**Commission discussion and possible action on various topics for possible future
Commission workshops and/or briefing including but not limited to:**

- Wetland identification, delineation and protection.
- Environmentally sensitive habitat areas – what are they, legal requirements for their protection, Commission actions and judicial decisions
- Climate change – implications for adaptation and conservation strategies for coastal resources including elements such as sea level rise (e.g., shoreline erosion, hazards, public access, wetlands, land use planning), habitat shifts, ocean acidification, GHG reductions, best management practices.
- Agricultural land conservation for sustainable production
- Improving State-local partnerships in carrying out California's coastal management program pursuant to the Coastal Act
- Recreational boating and marina redevelopment
- Strategic planning
