February 26, 2021

To: California Coastal Commission  
California Department of Parks and Recreation

Subj: Oceano Dunes CDP Review

These comments are submitted on behalf of the Oceano Economic Development Council (OEDC), an organizational outgrowth of work done over past two and a half years with Cal Poly faculty and students on a redevelopment initiative for Oceano. The initiative was initially undertaken under the aegis of the Oceano Beach Community Association (OBCA) with whom the OEDC remains associated. The OEDC is being formed to advance the initiative with business leaders and public officials in San Luis Obispo County.

**OEDC position**

The OEDC's position is that continued allowance of recreational vehicle activity on Oceano's beachfront would violate the Coastal Commission's stated environmental justice policy while also violating State law and the Local Coastal Plans.

Such activity would also conflict with the underlying aim and spirit of Opportunity Zone (OZ) legislation enacted for the express purpose of helping disadvantaged communities like Oceano, whose best, and possibly only, hope for socioeconomic recovery and growth rests with becoming the destination beach community its early town leaders aspired for it.

**OHV Impacts**

Next to public health and safety, the chief concern of beach communities like Oceano and Grover Beach is the impact off-highway vehicle (OHV) activity has on business volume and the local economy. Community beachfronts are their most valuable economic asset for generating revenue growth and creating jobs. This is especially the case for a distressed community like Oceano where OHV activity extends across the full length of its beachfront, effectively obstructing pedestrian use, visitor-serving business activity and prospects for economic growth.

In addition to OHV activity being economically obstructive to Oceano, it also deprives residents of the only expansive outdoor recreation area that Oceano families have to enjoy. During the March-September 2020 suspension of OHV activity, Oceano families swarmed to their beachfront for the first time possible in decades. For many, it was their only feasible outdoor recreation area and refuge. With the recent resumption of OHV activity, the beach no longer offers such an option.

### **Exploring What's Possible**

As a low-income community with a predominantly Latino population and a high jobless rate, Oceano was designated a disadvantaged community and Opportunity Zone by Governor Brown in April 2018. This designation sparked community interest in exploring with graduate students in Cal Poly's City and Regional Planning Department (CRP) what might be possible as an economic growth path.

In two successive "planning studios" in the 2018-19 academic year the Cal Poly graduate students helped residents map out alternative futures for Oceano. In the first of these, CRP students met with residents in Oceano for a series of four workshops, leading them progressively through a process that culminated in the preparation of a community plan update in March 2019.

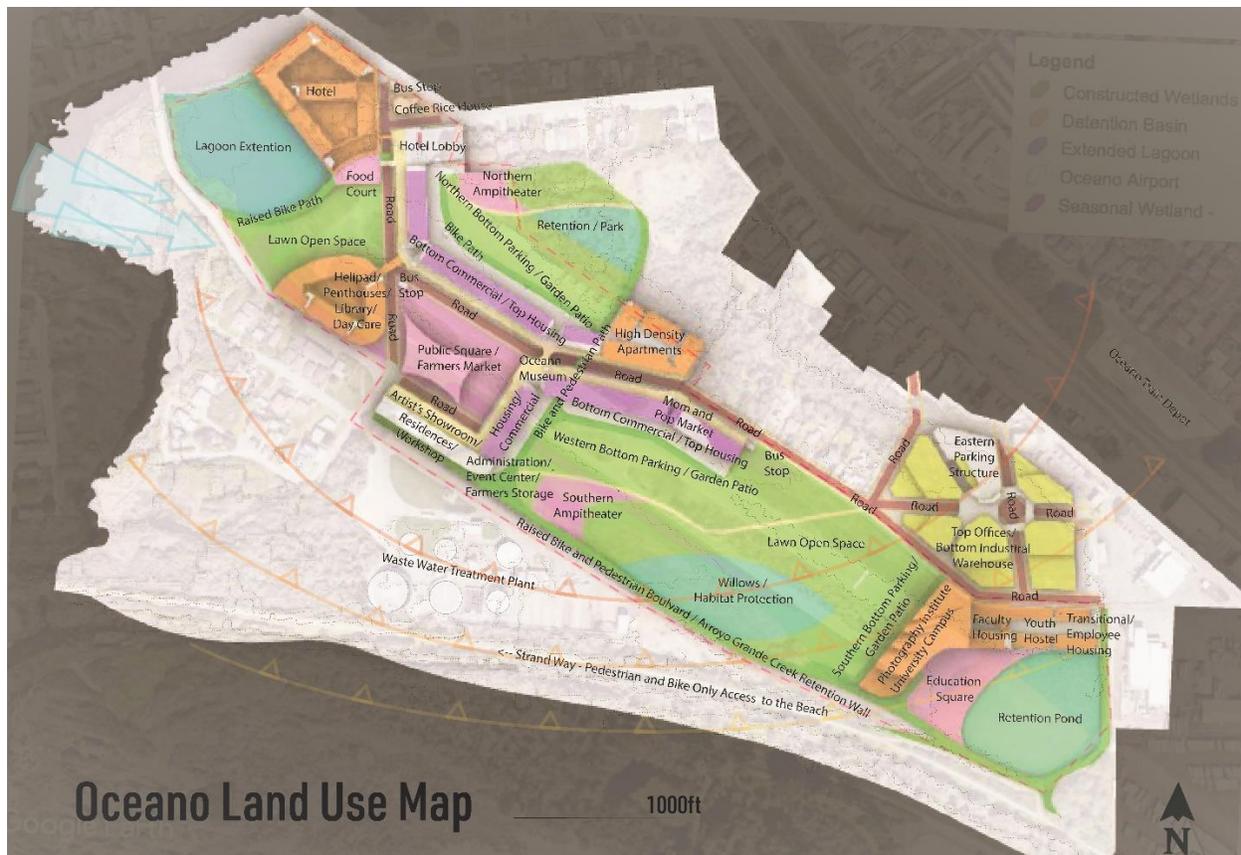

The second workshop picked up where the first left off, with a series of projects that included specific plans for the conceptual modeling of Pier Avenue as a visitor-serving business district, and of an Oceano Town Center in an adjoining area with a mix of commercial, residential, educational, and cultural/historical land uses.

### **The Town Center Concept**

The County's 2013 revitalization plan for Oceano and earlier plans emphasized the need to create a sense of place for the community, a need that town leaders recognized as far back as the early 1900s when they planned for a park surrounded by a residential neighborhood near the beachfront; something akin to a town center – a theme reprised in the 2018 community workshops and subsequently conceptualized in the Town Center specific plan.

The 65-acre Town Center plan was recently mapped with 30 acres of open space and trails, 12 types of residential housing, more than 350,000 square feet of commercial space, 200,000 square feet of hospitality and community facilities, 350,000 square feet of education and historic facilities, and 150,000 square feet of parking space.

The resultant land-use map and underlying construction details are now being used by Cal Poly Professor Pratish Patel and his finance students for the preparation of a pro forma financial analysis of projected business revenue, sales tax revenue, TOT revenue, property tax revenue, County leasing revenue, costs and capital requirements, operating expenses, asset valuation, financial returns where applicable, and jobs.

### Oceano Town Center Concept

When this is done, it will then be possible to design and implement a community-wide study with Oceano residents, basically asking them about the kind and mix of redevelopment they'd like to see in Oceano, while showing them what might be possible in terms of job creation, housing and improved living conditions. The sole purpose of the Town Center design and economic modeling being done is to promote creative thinking about a future vision for Oceano that reflects the stated goals of its residents.

The basic question being addressed is whether and to what extent the asset value of Oceano's beachfront and the resultant socioeconomic returns on this asset (to Oceano residents, businesses, and the County) are greater with or without recreational vehicle activity on Oceano's beachfront.

We already know that communities with vehicle-free beachfronts in the County are thriving, while Oceano is not, and will not, if cars and trucks continue to drive on its beachfront.

We also know that State Parks' 2017 claim of a \$243 million impact is spurious, a claim that Patel refuted in a widely circulated 2018 critique, and further debunked in his just-published report, [Economic Impact from Suspension of the Vehicular Use at the Oceano Dunes SVRA](#).

So, we have three evidentiary sources telling us two things: that OHV activity in the Pismo State Beach and Oceano Dunes has had no significant economic impact; and, that OHV activity on beachfronts can obstruct or inhibit a community's economic growth.

What remains to find out is...

- how much of an economic opportunity there might be for Oceano and the County by redeveloping Oceano as a destination beach community versus the non-beach-community it has become since 1982 when its beachfront was repurposed for recreational driving, and
- what area-residents prefer versus what governing authorities, special interests and outsiders prefer.

### **The Choice**

Oceano's future will be determined by whatever final action is taken on the CDP/PWP regarding the continuation of OHV activity on Oceano's beachfront, whether it be for more of the same repressive socioeconomic conditions that residents have contended with for nearly four decades, or, to lend residents and their town a new lease on life.

For the Coastal Commission, it would seem to boil down to a making simple choice of whether or not to comply with its own environmental justice policy.

# # #

Respectfully submitted,

Nick Alter, Coordinator  
Oceano Economic Development Council

Gentlemen and Ladies of the Coastal Commission:

I am writing as a concerned citizen of the Nipomo Mesa and as a retired health care professional about the air quality in the area.

We have lived in the area since 1999, first in Grover beach and now on the Mesa.

It has been so beneficial to residents to have the dunes closed to vehicles during the last several months. It has made walking safe as well as improving the air quality in the Nipomo Mesa for thousands of residents.

There are many options for beneficially capitalizing on the unique character of our dunes. Visitors, both from the US and from overseas attracted by the natural beauty and serenity of our Dunes, can be a greater economic resource for the area than off-roaders.

Nature-oriented tourism could be a more profitable use if they are encouraged to come to the area. A good plan for the Oceano State Park would be to provide visitor services in the same way as the national parks ( like Yosemite).

Grover Beach has long wanted to upgrade the area. With the building of its convention center, changing the park to an environmentally sensitive tourist area with camping, hiking, bird and wildlife tours seems to be a better use. This would benefit Oceano, Grover Beach and the health of the residents of the Nipomo Mesa.

How many people must die from insidious air pollution and reckless vehicle operation before the Coastal Commission and State Parks will protect us?

In the recent past, concerns about cigarette smoke and asbestos were swept away. It took many years and lives lost for the serious health dangers of these two environmental pollutants to be understood.

I urge you to take seriously the particulate matter in the air on the Nipomo Mesa, which is classified as one of the most polluted areas in the nation. The health of the residents of the area is at risk and endangered.

William and Lynn Dorland  
868 Jacana Court  
Arroyo Grande  
California, 93420

**To:** OceanoDunesReview@Coastal  
**Subject:** Public Works Plan for the Oceano SVRA

**Categories:** Public Comment

Dear Coastal Commissioners,

We are writing to express our support and our concerns regarding the Public Works Plan for Oceano Dunes SVRA. We are committed to preserving the shoreline, estuaries, marshes and other transition zones. Community plans need to preserve our agriculture and natural open spaces. We support the proposed improvements to the Monarch Butterfly Reserve, improving existing campgrounds and repairing and improving existing facilities.

We have grave concerns regarding the PWP to add an entrance and to expand all facilities including the increase in campsites, parking, cabins and support businesses. This development would seriously impact sensitive environmental areas and harm the character of Oso Flaco.

We urge you to reconsider the scale and location of any new development proposed for the ODSVRA. Any new plans need to prioritize the protection of the coastal environment and the preservation of our resources. Some damage can not easily be undone. Protecting our natural resources is right thing to do.

Sincerely,  
Dr. Garry Eister  
Mrs. Mary Eister  
Arroyo Grande

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Noah hall

**Sent:** Friday, February 26, 2021 4:52 PM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

John Pederson

**Subject:** State Parks Public Works plan for Oceano Dunes SVRA

**Categories:** Public Comment

I support the removal of off highway vehicle use iat Oceano Dunes and environs. I'm a San Luis Obispo County resident who enjoys the stellar outdoor experience that is found here. I often cycle, hike and camp all over the county. I would love the opportunity to hike the Oceano Dunes, but the noise, the off road vehicles racing everywhere in the park make for an unpleasant time.

The State Park's plan for expansion of vehicle access and camping is a terrible use of the resource. The coastal dunes are a valuable outdoor resource that truly is off limits for those who don't enjoy the racing of an engine or jumping a dune. Changing the use to prohibit off road vehicles will open this area's recreational opportunities to many people.

I urge you to eliminate vehicle access, not expand it.

Yours,  
George Griffin

**Categories:** Public Comment

Dear California Coastal Commission,

I urge you to reject the Public Works Plan for Oceano Dunes State Park because it does not adequately protect endangered species or coastal resources, nor does it comply with the Coastal Act.

Please alter your habitat conservation plan at Oceano Dunes to provide greater and essential protection for threatened snowy plovers and endangered least terns. Your current draft plan could doom these species by allowing more off-roading, the result of which would cause more protected birds to be run over and reduce their protected nesting areas.

In addition, permitting more vehicles to drive in essential bird habitat areas during the nesting season will hurt these iconic birds and undermine the very reason for the "conservation" plan. Also, your plan fails to provide safeguards for resident snowy plovers, which continue to be struck by vehicles during the non-breeding season.

Finally, this proposal further threatens air quality by proposing to expand driving areas and use mechanical beach cleanup. Doing so will decrease the amount of stabilizing vegetation and thus create larger areas where sand can get airborne and blow into nearby communities.

Please rethink your proposal and address these issues so it includes science-based conservation planning. The more than 10 imperiled species that are included in this plan and which depend on this locale for their survival deserve a much better response from you.

Thank you

Sincerely,  
Bob Tintle

But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Sheryl Rose

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. **From:** Josh Rada [jrada@blm.gov]  
**Sent:** Friday, February 26, 2021 2:57 PM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

I am writing to ask you to vote down any more development on the Oceano dunes and near Oso flaco. There is already so much pollution and species damaged caused by the off-road vehicles now. we the people certainly do not want anymore development that is going to cause more problems. Vote no.

Thank you.

Dear Coastal commission:

We are writing to support the California Coastal Commission's staff recommendations to phase out off-highway vehicle (OHV) activity at the Oceano Dunes over a 5 year phase out period.

We have always been amazed that California State Parks not only allows this activity, but actually PROMOTES it! This OHV activity has killed and injured not only endangered species and wildlife, but HUMANS as well! Time to re-think the use of OHVs here and begin protecting this fragile dune system. Thank you for your consideration.

**Categories:** Public Comment

Dear Coastal Commissioners:

Please support the February 16, 2021 staff recommendations for the Oceano Dunes SVRA and the State Parks' draft PWP/EIR.

The proposals to develop the Dunes and Oso Flaco areas are not ethical stewardship of these precious resources; the central coast community wants to protect the delicate ecology there, not turn it into one giant OHV-themed parking lot and development. Despite the loud communications from the OHV community, they do not represent the large majority of the people of this community and state. Protect our natural resources and keep these parks from further development. Your staff is correct, follow their recommendations.

Thank you,  
Carlyn Christianson

**Subject:** Oppose the plan for Oso Flaco lake

**Categories:** Public Comment

I oppose this plan because:

1. It represents a tremendous departure from the existing situation at the Dunes and is not appropriate for the area.
2. The establishment of a new major access to the Dunes riding area from Oso Flaco Lake would have a damaging effect on a designated Environmentally Sensitive Habitat Area (ESHA).
3. Past use at the ODSVRA has generated the need for Habitat Conservation Plans and Particulate Matter Reduction Plans. It is not appropriate to introduce disruptive uses into ***additional sensitive areas*** thereby exacerbating impacts to habitat and potentially increasing particulate matter release into areas currently not impacted by these issues.

**Subject:** The Assault on the Oceano Dunes

For years the OHV Division and groups have been assaulting the environment at the Oceano Dunes. We have all seen the destruction they have caused to communities, the environment and public health.

This is why we all need to support the compromise Coastal Commission recommendations on March 18, 2020. It is a start in the right direction.

When the dust clears there is a lot of hard work that must begin. State Parks will be tasked with unwinding 40 years of mismanagement and environmental injustices. Closing Pier Avenue before July 1, protecting, mitigating and restoring the dunes and habitat, enforcement of the new conditional use permit requirements. This begins a new era for State Parks at the Oceano Dunes. We will be able to see quickly if they are serious about timelines, transition, immediate limits on OHV vehicles in sensitive ESHA areas, expanding camping between Grand and Pier Avenue, new leadership at the park and providing a safer beach access zone in Oceano. Everything is possible and we do not have to wait 5 years.

San Luis Obispo supervisors will have the opportunity through planning and zoning with new federal and state funding to revitalize Oceano with infrastructure improvements and a new community park located where they now have a parking lot for trailers close to the beach.

The goals and objectives are clear. This becomes that time when frontline communities must work with our elected officials, State Parks and the Coastal Commission to make this social justice dream a reality for Oceano. Clearly this becomes an opportunity for our elected leaders and State Parks to restore our faith and confidence in our democratic institutions and public services. Let us begin the hard work to overcome the mistakes of the past in Oceano.

Dear Chairman Padilla and Coastal Commissioners: Please support the February 16, 2021 staff recommendations for the Oceano Dunes SVRA and the State Parks' draft PWP/EIR. These thoughtful recommendations would finally resolve the long-standing conflict in the dunes and it's the right answer for the Central Coast, from the perspective of public health, wildlife protection, environmental justice, economic vitality, compliance with the Coastal Act, and equal access for all to the coast.

Rich Bailey

California State Parks ODSVRA (OceanoDunes.PWP.EIR@parks.ca.gov)  
California Coastal Commission (OceanoDunesReview@coastalcal.gov)

Subjects:

- **Opposition to the draft PWP/ EIR Oso Flaco Lake Improvement Project**
- **Support for the California Coastal Commission Staff Report of 2/16/2021**

Dear California State Parks and California Coastal Commission:

For many reasons State Park's PWP/EIR+ plan is problematic as it overlooks many of the reasonable recommendations made previously by the California Coastal Commission to resolve longstanding environmental and public health and safety issues. This plan submitted by state Parks does not do what it should do to weave the various complexities of this stretch of coast into a sensible plan.

I have also reviewed the Coastal Commission staff report and its recommendations. I concur with their assessment that this area and where State Parks' PWP plan falls short- the Coastal Commission Staff report is a more comprehensive, all-inclusive, and strategic answer for the Central Coast.

They, at least, have examined the totality of evidence from the perspective of public health, agricultural and economic vitality for the region, wildlife and habitat protection, environmental justice, community fairness, and access to the beach and coast, for all people.

I like the Coastal Commission Staff recommendation that the Coastal Commission “partner with State Parks, the local community, and visitors to the area to reimagine the Park operating in a **more environmentally sustainable and legally consistent way.**” Staff has indicated that their official staff recommendation will be to phase out off-roading over five years and to expand different types of recreational uses that will not harm coastal resources at the Park.

Unfortunately, the State Parks plan has not done well in its PWP/ EIR assessment. For these specific reasons:

**1. It does not comply with the law:**

- **California Coastal Act Section 30240A-** ESHA Environmentally sensitive habitat areas shall be protected.
- **California Coastal Act Section – 30240B-** **Adjacent** to ESHA requires siting of proposed development to be non-impactful and non-degrading to ESHA.
- **CCA Section 3024-** Prime Ag land

- **CEQA- The** submitted PWP/ EIR is incomplete and insufficient in disclosure and assessment of comprehensive impacts to the Oso Flaco Lake region and will be challenged.

2. **It is bad for people-** The local schools, the birders, the fisherman, the hikers, the curious nature seeker, the hiker, the tourist seeking Coastal Dune hiking and viewing access would all be forced to surrender this sacred exploration space to noisy, polluting, destructive commercial and RV activity.

It is also dangerous to insert the volume and types of traffic, w large RVs, Towed OHV Trailers, etc.- into the same stretch of agricultural workers, pedestrians, and farming equipment. Bad Vehicle accidents are guaranteed.

3. **It is bad for wildlife.** The many birds, animals, and plants that currently thrive in the protected space of Oso Flaco. Their future and survival would be greatly impacted by the impacts and the magnitude of the proposed projects to the environment would be devastating.

The Oso Flaco Lake region is a critical flyway path for migrating birds and for the threatened Monarch Butterfly, as well as a protected home for numerous other sensitive animals and plants.

4. **It is bad for the environment** – This area features prime agricultural soils in addition to a currently protected ecosystem of Dune lake habitat.

The prime agricultural class I & class II soils are rich and rewarding- allowing essential food and jobs to be produced and to supply the area with economic benefits and replenishment of the natural hydrologic cycles.

USFWS ranked Oso Flaco Region as a “top tier” category of fragile ecosystem habitats that need protection.

It has taken 40 years of protection to allow Oso Flaco to heal and evolve from the last time large scale human impact interfered with the natural conditions. The plants and animals evolving here are now going to be sacrificed and put in jeopardy because we want our carbon spewing vehicles and toys to have a place to be destructive? That is both illegal and shameful.

5. **The project has much public opposition.** When the local media publicized the State Parks Plan for Oso Flaco-the public sentiment was largely against such a massive and destructive new intrusion and point of entry to the Dunes.

Over 2,000 letters sent to State Parks in opposition to the first PWP that State Parks submitted. Other groups have stated their opposition to this PWP/EIR:

Audubon  
 Oceano Beach Community Association  
 Northern Chumash Tribal Council  
 Surfrider Foundation  
 Sierra Club  
 ECOSLO  
 The Nature Conservancy  
 Friends of Oso Flaco Lake  
 Center for Biological Diversity  
 Califlora Resources LLC

**Coastal Commission Staff Report** (July 2019): “Serious LCP inconsistencies related to agricultural conversion and ESHA degradation. PWP effort is not moving in the right direction”-

±

Out of the two contrasting visions, the voice of support from a multitude of residents and visitors, absolutely loved spending time walking, biking, and riding horses at the beach when vehicles were prohibited over the summer, and who feel vehicles on the beach should be reduced or regulated, as opposed to expanded, like the State Parks PWP outlines.

**Some important considerations for this decision include:**

1. **Protecting our public health should always come first.** Off-road vehicle use has been determined to contribute to poor air quality conditions on the Nipomo Mesa. Mitigation installed to date has improved the air quality according to **APCD reports** by reducing emissions by over 20% in some years.
2. **A recent economic impact study** by a Cal Poly professor concluded that during the time off-road vehicles were temporarily prohibited during the pandemic, there was no significant economic impact to our community. This study **challenges previous studies** that have indicated the economic impact of losing off-road vehicles would be significant to our community.
3. If we are going to continue to allow vehicles at the Oceano Dunes, we need to balance **all interests**, including social, economic, and environmental. There is a way to do this, but State Parks does not seem to be indicating a willingness to get there.

**I urge you to reject the Oso Flaco Lake “Improvement” project as submitted and begin the work as outlined in the Coastal Commission Staff analysis.**

**Follow your thorough and accurate Coastal Commission Staff Report and you will have done a better job of managing the complexities of this stretch of vital coastline, which is exactly what your commission is.**

Thank you for your attention, consideration, and service.

**Bruce Berlin**- Arroyo Grande, CA

*Native Plant Ecologist and Central Coast Resident*

**Subject:** Stop Oceano Dunes' Reopening Until Coastal Permit Is In Place  
  
**Categories:** Public Comment

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Brenda Blinn

For years the OHV Division and groups have been assaulting the environment at the Oceano Dunes. We have all seen the destruction they have caused to communities, the environment and public health.

This is why we all need to support the compromise Coastal Commission recommendations on March 18, 2020. It is a start in the right direction.

When the dust clears there is a lot of hard work that must begin. State Parks will be tasked with unwinding 40 years of mismanagement and environmental injustices. Closing Pier Avenue before July 1, protecting, mitigating and restoring the dunes and habitat, enforcement of the new conditional use permit requirements. This begins a new era for State Parks at the Oceano Dunes. We will be able to see quickly if they are serious about timelines, transition, immediate limits on OHV vehicles in sensitive ESHA areas, expanding camping between Grand and Pier Avenue, new leadership at the park and providing a safer beach access zone in Oceano. Everything is possible and we do not have to wait 5 years.

San Luis Obispo supervisors will have the opportunity through planning and zoning with new federal and state funding to revitalize Oceano with infrastructure improvements and a new community park located where they now have a parking lot for trailers close to the beach.

The goals and objectives are clear. This becomes that time when frontline communities must work with our elected officials, State Parks and the Coastal Commission to make this social justice dream a reality for Oceano. Clearly this becomes an opportunity for our elected leaders and State Parks to restore our faith and confidence in our democratic institutions and public services. Let us begin the hard work to overcome the mistakes of the past in Oceano.

**From:** John Duty [john.duty@michelin.com]  
**Sent:** Friday, February 26, 2021 10:52 AM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

John Duty

**Subject:** Please phase out OHVs on the Oceano Dunes

**Categories:** Public Comment

Dear California Coastal Commission

I am writing to ask your support for the following three items:

- 1. Permanent elimination of Off Highway Vehicles (OHV) on the Oceano Dunes.** The Oceano Dunes area is a precious natural resource that has been greatly harmed from OVH usage. Not only are the dunes being harmed, but so is the health of the Pacific Ocean. I have walked the dune area for years, and noticed trash caused by humans (bottles, cans, food wraps, shoes, etc.) has always been in abundance at the shoreline. During this last year with the COVID situation preventing OVH traffic, that trash has been greatly reduced. Eliminating OVH use will provide an opportunity for native plants and wildlife to replenish themselves, while greatly reducing trash that ends up in the ocean that causes harm to sea life. Additionally, human lives will be saved with no OHV allowed on the dunes. Every year multiple deaths and injuries are caused by OHV usage on the dunes.
- 2. Limited camping on the Oceano Dunes**--not all harm on the dunes is caused by OVH, much of it is caused by camping. Natural habit areas are distrubed or destroyed and trash is highly increased with camping. I understand the desirability of camping on the Oceano Dunes, but hope it can be downsized and better controlled to prevent further harm to the environment.
- 3. Do not approve camping or other recreational improvements or expansion at the Oso Flaco area.** This is a pristine area that should not have any additional development that would harm the natural resources and beauty of the area. It is also a very safe place for walkers to enjoy an area that is mostly undisturbed from vehicle traffic. I encourage all efforts to maintain the area in its current natural environment and ask that camping and vehicle traffic in this area not be approved.

Thank you for your consideration and support of these requests.

Sincerely,

Shirley Peterson  
San Luis Obispo, CA

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. Dear California Coastal Commission,

I remember censusing Snowy Plovers in my area in the early 80s, (I still monitor them occasionally as a volunteer), and what a great victory it was to remove dune buggies from a local beach. I hope you will follow the science and prohibit motorized recreation from the Oceano Dunes in order to protect plover and tern habitat.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Anna Cordova

We write in support of the Staff Report and against the State Parks plan for the future of the Oceano Dunes area. Although we, like many local residents, would prefer no motor vehicles on the beach and dunes, the recommendations in the Staff Report represent a compromise, which we can support. Allowing low-cost vehicle camping in a more limited portion of the beach would still allow a unique experience for locals and tourists. We are encouraged by the Staff Report having addressed the livelihood and need for a sense of community in Oceano and specifically, businesses on Pier Ave.

We support eliminating OHV from the beach and dunes. Healthy sand dunes and developed foredunes provide natural coastal protection against storm surge and high waves, preventing or reducing coastal flooding as well as providing important ecological habitat. OHVs traversing the dunes have an adverse impact on them and their plant and animal residents and on the air quality. With rising sea levels, healthy dunes are of increasing importance. Recent efforts by State Parks to protect endangered or threatened species and mitigate poor air quality have led to miles of fencing, signs and scientific monitoring equipment, degrading the beauty of the spectacular Oceano Dunes. State Parks often relies on heavy equipment - bull dozers and graders to traverse the beach and dunes. It can be argued that most "mitigation" is done to support continued OHV use.

We are adamantly opposed to the State Parks plan to develop the Oso Flaco area. We find development most unacceptable in light of the fragile nature of Oso Flaco. It is protected within the Guadalupe-Nipomo Dunes complex, which has been designated "the most unique and fragile ecosystem in the State of California" by the U.S. Fish and Wildlife Service: <https://documents.coastal.ca.gov/reports/2000/3/T14c-3-2000.pdf> Protection of Oso Flaco wildlife would be weakened by nearby development, including increased light at night, pavement, and noise at all hours.

Oso Flaco is currently enjoyed by many families and student groups with low impact. For example, on New Year's Day we were impressed by the number of Hispanic families with whom we shared the boardwalk and beach; we Caucasians were the minority as opposed to our typical experience on Pismo Beach. It appears that this is because Oso Flaco represents convenient, local access to nature for residents of nearby Santa Maria, Guadalupe and Oceano, which are areas with a majority of low-income Hispanic families. It seems highly unlikely that many of these families would utilize the facilities envisioned by the State Parks plan.

In closing, we encourage the Coastal Commission to adopt the recommendations in the Staff Report and dismiss the State Parks plan.

Sincerely,

Susanne and Marc Mumby

1911 Barcelona, Pismo Beach, CA

**Sent:** Friday, February 26, 2021 9:17 AM  
**To:** OceanoDunesReview@Coastal  
**Subject:** RE: Fate of the Oceano Dunes

**Categories:** Public Comment

Good morning,

My name is Ryan. I've lived in Oceano for thirteen years. When I first moved here I was excited to live so close to the ocean and looked forward to taking advantage of the beach in Oceano. Sadly however I quickly learned that the beach front from Grand Ave to the camping area in the Oceano Dunes is NOT a beach for locals, but instead is a "playground" for out of town tourists who come to our area with an attitude of consumption and destruction.

During the closure of the Oceano Dunes amid the Coronavirus Pandemic, we were finally able to enjoy the beach front area directly in front of the Pier Ave access the way the beach is meant to be enjoyed. We were not alone. Everytime we went to the beach to enjoy a picnic, sunbathing, and other activities as simple as walking three miles along the surf, we saw copious amounts of people doing the same. It was so nice to see a different crowd embracing the area, a crowd that was willing and able to pump money into our immediate local economy. I could easily imagine several shops, restaurants, and storefronts along Pier Ave that would thrive among a crowd of the likes.

Instead we pander to a community of loud, offensive, and destructive vehicles. The day the beach was reopened for vehicle access, our oasis on the beach was a parking lot trodden down by hundreds of vehicles. No longer were there crowds of beach goers basking in the sun, instead all I saw were lifted trucks with flags tearing up the sand. It honestly broke my heart to see what was a promising local hangout being literally destroyed before us.

With the community of OHV enthusiasts who frequent our area, in the thirteen years I've been here I have never seen any change to the businesses along Pier Ave. There's a liquor store, an ever-changing burger joint, and a confectionary. Everything else is geared to consumption and destruction. Included with this is the state of our roads in the immediate area. Can we realistically think that \$5/day per vehicle or \$20/night for camping produces enough tax revenue to repair the section of the Highway 1 or Pier Ave that is used by visitors?

Not all is gloom and doom, however. I do see improvements within Oceano. The neighborhood between Highway 1 and the beach is mostly rental units, hotels, and camping. I can only dream about a day when we have visitors coming to our area for a beach getaway from areas to the north and south of us bringing with them their disposable income. I imagine boutique stores, coffee shops, and restaurants along Pier Ave dedicated to this crowd of people, not just the weekend warriors from the east.

So what can we do about it?

This is a question I've asked myself over and over keeping in mind that a large amount of locals enjoy recreating at the OHV area of the dunes as well. In Social Media posts, I have seen arguments for closing the Pier Ave access ramp or closing the Grand Ave access ramp. But counter arguments pointed out that closing one of those ramps would equal doubling traffic at the other.

With the proposed expansion of the recreation area into the Oso Flaco portion of the beach, I see new opportunities for accessing the OHV area. If there were one access point near the Phillips plant and another from 22nd street many of the problems I've outlined would be solved.

1. Traffic congestion in Oceano and Grover Beach would be reduced.
2. Less of the beach would be driven on, granting expedited access to the OHV area
3. Small businesses could thrive along Pier Ave catering to wealthy urban tourists
4. Less wear and tear to Highway 1 through Oceano
5. Increased transient tax due to the increased volume of short term vacation rentals

I am not proposing excluding the community of OHV enthusiasts from visiting our area. Some of them do contribute to the local economy by purchasing fuel and groceries. Instead I would like to find a way to allow both sides of the issue to have a win. Allow for Pier Ave gentrification to happen and move the OHV access to a safer spot with better access. After all, doesn't the betterment of our community benefit us all?

I appreciate you taking the time to hear my opinion. I hope some of what I have written will be considered when making a decision regarding the community of Oceano.

Thank you,  
Ryan Stuhl

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,

**Subject:** Protect Oceano Dunes. Razorback clams.

**Categories:** Public Comment

Around 70 years ago I remember my brother and me getting Razorback clams from damp sand on the beach while our parents were searching for Pismo Clams. Fish and Game Regulations said we could "take" 100 Razorback Clams a day. They didn't provide as much meat as Pismo Clams, but we didn't have to go in the cold water to get them. They stuck above the sand about an inch or two and we usually picked them out of the sand with our fingers and filled a wash bucket with them. When I became Unit Supervisor of Pismo State Beach in December 1976 (see previous letter I wrote on February 15, 2021), I looked for Razorback clams. I saw a few, but didn't see enough to consider clamming for them. Until recently I never considered where they went. Now, as I think about it, I believe that vehicles on the beach wiped them out! Soft shells sticking above the wet sand...

We urge State Parks to rethink their proposal for the Oceano Dunes. We urge the Coastal Commission to heed the warnings of their staff and environmentalists. The proposal is too much development in an environmentally sensitive area. Off-road riding on the Dunes should be disincentivized, not encouraged. The danger to the unique habitat at Osos Flaco Lake is particularly egregious. Protect the environment and human health by ensuring sustainable, non-invasive use of the natural beauty that is Oso Flaco, Monarch Grove, and the Oceano Dunes.

Thank you.

Gary and Vallerie Steenson  
San Luis Obispo

The State Parks plan is a disaster for the lake area. Let's keep it as is, now; there's no need to open it up.

Having said that, I support a limited number of primitive camp sites, but nothing more. We don't need to develop this beautiful area!

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Jason Dunnagan

Dear Chairman Padilla and Commissioners,

Please support and implement your staff's recommendations for the Oceano Dunes, and amend the State Park's Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Ave. vehicle access, preserve the snowy plover exclosures, and leave the Oso Flaco Lake area as it is. Above all, start the clock on the phase-out of OHV activity.

The Oceano Dunes will continue to offer unique experiences such as car camping on the beach, along with walking, birding, fishing, horseback riding, and hiking the dunes; the kind of activities that characterize the healthy economies of every other beachfront community in California - with the exception of Oceano.

Please dispense with the fears and economic arguments against doing this, which were rebutted during the park's closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California's coast.

The residents of Oceano who try to walk on their own beach, with OHV activity, do so with great risk. And they are watching the coastal dunes complex – their defense against rising sea levels – being eroded away.

The unhealthy air, from foredunes denuded of vegetation by off-road vehicle activity, continues to stretch from Nipomo to Guadalupe.

All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to adequately protect the environmentally sensitive habitat. It is past time to hold them accountable now.

Sincerely  
PS

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Mary Reynolds

Dear Committee

I am writing to express my views about planned changes to the Oso Flaco Lake area by CA State Parks. I DO NOT support the proposed changes. Oso Flaco is a rare and valuable environmental area that needs the utmost protection from development and increased encroachment to be able to maintain the natural services it provides. There are few other places in California - and none in the Central Coast - that offer such a great level of protection and resources for local plants and local and migratory animals.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Jason Manviller

**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Keith Genter

**Categories:** Public Comment

To Coastal Commission Members and Whom it may Concern:

As a "Mesa" resident of the central coast, I strongly urge you not to approve this draft. At a minimum, a careful reconsideration of three key provisions (unacceptable as now framed) should occur:

- > 1) The draft doubles the size of the ATV riding area at Oceano Dunes, thereby exacerbating existing air pollution levels (already untenable).
- >
- > 2) The draft proposes development of the Oso Flaco Lake area, which would be devastating to presently protected wildlife and plant life.
- >
- > 3) The draft proposes an enormous development at the Phillips 66 refinery site that would create more air pollution, noise, traffic, and light pollution (in a sensitive habitat area).

Thank you for your consideration,

Dr. Lee DuRard  
Nipomo, CA

California Coastal Commission  
Oceano Dunes  
March 18, 2021

The commission was formed by the public to “provide maximum public access and recreational opportunities. Noble goals but unfortunately zealots have taken over the commission and staff and we are stuck with their vision of what is good for us.

Anyone who suggests depriving several million visitors of access and recreation and replacing it with perhaps 50 car campsites between Grand and Pier entrances) certainly has forgotten the original purpose of the commission.

Closing the beach south of the Pier entrance and not allowing OHV access elsewhere means no one will be there to enjoy the beach and dunes. No one will hike, carry tables, chairs, bbq, etc two miles down the beach. When the newspaper reports any group (Sierra Club or?) having their annual hike into the dunes it is about 20-30 people. To take access away from several million people and save it for the birds is the height of hypocrisy for a commission formed to provide access and recreational opportunities.

To suggest that there is no economic benefit to the local economy from the 2 plus million visitors coming here each year is laughable.

We are currently seeing a political party ruined by buffoons taking over and it is easy to see the similarities to the current Coastal Commission. I have enjoyed the beach and its variety of uses for over 50 years. I will be very happy knowing karma will reward you with what you deserve.

David Ekbom  
Grover Beach

Dear California Coastal Commission,

Please protect the snowy plovers! Reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

It's time to protect the environment and its inhabitants. We got a glimpse of what was possible during the pandemic when people stopped driving. Don't allow off road vehicles. It's so cruel. How would you like it if giant motorcyclists road through your home?

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Michael Heil

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys visiting the great State of California for powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

Please do not eliminate the reasons I visit California - I will truly miss the excellent off-highway opportunities provided by your State Vehicular Recreation Areas.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

David Morris

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Nicole Brodeur

**Categories:** Public Comment

Dear California State Parks and California Coastal Commission:

Thank you for the opportunity to share my thoughts on the State Parks' Oso Flaco Lake "Improvement" Project as described in the Draft PWP/EIR.

This Project is an absolute tragedy and is inconsistent with the mission of the California State Parks which is to:

*"provide for the health, inspiration and education of the people of California by helping to preserve the state's extraordinary biological diversity, protecting its most valued natural and cultural resources, and creating opportunities for high-quality outdoor recreation."*

The proposed Oso Flaco Lake "Improvement" Project is: 1) detrimental to the rich and ecologically diverse wildlife that are so abundant at Oso Flaco Lake; 2) interferes with the tranquil natural environment so highly prized for hiking, fishing, birdwatching, outdoor education and respite that is so desperately sought after by residents, visitors, and school groups; 3) inconsistent with the Coastal Act and the City of Grover Beach and San Luis Obispo County Local Coastal Programs; and 4) unpopular with a majority of the local citizenry.

I am **opposed** to all elements of the Oso Flaco Lake "Improvement" Project. I urge you to listen to the voices contained within the thousands of comments you have received opposing this project and **reject** the Project and **keep** Oso Flaco Lake Natural Area just the way it is.

I have also reviewed the Coastal Commission staff report from February 16, 2021 and would like to go on record as supporting its recommendations which are grounded in on-the-ground facts, scientific analyses, and the law and which aim to address public health, economic vitality for the region, wildlife protection, environmental justice, community fairness, and access to the beach and coast for all people.

Sincerely,

*Pamela L. Reading*

**Subject:** I stand with the Coastal Commission

**Categories:** Public Comment

I'd like to express my support of the Coastal Commission's plan to phase out OHV and limit camping and street vehicles on the beach and dunes of Oceano/Grover Beach. Environmental protection and beach access and use for everyone needs to be prioritized over the desires of a specific group of OHV enthusiasts. Let our tourism dollars come from people flocking to clean beaches for walking, surfing, and beauty instead of flocking here to tear up the dunes, spread more particulates, trash the beach, and get into accidents.

Sincerely,  
Brenda McAlice  
Arroyo Grande

To the California Coastal Commission:

I am writing in SUPPORT of your recommendation to eliminate OHV use at the park; it is not consistent with LCP & Coastal Act requirements.

I share your concerns with the State Parks plans for Oso Flaco Lake. I am OPPOSED to the addition of new OHV entrances in the south, the expansion of the OHV riding area (thus reducing protected areas), and the addition of hundreds of camping & RV spaces and cabins.

Sincerely,  
Janey Dale

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Michael Stovall

**Categories:** Public Comment

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Linda Civitello

**From:** Robert Wilson [bob@wilsonspowersports.com]  
**Sent:** Thursday, February 25, 2021 1:44 PM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Robert Wilson

**Subject:** Public Comment on ODSVRA Draft PWP for March 18 Special Meeting

**Categories:** Public Comment

Commissioners:

Thank you for the opportunity to comment on the Draft Public Works Plan submitted by the State Department of Parks & Recreation for the Oceano Dunes State Vehicular Recreation Area. I strongly believe that any proposed coastal development must be consistent with two overarching goals: 1) to provide opportunities for coastal access and recreation to as many people as possible, and 2) to protect our coastal resources, most notably our endangered species and environmentally sensitive habitat area. Sadly, the Draft PWP submitted by DPR fails on both of these goals.

Having studied the situation at ODSVRA for the past 8 years, I've reached two basic conclusions. First, motorized recreation irreparably damages coastal resources. It destroys ESHA, it threatens endangered species, and it creates pollution that has far-reaching impacts that extend along the coast and beyond. Second, motorized recreation in a coastal area precludes the use of that area by other groups, i.e., walkers, hikers, bikers, etc. It's just common sense; it's why we don't let our children play in the street. Unfortunately, the Draft PWP clearly shows that not only does DPR not appreciate the damage that their current motorized recreational activities cause, they want to expand these activities into areas that are natural and environmentally sensitive. In particular, their plans to develop Oso Flaco Lake and the Phillips 66 site are, in my view, a huge mistake. Oso Flaco is one of the few local areas where people on foot can get a true coastal nature experience. To essentially pave it over is unacceptable. Similarly, if and when the Phillips 66 site becomes available, we need to let it revert to a more natural state, so that its natural beauty can be enjoyed by all.

Your Staff has provided a comprehensive and very thoughtful report on the situation at ODSVRA, and I find it to be excellent and well-reasoned. As I've commented to you before, I think that Commission Staff has the clearest vision of any group regarding the future of the ODSVRA, and I commend Staff for the hard work that they have put into their report and recommendations. In my view, any plan for development at ODSVRA needs to reflect the following realities, all of which are addressed in detail in the Staff Report: 1) OHV has no place on the dunes, and it needs to be phased out. We've been kicking this can down the road for 40 years. Isn't it time finally to stand up and address this problematic issue? 2) Motorized recreation needs to be separated from other types of recreation. I believe there is a place for car camping at the beach, but for safety reasons it has to be segregated from non-motorized recreation. 3) Coastal resources are supposed to benefit us all, not just a small group of us. That includes not only recreational visitors but also members of the local community, i.e., Oceano, who have taken the brunt of the negative impacts associated with OHV use without receiving much positive benefit.

I urge you in the strongest possible terms to approve the recommendations contained in the Staff Report, so that the ODSVRA can become the jewel of the California Coast that it was always meant to be.

David Bernstein  
Nipomo

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Noah Youngelson

**Categories:** Public Comment

Dear Chairman Padilla and Commissioners:

I have been a resident on the Nipomo Mesa in Bayview Estates for the last eight years, and during that time I have twice developed cryptogenic organizing pneumonia. My pulmonologist has indicated that the small particle airborne dust from the dunes, disturbed by off-road vehicles, has caused or exacerbated the damage to my lungs. In light of my own personal health issues and for the public safety of all those who live downwind of the Oceano Dunes, I urge you to do everything in your power to mitigate the damage that ATVs have done - and will continue to do - to the natural crust and vegetation which would normally protect this sensitive environmental habitat. Your authority is the only thing standing in the way of further destruction to these dunes. Whatever you can do to mandate rehabilitation and restoration of the original ground cover, the snowy plover nesting area, and the preservation of the peaceful enjoyment of the beautiful beaches we have in this area, should and must be done. Furthermore, I totally oppose expansion of off-roading in the Oso Flaco area. One has to question why we on the Central Coast should be unique in our willingness to accept this destruction of our beaches. Why do we devalue their beauty with all this noise and air pollution by allowing people to tear up the dunes with the excuse of family fun or financial gain? The Oceano Dunes are a precious natural resource, not a thrill ride amusement park. No one else tolerates this behavior and damage on the other beaches up and down the coast. I support all beach related activities and tourism other than the use of ATVs on our beaches, including perhaps even camping. If we are forward thinking, envisioning a future of breathing cleaner air and being environmentally conscious, we could attract far greater numbers of people who would make fuller use of local hotels, restaurants and shops as they enjoy a tranquil, natural beach destination. We should not be dominated by few niche profit-driven voices. Now is the time to phase out OHV activity and take our place with other attractive and healthy beach communities.

Thank you for being a force for good here and for all you have done or tried to do to protect our environment. Please let me know if there is any other authority to whom I may appeal to make the necessary changes to stop the misuse of the Oceano Dunes and local beaches.

Very truly,

Nancy C. Arana

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Michelle Barboza

**Categories:** Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at OSDVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Garth Cummings

Dear Chairman Padilla and Commissioners,

Some years ago, I walked around the Dunes and Oso Flaco once, and it was an exceptionally beautiful experience. The silence of nearby landscape, the diversity of birds in this habitat, and the far-off rolling of the surf made an unforgettable impression on me. Now, we hear of extensive development that will encroach on this ecosystem for the pleasure and entertainment of the public. Quite frankly, I'm appalled at the inclusion of off-road vehicle access, and so I am taking the time to write you about my concerns.

Please do the sensible thing and implement your staff's recommendations for the Oceano Dunes to amend the State Park's Coastal Development Permit to bar riding and driving across Arroyo Grande Creek. The Pier Ave vehicle access should be closed. *Especially important, preserve the Snowy Plover exclosures, and leave the Oso Flaco Lake area as it is. Above all, start the clock on the phase-out of OHV activity.*

The Oceano Dunes will continue to offer unique experiences such as car camping on the beach, along with walking, birding, fishing, horseback riding, and hiking the dunes; the kind of activities that characterize the healthy economies of every other beachfront community in California. Oceano should not be an exception.

The residents of Oceano who try to walk on their own beach, with OHV activity, do so with great risk. And they are watching the coastal dunes complex – their defense against rising sea levels – being eroded away. And the unhealthy air, from foredunes denuded of vegetation by off-road vehicle activity, continues to stretch from Nipomo to Guadalupe.

All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to adequately protect the environmentally sensitive habitat. It is past time to hold them accountable now.

Thank you in advance for caring.  
Susan

*Susan Vansant Bartz*

**Categories:** Public Comment

I am a concerned citizen of San Luis Obispo County and I want to express my opinion on the proposal for re-opening of the Dunes, the Oso Flaco Lake area, and the Phillips 66 refinery for off-road vehicle use and camping. I am opposed to all such plans because of the devastating effects these plans have on air quality and pollution, and the harm they will have on environmental wildlife and plants in the area. In addition, there has been little to no consideration of the Tribal Rights associated with these locations.

Please do not move ahead with these plans. I have lived in SLO County since 1992 and during this Covid period of time I have been able to enjoy the beauty and quiet of the Oceano beach for the very first time. The absence of off-road vehicles and campers allowed the wildlife to return and allowed me to venture forth without the noise, pollution, and crush of people to enjoy our spectacular area unencumbered.

Sincerely,

Susan Dressler, San Luis Obispo, CA

**Categories:** Public Comment

I find the Public Works Plan and Environmental Impact Report unacceptable because:

- 1) It is not consistent with the Coastal Act and the Grover Beach and San Luis Obispo County Local Coastal Plans, which are the standard of review for the Public Works Plan.
- 2) The draft PWP does not address the multiple issues and impacts associated with the use and intensity of use in the Park. Degrading of habitat, harming protected and native species, causing air quality and public health problems, and ignoring Tribal Rights and Environmental Justice Rights, are not OK.
- 3) The draft PWP/EIR barely mentions the air pollution created by its present operations. Then it goes on to double the size of the riding area and brings the air pollution closer to Mesa residents.
- 4) It proposes to develop the Oso Flaco Lake area, which would be devastating to the presently protected wildlife and plant life found there.
- 5) It proposes a HUGE development at the Phillips 66 refinery site that would create more air pollution, noise, traffic, and light pollution in what is presently environmentally sensitive habitat area.

**Sandy Lee**

**Subject:** close the dunes to off-road vehicles

**Categories:** Public Comment

To whom it may concern:

Please close the dunes to off-road vehicles.

This area is a treasured environmental asset and should not be torn apart for pleasure. Also, the people of the Nipomo mesa should not be subjected to subpar air quality. Public health should never be subverted by recreation.

Further, the towns of Oceano and Grover Beach are far underperforming the rest of the county economically. Close the dunes to off-road vehicles and allow them to prosper by enticing a new tourist to the area.

Respectfully,

Tom Franciskovich

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,

**Subject:** Oso Flaco Lake Natural Area Development--State Parks' Draft PWP/EIR

**Categories:** Public Comment

The proposed development by State Parks in the Oso Flaco Lake Natural Area is totally incompatible with the surrounding agricultural and natural area.

These lands should remain in pristine condition with no development.

The natural area is prized for viewing wildlife, conserving rare plants, and the enjoyment of nature and should not be subject to the proposed development.

The agricultural area needs to remain in crops. We need more growing space for food, not less.

Thanks for your consideration.

David Krause  
Cambria, CA

**Sent:** Thursday, February 25, 2021 2:22 AM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Public Comment, Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Jay Peterson

To whom it may concern.

We moved from busy Bay Area to find some peace and quiet at the Central Coast.

With the latest news about Oceano Dunes and the plans of State Parks' permit for the Oceano Dunes SVRA, creating the most significant opportunity to correct the longstanding issues plaguing the park since its formation more than 40 years ago.

PLEASE PRESERVE THE BIRD SANCTUARIES, AND ALL THE WILDLIFE THAT IS PROTECTED THERE TO SAVE FOR OUR FUTURE CHILDREN AND THE ONES TO COME AFTER THEM. CALIFORNIA SHOULD BE PROUD OF NATURE RESERVATIONS AND GREEN SPOTS FOR NATURE TO THRIVE, INSTEAD OF NOISE MAKERS POLLUTING THE ENTIRE ENVIRONMENT AND CHASING THE FEW WILD LIFE LEFT, MORE PEOPLE INVADING THE DELICATE ECO SYSTEM. SHAME, SHAME, SHAME! PLEASE PRESERVE WHAT IS STILL TO PRESERVE INSTEAD OF KILLING IT BEFORE IT IS FOREVER TO BE LOST.

DID WE LEARN NOTHING FROM THE PAST????

PLEASE PRESERVE THE DUNES AND ITS DELICATE ECOSYSTEM, OR IT WILL BE LOST FOREVER. THIS IS PRECIOUS CALIFORNIA COAST LINE. NOBODY SHOULD HAVE THE RIGHT TO DESTROY IT FOR DUNE BUGGIES, MOTOR CYCLES AND MORE PEOPLE POLLUTING THE FEW TREASURES THAT WE HAVE.

NO NO NO!!!! TO THE PROPOSED PARK AND RECREATION PLANS, STOP THE DEVELOPMENT AND PRESEVRE THE LAST NATURAL HABITATS THAT CALIFORNIA HAS TO OFFER. WE ARE DESTROYING OUR PLANET THIS WAY.

PLEASE PRESERVE THE DUNES AND ITS NATURAL HABITAT.

What a beautiful day walking on the dunes except for the whine of motorized vehicles in the distance. These are some pictures as I got closer to the OHV area.

The pandemic pause was beautiful! It was wonderful to be able to enjoy Oceano Beach, access to the ocean, and dunes without worrying about being run over, the noise, or worse pollution from exist or blowing trash it left behind campfires. I can't imagine all the animals and plants that had a break from the relentless destruction inherent with driving off road vehicles over an ecosystem that's trying to survive!

Oceano Dunes is a criticality unique coastal dunes system. The motorized vehicles need to be eliminated for the benefit of the fragile ecosystem.

The Parks Plan is a disaster without considering the plants and animals it's supposed to be protecting!

It's time to wake up and acknowledge the eco destruction of OHVs and the State Park system role to protect the natural areas, not aiding to destroy them.

More importantly is considering the lives saved due to the closure. People weren't killed, maimed, or injured, due to the inherent label of danger that comes with OHV activities! Yay!! Our local emergency response teams, hospitals and clinics weren't overburdened due to OHV related injuries.

Oceano Dunes needs to be vehicle free! I'd love to be able access my local beach freely without worrying about my health and well-being and that of others riding on the dunes.

Pier Ave. can be revitalized, promoting vehicle free activities! Many years of neglect are obvious! The campers and OHVs just hurry on past, waiting to rip it up in the sand, causing more problems for the Nipomo Mesa! This fun is destructive to other humans and especially the ecosystem that's trying to survive! It's time to move forward into the future and prohibit vehicles!

Protect the Oceano Dunes!

February 20, 2021

Dear Coastal Commissioners, Alternates, Non-Voting members of the Commission and Staff,

As a 40 year resident of Arroyo Grande, CA, I have enjoyed the most remarkable relationship with and privileged use of Pismo State Beach and the Oso Flaco Lake area as a hiker, birder, equestrian, observer, preserver and lover of the ocean. And with the recent closure of the State Vehicular Recreation Area due to Covid-19 and the welfare of the Snowy Plover, I and many others have finally had the pleasure of enjoying this specific area of the beach without the crowds, noise, dust, trash, air pollution, artificial light, etc. that is part and parcel of the vehicular off-road use. Thus it is with optimism and hope that I submit my comments regarding the State Parks' Public Works Master Plan for this area and my concern that if this plan goes forward as envisioned, every human (other than the off-road enthusiast), every bird, special plant species, and diverse wildlife will suffer permanently from its implementation.

#### Pismo State Beach Plan

Because this area serves as the hub for the general population's access to the beach, improvements identified in the plan appear to address many long-standing needs, including upgrades to entry kiosks, lifeguard stands, the boardwalk, campgrounds, the Monarch butterfly habitat, overall access for people with disabilities, and equestrian and hiking trails.

However, the Plan continues to ignore the need for a ***staging area for equestrian use***, a critical component for equestrians to access the beach and dune trails.

#### Oceano Dunes State Vehicular Recreation Area

Maybe someday State Parks will realize that money from off-road vehicle use isn't the be-all-to-end-all and that if those funds should happen to go away, an entirely different and environmentally conscious source of revenue should and will replace it. ***It is my hope that off-road vehicle use will be removed permanently from the whole of Pismo Beach and Oceano Dunes Recreation areas.*** However, since this dream seems remote, I submit the following:

1. The Plan should do more to limit the number of off-road vehicles permitted to use the area on a daily basis, including limiting the number of campsites. The proposed use remains too dense.
2. The Plan fails to intelligently address the sensitive habitat of the Snowy Plover by assuming that the Snowy Plover wants only to nest in the areas designated by State Parks. I think this past nesting season proved otherwise. When vehicles were removed, the bird was found throughout the off-road vehicle area (except where State Parks meddled with their nests).

#### Oso Flaco Lake Plan

The Oso Flaco Lake area is one of the most beautiful, peaceful, pristine, serene places in the whole of California and beyond. ***Proposed elements that would enhance the current and existing uses surrounding the lake, the dunes and the beach area are appropriate.*** These

include specific improvements that continue to promote human hiking (trails), birding, picnicking and fishing, preserving the environmentally sensitive habitat for migratory birds and special status plant species, and the continuation of agricultural farming practices on prime agricultural land. All of these activities contribute to rather than harm the unique character of Oso Flaco Lake.

The Oso Flaco Plan as proposed is plainly a BAD Plan for the following reasons:

1. It would turn this beautiful, natural area into a noisy hub of commercial and recreational vehicle activity by illogically converting 120 acres of prime agricultural and sensitive dune land into a shocking and shameful number of camping sites, cabins, RV sites, parking spaces, group event areas, access trails for OHV use (and more), which ultimately require the addition of infrastructure for support (sewage disposal, maintenance area, concessionaire facilities, residence quarters, major renovations to the access road and railroad crossing, etc.). It defies common sense that this area should ever be considered an appropriate location for a major development that principally serves off-road vehicle use.
2. It is BAD for Wildlife. This environmentally sensitive area provides habitat for many mammals and migratory birds, especially the Least Tern and the Snowy Plover, and many other water birds too numerous to name here. Additionally, it is habitat for special status plant species that are unique to the area and fragile.
3. It gravely impacts the nature of the uses for the people who frequent the area on a regular basis, particularly, the residents of Santa Maria and Guadalupe, birders, hikers, fishermen, school groups, nature groups, etc. who prefer this tranquil environment.
4. The Oso Flaco Lake area is just north and adjacent to a designated Wildlife Refuge, which, by law, must be protected. The plan fails to protect much of anything!
5. Unlike Pismo Beach, where large numbers of people actually spend time in the water necessitating lifeguards and a tower, this is not the case with Oso Flaco beach. In all the many, many times I have visited Oso Flaco, I have yet to see anyone playing or swimming in the ocean. The waves are rough, deep and hazardous and the beach rugged and natural. People will play in the creek, but not the ocean. A lifeguard tower and lifeguards at Oso Flaco beach are not practical or necessary.
6. The proposed Plan has received strenuous opposition from many individuals and groups, including the Audubon Society, Oceano Beach Community Association, Northern Chumash Tribal Council, Surfriders Foundation, Sierra Club, Nature Conservancy and more. ***State Parks has been anything but reflective of this input.***
7. As required by CEQA, this Plan does not sufficiently identify the environmental impacts to the Oso Flaco region.
8. Lastly, the Plan does not comply with the CA Coastal Act, specifically:
  - a) Section 30240(a) which states that environmentally sensitive habitat areas shall be protected and only uses dependent on those resources shall be allowed.

- b) Section 30240(b) which states that development in areas adjacent to environmentally sensitive habitat shall...prevent impacts that would degrade those areas and must be compatible.
- c. Section 30241 which specifically preserves prime agricultural land and minimizes conflict between ag and other uses.

Phillips 66 Property Site Development

Development of this site as envisioned in the Conceptual Plan is equally as perverse as the Oso Flaco Lake Plan for many of the same reasons. And because implementation of such a plan appears far in the future due to environmental contamination, costs, logistics, etc. I will hold my comments until such time that they are relevant. However, I do want to say that the idea of having 75 equestrian campsites in an area that has 200 campsites, 20 cabins, 50 tents, pro-tracks, youth tracks, OHV parking and people, OHV rental, etc. is ludicrous. Equestrians ride Pismo Beach and its associated dune trails because it is beautiful, quiet, and safe. We specifically stay away from the OHV area because it is loud, unsafe, not relaxing, not enjoyable, and entirely undesirable to be anywhere near off-road vehicles.

Recommendation:

1. Reject the State Parks Public Works Development Plan for the SVRA, particularly as it pertains to the Oso Flaco Lake region.
2. Consider the permanent removal of all OHV use on Pismo State Beach and the SVRA, which, in essence, renders the Phillips 66 Property Conceptual Plan a non-starter.

I thank you for your time and effort.

Respectfully submitted,

Betsy Kiser, Private Citizen

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Tanner Smith

Dear California Coastal Commission,

Please give plovers a chance by limiting or eliminating driving on the beach. I was very surprised to see that this is permitted in areas where birds nest. We need to preserve our natural spaces and our biodiversity.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. Dear California Coastal Commission,

The snowy plover is species that is declining that requires sandy beaches for its habitat and breeding.. Im an off-roader as well but more importantly I'm a biologist, it's unbelievable that lack of caring for a sensitive species that is on the decline for human recreation. Shame on you! People can off road somewhere else!

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

**Subject:** ODSVRA Permit

**Categories:** Public Comment

Good People,

This is probably my **5th letter** to request you fulfill your duty and represent ALL the Central Coast constituents in the Oceano Dunes SVRA Permit quagmire.

**But I'm a newbie.** I only started educating myself to the Dunes Issue 3 years ago and quickly joined the MAJORITY of residents, with a sense of The Common Good, AGAINST VEHICLES on the dunes.

I want to point out that **20 YEARS AGO, the issue was the SAME.** The Sierra Club and local leaders made an excellent video that described the problem and it's irreparable consequences to the environment. ALL the local and agency experts agree, alongside long-suffering residents, and present the clear case for restoring Oceano Beach to un-motorized traffic. The result would allow for the **widest variety of use, and accessibility** to the greatest number of the public -- surely TOP PRIORITY for the Coastal Commission.

Ask Andrew Christie, Santa Lucia Chapter Executive Director, for a copy of the video, and watch it. It's amazing and horrifying to think we're still begging you to protect nature and our community against obvious destructive forces - WHICH HAVE OTHER RECREATIONAL LOCATION OPTIONS.

DO THE RIGHT THING. TAKE THE ACTION YOU ARE EMPOWERED TO TAKE on March 18.

PROTECT THE OCEANO/GUADALUPE DUNES AND ALL THE SPECIES THAT CALL THEM HOME.

Awaiting your Decisive Right Action.

Heather Howell

33 year Central Coast resident

Educator and Volunteer

**Subject:** Preserve Oceano Dunes

**Categories:** Public Comment

Dear Chairman Padilla and Commissioners,

Please consider the proposal for the phase out of OHV activity from Oceano Dunes. As a resident in the area, I feel our community would have much greater benefit by preserving this ecosystem instead of trashing it.

Your role for our state is to protect and preserve our unique California coastline. With this mission in hand, it is hard to justify the continued destruction of this amazing coastal landscape and community. During the closure of the OHV area due to the pandemic, the stretch of land south of Pier Avenue was a refuge for the people and the wildlife of our area. This tract of remaining coastal dunes will be continue to be used but in a respectable manner that shows our state values, not destroys it's natural resources.

On behalf of our state and future generations, please consider my plea for the preservation of the Oceano Dunes area by limiting access and halting all development and excessive human use in this area.

Sincerely,

Carly Boyd-Dovideo

Dear Chairman Padilla and Commissioners,

Please support and implement your staff's recommendations for the Oceano Dunes and amend the State Park's Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Ave. vehicle access, preserve the Snowy Plover exclosures, and leave the Oso Flaco Lake area as it is. Above all, start the clock on the phase-out of OHV activity.

The Oceano Dunes will continue to offer unique experiences such as car camping on the beach, along with walking, birding, fishing, horseback riding, and hiking the dunes; the kind of activities that characterize the healthy economies of every other beachfront community in California - with the exception of Oceano.

The economic arguments against the phase out of OHV activities were rebutted during the park's closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California's coast.

The residents of Oceano who try to walk on their own beach, with OHV activity, do so with great risk. And they are watching the coastal dunes complex – their defense against rising sea levels – being eroded away.

The unhealthy air, from foredunes denuded of vegetation by off-road vehicle activity, continues to stretch from Nipomo to Guadalupe.

All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to adequately protect the environmentally sensitive habitat. It is past time to hold them accountable now.

Sincerely,

Marjorie McShirley

**Categories:** Public Comment

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Carla Compton

**Subject:** Public Works Plan and Environmental Impact Report.

**Categories:** Public Comment

Hello:

Regarding the draft Public Works Plan and Environmental Impact Report:

In my opinion:

- 1) It is not consistent with the Coastal Act and the Grover Beach and San Luis Obispo County Local Coastal Plans, which are the standard of review for the Public Works Plan.
- 2) The draft PWP does not address the multiple issues and impacts associated with the use and intensity of use in the Park. Degrading of habitat, harming protected and native species, causing air quality and public health problems, and ignoring Tribal Rights and Environmental Justice Rights, are not OK.
- 3) The draft PWP/EIR barely mentions the air pollution created by its present operations. Then it goes on to double the size of the riding area and brings the air pollution closer to Mesa residents.
- 4) It proposes to develop the Oso Flaco Lake area. which would be devastating to the presently protected wildlife and plant life found there.
- 5) It proposes a HUGE development at the Phillips 66 refinery site that would create more air pollution, noise, traffic, and light pollution in what is presently environmentally sensitive habitat area.

Thank you!

**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Public Comment, Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Dear Coastal Commission,

I've always believed that your job is to protect our remaining beach and sand habitat along our beautiful coastline. PLEASE, I beg you to stop the custom of driving motor vehicles on our shores! The tiny living creatures and especially the remaining birds that depend upon those shores are depending upon you and your knowledge of all things nature! Your job is NOT to promote and provide the general public with more places to drive their vehicles, but it is to protect our shorelines for future generations - including your own children and grandchildren. Your commission is the key to all that remains!

Let me know how I can help,  
Carolyn Noble

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

**Sent:** Wednesday, February 24, 2021 4:56 PM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Oceano Dunes State Parks Proposal

**Categories:** Public Comment

Dear Coastal Commissioners,

I strongly oppose the State Parks “plans” for Oceano Dunes. The State Parks' proposal makes mockery of the Coastal Commission’s Mission: ***“protecting and enhancing California’s coast and ocean for present and future generations. It does so through careful planning and regulation of environmentally-sustainable development, rigorous use of science, strong public participation, education, and effective intergovernmental coordination”***.

I realize that the tradition of riding on the dunes started long ago with a few people riding in homemade lightweight sand buggies. That relatively harmless activity has been transformed over the years with an ATV industry and cult built around it. These vehicles and their owners reshape nature’s work with heavy vehicles designed to damage the dunes, despoil the flora and fauna of the dunes, contribute noise and air pollution and ultimately prevent the citizens of Oceano and the surrounding area from enjoying their beach.

Please give Oceano’s citizens the ability to enjoy their own beach and prosper from less damaging forms of recreation (picnicking, camping, walking, playing in the surf, etc.). There is no California city or town with a beach that does not prosper financially from “normal” beach tourism. Make Oceano Dunes a real park that is compatible with the Coastal Commission’s Mission.

There is hardly an idea or a concept laid out in the State Parks’ “plan” that is not a contradiction to the Commission's Mission. I hope that you all had a chance to visit the Dunes and/or Oso Flaco and the beach fronting them this summer when there were no vehicles on the beach or roaring across the dunes...just people walking, biking, surf fishing and riding horses. Enjoying the beauty of nature. If you did visit, you can imagine the difference between what you saw then and what State Parks is now proposing.

It is time to say a firm “NO” to the State Parks’ environmentally damaging and self aggrandizing proposal(s) and come up with a plan to phase out off-roading on the Dunes. Please execute fully the Commission’s Mission: ***“protecting and enhancing California’s coast and ocean for present and future generations. It does so through careful planning and regulation of environmentally-sustainable development, rigorous use of science, strong public participation, education, and effective intergovernmental coordination”*** in regard to Oceano Dunes.

Thank you,  
Rosemary Remacle  
Nipomo, CA

**Sent:** Wednesday, February 24, 2021 4:43 PM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

**Categories:** Public Comment

Coastal Commissioners,

We all rely on you to help protect our unique coastline for the future, and act decisively when we become aware of activities or proposed changes that will erode and destroy this limited resource.

I first learned about the Oceano Dunes State Recreational Vehicle Area in the 1980's, I was surprised a significant portion of the coastline seemed designated for destruction, allowing any and all vehicles to actively "tear it up" on a constant basis. The concept seemed irresponsible and outdated to me at that time and I naively assumed the process would gradually "go away", since it appeared the public was learning more about our human impact on nature and the horrific consequences of unchecked abuse to our planet and its inhabitants, including ourselves.

In 2021 I now find myself retired and newly residing in Shell Beach. On a regular basis I receive weather alerts advising of unhealthy air quality in Pismo, Oceano, Nipomo and the Mesa from dust spreading from the ODSRVA. From my deck I daily see "smog" over the areas south of me, appearing to stretch inland from the dunes across the Five Cities area. It is a disturbing sight for an area with little industry and such a small population. The future does not bode well if this activity continues unrestrained.

My husband and I regularly walk Pismo Beach for health and recreation, but find it too unsafe and unpleasant to venture south past Grand Ave, due to the abundance and often irresponsible use of vehicles on the beach on the ODSRVA. Over the years we have continually learned in news reports of violent and often fatal collisions on the dunes. Our few forays into the "drive on beach" area have left us disturbed and saddened about the abuse of this land. Reports of activities on the dunes reflect little concern for the land or the local communities, along with unfettered destruction for pleasure and profit.

I understand the folks who ride their vehicles over the dunes enjoy that activity and do not want to see it end, but there must be other areas in California with land that is already in disrepair and possibly unfit for other uses, which could be refurbished for such use and could be better situated to allow such an activity with less terrestrial, human and wildlife fallout. And if this activity is popular and financially viable, other privately owned off roading areas in the state will likely spring up to fill any void.

I also understand the local recreation businesses and State Parks may rely on income from the dunes to help them financially. However destruction for profit has always proven to be short sighted and detrimental in numerous and often irreversible ways. Encouraging protection of the Dunes or movement toward it becoming an eco-friendly recreation destination, with adequate protections for the land, its history and its wildlife, may not be the path of least resistance, but it will definitely be the path of greatest benefit long term to all, but especially for this precious coast.

Your mission statement, "The Commission is committed to protecting and enhancing California's coast and ocean for present and future generations.." certainly suggests that in this instance you will act to protect, enhance and preserve this coastal treasure for now and for the future, and I sincerely hope you will.

Thank you for your hard work protecting the future of our coast,

Susan Garman

**Categories:** Public Comment, Oppose Staff Recommendation

Hello to all,

I am writing on behalf of myself, Raiza Giorgi, a resident of Buellton, and former resident of Grover Beach. I lived in GB from 2006-2008 while attending Cal Poly and lived six blocks from the entrance of the dunes.

I think you really need to use caution and think about the ripple effects of closing the dunes to any less capacity it was before the COVID closures. A few accidents over the span of decades should not hasten any decision to close or further restrict access to this invaluable area. For example, Yosemite National Park does not close when there are accidental deaths due to climber mistakes or bear attacks or lost hikers, they continue to operate the park because it is not only a wonder that people enjoy, it bring recreation and a way to connect with nature, as well as stimulate the economy on a local to state level. I think the same can be made with the dunes. People should be free and able to take that risk of operating a dangerous vehicle on the beach and or dunes, they make that decision everyday just by getting into their cars to come to the coast.

As a former resident of GB I knew when summer hit as the line of RV's and toy haulers were waiting eagerly to get onto the beach. With all of these people coming from around the state to enjoy this unique recreation, they are not only funding the park's budget they are funding the local economy.

The travelers patron local restaurants, shops, other attractions, go wine tasting in Pismo or San Luis, enjoy ice cream and clam chowder on the Pier and keep the local business owners afloat by buying trinkets and keepsakes. It also comes to the Santa Ynez Valley as people who like to stay in Pismo and then come to the valley for wine tasting, horseback riding and other area attractions.

They purchase gas and stay in local hotels as well which contributes to TOT and sales tax revenue for the cities of Grover Beach, Arroyo Grande, Pismo Beach, Shell Beach, Oceano, Nipomo and San Luis Obispo.

By taking away or severely limiting access to this gem of a place you are not only hurting recreation (which is what a park is supposed to provide) you are taking away established business and tax revenue for the community, and I will go as far as saying at a state level as well because people from all around the world come to ride vehicles on the Oceano Dunes. I don't think you want to be responsible for the demise of a thriving area.

If you think about who uses ATV's and UTV's they are mostly families that come to spend several days making memories and having a fun time. These families that own recreational vehicles are of a certain stature and have discretionary income to spend.

Even those that don't have their own vehicles they rent from the local ATV rental shops and spend several hundred dollars on a few hours. You don't want to chase that business away, because if they don't spend their dollars here, where will they go?

I have many wonderful memories of going to the Dunes and riding quads, being with friends and family and I hate to think my children won't be able to experience such a unique place.

As far as the dust issue regardless of the recreational vehicles there will continue to be dust particles in the air. Beach ecology especially dunes are constantly moving and shifting with the wind. \_\_\_\_\_

**Sent:** Wednesday, February 24, 2021 4:16 PM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

DEAN OWENS

What do all the beach towns up and down the California coast know...they know that their coastal communities prosper when they promote their beaches as the lynchpin for tourism than catering to the destructive impacts of off roaders.

Let's refrain the lyrics from "yellow taxi".....

Dear California Coastal Commission,

The Snowy Plover is THREATENED. It kills me to think that you wouldn't want to protect these birds. Humans have done a great job at destroying the planet and the animals who do NOT have a say.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Annette McCall

**Subject:** Protect the Oceano Dunes

**Categories:** Public Comment

Dear Chairman Padilla and Commissioners,

Please support and implement your staff's recommendations for the Oceano Dunes, and amend the State Park's Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Ave. vehicle access, preserve the snowy plover exclosures, and leave the Oso Flaco Lake area as it is. Above all, start the clock on the phase-out of OHV activity.

The Oceano Dunes will continue to offer unique experiences such as car camping on the beach, along with walking, birding, fishing, horseback riding, and hiking the dunes; the kind of activities that characterize the healthy economies of every other beachfront community in California - with the exception of Oceano.

Please dispense with the fears and economic arguments against doing this, which were rebutted during the park's closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California's coast.

The residents of Oceano who try to walk on their own beach, with OHV activity, do so with great risk. And they are watching the coastal dunes complex – their defense against rising sea levels – being eroded away.

The unhealthy air, from foredunes denuded of vegetation by off-road vehicle activity, continues to stretch from Nipomo to Guadalupe.

All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to adequately protect the environmentally sensitive habitat. It is past time to hold them accountable now.

Sincerely,

Devon Bradley, Ph.D.

Professor of Biology, Irvine Valley College

Dear Commissioners:

As a resident of Nipomo directly impacted by air quality and other important issues at the Oceano Dunes off road riding area:

Please:

1. Support for upholding the Coastal Act and San Luis Obispo County and Grover Beach Local Coastal Plans which prohibit vehicles driving in Environmentally Sensitive Habitat Areas (ESHA).
2. Support all of the staff recommendations.
3. Support for the phase out of vehicles driving in EHSA, south of Pier Avenue.
4. Support for year around protection for the threatened and endangered species found in the Oceano Dunes ESHA including California Least Tern, Western Snowy Plover, California Red-legged frog, Tidewater goby, Steelhead and others.
5. Support for the Commission's actions to bring Environmental Justice and equitable coastal access and recreation to the underserved communities in San Luis Obispo and Santa Barbara Counties as well as the rest of California.
6. Listen to Northern Chumash tribal concerns and take steps to treat their sacred sites with honor and respect.

Thank you for protecting our health when making decisions about this important matter.

Very truly yours,

Stanley H. Gitler

**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Public Comment, Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at OSDVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA. Responsible OHV users are taxpayers and deserve to have places to recreate in CA.

Sincerely,

Tim Rice

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Desiree Mitchell

Dear Chairman Padilla and Commissioners,

Please support and implement your staff's recommendations for the Oceano Dunes, and amend the State Park's Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Ave. vehicle access, preserve the snowy plover exclosures, and leave the Oso Flaco Lake area as it is. Above all, start the clock on the phase-out of OHV activity.

The Oceano Dunes will continue to offer unique experiences such as car camping on the beach, along with walking, birding, fishing, horseback riding, and hiking the dunes; the kind of activities that characterize the healthy economies of every other beachfront community in California - with the exception of Oceano.

Please dispense with the fears and economic arguments against doing this, which were rebutted during the park's closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California's coast.

The residents of Oceano who try to walk on their own beach, with OHV activity, do so with great risk. And they are watching the coastal dunes complex – their defense against rising sea levels – being eroded away.

The unhealthy air, from foredunes denuded of vegetation by off-road vehicle activity, continues to stretch from Nipomo to Guadalupe.

All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to adequately protect the environmentally sensitive habitat. It is past time to hold them accountable now.

Thank you for your time!

Sincerely,

Samantha Green

Above all, start the clock on the phase-out of OHV activity.

Of course you are receiving requests from those who want to continue riding their vehicles on the beach. But as stewards of our coast, you must consider a much bigger population: the residents whose air quality has deteriorated, the locals who cannot peacefully enjoy their own beaches, and all the environmental flora and fauna which have been harmed.

Please do not allow state parks to proceed with their plan.

Sincerely,

Dr. Lynne Breakstone

It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Matthew Gillespie

**Subject:** Grover Beach resident input to the Oceano Dunes/Pismo Beach

**Categories:** Public Comment

Hello -

We have owned a home in Grover Beach for 20 years. We were very excited when the beach closed to all vehicles during the stay-at-home order. As locals, we were finally able to enjoy the section of beach that is usually overrun with cars. Having that experience really made it clear to us how much we wished that cars, trucks and OHVs were no longer allowed on the beach.

It also became obvious how much noise pollution we hear at our house (one mile away) when the OHVs are on the beach. This is due to both the motors of the OHVs and the constant sirens from emergency vehicles heading to beach accidents.

We absolutely do not want the increased car traffic and noise if the car camping moves closer to Grover or Pismo Beach. Tourism is now all year long when it used to be seasonal so we never get a break from the increase of people and loud vehicles.

We are 100% opposed to all cars, trucks and OHVs on the beach at all times. We believe the local economy does not need to be tied to the allowance of vehicles on the beach. We believe the area could benefit to a switch to an ecotourism model instead of the ongoing destruction of our natural resources.

Sincerely,  
Shannon Orton and Richard Meyer

**Subject:** Public Comment on February 2021 Agenda Item Wednesday 6c - Legislative Report

Pismo Beach was the unspoiled paradise of a wide fine-sanded beach that it was meant to be when Covid-19 required it's closure. The bird population increased, as did the amount of people who were actually able to enjoy the beach. There were family picnics, parties, walkers, bikers, horseback riders, surfers, kite surfers etc as far as the eye could see looking south from Grand Avenue.

My husband and I have so enjoyed being able to walk the length of the beach without fear of injury or harassment, as have so many others who live in this community. We wish to stop these dangerous and polluting activities, which would NEVER be approved or tolerated anywhere else, particularly on the California coast today.

Sadly our voices are often drowned out by people who tend to shout louder and litigate more.

The mixture of vehicles on the beach, walkers, bike riders and horseback riders is not a good one

The worn out rationale for the dangerous situation which exists between Grand and Pier Avenues is that driving on the beach brings in millions of dollars. I believe this is untrue, as has been shown by recent studies.

With the closing of both entrances, Grand Avenue in Grover Beach, and Pier Avenue in Oceano the communities would benefit greatly. Property values and subsequent steady regular revenue for the cities would increase, not to mention making it a much more attractive location for a hotel and new restaurants. The long lines of idling trucks and cars and the and smell of exhaust would be replaced by clean air for pleasant outdoor dining etc.

Regarding the OHV riding in the dunes, I would bring all the same arguments to bear, while also stating that the Parks Department has had AN ABSOLUTE CONFLICT OF INTEREST, in this. It is my understanding the rangers' salaries etc are funded through these activities, which makes the idea of Pismo Beach State park rangers in any kind "caretaking" role ridiculous. This was clearly demonstrated, most recently, last Fall when they graded known snowy plover nesting areas.

The fact that the Parks Department orchestrates meetings not only in the area affected, but in the Central Valley as well is outrageous. Local taxpayers and residents are the people affected by the noise, pollution, hazardous waste dumps of oil, mountains of litter and habitat destruction.

I would also like to point out the underhanded and cynical timing of the release of The Parks Department most recent plans.

“Follow the money” is a phrase which comes to mind.

I understand that people who live not only on the Central Coast, but the majority of people who come from the central valley count this as their vacation spot, which is wonderful. Maybe an OHV riding area can be carved out of some of the Phillips Petroleum site, with it's own entrance, and boundaries. Let's provide inexpensive parking lots along highway one. The revenue could support the Parks department, after all they only charge \$5.00 per vehicle for all day at the beach. Lets build boardwalks to the beach from the parking lots to make sure everyone who wants to come and enjoy it can easily do so.

There is an opportunity for the Coastal Commission to finally put an end to this mess.

Please don't waste it.

Matthew and Elizabeth Howitt

**Categories:** Public Comment

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,

Oso Flaco lake and surrounding dune area and the prime agricultural land are protected as they should be. The Coastal Act and the Local Coastal Programs as well as the designation environmentally sensitive habitat areas ESHA ensures that this special wildlife sanctuary remain a safe haven for birds, plants, animals and nature lovers. State Parks development plan shows no understanding of this special place. If this development were to be approved by the Coastal Commission, it would be an abject failure of State. It is a terrible no good awful idea. I can't imagine why State Parks would propose such a plan which is totally against their mission statement. I hope this bad idea was only a distraction to divert the public from the real issues of sustainable use of the beach and dunes protecting the incredible resource while providing sustainable access for all people.

**Subject:** Re Oceano Dunes

**Categories:** Public Comment

Dear Chairman Padilla and Commissioners,

Please support and implement your staff's recommendations for the Oceano Dunes, and amend the State Park's Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Ave. vehicle access, preserve the snowy plover exclosures, and leave the Oso Flaco Lake area as it is. Above all, start the clock on the phase-out of OHV activity. Proposals for the "development" of Oso Flaco would destroy one of the top birding spots on the Central Coast.

The Oceano Dunes will continue to offer unique experiences such as car camping on the beach, along with walking, birding, fishing, horseback riding, and hiking the dunes; the kind of activities that characterize the healthy economies of every other beachfront community in California - with the exception of Oceano.

Please dispense with the fears and economic arguments against doing this, which were rebutted during the park's closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California's coast.

The unhealthy air, from foredunes denuded of vegetation by off-road vehicle activity, continues to stretch from Nipomo to Guadalupe.

All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to adequately protect the environmentally sensitive habitat. It is past time to hold them accountable now.

Sincerely,

Norma Wightman

**Subject:** Keep Vehicles off Oceano Dunes

Dear Director Carl,

My family had property near Los Osos; it is beautiful. I was distraught to hear a State Parks agency wants to allow off-road vehicles on the snowy plover nesting site. This would be a big mistake considering there are only 2500 plovers nesting along the whole Pacific coast despite efforts by UCSB and others to protect them. I realize the California Coastal Commission wisely advised a withdrawal of off-roading in the area. I hope it will reject any plan that further endangers an already threatened species.

Thank you,

**Categories:** Public Comment

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Natalie Grime'  
Citrus Heights, CA 95621

**Subject:** Oso Flaco Development

**Categories:** Public Comment

Dear Parks Board Members:

I am sending this email to oppose the proposed development at Oso Flaco. The sorts of impacts these incursions would have to the bird and other wildlife populations at this storied site would compromise one of the finest natural history areas in San Luis Obispo County. Certainly, this cannot be consistent with the protection of the unique features of the California coastal zone as entrusted to the California Coastal Commission. I hope that you will reconsider the sweeping plans to extend access to this area to harmful development and allow it to remain the pristine habitat that it is.

Respectfully,

Neil Polans

Santa Barbara, California

**Subject:** Protect the Oceano Dunes

**Categories:** Public Comment

Dear Chairman Padilla and Commissioners,

Please support and implement your staff's recommendations for the Oceano Dunes and amend the State Park's Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Ave. vehicle access, preserve the Snowy Plover exclosures, and leave the Oso Flaco Lake area as it is. Above all, start the clock on the phase-out of OHV activity.

The Oceano Dunes will continue to offer unique experiences such as car camping on the beach, along with walking, birding, fishing, horseback riding, and hiking the dunes; the kind of activities that characterize the healthy economies of every other beachfront community in California - with the exception of Oceano.

The economic arguments against the phase out of OHV activities were rebutted during the park's closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California's coast.

The residents of Oceano who try to walk on their own beach, with OHV activity, do so with great risk. And they are watching the coastal dunes complex – their defense against rising sea levels – being eroded away.

The unhealthy air, from foredunes denuded of vegetation by off-road vehicle activity, continues to stretch from Nipomo to Guadalupe.

All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to adequately protect the environmentally sensitive habitat. It is past time to hold them accountable now.

Sincerely,

David Levasheff  
webmaster Santa Barbara Audubon Society

February 20, 2021

Dear Coastal Commissioners, Alternates, Non-Voting members of the Commission and Staff,

As a 40 year resident of Arroyo Grande, CA, I have enjoyed the most remarkable relationship with and privileged use of Pismo State Beach and the Oso Flaco Lake area as a hiker, birder, equestrian, observer, preserver and lover of the ocean. And with the recent closure of the State Vehicular Recreation Area due to Covid-19 and the welfare of the Snowy Plover, I and many others have finally had the pleasure of enjoying this specific area of the beach without the crowds, noise, dust, trash, air pollution, artificial light, etc. that is part and parcel of the vehicular off-road use. Thus it is with optimism and hope that I submit my comments regarding the State Parks' Public Works Master Plan for this area and my concern that if this plan goes forward as envisioned, every human (other than the off-road enthusiast), every bird, special plant species, and diverse wildlife will suffer permanently from its implementation.

#### Pismo State Beach Plan

Because this area serves as the hub for the general population's access to the beach, improvements identified in the plan appear to address many long-standing needs, including upgrades to entry kiosks, lifeguard stands, the boardwalk, campgrounds, the Monarch butterfly habitat, overall access for people with disabilities, and equestrian and hiking trails.

However, the Plan continues to ignore the need for a ***staging area for equestrian use***, a critical component for equestrians to access the beach and dune trails.

#### Oceano Dunes State Vehicular Recreation Area

Maybe someday State Parks will realize that money from off-road vehicle use isn't the be-all-to-end-all and that if those funds should happen to go away, an entirely different and environmentally conscious source of revenue should and will replace it. ***It is my hope that off-road vehicle use will be removed permanently from the whole of Pismo Beach and Oceano Dunes Recreation areas.*** However, since this dream seems remote, I submit the following:

1. The Plan should do more to limit the number of off-road vehicles permitted to use the area on a daily basis, including limiting the number of campsites. The proposed use remains too dense.
2. The Plan fails to intelligently address the sensitive habitat of the Snowy Plover by assuming that the Snowy Plover wants only to nest in the areas designated by State Parks. I think this past nesting season proved otherwise. When vehicles were removed, the bird was found throughout the off-road vehicle area (except where State Parks meddled with their nests).

#### Oso Flaco Lake Plan

The Oso Flaco Lake area is one of the most beautiful, peaceful, pristine, serene places in the whole of California and beyond. ***Proposed elements that would enhance the current and existing uses surrounding the lake, the dunes and the beach area are appropriate.*** These

include specific improvements that continue to promote human hiking (trails), birding, picnicking and fishing, preserving the environmentally sensitive habitat for migratory birds and special status plant species, and the continuation of agricultural farming practices on prime agricultural land. All of these activities contribute to rather than harm the unique character of Oso Flaco Lake.

The Oso Flaco Plan as proposed is plainly a BAD Plan for the following reasons:

1. It would turn this beautiful, natural area into a noisy hub of commercial and recreational vehicle activity by illogically converting 120 acres of prime agricultural and sensitive dune land into a shocking and shameful number of camping sites, cabins, RV sites, parking spaces, group event areas, access trails for OHV use (and more), which ultimately require the addition of infrastructure for support (sewage disposal, maintenance area, concessionaire facilities, residence quarters, major renovations to the access road and railroad crossing, etc.). It defies common sense that this area should ever be considered an appropriate location for a major development that principally serves off-road vehicle use.
2. It is BAD for Wildlife. This environmentally sensitive area provides habitat for many mammals and migratory birds, especially the Least Tern and the Snowy Plover, and many other water birds too numerous to name here. Additionally, it is habitat for special status plant species that are unique to the area and fragile.
3. It gravely impacts the nature of the uses for the people who frequent the area on a regular basis, particularly, the residents of Santa Maria and Guadalupe, birders, hikers, fishermen, school groups, nature groups, etc. who prefer this tranquil environment.
4. The Oso Flaco Lake area is just north and adjacent to a designated Wildlife Refuge, which, by law, must be protected. The plan fails to protect much of anything!
5. Unlike Pismo Beach, where large numbers of people actually spend time in the water necessitating lifeguards and a tower, this is not the case with Oso Flaco beach. In all the many, many times I have visited Oso Flaco, I have yet to see anyone playing or swimming in the ocean. The waves are rough, deep and hazardous and the beach rugged and natural. People will play in the creek, but not the ocean. A lifeguard tower and lifeguards at Oso Flaco beach are not practical or necessary.
6. The proposed Plan has received strenuous opposition from many individuals and groups, including the Audubon Society, Oceano Beach Community Association, Northern Chumash Tribal Council, Surfriders Foundation, Sierra Club, Nature Conservancy and more. ***State Parks has been anything but reflective of this input.***
7. As required by CEQA, this Plan does not sufficiently identify the environmental impacts to the Oso Flaco region.
8. Lastly, the Plan does not comply with the CA Coastal Act, specifically:
  - a) Section 30240(a) which states that environmentally sensitive habitat areas shall be protected and only uses dependent on those resources shall be allowed.

- b) Section 30240(b) which states that development in areas adjacent to environmentally sensitive habitat shall...prevent impacts that would degrade those areas and must be compatible.
- c. Section 30241 which specifically preserves prime agricultural land and minimizes conflict between ag and other uses.

Phillips 66 Property Site Development

Development of this site as envisioned in the Conceptual Plan is equally as perverse as the Oso Flaco Lake Plan for many of the same reasons. And because implementation of such a plan appears far in the future due to environmental contamination, costs, logistics, etc. I will hold my comments until such time that they are relevant. However, I do want to say that the idea of having 75 equestrian campsites in an area that has 200 campsites, 20 cabins, 50 tents, pro-tracks, youth tracks, OHV parking and people, OHV rental, etc. is ludicrous. Equestrians ride Pismo Beach and its associated dune trails because it is beautiful, quiet, and safe. We specifically stay away from the OHV area because it is loud, unsafe, not relaxing, not enjoyable, and entirely undesirable to be anywhere near off-road vehicles.

Recommendation:

1. Reject the State Parks Public Works Development Plan for the SVRA, particularly as it pertains to the Oso Flaco Lake region.
2. Consider the permanent removal of all OHV use on Pismo State Beach and the SVRA, which, in essence, renders the Phillips 66 Property Conceptual Plan a non-starter.

I thank you for your time and effort.

Respectfully submitted,

**Subject:** DRAFT PWP/EIR OSO FLACO LAKE "IMPROVEMENT PROJECT"

**Follow Up Flag:** Flag for follow up  
**Flag Status:** Completed

**Categories:** Public Comment

Dear Chairman Padilla and Commissioners,

### DRAFT PWP/EIR OSO FLACO LAKE "IMPROVEMENT PROJECT"

This proposed project is a flagrant disregard for all that State Parks stand for: protecting and conserving our natural resources, including plants, animals, and habitat, as well as cultural and historic resources. Oso Flaco Lake and the area around it is the most sensitive and valuable natural eco-region in California. The California Coastal Commission has designated the land around Oso Flaco Lake as an "environmentally sensitive habitat area" and therefore "shall be protected against any significant disruption of habitat values". NOTHING IN THE PROPOSED DRAFT PWP/EIR OSO FLACO LAKE "IMPROVEMENT PROJECT" IS ACTUALLY PLANNED to protect against significant disruption of habitat values. It would be a total desecration of this rich natural environment and prime agriculture land.

**I DEEPLY OPPOSE THE DRAFT PWP/EIR OSO FLACO LAKE "IMPROVEMENT PROJECT"!**

### CALIFORNIA STATE PARKS ODSVRA

The Mission of California State Parks is "To provide for the health, inspiration, and education of the people of California by helping preserve the state's extraordinary biological diversity, protect its most valued natural and cultural resources, and create opportunities for high-quality outdoor recreation."

Nothing in the California state Parks ODSVRA supports this mission, with one exception – developing low-cost, low-impact camping for broad public use along the Central Coast in an area that does not require the conversion of prime agriculture land, or the degradation of an extremely sensitive, rare, and important natural environment.

Therefore, **I ABSOLUTELY OPPOSE THIS PLAN**, especially continuing to permit off-road vehicles on any part of the beach or dunes. California State parks has been in non-compliance long enough and the pollution and environmental degradation continue to increase. **PLEASE, GET OHV'S OFF THE BEACH AND DUNES NOW.**

**I SUPPORT THE CALIFORNIA COASTAL COMMISSION STAFF REPORT DATE 2/16/2021.**

**Thank you,**

**Subject:** Protect the Oceano Dunes

**Categories:** Public Comment

Dear Chairman Padilla and Commissioners,

Please support and implement your staff's recommendations for the Oceano Dunes, and amend the State Park's Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Ave. vehicle access, preserve the **snowy plover** exclosures, and leave the **Oso Flaco Lake** area as it is. Above all, start the clock on the phase-out of OHV activity.

The Oceano Dunes will continue to offer unique experiences such as car camping on the beach, along with walking, birding, fishing, horseback riding, and hiking the dunes; the kind of activities that characterize the healthy economies of every other beachfront community in California - with the exception of Oceano.

Please dispense with the fears and economic arguments against doing this, which were rebutted during the park's closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California's coast.

The residents of Oceano who try to walk on their own beach, with OHV activity, do so with great risk. And they are watching the coastal dunes complex – their defense against rising sea levels – being eroded away.

The unhealthy air, from foredunes denuded of vegetation by off-road vehicle activity, continues to stretch from Nipomo to Guadalupe.

All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to adequately protect the environmentally sensitive habitat. It is past time to hold them accountable now.

Sincerely,

Julie Clark MD

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
John Miller

**Subject:** Oceano Dunes and Osos Flaco—March 18 meeting

**Categories:** Public Comment

Please support your staff recommendations to phase out motorized use at Oceano and reject the proposed motorized campground at Oso Flaco. This ecosystem is precious and rare. It is one of the crown jewels of the central coast for birding. Motorized use, especially by fast, noisy, ORVs is completely incompatible with this area. The state parks department has taken the completely wrong position here, and the Coastal Commission should not go along with it.

Thank you for listening.

Rick Derevan

**Sent:** Tuesday, February 23, 2021 9:22 PM  
**To:** OceanoDunesReview@Coastal  
**Subject:** OHV are not compatible with ESHA

**Categories:** Public Comment

We have waited long enough for CA State Parks to produce an environmentally acceptable management plan for the Oceano Dunes State Vehicular Recreation Area (ODSVRA).

The Oceano Dunes, part of the larger Guadalupe-Nipomo Dunes Complex, is the largest such intact coastal dunes system in the world and a federally designated Natural Landmark.

OHV are not compatible with the protection of a fragile coastal dunes complex, threatened species, and environmentally sensitive habitat areas (ESHA). For these reasons, and more, OHV must be phased out at the Oceano Dunes in favor of low-impact recreational uses.

Should nature have standing what can be owned and who can do the owning? What conveys are right and why should humans alone and all the planet have them?

Sincerely,  
Carolyn Phares

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Chris Byrd

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

There are already vast acreages that have been sacrificed to the off-road enthusiasts. They tear up the environment, pollute it with their trash and exhaust, and continue our dependency on fossil fuels. Why we should allow them to despoil the limited breeding habitat of already threatened species is a complete mystery to me. Please heed the California Coastal Commission's ruling and put a stop to off-roading at Oceano Dunes State Park.

Sincerely,  
Bruce Aird  
Lake Forest, CA 92630

Americans for Responsible Recreational Access

February 22, 2021

California State Parks  
Strategic Planning and Recreation Services Division  
1725 23rd Street, Suite 200  
Sacramento, CA 95816

**RE: Draft Public Works Plan (PWP) and associated Draft Environmental Impact Report (EIR) for Pismo State Beach and Oceano Dunes State Vehicular Recreation Area (SVRA).**

Dear Planning Team:

Americans for Responsible Recreational Access (ARRA) works to ensure that Americans are not arbitrarily denied the right to responsibly experience and enjoy the public lands that belong to the United States' citizens. The diverse members of ARRA have joined together to provide input on decisions regarding land use designation, recreation opportunities, and preservation. ARRA members seek responsible consideration of competing activities, which are based on sound environmental principles.

ARRA has reviewed the Draft Public Works Plan (PWP), and Draft Environmental Impact Report (EIR) for Pismo State Beach and Oceano Dunes State Vehicular Recreation Area (SVRA) released on December 31, 2020. While the draft PWP provides limited meaningful OHV enhancements, we have significant concerns about several provisions that could end access to the park for hundreds of thousands of individuals. If implemented as drafted, the proposed PWP would create considerable adverse economic impact and negatively affect the off-highway vehicle recreation community. Within the PWP the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes possible purchase of the Phillips 66 refinery property and construction of new camping, OHV staging, and day-use facilities near the South Entrance, which is close to a

residential area whose residents have voiced strong objections to any OHV use (p. 53 of the PWP).

- Proposes to conduct an “independently peer-reviewed carrying capacity study” to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

ARRA supports safe and responsible recreation management and resource protection by working in partnership with public land managers and recreation planners. We understand that environmental reviews are necessary, but the PWP as drafted favors eliminating off-highway vehicle recreation for people to gather and enjoy beach camping and OHV use. Furthermore, banning access and rentals will severely impact local businesses, restaurants, hotels, gas stations, vehicle service stations, and grocery stores.

Americans' lives and communities have changed dramatically in recent months. As schools, businesses, shops, and more temporarily close and reopen due to COVID-19, Americans have flocked to the outdoors to provide a necessary reprieve from the intense mental and physical stress caused by this crisis. We are confident we can find common ground with a goal of both protecting open sand resources and providing a high-quality outdoor experience for tourists and OHV enthusiasts from around the world who visit Oceano Dunes SVRA.

ARRA requests that the provisions outlined above be eliminated from the PWP and appreciates the consideration of our comments.

Respectfully submitted:

Americans for Responsible Recreational Access (ARRA)

**From:** Ron Sobchik [ron.sobchik@gmail.com]  
**Sent:** Tuesday, February 23, 2021 5:52 PM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Public Comment, Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Ron Sobchik

Please do not allow CA State Parks to go forward with their plans at the Oso Flaco Lake area with campgrounds, staff housing, increased parking, road widening, etc. This is a fragile area and a state treasure which should be protected from further development, not "improved" in the manner that State Parks envisions. The peaceful, non consumptive use of this area is enjoyed by area residents and others and should remain as it is. It is a very important bird and wildlife area, which would be destroyed by the proposed plan.

We further support the Coastal Commission's recommendation that OHV use be phased out in the neighboring Oceano Dunes. This area is a very sensitive and important coastal ecosystem and should not be sacrificed to a few OHV enthusiasts just because this degradation of the environment has gone on for so many years. It is time to stop it now.

Thank you for your attention to this matter.

**Categories:** Public Comment

We have now lived in Oceano for 5 years. Up until the Pandemic, when vehicles were prohibited from going onto the beach, our experience of taking time to walk on the beach was basically negative. Factors:

1. Noise of vehicles
2. Speed of vehicles
3. Smell of vehicles
4. Not infrequent drivers doing stunts, like wheelies, fishtails, etc.
5. Uncertainty of whether drivers were paying attention to beachwalkers

Since the restrictions, we have seen:

1. More surfers
2. More people walking as couples and groups
3. A more peaceful and friendly environment

There is less noise, smell and the dunes are looking like they are returning to a more natural state. But in even partially lifting the ban, the negatives are quickly returning.

There are so many natural and entertainment possibilities if the dunes are honored as a natural resource than a place to tear up to demonstrate how cool it is to catch air over a dune.

Plus, beyond the well documented environmental degradation and harm to plant and animal life, consider the frequency of accidents and hospitalizations as a result of erratic thrill seekers who don't look at the ocean, the birds, the flora and fauna, just their speed and whether they can beat the guy next to them.

Off-road vehicle activity destroys a myriad of opportunities that will enhance our environment and bring new possibilities to those whose crafts and skills can make this area a destination for far more families and friends than the off-road community.

Please look past the short term advantages of allowing a small segment of the community of Oceano and SLO county to exert muscle and limited reason to get their way.

Sincerely,  
Robert Sachs  
Oceano Resident

Hi,

I'm a fairly new resident of the central coast. I'm amazed and saddened that vehicles are allowed to drive on the beaches and sand dunes. I understand that a vote is coming up as to the phase-out of vehicle use on the beach. I encourage you to vote in favor of removing motor vehicles from the beaches here in Oceano and along the coast.

I heard that vehicle use on the beach makes the park service a fair amount of money. Every person I know who lives around here hates the cars on the beach and I'm sure any/all would easily agree to pay a small increase in property tax or city taxes to offset the loss.

One of my brothers put it exactly right I think when I told him that cars are still allowed on the beaches. He said, 'It sounds like some weird hobby from the 1950s'.

Thanks,

Kevin

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
August Andrews

Hello,

we are begging that you not reduce, but expand OHV use and Oceano SVRA OHV. we our proud OHV campers who rely on this local activity as a safe physical distance activity for our family.

The Porras Family are members of the American Sand Association. I visit the Oceano Dunes SVRA to recreate with my OHV. I oppose staff's recommendation to phase out OHV use at the SVRA over the next 5 years. In fact, I oppose any attempt by the Coastal Commission to shut down OHV use at the park. I do not believe the Coastal Commission has the legal authority to take such a radical action, especially since OHV use at Oceano predates the Coastal Act and the Coastal Commission. Therefore, I would request that the Commission reject staff's recommendation.

I am writing to voice my concern regarding the The California Coastal Commission staff recommendation that the California Coastal Commission (CCC) phase out all OHV use at Oceano Dunes SVRA over the next five years. I do not agree with this recommendation, and propose that ODSVRA open for OHV recreation immediately.

Oceano Dunes SVRA was purchased with Green Sticker Trust Fund money for the purpose of promoting OHV recreation and preserving these OHV areas for future generations.

The Oceano Dunes SVRA provides a major economic benefit to the local businesses and residents and the dunes also offer a unique recreational experience that provides access to coastal recreation for millions of Californians.

The Oceano Dunes SVRA itself generates more than \$150 Million dollars a year in economic activity from outside visitors. It is a major contributor to the SLO County's tourism industry that has already been hit hard by the COVID19 lock down.

Right now, the future of the dunes has been based solely on environmental concerns, the fiscal impact of closing the Oceano Dunes SVRA has not been given equal consideration. Both of these issues must be addressed before making any decision to close the Oceano Dunes SVRA.

Since the Oceano Dunes is now closed due to Covid19 restrictions, there has been zero OHV activity or vehicle access to the dunes for months. But the dust emissions are much worse now. The CDF site exceedances have doubled to 12 and the Nipomo-Guadalupe Road site exceedances have nearly quadrupled to 11. I encourage the CCC to take into consideration the new data and take a good look into the results and findings of the Scripps Institute study.

The Coastal Commission is overreaching their authority with the issuance of a Cease and Desist Order to CLOSE the Oceano Dunes SVRA. This seems to be is a clear violation of their own regulations.

The Coastal Commission is supposed to protect public access, but this latest attempt to remove OHV access from the Oceano Dunes SVRA proves that the California Coastal Commission staff at least believes its only access for some Californians.

NOT the millions of Californians that enjoy OHV Recreation.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
guillermo bermudez

**To:** OceanoDunesReview@Coastal  
**Subject:** Please!! Save Oceano Dunes & Oso Flaco Lake!

**Categories:** Public Comment

Dear Chairman Padilla and Commissioners,

Please support and implement your staff's recommendations for the Oceano Dunes, and amend the State Park's Coastal Development Permit to: ban night riding and driving across Arroyo Grande Creek; close the Pier Ave. vehicle access; preserve the snowy plover exclosures; and leave the Oso Flaco Lake area as it is.

### **Immediately start the clock on the phase-out of OHV activity.**

I support offering unique experiences such as car camping on the beach, along with walking, birding, fishing, horseback riding, and hiking the dunes; the kind of activities that characterize the healthy economies of every other beachfront community in California - with the exception of Oceano.

The fears and economic arguments against doing this, were rebutted during the park's closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California's coast.

The residents of Oceano try to walk on their own beach, with great risk because of the OHV activity. And they are watching the coastal dunes complex – their defense against rising sea levels – being eroded away.

*The unhealthy air from the foredunes, which is denuded of vegetation by off-road vehicle activity, continues to stretch from Nipomo to Guadalupe. This is unacceptable!*

All of this is environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to adequately protect the environmentally sensitive habitat. It is past time to hold them accountable now.

Thank You,

*Gail Cheda  
San Luis Obispo, CA*

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Gwen Richardson  
Los Angeles, CA 90039

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. Hello,

We are writing to support the closure of the Off-Highway Vehicle Recreation area at Oceano Dunes within five years (or less!). It really is inconceivable that this is still open, due to the noise, pollution, deaths and environmental degradation.

That area should be restored to its natural habitat and made available for use by all Californians as a peaceful place to recreate --- like every other beach in the state.

Thank you very much.

Hello Commissioners,

As an RN who worked with patients with lung disease in the intensive care unit, I understand the need for clean air, without the fine particulate matter that has plagued the area east of Oceano dunes for decades. I get texts from the San Luis Obispo County Air Pollution Control District, and I started keeping those to see the extent that we are in jeopardy regarding clean air. So far this month we've had 5 notifications of blowing dust on the Nipomo Mesa. Prior to February we had 104 incidences, and that is only since September 17, 2019 when I began keeping these text. At times, Nipomo has had the worst air IN THE COUNTRY!!

As I see it, we need dune restoration so native vegetation species would again be able to grow and be restored. The impact on snowy plovers would be lessened; they could find nesting sites that would enable the population to again expand. The State Parks employees have moved nests in the last 6-10 months, which is NOT in compliance with the directives set last year for dune restoration!

I believe the State Park's plan to EXPAND rather than modify camping and eliminate OHV use is detrimental to the overall use of the local dunes. The proposed plan includes such items as a weapons range and a Pro-OHV riding area and negatively impacts the environmentally sensitive habitat area of pristine Oso Flaco. Not only would their plan worsen our air quality, but we would then also have increased noise pollution and destruction of even more habitat at Oso Flaco.

My family loves to hike the board walk trail to the Oso Flaco beach, and this lovely area would be devastated by more use. It would no longer be the peaceful experience that we have loved.

The Commission should insist on non-invasive recreational uses of the Park to be in compliance with the Coastal Act. State Parks have not mitigated the destruction of the dunes as they were directed to do within the last many years.

It is time to act to preserve our air, protect the environment for sensitive species, and allow for other recreational uses that don't destroy this beautiful area.

Respectively, and with fond hopes of corrective changes in use of Oceano Dunes and Oso Flaco,

Toni Morris

California Coastal Commissioners  
725 Front St. Suite 300  
Santa Cruz, CA. 95060

RECEIVED

FEB 23 2021

CALIFORNIA  
COASTAL COMMISSION  
CENTRAL COAST AREA

Dear Sir or Madam,

As a homeowner upon the Nipomo Mesa, I am writing to ask you to deny State Parks approval of their latest flawed Public Works Plan for Oso Flaco. This PWP would ruin this quiet, natural retreat we locals use for fishing, ocean access, exercise and birdwatching. I enjoy this lovely haven 1-2x/month.

The coastal zone of Oso Flaco was designated by your own Commission an "Environmentally Sensitive Habitat Area". Yet, the State plan for this legally protected habitat is to be ravaged by hundreds of campers, cars and OHV's. The anachronistic, exhaust-spewing "sport" of OHV riding harms our environment, people's lungs, and worsens global warming. Why our SLO Grand Jury estimates 5800 emergency calls annually for this dangerous free-for-all sport, not to forget the multiple deaths annually (at least 42 dead: 1992-2019 SLO Tribune) Don't we know better than this? And State Parks wants to *expand* it into Oso Flaco?

Your Commission permitted this peculiarly pernicious activity in this sensitive habitat for 39 long years. There already exist 8 other State Parks for offroading. And now the scofflaw agency, State Parks, brazenly asks to enlarge the area of destruction through and beyond Oso Flaco. So how many more years, decades, should this misuse continue with the Coastal Commission's permission?

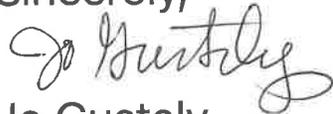

Oso Flaco, our perfect, quiet oasis of natural lakes with its hand-crafted wheelchair-adapted path to the ocean, *must* be spared.

Sections 30001.5 (a), (b), (c), in the Coastal Act charges you, the Coastal Commission, to "protect, maintain, enhance" the quality of the environment and its natural resources. It also mandates you to " prevent and protect from destruction" the coastal zone. And California's Environmental Quality Act directs *you* and other State offices to plan for a carbon-neutral future by 2050: a mere 29 years away! So denying State Parks PWP for Oso Flaco, and directing them to transition their management of the coastal OHV areas to non vehicular access will protect our sensitive coastal habitats for decades to come. I know more coastal camping areas are needed, and know areas to the north: former Phillips refinery land, and former nuclear power plant area, are far more appropriate for coastal access for camping.

Will you please take this opportunity to protect this delicate ecosystem, by denying State Parks their PWP & then, revoking their 39 year old OHV permit?

Thank you for considering my input.

Sincerely,

Jo Gustely

1843 Nathan Way

FEB 23 2021

CALIFORNIA  
COASTAL COMMISSION  
CENTRAL COAST AREA

Dear Coastal Commissioners,

I understand that you are seeking public comment to re-imagine the use of the Oceano Dunes and Oso Flaco from San Luis Obispo County residents. I am an elementary school teacher at CL Smith Elementary School in San Luis Obispo and have taught at Oceano Elementary School. I am also a mother of 2 children, a 15 year-old and 12 year-old.

I am writing to emphasize the importance of re-imagining this space for three reasons. The first is to protect habitat and minimize carbon production to slow climate change. The second is to provide access to nature and recreation for our community and for visitors. The third is to advocate for the underserved primarily latinx Oceano neighborhood who should have the right to access their local beach without fearing being threatened or hit by off-road vehicles.

It is exciting to think of the possibilities of this beautiful place. The following ideas would attract tourists who appreciate and want to preserve this unique habitat. I also feel that these changes will be an economic benefit to the South County as a more diverse population feels safe on the beach in Oceano. Local campgrounds, hotels, restaurants, and other local tourist industry will thrive even more.

Here is my vision:

1. As we work to eliminate fossil fuel combustion engines, ELIMINATE driving on the beach.
2. Expand all of the free-to-the-public activities that people, animals, and plants naturally do at the beach!! It's the beach! And when there aren't scary, dangerous trucks zooming all over, it is a beautiful place where we all thrive! People of all economic, political, religious, and racial/ethnic backgrounds have a place at the beach. Our family goes to Pismo Beach almost every weekend and I love the diversity of people and activities there! Expanding the walkers, babies, children, surfers, runners, athletes, kite flyers, and people seeking rest and nature would be a huge and relatively cheap improvement over the polluting dangerous vehicles that exclude all of the rest of us. I resent that I pay taxes to pay for destructive vehicles that deny access to the people who live in the Oceano community and in our County.
3. To promote healthy lifestyles, construct a bike path/handicap accessible path that connects Pismo Pier to Oso Flaco. It could connect to campgrounds and have inroads and bike-parking stations at Grand Avenue to promote local businesses in that area. Families in Nipomo and Guadalupe could bike to Pismo for day trips...and vice-versa!

4. Expand the Monarch Butterfly over-wintering site and ensure that there is more protected habitat for butterflies up and down the coast. As you likely know, western monarch butterflies are nearing extinction. The numbers this year are disturbingly low.
5. Protect more snowy plover habitat.
6. Have beach volleyball, sand soccer, ultimate frisbee, and other sport camps and tournaments on the beach through South County Parks and Rec programs.
7. Have a designated area for unleashed dogs to play. (Our border collie loves to play frisbee.)

Thank you for seeking our input on this very important matter. I know that I speak for many people who don't have the time or energy to write to you. I also speak for the endangered species and open space.

I hope that our voices are heard and that our State Parks makes a decision that puts us on the right side of history.

Thank you!

Elizabeth Aebischer

CENTRAL COAST AREA

Dear Coastal Commissioners,

I am aware that you are taking new ideas to improve the beaches of Oceano Dunes and Oso Flaco. I am a student at San Luis Obispo High School, and I am one of many who love going to the beach to play volleyball, surf, and run. I am writing to advocate for our environment, the conservation of our beach's habitat, and for a beach that includes everyone.

When I envision Oceano beach, I don't picture trucks and 4 by 4's driving on it, emitting more fossil fuels into this delicate environment. As a member of the youth, I am especially concerned about global warming, and I believe that we need to start changing our habits now, and not later.

As you know, the monarch's overwintering site is next to the Oceano Dunes. They are just one of many endangered species that rely on the conservation of these beaches for their habitat. As leaders in this community, you have the power to protect these animals. Your decision can set an example of how counties can be mindful of the environment, and can be inclusive of all populations.

Trucks and cars push away the diversity in the populations of people who have access to it. I understand that you are concerned about attracting more tourists, but the group of people who are attracted to shooting ranges and off road driving only includes people with off road vehicles and the money to rent them. Lots of people travel on plane to visit and see the beaches here from different countries and states. However, if offroad vehicles are driving up and down the beach, then they won't feel safe here. Indulging in the opinions of the people pressuring the state parks to allow them to drive on the beaches shows a negligence towards the locals who pay taxes and to the environment that has no political power. Afterall, we want a welcoming community, not an exclusive one.

Instead of allowing offroad vehicles to drive on our beaches for publicity, my ideas are:

1. To host recreational activities. This includes sand soccer, beach volleyball, and long distance running. These types of activities are open to everyone, including families and visitors.
2. Bike rentals and a bike path that goes from Pismo Beach all the way to Oso Flaco. Not only does this allow people to explore the beaches, but it also combats carbon emissions and promotes a healthy lifestyle.
3. Expand plants for butterfly habitat, and have programs that include education and a hands on experience for county school children.
4. Have a designated area for a dog beach, where they can be off leash.
5. Expand public service opportunities for locals. As a high school student, I have a requirement to complete 40 hours of community service by the end of my senior

year. Since we are in a pandemic, many of the activities that I would do in person are not available, and have been replaced with online resources. I know that myself and many of my peers would appreciate an opportunity to do something outdoors for our community, such as cleaning our beaches and picking up trash.

Thank you for your service and I trust that the Coastal Commissions and State Parks will make the best decision for our community!

Sincerely,  
Tea Aebischer

CENTRAL COAST AREA

Dear Commissioners,

I understand that you are asking SLO county residents if they have any ideas to improve the beach at Océano dunes and Oso Flaco. I am a 7th grade student at Laguna Middle School and Resident of SLO county. I, like countless others, enjoy going to the beach to relax and get away from home. To improve the beach, I would like to see it as a place that is open to everyone that respects it. In order for this change to happen, I think our community should:

1. Be more ecological. I don't think that giant pickup trucks that are bad for the environment should be able to rule the beach. They push others who want to enjoy the beach away.
2. I am also concerned about climate change and would like to phase out fossil fuels.
3. I would also like to see less trash on the beach. When I go to the beach, I often find shards of glass from beer bottles, plastic bags, and surprisingly, used diapers. It is truly disturbing to see the mark some people have on beach, and I would like to see some change.
4. Respect the wildlife. I think there should be more protected areas for the snowy plovers who nest in the dunes. If people can't drive on the beach, it will vastly improve the population and well-being of the wildlife.
5. Provide easy access to the beach, especially to the largely Latinx community that lives nearby. This community should have the right to access the beach without having to worry about getting run over by off-road vehicles.

I trust that as leaders of this county you will make a decision that preserves the great beaches we are so fortunate to have.

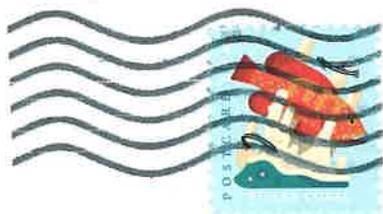

Thank you!

Nico Aebischer

P.S. If someone is driving on the beach and crashes, I wouldn't be surprised if they sued the city. :)

Nico Aebischer

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Candice Bryan

Subject: Protect the Oceano Dunes

Dear Chairman Padilla and Commissioners,

Please support and implement your staff's recommendations for the Oceano Dunes, and amend the State Park's Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Ave. vehicle access, preserve the snowy plover exclosures, and leave the beautiful and extraordinarily special Oso Flaco Lake area as it is. Above all, start the clock on the phase-out of OHV activity.

The Oceano Dunes, part of the larger Guadalupe-Nipomo Dunes Complex, is the largest such intact coastal dunes system in the world and a federally designated Natural Landmark.

OHV are not compatible with the protection of a fragile coastal dunes complex, threatened species, and environmentally sensitive habitat areas (ESHA). For these reasons, and more, OHV must be phased out at the Oceano Dunes in favor of low-impact recreational uses.

The Oceano Dunes will continue to offer unique experiences such as car camping on the beach, along with walking, birding, fishing, horseback riding, and hiking the dunes; the kind of activities that characterize the healthy economies of every other beachfront community in California - with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park's closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California's coast. See "Off-road Riding at Oceano Dunes has 'no significant impact' on SLO County Economy, study says, published February 2021: <https://www.sanluisobispo.com/article248935019.html>

The residents of Oceano who try to walk on their own beach, with OHV activity, do so with great risk. And they are watching the coastal dunes complex – their defense against rising sea levels – being eroded away.

The unhealthy air, from foredunes denuded of vegetation by off-road vehicle activity, continues to stretch from Nipomo to Guadalupe.

The State Park proposal for Oso Flaco Lake is contrary to the CA Coastal Act and Local Coastal Programs – which protect prime agricultural land, and environmentally sensitive habitat areas (ESHA), which includes the Oso Flaco area.

All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to adequately protect the environmentally sensitive habitat. It is past time to hold them accountable now, and to put this 40 year debate behind us. Thank you!

Sincerely,  
Judy Clement

Above all, start the clock on the phase-out of OHV activity.

The Oceano Dunes will continue to offer unique experiences such as car camping on the beach, along with walking, birding, fishing, horseback riding, and hiking the dunes; the kind of activities that characterize the healthy economies of every other beachfront community in California - with the exception of Oceano.

Please dispense with the fears and economic arguments against doing this, which were rebutted during the park's closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California's coast.

The residents of Oceano who try to walk on their own beach, with OHV activity, do so with great risk. And they are watching the coastal dunes complex – their defense against rising sea levels – being eroded away.

The unhealthy air, from foredunes denuded of vegetation by off-road vehicle activity, continues to stretch from Nipomo to Guadalupe.

All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to adequately protect the environmentally sensitive habitat. It is past time to hold them accountable now.

Sincerely,

Michaela Robbins

Dear Chairman Padilla and Commissioners,

Nature demands action! Please support and implement your staff's recommendations for the Oceano Dunes, and amend the State Park's Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue vehicle access, preserve the snowy plover exclosures, and leave the Oso Flaco Lake area as it is. Above all, start the clock on the phase-out of OHV activity.

**Categories:** Public Comment

Dear California Coastal Commission,

Our areas for wildlife and endangered species still seems to decrease yearly. In the long run, what will be more important - off road vehicles that destroy soil, plants and animals or the rare in tact eco-systems that include the native flora and fauna? I think it's clear the land, birds and plants are the ones that deserve support.

The Public Works Plan for Oceano Dunes State Park must be rejected because it neither adequately protects coastal resources or endangered species nor does it comply with the Coastal Act.

The current plan also allows for massive development with houses, offices etc. which not only reduces the survival chance for species such as the Snowy Plover but also doesn't take into consideration the buffer zones that must be considered for climate change and rising water levels.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Caroline Kim

Hi I'm writing in support of phasing out Off Road Recreation activities as recommended by your review team. We know better now and can do better. The damage to the environment is too high of a cost. We can enjoy the dunes in peace and allow the native lands and animals to flourish. People do not need to drive on the beach or the dunes. Education is important, but most people will understand and adapt. Change is not easy but this is for our environmental future for generations to come. I've lived in Slo county since 1978 and have always been concerned about vehicles destroying the dunes. Thank you for your time. Sincerely, Kathy Sallaz

It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Angela Teixeira

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

As a resident of the Central Coast, I avoid the Oceano Dunes like the plague. It's noisy, it smells, it is polluted with trash from visitors, the Dunes are barren from use, and wild life suffers from the traffic. The offset of this is not worth the damage. Tourists frequent our area regardless of whether the option to destroy the Dunes with motorized vehicles exists or not.

Sincerely,  
John Lucas

**Categories:** Public Comment

To Whom It may Concern,

I am writing to you today to ask you to implement the plan that protects the most amazingly, beautiful, unique ecosystem on the California Coast. That plan includes stopping all offroad vehicles at the very least. I'd personally recommend immediate closure of the park to all vehicles, especially the offroad vehicles.

I know the park just reopened to camping and OHV, unfortunately! This evening I was walking well north of the OHV area, yet I could still hear the whine of the motors. (There was not much trash north of the OHV area.) I can't imagine what it's like for the animals that have lived in peace and quiet for the past, almost, year. It was beautiful and it is a glimpse of the future that should be charted for Oceano Dunes!

The Oceano Dunes needs time to recover and rest from the constant stress and destruction caused by all the vehicles, especially the offroad vehicles, to the fragile ecosystem. It is our duty to protect our extremely limited, small fraction of natural lands left in California, nevermind along the coast. It is a true treasure that has been misused and abused for too long. The following pictures from a walk I took last Monday, 2-15-2021 on the northeast side of the buffer zone.

The people that live on the Mesa deserve a halt to the unnecessary churning and degrading of the natural crust that can occur on natural sand dunes. Yes, the wind does blow, but the OHV activity, helps make the sand more airborne.

The long running and frequent arguments about the benefit to the local economy have been debunked by a recently released study by associate professor Pratish Patel at Cal Poly.

[Oceano Dunes Pandemic closure.](#)

Additionally, the argument that we have done this for over 100 yrs. Is illogical.

Just because one has done something for a long time does not mean it is something that you are able to continue, makes it acceptable, or means you should continue it. Science continues to discover new things and we adjust over time. There is a reason that Oceano is the last beach, I think, in California, allowing vehicles on the beach! Why? I think that is because the other beaches have realized it is ultimately bad for business and the environment to continue to let the vehicles on the beach. The choice is obvious. The Oceano Dunes needs to stop allowing all vehicles on the beach and dunes!

Not to mention, have you seen Pier Avenue? It is an ugly, derelict area, especially when you consider it is on the California Coast! The area can be revitalized with the absence of the vehicles.

We had a glimmer of the possibilities during the pandemic! It was beautiful to be able to walk south of Pier Ave., on my local beach, without worrying about getting run over or breath in their exhaust, poisoning myself. As well as having to listen to the extra large vehicles with their extra large exhaust and noise! There was space to walk and sit on the beach without being too close or being run over. Also I have been able to get to the waves without worrying about getting run over. There has been a beautiful reduction in noise pollution, as well as trash.

I have lived in Oceano for about 20 years and I have always lamented feeling unwelcome and wanting to go to Pismo where I could be safe on the beach. Why am I not able to visit the local beach safely without feeling like I might be run over. Why am I always picking up the trash of people just having fun!

I pick up trash on the dunes and I have found a can from 1934, glass bottles that are old, and a shoe that looks like it is from the same era. As the sands shift different trash is revealed. Closer to the OHV area there is a different type of trash as illustrated in the following pictures from one quick walk around. As the sands shift they reveal different items and most likely different trash, usually some kind of plastic in the pedestrian only parts and near the OHV area more car parts, flag poles, or pieces of the possible old state Park Fencing. I found a whole bag the other day of metal fence ties left by the people that put up some part of the fence. I see the eroding old metal fence. What's the plan for cleaning that up? What is going to happen to the orange fencing as it starts to degrade? It is another environmental disaster waiting to happen, while the other is ongoing!

The Oceano Dunes needs to be protected from vehicles due to the destruction of the ecosystem. It is the correct thing to do. I think it will be for the benefit of Oceano as a whole not the few loud ones, that make a lot of noise!!

For as long as the OHV has existed Oceano and Pier Ave has been a forgotten and misused area. Everyone just wanted to get down the beach. It needs some TLC and Vehicle free development! It will help all areas of Oceano. Our future is at stake and our fragile ecosystem is on the brink. Protecting our most dear natural resource will strengthen our area in many ways!

The Parks Plan is a disaster for the fragile ecosystem of our area. Expanding Oso Flaco is a terrible idea! The "pristineness" is the attraction. Once you open it up to the destructive OHV, camping, etc. The ecosystem will suffer. Trying to survive the impacts of the oil refinery for years has been enough. I know it was part of the plan going back about 40 yrs? Luckily, now we know that would be a horrible plan! Let oso Flaco stay wild! It is a treasure as it is! Don't destroy it! I was first introduced, taking my kids on a fieldtrip. It was an amazing ecological field trip introducing the Kids from Nipomo Elementary, a natural treasure in their own backyard!

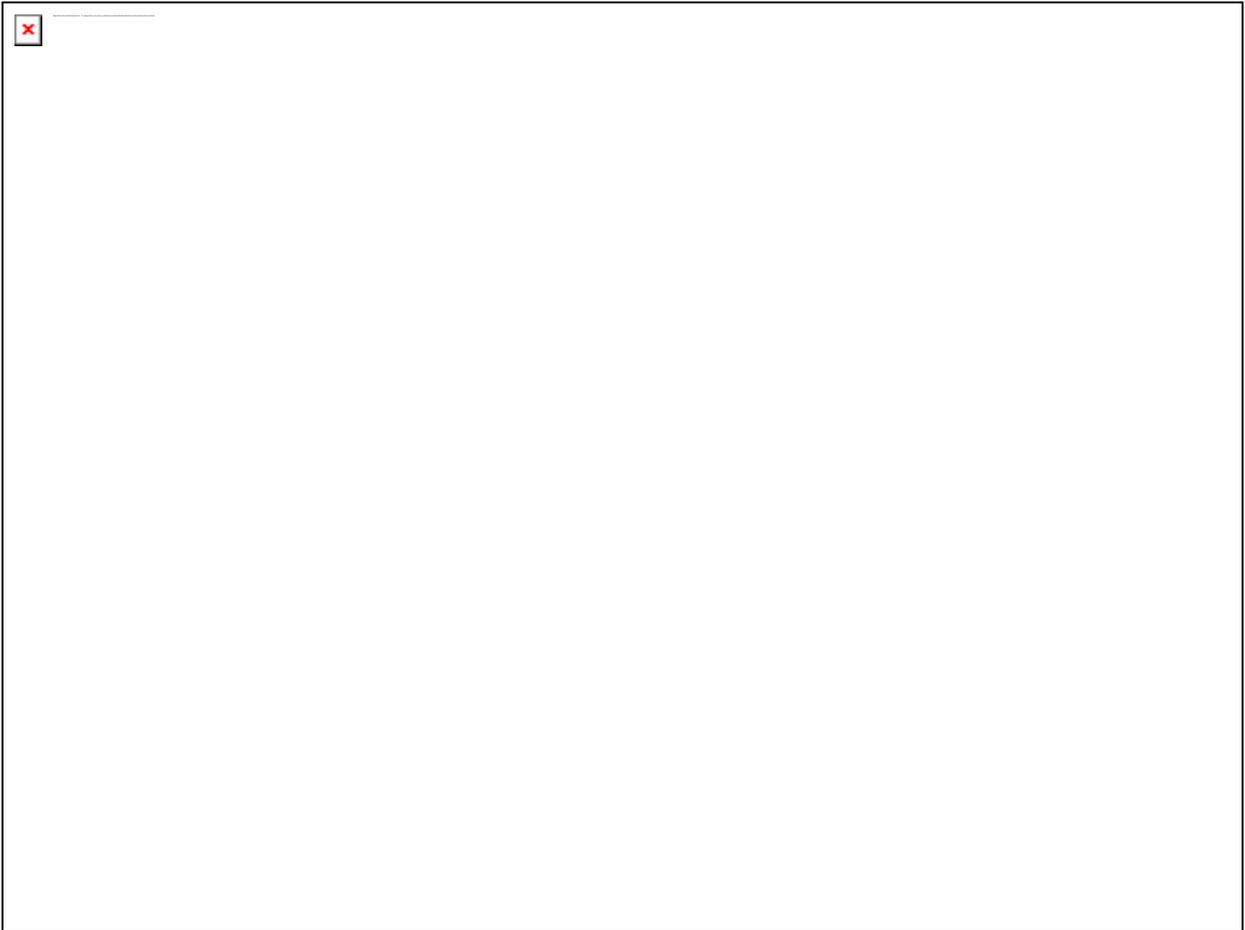

If you are going to allow camping, might as well do it in an already higher density place between Grand and Pier Ave. It would be walking to downtown Pismo, yet still allow for the beach camping experience.

OHV needs to be banned. It does not benefit our community, it continues to destroy it. Just drive down Pier Ave.! Take a trash bags and walk the foredunes embedded in the dunes a lot of small pieces of trash. As you head down and inland there is more trash sitting at the bottom of dunes or embedded in the sides, revealing as the sand is shifting.

Thank you,  
Diane Dolden

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Mary Budrunas

Dear California Coastal Commission,

Good grief!! What is going on this park? Already trucks, jeeps, and dune buggies are back at tearing the place apart. Dust is flying in the air, ruts being cut in the landscape, and yahoos careening around just as they please. Is this anyway to treat wildlife habitat?

Let humans take their play toys elsewhere. Animals need this place to LIVE, people want it to play. Which is most important??

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Hello,

I am concerned for life - human, plant, birds and the beauty of the beach. I do acknowledge we are a diverse people with diverse interests and desires. I know people love riding the dunes. I even rode one time and will never again ride an ATV on the beach. Being in a helmet behind a powerful machine does not fit my desire for time at the beach. Being able to safely walk with my grandchildren and alone I don't want to worry about vehicles cruising or gunning down the beach. I find it frightening for myself and the welfare of my grandchildren. True some people are respectful and cautious, but it only takes one aggressive driver to wipe out a person. We have a natural treasure in our beach and I want to see the natural wonder preserved to feed the wonder of natural life. I respectfully request that the beach be preserved without the danger and invasion of vehicles.

Thank you for your consideration!  
Catherine Petty

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Candice Bell  
Mckinleyville, CA 95519

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't protect the snowy plover, instead by development of more park land the snowy plover will be less protected. Off roaders have enough space already to have some fun.

Sincerely,  
Karl Vogel

Dear California Coastal Commission,

Permitting Oceano Dunes off-road "recreation" to the severe detriment of the endangered snowy plover and important coastal dune habitat has been a major failing of the Coastal Commission for years, including the period during which I had the honor of being a commissioner alternate on the CCC. I argued for the end to destructive "recreation" in this important area of dune habitat in State Park control. Alas, the Commission always caved in to the dune buggy enthusiasts and their advocates at State Parks. It's long past time for the Commission to live up to its legal duty to protect endangered species and the last remnants of coastal dune habitat.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

Dear Coastal Commissioners,

As a long time resident of San Luis Obispo County for over 44 years, I wholeheartedly support your staff's Oceano Dunes report. Additionally, I am opposed to the Oso Flaco Lake "Improvement " Project.

I support the five-year phase out of the off-highway vehicle at the Oceano Dunes. I also support leaving the Oso Flaco lake area as it is. It is a rare jewel for hikers and bird watchers. Leave its natural wonders for everyone to enjoy.

Thank You,

Jim Grant

**From:** Nelson Hallgren [user@votervoice.net]  
**Sent:** Monday, February 22, 2021 3:58 PM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Follow Up Flag:** Flag for follow up  
**Flag Status:** Completed

**Categories:** Public Comment, Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Nelson Hallgren

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Helen Cooluris

**Subject:** Please Prohibit Cars from Oceano Beach and Dunes

**Categories:** Public Comment

Greetings,

I am so grateful that the Coastal Commission exists to protect our coastline. I write today to ask that you extend that protection to Oceano beach and dunes, closing it entirely to vehicles forever for the benefit and sensitive and endangered species and of people, too.

What a joy it was to walk Oceano beach without cars while it was closed for several months to protect the Snowy Plovers, which thrived and expanded their territory without vehicles tearing up their habitat.

The town of Oceano and environs thrived as well, as tourists arrived to enjoy one of the wildest, most expansive beaches left in Southern California.

Local creatures and residents thrived as well, when air quality improved due to an absence of vehicle fumes and blowing sand, a particularly crucial consideration in this time of global warming when fires pollute California's air for several months each year.

To those who believe it is their "right" to drive cars onto the beach, I would say that it is no more their right to do this than it is my right to tear up the grass of a city park with my own car, disturbing its creatures and polluting its air in the process.

Because it simply makes no sense to condone a form of recreation that causes deliberate destruction to an environment already under siege, I ask that you oppose the State Park plan and deny vehicle access to Oceano beach and dunes from this day forward -- forever.

Thank you,  
Maria

**Categories:** Public Comment

Dear Sir,

I am a victim of air pollution and not being able to walk on the beach when OHV riding on the beach is allowed. I am also a witness to the damage to ESHA caused by OHV riding.

I would like to make the following points regarding the staff report.

- I support all the staff recommendations.
- Specifically, I advocate the phase out of OHV driving on the dunes as soon as possible.
- I support the Commission's actions to bring Environmental Justice and equitable coastal access and recreation to the underserved communities in San Luis Obispo and Santa Barbara Counties as well as the rest of California.
- I urge the Commission to listen to Northern Chumash tribal concerns and take steps to treat their sacred sites with honor and respect.
- Given most of the OHV riders on the beach come from the Central Valley, they need to find a place in the Central Valley to ride. This would avoid their commuting cost and the ESHA destruction and air pollution their vehicles cause both on the beach and during their commute to Oceano Dunes.
- I believe Parks is misinterpreting their mandate. The top priority should be to provide recreation for the nearby citizens who want to walk and camp on the beach. These citizens cannot walk or camp on the beach when OHVs are riding for fear of being run over. There are a lot more citizens who want to be able to walk on the beach than OHV riders. The PWP should be revised to support only non-motorized recreation on the beach.

In summary the Coastal Commission staff has it right. It is time to relocate the riding area off Oceano Dunes. There is ample land in the Central Valley. Doing this would save a lot of labor and money and achieve the clean air and ESHA goals.

Dr. Richard Wishner  
Nipomo, CA

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Clare Wheeler

I am a 72 year old retiree living in the Trilogy development in Nipomo, CA. Since moving to Nipomo a year ago, my wife and I have experienced first hand the negative impact on air quality in our neighborhood from the off-road vehicular traffic in the Oceano Dunes.

I am writing in support of full closure of off-road vehicles--or at least a dramatic reduction--to reduce the negative impact on our community. In our case, we have found we cannot leave windows open to let in the fresh air because of the particulates that traffic puts in the air AND we need to run a house-wide air filtering system to keep our allergies manageable. Plus we would love to be able to access that area for hiking, but the off-road vehicular traffic does not make that possible.

**To:** OceanoDunesReview@Coastal  
**Subject:** Oso Flaco Lake expansion

**Categories:** Public Comment

Dear Commissioners:

What a terrible plan. Oso Flaco Lake is one of the last remaining wetlands on the Pacific Flyway in California. It is home to migratory birds, resident birds, endangered plants, wildlife and a few low-impact humans who come to enjoy nature and learn about it. The boardwalk to the beach allows hikers, birdwatchers and schoolchildren the opportunity to visit a unique habitat without destroying it. At night everyone goes home and the wildlife has the place to themselves.

State Parks wants to expand overnight camping and OHV access into the lake area. No! No! No!

It would attract visitors who are not there to enjoy nature, but are there to run their machines. Not a compatible use!

There would be people and lights and noise at all hours. Not a compatible use!

It would destroy habitat and prime farmland. Not a compatible use!

The Lake is far from town and stores and would not provide economic benefit to the area. Not a compatible use!

It would allow more OHV use which creates more air pollution. Not a compatible use!

Oso Flaco Lake is too pristine to sacrifice to the machines.

Shut down all OHV use at Oceano dunes immediately.

Stop all vehicular access to the beach without an ADA sticker or plates.

Close Pier Ave. entrance. Close Grand Ave. entrance.

Thank you!  
Alice Reinheimer

Arroyo Grande, CA

**Subject:** Stop Oceano Dunes' Reopening Until Coastal Permit Is In Place

**Categories:** Public Comment

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park.

We have lived here since 1974 and have explored every mile from Pismo Beach to south of Guadalupe Dunes, including the Oso Flaco area. Some improvements have been wonderful - the boardwalks at Oso Flaco and Grover Beach, improved access at Guadalupe, closure of the Pismo beach ramp and creating a vehicle-free area north of the Grover Beach ramp.

We weren't excited when beach camping was allowed, because the traffic, exhaust and overcrowding made it difficult for those of us who walk the beach, to enjoy that part of the beach. However, it does provide an opportunity for those with RV's to enjoy the beach.

We have two concerns for the future:

1. air quality (which has improved drastically during the pandemic), and the issues that driving on the beach creates for the health and safety of those of us who live here.
2. The amount of accidents, including deaths, that have occurred during the past 40 years due to dune buggies, RV's, alcohol abuse, campfires and arguments between campers as to where their "campsite boundary" stops.

There are few regulations for activities and it is impossible for the rangers to "police" the beach and dunes 24 hours a day. During winter storms when the creeks flood and access to the ramps becomes impossible, vehicles have been washed into the ocean while trying to cross and access the ramp. Now we hear that they are considering building a bridge across that creek to allow more access.

PLEASE - DO NOT DESTROY OUR LOCAL BEACHES. There are many areas that are more suitable for ATV and 4-wheelers to use. We have seen major changes in the amount of businesses near the ramps - which brings trash, drug abuse and crime - and which prevents the local homeowners from enjoying their neighborhood.

We need to change the use plans for this area and save the dunes, beaches and wildlife for our descendants.

This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also

proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

We will be watching and using our votes to encourage our legislators to protect our environment. Please come and visit our area before you vote to allow more harmful development.

Sincerely,  
Linnea wilson  
Arroyo Grande, CA 93421

Dear California Coastal Commission,

My family and I are avid outdoor enthusiasts and we frequently visit the Morro Bay Area for hiking and birdwatching. During our visits we often hike at Oceano Dunes State Park to enjoy the unique bird species and scenery. On past visits we have been fortunate to observe snowy plovers, peregrine falcons and least terns, among other species, at Oceano Dunes. I understand that there is a plan to expand off-road vehicle use at Oceano Dunes and reduce protections for endangered bird species. I want to express my opposition to such a plan and urge the Coastal Commission to phaseout off-raiding and to expand protections for endangered species at Oceano Dunes. Please help preserve these state natural resources for future generations.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. **From:** Peter Prichard [user@votervoicenet]  
**Sent:** Monday, February 22, 2021 11:17 AM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Oppose Staff Recommendation, Public Comment

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Peter Prichard

But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Paulette Peterson

**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Public Comment, Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

scott pawelczyk

It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Edgar Vazquez

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County. The need for nesting sites and helping endangered species far out weighs the desires of the off road community.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Kathryn Kawecki

**From:** Warren Schmidt [wschmidt@textron.com]  
**Sent:** Monday, February 22, 2021 5:17 AM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Public Comment, Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at OSDVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Warren Schmidt

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Elizabeth Moellenhoff

**From:** Justin West [rideforlife514@gmail.com]  
**Sent:** Sunday, February 21, 2021 11:43 PM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Public Comment, Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at OSDVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Justin West

- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

DON REYNOLDS

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Emily Lund

Dear California Coastal Commission,

We often use the beach in this area, and believe it would be better to transition it to less off road recreation rather than more. The beach is beautiful, and it is the home of wildlife that have no other place to go. Off readers can go elsewhere - snowy plovers and marine wildlife cannot. It is past time that we allow space and habitat for wildlife. They are important to people who care about nature, and those people contribute to the economic success of the area.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. Coastal Commision members,

We are writing to implore your acceptance of your staff recommendations for Oceano Dunes. We have experienced much improved air quality and health while the dunes have been closed to ATV use.

Also, it is a pleasure to enjoy the beach area without vehicles. We are also aware of the economic analysis recently done which states there is no economic impact from the closure of the dunes.

We hope you will vote to keep the dunes closed to ATVs.

Sincerely,

Jim and Louise Easton  
Nipomo Mesa

Louise. It's all in the details.....

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Corinne London

**From:** James Andersen [user@votervoices.net]  
**Sent:** Sunday, February 21, 2021 5:11 PM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Public Comment, Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

James Andersen

**Categories:** Public Comment

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Pam Brakke

**Subject:** Comment on CCC Staff Recommendations for Oceano Dunes

**Categories:** Public Comment

Dear Commissioners,

**We enthusiastically agree with the following CCC's Staff recommendations to:**

1. Phase-out off-roading at the Oceano Dunes Park over five years and expanding different types of recreational uses that won't harm coastal resources at the Park. Moving car-camping to the area between Pier & Grand Avenues and eventually moving the camping further north closer to Pismo Beach is a brilliant idea. That way both the visiting public & local businesses benefit from the proximity to walk to restaurants & shopping. The statistical study done by the CalPoly professor Pratish Patel showed that during the covid related shutdown, there were no significant negative impacts to the San Luis Obispo County economy. Lodging revenue in hard-strapped Oceano actually went up!
2. Allow some hike-in/bike-in camping.
3. Implement enhanced habitat protection measures, including in the southern portion of the Park and near Oso Flaco Lake. This would help the Western Snowy Plover and Least Tern nesting areas. We have seen Snowy Plovers roaming outside the protected areas on our beach walks, making them very vulnerable to vehicles driving on the beach & foredune areas. In fact the Center for Biological Diversity found that State Parks staff were scuffing out nests that were outside the Riding Exclusion areas last summer.

You have an excellent plan that addresses the two main problems that have plagued the area for decades; the air quality issue from Off-Roaders riding on the dunes destroying the protective foredunes and the safety/viability of threatened wildlife species like Plovers and Terns.

When we envision going for a walk on the beach or into the dunes, the vision never includes weaving between vehicles and miles of endless tire tracks on an essentially "Sand Highway". Going to the beach should be a safe & pleasant place for everyone to enjoy without fear.

Thank you, thank you for proposing a plan that would greatly benefit both people and the environment.

Best regards,  
Marcia & Dale Johnson  
Nipomo, CA

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

It is up to us to protect them - not destroy them for any reason but especially for recreational purposes.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

We now need the phase out to be prioritized.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

A full, specific and detailed plan is needed, not interim measures and promises.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Harvey Sherback

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Marilyn Jasoni

I read with interest the Project Overview for the Oceano Dunes. Although I agree with some of the “Expected outcomes” I’m not a fan of still allowing vehicles on the beach. They have a nasty habit of leaking oil and gas onto the sand plus they can be disruptive to Snowy Plovers, seals and other wildlife. However, providing non-vehicular access and permanently enhanced habitat protection are excellent ideas. These ideas don’t harm the beach or put the health of local citizens at risk.

The State Parks new proposed plan to expand their domain to include Oso Flaco and the Phillips 66 site is absurd and illegal. I can’t think of anything more absurd than a gun range and race track on the beach. These ideas would enlarge the State Parks coffers, they wouldn’t enhance the coast line in any safe way. State Parks has already proven that they can’t be trusted when they were caught moving Snowy Plovers nests because they were “in the way”. The Off-road lobby should be shut down immediately, not 5 years from now.

The California Coastal Commission’s mandate is to “protect, conserve, restore and enhance” the state’s coastal resources. I fail to see how off-road vehicles and on-the-beach camping fit within that mandate.

William Harris

I am writing in regards to the proposed development of the Oso Flaco Lake area. I am an avid camper and love the idea of an additional coastal camping option in our county. However, I believe what makes this area special is its unspoiled natural beauty and tranquility. Adding the kind of infrastructure needed to support the development of the proposed campground project will destroy what makes this area so special. I urge you to consider limiting development to primitive camp sites only. Adding access for RVs, hookups, dump sites, and ATV access will destroy the character of the land near Oso Flaco.

The proposed project will destroy and degrade habitat for snowy plovers, least terns, and several rare plant species. It could drive many, many other bird and wildlife species away from the lake and the surrounding area. It would completely alter what is now one of the top birding spots in San Luis Obispo County.

Please find a way to increase camping opportunities without increasing the destruction of our amazing natural coastal habitats. Thank you.

Molly Stoddard

**Categories:** Public Comment

To Commissioners of the California Coastal Commission:

This message is for your consideration at the March 18, 2021 Hearing on the Subject.

I want to thank you in advance for taking a courageous stance concerning the control and eventual ban of OHV/dune buggy riding at the Oceano Dunes. I say "courageous," because you are undoubtedly being met with a well-organized, vociferous opposition from the OHV riding community.

I have observed that this community has been less than civil when it comes to social media discussions of the threats posed by sometimes extremely large quantities of particulate matter emanating from the dunes, particularly on dry, windy days when OHV usage is correspondingly extreme. I have also been in State Parks/APCD meetings where this lobby shows up in force and where the speaker presentations seem to be biased in favor of OHV/dune buggy rider interests. To me, it seems that their interests basically consist of total freedom to run amok over the dunes with their OHV's, with total disregard to public health as it relates to air quality. Based upon scientific studies, OHV riding on the dunes leads to an increase of airborne particulate matter by a factor of 4 to 10 times what it would be if the dunes were allowed to recover to a natural, undisturbed state. State Parks/APCD stated current goals are to reduce airborne pollution from the dunes by 50%. That is simply not good enough, as it means that tens of tons of particulate matter would still be thrown into the air, polluting large areas and a great number of people downwind of the riding areas.

Not only is air pollution greatly exacerbated by OHV riding, but tremendous trash and noise pollution problems are also exacerbated by this activity. I live about 4 miles directly east of the dunes and from here I frequently observe air that is darkened by large amounts of particulate matter, as well as the raucous noise emanating from multitudinous OHV engines. Also, I often see pictures and videos from news articles that show large amounts of trash left on the beach at Oceano Dunes. I would like to visit this area of the beach, but feel intimidated and unwelcome, as I am (obviously) not an OHV rider and would like to enjoy the beach for its natural beauty.

I have also observed that, during the COVID-19 pandemic closure of the ODSVRA, the incidence of "sandstorms" has lessened significantly. And, of course, there has been an absence of noise pollution caused by OHV riding.

Before closing, I would note that another public nuisance due to OHV riding has been notably absent during the COVID-19 pandemic closure. That nuisance, or travesty is probably a better word, is the stress placed upon first responders, hospitals, and law enforcement who are called upon to respond to OHV accidents, sometimes fatal, as well as misdemeanor and worse crime. Not to mention the absence of great amounts trash during the closure.

In summary, I would encourage the Coastal Commission to follow through with the Coastal Commission Staff findings leading to the stated positions in the most recent (65-page) Report on the ODSVRA.

Thank you for your consideration of my observations and request for follow-through of Coastal Commission Staff recommendations.

Ron Hovden

Dear decision makers,

I would really appreciate you voting to eliminating any type of vehicle accept service and rescue vehicles on Pismo and Oceano beaches.

I have been riding my hoses on these beach for decades. I always have a great time but I can truly say I have never experienced the tranquility that I experienced while the beaches were closed to vehicles in 2020. It was breathtaking for me and many of my horse friends. We could ride without worrying about getting hit by trucks, motor homes and ATVs.

I also enjoyed riding my bike on the beach during that time.

I would really appreciate you all voting to discontinue vehicles on any California beach. It just doesn't make sense. Kids are safer, animals are safer and it's so much better for the environment.

Pat Harkness

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Devin Brooke  
Van Nuys, CA 91401

**Sent:** Sunday, February 21, 2021 10:41 AM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Public Comment, Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

craig woods

Dear California Coastal Commission,

I am a retired US Forest Service wildlife biologist. The coastal dunes and surrounding habitats are precious and in jeopardy from numerous threats including invasive species and rising sea level storm surges. We need these habitats to support species such as snowy plovers, least terns and other wildlife species. We do not need more development, more destructive uses such as off road vehicles, and land clearing for incompatible uses such as are proposed therefore:

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Michael Belli

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Jill B.

**Subject:** Stop Oceano Dunes' Reopening Until Coastal Permit Is In Place

**Categories:** Public Comment

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Please re-read what the direction was: phasing OUT off-roading, going for NON-motorized fun. People who drive vehicles go so fast they can't enjoy the scenery they are trampling. Their desire is speed, not scenery. So they can go somewhere else! And those of us who like to enjoy scenery also want the birds to survive so we will be happy to follow rules about where not to camp or hike.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Virginia Smedberg

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Laura Moritz  
Santa Cruz, CA 95060

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Dominick Falzone

**Categories:** Public Comment

Dear California Coastal Commission,

Please reject the State Parks plan to expand off-roading at Océano Dunes State Park; impose your own permit conditions instead. Please phase out off roading in this sensitive habitat for snowy plovers and least terns.

We need more habitat for wildlife, not more room for noisy, destructive, polluting, dirt bikes!! Uphold your sacred duty to protect our vanishing natural spaces!

Sincerely,  
Joann Moritz

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Teresa Arredondo

Dear California Coastal Commission,

Individual/Personal Statement:

I lived in/near Los Osos after/during a violent assault (which almost ended/ended my life in Goleta) in 2011/12. The beaches were All closed off during aviary breeding seasons: I do not understand how the ecological protections Could become so dwindled in a span of less than 10 years that there is any sort of question there?!?! It seemed the community was knowledgeable about their threshold in the Pacific Flyway, and had well-learned their own mis-aventure. I do pay reminder that Morro Bay community is the most dangerous port in the West Coast, so please help me find if there was some sort of Extraneous atrocity (extraneous to their norm & the current social-medical situation) that the community is in allowance of such activity! I do not have funds to just drive blindly to follow-up. ...

Snowy plover chicks

Center for Biological Diversity

Mel,

California State Parks is poised to expand off-road vehicle access at Oceano Dunes State Park on the central coast – even after decades of problems with vehicles flattening snowy plovers and damaging coastal dunes habitat.

You can help save these little birds and stop the destruction. But you have to speak up.

Last year the Coastal Commission directed State Parks to phase out off-roading with a management plan that protects Oceano Dunes' natural resources and sensitive endangered species. But when the agency finally released its plan, it proposed to expand off-roading, putting recreation over conservation.

This awful plan would slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a 120-acre development near Oso Flaco Lake, with yet more off-roading areas, hundreds of campsites, massive parking lots, offices, houses, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Don't let off-roaders drive snowy plovers to extinction. Tell the Coastal Commission to reject the plan and impose its own

**Categories:** Public Comment

I agree with the Staff's report that Off-Highway vehicles should be phased out.

The State Park should be a respite for people to get away from the hustle and bustle of life rather than a continuation of the 405. As stewards of our natural resources, we should give the snowy plovers, the least turns, the grunions and all the other shoreline animals a chance to survive rather than running them into the sand. Driving ATV's with heavy lugged tires tearing up the dunes and plant life for fun seems Neanderthal.

A recent article in the San Luis Obispo Tribune dated February 1, 2021 stated a study by a Cal Poly professor showed that the closure of the Oceano Dunes SVRA had no significant effect on the economy of the area.

The Dunes should be returned to their natural state and the State Park should be enjoyed by all instead of destroyed by a few.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Leslie Sheridan

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act. We need a plan that brings them into legal compliance. 5 years is too long to wait. If the air quality is unhealthy the park needs to be closed to vehicles.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Keith Tadler

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Coco Kaku

**Sent:** Saturday, February 20, 2021 2:13 PM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Comments in Support of Coastal Commission Guidelines

**Categories:** Public Comment

I am a visitor to Oso Flaco and the dunes who enjoys observing and photographing the animals and plants who live there. I am very much in favor of phasing out the disruptive and dangerous off-road vehicle use as soon as possible to allow the biodiversity to flourish as it should. Our planet is rapidly losing its biodiversity, and we need to step up responsibly to conserve critically important areas such as the dunes and surroundings. I also strongly believe the Native Americans' sacred places should be sacred to us all and free from the desecration of off-road vehicles. Additionally, improving air quality for the residents of the area by banning the off-road vehicles should be a priority. The State Parks' plan is misguided and should be dismissed.

Thank you for your attention.

Jacqueline Knowlton

Dear California Coastal Commission,

I am writing to ask you to please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Faustino Riveron Jr.  
Rancho Santa Margarita, CA 92688

**To:** OceanoDunesReview@Coastal  
**Subject:** Comments for Keeping Dunes Closed to OHV Riding

**Categories:** Public Comment

Dear Commissioners,

Now is the perfect time to start the phase-out of off-road riding on the Oceano Dunes, before the Seasonal Closures begin in March. The Oceano dunes have been closed to OHV riding for almost a year now, due to the coronavirus-related restrictions and the Shore Bird Seasonal Closures for the Western Snowy Plover nesting period. During the 2020 Seasonal Closure, combined with the riding restrictions on the dunes, the Western Snow Plovers were expanding their nesting sites into the formerly allowed dune riding areas. In fact State Parks confirmed that almost half of the plover nests were outside the fenced protected areas. Unfortunately it was discovered in early June 2020 that State Parks Staff were scuffing out nesting “scrapes” made by plovers outside the fenced protected areas and placing flagging to deter the birds from expanding their natural nesting areas. This indicates to me that the plover’s protected nesting areas need to be expanded into these riding areas. Once a plover has found a good location for a nest, many will return to the same location every year. As one of the most threatened shorebirds in North America, why wouldn’t you want to allow more areas for nesting to increase their numbers?

With the almost year long closure to riding on the dunes, hopefully the fore-dunes have been able to begin their slow recovery. Why undo whatever small progress has been made, by reopening these areas to riding again?

Thank you for your consideration.

Sincerely,  
Dale Johnson  
Nipomo, CA

Dear California Coastal Commission,

Dear Coastal Commission,

Oceano Dunes State Park is a wonderland, in a civilized society it would be considered sacred and protected. Instead we are discussing how much MORE of it to sacrifice to inappropriate and destructive uses.

Why do I even have to say this: OHV's and wildlife do not mix. Motorized vehicles can go elsewhere, wildlife can't. Given the consequences of burning fossil fuels needlessly, i.e. for "recreation", expanding the area subject to OHV traffic is going to look like one of the most imbecilic, heedless things that we did in the 2020's.

Wake up soon, or even NOW!

PLEASE!

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Aimee MacAitis

Dear California Coastal Commission,

PLEASE reject the Public Works Plan for Oceano Dunes State Park.

This plan doesn't adequately protect coastal resources or endangered species. IT INSTEAD PRIORITIZES OFF-ROAD "RECREATION" over protection of wildlife and doesn't address the resource-protection issues your agency raised. WHY ARE WE PROVIDING MORE CHANCES FOR HUMANS TO HAVE FUN AT THE EXPENSE OF ENDANGERED SPECIES? It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan omits solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises "future studies and plans" with uncertain outcomes.

AND THIS? A massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. WHAT?!? Who benefits from this? Follow the money!

SORRY for the all-caps. This is just too important to not type out loud!

Sincerely,

Dear California Coastal Commission,

The Public Works Plan for Oceano Dunes State Park does NOT adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your Coastal Commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But the Public Works Plan for Oceano Dunes State Park "prioritizes off-road recreation" over protection of wildlife. The plan does NOT address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan also ignores solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Reject the Public Works Plan for Oceano Dunes State Park and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

**Subject:** Oso Flaco and environs

**Categories:** Public Comment

I do agree with the proposals about preserving the Oceano Dunes and the Oso Flaco area.

I also am sorry for the people who will have to give up riding (driving) ATV's. Gradually, over a 5 year span.

Because 40 years ago, I had to stop riding my horse at Oso Flaco after we had been riding as Coast Mounted Assistance there in conjunction with the State Parks Rangers, for years, ending 1989.

It broke my heart, but to keep the area from being driven to death, I had to make my choice then as now. It's personal for me. And the wildlife really needs this sheltered area on the Pacific Flyway. A stop over for many types of birds, geese, ducks,

Many studies have shown that the vegetation does come back, if we give up some of our more enthusiastic sports in delicate places. We can still walk on the beach and even wheelchair on the boardwalk over Oso Flaco Lake and beyond. They call it passive activity, but as we get older, it seems to be a lot more effort.

I submit this sincerely as one of those who was there 40 years ago.

Karen Foster Wells  
Templeton

To: California State Parks and Coastal Commission  
2-20-21

We live on the Central Coast in Arroyo Grande. We enjoy our beaches. In the past few years the beaches have been overrun by vehicle traffic. The air quality has been so bad to the point that going outside is prohibitive with my COPD lung problem. Since they have shut down the OHV's on the beach because of COVID, I can finally enjoy living outside.

I lived in L.A. area in the 1950's and 60's with the smog. They finally used common sense and did something about it. Let's be intelligent human beings and stop the air pollution around the Central Coast. I love outdoor recreation as much as anyone. The majority of the people that were using OHVs come from out of the area. They leave dumpsters full of trash on our beaches. They have campfires that leave tons of charcoal. We not only have to clean up after these slobs but when the tides come in, this all washes into our ocean.

The people who say this is good for our local economy don't make sense. They buy their gas and their food for their campers in the Valley where it's cheaper before they get here.

Please give us our beaches back. The air and noise pollution and trash should be sufficient reasoning, not to mention the environmental impact the OHV's have on the plant and wild life that thousands of motor vehicles stir up and run over. If the state makes so much money on this beach, they can pay my property taxes.

Thank you for your consideration.

Larry Wesch  
Arroyo Grande

But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Lauren Kezler

Dear California Coastal Commission,

President Biden has committed his administration to the 30X30 wilderness protection plan, and the vast majority of the public supports this effort. That is just one reason why the Commission should reject the Public Works Plan for Oceano Dunes State Park that expands off-roading activities. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes. We have seen public agencies promise "future studies" as a mitigation measure, and they frequently prove to be no more than a fig leaf that allows for ecological destruction.

This plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County. This is completely contrary to the goals of the 30X30 plan as well.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Matt Maguire

Dear California Coastal Commission,

In these times of disappearing wildlife species, plummeting habitats for wildlife and people to take refuge and critical fossil fuel emission levels, this plan is extremely disappointing to m.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. It's clear to me that this plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

As you know your commission directed State Parks to evaluate phasing out off-road recreation and transitioning the park to nonmotorized recreation. But I see here that this plan prioritizes off-road recreation over protection of wildlife and doesn't appear to address the resource-protection that your agency brought up in the first place. It completely fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your office.

As a professor of biology and expert on such matters, it is my understanding that this Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by at least one-third. In addition to this destruction it also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

I implore you to reject this plan and impose your office's permit conditions and a phase-out of off-roading, as recommended by your paid experts.

Sincerely,  
joe mueller

Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Marilyn Stoddard  
Palo Alto, CA 94301

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Linda Ozkan

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act. These are beautiful beaches that need to be protected. I often enjoy walking on these beaches and already see the lack of respect shown by so many of the off-road enthusiasts.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

Please, please, please, don't allow further development and/or continued vehicles on the beach and dunes! This SLO County treasure should be preserved instead of destroyed by trashing, noise and habitat destruction. Our environment was enjoyed for many months last year as access did not allow for vehicle use and we could see how well the local population adapted. There is a reason no other beach allow camping/atv's/cars/trucks. I wonder what other communities would have to say if this experience was made available on their precious beaches. Just because there's a history of vehicle usage doesn't make it right. Whatever possessed approval for this activity and aren't the eight other sites enough???

Thank you for your persistence to correct this terrible situation.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Brenda Hillman  
Berkeley, CA 94708

**Subject:** Coastal Commission Staff Report

**Categories:** Public Comment

Greetings,

I am a Los Osos resident and a retired State Park Supervising Ranger. I agree with your staff recommendations, however, I would like OHV to be phased out much sooner. The off-road lobby has forced the commission and State Parks to drag this decision out far too long. The vehicle accident trauma, crime and environmental damage must stop. This part of the coast has pristine beaches, dunes complex and fragile plant and animal habitat. It is an archaic and backward thinking approach to our environment by continuing OHV use on any coastal beach in California. Please consider eliminating OHV operations this year.

Thank you for your time and consideration.

Dale Kinney, Retired State Park Supervising Ranger  
Los Osos, CA.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. This makes more sense in order to protect both fragile habitats and the ability for people to safely enjoy these wild places. The area would remain free from noise and recreational traffic.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Cheryl Weiden  
Los Altos, CA 94022

Dear California Coastal Commission,

California State Parks is poised to do the exact opposite of what the Coastal Commission has recommended. Do NOT let State Parks open up even more of Oceano Dunes to off roading. Snowy Plovers are already imperiled. Expanding off-roading will only push these birds closer to extinction.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Amanda Servin

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
V R Sansone  
Vallejo, CA 94591

**Subject:** Pismo Beach and Oceano Dunes Draft Public Work Plan

**Categories:** Public Comment

February 20, 2021

Dear California Coastal Commissioners,

Thank you for the opportunity to submit comments regarding the State Parks Public Works Proposal.

As stated on their website the Mission of CA State Parks is “To provide for the health, inspiration and education of the people of California by helping to preserve the state's extraordinary biological diversity, protecting its most valued natural and cultural resources, and creating opportunities for high-quality outdoor recreation.”

To reiterate, as stated, first and foremost in their Mission Statement is to provide health, inspiration and education of the people of California by helping to preserve the State’s extraordinary biological diversity, protecting its most valued natural and cultural resources, second is to create opportunities for high-quality outdoor recreation.”

This Battle at the Beach has been a 40 year modern day David vs. Goliath bout, fought by CA State Parks against the communities that are directly affected by the noise, pollution, dust, trash, and harassment by off-roaders when we dare attempt to recreate at “their” beach, and against the very endangered birds, amphibian, and plant species that State Parks is to preserve and protect. Instead State Parks has managed the OHV in the interest of vehicles and the revenue generated by these destructive activities over protecting the Oceano Dunes and the Oso Flaco Federally designated Environmentally Sensitive Habitat Area, (ESHA).

Recognizing this disconnect, in 2019 you asked State Parks to consider reducing the activities that were degrading this extraordinary site. Instead State Parks “doubled down” on the destruction.

That protection and preservation is threatened every day and night as ATVs, 4-wheel drive trucks, and other motorized vehicles rip the dunes, harass and crush the endangered avian, amphibian, and plant species and call it recreation, or more aptly spelled, “wreckreation”.

During the nesting season of the Western snowy plover, State Parks own mission was violated by the very division that was created to “protect and preserve the extraordinary biological diversity and protect its most valued natural and cultural resources”. With the Park closed due to CoViD-19, and with the absence of vehicles ripping up the beach along the so called “Sand Highway” those Western snowy plovers and California Least Terns had the gall to move in to the off-roaders neighborhood!!

It is further shocking to learn that State Parks employees were instructed to VIOLATE the Federal Endangered Species Act and sent employees into the Oceano Dunes to scrub out the “scrapes” the male plover makes to indicate a nesting site, install Mylar flags, and sent heavy equipment to move plovers to other areas to nest.

In the 5-year annual review of the 2019 U.S Fish & Wildlife Recovery plan which includes the entire California Coastline and Wildlife state, “poor reproductive success, resulting from human disturbance, predation, and

inclement weather.” In addition, human activities, such as walking, jogging, running pets, horseback riding, and vehicle use, are key factors in the ongoing decline in breeding sites and populations.

San Luis Obispo Air Pollution Control District has been battling for ten years with State Parks as well with regard to the repeated violations of Clean Air Act. To read that State Parks is proposing in the future to expand OHV riding area onto the Phillips 66 site and opening up a 40 acre area that State Parks spent at least 30 years and hundreds of thousands of dollars restoring, to now have it proposed as a OHV site was also disturbing to read, especially since Oso Flaco Lake is situated in an ESHA. This disingenuous plan would shift the air pollution generated by OHV from SLO County to Santa Barbara County with no thought of the environmental injustice of their action, which effectively deprive the mostly Hispanic community of Guadalupe one of their only recreational sites.

To implement the Oso Flaco portion of the PWP, State Parks also wants to end the use of this Prime Agriculture land with soils rates as class 1 and 2, end the lease with the farmer who has leased this land for over 40 years.

If this disastrous PWP is approved, State Parks will then begin the process to “pave over Paradise and put up a parking lot” and more; they will remove countless willow trees and other native plants, construct parking lots, 300 campsites, 20 cabins, sewage plant for the toilets, sinks and showers the potential 1000 people would need, in addition to the maintenance and operations infrastructure, residences for maintenance, on site management and emergency personnel, as well as flood the ESHA, with artificial lights, noise, traffic, and problems that this mini city would bring to Guadalupe area, thereby, de facto depriving the mostly Hispanic community from one of their only recreation sites.

The Guadalupe-Oceano Dunes beach belongs to all citizens of the State of CA to enjoy. It belongs to the animals and rare and endangered plants, Marsh sandwort, La Graciosa thistle, Nipomo Mesa lupine, Gambel’s watercress inhabiting the park that are protected by the state and federal Endangered Species Acts.

Regarding the other development projects of the PWP:

I support: closing Pier Avenue, and protection of the archeological sensitive native midden site, Oso Flaco Lake is beloved by the Guadalupe community, Birders, hikers, and visitors; it does need some “State Park Love” as it has been neglected for a long time; the drainage culvert needs seasonal attention as it is clogged by the late January storm, the boardwalk needs attention, boards have warped and edging is damaged, the concourse suffered damage with the recent wind and rain, and invasive species are gaining foothold once again, weed abatement needs to continue.

I do not support: any part of the Oso Flaco expansion, Phillips 66 expansion as it is now proposed, Butterfly Grove “improvements” creating parking lots and visitor amenities at the Monarch butterflies over wintering site, thereby potentially threatening the very Monarch butterflies that are hopefully soon to be added to the EPA’s proposed Endangered Species list for protection. Any improvements should be developed in consultation with the communities of Grover and Pismo Beach, as well as experts in the field, such as Xerces Society. Because any plan to Save the Monarchs must include planting and preserving their food source Milkweed. Nowhere in State Park’s plan is there any mention to plant milkweed! A perfect location could be along the borders of the 9-hole Golf Course adjacent to the existing Butterfly Grove.

I truly understand the desire and noble intention of State Parks to provide more camping and recreational activities to California citizens, but this disingenuous PWP does not adhere to their Mission: “To provide for the health, inspiration and education of the people of California by helping to preserve the state's extraordinary biological diversity, protecting its most valued natural and cultural resources, and creating opportunities for high-quality outdoor recreation.” It appears to me to be only a justification to keep their ATV OHV steady

stream of income and the PWP caters to these visitors at the expense residents who live in these degraded communities as a result of the destruction and negative impact of their OHV and degrading the Oceano Dunes.

If State Parks sincerely is interested in expanding camping along the California Coastline, there is at least one nearby area that would be an ideal location for an unique opportunity to camp on the California Coastline, and at the same time it could further the California Coast Walk Hiking trail that is designated but not completed, it's route is from the southern border of Oregon to Mexico; that local ideal site is at the Diablo Canyon site and the land that is adjacent to Montana de Oro State Beach.

Thank you again for your leadership on working to end the 40 year Battle at the Beach. Please vote NO on the CA State Parks Pismo and Oceano Dunes State Vehicular Recreational Area Draft Public Work Plan.

Thank you for your consideration,

Carmela Vignocchi, Grover Beach, CA.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Deborah Nelson

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Kate Amar

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Janice Reddinger

Dear California Coastal Commission,

I visit this area often whenever I visit family in California and I always find it to be a beautiful place to visit. The plan proposed to expand off-road vehicle access breaks my heart, for that will hurt the natural beauty of the Oceano Dunes State Park, which I always enjoy. Please refer to the details below about why this should not come to pass.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. **From:** PAUL DONAGHY [user@votervoice.net]  
**Sent:** Saturday, February 20, 2021 7:00 AM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Public Comment, Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

PAUL DONAGHY  
3720 W Los Altos Ave  
Fresno, CA 93711

But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Helene Giese

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Leith Hopkins

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Hello,

The Daft PWP/EIR Oso Flaco Lake "Improvement Project" would in fact destroy pedestrian use of that area. Terrible idea.

I am sick of these flag waving intimidating out of the area assholes in their big trucks. If we got rid of them and their bad vibes, Oceano and Grover Beach could become really nice areas. Property values would soar. Nipomo would have better air quality.

So yes, I support closing the beach to motorized vehicles including electric.

However, day use just parking on the beach for a couple hundred yards is maybe ok.

Thanks,

Erica Reinheimer

Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

PLEASE REJECT THIS PLAN AND IMPOSE YOUR OWN PERMIT CONDITIONS & PHASE OUT OF OFF ROADING!

We dont need more destruction. We need to enhance and protect the wildlife & habitat we seem so determined to destroy. Please. Vote preservation before the pleasure of a limited group of people who dont seem to care about wildlife and nature.

Sincerely,  
Leslie Lane

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

**From:** Glenn Delatorre [user@voterveice.net]  
**Sent:** Saturday, February 20, 2021 12:15 AM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Public Comment, Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Glenn Delatorre  
2705 Point Reyes Way

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Please do NOT open Oceano Dunes to off-roading - REJECT the Public Works disastrous plan now!!!

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
MARYELLEN REDISH

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. **Categories:** Public Comment

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Karen Froming

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act, nor with the California State Parks' mission statement. The Department is charged to provide outdoor recreational opportunities while "...helping to preserve the state's extraordinary biological diversity," not to provide recreational opportunities AT THE EXPENSE of that diversity!

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.
