Other Initiatives

~~7.C.2.~~ • The County shall promote efficient water and reduced wastewater system use.  (New)

~~7.C.3.~~ • The regional wastewater treatment provider and/or the County Services Area shall investigate establishing or updating satellite wastewater treatment facilities to reduce hydraulic and nutrient loading on the Crescent City Wastewater Treatment Plant.  (New)

~~7.C.5.~~ • In order to accommodate projected growth on currently unassessed lands within its Crescent City urban area boundaries, the County Service Area shall plan for additional improvements and either negotiate additional sewage treatment with

the City of Crescent City or provide for additional treatment methods.   
(New)

**7.C.7.** • The County shall encourage all providers of community sewage services to plan for development pursuant to this General Plan.  (New)

~~Existing Implementation Programs:~~

- ~~• General Plan Land Use Diagram Maps~~
- ~~• Local Agency Formation Commission~~
- ~~• Sewer Ordinance~~
- ~~• Onsite Sewage Disposal Systems Ordinance~~

~~New Implementation Programs:~~

~~7.1 In the Crescent City urban area, the County Service Area shall plan for additional improvements to accommodate projected growth and either negotiate additional sewage treatment with the City of Crescent City or provide for additional treatment methods. (Policy 7.C.5)~~

~~Responsibility: County Community Service Area  
Time Frame: First five years~~

**7.D. SOLID WASTE DISPOSAL**

**Goal 7.D.** To ensure the safe and efficient disposal or recycling of solid waste generated in Del Norte County.

**Policies**

~~7.D.1. The County shall direct the solid waste management agency in ensuring that solid waste facilities do not violate State standards for contamination of surface or groundwater.  (New) [Relocated to PUBLIC FACILITIES AND SERVICES – SOLID WASTE DISPOSAL – Other Initiatives]~~

**7.D.1. New or expanded solid waste collection and disposal public works facilities shall be designed and limited to accommodate needs generated by development or uses planned for and permitted consistent with the provisions of this Coastal Land Use Plan. Special districts shall not be formed or expanded except where assessment for, and provision of, solid waste service would not induce new development inconsistent with this division. Where existing or planned solid waste collection and disposal public works facilities can accommodate only a limited amount of new development, provision of these services to (1) coastal dependent land use, (2)**

essential public services and basic industries vital to the economic health of the region, state, or nation, (3) public recreation, (4) commercial recreation, and (5) visitor-serving land uses shall not be precluded by other development.

~~7.D.2. The County shall continue planning for the eventual full utilization of the Crescent City Landfill. This planning may include identification of alternative sites and investigation of the long-term economic feasibility of alternative disposal methods. ☞ ■ PW-SWM.2. (Revised) [Relocated to PUBLIC FACILITIES AND SERVICES – SOLID WASTE DISPOSAL – Other Initiatives]~~

~~7.D.3. The County should seek funding to accommodate alternative disposal methods. ☞ ■ PW-SWM.4. (Revised) [Relocated to PUBLIC FACILITIES AND SERVICES – SOLID WASTE DISPOSAL – Other Initiatives]~~

~~7.D.4. The County shall promote, in conjunction with the solid waste management agency, maximum use of solid waste source reduction, recycling, composting, and environmentally safe transformation of wastes. ☞ ■ (New) [Relocated to PUBLIC FACILITIES AND SERVICES – SOLID WASTE DISPOSAL – Other Initiatives]~~

~~7.D.5. 7.D.2. The solid waste management agency in conjunction with the County of Del Norte shall require that all All new development complies shall comply with applicable provisions of the *Del Norte Integrated Waste Management Plan*. ☞ ■ (New)~~

### Other Initiatives

~~7.D.1. • The County shall direct the solid waste management agency in ensuring that solid waste facilities do not violate State standards for contamination of surface or groundwater. ☞ ■ (New)~~

~~7.D.2. • The County shall continue planning for the eventual full utilization of the Crescent City Landfill. This planning may include identification of alternative sites and investigation of the long-term economic feasibility of alternative disposal methods. ☞ ■ PW-SWM.2. (Revised)~~

~~7.D.3. • The County should seek funding to accommodate alternative disposal methods. ☞ ■ PW-SWM.4. (Revised)~~

~~7.D.4. • The County shall promote, in conjunction with the solid waste management agency, maximum use of solid waste source reduction, recycling, composting, and environmentally safe transformation of wastes. ☞ ■ (New)~~

~~Existing Implementation Programs:~~

- ~~• Del Norte Integrated Waste Management Plan~~
- ~~• Garbage Ordinance~~

~~New Implementation Programs:~~

~~7.2 The County solid waste management agency shall regularly review and revise, as necessary, the *Del Norte Integrated Waste Management Plan* for compliance with the above policies and State regulations.~~

~~Responsibility: Solid Waste Management Authority  
Time Frame: Ongoing~~

7.E. SCHOOL FACILITIES

Goal 7.E. To provide for the educational needs of Del Norte County residents.

Policies

~~7.E.1. The County shall encourage the Del Norte Unified School District (DNUSD) to work cooperatively in monitoring housing, population, and school enrollment trends and in planning for future school facility needs, and shall assist the DNUSD in locating appropriate sites for new schools. (C) (New)~~  
[Relocated to PUBLIC FACILITIES AND SERVICES – SCHOOL FACILITIES – Other Initiatives]

~~7.E.2. The County shall encourage the location of schools in areas with safe pedestrian and bicycle access. (C) (New)~~ [Relocated to PUBLIC FACILITIES AND SERVICES – SCHOOL FACILITIES – Other Initiatives]

~~7.E.3. The County shall encourage the DNUSD to coordinate the planning of school facilities and should involve the County in the early stages of the land use planning process. (C) (New)~~ [Relocated to PUBLIC FACILITIES AND SERVICES – SCHOOL FACILITIES – Other Initiatives]

~~7.E.4. 7.E.2. The County should plan and approve residential Residential uses in those areas that are most accessible to school sites shall be given priority in consideration over more distant sites in order to enhance neighborhoods, minimize transportation requirements and costs, and minimize safety problems. (C) (New)~~

~~7.E.5. Whenever possible, the County shall support and participate with the DNUSD in joint development of recreation areas and multi-purpose buildings. (New) [Relocated to PUBLIC FACILITIES AND SERVICES – SCHOOL FACILITIES – Other Initiatives]~~

~~7.E.6. The County and the DNUSD should work together in using existing school facilities for non-school-related and child care activities. (New) [Relocated to PUBLIC FACILITIES AND SERVICES – SCHOOL FACILITIES – Other Initiatives]~~

~~7.E.7. The County shall continue to support and promote the development of higher education facilities in Del Norte County. (New) [Relocated to PUBLIC FACILITIES AND SERVICES – SCHOOL FACILITIES – Other Initiatives]~~

### Other Initiatives

~~7.E.1. ●~~ The County shall encourage the Del Norte Unified School District (DNUSD) to work cooperatively in monitoring housing, population, and school enrollment trends and in planning for future school facility needs, and shall assist the DNUSD in locating appropriate sites for new schools. (New)

~~7.E.2. ●~~ The County shall encourage the location of schools in areas with safe pedestrian and bicycle access. (New)

~~7.E.3. ●~~ The County shall encourage the DNUSD to coordinate the planning of school facilities and should involve the County in the early stages of the land use planning process. (New)

~~7.E.5. ●~~ Whenever possible, the County shall support and participate with the DNUSD in joint development of recreation areas and multi-purpose buildings. (New)

~~7.E.6. ●~~ The County and the DNUSD should work together in using existing school facilities for non-school-related and child care activities. (New)

~~7.E.7. ●~~ The County shall continue to support and promote the development of higher education facilities in Del Norte County. (New)

### Implementation Programs

#### Policy statements only.

## 7.F. LIBRARIES

**Goal 7.F.** To provide for library services throughout the county.

### **Policies**

#### No Coastal development permit-governing policies; programmatic encouragements only.

~~7.F.1. The County shall continue to encourage and support library district endeavors to provide library services throughout the county. ☞ (New)~~  
[Relocated to *PUBLIC FACILITIES AND SERVICES – LIBRARIES – Other Initiatives*]

~~7.F.2. The County encourages the library district to consider the extension of library services to county rural areas by means such as bookmobile services and/or cooperative arrangements with other special districts or agencies such as the Del Norte Unified School District, local fire districts, or the Grange. ☞ (New)~~  
[Relocated to *PUBLIC FACILITIES AND SERVICES – LIBRARIES – Other Initiatives*]

### Other Initiatives

~~7.F.1. ●~~ The County shall continue to encourage and support library district endeavors to provide library services throughout the county. ☞ (New)

~~7.F.2. ●~~ The County encourages the library district to consider the extension of library services to county rural areas by means such as bookmobile services and/or cooperative arrangements with other special districts or agencies such as the Del Norte Unified School District, local fire districts, or the Grange. ☞ (New)

### ~~Implementation Programs~~

### ~~Policy statements only.~~

## **LAW ENFORCEMENT**

**Goal 7.G.** To ensure the prompt and efficient provision of law enforcement facility and service needs.

### **Policies**

**No coastal development permit-governing policies; programmatic encouragements only.**

~~7.G.1. Within the County's overall budgetary constraints, the County shall provide law enforcement facilities (including patrol and other vehicles, necessary equipment, and support personnel) sufficient to maintain adequate service standards. (C) (New)~~  
(New) [Relocated to PUBLIC FACILITIES AND SERVICES – LAW ENFORCEMENT – Other Initiatives]

~~7.G.2. The County shall, through adequate staffing and patrol arrangements, endeavor to maintain the minimum feasible response times for deputy calls. (C) (New)~~  
[Relocated to PUBLIC FACILITIES AND SERVICES – LAW ENFORCEMENT – Other Initiatives]

~~7.G.3. The County shall monitor law enforcement response times and patrol time to review staffing requirements necessary to maintain established levels of service. (C) (New)~~  
(New) [Relocated to PUBLIC FACILITIES AND SERVICES – LAW ENFORCEMENT – Other Initiatives]

~~7.G.4. The County shall support public safety programs, such as neighborhood watch, child identification and fingerprinting, and other public education efforts. (C) (New)~~  
(New) [Relocated to PUBLIC FACILITIES AND SERVICES – LAW ENFORCEMENT – Other Initiatives]

**Other Initiatives**

~~7.G.1.~~ ● Within the County's overall budgetary constraints, the County shall provide law enforcement facilities (including patrol and other vehicles, necessary equipment, and support personnel) sufficient to maintain adequate service standards. (C) (New)

~~7.G.2.~~ ● The County shall, through adequate staffing and patrol arrangements, endeavor to maintain the minimum feasible response times for deputy calls. (C) (New)

~~7.G.3.~~ ● The County shall monitor law enforcement response times and patrol time to review staffing requirements necessary to maintain established levels of service. (C) (New)

~~7.G.4.~~ ● The County shall support public safety programs, such as neighborhood watch, child identification and fingerprinting, and other public education efforts. (C) (New)

**Implementation Programs**

**Policy statements only.**

## FIRE PROTECTION

**Goal 7.H.** To protect residents of and visitors to Del Norte County from injury and loss of life and to protect property from fires. *(New)*

### Policies

#### No coastal development permit-governing policies; programmatic encouragements only.

~~7.H.1. The County shall encourage local fire protection agencies in Del Norte County to maintain and improve their Insurance Service Organization (ISO) ratings. (C) (New) [Relocated to PUBLIC FACILITIES AND SERVICES – FIRE PROTECTION – Other Initiatives]~~

~~7.H.2. The County shall support the location of new fire stations to achieve a service level capability consistent with existing and planned land uses. (C) (New) [Relocated to PUBLIC FACILITIES AND SERVICES – FIRE PROTECTION – Other Initiatives]~~

~~7.H.3. The County shall continue to provide local fire districts the opportunity to review proposed projects for compliance with fire safety standards per the Uniform Fire Code and other State and local ordinances. (C) (New) [Relocated to PUBLIC FACILITIES AND SERVICES – FIRE PROTECTION – Other Initiatives]~~

~~7.H.4. The County shall cooperate with local fire protection districts who inventory and propose to eliminate structurally unsafe and fire hazardous housing structures that are beyond repair or rehabilitation. (C) (New) [Relocated to PUBLIC FACILITIES AND SERVICES – FIRE PROTECTION – Other Initiatives]~~

~~7.H.5. The County shall continue to encourage local fire districts to maintain and strengthen automatic aid agreements to maximize efficient use of available resources. (C) (New) [Relocated to PUBLIC FACILITIES AND SERVICES – FIRE PROTECTION – Other Initiatives]~~

[See also section 2.E.]

### Other Initiatives

- ~~7.H.1.~~ ● The County shall encourage local fire protection agencies in Del Norte County to maintain and improve their Insurance Service Organization (ISO) ratings. (New)
- ~~7.H.2.~~ ● The County shall support the location of new fire stations to achieve a service level capability consistent with existing and planned land uses. (New)
- ~~7.H.3.~~ ● The County shall continue to provide local fire districts the opportunity to review proposed projects for compliance with fire safety standards per the Uniform Fire Code and other State and local ordinances. (New)
- ~~7.H.4.~~ ● The County shall cooperate with local fire protection districts who inventory and propose to eliminate structurally unsafe and fire-hazardous housing structures that are beyond repair or rehabilitation. (New)
- ~~7.H.5.~~ ● The County shall continue to encourage local fire districts to maintain and strengthen automatic aid agreements to maximize efficient use of available resources. (New)

### ~~Implementation Programs~~

### ~~Policy statements only.~~

## UTILITIES

Goal 7.I. To provide efficient and cost-effective utilities.(New)

### Policies

~~7.I.1. The County shall work with utility companies for appropriate expansion of local systems in urban and rural areas. (New) [Relocated to PUBLIC FACILITIES AND SERVICES – UTILITIES – Other Initiatives]~~

7.I.1. New or expanded public utility facilities shall be designed and limited to accommodate needs generated by development or uses planned for and permitted consistent with the provisions of this Coastal Land Use Plan. Special districts shall not be formed or expanded except where assessment for, and provision of, public utility services would not induce new development inconsistent with this division. Where existing or planned public utility facilities can accommodate only a limited amount of new development, provision of these services to coastal dependent land use,

**essential public services and basic industries vital to the economic health of the region, state, or nation, public recreation, commercial recreation, and visitor-serving land uses shall not be precluded by other development.**

[See also Policies 6.A.7. , 6.A.8., 6.D.5, 6.D.6., and 8.H.1 - 8.H.3]

### **Other Initiatives**

- ~~7.I.1.~~ ● The County shall work with utility companies for appropriate expansion of local systems in urban and rural areas. ~~☞~~ (New)

### **Implementation Programs**

### **Policy statements only.**

## **STORM AND SURFACE DRAINAGE**

**Goal 7.J.** To ensure effective and efficient provision of storm and surface drainage systems for existing and new development.

### **Policies**

- ~~7.J.1.~~ ~~The County shall continue to require and coordinate storm and surface drainage plans for developed areas and new development projects.~~ ~~☞~~ (New) [Relocated to *PUBLIC FACILITIES AND SERVICES – STORM AND SURFACE DRAINAGE – Other Initiatives*]

- 7.J.1. New or expanded stormwater and drainage treatment, collection, and conveyance public works facilities shall be designed and limited to accommodate needs generated by development or uses planned for and permitted consistent with the provisions of this Coastal Land Use Plan. Special districts shall not be formed or expanded except where assessment for, and provision of, stormwater facilities would not induce new development inconsistent with this division. Where existing or planned stormwater collection, treatment, and conveyance public works facilities can accommodate only a limited amount of new development, provision of these services to coastal dependent land use, essential public services and basic industries vital to the economic health of the region, state, or nation, public recreation, commercial recreation, and visitor-serving land uses shall not be precluded by other development.

- 7.J.2. ~~The County shall continue to utilize natural~~ Natural drainage courses for storm and surface drainage purposes shall be utilized rather than the

channelization of streams for stormwater runoff, provided: (a) development is sited and designed to preserve the infiltration, purification, detention, and retention functions of the natural drainage course, to the maximum extent practicable; and (b) the drainage is conveyed from the developed area of the site in a non-erosive manner. ☞ (New)

7.J.3. ~~The County shall require development~~ Development shall be required to be located outside of 100 year storm drainage flow and retention areas, except road crossings which shall be designed to avoid impediment of event flows. ☞ (New)

7.J.4. The County shall require preliminary drainage reports for residential or subdivision projects exceeding five units, for commercial or industrial development, where a 100 year flood area is designated by a FEMA or County Drainage Plan on a project site, where construction is proposed within a drainage corridor (such as a road or highway crossing), or where the environmental review process identifies drainage issues. ☞ (New)

7.J.5. ~~The County shall continue to provide ongoing~~ Ongoing maintenance of designated storm drainage courses, whether natural or manmade, ~~to provide~~ shall be performed utilizing the protective measures set forth in the County Road Maintenance and Drainage Systems Practice Manual, to effective drainage functions. ☞ (New)

~~7.J.6. As development occurs, the County should prepare an updated drainage plan for the Crescent City Urban Area.~~ ☞ (New) [Relocated to *PUBLIC FACILITIES AND SERVICES – STORM AND SURFACE DRAINAGE – Other Initiatives*]

[See also Policies 1.B.8, 1.C.9, 1.C.10, 1.E.22, 1.E.31]

### Other Initiatives

~~7.J.1.~~ ● The County shall continue to require and coordinate storm and surface drainage plans for developed areas and new development projects. ☞ (New)

~~7.J.6.~~ ● As development occurs, the County should prepare an updated drainage plan for the Crescent City Urban Area. ☞ (New)

### Implementation Programs

~~Policy statements only.~~

## AIRPORTS

~~Policies~~

[See Policies 8.F.1 to 8.F.10.]

~~Implementation Programs~~

~~Policy statements only.~~

**Suggested Modification No. 9: (Transportation and Circulation Element)**

All changes to the *Transportation and Circulation* Element

## SECTION 8

# TRANSPORTATION AND CIRCULATION

This section outlines the County's goals, policies, and programs for the continued development and enhancement of Del Norte County's transportation and circulation system. The section includes goals, policies, and programs addressing the following subjects:

- **8.A.** State Highways;
- **8.B.** County Roads;
- **8.C.** Public Transportation;
- **8.D.** Transportation Control Measures (TCM);
- **8.E.** Non-Motorized Transportation;
- **8.F.** Air Transportation;
- **8.G.** Maritime Transportation; and
- **8.H.** Teletransportation.

### **8.A. STATE HIGHWAYS**

**Goal 8.A.** To plan for the long-range planning and development of Del Norte County's State Highway system to ensure the safe and efficient movement of people and goods.

#### **Policies**

#### **No Coastal development permit-governing policies; programmatic encouragements only.**

~~8.A.1. The County shall encourage Caltrans to continue to maintain Highway 101's availability to county communities at all times.~~ **☞** **■** (New) [Relocated to *TRANSPORTATION AND CIRCULATION – STATE HIGHWAYS – Other Initiatives*]

~~8.A.2. This policy number left intentionally blank.~~

~~8.A.3. The County shall continue to actively encourage Caltrans and the Regional Transportation Planning Agency to develop facilities for improved access into the county via Highway 101 and 199.~~ **☞** **■** *CIRC.SH.R.4. (Revised)*

~~8.A.4. This policy number left intentionally blank.~~

~~8.A.5. This policy number left intentionally blank.~~

~~8.A.6. The County shall encourage the Office of Emergency Services to review alternative emergency access in the event of temporary closure of Highways 101 or 199.~~  (New)

~~8.A.7. The County shall continue to participate in the Highway Functional Classification System program utilized by Caltrans and the Federal Highway Administration (FHWA).~~  (New) [Relocated to TRANSPORTATION AND CIRCULATION – STATE HIGHWAYS – Other Initiatives]

~~8.A.8. The County acknowledges that Caltrans has existing adopted overall route concepts for its highways, shown in Table 8-1, notes that full construction of these concepts may not occur or be necessary during the planning period of this General Plan (i.e., by 2020), and supports development of such concepts into an overall 50 year highway plan which addresses the need for and location of freeway/expressway improvements.~~  (New) [Relocated to TRANSPORTATION AND CIRCULATION – STATE HIGHWAYS – Other Initiatives]

<b>TABLE 8-1</b>		
<b>CALTRANS STATE HIGHWAY ROUTE CONCEPTS</b>		
<b>HIGHWAY</b>	<b>SEGMENT</b>	<b>CONCEPT</b>
<del>Highway 101</del>	<del>South Klamath to Wilson Creek Cushing Creek Crescent City Flat Route 199 to Oregon Border</del>	<del>Four lane freeway/expressway Two lane conventional highway with passing lanes Four lane freeway bypass Four lane freeway/expressway</del>
<del>Highway 199</del>	<del>All</del>	<del>Two lane conventional highway with passing lanes</del>
<del>Highway 197</del>	<del>All</del>	<del>Two lane conventional highway</del>
<del>Highway 169</del>	<del>All</del>	<del>Two lane conventional highway</del>
<del>Source: Caltrans, 1997.</del>		

- ~~8.A.9. The County supports development of a 20-year highway route concept plan by the Regional Transportation Planning Agency and Caltrans which reflects conventional two-lane highway with passing lanes and/or four-lane concepts for all highways in the County, except for the existing Highway 101 freeway segments at Klamath and Crescent City, and Highway 101 within the urban Crescent City area. (C) (New) [Relocated to TRANSPORTATION AND CIRCULATION – STATE HIGHWAYS – Other Initiatives]~~
- ~~8.A.10. The County shall encourage the Regional Transportation Planning Agency and Caltrans to adopt a 20-year route concept for Highway 101 through the Crescent City area which provides for improvement of the existing roadway in its present alignment. (C) (New) PW R.3. (Revised) [Relocated to TRANSPORTATION AND CIRCULATION – STATE HIGHWAYS – Other Initiatives]~~
- ~~8.A.11. The County shall encourage Caltrans and the Regional Transportation Agency to provide for a Level of Service D or better on all State highways within the county. (C) (New) [Relocated to TRANSPORTATION AND CIRCULATION – STATE HIGHWAYS – Other Initiatives]~~
- ~~8.A.12. This policy number left intentionally blank.~~
- ~~8.A.13. This policy number left intentionally blank.~~
- ~~8.A.14. This policy number left intentionally blank.~~
- ~~8.A.15. The County shall encourage Caltrans to secure financing in a timely manner for all components of its transportation system to achieve and maintain its adopted level of service standards. (C) (New) [Relocated to TRANSPORTATION AND CIRCULATION – STATE HIGHWAYS – Other Initiatives] [Relocated to TRANSPORTATION AND CIRCULATION – STATE HIGHWAYS – Other Initiatives]~~
- ~~8.A.16. The County shall continue to participate with the Regional Transportation Planning Agency, other jurisdictions, and Caltrans in planning and programming improvements to the State highway system, in accordance with State and Federal transportation planning and programming procedures, so as to maintain acceptable levels of service for Del Norte County residents on all State highways in the county. (C) (New) CIRC CR.R.5. (Revised) [Relocated to TRANSPORTATION AND CIRCULATION – STATE HIGHWAYS – Other Initiatives]~~
- ~~8.A.17. Where requested by the community, the County should work with the Regional Transportation Agency, Caltrans, and local property owners in~~

~~those visitor serving commercial areas where a State highway provides the only access to their uses in order to develop an overall access, parking, pedestrian and/or landscaping plan for the visitor serving commercial area. These areas include: 101/Stateline, South Beach, Woodland Villa/Trees of Mystery, Hiouchi, and Gasquet. (New) [Relocated to TRANSPORTATION AND CIRCULATION – STATE HIGHWAYS – Other Initiatives]~~

~~8.A.18. This policy number left intentionally blank.~~

~~8.A.19. This policy number left intentionally blank.~~

Other Initiatives

~~8.A.1.~~ ● The County shall encourage Caltrans to continue to maintain Highway 101's availability to county communities at all times. (New)

~~8.A.3.~~ ● The County shall continue to actively encourage Caltrans and the Regional Transportation Planning Agency to develop facilities for improved access into the county via Highway 101 and 199. CIRC.SH.R.4. (Revised)

~~8.A.6.~~ ● The County shall encourage the Office of Emergency Services to review alternative emergency access in the event of temporary closure of Highways 101 or 199. (New)

~~8.A.7.~~ ● The County shall continue to participate in the Highway Functional Classification System program utilized by Caltrans and the Federal Highway Administration (FHWA). (New)

~~8.A.8.~~ ● The County acknowledges that Caltrans has existing adopted overall route concepts for its highways, shown in Table 8-1, notes that full construction of these concepts may not occur or be necessary during the planning period of this General Plan (i.e., by 2020), and supports development of such concepts into an overall 50-year highway plan which addresses the need for and location of freeway/expressway improvements. (New)

Highway 199	All	Two-lane conventional highway with passing lanes
Highway 197	All	Two-lane conventional highway
Highway 169	All	Two-lane conventional highway
Source: Caltrans, 1997.		

~~8.A.9.~~ ● The County supports development of a 20-year highway route concept plan by the Regional Transportation Planning Agency and Caltrans which reflects conventional two-lane highway with passing lanes and/or four lane concepts for all highways in the County, except for the existing Highway 101 freeway segments at Klamath and Crescent City, and Highway 101 within the urban Crescent City area.   (New)

~~8.A.10.~~ ● The County shall encourage the Regional Transportation Planning Agency and Caltrans to adopt a 20-year route concept for Highway 101 through the Crescent City area which provides for improvement of the existing roadway in its present alignment.   PW-R.3. (Revised)

~~8.A.11.~~ ● The County shall encourage Caltrans and the Regional Transportation Agency to provide for a Level of Service D or better on all State highways within the county.   (New)

~~8.A.12.~~ ● This policy number left intentionally blank.

~~8.A.13.~~ ● This policy number left intentionally blank.

~~8.A.104.~~ ● This policy number left intentionally blank.

~~8.A.15.~~ ● The County shall encourage Caltrans to secure financing in a timely manner for all components of its transportation system to achieve and maintain its adopted level of service standards.  (New)

~~8.A.16.~~ ● The County shall continue to participate with the Regional Transportation Planning Agency, other jurisdictions, and Caltrans in planning and programming improvements to the State highway system, in accordance with State and Federal

transportation planning and programming procedures, so as to maintain acceptable levels of service for Del Norte County residents on all State highways in the county.  CIRC CR.R.5. (Revised)

- ~~8.A.17.~~ • Where requested by the community, the County should work with the Regional Transportation Agency, Caltrans, and local property owners in those visitor-serving commercial areas where a State highway provides the only access to their uses in order to develop an overall access, parking, pedestrian and/or landscaping plan for the visitor-serving commercial area. These areas include: 101/Stateline, South Beach, Woodland Villa/Trees of Mystery, Hiouchi, and Gasquet.   
(New)

### ~~Existing Implementation Programs~~

~~Highway Functional Classification System Program  
Regional Transportation Planning Agency (Local Transportation Commission)  
membership~~

### ~~New Implementation Programs~~

~~8.1 The County shall participate with the Regional Transportation Planning Agency and Caltrans to develop a 20-year Highway 101 Access Plan addressing continuation, upgrade and safety improvements of at-grade road intersections onto Highway 101 located between Highway 199 and the Oregon state line. (Policy 8.A.12.)~~

~~Responsibility: Local Transportation Commission, Community Development  
Department~~

~~Time Frame: First five years~~

## 8.B. COUNTY ROADS

**Goal 8.B.** To ensure the safe and efficient movement of people and goods on Del Norte County's local roadway system.

### **Policies**

#### ~~New Policies~~

- 8.B.1. The County shall expand and maintain its road system according to the classifications and designations shown in Tables 8-2 and 8-3.  (New)

<b>TABLE 8-2 COUNTY ROADWAY CLASSIFICATIONS</b>		
<b>CLASSIFICATION</b>	<b>DESCRIPTION</b>	<b>COMMENTS</b>
<b>Urban</b>	Within the urban boundary established by the Section 3, Land Use, this General Plan and/or policy of the Board of Supervisors as the urban area.	Curb, gutter, sidewalk, storm drain typical standard
<b>Rural</b>	In the unincorporated county outside of the urban boundary established by the Section 3, Land Use, this General Plan and/or by policy of the Board of Supervisors.	Shoulders, open drainage typical standard
<b>Arterial Road</b>	A road in any area of the county that serves as part of the principal system for through traffic flow by connecting areas of traffic generation and providing for the distribution and collection of through traffic to and from state highway, collector, and local road systems. It may also serve abutting property.	Public road Typically 80-100' right-of-way See Table 8-3
<b>Collector Road</b>	A road in any area that, because of its location in relation to other roads or other sources of traffic, carries or will carry traffic from local roads to the system of arterial roads or highways. Collector roads may include the principal entrance roads of residential developments, roads for circulation of traffic within such developments, or provide access to abutting commercial, industrial or multi-family areas.	Public road Typically 60' right-of-way See Table 8-3
<b>Local Road</b>	A road that, because of its location in relation to other roads or other sources of traffic, carries or will carry traffic from areas of low traffic generation to collector or arterial roads. Local roads primarily serve as access to adjacent residential land.	Public road Typically 50-60' right-of-way
<b>Private Rural Road</b>	A road in rural or resource land use areas that carries or will carry traffic from low-density residential or resource uses to nearby public roads or state highways that is not maintained by county. Maintenance of private roads is the responsibility of the property owner(s) per § 845 Ca. Gov. Code.	Private road Typically 30-50' right-of-way

- 8.B.2. ~~The County shall continue to require that all~~ **All** new and improved roads **shall** be designed in accordance with the County’s adopted public and private road standards. ~~☞~~ **☞** (New)
- 8.B.3. ~~The County shall require that private~~ **Private** roads proposed to be dedicated to the County-maintained road system **shall** meet the construction standards for public roads applicable at the time they are accepted by the County system. ~~☞~~ **☞** (New)
- ~~8.B.4. This policy number left intentionally blank.~~
- ~~8.B.5. The County shall utilize the Caltrans Highway Design Manual and Traffic Manual to ensure the development of adequate, safe public roadways, including, but not limited to, warrants for traffic control devices such as stop signs or traffic signals. ☞ (New) [Relocated to TRANSPORTATION AND CIRCULATION – COUNTY ROADS – Other Initiatives]~~
- ~~8.B.6. The County shall endeavor to manage its roadway system so as to maintain Level of Service C operation, except for intersections with any State highway, where Level of Service D shall be acceptable. (Definitions of service levels are shown in Tables 8-4 and 8-5.) The County may allow exceptions to these~~

~~level of service standards where it finds that the improvements or other measures required to achieve the LOS standards are unacceptable based on established criteria. In allowing any exception to the standards, the County may consider the following factors:~~

- ~~a. The number of hours per day that the intersection or roadway segment would operate at conditions worse than the standard;~~
- ~~b. The ability of the required improvement to significantly reduce peak hour delay and improve traffic operations;~~
- ~~c. The right of way needs and the physical impacts on surrounding properties;~~
- ~~d. The visual aesthetics of the required improvement and its impact on community identity and character;~~
- ~~e. Environmental impacts including air quality and noise impacts;~~
- ~~f. Construction and right of way acquisition costs;~~
- ~~g. The impacts on general safety;~~
- ~~h. The impacts of the required construction phasing and traffic maintenance;~~
- ~~i. The impacts on quality of life as perceived by residents; and~~
- ~~j. Consideration of other environmental, social, or economic factors on which the County may base findings to allow an exceedance of the standards.~~

~~Exceptions to the standards will only be allowed after all feasible measures and options are explored, including alternative forms of transportation.~~

~~8.B.7. The County shall strive to meet the level of service standards through a balanced transportation system that provides alternatives to the automobile.~~

~~(New)~~ [Relocated to *TRANSPORATION AND CIRCULATION – COUNTY ROADS – Other Initiatives*]

~~8.B.8. Subject to funding availability, the County shall plan and implement a road network to serve the needs of local traffic. Where feasible, this road network may include roadways parallel to regional facilities so that the regional roadway system can function effectively and efficiently.~~ ~~(New)~~ [Relocated to *TRANSPORATION AND CIRCULATION – COUNTY ROADS – Other Initiatives*]

~~8.B.9. The County shall attempt to minimize the use of through traffic on neighborhood roadways. This through traffic, including through truck traffic, shall be directed to appropriate routes in order to maintain public safety and local quality of life.~~ ~~(New)~~ [Relocated to *TRANSPORATION AND CIRCULATION – COUNTY ROADS – Other Initiatives*]

~~8.B.10. 8.B.5. The County shall continue to require all All new development to shall provide off-street parking, either on-site or in consolidated lots.~~ ~~(New)~~

- ~~8.B.11.~~ 8.B.6. ~~The County shall require new~~ New land development projects shall be required to contribute its their fair share of the cost of any street and highway improvements that can be assigned to the traffic-generating attributes of the new or intensified uses. Any project that is expected to generate more than 60 trips per day shall be required to submit a traffic analysis as part of the permit application and will be required to mitigate traffic impacts identified. Regardless of the number of trips generated by a given project, a traffic study may be required if traffic safety issues warrant such a study. ☞ ■ (New)
- ~~8.B.12.~~ ~~The County shall secure financing in a timely manner for all components of its transportation system to achieve and maintain its adopted level of service standards.~~ ☞ (New) [Relocated to *TRANSPORATION AND CIRCULATION – COUNTY ROADS – Other Initiatives*]
- ~~8.B.13.~~ ~~The County shall continue its program of maintenance and minor improvements to the existing public roadway system in order to maintain its capacity.~~ ☞ ■ ~~PW R.1.~~ [Relocated to *TRANSPORATION AND CIRCULATION – COUNTY ROADS – Other Initiatives*]
- ~~8.B.14.~~ ~~The County shall continue to maintain a list of improvements and construction projects for County roads and categorize these projects according to need and cost, and then prioritize these projects. This list will serve as a guide to development and can be used by the various County departments in determining the effect upon their activities.~~ ☞ ■ ~~CIRC CR.R.7. (Revised)~~ [Relocated to *TRANSPORATION AND CIRCULATION – COUNTY ROADS – Other Initiatives*]
- ~~8.B.15.~~ ~~The County considers seasonal operation and maintenance of local public roads that serve resource land use areas a low priority.~~ ☞ ■ (New) [Relocated to *TRANSPORATION AND CIRCULATION – COUNTY ROADS – Other Initiatives*]
- ~~8.B.16.~~ 8.B.7. As development occurs, ~~the County shall require the extension in the vicinity~~ of State Street road extensions to Elk Valley Road shall be required to provide better access to the adjacent industrial and residential areas. ☞ (New)
- ~~8.B.17.~~ 8.B.8. As development occurs in the Washington Park area, ~~the County shall require that~~ Arlington Drive shall be extended north as an urban collector road to provide primary access to the Wakefield Ranch area. ☞ (New)
- ~~8.B.18.~~ 8.B.9. At the time of development of the Wakefield Ranch (APNs 116-020-03, 04, 05 & 040-08, 11 & 17), ~~the County shall require~~ two access points shall be required for the project to provide for secondary circulation and emergency access. ☞ (New)

~~8.B.19, 8.B.10.~~ ~~As development occurs, the County shall review the need for transportation improvements on Old Mill Road from Northerest Drive to the Lake Earl Wildlife Area.~~ ~~☞ (New)~~ [Relocated to *TRANSPORTATION AND CIRCULATION – COUNTY ROADS – Other Initiatives*]

~~8.B.20.~~ ~~As development occurs, the County shall review the need for an extension of Washington Blvd. easterly to Elk Valley Road for quicker emergency response and more convenient access. At such time, the County shall seek funding through the Local Transportation Commission for project study and design.~~ ~~☞ (New)~~ [Relocated to *TRANSPORTATION AND CIRCULATION – COUNTY ROADS – Other Initiatives*]

~~8.B.21.~~ ~~The County shall monitor Northerest Drive every five years to determine if congestion is occurring. At the appropriate time, the County shall consider the extension of left turn median lanes and/or any warranted traffic control devices already begun on Northerest Drive.~~ ~~☞ (New)~~ [Relocated to *TRANSPORTATION AND CIRCULATION – COUNTY ROADS – Other Initiatives*]

[See also Policy 8.A.19. and 1.F.9.]

### Other Initiatives

~~3.F.10.~~ ● Harbor expansion east of Highway 101, which will increase cross-traffic at Citizens' Dock Road and Highway 101. Improvements in traffic control should be requested from Caltrans. ☞ *H HA.P.10.*

~~8.B.5.~~ ● The County shall utilize the Caltrans Highway Design Manual and Traffic Manual to ensure the development of adequate, safe public roadways, including, but not limited to, warrants for traffic control devices such as stop signs or traffic signals. ☞ (New)

~~8.B.6.~~ ● The County shall endeavor to manage its roadway system so as to maintain Level of Service C operation, except for intersections with any State highway, where Level of Service D shall be acceptable. (Definitions of service levels are shown in Tables 8-4 and 8-5.) The County may allow exceptions to these level of service standards where it finds that the improvements or other measures required to achieve the LOS standards are unacceptable based on established criteria. In allowing any exception to the standards, the County may consider the following factors:

- k. The number of hours per day that the intersection or roadway segment would operate at conditions worse than the standard;

- l. The ability of the required improvement to significantly reduce peak hour delay and improve traffic operations;
- m. The right-of-way needs and the physical impacts on surrounding properties;
- n. The visual aesthetics of the required improvement and its impact on community identity and character;
- o. Environmental impacts including air quality and noise impacts;
- p. Construction and right-of-way acquisition costs;
- q. The impacts on general safety;
- r. The impacts of the required construction phasing and traffic maintenance;
- s. The impacts on quality of life as perceived by residents; and
- t. Consideration of other environmental, social, or economic factors on which the County may base findings to allow an exceedance of the standards.

Exceptions to the standards will only be allowed after all feasible measures and options are explored, including alternative forms of transportation.  (New)

<b>TABLE 8-4 □ □ LEVEL OF SERVICE DEFINITIONS FOR □ ROADWAY SEGMENTS</b>		
<b>Level</b>	<b>Extent of Delay</b>	<b>Operating Characteristics</b>
<b>A</b>	<b>Insignificant Delays</b>	<b>Free flow. Drivers are virtually unaffected by other vehicles.</b>
<b>B</b>	<b>Minimal Delays</b>	<b>Stable flow. Drivers begin to feel restricted.</b>
<b>C</b>	<b>Acceptable Delays</b>	<b>Stable flow. Most drivers feel somewhat restricted.</b>
<b>D</b>	<b>Tolerable Delays</b>	<b>High-density, but stable, flow. Queues may develop but dissipate rapidly, without excessive delays.</b>
<b>E</b>	<b>Significant Delays</b>	<b>Volumes at or near capacity. Low speeds and difficult maneuvering. Queues of vehicles may form upstream.</b>
<b>F</b>	<b>Excessive Delay</b>	<b>Conditions at capacity, with extremely long delays. Queues and unstable stop-and-go operation.</b>
<b>Source: Highway Capacity Manual, Transportation Research Board, Special Report No. 209, 1985.</b>		

<b>TABLE 8-5 LEVEL OF SERVICE DEFINITIONS FOR SIGNALIZED INTERSECTIONS</b>			
<b>LOS</b>	<b>SIGNALIZED INTERSECTIONS</b>	<b>Unsignalized Intersections</b>	
	<b>Average Delay per Vehicle (Seconds)</b>	<b>Reserve Capacity (pcph)*</b>	<b>Expected Delay to Minor Street Traffic</b>
<b>A</b>	<b>5.0</b>	<b>400</b>	<b>Little or no delay</b>
<b>B</b>	<b>5.1 to 15.0</b>	<b>300 to 399</b>	<b>Short traffic delays</b>
<b>C</b>	<b>15.1 to 25.0</b>	<b>200 to 299</b>	<b>Average traffic delays</b>
<b>D</b>	<b>25.1 to 40.0</b>	<b>100 to 199</b>	<b>Long traffic delays</b>
<b>E</b>	<b>40.1 to 60.0</b>	<b>0 to 99</b>	<b>Very Long traffic delays</b>
<b>F</b>	<b>&gt;60.0**</b>	<b>--</b>	<b>Severe congestion/Intersection blocked</b>

\*pcph = passenger cars per hour  
 \*\*60 seconds of stopped delay is considered to be unacceptable to the majority of drivers.

~~Existing Implementation Programs:~~

- ~~● Urban and Rural Public Road Standards Ordinance~~
- ~~● Private Rural Roads Standard Ordinance~~
- ~~● Capital Improvements Project List~~
- ~~● Off Street Parking Ordinance~~

~~New Implementation Programs:~~

~~8.2 The County shall review transportation needs on Old Mill Road for the segment from Northcrest Drive to the Lake Earl Wildlife Area. (Policy 8.B.19)~~

~~Responsibility: Community Development Department~~  
~~Time Frame: Years five to ten~~

~~8.3 The County shall periodically consider the need for a study of the extension of Washington Boulevard easterly to Elk Valley Road. At such time as the need for a study determined the County shall request funding from LTCO (Policy 8.B.20.)~~

~~Responsibility: Community Development Department  
Time Frame: Review every five years~~

~~8.4 The County shall develop an overall strategy for urban roads and drainage in the south Blackwell area. (Policy 8.B.21.)~~

~~Responsibility: Community Development Department  
Time Frame: Prior to waterline development/urban zoning in area~~

~~8.5 The County shall monitor Northerest/Lake Earl Drive and Parkway Drive to determine if congestion is occurring. (Policy 8.B.29)~~

~~Responsibility: Community Development Department  
Time Frame: Review every five years~~

## 8.C. PUBLIC TRANSPORTATION

**Goal 8.C.** To develop and maintain a safe and efficient public transportation system that reduces congestion, and provide viable alternative transportation in and through Del Norte County.

### **Policies**

#### No Coastal development permit-governing policies; programmatic encouragements only.

~~8.C.1. The County and City, jointly, shall continue to work with public transportation service providers to plan and implement additional services within and to the county that are timely, cost effective, and responsive to growth patterns and ridership demand.~~ <sup>(New)</sup> [Relocated to TRANSPORTATION AND CIRCULATION – PUBLIC TRANSPORTATION – Other Initiatives]

~~8.C.2. The County shall continue to pursue all available sources of transit funding for transit services.~~ <sup>(New)</sup> [Relocated to TRANSPORTATION AND CIRCULATION – PUBLIC TRANSPORTATION – Other Initiatives]

~~8.C.3. In conjunction with the Local Transportation Commission, the County shall consider the transportation needs of senior, disabled, minority, low income, and transit dependent persons in making decisions regarding public~~

~~transportation services and in compliance with the Americans with Disabilities Act.~~  (New) [Relocated to TRANSPORTATION AND CIRCULATION – PUBLIC TRANSPORTATION – Other Initiatives]

~~8.C.4. The County shall continue to support efforts to provide demand-responsive service ("dial-a-ride") and other transportation services for those unable to use conventional transit.~~  (New)

~~8.C.5. The County shall give highest priority for public transit facilities and services within or connecting to urban areas of high intensity use and/or focused commuter employment areas.~~  (New) [Relocated to TRANSPORTATION AND CIRCULATION – PUBLIC TRANSPORTATION – Other Initiatives]

~~8.C.6. The County shall encourage connectivity between public walkways, bicycle routes, and transit services through provision of bicycle racks and in siting bus stops.~~  (New) [Relocated to TRANSPORTATION AND CIRCULATION – PUBLIC TRANSPORTATION – Other Initiatives]

### Other Initiatives

~~8.C.1.~~  The County and City, jointly, shall continue to work with public transportation service providers to plan and implement additional services within and to the county that are timely, cost-effective, and responsive to growth patterns and ridership demand.  (New)

~~8.C.2.~~  The County shall continue to pursue all available sources of transit funding for transit services.  (New)

~~8.C.3.~~  In conjunction with the Local Transportation Commission, the County shall consider the transportation needs of senior, disabled, minority, low-income, and transit-dependent persons in making decisions regarding public transportation services and in compliance with the Americans with Disabilities Act.  (New)

~~8.C.4.~~  The County shall continue to support efforts to provide demand-responsive service ("dial-a-ride") and other transportation services for those unable to use conventional transit.  (New)

~~8.C.5.~~  The County shall give highest priority for public transit facilities and services within or connecting to urban areas of high intensity use and/or focused commuter-employment areas.  (New)

- ~~8.C.6.~~ • The County shall encourage connectivity between public walkways, bicycle routes, and transit services through provision of bicycle racks and in siting bus stops.  (New)

~~Existing Implementation Programs:~~

- ~~• County/City Redwood Coast Transit Contract~~
- ~~• TDA/STA Transit Funding Claim~~

~~New Implementation Programs:~~

~~Existing program are deemed sufficient.~~

8.D. TRANSPORTATION CONTROL MEASURES (TCM)

**Goal 8.D.** To maximize the efficient use of transportation facilities so as to: 1) reduce travel demand on the county's roadway system; 2) reduce the amount of investment required in new or expanded facilities; 3) reduce the quantity of emissions of pollutants from automobiles.

**Policies**

No Coastal development permit-governing policies; programmatic encouragements only.

~~8.D.1. The County shall continue to work with the Local Transportation Commission (LTCO) in the development of a Regional Transportation Plan and in programs which direct automobile commute trips to transit, walking, bicycling and ridesharing.~~  (New) [Relocated to *TRANSPORATION AND CIRCULATION –TRANSPORTATION CONTROL; MEASURES – Other Initiatives*]

~~8.D.2. The County should work with other responsible agencies, including the Del Norte Local Transportation Commission and the North Coast Unified Air Quality Management District, to develop other measures to reduce vehicular travel demand and continue to meet air quality goals.~~  (New) [Relocated to *TRANSPORATION AND CIRCULATION –TRANSPORTATION CONTROL; MEASURES – Other Initiatives*]

~~8.D.3. The County should continue to investigate and promote feasible land use and transportation strategies that will result in fewer automobile trips. To this~~

~~end, the County shall encourage the concentration of urban development to maximize the feasibility of public transit.~~  (New) [Relocated to TRANSPORTATION AND CIRCULATION – TRANSPORTATION CONTROL; MEASURES – Other Initiatives]

~~8.D.4. The County should encourage major traffic generators to develop and implement trip reduction measures.~~  (New) [Relocated to TRANSPORTATION AND CIRCULATION – TRANSPORTATION CONTROL; MEASURES – Other Initiatives]

### Other Initiatives

~~8.D.1.~~ 8.D.1. ● The County shall continue to work with the Local Transportation Commission (LTCO) in the development of a Regional Transportation Plan and in programs which direct automobile commute trips to transit, walking, bicycling and ridesharing.  (New)

~~8.D.2.~~ 8.D.2. ● The County should work with other responsible agencies, including the Del Norte Local Transportation Commission and the North Coast Unified Air Quality Management District, to develop other measures to reduce vehicular travel demand and continue to meet air quality goals.  (New)

~~8.D.3.~~ 8.D.3. ● The County should continue to investigate and promote feasible land use and transportation strategies that will result in fewer automobile trips. To this end, the County shall encourage the concentration of urban development to maximize the feasibility of public transit.  (New)

~~8.D.4.~~ 8.D.4. ● The County should encourage major traffic generators to develop and implement trip reduction measures.  (New)

### ~~Existing Implementation Programs:~~

- ~~● LTCO Regional Transportation Plan~~
- ~~● General Plan Urban Boundary/Land Use Diagram Maps~~

### ~~New Implementation Programs:~~

~~Existing programs are deemed sufficient.~~

### NON-MOTORIZED TRANSPORTATION

**Goal 8.E.** To provide a safe, comprehensive, and integrated system of facilities for non-motorized transportation.

**Policies**

8.E.1. ~~Where feasible, the County shall provide for the extension of sidewalks~~ Sidewalks, trails, and walking facilities shall be extended, where feasible, throughout urban areas to allow for convenient and safe pedestrian movement.

☞ (New)

8.E.2. Where feasible, ~~the County shall provide that~~ pedestrian walkways shall be provided are to be separated and protected from automobile traffic. ☞ (New)

~~8.E.3. The County shall promote the linkage of sidewalks and walkways with bike and pedestrian trails leading to and through outdoor recreational areas such as parks and schools, as well as commercial areas. ☞ (New) [Relocated to TRANSPORTATION AND CIRCULATION – NON-MOTORIZED TRANSPORTATION CONTROL MEASURES – Other Initiatives]~~

~~8.E.4. The County shall coordinate with local school districts to assure that safe routes to schools are available to all students. ☞ (New) [Relocated to TRANSPORTATION AND CIRCULATION – NON-MOTORIZED TRANSPORTATION CONTROL MEASURES – Other Initiatives]~~

~~8.E.5. The County shall promote the development of a comprehensive and safe system of recreational and commuter bicycle routes that provides connections between the county's major recreation, employment, and housing areas and between its existing and planned bikeways, based upon routes identified in Table 8-6. ☞ (New) [Relocated to TRANSPORTATION AND CIRCULATION – NON-MOTORIZED TRANSPORTATION CONTROL MEASURES – Other Initiatives]~~

~~8.E.6. The County shall continue to coordinate with LTCO and the City of Crescent City in updating and implementing the Del Norte County and Crescent City Bicycle Facilities Plan and continue to include or consider trails of interest to the public such as the Hobbs Wall, Harbor, and Pebble Beach routes in addition to commuter routes and those which may be coordinated with State and Federal trails. ☞ (New) [Relocated to TRANSPORTATION AND CIRCULATION – NON-MOTORIZED TRANSPORTATION CONTROL MEASURES – Other Initiatives]~~

~~8.E.7. The County shall work with Federal, State, and other local agencies to coordinate planning and development of interconnected bikeways and multi-~~

~~purpose trails.~~  (New) [Relocated to TRANSPORTATION AND CIRCULATION – NON-MOTORIZED TRANSPORTATION CONTROL MEASURES – Other Initiatives]

~~8.E.8. The County shall work with other interested agencies, including the Del Norte Local Transportation Commission and the North Coast Unified Air Quality Management District, to pursue available sources of funding for the development and improvement of trails for non-motorized transportation.~~

 (New) [Relocated to TRANSPORTATION AND CIRCULATION – NON-MOTORIZED TRANSPORTATION CONTROL MEASURES – Other Initiatives]

~~8.E.9. The County shall encourage the promotion of non-motorized travel through appropriate facilities, programs, and information, including through the school system and local media.~~

 (New) [Relocated to TRANSPORTATION AND CIRCULATION – NON-MOTORIZED TRANSPORTATION CONTROL MEASURES – Other Initiatives]

8.E.10. In urban areas, ~~the County shall require~~ developers shall be required to finance and install pedestrian walkways in new development projects in compliance with the Americans with Disabilities Act (ADA).  (New)

~~8.E.11. The County shall support the development of parking areas near access to hiking and equestrian trails.~~  (New) [Relocated to TRANSPORTATION AND CIRCULATION – NON-MOTORIZED TRANSPORTATION CONTROL MEASURES – Other Initiatives]

~~8.E.12. The County shall encourage the development of multi-use shoulders to accommodate non-motorized traffic along State highways.~~  (New) [Relocated to TRANSPORTATION AND CIRCULATION – NON-MOTORIZED TRANSPORTATION CONTROL MEASURES – Other Initiatives]

~~8.E.13. The County shall coordinate with the City of Crescent City and Caltrans to ensure that bicycle planning on State highways maximizes safety.~~  (New) [Relocated to TRANSPORTATION AND CIRCULATION – NON-MOTORIZED TRANSPORTATION CONTROL MEASURES – Other Initiatives]

### Other Initiatives

- ~~8.E.3.~~ ● The County shall promote the linkage of sidewalks and walkways with bike and pedestrian trails leading to and through outdoor recreational areas such as parks and schools, as well as commercial areas.  (New)
- ~~8.E.4.~~ ● The County shall coordinate with local school districts to assure that safe routes to schools are available to all students.  (New)
- ~~8.E.5.~~ ● The County shall promote the development of a comprehensive and safe system of recreational and commuter bicycle routes that provides connections between the county's major recreation, employment, and housing areas and between its existing and planned bikeways, based upon routes identified in Table 8-6.  (New)

<b>TABLE 8-6</b>	
<b>DEL NORTE COUNTY EXISTING AND PROPOSED BICYCLE ROUTES</b>	
<b>Bikeway</b>	<b>Class</b>
Hobbs Wall Trail (Parkway to Howland Hill)	Class I
Harbor Trail (Howe Drive Path to 101 via Starfish)	Class I and I I
Railroad Ave (Parkway to Elk Valley X Rd)	Class I and II
Coastal Trail/Highway 101 (selected segments)	Class I and II
Riverside Trail (Washington through Dead Lake SP)	Class I and II
Old Mill Trail (Lake Earl Wildlife Area)	Class I and II
Hiouchi Trail (Hwy 167, 199 & RNSP)	Class I and II
Enderts Beach Road (Hwy 101 to lookout)	Class I and II

**8.E.6.** ● The County shall continue to coordinate with LTCO and the City of Crescent City in updating and implementing the *Del Norte County and Crescent City Bicycle Facilities Plan* and continue to include or consider trails of interest to the public such as the Hobbs Wall, Harbor, and Pebble Beach routes in addition to commuter routes and those which may be coordinated with State and Federal trails.  (New)

**8.E.7.** ● The County shall work with Federal, State, and other local agencies to coordinate planning and development of interconnected bikeways and multi-purpose trails.  (New)

**8.E.8.** ● The County shall work with other interested agencies, including the Del Norte Local Transportation Commission and the North Coast Unified Air Quality Management District, to pursue available sources of funding for the development and improvement of trails for non-motorized transportation.  (New)

~~8.E.9.~~ ● The County shall encourage the promotion of non-motorized travel through appropriate facilities, programs, and information, including through the school system and local media.  (New)

~~8.E.11.~~ ● The County shall support the development of parking areas near access to hiking and equestrian trails.  (New)

~~8.E.12.~~ ● The County shall encourage the development of multi-use shoulders to accommodate non-motorized traffic along State highways.  (New)

~~8.E.13.~~ ● The County shall coordinate with the City of Crescent City and Caltrans to ensure that bicycle planning on State highways maximizes safety.  (New)

~~Existing Implementation Programs:~~

- ~~● LTCO County/City Bicycle Facilities Plan~~
- ~~● Urban and Rural Public Road Standards Ordinance~~

~~New Implementation Programs:~~

~~8.5 The County shall work with the City of Crescent City, the Local Transportation Commission and related agencies to conduct a study within the urban areas of the County to determine the adequacy of sidewalks and trail facilities and to develop a walkway and trail plan.~~

~~Responsibility: LTCO~~  
~~Time Frame: Every two years~~

8.E. AIR TRANSPORTATION

**Goal 8.F.** To promote the maintenance and improvement of general and commercial aviation facilities.

**Policies**

~~8.F.1. The County shall continue to pursue opportunities for the economic development of McNamara Field which is the major air transportation and service facility in the region.  (New) [Relocated to TRANSPORTATION AND CIRCULATION – AIR TRANSPORTATION – Other Initiatives]~~

- ~~8.F.2. The County shall plan and pursue funding for the redevelopment of the regional terminal facilities at McNamara Field. (C) (New) [Relocated to TRANSPORTATION AND CIRCULATION – AIR TRANSPORTATION – Other Initiatives]~~
- ~~8.F.3. The County shall continue to provide areas for commercial and recreational hangars for the storage of aircraft based at McNamara Field. (C) PW-A.2. [Relocated to TRANSPORTATION AND CIRCULATION – AIR TRANSPORTATION – Other Initiatives]~~
- ~~8.F.4. McNamara Field (Crescent City Airport) is designated as a coastal-dependent use due to its location on a coastal headland and there is no less damaging environmental alternative site within the Coastal Zone (which extends to the foothills 5 ½ miles inland of the ocean), there is no feasible alternate location to construct a replacement commercial airport outside of the Coastal Zone, and the airport is an essential public facility for transportation, commerce, medical transport, and emergency services to this isolated community. (C) PW-A.4. (Revised) [Relocated to TRANSPORTATION AND CIRCULATION – AIR TRANSPORTATION – Other Initiatives]~~
- 8.F.5. ~~The County shall continue to maintain navigational~~ The maintenance of navigational aids at McNamara Field ~~are is~~ recognized as crucial to improve the reliability and safety of service. (C) PW-A.3
- ~~8.F.6. Agricultural leases may be offered for lands at McNamara Field. (C) LU III.D.2. [Relocated to TRANSPORTATION AND CIRCULATION – AIR TRANSPORTATION – Other Initiatives]~~
- ~~8.F.7. The County shall provide that land uses in the vicinity of McNamara Field's approach and takeoff zones is held to the lowest densities and development intensities possible. Height zoning should be vigorously enforced. Encroachment into the horizontal or vertical zones should be prohibited. (C) CIRC AIR.R.8. [Relocated to TRANSPORTATION AND CIRCULATION – AIR TRANSPORTATION – Other Initiatives]~~
- ~~8.F.8. This policy left intentionally blank.~~
- ~~8.F.9. The County shall continue to maintain a list of improvements and construction projects to be accomplished at County airports. (C) (New) [Relocated to TRANSPORTATION AND CIRCULATION – AIR TRANSPORTATION – Other Initiatives]~~

~~8.F.10. The County shall allow, where appropriate, public or group recreational events on airport properties subject to the securement of a permit. ☞ ■ LU III.D.3~~ [Relocated to *TRANSPORTATION AND CIRCULATION – AIR TRANSPORTATION – Other Initiatives*]

### Other Initiatives

- ~~8.F.1.~~ ● The County shall continue to pursue opportunities for the economic development of McNamara Field which is the major air transportation and service facility in the region. ☞ (New)
- ~~8.F.2.~~ ● The County shall plan and pursue funding for the redevelopment of the regional terminal facilities at McNamara Field. ☞(New)
- ~~8.F.3.~~ ● The County shall continue to provide areas for commercial and recreational hangars for the storage of aircraft based at McNamara Field. ☞ PW-A.2.
- ~~8.F.4.~~ ● McNamara Field (Crescent City Airport) is designated as a coastal-dependent use due to its location on a coastal headland and there is no less damaging environmental alternative site within the Coastal Zone (which extends to the foothills 5 ½ miles inland of the ocean), there is no feasible alternate location to construct a replacement commercial airport outside of the Coastal Zone, and the airport is an essential public facility for transportation, commerce, medical transport, and emergency services to this isolated community. ☞ PW-A.4. (Revised)

- ~~8.F.10.~~ ● The County shall allow, where appropriate, public or group recreational events on airport properties subject to the securement of a permit. ☞ ■ LU III.D.3

~~Existing Implementation Programs:~~

~~————— Airport Projects Plan~~

~~New Implementation Programs:~~

~~8.6 The County shall prepare an updated Airport Land Use Plan. (Policies 8.F.1., 8.F.3., 8.F.5., and 8.F.9.)~~

~~Responsibility: ————— Community Development Department~~

~~Time Frame: ————— First five years~~

**8.G. MARITIME TRANSPORTATION**

**Goal 8.G.** To promote the maintenance and improvement of the Crescent City Harbor facilities.

*Policies*

**No Coastal development permit-governing policies; programmatic encouragements only.**

~~8.G.1. The County shall continue to work with the City of Crescent City and the Harbor District to continue to support the maintenance and dredging of the harbor to provide boat access for commercial and recreational boating. ☞  
(New)~~

[See also Policy 3.F.6. through 3.F.16.]

**Other Initiatives**

~~8.G.1. ●~~ The County shall continue to work with the City of Crescent City and the Harbor District to continue to support the maintenance and dredging of the harbor to provide boat access for commercial and recreational boating. ☞ (New)

~~Implementation Programs~~

~~Policy statements only~~

**8.H. TELETRANSPORTATION**

**Goal 8.H.** To promote development of multimedia communications as a viable mode of transportation and commerce.

**Policies**

**No Coastal development permit-governing policies; programmatic encouragements only.**

- ~~8.H.1. The County shall encourage the development of the highest standard possible of broad band internet, multimedia communications, and videoconference facilities by local public utility providers, public and quasi-public agencies, and the business community in general.~~  (New) [Relocated to TRANSPORTATION AND CIRCULATION – TELETRANSPORTATION – Other Initiatives]
- ~~8.H.2. The County shall encourage local educational and library agencies to include telecommunications use and education programs in their operations.~~  (New) [Relocated to TRANSPORTATION AND CIRCULATION – TELETRANSPORTATION – Other Initiatives]
- ~~8.H.3. The County shall continue to work with the Local Transportation Commission in promoting planning and capital development of local internet, multimedia communications and videoconferencing forms of transportation for individual and commercial use.~~  (New) [Relocated to TRANSPORTATION AND CIRCULATION – TELETRANSPORTATION – Other Initiatives]
- ~~8.H.4. The County shall continue to support the development of Intelligent Transportation System Projects through the California Oregon Advanced Transportation Systems (COATS) program.~~  (New) [Relocated to TRANSPORTATION AND CIRCULATION – TELETRANSPORTATION – Other Initiatives]
- ~~8.H.5. The County shall develop guidelines for the review and permitting of telecommunication facilities to address potential impacts to coastal resources, especially designated visual resources. The guidelines shall encourage tower co-location and visual simulations (e.g., photo simulations) as part of the permitting process.~~  (New) [Elevated to policy status, revised, and moved to Part II, Section 6 PROTECTION OF VISUAL REOURCES AND SCENIC AREAS – Other Initiatives]

**Other Initiatives**

- ~~8.H.1. ●~~ The County shall encourage the development of the highest standard possible of broad band internet, multimedia communications, and videoconference facilities

by local public utility providers, public and quasi-public agencies, and the business community in general.  (New)

**8.H.2. ●** The County shall encourage local educational and library agencies to include telecommunications use and education programs in their operations.  (New)

**8.H.3. ●** The County shall continue to work with the Local Transportation Commission in promoting planning and capital development of local internet, multimedia communications and videoconferencing forms of transportation for individual and commercial use.  (New)

**8.H.4. ●** The County shall continue to support the development of Intelligent Transportation System Projects through the California Oregon Advanced Transportation Systems (COATS) program.  (New)

#### **Implementation Programs**

~~8.7 The County shall develop guidelines for the review and permitting of telecommunication facilities to address potential impacts to coastal resources, especially designated visual resources.  
Responsibility: Board of Supervisors and Community Development Department  
Time Frame: Fiscal Year 02-03~~

**Suggested Modification No. 10 (Definitions Appendix)**

All changes to the *Policy Document Definitions*

**APPENDIX A**

**POLICY DOCUMENT DEFINITIONS**

**Annex, v.** - To incorporate a land area into an existing district or municipality, with a resulting change in the boundaries of the annexing jurisdiction.

**Archaeological** - Relating to the material remains of past human life, culture, or activities.

**Bicycle Lane (Class II facility)** - A corridor expressly reserved for bicycles, existing on a street or roadway in addition to any lanes for use by motorized vehicles.

**Bicycle Path (Class I facility)** - A paved route not on a street or roadway and expressly reserved for bicycles traversing an otherwise unpaved area. Bicycle paths may parallel roads but typically are separated from them by landscaping.

**Bicycle Route (Class III facility)** - A facility shared with motorists and identified only by signs, a bicycle route has no pavement markings or lane stripes.

**Biological Productivity** - Biological productivity generally refers to the amount of organic material produced per unit time.

**Building** - Any structure used or intended for supporting or sheltering any use or occupancy.

**California Environmental Quality Act (CEQA)** – A State law requiring State and local agencies to regulate activities with consideration for environmental protection. If a proposed activity has the potential for a significant adverse environmental impact, an environmental document must be prepared and certified as to its adequacy before taking action on the proposed project.

**Caltrans** - California Department of Transportation.

**City** - City with a capital "C" generally refers to the City of Crescent City government or administration. City with a lower case "c" generally refers to the geographical area of the city, both incorporated and unincorporated territory (*e.g.*, the city bikeway system).

**Coastal-Dependent Development** – Any development or use which requires a site on, or adjacent to, the sea to be able to function at all.

**Coastal-Related Development** - Any use that is dependent on a coastal-dependent development or use.

**Coastal Zone, California** - That area of the county under the jurisdiction of the California Coastal Act as set forth by Public Resources Code Section 30103 and as delineated by the Local Coastal Program prepared pursuant to the Act.

**Community Noise Equivalent Level (CNEL)** - A 24-hour energy equivalent level derived from a variety of single-noise events, with weighting factors of 5 and 10 dBA applied to the evening (7 PM to 10 PM) and nighttime (10 PM to 7 AM) periods, respectively, to allow for the greater sensitivity to noise during these hours.

**Compatible** - Capable of existing together without conflict or ill effects.

**Consistent** - Free from variation or contradiction. Programs in the General Plan are to be consistent, not contradictory or preferential. State law requires consistency between a general plan and implementation measures such as the zoning ordinance.

**County** - County with a capital "C" generally refers to the government or administration of a county, in the case of the General Plan, Del Norte County. County with a lower case "c" generally refers to the geographical area of the county (*e.g.*, the unincorporated county).

**Critical Facility** - Facilities housing or serving many people, which are necessary in the event of an earthquake or flood, such as hospitals, fire, police, and emergency service facilities, utility "lifeline" facilities, such as water, electricity, and gas supply, sewage disposal, and communications and transportation facilities.

**dB** - Decibel; a unit used to express the relative intensity of a sound as it is heard by the human ear.

**dBA** - The "A-weighted" scale for measuring sound in decibels; weighs or reduces the effects of low and high frequencies in order to simulate human hearing. Every increase of 10 dBA doubles the perceived loudness though the noise is actually ten times more intense.

**Development** – Within the Coastal Zone, On land, in or under water, the placement or erection of any solid material or structure; discharge or disposal of any dredged material or of any gaseous, liquid, solid, or thermal waste; grading, removing, dredging, mining or extraction of any materials; change in the density or intensity of use of land, including, but not limited to, subdivision pursuant to the Subdivision Map Act, and any other division of land, including lot splits; change in the intensity of use of water, or of access thereto; construction, reconstruction, demolition, or alteration of the size of any structure, including any facility of any private, public, or municipal utility; and the removal or harvesting of major vegetation other than for agricultural purposes, kelp harvesting, and timber operations which are in accordance with a timber harvesting plan submitted pursuant to the provisions of the Z'berg-Nejedly Forest Practices Act of 1973.

**Dredge, v** - To remove mud or silt from the bottom of a water body using a large machine or implement.

**Duplex** - "Duplex" means a two-family residence designed for or used exclusively for residence purposes by two families in separate housekeeping units.

**Dwelling Unit** - A room or group of rooms (including sleeping, eating, cooking, and sanitation facilities, but not more than one kitchen), that constitutes an independent housekeeping unit, occupied or intended for occupancy by one household on a long-term basis.

**Dwelling Unit, Multiple** - A building or portion thereof used and/or designed as a residence for three or more families living independently of each other, and doing their own cooking in the building, including apartment houses, apartment hotels and flats, but not including automobile courts.

**Encourage**, v. - To stimulate or foster a particular condition through direct or indirect action by the private sector or government agencies.

**Energy Facility** - Any public or private processing, producing, generating, storing, transmitting, or recovering facility for electricity, natural gas, petroleum, coal, or other source of energy.

**Enhance**, v. - To improve existing conditions by increasing the quantity or quality of beneficial uses or features.

**Environmental Impact Report (EIR)** - A report that assesses all the environmental characteristics of an area and determines what effects or impacts will result if the area is altered or disturbed by a proposed action. See Section 21061 of the Public Resources Code.

**Environmentally Sensitive Habitat Area** – ~~An Any area in which plant or animal life or their habitats are either rare or especially valuable because of their special nature or role in an ecosystem and which could be easily disturbed or degraded by human activities and developments. There are three important elements to the definition of an ESHA. First is whether a habitat or species is rare. Second is whether a habitat or species is especially valuable. And third is that an ESHA are those areas that could be easily disturbed or degraded by human activities and developments. All three elements must be present.~~

**Estuary** - A coastal water body usually semi-enclosed by land, but which has open, partially obstructed, or intermittent exchange with the ocean and in which ocean water is at least occasionally diluted by fresh water runoff from the land.

**Expressway** - A divided multi-lane major arterial street for through traffic with partial control of access and with grade separations at major intersections.

**Farmed Wetlands** - Wetland areas, which are used for agricultural purposes such as grazing, planting or forage during parts of the year.

**Fault** - A fracture in the earth's crust forming a boundary between rock masses that have shifted.

**Feasible** - Capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, social, and technological factors.

**Fill** - Earth or other substance of material, including piling, placed for the purpose of erecting structures thereon.

**Flood, 100-Year** - The magnitude of a flood expected to occur on the average every 100 years based on historical data. The 100-year flood has a 1/100, or one percent, chance of occurring in any given year.

**Flood Hazard Areas** - Those areas subject to inundation by a 100-year flood.

**Flood Insurance Rate Map (FIRM)** - For each community, the official map on which the Federal Insurance Administration has delineated areas of special flood hazard and the risk premium zones applicable to that community.

**Floor Area Ratio (FAR)** - The gross floor area permitted on a site divided by the total net area of the site expressed in decimals to two places. For example, on a site with 10,000 net sq. ft. of land area, a floor Area Ratio of 1.00 will allow a maximum of 10,000 gross sq. ft. of building floor area to be built. On the same site, a FAR of 1.50 would allow 15,000-sq. ft. of floor area; a FAR of 2.00 would allow 20,000-sq. ft.; and a FAR of 0.50 would allow only 5,000 sq. ft.

**Freeway** - A high-speed, high-capacity, limited-access transportation facility serving regional and countywide travel. Freeways generally are used for long trips between major land use generators.

**Geological** - Pertaining to rock or solid matter.

**Geologic Hazards** - Include the following:

1. Seismic hazard areas delineated on fault maps as subject to potential surface rupture, on soil maps indicating materials particularly prone to shaking or liquefaction, and in local and regional seismic safety plans;
2. Tsunami runup areas identified on U.S. Army Corps of Engineers 100-year recurrence maps, by other scientific or historic studies, and other known areas of tsunami risk;
3. Landslide hazard areas delineated on slope stability maps and in local and regional geologic or safety plans;
4. Beach areas subject to erosion; and,
5. Other geologic hazards such as expansive soils and subsidence areas.

**Goal** -The ultimate purpose of an effort stated in a way that is general in nature and immeasurable.

**Harbor District** - A special district, governed by the Harbor commission, with jurisdiction over the Crescent City Harbor.

**Hazardous Material** - Any substance that, because of its quantity, concentration, or physical or chemical characteristics, poses a significant present or potential hazard to human health and safety or to the environment if released into the workplace or the environment. The term includes, but is not limited to, hazardous substances and hazardous wastes.

**Household** - All those persons--related or unrelated--who occupy a single housing unit.

**Housing Unit** - The place of permanent or customary abode of a person or family. A housing unit may be a single-family dwelling, a multi-family dwelling, a condominium, a modular home, a manufactured home, a mobile home, a cooperative, or any other residential unit considered real property under State law. A housing unit has, at least, cooking facilities, a bathroom, and a place to sleep. It also is a dwelling that cannot be moved without substantial damage or unreasonable cost.

**Implementation Program** - An action, procedure, program, or technique that carries out general plan policy. Implementation programs also specify primary responsibility for carrying out the action and a time frame for its accomplishment.

**Infill Development** - Development of vacant land (usually individual lots or leftover properties) within areas that are already largely developed.

**Infrastructure** - Public services and facilities, such as sewage-disposal systems, water-supply systems, other utility systems, and roads.

**Lateral Access Coastal** - A recorded dedication or easement granting to the public the right to pass and repass over dedicating's real property generally along the shoreline inland from the mean high tide line to the base or to the crest of the parallel bluff. Lateral accessways should be used for public pass and repass and passive recreational use, unless specified otherwise.

**L<sub>dn</sub>** - Day-Night Average Sound Level. The A-weighted average sound level for a given area (measured in decibels) during a 24-hour period with a 10 dB weighting applied to night-time sound levels. The L<sub>dn</sub> is approximately numerically equal to the CNEL for most environmental settings.

**L<sub>eq</sub>** - The energy equivalent level, defined as the average sound level on the basis of sound energy (or sound pressure squared). The L<sub>eq</sub> is a "dosage" type measure and is the basis for the descriptors used in current standards, such as the 24-hour CNEL used by the State of California.

**Levee** - A bank constructed to control or confine floodwaters.

**Level of Service (LOS)** - A scale that measures the amount of traffic a roadway may be capable of handling on a roadway or at the intersection of roadways. Levels range from A to F, with A representing the highest level of service.

**Liquefaction** - The transformation of loose water-saturated granular materials (such as sand or silt) from a solid into a liquid state. A type of ground failure that can occur during an earthquake.

**Local Agency Formation Commission (LAFCo)** - The countywide commission that reviews and evaluates all proposals for formation of special districts, incorporation of cities, annexation to special districts or cities, consolidation of districts, and merger of districts with cities. LAFCo is empowered to approve, disapprove, or conditionally approve such proposals.

**Local Transportation Commission** - The Del Norte County Local Transportation Commission is designated as the Regional Transportation Agency and is responsible for producing major transportation documents such as the Regional Transportation Plan, Bicycle Facilities Plan, and Comprehensive Transit Service Plan.

**L<sub>10</sub>** - A statistical descriptor indicating peak noise level the sound level exceeded ten percent of the time. It is a commonly used descriptor of community noise, and has been used in Federal Highway Administration standards and the standards of some cities and counties.

**Major Energy or Public Works Facility** - Any public works project or energy facility that exceeds \$100,000 in estimated cost of construction.

**Minimize, v.** - To reduce or lessen, but not necessarily to eliminate.

**Maximum Extent Practicable (MEP) - is the standard for implementation of storm water management programs to reduce pollutants in storm water based on Clean Water Act § 402(p)(3)(B)(iii), to wit, "...controls to reduce the discharge of pollutants to the maximum extent practicable, including management practices, control techniques and system, design and engineering methods, and such other provisions as the Administrator or the State determines appropriate for the control of such pollutants." Also, see California Water Resources Control Board Order WQ 2000-11, page 20 and *Defenders of Wildlife v. Browner*, 191 F.3d 1159 (9<sup>th</sup> Cir. 1999).**

**Noise** - Any sound that is undesirable because it interferes with speech and hearing, or is intense enough to damage hearing, or is otherwise annoying. Noise, simply, is "unwanted sound."

**Noise Attenuation** - Reduction of the level of a noise source using a substance, material, or surface, such as earth berms and/or solid concrete walls.

**Noise Contour** - A line connecting points of equal noise level as measured on the same scale. Noise levels greater than the 60 Ldn contour (measured in dBA) require noise attenuation in residential development.

**Parcel** - A lot, or contiguous group of lots, in single ownership or under single control, usually considered a unit for purposes of development.

**Peak Hour/Peak Period** - For any given roadway, a daily period during which traffic volume is highest, usually occurring in the morning and evening commute periods.

**Person** - Any individual, organization, partnership, or other business association or corporation, including any utility, and any federal, state, local government, or special district or an agency thereof.

**Planning Area** - The Planning Area is the land area addressed by the General Plan.

**Policy** - A specific statement in text or diagram guiding action and implying clear commitment.

**Public and Quasi-Public Facilities** - Institutional, academic, governmental and community service uses, either publicly owned or operated by non-profit organizations.

**Public Works -**

1. All production, storage, transmission, and recovery facilities for water, sewerage, telephone, and other similar utilities owned or operated by any public agency or by any utility subject to the jurisdiction of the Public Utilities Commission except for energy facilities.
2. All public transportation facilities, including streets, roads, highways, public parking lots and structures, ports, harbors, airports, railroads, and mass transit facilities and stations, bridges, trolley wires, and other related facilities.
3. All publicly financed recreational facilities and any development by a special district.
4. All community college facilities.

**Quantified Objective (Housing only)** - The number of housing units that the County expects to be constructed and the number of households the County expects will be assisted through Housing Element programs and based on general market conditions during the time frame of the Housing Element.

**Rare or Endangered Species** - A species of animal or plant listed in: Sections 670.2 or 670.5, Title 14, California Administrative Code; or Title 50, Code of Federal Regulations, Section 17.11 or Section 17.2, pursuant to the Federal Endangered Species Act designating species as rare, threatened, or endangered.

**Reclamation** - The reuse of resources, usually those present in solid wastes or sewage.

**Residential, Single-family** - A single dwelling unit on a building site.

**Right-of-way** - A strip of land occupied or intended to be occupied by certain transportation and public use facilities, such as roadways, railroads, and utility lines.

**Riparian Vegetation** - Vegetation commonly occurring adjacent to stream and river banks characterized by dense growth of trees and shrubs such as willows, alders, cottonwood, wax myrtle, big leaf maple, California laurel, red elderberry, etc.

**Second Unit** - A Self-contained living unit, either attached to or detached from, and in addition to, the primary residential unit on a single lot. Sometimes called "Granny Flat."

**Seismic** - Caused by or subject to earthquakes or earth vibrations.

**On-site Sewage Treatment/Disposal Systems** - A sewage-treatment system that includes a settling tank through which liquid sewage flows and in which solid sewage settles and is decomposed by bacteria in the absence of oxygen. On-site (septic) systems are often used for individual-home waste disposal where an urban sewer system is not available.

**Shall** - That which is obligatory or necessary.

**Should** - Signifies a directive to be honored if at all feasible.

**Slope** - Land gradient described as the vertical rise divided by the horizontal run, and expressed in percent.

**Soil** - The unconsolidated material on the immediate surface of the earth created by natural forces that serves as natural medium for growing land plants.

**Solid Waste** - Any unwanted or discarded material that is not a liquid or gas. Includes organic wastes, paper products, metals, glass, plastics, cloth, brick, rock, soil, leather, rubber, yard wastes, and wood, but does not include sewage and hazardous materials.

**Special District** - Any public agency other than a local government formed pursuant to general law or special act for the local performance of governmental or proprietary functions within limited boundaries. "Special District" includes, but is not limited to, a county service area, a maintenance district or area, an improvement district or improvement zone, or any other zone or area, formed for the purpose of designating an area within which a property tax rate will be levied to pay for a service or improvement benefiting that area.

**Sphere of Influence** - The probable ultimate physical boundaries and service area of a local agency (City or district) as determined by the Local Agency Formation Commission (LAFCo) of the County.

**Standard** -A specific, often quantified guideline incorporated in a policy or implementation program, defining the relationship between two or more variables. Standards can often translate directly into regulatory controls.

**Stream Transition Line** - That line closest to a stream where riparian vegetation is permanently established.

**Structure** - Includes, but is not limited to, any building, road, pipe, flume, conduit, siphon, aqueduct, telephone line, and electrical power transmission and distribution line.

**Subdivision** - The division of a tract of land into defined lots, either improved or unimproved, which can be separately conveyed by sale or lease, and which can be altered or developed.

**Subsidence** - The gradual settling or sinking of an area with little or no horizontal motion.

**Support Facilities** - Those facilities that provide ease of public use and maintenance of coastal accessways. Such facilities include signs, lighting, benches, trash receptacles, public telephones, restrooms, showers, bike security racks, public transit loading and unloading areas, parking areas, trail improvements, and fencing.

**Tsunami** - A large ocean wave generated by an earthquake in or near the ocean.

**Use** - The purpose for which a lot or structure is or may be leased, occupied, maintained, arranged, designed, intended, constructed, erected, moved, altered, and/or enlarged in accordance with the Zoning Ordinance and General Plan land use designations.

**Use, accessory - A use customarily incidental and accessory to the principal use of a lot or a building located on the same lot as the accessory use.**

**Use, conditional - One or more of several uses permissible within a particular zoning district or districts which have been determined to be essential or desirable for the community and its citizenry and entirely appropriate provided necessary restrictions and conditions are imposed on the use through the issuance of a conditional use permit to ensure their compatibility with the primary and principally intended use of the zone or zones.**

**Use, principal permitted - The singular use or set of actions or activities recognized as the primary intended use of land within a zoning district. Pursuant to Section 30603(a)(4) of the California Coastal Act, with the exception of major public works**

**projects, major energy facilities, and development located within specified proximities to certain sensitive resources areas, in coastal counties, only approval of development other than the enumerated principal permitted use may be appealed to the California Coastal Commission.**

**Use, principally permitted - Those land uses and activities recognized as generally intended for, and compatible with, the principal use of a given zoning district, which do not require the securing of a conditional use permit, but whose approval may be appealed to the California Coastal Commission.**

**Vacant** - Lands or buildings that are not actively used for any purpose.

**Vertical Access, Coastal** - A recorded dedication or easement granting to the public the privilege and right to pass and repass over dedicator's real property from a public road to the shoreline. Vertical accessways should be used for pass and repass and passive recreational use, unless specified otherwise.

**Visitor-Serving Facilities** - Public or private developments that provide accommodations, food and services, including hotels, motels, campgrounds, restaurants, and commercial-recreation developments such as shopping, eating, and amusement areas for tourists.

**Watercourse** - Natural or once natural flowing (perennially or intermittently) water including rivers, streams, and creeks. Includes natural waterways that have been channelized, but does not include manmade channels, ditches, and underground drainage and sewage systems.

**Watersheds** - Regions or areas drained by a network of surface or subsurface watercourses and have the potential for impacts on coastal streams, wetlands, estuaries, and groundwater basins through runoff and percolation.

**Wetland** - Lands within the coastal zone which may be covered periodically or permanently with shallow water and include saltwater marshes, freshwater marshes, open or closed brackish water marshes, swamps, mudflats, and fens. **Wetlands shall be defined as land where the water table is at, near, or above the land surface long enough to promote the formation of hydric soils or to support the growth of hydrophytes, and shall also include those types of wetlands where vegetation is lacking and soil is poorly developed or absent as a result of frequent and drastic fluctuations of surface water levels, wave action, water flow, turbidity or high concentrations of salts or other substances in the substrate. Such wetlands can be recognized by the presence of surface water or saturated substrate at some time during each year and their location within, or adjacent to, vegetated wetlands or deep-water habitats. For purposes of this definition, the upland limit of a wetland shall be defined as co-terminus with either: (1) the boundary between land with predominantly hydrophytic cover and land with predominantly mesophytic or**

**xerophytic cover; (2) the boundary between soil that is predominantly hydric and soil that is predominantly nonhydric; or (3) in the case of wetlands without vegetation or soils, the boundary between land that is flooded or saturated at some time during years of normal precipitation, and land that is not. For the purposes of this definition, the term “wetlands” shall not include wetland habitat created by the presence of and associated with agricultural ponds and reservoirs where: (1) the pond or reservoir was in fact constructed by a farmer or rancher for agricultural purposes; and (2) there is no evidence (e.g., aerial photographs, historical survey, etc.) showing that wetland habitat pre-dated the existence of the pond or reservoir. Areas with drained hydric soils that are no longer capable of supporting hydrophytes shall not be considered wetlands.**

**Zoning** - The division of a city or county by legislative regulations into areas, or zones, which specify allowable uses for real property and size restrictions for buildings within these areas; a program that implements policies of the General Plan.
