## STAFF REPORT: REGULAR CALENDAR

**Application No.:** 6-12-26

**Applicant:** California Department of Parks & Recreation  
Brian Ketterer, Orange Coast District Superintendent

**Location:** San Onofre State Beach (San Diego County)

**Project Description:** Install automated payment machines (APMs) and implement an automated fee payment program at two locations within San Onofre State Beach: Trestles parking area and San Onofre Bluffs; after-the-fact authorization for fee collection at Trestles and for installation of iron rangers at both locations; establish new \$2 per hour rate for parking at Trestles and a new \$4 hourly rate at San Onofre Bluffs daily with flat rate of \$15 per day year round at both lots; establish new rate of \$20 a day on summer holidays- Memorial Day, July 4<sup>th</sup>, and Labor Day and for special events. No hourly rates are proposed on the same holidays or for special events.

**Staff Recommendation:** Approval with conditions.

---

### SUMMARY OF STAFF RECOMMENDATION:

The California Department of Parks & Recreation is seeking a coastal development permit to install two automated payment machines (APMs) and implement an automated fee payment program at two locations within San Onofre State Beach located at San Onofre in San Diego County. The machines will accept credit and debit cards and cash, but do not make change.

State Parks also proposes a flexible or “floating fee schedule” with daily, hourly, holiday, and special event rates at the Trestles parking area inland of Interstate 5 near the intersection of Cristianitos Road and El Camino Real and at San Onofre Bluffs, several miles south on the coast side of the freeway.

The proposal includes after-the-fact authorization for fee collection at the Trestles lot and for installation of iron rangers at both locations. Fee collection had not occurred or been authorized at Trestles prior to the unpermitted iron ranger. The proposed fee schedule would establish a new \$2 per hour rate for parking at Trestles and a new \$4 hourly rate at San Onofre Bluffs daily, include the flat rate of \$15 per day year round, and establish a new rate of \$20 a day on summer holidays- Memorial Day, July 4<sup>th</sup>, and Labor Day and for special events. No hourly rates are proposed on the same holidays or for special events.

Installation of the APM and the new fee schedule constitutes development under the Coastal Act Section 30106 (as both installation of a structure and a change in intensity of use and of access to water) and requires a CDP.

The standard of review for this project is Chapter 3 policies of the Coastal Act. Commission staff is recommending approval of the CDP with a series of conditions to maximize public access and protection of lower cost visitor and recreational opportunities on public land, while recognizing recent legislative direction to State Parks to create new revenue streams to fund facility management and operations throughout the State Park system. Commission staff specifically recommends that State Parks prepare a revised parking management program for the San Onofre State Beach parking lots covered by this application. To encourage increased visitation, the condition, among other provisions, requires State Parks to provide hourly rates seven days a week, including holidays.

Staff is recommending the \$20 holiday rate be approved for the three summer holidays, and also that hourly rates be offered on those days. Provision is made to eliminate the hourly rate on the three holidays after one year if at least 75% of those holiday visitors purchase all-day passes.

State Parks is also seeking approval to charge \$20 for parking at special events, such as surfing competitions. Staff is recommending approval of the special event rate at the Trestles parking area if State Parks designates the San Onofre Bluffs day use parking area for regular visitors at standard day use or hourly rates, as applicable. The special event and associated parking may be subject to separate coastal development permit requirements.

State Parks acknowledges that the APMs “can be reprogrammed to increase or decrease fees.” The proposed daily, holiday and special event rates are maximums. Other provisions require Executive Director review of further fee increases to determine whether an amendment or a new CDP is required. State Parks also is encouraged to explore the sale of annual regional passes and the means to maximize the availability of discount rates for seniors, the disabled, veterans, and low-income persons through the APM program or through park staff.

The flexible fee schedule likely will result in an increase in visitation by the public, which will further maximize public access, thereby enabling State Parks' to achieve its intended result of increasing revenue. Staff is recommending monitoring and data collection protocols to determine the effects of offering different parking rate options and to use that information to devise an updated parking management program that addresses any impacts to access and visitation patterns identified through analysis of the data.

The staff recommendation also addresses the hours of operation of the parking lots, new fee schedule and beach closures. Staff recommends State Parks implement supplemental means to increase visitation including extending park hours, parking lot hours and operation. At San Onofre Bluffs, the parking lot closes at sunset. Staff is recommending parking lot hours be 6 a.m. to one hour after sunset at a minimum with egress only. In order to maximize access at this location, the Commission is requiring that the parking lot hours be extended to at least one hour after sunset with an option for vehicles to stay later (without penalty) through installation of measures that prohibit ingress, but which still allow egress. Operating hours for the Trestles parking lot hours shall be 5 a.m. to 10 p.m. at a minimum.

Commission staff also recommends another condition concerning access to state tidelands. Consistent with Article X, Section 4, of the State Constitution and Section 30210 of the Coastal Act, State Parks may regulate the hours and use of parking lots, but not in a manner that prohibits all public access to the shoreline. Some existing signs make no distinction between "park" closure hours and constitutionally protected access to the shoreline. As conditioned, any existing signage that indicates or suggests the beach itself is closed at any time shall be removed and allow the public to gain pedestrian access to state waters for recreational activities after the parking lots have closed.

### EXHIBITS

**Exhibit 1** – Site map

**Exhibit 2** – Photograph of Automated Payment Machine

**Exhibit 3** – Memorandum of Peter Douglas Re: Coastal Development Permit Required When Imposing or Increasing Fees or Modifying the Hours of Operation of Public Beaches or Public Beach Parking Lots, Piers or Boat Launching Ramps, Dated October 29, 1993.

## I. MOTION AND RESOLUTION

### Motion:

*I move that the Commission **approve** Coastal Development Permit Application No. 6-12-26 subject to the conditions set forth in the staff recommendation.*

Staff recommends a **YES** vote on the foregoing motion. Passage of this motion will result in conditional approval of the permit and adoption of the following resolution and findings. The motion passes only by affirmative vote of a majority of the Commissioners present.

### Resolution:

*The Commission hereby approves a coastal development permit for the proposed development and adopts the findings set forth below on grounds that the development as conditioned will be in conformity with the policies of Chapter 3 of the Coastal Act and will not prejudice the ability of the local government having jurisdiction over the area to prepare a Local Coastal Program conforming to the provisions of Chapter 3 of the Coastal Act. Approval of the permit complies with the California Environmental Quality Act because either 1) feasible mitigation measures and/or alternatives have been incorporated to substantially lessen any significant adverse effects of the development on the environment, or 2) there are no further feasible mitigation measures or alternatives that would substantially lessen any significant adverse impacts of the development on the environment.*

## II. STANDARD CONDITIONS

This permit is granted subject to the following standard conditions:

1. **Notice of Receipt and Acknowledgment.** The permit is not valid and development shall not commence until a copy of the permit, signed by the permittee or authorized agent, acknowledging receipt of the permit and acceptance of the terms and conditions, is returned to the Commission office.
2. **Expiration.** If development has not commenced, the permit will expire two years from the date on which the Commission voted on the application. Development shall be pursued in a diligent manner and completed in a reasonable period of time. Application for extension of the permit must be made prior to the expiration date.
3. **Interpretation.** Any questions of intent or interpretation of any condition will be resolved by the Executive Director or the Commission.
4. **Assignment.** The permit may be assigned to any qualified person, provided assignee files with the Commission an affidavit accepting all terms and conditions of the permit.

5. **Terms and Conditions Run with the Land.** These terms and conditions shall be perpetual, and it is the intention of the Commission and the permittee to bind all future owners and possessors of the subject property to the terms and conditions.

### III. SPECIAL CONDITIONS

This permit is granted subject to the following special conditions:

1. **Revised Parking Management Program.** Prior to issuance of the coastal development permit, the applicant shall submit to the Executive Director for review and written approval, a revised parking management program for the subject parking lot(s), which shall include the following elements:
  - a. Provide hourly rates seven days a week at each facility where parking fees are charged through an automated pay machine (APM). In no case, shall a visitor paying hourly rates pay in excess of the flat day use fee.
  - b. Allow flat day use parking fee (\$15 maximum) per day year-round (except as allowed in sub-part "c" below of this special condition).
  - c. The proposed holiday rate of \$20 per day may be offered for the three summer holidays— Memorial Day, the Fourth of July and Labor Day only. An hourly rate option, with the same hourly rates offered during non-holiday periods, shall also be provided on those holidays for the first year the permit is valid. Based on the results of monitoring (as outlined in Special Condition No. 2 below), if data indicates 75 percent of visitors choose the all-day option upon arrival, the hourly rate option may be eliminated on only those summer holidays and at only those parking lots that reflect the 75 percent threshold in the subsequent years this permit is valid;
  - d. Fees may be reduced or eliminated at any time; however, any changes that would exceed the maximums set forth in this application shall be reported to the Executive Director to determine whether an amendment or new coastal development permit is required. Specific consideration should be given to reduced fees during off-peak periods;
  - e. Explore the sale of annual regional passes and the means to maximize the availability of existing discount rates for seniors, the disabled, veterans and low-income persons through the APM program or through park staff;
  - f. Implement supplemental means to increase visitation including extending park hours, parking lot hours and operation. At San Onofre State Beach, the parking lot hours for San Onofre Bluffs Campground lot shall be 6 a.m. to one hour after sunset, at a minimum. The Trestles parking lot hours shall be 5 a.m. to 10 p.m., at a minimum. State Parks will provide the option for vehicles to stay later (without penalty) through measures that prohibit ingress, but allow egress only at both locations. Operating hours may be expanded at any time; however, any changes that would reduce operating hours below

those outlined above shall be reported to the Executive Director to determine whether an amendment or new coastal development permit is required;

- g. At San Onofre State Beach, State Parks may charge \$20 a day for special events if the Department designates the San Onofre Bluffs day use parking area as available for regular visitors at standard day use or hourly rates, as applicable. The event and associated parking may be subject to separate coastal development permit requirements.
- h. Include monitoring and data collection protocols to determine how or whether parking fees affect public use over the long term pursuant to Special Condition #2 below.

The applicant shall undertake development in accordance with the approved final parking management program. Any proposed changes to the approved final parking management program shall be reported to the Executive Director. No changes to the approved final parking management program shall occur without a Commission amendment to this Coastal Development Permit unless the Executive Director determines that no amendment is legally required.

2. **Permit Expiration and Monitoring Requirements.** CDP #6-12-26 shall be valid for a period of three years from date of Commission action and subject to the following monitoring and reporting requirements during the three-year permit validation period:

- a. The goal of the monitoring is to determine the effects of offering different parking rate options (e.g. hourly, flat fee, holiday, etc.) through the Automated Payment Machines (APMs) on park visitation, access and revenue on weekdays, weekends, peak and off-peak periods and holidays. Data to be collected from APMs must demonstrate parking lot usage in both peak (May 16 to September 30) and off-peak periods (October 1 to May 15) and includes, but is not limited to, the following:
  - 1) Paid attendance figures
  - 2) Revenue collected
  - 3) Turnover rates
  - 4) Type of fee paid – hourly, daily, holiday, discount pass, other.
  - 5) Quantity and type(s) of parking violations issued
- b. Data shall be submitted annually to the Executive Director, with the first annual period beginning from the date of permit issuance;
- c. Prior to expiration of the CDP, the applicant shall submit an application for a permit amendment or new CDP for an updated parking management program which has been revised to address the impacts to access and visitation patterns identified through analysis of the data from the submitted monitoring information. The updated submittal shall include measures to eliminate any identified adverse impacts to coastal access and to maintain and/or increase visitation and revenue based on the submitted data.

3. **State Tidelands Access.** This permit shall regulate hours and use of the parking lots, but does not authorize a prohibition of all public access to the shoreline. The applicant shall remove any existing signage that indicates or suggests that the beach itself is closed at any time and shall allow the public to gain access to state waters for recreational activities after the parking lots have closed.
4. **Scope of Permit.** Only the parking lots at Trestles and San Onofre Bluffs within San Onofre State Beach are addressed herein. Hours of operation, fee collection methods and/or schedules have not been reviewed or approved by the Commission for the Surf Beach area and are not authorized through this coastal development permit.

## **IV. FINDINGS AND DECLARATIONS**

### **A. PROJECT LOCATION, BACKGROUND AND DESCRIPTION**

#### 1. Project Location

San Onofre State Beach is an island of open space that begins at the very southern end of Orange County at San Clemente and extends several miles into San Diego County. A long scenic leg of the park hugs the coast and bluff-top on the ocean side of the Interstate 5 freeway. Visitors have magnificent views of the ocean and coastal bluffs. The interior section of the park on the inland side of Interstate 5 extends up a scenic canyon to the San Mateo Campground and beyond, next to the Camp Pendleton Marine Corps base. San Onofre is best known for the surfing beach at Trestles at the mouth of San Mateo Creek. Nearby is Surf Beach and farther south the San Onofre Bluffs Campground and day uses area. The park is also very popular with swimmers, hikers, joggers, walkers, nature enthusiasts, campers, cyclists, and sunbathers. The 2,106-acre park provides a large amount of open space surrounded by urbanized areas and is a major recreational and environmental resource.

#### 2. Project Description:

The California Department of Parks & Recreation has installed two Automated Payment Machines or APMs at San Onofre State Beach. One of the APMs is located at the Trestles parking lot on the inland side of Interstate 5 near the intersection of El Camino Real and Cristianitos Road. The lot is about a 20-minute walk to Trestles Beach. The other APM has been installed near the entry kiosk to the San Onofre Bluffs campground area on the coast side of Interstate 5 south of the San Onofre nuclear power plant. The machines accept credit and debit cards and cash, but do not make change. Fees have been collected at a staffed kiosk or entry station at San Onofre Bluffs.

State Parks is also seeking after-the-fact authorization to install Iron Rangers at the two locations. The Department has not sought or received Commission approval to collect fees at the Trestles lot, but had been doing so with the unpermitted Iron Ranger; thus this proposal includes after-the-fact authorization for fee collection at Trestles.

In their application and subsequent correspondence, State Parks also proposes a flexible or “floating fee schedule,” including hourly, daily and special event rates. The Department would establish a new \$2 per hour rate for parking at Trestles and a new \$4 hourly rate at San Onofre Bluffs seven days a week. State Parks proposes the flat rate of \$15 per day for parking year-round and to establish a new rate of \$20 a day on the Memorial Day, July 4<sup>th</sup>, and Labor Day summer holidays and for special events. No hourly rates would be offered on holidays or during special events. The APM at San Onofre Bluffs is also capable of assisting the public in renting a campsite and selling annual State Park visitor passes.

Following initial submittal of the application, Commission staff asked the applicant to explain the need for the automated pay machines and revised fee schedule. In response to those questions, the applicant explained:

“State Parks, under the direction of the Legislative and Executive Branches of State government is required to be entrepreneurial in how it collects revenue. With that direction, the Orange Coast District is investigating separate payment options for all park units to not only maintain or increase revenue, but to increase visitation as well.”

The July 23, 2012 letter from the applicant also stated: “The Orange Coast District is substantially lowering off-season camping rates, instituting an hourly fee schedule at many park units, and is not seeking to increase the current regular flat day rate charged at any park unit. Again, the District believes it is adequate to provide the Coastal Commission the highest price point fee which may be used at these park units and describe what a floating fee schedule is. However, it should not be the Commission’s decision to dictate what fee schedules will be adopted by State Parks when coastal access and view shed issues are not diminished.”

The applicant has indicated the APMs are currently not capable of honoring long standing State Parks discounts designed to assist visitor groups such as seniors, disabled, and veterans.<sup>1</sup> At entry kiosks staffed by park workers, senior citizens 62 years of age or older are able to obtain an immediate \$1 discount on day use fees and \$2 on camping. Disabled persons with a special pass, issued by the department, are entitled to receive a 50% discount on day use fees. Other discounts are available for seniors, distinguished veterans, the aged, blind, disabled and low-income Californians on welfare through an application process. For example, distinguished veterans with a special pass are not charged for either day use or camping. The APM is not capable of recognizing these specific user groups and therefore cannot provide the long-standing discounts. However, State Parks staff has indicated they will continue to provide the discounts when staff are present and will explore ways to offer the discounts through the APMs if feasible.

State Parks has applied for a coastal development permit to install and operate the machines. As noted, the APMs at the Trestles lot and San Onofre Bluffs have been installed. Therefore, State Parks is seeking after-the-fact approval for installation and operation of those machines.

---

<sup>1</sup> A list of existing State Park passes and discounts is available on the Department website and can be viewed at: [http://www.parks.ca.gov/?page\\_id=1049](http://www.parks.ca.gov/?page_id=1049) Page viewed by Coastal staff on January 15, 2013.

## **B. COASTAL DEVELOPMENT PERMIT JURISDICTION**

Pursuant to the California Coastal Act a coastal development permit is required for any “development”, unless specifically exempted under a variety of provisions or procedures set forth in the Coastal Act or pursuant to other provisions of law. The Coastal Act defines “development” as including, among other things, a “change in the intensity of use of water, or of access thereto....” (Public Resources Code Section 30106.) A coastal development permit is required even if little or no physical construction is necessary to implement the action calling for a fee, a fee increase or a change in hours of operation.

A coastal development permit also is required for development that includes construction of a structure. Installation of an APM requires physical improvements to the infrastructure at the site. In some cases, trenching is needed to install conduit to carry electrical power and communications lines. In some cases, minor grading may be necessary to install the concrete pad on which the machine is placed. Some APMs operate on solar power and have a Wi-Fi connection. Installation of the APM at San Onofre Bluffs required 50 feet of trenching through previously disturbed asphalt to connect with electricity at the entry kiosk.

Beyond the physical installation, the APMs and their associated fees have the potential to affect the intensity of use and access to beaches and state waters. In October 1993, former Commission Executive Director Peter Douglas issued a memo to Planning Directors of Coastal Cities and Counties and other interested persons (Exhibit 3) describing circumstances when a coastal development permit is required when imposing or increasing fees or modifying the hours of operation of public beaches or public beach parking lots, piers or boat launching ramps.

The memo states: “Because the imposition or substantial increase of a user fee for beach access parking... would, in our opinion, result in a change in access to state waters, a coastal development permit is required.” The memo says a ‘substantial increase’ means any fee increase of 25% or more in any given year or 50% or more on a cumulative basis over any three consecutive year period.”

In a number of cases, the Commission has applied the guidance provided in the memo. For instance, in 1997, the Commission approved CDP 5-96-268 for construction of a five-level “Queensway Bay” parking structure in downtown Long Beach. A permit amendment 5-96-268-A1 was later approved with a special condition requiring an amendment to the coastal development permit for any parking fee increase that exceeds 25% in any one-year period or 50% in any three-year period.

In 1998, the Commission approved a proposed project to install metered parking at the Marina Green public parking lots and new curbside spaces with parking meters along Shoreline Drive in downtown Long Beach. CDP 5-98-042 also contained a special condition requiring a permit amendment for any parking fee increase that exceeded 25% in any one-year period, or 50% in any three-year period.

At San Onofre, State Parks’ proposed increase in the day use fee from \$15 to \$20 on the three summer holidays represents a 33.3 percent increase within a one year period and constitutes a

substantial increase requiring a permit. Furthermore, at the Trestles lot, State Parks is requesting after-the-fact authorization for the new imposition of a parking fee at that location. Finally, the operating hours for the fee machines and parking lots are subject to Commission review and have not been authorized through a coastal development permit. Such activities meet the definition of development contained in Section 30106 of the Coastal Act as they result in a change in the intensity of use of the land and/or a change in intensity of use of water, or of access thereto.

### **C. CHAPTER 3 STANDARD OF REVIEW**

The proposed project is located within the Commission's CDP jurisdiction area. Although the proposed project is located within San Diego County jurisdiction, the County does not have a certified LCP that is applicable to the subject area. Therefore, the standard of review is Chapter 3 policies of the Coastal Act.

### **D. PUBLIC ACCESS AND RECREATION**

The California Coastal Act requires the Commission to maximize opportunity for coastal access and contains the following relevant policies:

*Section 30210: In carrying out the requirement of Section 4 of Article X of the California Constitution, maximum access, which shall be conspicuously posted, and recreational opportunities shall be provided for all people consistent with public safety needs and the need to protect public rights, rights of private property owners, and natural resource areas from overuse.*

*Section 30211: Development shall not interfere with the public's right of access to the sea where acquired through use or legislative authorization, including, but not limited to, the use of dry sand and rocky coastal beaches to the first line of terrestrial vegetation.*

*Section 30212.5: Wherever appropriate and feasible, public facilities, including parking areas or facilities, shall be distributed throughout an area so as to mitigate against the impacts, social and otherwise, of overcrowding or overuse by the public of any single area.*

*Section 30213: Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred. ...*

*Section 30220: Coastal areas suited for water-oriented recreational activities that cannot readily be provided at inland water areas shall be protected for such uses.*

*Section 30221: Oceanfront land suitable for recreational use shall be protected for recreational use and development ...*

Other Coastal Act policies also are relevant to the public recreational access issues presented by the

proposed project, including:

***Section 30240 (b):** Development in areas adjacent to...parks and recreation areas shall be sited and designed to prevent impacts which would significantly degrade those areas, and shall be compatible with the continuance of those...recreation areas.*

***Section 30252:** The location and amount of new development should maintain and enhance public access to the coast by (1) facilitating the provision or extension of transit service, (2) providing commercial facilities within or adjoining residential development or in other areas that will minimize the use of coastal access roads, (3) providing non-automobile circulation within the development, (4) providing adequate parking facilities or providing substitute means of serving the development with public transportation,....*

Among the most important goals and requirements of the Coastal Act is the mandate to protect, provide, enhance, and maximize public recreational access opportunities to and along the coast consistent with strong resource conservation principles. Within this guiding framework, the protection of and priority for lower cost visitor and recreational facilities is explicitly identified. San Onofre State Beach is a gem. World renowned for its consistent, near perfect waves, Trestles Beach provides some of the best year-round surfing waves in Southern California. Surfing at Trestles is an integral component of the coastal recreational experience at San Onofre State Beach and is a quintessential coastal zone resource.

The park's terrain varies from flat sandy beaches, to sheer coastal cliffs, marshes to alluvial floodplains and prairies to rolling foothills. The area is rich with Native American history. An ancient Acjachemen village believed to be over 8,000 years old located in the park. The park contains numerous archeological remains.

The coastal strip includes Trestles Beach and Surf Beach, interrupted by the San Onofre Nuclear Generating Station. The southernmost section of the park contains the San Onofre Bluffs campground. The area is a popular individual and group campground situated atop coastal bluffs overlooking the Pacific Ocean. Public beach access is provided by multiple dirt trails down the bluff face, serving both the campsites and adjacent day-use parking spaces. Communal bathroom, eating, and recreation areas are interspersed with campsites along this stretch of the park. A popular bicycle route connecting Orange County and San Diego County communities runs through the park. According to State Parks System Statistical Reports, paid day use at San Onofre State Beach peaked at 1.3 million in 2008-09, declined to just under 1 million in 2009-10, before rebounding to 1.1 million in 2010-11. The day use fee was increased from \$10 to \$15 in the summer of 2009. State Parks officials attribute the decline in paid day use to a variety of factors, including the loss of sandy beach, the economic recession, the loss of two main pedestrian beach accesses at San Onofre, and the prohibition of nudity at the park. To complete a thorough analysis of why paid day use collection has been reduced, the applicant said the Commission would need to analyze weather patterns, water conditions, economic impacts, crime rates and statistics and pricing.

The parking lots at San Onofre State Beach are used by the public to gain access to beaches, state waters, and inland areas. The availability of public parking and the cost of that parking is critically important at San Onofre because there are few alternative parking areas available. A limited

amount of free on-street parking is available on El Camino Real and on Cristianitos Road on the inland side of Interstate 5 next to the 106-space Trestles lot in unincorporated San Diego County. There are no public parking opportunities for many, many miles further to the south due to the presence of the military base. In the adjacent Orange County City of San Clemente, no parking is allowed on El Camino Real near the Trestles lot. Adjacent residential neighborhoods are private gated communities, or military housing, which do not allow public access or parking. State Parks controls the majority of the legal parking areas for San Onofre. Transit service to the park is virtually non-existent. Long-distance hikers and cyclists can access the park on foot or by bike, but the overwhelming majority of park visitors arrive by car.

Prior to this application, State Parks offered only one parking rate at San Onofre Bluffs— a flat \$15 a day charge, regardless of the length of stay. No hourly rates were available. The flat fee program offers visitors no alternative to access the park by motor vehicle for less than the full day rate. In their application, the Department says the automatic pay machines will allow State Parks to provide more flexible fee schedules including hourly, daily and seasonal fee schedules rather than just the current flat fee schedule....” State Parks believes the proposed floating fee schedule will further increase visitation<sup>2</sup>.

This application includes an hourly rate of \$2 at the Trestles lot and a \$4 hourly rate daily at San Onofre Bluffs (both Monday through Sunday); however, no hourly rates are proposed for holidays or during special events. The Commission believes an hourly parking rate would allow short-term visitors the opportunity to enjoy the sunset or engage in recreational activity such as a walk or jog on the beach, without incurring the expense of the full day fee. It is advantageous that the proposed APMs will allow State Parks to offer an hourly fee option to maximize access and provide the opportunity for visits of a brief duration such as surfing in the morning, walking on the beach, or viewing the sunset. The parking lots with hourly rates are inherently a lower-cost visitor and recreational facility since they would offer a one-hour visit for \$2 - \$4 rather than a one-hour visit that costs \$15 if only a full-day fee was offered at the facility. Therefore, a full-day flat rate parking program does not maximize public access or provide a low-cost option.

State Parks is offering hourly rates at many state beaches elsewhere in San Diego County, including Carlsbad, South Carlsbad, San Elijo, Cardiff, Torrey Pines North, and Silver Strand in Coronado. State Parks announced the move in a November 2011 press release, which states:

“If visitors want a short visit, like a run on the beach or a sunset, they would not pay for the whole day, but rather just for the time they select and that’s how they would be given a price break. Also, State Parks thinks this will help with revenue because it may encourage more people to take advantage of the opportunity for shorter visits, quite possibly creating more turnover of visitors and therefore more revenue. In addition, visitors may choose to use the state lots at hourly rates rather than park further away from the beach.”

The \$2 hourly rate was implemented at the Trestles lot after the APM was installed in the summer of last year. In a November 23, 2012 letter to Commission staff, State Parks indicates data collected

---

<sup>2</sup> Letter dated August 30, 2012 from the applicant to Commission staff

at the Trestles lot during the months of August and September showed that 53 percent of sales were for five hours or more, 31 percent purchased three to four hours, 12 percent purchased two hours or less and only 3 percent were for an hour or less. This preliminary data suggests there is demand for parking options, including hourly and longer-term day use parking at Trestles.

To ensure that maximum access is provided, the Commission is requiring **Special Condition 1** which requires State Parks to submit, prior to issuance of the CDP, a revised parking management program for the San Onofre parking lots covered by this application. State Parks current proposal includes hourly rates at both the Trestles and San Onofre Bluffs lots seven days a week, except holidays and for special events. To encourage increased visitation, the condition requires State Parks to provide hourly rates daily (i.e. Monday through Sunday and holidays) at both San Onofre locations where parking fees are charged through an automated payment machine. To paraphrase the State Parks press release involving hourly rates at San Diego state beaches, this will provide maximum flexibility for users, provide a lower rate for shorter visits, and potentially create more turnover and revenue. This provision is consistent with Section 30213 of the Coastal Act which states that “Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred. ...”

The special condition indicates a visitor paying hourly rates shall not be required to pay in excess of the flat day use fee. The purpose of this provision is to ensure that State Parks will provide an opportunity for an hourly ticket to be upgraded to a full day ticket without exceeding the maximum cost of the day use fee.

The Department’s application proposes the flat rate of \$15 per day year-round except on certain summer holidays where they are proposing to establish a new rate of \$20 a day on Memorial Day, July 4<sup>th</sup>, and Labor Day. **Special Condition 1** also provides that State Parks may only require the proposed \$20 holiday rate on the three summer holidays—Memorial Day, Fourth of July, and Labor Day. At \$20, the holiday rate would be among the highest charged by a state beach operated by the Department.<sup>3</sup> Day use fees for all State Parks are shown on the Department’s website at: [http://www.parks.ca.gov/pages/737/files/Current\\_GeoLoc%20web\\_day%20use.pdf](http://www.parks.ca.gov/pages/737/files/Current_GeoLoc%20web_day%20use.pdf) Page visited by Commission staff on January 15, 2013.

Summer holidays are high demand periods and State Parks views those days as an opportunity to increase revenue, in part to offset higher costs for law enforcement, public safety, housekeeping and customer service, while still providing the same accessibility to all patrons. In his November letter, Superintendent Ketterer provided staff with preliminary data showing that on Labor Day last year, 98 percent of the day use pass sales at the Trestles APM were for seven hours or more. This preliminary data suggests that demand exists for longer duration parking on that summer holiday.

To provide an opportunity for some visitors to access the park at a lower rate for a short-term visit, **Special Condition 1** requires State Parks to offer an hourly rate on the three summer holidays during the first year of this permit. Based on monitoring results, if data indicates that 75 percent of

---

<sup>3</sup> In a letter dated November 23, 2012, State Parks states that the Commission has already authorized fees of \$25 and above on specific holidays and during special events at other parking lots. Commission staff has not yet identified any such approvals granted by the Commission through a coastal development permit.

visitors choose the all-day option upon arrival, the hourly rate option may be eliminated on only those summer holidays and at only those parking lots that reflect the 75 percent threshold in the subsequent years this permit is valid.

The proposed daily, holiday and hourly rates are maximums. State Parks acknowledges that the automated payment machines “can be reprogrammed to increase or decrease rates.” In order to ensure that changes are reviewed for consistency with the Coastal Act, **Special Condition 1** provides that fees may be reduced or eliminated at any time, however, any changes that would exceed the maximums set forth in this application shall be reported to the Executive Director to determine whether an amendment or new coastal development permit is required. Specific consideration should be given to reduced fees during off-peak periods. As discussed above, providing the flexible fee schedule should result in increased visitation and therefore increased revenue. The actual impact of the new fee structure on visitation and revenue will be more evident after the APMs have been operating and user data is analyzed.

To provide additional opportunities for visitation, State Parks shall explore the sale of annual regional passes. At kiosks staffed by park workers, the Department provides discounts for certain groups of visitors, including an immediate \$1 discount for senior citizens over 62 and a 50 percent discount for disabled persons who have a Department-issued pass. These discounts are not available through the Automated Payment Machines. To preserve these discounts, State Parks is encouraged to explore the means to maximize the availability of discount rates for seniors, the disabled, veterans, and low-income persons through the APM program or through park staff.

Trestles Beach is the site of popular surf competitions. During such special events, State Parks opens other normally closed coast side lots for parking. **Special Condition 1** says State Parks may charge \$20 a day for special events at San Onofre State Beach if the Department designates the San Onofre Bluffs day use parking area as available for regular visitors at standard day use or hourly rates, as applicable. The event and associated parking may be subject to separate coastal development permit requirements.

This provision is consistent with Section 30213 of the Coastal Act which states that “Lower cost visitor and recreational facilities shall be protected, encouraged, and, where feasible, provided. Developments providing public recreational opportunities are preferred. ...”

**Special Condition 2** establishes a 3 year validation period and requires monitoring and data collection protocols. Data to be submitted annually to the Executive Director includes, but is not limited to: paid attendance figures, revenue collected, turnover rates in parking lots, and the type of fee paid – hourly, daily, holiday, or other (for example, camping fees or annual pass purchases.) The goal of the monitoring is to determine the effects of offering different parking rate options (e.g. hourly, flat fee, holiday, etc.) through the Automated Payment Machines (APMs) on park visitation, access and revenue on weekdays, weekends, peak and off-peak periods and holidays. With that information, the applicant would submit an application for a permit amendment or new CDP for an updated parking management program prior to permit expiration which has been revised to address any impacts to access and visitation patterns identified through analysis of the data from the submitted monitoring information. The updated submittal for permit reauthorization

would include measures to eliminate any identified adverse impacts to coastal access and to maintain and/or increase visitation and revenue based on the submitted data.

### **Hours of Operation/Beach Closures:**

One of the Commission's most fundamental legislative mandates is to protect and expand public access to and along the coast and to guarantee the public's Constitutional right to access state tidelands through the implementation of the Coastal Act. The Commission has a long history of assuring through our planning and regulatory process that existing public access to the sea is not closed or adversely impacted by new development; that where appropriate, new access and recreation is provided, including as mitigation for development impacts; and that prescriptive public rights to access the shoreline are protected. We also have a mandate to assure that public access is provided and managed in relation to the needs of all citizens, and to protect private rights, natural resources, and public safety. Hence, the Commission has long been involved in evaluating and resolving conflicts between competing uses, and in evaluating proposals that might affect the public's ability or costs of getting to the coast, to assure that the public's fundamental rights of coastal access, and the legislative mandates of the Coastal Act, are met.

In dealing with these issues, the Commission has distinguished between the closure of public use of beaches and of support facilities, such as parking lots, accessways, piers and boat launch ramps. The closest scrutiny is given to the closure of beaches; however, limiting hours of beach parks and parking lots is especially critical in terms of impacts to access when the park access or parking lot serves as the only means for the public to reach the shoreline, as is the case at San Onofre State Beach.

To ensure consistency with Section 30210 of the Coastal Act, maximum access to the navigable waters for the purpose of recreation must be provided for all people that is in harmony with public safety needs. Working with the City of Laguna Beach on its coastal development permit (Resolution No. 10.019/CDP No. 10-12) for an ordinance (No. 1521) establishing a beach curfew, the City decision to approve beach closure between 1 a.m. and 5 a.m. was not appealed to the Commission because the ordinance states the closure shall not apply to activities such as walking, jogging, fishing, grunion hunting, scuba diving, surfing, or swimming and specifically acknowledges that individuals may go to or come from the wet sand or the area within 20 feet inland of the wet sand, for any of the allowed uses by the most direct safe route available at any given location.

In the Huntington Beach downtown area Specific Plan amendment (HNB-MAJ-1-10), the Commission certified the following language to assure public access to State tidelands is provided:

3.3.7.15: A public beach closure/curfew cannot apply to the area of Coastal Commission original jurisdiction (State tidelands, submerged lands and public trust lands) including but not necessarily limited to the area seaward of the mean high tide line. Public access to the water's edge and at least 20 feet inland of the wet sand of all beaches shall be permitted at all times. Closure to public use of any portion of the beach inland of the mean high tide line is not encouraged and requires a coastal development permit which must maintain the public's right to gain access to State tidelands. Measures that limit public use of the beach shall be limited to those necessary to address

documented public safety events that cause a risk or hazard to the general public and shall be the minimum necessary to address the potential risk or hazard to the general public. The need for continuation of safety measures that limit public access shall be reassessed on a periodic basis to assure maximum public access is provided. Limited closure for beach maintenance may be allowable pursuant to a coastal development permit.”

Each State Park Superintendent is authorized by the Department Director to adopt Posted Orders to manage activities such as park hours within each park unit. The Posted Order (No. 925-12-003 issued July 1, 2012) sets closing times for all State Park units in the Orange Coast District. Pursuant to the Order, the Trestles lot is closed from 8 p.m. to 6 a.m. The day use areas of San Onofre Bluffs are closed from sunset until 6 a.m.

The order states that: “All areas within the park units of the Orange Coast District designated for day use, such as, parking areas, picnic areas, trails, bluff areas, beach (except as in Article V[sic]<sup>4</sup> of the State Constitution involving fishing) and other areas not designated as authorized camping areas are closed to public use, entry and occupancy and all traffic, to include vehicle, foot, bicycle or other human powered vehicles, mopeds or other forms of transportation other than administrative or emergency vehicles....”

The sunset closure is the earliest closure time of any state beach in San Diego County. During late November and December, sunset at San Onofre is as early as 4:45 p.m. Due to the relationship of the parking lots to beach access points, signage posted at State Park facilities that establish beach or beach parking hours at sunset or 10 p.m. effectively prevents the public from using the beach after park hours, which is inconsistent with Section 30210 of the Coastal Act.

As part of **Special Condition 1** for this permit, the Commission is requiring that State Parks implement supplemental means to increase visitation, including extending park hours, parking lot hours and operation. At San Onofre Bluffs Campground, the parking lot hours shall be 6 a.m. to one hour after sunset at a minimum with egress only. In order to maximize access at this location, the Commission is requiring that the parking lot hours be extended to at least one hour after sunset with an option for vehicles to stay later (without penalty) through installation of measures that prohibit ingress, but which still allow egress. The day use parking serves fairly long beach access trails that extend down the bluff to the beach in this park setting. Given that one of the most sought after moments on the California coast is witnessing the sun setting over the Pacific Ocean, extending the operating hours at the parking lot would help provide maximum access to the coast by allowing visitors the chance to enjoy the sunset at the beach and/or continue to enjoy and then return to their car to conclude their recreational activities within a reasonable time period. These expanded hours and methods of operation, along with the shorter hourly rate option, will serve to maximize public access opportunities along this segment of the coast which are constrained by the management of State Parks’ parking lots.

The Trestles parking lot hours shall be 5 a.m. to 10 p.m. at a minimum with the egress only option. The walk to the beach from this lot is down a scenic trail which takes at least 20 minutes, but for

---

<sup>4</sup> The correct citation is to Article X, Section 4 of the state Constitution.

many, longer. The expanded parking lots hours will allow maximum utilization of this public parking lot for its intended purpose, which should increase both visitation and revenue. Expanded hours of operation will provide a public service and offset the impact of fee collection for parking at this lot which has previously been free of charge.

With expanded hours, these parking lots provide an important place where visitors can choose to park their vehicle and enjoy early morning or evening recreational opportunities at the beach, such as surfing, nighttime scuba diving, fishing, stargazing, etc. The Commission's special condition reflects the importance of retaining the later operating hours at these facilities.

In order to ensure that changes are reviewed for consistency with the Coastal Act, **Special Condition 1** provides for operating hours to be expanded at any time; however, any changes that would reduce operating hours below those outlined above in this special condition shall be reported to the Executive Director to determine whether an amendment or new coastal development permit is required.

**Special Condition 3** concerns access to state tidelands. Consistent with Article X, Section 4, of the State Constitution and Section 30210 of the Coastal Act, State Parks may regulate hours and use of parking lots, but not in a manner that prohibits all public access to the shoreline. Some existing signs make no distinction between 'park' closure hours and constitutionally protected access to the shoreline. Therefore, the Commission finds removal of any existing signage that indicates or suggests that the beach itself is closed at any time will allow the public to gain access to state waters for recreational activities after the parking lots have closed. This is an essential part of an overall program to ensure that, in the context of these proposed changes to the fee collection system and the fee structure itself, that any potential adverse impacts on public access are ameliorated by expanded parking lot hours and the correction of existing inconsistencies with Section 30210 of the Coastal Act.

**Special Condition 4** acknowledges only the parking lots at Trestles and San Onofre Bluffs within San Onofre State Beach are addressed through this coastal development permit. Hours of operation, fee collection methods and/or schedules have not been reviewed or approved by the Commission for the Surf Beach area and are not authorized through this coastal development permit.

#### **CONCLUSION**

As conditioned, the proposed project to install Automated Payment Machines and institute a new floating fee schedule, including hourly rates, has the potential to expand visitation, improve public access, and increase revenue. State Parks has an opportunity to demonstrate whether or not the public will take advantage of alternatives to the existing \$15 flat fee day use parking rate, particularly for shorter length visits. Data collected during the three-year life of this permit will provide some evidence about the demand of state park visitors for a variety of parking options and provide a tool to help devise the best approach to maximize public access to the coast and increase visitation and, therefore, revenue, at San Onofre State Beach.

Changes in the hours and operation of the San Onofre Bluffs parking lot that currently closes at sunset will expand opportunities for the public to access and enjoy the beach. Signs indicating that the beach is closed after hours will be removed to ensure that existing rights of access to State tidelands are honored.

Prior to expiration of the CDP, the applicant shall submit an application for a permit amendment or new CDP for an updated parking management program which has been revised to address the impacts to access and visitation patterns identified through analysis of the data from the submitted monitoring information. The updated submittal shall include measures to eliminate any identified adverse impacts to coastal access and to maintain and/or increase visitation based on the submitted data.

The Commission finds that the proposed project, as conditioned, is consistent with the public access and recreational policies of the Coastal Act.

## **E. VISUAL IMPACTS**

Coastal Act Section 30251 requires that “the scenic and visual qualities of coastal areas shall be considered and protected as a resource of public importance. Permitted development shall be sited and designed to protect views to and along the ocean and scenic coastal areas....”

The Automated Payment Machines would be installed at the entrance to or in paved parking lots. The machines stand about 54 inches off the ground. In some cases, the APMs are accompanied by a 12-foot-tall pole to mount informational signs and provide a location for solar collectors, which power some of the machines. At the Trestles lot, the APM has been placed next to the inland boundary fence. The machine is solar powered and Wi-Fi equipped. The APM at San Onofre Bluffs is in a parking area near the entry kiosk. It has an underground electrical connection. As such, none of the structures involve a visual impact that would affect public views of the shoreline, view corridors or the scenic or visual qualities of coastal areas. Therefore, installation of the proposed APMs is consistent with Coastal Act Section 30251.

## **F. CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA)**

Section 13096 of the California Code of Regulations requires that a specific finding be made in conjunction with coastal development permit applications showing the application to be consistent with any applicable requirements of CEQA. Section 21080.5(d)(2)(A) of CEQA prohibits a proposed development from being approved if there are feasible alternatives or feasible mitigation measures available which would substantially lessen any significant adverse effect which the activity may have on the environment.

The Department of Parks & Recreation, acting as lead CEQA agency, determined that the proposed project was categorically exempt from CEQA review, and thus the Department did not identify any significant adverse environmental effects from the proposed project. The Coastal Commission’s review and analysis of coastal development permit applications has been certified by the Secretary of Resources as being the functional equivalent of environmental review under CEQA. This staff

report has discussed the relevant coastal resource issues with the proposal, and has recommended appropriate conditions to avoid and/or lessen any potential for adverse impacts to said resources. All public comments received to date have been addressed in the findings above. All above Coastal Act findings are incorporated herein in their entirety by reference.

As such, there are no additional feasible alternatives nor feasible mitigation measures available which would substantially lessen any significant adverse environmental effects which approval of the proposed project, as conditioned, would have on the environment within the meaning of CEQA. Thus, as conditioned, the proposed project will not result in any significant environmental effects for which feasible mitigation measures have not been employed consistent with CEQA Section 21080.5(d)(2)(A).

## CALIFORNIA COASTAL COMMISSION

45 FREMONT, SUITE 2000  
 SAN FRANCISCO, CA 94105-2219  
 VOICE AND TDD (415) 904-5200

RECEIVED  
 NOV 01 1993

CALIFORNIA  
 COASTAL COMMISSION  
 CENTRAL COAST OFFICE

October 29, 1993

TO: Planning Directors of Coastal Cities and Counties, and Other Interested Persons

FROM: Peter Douglas, Executive Director *Peter Douglas*

SUBJECT: COASTAL DEVELOPMENT PERMIT REQUIRED WHEN IMPOSING OR INCREASING FEES OR MODIFYING THE HOURS OF OPERATION OF PUBLIC BEACHES OR PUBLIC BEACH PARKING LOTS, PIERS OR BOAT LAUNCHING RAMPS

The Coastal Commission has received numerous inquiries as to whether the imposition or increase of fees or making a change in operating hours of public beaches, shoreline parks or public beach parking lots, piers or boat launching ramps requires a coastal development permit. It appears these inquiries result from increasing pressures on local governments to charge fees and/or change the hours of operation of such facilities based on budgetary and public safety concerns. In addition to these inquiries, the Commission has taken action on several specific coastal development permit applications for such activities of which you should be aware. We think it appropriate to respond on a statewide basis and apologize for our delay.

The answer is yes, in most cases. For purposes of this communication, it is important to distinguish between the various types of facilities and actions being discussed. The descriptions below of the types of facilities referred to in this memorandum are not intended to constitute any sort of legal definition but rather provide the context for the discussion that follows. Public beaches refers to all sandy beach areas under public ownership or control, whether or not subject to the public trust. Shoreline parks are public recreation areas that may or may not include sandy beach located immediately adjacent to or in close proximity to state waters and which can be used by the public to gain access to such waters. Public parking facilities include any parking areas or portions of such areas (eg. parking lots, on-street or curbside parking spaces, parking structures) open to the public that are used by the public to gain access to public beaches or state waters. Public piers and public boat launching ramps are self-explanatory.

Pursuant to the California Coastal Act a coastal development permit is required for any "development", unless specifically exempted under a variety of provisions or procedures set forth in the Coastal Act or pursuant to other provisions of law (eg. the doctrine of vested rights). The Coastal Act defines "development" as including, among other things, a "...change in the intensity of use of water, or of access thereto..." (Public Resources Code Section 30106.) After a local coastal program (lcp) has been fully certified

October 29, 1993

Page 2

for a city or county, the coastal development permit issuing responsibilities of the Commission are delegated to that local government. Coastal permitting responsibilities stay with the Commission for any development on any land or water areas subject to the public trust. In addition, certain coastal permit actions by local government are appealable to the Commission, including those for the types of facilities and actions that are the subject of this memo. Local coastal programs (lcps) have incorporated the Coastal Act definition of "development" requiring a coastal development permit from the local government implementing a fully certified lcp.

It is the Commission's position that any action which has the effect of changing the intensity of use of state waters or of access to such waters is a "development" for purposes of the Coastal Act and requires a coastal development permit from the Commission or, in appropriate circumstances, from a local government implementing a fully certified lcp or the Commission on appeal. Because the imposition or substantial increase of a user fee for beach access parking, pier or boat launching ramp use, or for beach or shoreline park use would, in our opinion, result in a change in access to state waters, a coastal development permit is required. For purposes of this memo and for purposes of guidance, "substantial increase" means any fee increase of 25% or more in any given year or 50% or more on a cumulative basis over any three consecutive year period. Similarly, any action changing the hours of operation or availability for public use of, for example, any beach, shoreline park, parking facility, pier or boat launching ramp or facility requires a coastal development permit. A coastal development permit is required even if little or no physical construction is necessary to implement the action calling for a fee, a fee increase or a change in hours of operation.

As mentioned before, whether the coastal development permit must be obtained from the Commission or the appropriate local government depends on whether the local government has in place a fully certified lcp and has been delegated the coastal development permit issuing authority pursuant to the Coastal Act. In some cases, even where a fully certified lcp is in place, the Commission may have retained coastal development permitting authority because the affected lands are subject to the public trust or otherwise fall into a category of retained permit jurisdiction. If there is a question about whether the Commission or the local government is responsible for processing and acting on a coastal development permit, please contact the appropriate Coastal Commission office. Even where a local government has coastal development permit issuing responsibility, it is important to know that the action is probably appealable to the Coastal Commission and, because the issue involves public access and is of vital concern to the Commission, may well be appealed.

The fact a coastal development permit is required for the type of actions described above does not mean a permit application will necessarily be denied. Rather, each case must be evaluated in light of the particular applicable facts and circumstances. The Coastal Commission has already reviewed and acted on several proposals to change the hours of operation of public beaches, parking facilities, accessways, boat launching ramps, and a pier. These proposals involved the cities of San Diego, Carlsbad and Long

Planning Directors of Coastal Cities  
and Counties, and Other Interested  
Persons

October 29, 1993

Page 3

Beach. It is our intent to prepare a memo on this subject that will provide guidance to local government, other public agencies and members of the public relative to the type of factors the Commission has considered and examples of concerns that should be taken into account when these types of proposals are being formulated. The Commission is extremely sensitive to the budgetary and public safety concerns of local governments. At the same time, the Commission must carefully balance those concerns against broader public interests relative to public use of and access to public coastal resources such as beaches and state waters. It is for this reason, among others, that the Commission has not approved any request to close public beaches to the public on a continuing basis. On the other hand, the Commission has approved the closure of public beach parking lots at certain hours during the night. Finally, it should be remembered that because these types of actions requiring coastal development permits involve questions of public access, the legal standard of review is the Chapter 3 policies of the Coastal Act relating to public access.

Relative to public safety concerns, we want to emphasize that nothing in what we have said here interferes with or prevents a law enforcement agency from taking any and all actions it deems appropriate to address a particular public safety emergency, including any action to close to all public use a beach, parking facility or park. Similarly and pursuant to the Coastal Act, if a local government takes an action to close a public facility pursuant to a legally approved declaration of "public nuisance", no coastal development permit is required. We should caution however, Commission staff will look carefully at any action using the "public nuisance" exception to the coastal development permit requirement when the result of such action is to close to public use for any extended period of time a public beach, parking facility or any other facility providing public access to the beach or state waters.

Because there has been some ambiguity and uncertainty about the coastal permit requirements for the types of actions covered by this memo, it is not our intent to pursue any coastal act violation actions at this time. However, we ask every entity that has taken any action described here as requiring a coastal development permit and for which such a permit has not been approved to contact our office to determine the appropriate steps to complete and process a coastal permit application. We realize that in some cases the action requiring a coastal permit may have been taken some time ago. Notwithstanding the passage of time, a coastal permit will still be required and must be secured. We also understand there have been many instances where local jurisdictions have increased parking fees. We recognize that not every increase in parking fees requires a coastal permit. Accordingly, please contact our office for clarification on how we intend to proceed in these cases.

We would appreciate your passing this memo on to anyone you think may have an interest in the matter. We are particularly anxious that this memo get to the responsible people in your jurisdiction who manage your parking and recreation programs. Thank you for your cooperation and attention to this matter.
