Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
diana waters

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Nancy Holleman  
Santa Ana, CA 92705

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Andrew Wilson

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff. Fragile wildlife needs our protection. Once it's gone, it's gone. Stop development and protect endangered wildlife!

Sincerely,  
Jillian Saxty

Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Plovers are threatened and cannot create habitat elsewhere. Human recreation can take many forms and should not be allowed where it so negatively impacts unique habitats that have already been diminished by development and recreational use. The Coastal Commission was created to protect our coast. Your stated mission is "The Commission is committed to protecting and enhancing California's coast and ocean for present and future generations." Destroying habitat is in direct conflict with this mission.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Dear California Coastal Commission,

I have been a docent in the Snowy Plovers program at Pt. Reyes, CA. We spend weekends educating visitors to beaches in the area about the nesting birds- keeping visitors away from protected areas, instructing them to keep their dogs on leash, and giving them vital information about the precarious position of these beautiful, fluffy, threatened birds. It is difficult enough for hatchlings to survive one month to fledging because of local predators, such as ravens, foxes, etc. Off- road vehicles would decimate the entire population of these birds.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

Dear California Coastal Commission,

We MUST reject the Public Works Plan for OUR Oceano Dunes State Park. This plan does not protect coastal resources or endangered species or OUR ecosystems, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. However, this plan does exactly the opposite!! What the hell? Who pays you?

The illegal plan ignorantly and flagrantly prioritizes off-road destruction over protection of wildlife and ecosystems and does not address the resource-protection issues your agency raised. It UTTERLY FAILS to evaluate the 5-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff. Do the greedy corporofascists promoting this think the public is not paying attention? Do your job; we ARE WATCHING!

The plan simply avoids solutions to specific issues you requested be addressed such as Arroyo Grande Creek crossing, endangered shorebird nesting sites, nighttime off-road destruction, and vehicle and camping use limits. Instead, the illegal plan offers inadequate interim measures and only promises future studies and plans with uncertain outcomes. INADEQUATE!

The Public Works illegal/inadequate/corporofascist-lead Plan seeks to open even more sensitive dune habitat to off-road vehicle destruction and even slash protected breeding areas for threatened snowy plovers and least terns by one-third! Obviously, these fools are led only via corporofascist interests and the stupid of our public. It also proposes a massive 120-acre destruction area near Oso Flaco Lake to include yet more off-roading destruction, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. The Public Works wet dream seeks to pander to the most ignorant and depraved of our population. That corporofascist wet dream leaves almost no space for wildlife and ecosystems. This destruction also seeks to destroy one of the best birdwatching spots in San Luis Obispo County. What better way to hide what they are really doing?

Soundly and immediately reject this plan and impose your own permit conditions and a phase-out of off-road destruction as recommended by your staff. This is not the old destroy-all political focus. Your job is to protect our state. Do it.

Sincerely,  
Janet Fiore  
San Francisco, CA 94122

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Monica McKeown-Gallicho

Dear California Coastal Commission,

As you're aware, your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. Please do this by changing the plan accordingly. This is important to protect wildlife (which has no voice) habitat, among other reasons.

The plan, as currently written, prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Tyler Johnson  
Anaheim, CA 92805

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Hilary Emberton  
Grass Valley, CA 95945

Dear California Coastal Commission,

For years people with their gas toys kill plovers, each other and keep everyone who wants to actually enjoy nature off the beaches. It's a travesty!!! Please stand up to the corruption at State Parks and protect our coast.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Richard Spicer

**Categories:** Public Comment

Dear California Coastal Commission,

My wife and I enjoy Oceano Dunes as local central also Californians. We use the area to enjoy quiet ocean tranquility, bird watch and look at the myriad of rare wild flowers only found there.

Oceano dunes is unique in the biodiversity that it holds and is the last place of its kind. There are plants like the Surf Thistle and Beach Spectacle pod that are a resource to be treasured, not destroyed by four wheeling.

Off road vehicle use is not compatible with maintaining the beauty and true unique value this land holds for California. Although it may not feel like it from the point of view of the planners making this decision, I see developing it for off-road use akin to clear cutting an ancient redwood forest due to the rarity of the species there and spiritual rejuvenation one feels when visiting it. Converting this to an off road usage area will destroy that. Please do not do this, think of future people that want to use this land, hikers, bird watchers, campers, and simply people that want to get away from town for a bit. We all know how valuable that is since COVID started.

Sincerely,  
William Hoyer  
Santa Paula, CA 93060

Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff. I am sick to death of those who should be protecting the land, instead sanctioning abuse such as this. Wildlife should always take precedence on "protected" land which is already minuscule, fragmented, and increasingly degraded. The despicable pattern seems to be to impoverish habitat, and then to demonize/blame native predators when populations subsequently suffer. Enough already. It's becoming increasingly difficult to find healthy ecosystems to quietly visit and get away from the madness that too many people bring. I feel like too many agencies that are supposed to be protecting these places are threatening them. My medicine is being polluted. My means of coping in a human dominated world dead-set on destruction. These places were not meant to be playgrounds for the masses. Respect needs to be demanded. We're losing too much. There are species endangered with EXTINCTION here. Entire species. Please take their needs seriously. People do not need to drive vehicles all over the damn place. It is not a matter of life and death for them, it's a hobby, but it is life and death for the beings who depend on habitat the human species keeps shrinking, token protecting, and then whittling away at further. :(

Sincerely,  
Erin Barca

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Robert Underwood  
Concord, CA 94519

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
John Kaplan

But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Deborah Tibbetts

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. **Categories:** Public Comment

Off roading in the Oceano Dunes has been an annual family event for me and my friends for the last 20 years. It has been a social event for the adults and kids, fun for everyone and attended with the utmost respect for the park. In fact I see similar behavior from most park attendees, a family love for the dunes and of the outdoors.

National and state parks were created for specific uses. Some were created as wild life reserves to be untouched, some are created for hiking, some for hiking and camping. Portions of the Oceano Dunes are designated for Off-Highway Vehicle (OHV) use. Not many of us can travel the world to participate in the Dakar rallies or the Baja 1000. The Oceano Dunes have been our playground, off roading for the regular citizens. Banning OHV use, bans our hobby. It is not a hobby understood by all. The diversity of personal interests should not be limited by those who don't understand it or don't participate. If there are problems, add some rules and let them be known. If there is some behavior that has been disagreeable, share that with the participants so that they can change and self regulate.

A spherical panoramic photo of all of us on the dunes:

<http://www.panoramictravels.com/Locations/UnitedStates/CA-PismoDunes-A6-2013/PismoBeachDunes-panoA6-2013-panoramic.html>

Still photos:

[http://www.gregippolito.com/Photos/2019/Pismo/A-IMG\\_2046\\_Sm.jpg.0.html](http://www.gregippolito.com/Photos/2019/Pismo/A-IMG_2046_Sm.jpg.0.html)

<http://www.gregippolito.com/Photos/2004/Pismo/KidsInTruck-1.jpg>

Please continue to keep the park open so that we may all enjoy it.

Dear California Coastal Commission,

Please reject once and for all the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act. I'm tired of continually fighting for humans not to drive the snowy plovers extinct up and down the coast. Stop it.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Nadya Schmeder

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Debra Lichstein  
Agoura Hills, CA 91301

Dear California Coastal Commission,

PLEASE reject the Public Works Plan for Oceano Dunes State Park. This act does not comply with the Coastal Act. In addition, it seriously endangers coastal resources and endangered species.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. What happened? This plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Joan Kaplan

**Categories:** Public Comment

I am sure you are getting many letters opposing your PWP to develop the area around Oso Flaco Lake and the Oceano Dunes but let me state that I, too, am in opposition to your disastrous plan. Long before I was a resident of SLO County, I visited this area and fell in love with its wild, natural beauty. It is home to so many vulnerable species of flora and fauna. We must do everything we can to PROTECT this area, NOT develop it.

My support goes to the California Coastal Commission's plan to reject the PWP and phase out OHV from the Ocean Dunes.

I pray that decency, common sense and love for our home prevails.

Carole Hisasue  
Los Osos, CA

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Lisa Stanziano

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Judith Sloane  
Valley Center, CA 92082

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Deborah Cosentino  
Sacramento, CA 95864

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

I see this happening in my own backyard in the eastern Sierra. More OHV's means more damage to the desert habitats. And although some of the agencies receive green sticker money for restoration the damage keeps happening Don't encourage OHV use in the fragile coastal habitat!

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Tamar Diana Wilson

It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Genevieve Soares

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Dear California Coastal Commission,

No, no, nonononono. I cut my activist eye teeth on a Sierra Club committee about saving the Snowy Plover and other species. That was in 1985. To put forward this proposal now is only deaf, blind and dumb to the crisis confronted by nature at the hands of homo sapiens.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Sonia King

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park.

This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

OFF ROAD VEHICLES SHOULD HAVE SPECIAL THEME PARKS BUILT FOR THEM TO PROTECT OTHER HUMANS AND ANIMALS FROM THEIR NOISE AND POLLUTION.

The should NEVER be allowed on anything but properties dedicated to their use and should NEVER be operated in the vicinity of homes, and I mean 2500 feet or more, other than those of their owners.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to non-motorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised.

It UTERLY fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Karen Minkowski

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Lynne Prefontaine

**Categories:** Public Comment

Dear California Coastal Commission,

As a wildlife biologist, I have seen the effects of habitat loss - and specifically of OHV damage - on sensitive species. But it doesn't require a scientific degree or years of experience to recognize the problem with vehicles driving through nesting areas.

The Public Works Plan for Oceano Dunes State Park fails to adequately protect snowy plovers, and should be rejected.

Snowy plovers need safe nesting habitat to survive. Some people may want to drive OHVs around on the beach and dunes, but they don't NEED to. The right choice is clear and unambiguous.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. This plan instead prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan does not address solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
nico mcafee

I FULLY support the report CCC staff have done recommending the end of OHV use at Oceano Dunes. My only disagreement is with the 5 year phaseout as I would love to see this happen immediately. Another 5 years just means more damage and more restoration required. Thank you so much for finally acknowledging that this activity is not compatible with taking care of this priceless habitat. The PRIMARY management goal should be protection of biodiversity and habitat restoration, with human use fit within those goals.

Dear California Coastal Commission,

This is a travesty! Only people who don't respect life could come up with a plan like this. Have we learned nothing from the pandemic about what really matters?!

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Jeanne Kuntz  
Los Angeles, CA 90066

Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Kenneth Nahigian  
Sacramento, CA 95827

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. There are plenty of places for OHVs in the state. OHVs are so very destructive to our habitat and wildlife. Once destroyed, it never can return to how it was. Mitigation efforts are rarely effective in returning the land to the quality of habitat it was before the damage. I value wildlife over this form of recreation any day. Please protect our public lands for future generations. Thank you.

Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Brian Florian

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

**Categories:** Public Comment

Dear California Coastal Commission,

Please reject the California State Parks Public Works plan to expand off-road vehicle access at Oceano Dunes State Park. Protection of the park's wildlife and natural resources should be given top priority! This plan would favor the interests of a small group of recreational users over the interest of the majority of other park users. State parks are not created to serve special interest groups at the expense of the majority of other users and the public in general. This plan does nothing to protect the park's wildlife and natural resources and thus does not comply with the California Coastal Act. Off-road vehicle use at this park is very destructive to its wildlife and natural habitat. It should be phased out as quickly as possible! There are plenty of other much less environmentally sensitive areas where off road vehicle use is much more appropriate and less destructive. Please reject this plan and impose your own permit conditions which should include a phase out of off-road vehicles and be in compliance with the California Coastal Protection Act.

Sincerely,  
Susan Maurino

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff. We must protect these special fellow creatures.

Sincerely,  
JANET CLINGER  
Grass Valley, CA 95945

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

I know snowy plovers from the San Francisco Bay Area. Every one of those few are respected up here. I'm sure the same can be done in SLB county.

Sincerely,  
Richard Kaufmann

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park.

Wildlife can no longer support new pressure from off road recreation - motorized or not.

Beaches, especially those that are critical wildlife habitat should not be used for vehicular traffic or recreation on wheels.

Endangered shorebirds and their nests are permanently harmed by night and day off-road riding, and vehicle and camping use.

There should be a reduction in use of sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers. This would include not building the nearby 120-acre development near Oso Flaco Lake. Why harm one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

**Cc:** OceanoDunes.PWP.EIR@parks.ca.gov  
**Subject:** Support Staff Recommendations for Oceano Dunes Coastal Development Permit 4-82-300 Review

**Categories:** Public Comment

**I support Coastal Commission Staff's recommendations for the Oceano Dune Coastal Development Permit 4-82-300.** California State Parks and Recreation has not put forth a serious attempt to address the Commission's past guidance and is proposing new impacts to the Coastal Zone.

I particularly do not support either of the Oso Flaco Lake Campground and Public Access Project concepts. Oso Flaco Lake is not a good location for a campground and ORV access to the dunes and this was realized years ago when the prior access was eliminated.

Part of the big attraction for Oso Flaco Lake is its beauty and quiet nature. Adding a campground and dune access will greatly increase traffic and noise levels. The proposed work plan would destroy the area's attraction with traffic and noise for those not using ORVs and greatly affect nature viewing. It should be noted that Oso Flaco Lake is the #1 "hotspot" location in San Luis Obispo County for Cornell's eBird project, in both bird species observed and checklists submitted. Bird watching accounts for a part of the daily visits by tourists seeking the quite nature of this location. Together, there is already significant amount of tourism at Oso Flaco Lake. The Pismo State Beach and Pismo Dunes SVRA General Development Plan (1975) noted that "*The conflict with this secondary access is that it bisects the Oso Flaco natural area, and the sight and sound of vehicles in this area will not be compatible with the adjacent passive recreational uses.*" This is still true today. Off-road vehicle noise will only diminish the current visitor experience and the location's value as a wildlife refuge.

As State Parks knows, there are both Federal and State listed species and California Species of Special Concern found around the Oso Flaco Lake area. Adverse effects to these species will be ongoing and cannot be mitigated. These impacts will cease when off-road vehicles no longer destroy their habitats.

The heavy amount of agricultural traffic makes Oso Flaco Road a poor location for a campground and dune access. Oso Flaco Road is already dangerous and increasing the average daily trips will only make the situation worse.

Another reason the Oso Flaco Road campground and access should be abandoned is the adverse effect it will have on agricultural land. The California Coastal Commission has stated that "The Coastal Act includes provisions to protect and enhance coastal resources and land uses, including agriculture. Strong protection of agricultural lands and the agricultural economy in the coastal zone is mandated by the Coastal Act. These protections include requiring that prime agricultural lands be maintained in agricultural production, restricting the conversion of agricultural lands to other land uses, conserving agricultural soils, and promoting long-term agricultural productivity."

If anything, this proposal does not meet the State plan to reduce green-house gas production in California. Oso Flaco area improvements will lead to increased green-house gas production.

The Work Plan also calls for relocating the maintenance access road to the beach to bypass the Oceano Campground. It is not clear what equipment or how much equipment is driven through the campground, what is considered “early morning”, or why this is no longer acceptable. Two alternatives that will not adversely affect riparian wetland and dune habitats (both environmentally sensitive habitats (ESHA) in the Coastal Zone) are (1) the existing route and (2) Hwy 1 and then Pier or Grand Avenue to beach (~1-mile distance). Using those options at different times of day would avoid impacting environmentally sensitive habitats.

The Commission must support Staff’s recommendations.

Sincerely,

Tom Edell  
46 8<sup>th</sup> Street  
Cayucos, San Luis Obispo County, California

It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Rosewind Veilove

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. **Categories:** Public Comment

Dear Coastal Commission,

I am encouraged to hear of your report regarding the Oceano Dunes and your plan to phase out off road vehicles within 5 years. I'm glad to hear of the plan and hope you will hold State Parks to it.

Please don't approve the State Parks' Draft PWP/EIR -- which proposes awful and incompatible development of the Oso Flaco Lake Natural Area.

Their plan is completely unacceptable. Please save our coastline and save the endangered birds and animals who live there and protect this valuable and unique area.

thank you,  
Laurel Sherrie

Dear California Coastal Commission,

I live in San Luis Obispo county and have seen first hand the damage done by off road vehicle to a fragile environment and to its wildlife. There are also numerous (and some fatal) accidents with ATV drivers racing and driving unsafely.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. Dear California Coastal Commission,

Come on California Coastal Commission - We need to protect our coastline and its environment, NOT open it up further to destructive, gas-powered, polluting toys. This is the opposite of what we need to be doing to protect our California Coastline and our environment and the wildlife that is being threatened.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. **Categories:** Public Comment

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Gwen Weil

**Sent:** Friday, February 19, 2021 10:41 AM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please permanently reopen Oceano Dunes to OHV recreation  
**Categories:** Public Comment, Oppose Staff Recommendation

Dear California Coastal Commission,

Please accept the Public Works Plan for Oceano Dunes State Park. This plan provides more than adequate protection of coastal resources and endangered species, and it maintains the responsibility to manage public lands for all members of the public.

Your commission originally directed State Parks to evaluate phasing out off-highway vehicle recreation and transitioning the multi-user park to nonmotorized recreation. Thankfully, this plan still offers the public at least some very limited opportunity for OHV recreation while still strongly emphasizing mass closure of public lands in the name of wildlife and natural resources.

Since well under 10% of the original OHV recreation area remains open today, it is clear that your commission has gone above and beyond to provide undisturbed habitat for the Snowy Plover and other species. With all of the benefits that OHV recreation provides to local businesses and the general wellbeing of everyone who gets to experience OHV and multiple-use recreation at Oceano Dunes State Park, it is with great hope that you will support reopening of some of the historic OHV accessible areas while continuing to manage habitat for endangered species and the OHV-intolerant community.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
David Chisholm

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Dear California Coastal Commission,

My family used to take vacations near Oso Flaco Lake when I was a little girl. I remember how beautiful it was, how good it felt just to be there. The natural world is shrinking due to human disdain. Shouldn't the natural functions of the coast be protected for future generations? Shouldn't Snowy Plovers be a part of that?

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. Dear California Coastal Commission,

I am a fourth generation Californian who has been displaced to NM. I still go 'home' every chance I get. Birding in CA, visiting my state's beautiful parks and recreation areas is one of the timeless treats I hunger for when not there. Yes, people need opportunities to go four-wheeling, but there is also a greater need to protect our wildlife for future generations to enjoy.

We don't need to open up EVERY place for human use and possible destruction. Birds and other wildlife are essential for us - they are the bell wethers of the health of ecosystems. We too are attached to these systems. Do you know which extinction will make the whole collapse? Which death will affect the system irreparably? If you don't know, you shouldn't damage things!

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Howard Higson

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. Dear California Coastal Commission,

There other places for off-road vehicles to tear up the land. Stop killing the the few species that only use this land to survive. It is not a survival question for off-roaders to tear up these areas to survive. Reject the Public Works Plan for Oceano Dunes State Park and provide the grounds for a species other than human to survive.

Dear California Coastal Commission,

It is hard to believe that the Coastal Commission would even consider allowing vehicles in this sand area. You are to protect our environment, not ruin it. Snowy Plovers must be protected. Off road vehicles care for nothing but their own pleasure.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Zachary Todd

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

It is a well known fact that the off roading community does not respect boundaries of their off roading space! Snowy plovers know it and their space is devastatingly being plundered. Please do not expand the off roading area at Oceans Dunes State Park or permit the Oso Flaco development!

Consider the guidelines already in place!

Sincerely,  
Gary E. Ranz  
Bellingham, WA 98229

Please do not ruin the dunes, we need to preserve wildlife. California has lost 20% of its native species in the last 20 years. I am a Cal Poly student and there is so much habitat that needs to be studied in the oceano area.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Landon Miller

Dear California Coastal Commission,

Our California family of four adults and three smart teens joins thousands of other Californians in urging you to immediately reject the Public Works Plan for Oceano Dunes State Park.

This plan comes nowhere near protecting coastal resources or endangered species, In addition, the plan it does not comply with the Coastal Act.

Our family is keenly aware that your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. However, we are also aware that this plan prioritizes off-road recreation over protection of wildlife and does not address the resource-protection issues your agency raised!

In fact, it utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers totally inadequate and unacceptable interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Again, our family, along with thousands of other Californians, is counting on you to reject this disastrous plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your own staff.

Thank you for considering our concerns and comments.

Sincerely,  
Rterra Williams

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Henning Bauer

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Bonnie DeClark

**Categories:** Public Comment

Dear California Coastal Commission,

While the Dunes were closed to vehicles because of Covid 19 restrictions many people, with a huge sigh of relief, started walking on the "cars beach." It was quite wonderful to be able to safely and quietly explore that section of coastline. The Snowy Plovers expanded their nesting sites. That is what we want threatened species to be able to do.

Oso Flaco Lake is another beautiful place that hosts much wildlife. The proposed plan that abuts the Lake would bring noise and pollution which is detrimental to wildlife. In fact. it is detrimental to human life. We need more natural, protected places to absorb the peace and serenity these places afford us.

Covid 19 has shown us the dangers of bringing "civilizaton" closer and closer to extinguishing nature. The health of the planet is at stake, decision by decision. There is not enough of nature left to even take another nibble away.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
S. Lee Taiz

It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Dear California Coastal Commission,

You must reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Lee Ann Rice  
Oceano, CA 93445

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

I am 13 years old, and I like to off-road. However, even I know that snowy plovers are more important. I care about these animals, not just because they are cute, and not just because I also love to birdwatch, but because they are animals and it would be unhumanely right to go destroy them. I cannot do anything about this issue, but you can and I am counting on you to stop the Oceano Dunes' reopening until the coastal permit is in place.

Sincerely,  
Anna Villavicencio

It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Leslie Dodson

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. Dear California Coastal Commission,

I am writing to urge you in the strongest possible terms to reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But contrary to that directive, this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please, please reject this plan outright and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff. Oceano Dunes belongs to all Californians, not just off-roaders and investors in the ill-conceived development.

Sincerely,  
Sarah Lifton

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

State Parks' mission is to protect and conserve our natural flora and fauna for future generations. Their current proposed plans will are not compatible with this mandate and would totally degrade the area. NO OHV's, no changes to Oso Flaco Lake preserve!

thank you

Sincerely,  
Vicki Bookless  
San Luis Obispo, CA 93405

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Ivan Rhudick

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Dear California Coastal Commission,

For several years, my son, a wildlife biologist, worked with State Parks to protect snowy plover populations at Oceano Dunes. He found his job extremely difficult, primarily because of the off-road vehicles allowed to drive on the beach. Imagine trying to keep shorebirds safe from the crush of tires. Think of the stress that dogs and campers place on breeding pairs, as they look for safe places in the sand to create their nests.

PLEASE REJECT the Public Works Plan for Oceano Dunes State Park. It makes no sense in this situation. There should be far more protections for these birds, not less!! This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Selena Hudson

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Dear California Coastal Commission,

We have snowy plovers out here in Pt. Reyes. All of us so enjoy seeing them, and stay well back from their nesting space. It would be a shame to loose them anywhere in our state. Are off-road vehicles worth it. I know those folks need somewhere to go, but let's put our brains behind this and come up with a better solution.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. Dear California Coastal Commission,

PLEASE reject the Public Works Plan for Oceano Dunes State Park !!

THIS PLAN PRIORITIZES OFF-ROAD RECREATION OVER PROTECTION OF WILDLIFE and doesn't address the resource-protection issues your agency raised. IT UTTERLY FAILS to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The Public Works Plan would OPEN more sensitive dune habitat to off-road vehicles and SLASH protected breeding areas !!

IT ALSO PROPOSES A MASSIVE 120-ACRE DEVELOPEMENT NEAR OSO FLACO LAKE, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

PLEASE REJECT THIS PLAN and impose your own permit conditions and a phase-out of off-roading, AS RECOMMENDED BY YOUR STAFF.

But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Lisa Warden

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Esther Mooncrest

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

"Off Road Vehicles are an absolute menace and seems to be used mostly for recreation. The drivers should get their fat selves on foot and walk."

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act. I've visited this area many times, and am puzzled at the proposal to actually expand off-roading instead of ensuring protected areas for the snowy plovers. The off-roading allowed now already has numerous detrimental effects on the area--increasing it will only make it worse.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
cheryl debejare

Dear California Coastal Commission,

I am a lifelong resident of the California coast and a Native Son of California. I am an outdoorsman, once a fisherman and off-road enthusiast. However, I have long wondered why vehicles have been allowed on our beaches. It makes little sense except for the selfish minority who would like to drive on that sand. It is simply ruinous to that environment. Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act. Please help eliminate off-road vehicles from our beaches.

Sincerely,

Thank you for your quick response. I will try to attend the virtual meeting, but I have to tell you, I'm scared of these people (see comment below taken from New Times). So I'm begging you to be strong for the rest of us. My BP can't take it.

I have been enjoying/ridding the dunes for over 25 years now. I used to drive up from LA (Go Dodgers) just to ride the dunes, since high school. For the past 15 years I frequent the dunes 1-2 times a month, from San Jose. My kids have grown up ridding the dunes and is still our number one place to go (besides the Hawaiian Islands)! Over the years we have spent 10's of thousands of dollars in the local area from eating almost every restaurant Pismo has to offer, retail shopping, dirt bike parts, gas and I even purchased a toy hauler down here. I am now looking to purchase a second home here to enjoy the area more often. In short, the dunes have brought people like me to the area and have made the local economy what it is today (before Covid of course). They need to open the dunes for camping and ridding ASAP, social distancing is a given and family camping is a very low risk (if any) to the public and in comparison to other issues that have arose due to staying at home (depression, suicide, drug use, etc.) All the locals and Environmentalists who object to reopening the dunes for OHV use need to get a clue/life and stop all the bureaucratic BS and start thanking people like me for their jobs and home value increases over the years. I will soon be a local and I will not only continue help this area thrive but I will also continue to advocate for OHV use and camping within the dunes. life is to short wasting time and effort taking away our freedoms for a little dust and a F\*\*\*\* Snowy Plover bird who has millions of miles to migrate on. My two cents! "Ride or Die" people!

Thank you for your thoughts. Just to be clear, Commission staff is also not in support of State Parks' Oso Flaco Lake proposal. Also, please note that we have a hearing regarding this and other Oceano Dunes matters scheduled for March 18, 2021, and we have dedicated webpage where you can find our staff report and recommendation for that hearing, as well as instructions for how to comment/participate, at <http://www.coastal.ca.gov/oceano-dunes/>. That webpage also includes resources to help understand the context surrounding the March 18, 2021 hearing, including State Parks proposed plans and their supporting documents, as well as some materials that have been translated into Spanish. Hope that helps.

**Subject:** Oso Flaco Lake and ODSVRA

You're going to think I'm a real idiot, but I am highly educated and have managed to reach a somewhat impressive advanced age.

Still, I have to admit that I always assumed State Parks, the Coastal Commission, and the various and sundry wildlife groups were all on the same page. That they all worked with the best interests of the environment in mind.

I apologize for being so gullible. It turns out that if there is a buck to be made, people will jump on it. Screw the frogs, plovers, plants, trees, things with lungs, etc.!

The current plan to develop the Oso Flaco Lake area for yet even more OHV activity is so offensive and counter to any rational thinking, I literally choked on my kombucha when I read about it.

In fact, I'm speechless. Fortunately, I'm equipped with email, writing ability, and time on my hands. Thank you, Covid.

Speaking of Covid, didn't anyone notice how quiet and undisturbed the beaches were during the OHV ban? There were still plenty of people there, just no vehicular traffic. Later, these same people were lined up, ordering food-to-go at our local restaurants. They must've stopped by Vons, the gas station, and Walmart on their way out, because those were crawling with people too.

And even though I've lived here for over ten years, I made my first visit to both Lopez and Oso Flaco Lakes due to my schedule "opening up" (a.k.a. laid off). I'd like to make a habit of such adventures in the future.

But if the ODSVRA has their way--because apparently off-roaders' money is where the big bucks are--I will have to put up with the noise, dust, trash, multiple flag-waving, and frequent boozing of the ATV crowd.

I'd bring up the endangered species and flora that are at risk, but somehow I don't think those are a top priority for the people in charge--the very ones I've supported all these years with my taxes, donations, and dogged but futile voting.

Let's make 2021 a year for positive change. If you'll promise to stop this insane public works plan, I promise to stop being so gullible.

Thanks.

M. D. Smith

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Gerri Finkelstein-Lurya

Dear California Coastal Commission,

RECREATING IS ALL WELL AND GOOD, BUT THESE LITTLE BIRDS HAVE A RIGHT TO THEIR NATIVE TERRITORY. A HUMAN CAN TAKE HER/HIS SELF AND WHATEVER TOYS S/HE HAS AND GO ANYWHERE. S/HE DOESN'T HAVE TO BE IN THIS PARTICULAR SENSITIVE SPOT.

THIS IS A STATE PARK, WHICH MEANS IT IS SPECIAL TERRITORY FOR NATURAL FEATURES, FLORA, AND FAUNA. WE CITIZENS WANT OUR SPECIAL PLACES PROTECTED. RECREATORS CAN RECREATE IN AREAS WHERE THEY WON'T DAMAGE THOSE SPECIAL THINGS.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Rick Schulte

Dear California Coastal Commission,

Dear sirs,

Every civilized community has restrictions for its outlying nature reserves and the needs for nesting, feeding, and survival of our sweet neighboring birds and creatures. They are not merely sweet. They are necessary for our survival. If we let the wants and frivolities of man destroy and annihilate these beings, we will be next to not survive.

It is not just because we like to see them and hear birdsong in the morning and evening. It is because we all need each other for the survival of this planet.

If we carry on paving over every bit of earth and destroying natural habitat for our own whimsical recreation, it will eventually be cockroaches, not human beings, who will be the masters of the earth.

Laugh, if you like, for now, but consider, and try to pay attention to the needs of the creatures around us.....if it is not already too late.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Tim Covey  
Ventura, CA 93003

I know that you get hundreds of letters just like this each day and although each one is coming from a well placed heart the overwhelming reaponse has to be of some impact to you. How do you see letters like this and still overlook the amaing concern that people have for the environment and world that we have been left to guard. I work for a company, dealership that sells off-road vehicles and parts and accessories and for over 20 years have done my best to promote and sell to our adventurous customers but I am also aware of the tracks and locations that are available for people to take those vehicles and there families. Destroying more pristine land in the name of advancement isn't better, It will lead the the beauty that our busy, chaotic world creates. Please leave this land protected.

Sincerely,  
Nancy Garcia

But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Kenneth Stahl

**Categories:** Public Comment

Dear California Coastal Commission,

NO off-roading in this sensitive area!

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. THESE BIRDS HAVE BEEN STRUGGLING FOR MANY YEARS TO SURVIVE IN THE FACE OF HABITAT DESTRUCTION BY HUMANS. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

I strongly urge you to reject this plan. Impose your own permit conditions and a phase-out of off-roading, as recommended by your staff. Protect our natural resources. Prevent destruction by humans.

Sincerely,  
Sherry Kritzer  
Moss Beach, CA 94038

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Frank Leykamm

**Categories:** Public Comment

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Charles Alger

**From:** Darryl Deinhard [user@votervoice.net]  
**Sent:** Friday, February 19, 2021 9:49 AM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Public Comment, Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Darryl Deinhard

**Sent:** Friday, February 19, 2021 9:49 AM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please Stop Oceano Dunes' Reopening Until Coastal Permit Is In Place

**Categories:** Public Comment

Dear California Coastal Commission,

I am writing to you as an off road vehicle owner and nature lover. Oceano Dunes federally threatened Western Snowy Plover population and its nine other state and federally threatened and endangered plants and animals and numerous migratory birds and other need all the help they can get. I would never consider driving my buggy in an area where there were nesting animals. Unfortunately there are many people who do not feel the same and have no problem disturbing wildlife, destroying nests and outright killing animals with their vehicles. ORV access is not a "right" and should only be allowed where it is prudent to do so. Changes to existing regulations must be based on real science and not driven by short sighted special interest groups. We need more vehicle free areas to safeguard wildlife. Therefore I am requesting that you reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Our vulnerable shorebirds and turtles need protection and Americans expect our National Park Service to be more responsive to our threatened species than to off road vehicle owners. The birds and turtles that build their nests on beaches cannot nest anywhere else - they need safe and secure beach nest sites. Their only chance for survival is to keep buffers in effect and keep ORVs off the beaches. Without the buffers Piping Plover nests, eggs, and chicks will be destroyed by being run over, or will be driven away by the chronic disturbance. Sea turtle other beach-nesting wildlife are also crushed beneath these vehicles and driven off by the disturbance.

Where off road vehicles are allowed, it is very important to not extend the ORV routes or extend spring and fall closures on any area of the beaches that could affect sea turtles or birds. Animals move around and therefore it is imperative that the beaches be checked for bird and turtle nests, eggs and chicks before the beaches open in the morning. For the safety of the wildlife this needs to be done prior to ORV traffic being allowed on the beach. Night driving should be strictly prohibited as this causes significant disturbance to turtles trying to nest on the beach and will keep them from coming onto shore. Those that have come onshore risk being injured or killed.

Please consider my comments. I truly believe that the majority of Americans would prefer our National Seashores free of vehicle traffic and full of scenic beauty and wildlife. Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Paulette Schindele

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
David Morris  
Oakland, CA 94618

Dear California Coastal Commission,

I am a birder, and a friend of birders, who wants snowy plovers to have safe habitat for generations to come. Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Marcia Venegas-Garcia  
Carlsbad, CA 92010

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Dear California Coastal Commission,

During a time when evidence of environmental disaster has never been more undeniable, we must make forward thinking decisions about our few remaining wild lands, and their importance to our own health and that of the endangered species living alongside us.

During COVID, my wife and I have kept sane by visiting weekly the wild lands around us in our beautiful state. This included bird watching and hiking. During this time, it's become clear that even light use like hiking and camping causes permanent damage to sensitive lands. Off roading is extremely damaging. More land must be set aside for our wildlife to thrive.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Daniel Walter

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. Dear California Coastal Commission,

I can't believe that you are planning on going forward with this dangerous proposal! You need to plug the actual loopholes in the plan before it is instituted. Five years phase in could easily result in the extinction of these endangered species, i have seen these off roaders racing across the dunes and beach, actually laughing when they blow past these little birds. It is a game for them, I know that some do not do this but there is no way to determine who would drive carefully around the nest areas and the drivers who would aim at the nests. Especially, testosterone driven 30 year olds and older males. Re write the rules of transition and make sure the threatened species are really protected!!

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. Dear California Coastal Commission,

I am disappointed to read that California State Parks wants to expand off-vehicle use at Oceano Dunes State Park. Their proposed plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

The Commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. Unfortunately, this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. The plan fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan ignores solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Hons. Jim and Diana Prola

Dear California Coastal Commission,

State Parks must obey the law. It's time to exercise punitive legal measures against individuals that flaunt the will of the citizens. I'm local for 52 years and no longer am able to enjoy the beach at Pismo. Same with tens of thousands of others.

Oso Flaco is an environmental sensitive jewel. To cram visitor campers in there with their noise, litter and presence is BLASPHEMY. Generations of naturalists have visited there for sustenance and upkeep. Don't allow the despoiling this precious asset.

\*\*\*\*\*

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Angela Grattan  
Salinas, CA 93907

Dear California Coastal Commission,

These little birds have a right to live! They nest right in the sand and have no protection against off road vehicles. They are magnificent when they fly as a squadron. Off roading destroys Nature and it's a bad idea for all the beauty and wildlife that lives there. We should never sacrifice Natural places of beauty to those who have no problem running over nesting birds for the sake of their own good time. Please do the right thing and protect this place from human carelessness and harm. Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

The UN has called for ending the war on nature. Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

I urge you to reject this plan and instead require permit conditions and a phase-out of off-roading, as recommended by your staff.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Janice E. Farry-Menke  
Cambria, CA 93428

Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Dar Bertsch  
Santa Cruz, CA 95065

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Dear California Coastal Commission,

Snowy Plovers and Least Terns are beloved but threatened species. Why would you approve a plan by California State Parks that expands activities at Oceano Dunes – specifically off-roading – that are known to destroy their breeding areas and habitat when you directed the agency to phase it out?

Please reject this unmitigated disaster of a plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff. The birds deserve so much better.

But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Jan O'Brien

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. **Categories:** Public Comment

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Herbert Pike  
Concord, CA 94519

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Pam Slater Price

**To:** OceanoDunesReview@Coastal  
**Subject:** Stop Oceano Dunes' Reopening Until Coastal Permit Is In Place

**Categories:** Public Comment

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

How is it possible that State Parks are pushing for expanded motorized use, when your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation? This makes no sense. This plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff. Are we not supposed to be prioritizing our wildlife when it comes to such sensitive habitat?

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

I'm stunned at the irrational nature of this plan. Please reject it and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff. Let's make sure we are prioritizing our endangered wildlife and not a bunch of guys on motorized vehicles that have plentiful other, less sensitive places where they can tear up the landscape.

Sincerely,

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
CARL LUHRING  
Vista, CA 92081

Dear California Coastal Commission,

I've visited Oceano Dunes a couple of times and have been struck by the feeling of remoteness and quietness. As lovely as that is for humans, it is a matter of survival for native plants and animals.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Carol Patton  
Berkeley, CA 94708

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

I am saddened by your plan to expand off-roading. Can YOU create a bird? Once the snowy plovers are extinct there is no bringing them back. And for what? So someone can make money off a sport that already has places to go. So someone can cover the earth with lots of blacktop? Don't you see that the beauty of nature stays the beauty of nature if we don't spoil it for coming generations? How can you ever tell your grandchildren that you took from them the beautiful nature that God created? As if money is a good substitute?

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Dana Ewing

**To:** OceanoDunesReview@Coastal  
**Subject:** Do Not Reopen Oceano Dunes Without Coastal Permit  
  
**Categories:** Public Comment

Dear California Coastal Commission,

State Parks keeps sending me solicitations for donations, yet the agency has devised a work plan for Oceano Dunes that protects neither endangered Snowy Plovers nor nesting of Least Terns and does not comply with the Coastal Act.

As a former Mendocino County planning commissioner, I view these defects as grounds to reject State Parks' plan. State Parks would prioritize carbon-intensive and frivolous off-road driving over wildlife protection rather than the environmentally sound five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by CC staff. The proposed 120-acre development near Oso Flaco Lake would generate more off-roading, parking lots, offices, residences, and other infrastructure, further reducing vital coastal scrub habitat.

Please toss out this poorly conceived plan and impose the permit conditions and a phase-out of off-roading as CC staff wisely recommends.

Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Scott Mason  
Martinez, CA 94553

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Heide Hennen  
San Mateo, CA 94402

It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Charles Ray

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,

**Subject:** Stop Oceano Dunes' Reopening Until Coastal Permit Is In Place

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
A Graff

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Patrice Wallace

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Alison Lees-Taylor

**From:** Masaki Teramoto [Masa.Teramoto@suz.com]  
**Sent:** Friday, February 19, 2021 9:17 AM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Public Comment, Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Masaki Teramoto  
461 Pointe Dr  
Brea, CA 92821

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Pam Larkin  
Livermore, CA 94550

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Esther Zepeda

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Florence Mesker  
Los Angeles, CA 90035

But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
James Dawson  
Davis, CA 95618

It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Monica Smith

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. Dear California Coastal Commission,

I filmed snowy plovers at SF2, a salt pond at the edge of San Francisco Bay, and I know what a hard time they have nesting out in the open, prey to hawks and human disturbance. Please give them a break. They need it.

Reject the Public Works Plan for Oceano Dunes State Park, which doesn't adequately protect coastal resources or endangered species, and doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Richard Boyer

Dear California Coastal Commission,

Please REJECT the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Commission.

The plan AVOIDS AND BLATANTLY IGNORES your requests to address the Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits.

THE PLAN IS SO INADEQUATE AND BOWS TO THE ORV MINORITY. 85% these people do not live here nor care about anything but themselves!!!

I SAY NO. I WANT THIS TO STOP! STOP.

Protect breeding areas for threatened snowy plovers and terns DO NOT REDUCE THEIR AREA! STOP the massive 120-acre development near Oso Flaco Lake, STOP more off-roading, STOP hundreds of campsites, huge parking lots, STOP development of offices, residences, and other infrastructure.

SAVE THE ECOSYSTEM this plan would destroy.

THIS IS ONE OF THE BEST BIRD HABITATS IN SAN LUIS OBISPO COUNTY which enables fantastic birdwatching spots in San Luis Obispo County.

Please REJECT this plan and IMPOSE YOUR PERMIT CONDITIONS and PHASE OUT OFF-ROADING.

Sincerely,  
Jane Baker

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Dear California Coastal Commission,

Spending many hours and years monitoring the Least Tern sites at the SBNWS and Huntington Beach, I was shocked when learning that vehicles were allowed on the beach at Océano Dunes. They should be prohibited altogether. To slow this massive 6th extinction we are in, natural areas must be protected. Our California Beaches are important natural areas.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Adrienne Davis

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Rebecca Wang

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Dear California Coastal Commission,

What happened? I don't get it. You were directed to phase out off-roading last year for good reasons? How did this get ignored in your newly released plan?

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. **Subject:** Please, Please, Stop Oceano Dunes' Reopening Until Coastal Permit Is In Place  
**Categories:** Public Comment

Dear California Coastal Commission,

The Public Works Plan for Oceano Dunes State Park doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to non-motorized recreation. (Off-road recreation endangers wildlife and native fauna.) Your plan doesn't address the resource-protection issues your agency raised. It also doesn't evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed

The plan doesn't address specific issues you requested: Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Inadequate interim measures and promises of future studies could lead to destruction or spoiling of this place for future generations.

What makes this area special could be obliterated by this Public Works Plan. It would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. The plan, which proposes a massive 120-acre development near Oso Flaco Lake, would bring more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. If there isn't room for wildlife, this development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Virginia Sbragia

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Adela Valdez

I live in San Luis Obispo county and will be moving to Pismo Beach very soon. I enjoyed walking on the beach when it was closed to vehicles during the pandemic. I do not understand why ORVs need to be allowed to continue to degrade the dunes and the habitat for wildlife. It makes no sense that people's recreation should be allowed to harm anyone or anything else. What other type of recreation is allowed to do so, especially on such a large scale. Please do the right thing for the planet, for the wildlife and for human's lungs and health. Thank you.

Sincerely,  
Kathryn Tribbey

Being an Oceano resident, I have walked the Oceano Beach to see if the State Parks is following their guide lines for the Phase 1 opening, they are not. To mention a few: when the creek is flowing across the beach, they would stop traffic from crossing, they did not. Posted speed limit not being enforced. Children playing and families sitting in the sand, just south of Pier Avenue Entrance, and off roaders are recklessly driving in that same sand. I have not seen a Park Ranger, anywhere, in the last few weeks. It's clear that the Parks Department is unable or unwilling to control the vehicles. It's time to phase out the vehicles, before more people are killed. If just one person is killed or injured by an off roader, it's not worth it. We need your help to stop this madness.

Sincerely,

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

We live on the coast in California, and we walk on the beach frequently. One of our great joys is seeing the snowy plovers skittering over the sand. Are we so shortsighted, even with the effects of climate change already upon us, even with the fires and pollution affecting California, that we can't stop vehicles from running down the beach? Why not? This pointless activity gives pleasure to nobody but a very small group of people, and it puts the rest of us at risk.

I've seen kids get hurt when their ATVs threw them off, and I've almost been hit by a truck barreling down the beach where I was sitting. The driver blamed me for sitting on a public beach full of sunbathers.

Forbidding vehicles on beaches is such an easy way to protect not just the plovers but all of us. These state beaches belong to me, too. Keep the cars on the roads and the beaches safe for all of us.

Sincerely,  
Bear McGuinness  
Point Reyes Station, CA 94956

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Shawn Burn

Dear California Coastal Commission,

I am on my way to the Pacific Coast today and one of my favorite things to do is watch all the birds. Keep those off road vehicles off my beaches and away from animal habitats. They tear up any area they are allowed into and litter.. I pick up after them all the time. Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Lilli Colbasso

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. Dear California Coastal Commission,

I've lived in SLO county for 23+ years and my family has been in SLO county since 1929. What State Parks is planning as an "improvement" will be a TRAVESTY for Oceano Dunes and Oso Flaco Lake habitat, flora, and fauna.

PLEASE! Enforce the LAW. If you do not, what good is it to have laws?

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
James Talbot

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Mary Lu Murphy

Dear California Coastal Commission,

I implore upon you to protect threatened snowy plovers from the dangers of off road vehicle recreation! I and many others travel to SLO area to bird watch. More off road vehicles and campsites will only increase the dangers -- we must protect biodiversity!

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation.
