Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Darlene Wyatt  
Lemon Grove, CA 91945

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
RR Madden

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act. We have laws such as the Coastal Act. It is important that we follow the laws that we have.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff. Off-road vehicle recreation should not be privileged over delicate nature in most cases, and not following the Coastal Act here emphasizes that point.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
David Leavitt

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
James Noordyk

Hello

I am a SLO county resident who has rarely visited the dunes due to the inconsistency of dune driving and environmental protection. During the time the dunes have been closed to off road vehicles I visited on two different occasions for a walk along the shore. It truly is a magnificent part of the coast line and it was so nice and peaceful for not only visitors but for the residents who own homes along the beach. Please consider eliminating all vehicle driving in the dunes. I do not even understand why state parks would put the desires of a minority of people over environmental protection. Thank you

Dear California Coastal Commission,

Come on. State Parks Planning and Recreation Services Division is going to destroy one third of the protected breeding areas for these threatened bird species to expand off road vehicle access at Oceano Dunes? I like birds; sure don't like off road vehicles tearing up the beach. Can't these guys drive around their own property or something? This is a public beach - respect the rest of us now, please.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Genevieve Deppong

Dear California Coastal Commission,

The majority of Californians live in noisy and crowded environments with motor vehicle noise and pollution a daily occurrence. Most of us live in environments dominated by cement, mortar and bricks with very small green spaces dominated by playing fields, playgrounds, and dog parks.. We need more areas that are peaceful and allow for wildlife, not more noise and hectic activity.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. **Subject:** Oso Flaco and State Parks plan

**Categories:** Public Comment

California Coastal Commission,

I am a member of Santa Barbara Audubon. Our organization has become aware of the state parks plan to transform Oso Flaco state park to be an addition to the polluting Oceano Dunes SVRA proposal.

My first question is how can a state that the governor has mandated no fossil fuel vehicles to be built by 2035 present a plan such as this?

I am pleased from the 3/18/21 Coastal Commission notice that the staff recommendation is to not expand the SVRA and to leave the Oso Flaco lake area unchanged.

The Oceano Dunes SOHVRA to the north already negatively impacts the Oso Flaco Lake Natural Area. Dust and noise from OHV activities significantly undermine the visitor experience and scenic vistas.

So we certainly don't want to expand the SVRA into the Oso Flaco area as proposed in the Public Works Plan, which would only further degrade dune habitat, wildlife, the visitor experience, as well as the air quality for even more Central Coast residents further south.

Previously, it has refused to live up to promises it has already made. In September, SLO County's Air Pollution Control Board (APCD) rejected OHMVRD's second dust control plan for failing to include dune restoration as recommended by the Scientific Advisory Group, describing it as "critically deficient.

I don't understand how a California state park administration could put forward such a plan. California, the environmental leader is planning to destroy more coastline by adding more area for OHVs. Throughout the entire presentation by the state park representative, there was never a mention of noise and dust which is a huge detriment to the coastal environment and communities.

The Coastal Commission has the power & responsibility to stop this plan & keep Oso Flaco Lake the pristine & wildlife friendly area that it is & has been.

Thank you,

Margaret Kearns

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Patricia Davis  
Woodland Hills, CA 91364

Dear California Coastal Commission,

I live in an area where much is done, including where Navy Seals are trained, to protect bird nests. That is how it should be, IMO.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
MIRIAM L. IOSUPOVICI

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Karissa Fong  
Chino, CA 91710

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Suzanne Kremer  
Solana Beach, CA 92075

T.W.M.C.

I am adamantly opposed to the expansion of ODSVRA south to replace agricultural land and disrupt the passive recreation of all kinds that takes place at Oso Flaco Lake. When I visit that awesome location I see families picnicking, people carrying fishing gear, birders like myself, and those who just want to walk to the beach and enjoy the peaceful environment.

I strongly support the Coastal Commission and the latest staff report that calls for a 5-year phase out of OHVs at Oceano Dunes.

This is totally justified and based on the law.

The pressure from OHV enthusiasts to gain access to more and more acreage for their sport is not going to get less as the years go by and there are many other places for them to go to enjoy what they enjoy. Maintaining camping on the beach will provide the family experience, without OHVs, that many have enjoyed for generations.

There are resources that just can't be consumed and destroyed to accommodate "the madding crowd."

Take Yosemite as an example. That park has had to control reservations because more people want to go there than the space can accommodate (and it's a BIG space!). To me the Oso Flaco plan is like paving over Yosemite valley to allow more people to camp in Yosemite. Thousands of people want to camp in Yosemite. That does not mean that they all can do it whenever they want.

Back to the issue at hand: the staff report is right on and the commissioners should do the right thing by supporting the staff recommendation and settle this once and for all. Let Parks spend energy and money on deferred maintenance projects of which there are many and much to be done (I worked at Hearst Castle for 11 years and I know of what I speak).

My family has owned land in Cambria for 92 years and I want what is best for the SLO community and visitors alike.

Joanne Aasen  
Cambria, CA

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
j yudell

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. State Parks DID NOT follow the focus of your directions, and the recommendations of your staff, to phase out destructive off-road vehicle access. Those directions and recommendations were there for very good reasons, and need to be upheld to protect the sensitive endangered species in the area. Especially bad is the loss of 1/3 of the breeding territory for threatened snowy plovers and least terns. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act. Please tell State Parks to go back and draw up a plan which actually follows your aims to protect an extremely vulnerable area and species.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act. And it most certainly does not protect the precious California Snowy Plovers from harm and extinction!

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Martha Goldin

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

State Parks has dragged their heels for years on developing a plan that is consistent with an ecologically sensitive area. Instead they have proposed a plan that will damage Oso Flaco Lake, I fear irretrievably. When I moved to Nipomo in 1982, Oso Flaco Lake was my go to place to access the quiet of nature. Now that I am an active birder, it is where I go to see migrant warblers, the reclusive Least Bittern, waterfowl, rails and White Pelicans. The Least Tern breeds here and adults can be seen feeding their young on the railings of the boardwalk which crosses the lake. And yes, the Snowy Plover has flourished during this past pandemic year when access to the Dunes was restricted. It was wonderful to walk on the beach this past year without the constant parade of trucks, RV's, cars—and the drone of ATV's in the background. I have given input to State Parks numerous times without hearing or seeing any response to my concerns in their development plans. I think they will ONLY respond to what the Coastal Commission rules. Please, listen to me as they haven't and appear to be influenced only by the off-roading community. Thank you for your attention.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Linda Brodman

**Subject:** Oceano Dunes' Should not Reopen Until Coastal Permit Is In Place

**Categories:** Public Comment

Dear California Coastal Commission,

As a CA resident, an outdoor/off-road enthusiast, AND a conservationist, this issue is pretty personal for me. I love bikes and all kinds of off-road fun and exploration, but it is absolutely anathema to me that there are plans to allow more of it to happen when it's not safe for certain species. I love being outside because I love nature and at all times I want to put responsibility and the greater good ahead of my own desires for fun. Everyone who participates in this kind of activity should want that as well if they get the real spirit of what it's all about.

Therefore...

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

Dear California Coastal Commission,

Last year the Coastal Commission directed State Parks to phase out off-roading with a management plan that protects Oceano Dunes' natural resources and sensitive endangered species. Instead of transitioning the park to nonmotorized recreation as directed, when the agency finally released its plan, it proposed to expand off-roading, putting recreation over conservation!

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

This plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

SLO County Does Not need more open spaces in Oceano or Oso Flaco for off road or camping. Wildlife areas are slowly shrinking & their habitat should be a Priority Not out of town off roaders!!!!

Sincerely,  
N Grantham

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Dear California Coastal Commission,

You are planning to displace and or destroy these adorable birds and other precious wildlife to accommodate off road vehicles? Seriously give me a break. This is despicable and so irresponsible. Let the off-roaders go elsewhere!!

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Mark Hurst

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Julie Levenbach

## The Significance of the Oceano-Guadalupe Dunes and the Negative Environmental, Social and Economic Impacts of Vehicles Permitted on the Beach and in the Dunes

For decades the California Department of Parks and Recreation has ignored the negative and in some cases severe negative impacts of the off road vehicle traffic of an annual average of 2.2 million trips on Oceano Beach and in the Oceano dunes. These negative impacts add additional stress to the already stressed large numbers of state and federally threatened and endangered plant and animal species. Another negative impact has been the lack of protection of the Chumash sacred sites and cultural zones within the dunes for decades. Other negative impacts are economic, social and environmental consequences for the community of Oceano and surrounding communities. Ignoring, or as some assert supporting these consequences, are contrary to the department's stated mission. Protection and preservation of habitat, wildlife and cultural resources (in the dunes these would be Chumash) are mandated as higher priorities than recreation (underline mine):

The California Department of Parks and Recreation ("State Parks") protects and preserves California's most significant natural and cultural resources while delivering public spaces to bring families and friends together. California's state parks provide a wide array of recreational opportunities for everyone's benefit and enjoyment. State Parks' legal mandate is articulated in its mission "to provide for the health, inspiration, and education of the people of California by helping to preserve the state's extraordinary biological diversity, protecting its most valued natural and cultural resources, and creating opportunities for high-quality outdoor recreation."

### The Place of the Oceano-Guadalupe Dunes

The largest California coastal dunes complex and the state's second largest dune complex, the Oceano-Guadalupe Dunes, with its wetlands, endemic flora, birds and sea and land mammals and

haulouts, was designated a National Natural Landmark in 1980. The landmark consists of two contiguous areas: 1) The Oceano – Guadalupe Dunes, which are fed by sand carried by offshore currents circulating in a littoral cell in San Luis Bay; and, 2) Point Sal, one of the last remaining pristine, rocky coastlines on the South Coast. This dune complex also maintains the highest measured dune along the entire West Coast of the U. S.

The dunes have immeasurable ecological and scenic value along with educational and scientific importance and represents one of the few coastal areas in the state still in an undisturbed condition, excluding the designated recreational areas which in some areas the California Department of State Parks has allowed complete obliteration of large swaths of flora and foredunes. Such destruction thus destroyed habitat for threatened and endangered fauna and the unknown destruction of specific threatened and endangered species of flora. There are beaches, headlands, estuaries, and lakes. Many plants are rare; a high percentage are endemic to the area. There are 22 listed state and Federal threatened or endangered plants species and 20 animal species.(see list at end of this section). At least 186 species of water and terrestrial birds have been recorded, including the Least Tern, the Peregrine Falcon and the Southern Bald Eagle. The expressed planned expansion into protected areas is contrary to the stated goals of the State Parks mission and should be prohibited.

Combined geological, meteorological and oceanographic forces shaped and maintain this land and seascape and their integrated and complex ecosystems. The geological forces include the long history of tectonic plate movement, subduction and fragmentation of plates into microplates. Two microplates, the Farallon M icroplate to the South and the Monterey

Microplate to its immediate north meet at the Arguello Canyon. The sea canyon is one of several geological land and ocean floor features caused by these forces. A combination of these features, including the coastal directional change at Point Conception from North-South to East-West, the Southern California Bite, the Channel Islands and the Santa Lucia upthrust block, in association with the meeting of several ocean currents, all contribute to the formation of the only persistent upwelling along the U. S. West Coast. The persistent upwelling provides nutrients entrained in the three mile wide pole-bound Davidson current nourishing nearshore and tidal dependent micro flora and fauna creating a portion of the foundation for the lush web of life found in the area. The meteorological conditions of the area are powered by the confluence of the meeting of two meteorological providences, the northern Oregonian and the southern Californian providences.<sup>2</sup> The demarcation line is Point Conception with northern and southern transition zones being one degree of latitude in each direction. The two oceanographic providences follow the identical outline. These features influence the area's high number of overlapping species from each of the providences leading to the high density of threatened and endangered species inhabiting the dune and beach complex.

The unique combination of semiarid and aquatic conditions with a climatic and oceanographic transition zone provides a wide variety of habitat and of associated plant and wildlife species. Coastal dunes, freshwater marshes, riparian habitat, coastal salt marsh, woodland, mudflats, beach, open water, and areas of transition between habitats provide a diversity of life uncommon to much of California.

The drainages of separate watersheds contribute to the wetland complex. The 1,880 square mile Santa Maria River drainage is one of California's largest coastal river basins. Extensive, tidally influenced wetlands sit at the river's mouth. The river's historic flood plain holds the Oso Flaco Lakes and their associated coastal wetlands. The 10 existing dune lakes are likely remainders of the freshwater bay.

About 186 species of water-associated birds have been recorded in the wetlands of the Oceano – Guadalupe Dunes Complex. Shorebirds, waterfowl, gulls, terns, pelicans, cormorants, coots, rails, loons, gerges, herons, and egrets are among those counted. Least Terns nest and raise fledglings near the Santa Maria River mouth and the Oso Flaco Lakes, Brown Pelicans roost at the shore, and Snowy Plovers inhabit the beaches. Over 100 terrestrial bird species occur among the dunes and related habitats. Among these are the endangered Peregrine Falcon and the Southern Bald Eagle.

Several plant species are found nowhere else. Two species, one aquatic and one terrestrial, reach their extreme limits with the Point Sal - Oceano – Guadalupe Dunes complex. At least eight species occurring in the dunes have been listed by the California Native Plant Society as "very rare" and "rare and endangered."

Nearly 50 species of mammals and 33 species of amphibians and reptiles inhabit the dune region. Though not in great numbers, fish are found in the lakes. There is a wide diversity of invertebrates. And the Pismo clam, subject of much recreational and scientific attention, is found along the beaches. Of the fish, the steelhead require easy entrance to Arroyo Grande Creek. State Parks without permits altered the natural course and thus flow of the creek into the ocean. The purpose of this change was for easier access to the beach for vehicles. The consequences to the steelhead are unknown.

Below are two charts detailing the numbers of threatened and endangered species in the dune complex. These species are essentially provided lip-service protection by the State Parks in this area. It is quite apparent the department in this geographical location have reversed its mandate

and prioritized recreation over protection of cultural resources and threatened an endangered species. Further proof of this is their willingness to expand off road activities into environmentally sensitive and protect areas.

Federally and State Threatened, and endangered, protected, rare species for Oceano Dunes

## Human Discharge and Other Threats to the Dunes and the associated Beach Ecosystem

### Agriculture

Historically, agriculture has had a significant negative impact on the dune complex, especially its wetlands. Estuaries were reduced, wetlands drained, and river and creek beds altered for farming and flood control. The extensive wetlands behind the dunes from Pismo Beach to the Santa Maria River have all but disappeared.

Entrained in the outflow of the Santa Maria River numerous agricultural chemicals pollute nearshore waters. This is a well known and documented toxic problem. This pollution finds its way into the food chain in numerous ways, one of which is its movement northward once captured in the Davidson north bound current. Tidal and wave action bring these pollutants to the beach damaging the micro flora and fauna. Such pollution also arrives from Arroyo Grande and San Luis Creeks mixing in the complex eddies of San Luis Bay. A warning sign has been posted at Oso Flaco Lake not to eat the fish because of contamination by agriculture chemicals.

Farmers have long denied that their applications of agricultural pesticides, herbicides and other sprayed chemicals drift. However, during the recent conflicts between these farmers and the newly approved cannabis farmers, the chemically dependent famers admitted, as an argument to prevent cannabis farming adjacent to their fields, pesticides from their operations would drift onto the cannabis crops. Agricultural chemicals and chemical fertilizers also are carried by the wind in the dust during plowing. The accumulation of these chemicals over the years have had an

unknown impact on all or many flora and fauna in the dunes.

### Outfall Pollution

The San Luis Obispo South County water treatment plant discharges through its outfall off Arroyo Grande Creek directly into San Luis Bay nearshore. It pollutes the nearshore ocean waters with chemicals not captured. Some of these pollutants are detergents, house cleaning chemicals, medications and a variety of industrial chemicals. Such discharge also arrives through an outfall from Avila Beach. All are toxic to the ecosystems.

During heavy rains urban and agricultural pollutants are washed into the local rivers and creeks. These then are discharged into the ocean adding significant amounts of toxins to the nearshore ocean environment and beaches. During these events most surfers do not surf for a few days. Those who have ignored warnings have gotten sick with many symptoms.

The damage caused by the nation's largest underground oil spill in the dunes remains under studied. When exactly the pollutants reached the tidal habitat north of the Santa Maria River Estuary remains unknown. What and how much continues to migrate into the habitat remains unknown. Impacts for parts per billion are being ignored despite the known consequences to micro organisms.

### Vehicular Pollution

Vehicular caused pollution comes in the forms of solids, liquids and gases. The primary concern of wind-blown particulate matter caused by churning and grinding of sand particles is but one problem. While its impact on humans living down wind is well documented and by itself a sufficient reason to shut down all vehicle traffic on the beach and in the dunes, there appears to

be little or no study of such impacts on the listed threatened and endangered species already stressed by others forms of pollution noted above.

Several petroleum products of unknown quantities drip from vehicles onto the beach or in the dunes. All are toxins in the ecosystems. Other toxic pollutants enter the ecosystems through exhaust. Many of the vehicles, being off road or trucks, lack street car regulations.

Not studied also is the damage to the ecosystem caused by the corrosive action of the sand to vehicle tires. Tires are known to contain benzene, mercury, styrene-butadiene, polycyclic aromatic hydrocarbons, and arsenic, among several others as well as heavy metals and carcinogens. Given the permitted amount of traffic (over 2,2 millions of “trips” per year) on the beach and in the dunes, the combined pollutants must be considered not within a suburban street assessment but as that of a busy urban thoroughfare or avenue.

Lastly, given the causes of climate change, one being exhaust pollution from vehicles, is it not time to regulate and stop unnecessary recreational pollution?

#### Light and Sound Pollution

What are the behavior changes caused by light and noise pollution of dune and beach vehicles to populations of nocturnal species? Vehicle lights on the dunes are visible from miles away at night. Depending on wind direction during the busy holidays and the summer season, the roar from the dunes sound like that of a nearby busy freeway blanketing Oceano. Given such intensities of light and noise pollution these cannot but add additional stress of the listed threatened and endangered species in the dune complex.

#### Other Pollutants

Human made pollutants enter the dune lakes and wetlands through the Black Canyon watershed, the Nipomo-Sury watershed, and the Santa Maria drainage into Oso Flaco lakes and eventually moving into San Luis Bay. These are lawn and garden chemicals and fertilizers and the complex of vehicular chemicals reaching the bay and dunes also through the Santa Maria River and other creeks. During heavy rains large amounts of such chemicals move into the dune lakes and the bay. After large storms it is not safe for surfing or other ocean water contact sports.

#### Climate Change

Given the dependency of the fragile ecosystem of the dune complex from the subtle ebbs and flows of weather conditions within the transition zone, climate change is now adding additional stress on top of the human caused pollutants damaging the ecosystems as the ebbs and flows become more extreme. The ocean’s acidity, temperature increase, and ocean level rise also are adding additional stress to ocean dependent species.

#### Observations During Vehicle-Free Beach and Dunes

During the few months of a vehicle-free beach in 2020, many individuals contributed to a general agreement of positive observations:

- 1) Quickness of the return to natural contours of the beach from tidal zones to foredunes no longer compacted by vehicles. The return to a more normal appearance enhanced the beach experiences of individuals, families a groups.
- 2) Wildlife in numbers and species expanded along the corridors of the beach while vehicle-free. Bird species such as the black headed heron were seen in numbers as high as a dozen. Ospreys were noted at the Arroyo Creek. Coyotes were seen during the day. Also seen was flock of terns on the sand at the entryway at Pier Avenue. And noteworthy many observed for the first time at low tide large numbers of small Pismo clams in the shallow intertidal zone. There were several groups of hundreds of clams south Pier Avenue.
- 3) The enjoyment increased for beach walkers. There were large numbers of beach runners and

walkers free from the usual exhaust and noise pollution and the paranoia caused by vehicle traffic. Also, large numbers of groups enjoyed family gatherings in unprecedented numbers unassociated with holidays.

#### Reopening to Vehicular Traffic

Immediately upon the opening of the beach to vehicles, the natural contours and small forming mini dunes were flattened. The newly seen wildlife fled or numbers returned to rare sightings. The clams disappeared because during low tide vehicles drove over the beds. And the “pedestrians” who once were large in numbers enjoying the beach dwindled to the usual low numbers. With the

opening of the beach to traffic, the new Pismo Reserve hiking trails became over populated.

#### Cultural Resources

The Chumash people have inhabited this portion of their homeland for millennia. A date of 20,000 years ago has been established from radio carbon dating on Los Baros Creek. The artifacts were on display at the Guadalupe Culture and Art Center which financed the dating. At that time the ocean was 14 miles further west in the bay. It is unreasonable to believe this is the earliest date of the Chumash in the area. Another date of an artifact of the same time period was dated through its geological setting at Point Conception in the late 1970s. The oldest village datings along the coast are around 10,000 years old. At that time these were not coastal but inland sites. Depending on land slant the ocean was at its furthest distance was 7 miles to the west of today’s coastline in San Luis Bay.

For a long period of time there was a mirror image in form of an estuary behind the dunes in Oceano. It is now farmland. One the Nipomo Mesa edge are the remains of extensive Chumash village activity. The estuary, dunes and beach were part of their sacred way and a major source for food and other resources.

As far as specific comments regarding the neglect shown by State Parks regarding protection of Chumash sacred and other sites over the years and the current proposed expansion, I defer to the Northern Chumash Council comments added at the end of my comments.

#### Negative Economic Impacts to the Oceano Community

Oceano was designated a disadvantaged community and Opportunity Zone by Governor Brown in April 2018. For many the obvious cause is the negative impact of State Parks allowing off road activities on the beach and in the dunes that discourages normal beach recreational activities available elsewhere on county and state beaches. State Parks actively discourages pedestrian activities at Oceano’s beach by limiting direct beach access parking at the end of Pier Avenue. Also, the limited street parking is restricted; street parking is illegal until 9 AM on Pier Avenue. Just one mile to the North, State Parks actively encourages pedestrian activities at Grover Beach off Grand Avenue by providing a vast number of parking spaces. This hinderance is contrary to the State Parks statement (underline mine), “California’s state parks provide a wide array of recreational opportunities for everyone’s benefit and enjoyment.”

But limited parking is one of many negative impacts on the community of Oceano. Traffic on the beach discourages normal beach and recreational activity for families and groups. The traffic requires constant vigilance to such a degree the numbers seen north along the vehicle-free beach do not occur. This results in a narrow spectrum of beach front businesses. Current businesses cater mainly to the vehicle oriented small portion of the wider population.

At the moment of this writing four economic studies have discussed the monetary contributions and impacts of the off-road recreation to the county’s income in the last 15 years. The first study, published in 2007, was “Economic Impact of Oceano Dunes SVRA Visitors,” prepared by

William W. Hendricks, Ph.D., et al. On page 329 they conclude that the , “. . . direct annual impacts of approximately \$70 million” is the economic contribution to the county. The main reason for coming to the dunes was, “. . . the natural resources setting of the Dunes, being with others such as friends and family, and getting away from daily routines.” This study did not analyze negative economic, social or environmental impacts caused this recreational activity by the large numbers drawn to drive onto the beach and into the dunes.

This study, like the following study which is controversial, based its findings not on objective, unbiased data and methodology, but on an assumption that those surveyed provided accurate, non inflated expenditures. Those surveyed knew their responses would influence the operation of the Oceano Dunes SVRA. The larger the expenditures, the more “positive” the perception of their economic benefits. At least the above study attempted a narrow focus on individuals, families and groups directly accessing the Oceano Dunes SVRA area unlike the following study that surveyed beyond the boundaries of the Oceano Dunes SVRA.

The second study, by Oceano Dunes District-California State Parks, “Economic Impact Analysis Report 2016/17” prepared by SMG Consulting. It is another survey with the same built-in survey bias mentioned above. A second in-built bias was the considerably wider geographical boundaries of those surveyed. It included the entire Oceano Dunes District of California State Parks: campgrounds, the Monarch Butterfly Grove, Pismo Lakes, Grand Dunes, Pismo Nature Preserve, Oso Flaco Natural Area, and the new Oceano Dunes District Visitor Center. From page six of the report we read (my underline), “This project is designed to determine the economic impact of visitors to the Oceano Dunes District of State Parks on the local San Luis Obispo County.” The report concludes the economic contribution was \$243,580,919 dollars. This “economic contribution to the county’s economy” is almost 350 per cent increase above the 2007 published survey. This 70 million dollar contribution to the local economy remains suspect. Again, like the 2007 report, no negative economic, social or environmental impacts were reported.

A major impact of this particular study, unlike the 2007 study, was the creation of a false narrative of a large economic contribution to SLO County’s economic well-being by the SVRA activities. It was immediately and widely accepted by constituent groups supporting the SVRA activities as a fact that the off road activities were the cause of this high number. Naturally, the off road vehicle groups near and far quickly promoted this figure to justify their activities as a large positive contribution to the local economy. Intentional or not, by expanding the area of economic contribution this total figure became the rallying point for keeping the SVRA open and even a justification for expanding it. The political clot of the off road lobby was increased using this false narrative. Lacking a deep critical counter study, local chambers of commerce and elected officials also accepted the results.

The Grand Jury of San Luis Obispo County during its 2019 session studied the 2019 social and economic costs of the SVRA:

- 1) County jail costs \$390,000 for 306 criminal arrests of that resulted in jail time. There was a total of 399 arrests.
- 2) 260 Cal Fire responses: \$385,000.
- 3) 265 ambulance calls and 145 transports to local hospitals. Of these 14 were ‘life or death’ Code 3 transports; most of which went to Sierra Vista Trauma Center. The Combined Arroyo Grande Hospital, French Hospital and Marian Hospital admittance total for ATV accidents was 219. There were six reported accidental deaths.
- 4) Costs to the county for public defenders and processing through the D. A.’s office are

not tracked and thus unavailable.

The grand jury did not examine the medical costs experienced by the communities of the Nipomo Mesa experiencing harmful and even deadly particulate drift caused by the SVRA activities. The churning of the sand by the dune off road activities into smaller wind-carried dust particles is well known. With the destruction of the foredunes by the off roaders, the wind-carried

amounts of these particles have greatly increased causing severe lung damage and deaths to humans. Unknown are veterinarian fees for pets. Also unknown are damages to wild flora and fauna. While such damage and loss cannot be monetized, at least this must be considered as significant negative impacts into the tens of millions of dollars, if not more.

The fourth study, ECONOMIC IMPACT FROM SUSPENSION OF THE VEHICULAR USE AT

THE OCEANO DUNES SVRA by Pratish Anilkumar Patel, is recent and at this writing just entering public discussion after stories in local news. The 4 reasons for this study were twofold: a criticism of the methodology of State Parks' 2016/7 survey and an interest in the economic impact of the closure of the beach and dunes to vehicles because of the pandemic. After criticizing the methodology of the 2018 published survey to measure economic impact, Patel uses established analytical economic impact tools to measure as closely as possible the actual economic impact of the closure to the beach and dunes traffic. His final conclusion stated, "Using

a well understood and popular DiD approach, I find that vehicle suspension had no material impact on the County's economy."

Additionally, he shows little interest exists among visitors to Pismo Beach and Avila in the SVRA. This is another indication that only a small slice of beach oriented tourists are off road dune enthusiasts. Green tourism can easily fill in the economic loss of these off roaders while at the same time end the destructive economic, social, and environmental impacts caused by driving on the beach and in the dunes.

The Covid-19 pandemic has shown that when the beach and dunes were closed to vehicle traffic, the South County economy did not change. Elected officials and chamber of commerce witnessed this lack of change and appear at this moment studying green tourism opportunities as a more robust and positive economic prospect with less economic, social and economic harm to Oceano and the surrounding communities and the environment. The above recent study, though new, has added to this conversation.

The local history of impeded economic development caused by the off road activities is available through studying the respective time periods of Pismo Beach and Grover Beach when open and later closed to off road beach activities. Economic development of both cities increased upon closing their beaches to off road vehicle activities.

THE NORTHERN CHUMASH TRIBAL COUNCIL COMMENTS

Summary February 15, 2021

Any vehicle identified in CVC section 38010 and 38012 as an OHV must be halted and eliminated from being on the Sacred Chumash Dunes complex in Oceano California. We all must look to the future generations, working diligently together to preserve and protect Mother Earth, so our children and grandchildren can play in the pristine wonders of the Dunes, and they can honor our decisions to protect and love the great Oceano Sand Dunes and not letting the Dunes be destroyed by OHV vehicles.

The State Parks PWP planning draft document lacks California Native American perspectives, indigenous spiritual understandings, indigenous religious comprehensions, and respect for the human beings that have lived on the Dunes for all time, a Chumash cathedral of life. The PWP draft document lacks respect

for Chumash Heritage and Culture.

The Northern Chumash Tribal Council (NCTC) has spoken to the preservation of the Dunes for over 50 years, asking and pleading for actions that stop the destruction of the Chumash Culture, and Sacred Sites. In our opinion little to nothing has been done to protect Sacred Chumash Sites, what we have is minimal fencing around visible Chumash Sites, fences that out-of-towners drive over thinking it funny to destroy Chumash Sacred Sites, trucks with “Proud Boys” flags driving over our Sacred Sites with no care for the importance of Chumash Culture.

Who cares about the Chumash Culture and Sacred Sites? When you read this PWP draft document it concludes that there will be no significant impact to the Chumash Culture. NCTC finds this to be completely lacking in the truth and environmental justice. The PWP planning document will take you on a “Cookie Cutter” explanation of what drives their evaluations and twisted data and misleading archaeological institutional dominate non-indigenous understandings. In the end, compiling the “Cookie Cutter” institutional explanations for the white wash determination of no impacts.

This document, a boiler plate determination of archaeologist and institutional dogma, should open everyone’s eyes to the white washing of the Chumash Culture. Why don’t we all wake up, see that the Chumash lived for over 10,000 years on the sacred Dunes sands, lived, raised children, buried the elders, looked to the heavens of majesty, opened our souls to the Sun rises and Sun sets. As stewards of the care of the diamond that is the great Dunes and landscape of wonder, all points connected, walking, collecting, hunting, fishing, and living in the Oneness of All Things.

The Chumash today hold no rights of any kind through the dominate society to practice and experience our past, with honor for our ancestors on the Dunes. The Dunes must be honored for all, environmental justice for all.

## Conclusion

Thrivability. Inclusivity. Equitability. Diversity. Accessibility. Sustainability. Collaboration. Innovation.

These are words heard clearly from our Commissioners, the Governor, State leaders, Native Nations, stakeholders, lessees, grantees, Commission staff, and the people of California, in every region and community, statewide. These empowering words echo as constant reminders of what the Commission has the responsibility to do, what it has the opportunity to change, and the role it has as a governmental leader and visionary change maker in the State of California.

State Parks has become addicted to the OHV revenues, State Parks is putting aside local residents opposition to OHV, State Parks has minimized California Native American Indigenous Peoples concerns about the long term damages already caused by OHV use, and our concerns for preserving our Sacred Lands for future generations. State Parks addiction to the OHV revenues has blinded their judgement and vision for the future. The OHV use must stop. State Parks addiction to the OHV revenues must be terminated, only then will the Dunes Thrive once again.

## NCTC FEIR Comments:

### 8.1 Regulatory Setting

In the first and second sentence, the word “cultural” is used in a way that diminishes the importance, therefore what should be used is “Tribal Cultural Resources”.

#### 8.1.1 California Environmental Quality Act (CEQA)

Second sentence CEQA recognizes “Tribal Cultural Resources”; for far too long archaeologist have tried to take over our stories, the Indigenous Peoples stories. We do not need archaeologist to tell our story, we are not archaeological resources.

#### 8.1.3.1 Unique Archaeological Resources

Once again California Indigenous Peoples are not “archaeological resources”; such a lack of “social and environmental injustices”.

Paragraph 5. Indigenous Cultural Resources do not have to be preserved in place, the word “disturbed” is often used to describe a Indigenous Sacred Place and then often considered

“insignificant”, which leads to the direct impact on the Sacred area or complete destruction, because an archaeologist could not collect data because of its designation. There goes another part of our Indigenous Heritage and Culture.

#### 8.1.3.2 Assembly Bill 52 – Tribal Cultural Resources

“Assembly Bill 52 (Gatto, 2014). Section 1 of the bill states the legislature’s intent as follows: “In recognition of California Native American tribal sovereignty and the unique relationship of California local governments and public agencies with California Native American tribal governments, and respecting the interests and roles of project proponents, it is the intent of the Legislature, in enacting this act, to accomplish all of the following: (1) Recognize that California Native American prehistoric, historic, archaeological, cultural, and sacred places are essential elements in tribal cultural traditions, heritages, and identities. (2) Establish a new category of resources in the California Environmental Quality Act called “tribal cultural resources” that considers the tribal cultural values in addition to the scientific and archaeological values when determining impacts and mitigation. (3) Establish examples of mitigation measures for tribal cultural resources that uphold the existing mitigation preference for historical and archaeological resources of preservation in place, if feasible. (4) Recognize that California Native American tribes may have expertise with regard to their tribal history and practices, which concern the tribal cultural resources with which they are traditionally and culturally affiliated. Because the California Environmental Quality Act calls for a sufficient degree of analysis, tribal knowledge about the land and tribal cultural resources at issue should be included in environmental assessments for projects that may have a significant impact on those resources. (5) In recognition of their governmental status, establish a meaningful consultation process between California Native American tribal governments and lead agencies, respecting the interests and roles of all California Native American tribes and project proponents, and the level of required confidentiality concerning tribal cultural resources, at the earliest possible point in the California Environmental Quality Act environmental review process, so that tribal cultural resources can be identified, and culturally appropriate mitigation and mitigation monitoring programs can be considered by the decision making body of the lead agency. (6) Recognize the unique history of California Native American tribes and uphold existing rights of all California Native American tribes to participate in, and contribute their knowledge to, the environmental review process pursuant to the California Environmental Quality Act (Division 13 (commencing with § 21000) of the Public Resources Code).”

“The Public Resources Code now states that “[a] project with an effect that may cause a substantial adverse change in the significance of a tribal cultural resource is a project that may have a significant effect on the environment.” Pub. Res. Code § 21084.2.”

“To determine whether a project may have such an effect, the Public Resources Code requires a lead agency to consult with any California Native American tribe that requests consultation and is traditionally and culturally affiliated with the geographic area of a proposed project. That consultation must take place prior to the release of a negative declaration, mitigated negative declaration, or environmental impact report for a project. Pub. Res. Code § 21080.3.1.”

State Parks has not consulted one on one with NCTC on this current FEIR, having informational meetings is not tribal consultation, this is a very important project that will impact California Native American Chumash Cultural Resources.

#### 8.1.6 State Parks Native American Consultation Policy and Implementation

Sentence 2. Prior to implementing projects or policies that may result in the impacts on Native American sites within the State Parks System, State Parks will actively consult with local Native

California Indian groups...” this has not occurred, NCTC has had no current meaningful consultations with State Parks regarding this FEIR PWP.

#### 8.1.9 State Parks Project Evaluation Process and BMPs for Cultural Resources

First Paragraph, Third sentence, “both a State Archaeologist and State Historian to review all projects” this statement states to Indigenous Peoples that archaeologist and historians understand our history better than Indigenous Peoples do, and in most cases their institutional backgrounds nourishes their dominant perspectives, NCTC would like to see a Tribal Liaison involved in all projects, almost all agencies in California today have Tribal Liaisons mandated by the State to assist in Indigenous perspectives understandings and communications, not institutional based book understandings only.

8.1.9. Second Paragraph, second sentence. Although State Parks thinks that they and their staff understand the Indigenous Perspectives through their educational back grounds and experience, this is not true. Indigenous Perspectives are unique to the First Peoples and therefore must be included in the brainstorming and planning of all projects that have the potential to disturb/ impact California Indigenous Peoples resources.

8.1.9 Third Paragraph. “Project components have been designed, and will continue to be designed, to avoid and minimize impacts to known significant archaeological resources and tribal

cultural resources, if identified.” The PWP design footprint is in one big California Indigenous Sacred Chumash Site, how you can pick the sites that are visible to avoid or minimize disturbance, when the whole area, the whole project footprint is a Chumash Sacred Site and Sacred Landscape.

Sentence 7 “In mobile dune environments, it is common to locate newly revealed archaeological resources in shifting sands” There are hundreds of hidden sacred middens that are the maker for our encampments, and lodges, the whole PWP project footprint is one big Chumash Sacred Site. State Parks claims that they know of 80 registered Chumash Sacred Site with half the park surveyed, we the Chumash of this Land say there are hundreds, and the whole area is a Sacred Living Landscape.

Sentence 8 “(Condition-2) Archaeological and Native American Monitoring” Monitoring is not mitigation under CEQA.

8.1.9.1 C-1: AVOIDANCE Sentence 2 “If documented archaeological resources”, our Tribal Cultural Resources are not archaeological resources, there may be things that are archaeological resources, but anything connected to pre-historic Tribal Culture are “Tribal Cultural Resources”. The meaning of avoidance for NCTC is the absence of any and all human intrusions that may have possible impacts to the Tribal Cultural Resources, which would be identified by the Tribal Governments review.

#### 8.1.9.2 C-2: ARCHAEOLOGICAL AND NATIVE AMERICAN MONITORING

Californian Native American Indigenous monitoring must be included in any and all project that have a Tribal Culture aspect, from Sacred Landscape to Villages, not just when someone classifies Sacred soils as disturbed, to all Indigenous Peoples disturbed and undisturbed are the same thing, containing the essences of our Ancestors lives. California Indigenous Peoples have equal standing with any and all anthropologist and archaeologist.

#### 8.2 Environmental Setting

Second Paragraph. “There are at least 48 identified and recorded cultural resources within the PWP planning area.” The entire PWP planning area is one Chumash Sacred Site and Living Landscape, and area where thousands of Chumash lived for over 10,000 years. State Parks is

minimizing the importance of this Sacred Landscape by only emphasizing 48 cultural resource sites, the Chumash live throughout the entire Dunes habitat with ever changing landscape building Chumash life ways one on top of another. Geological sand dune movements over the last 10,000 years are phenomenal.

#### 8.2.1.1 Archaeological Resources

California Indigenous Peoples Tribal Cultural Resources are not archaeological resources and should always be respected in the proper context. Archaeology has been trying to take our stories over for several hundred years, and Indigenous Peoples are not an archaeological resource.

#### 8.2.2 Native American Consultation and Coordination

As can be seen from looking at the Table 8.1 Summary of PWP Consultation Efforts, the last effort that State Parks made to have meaningful consultation was May 15, 2018. As NCTC has stated previously in this document, no meaningful consultation has occurred, one or two meetings do not qualify as meaningful consultation, Indigenous comments and opinions must be included into the process.

Meetings with a tribe that include other tribes, agencies, or the public are not a substitute for mandatory consultation with that individual tribe. "Tribes are not interchangeable, and consultation with one tribe does [not] relieve State Parks of its obligation to consult with any other tribe that may be a consulting party under CEQA."

#### 8.2.2.1 Tribal Cultural Resources

Sentence 1 "Consultation conducted in support of the PWP EIR has not resulted in the identification of tribal cultural resources within or immediately adjacent to the PWP planning area." NCTC finds this statement to be misleading at best, NCTC informed State Parks of the importance of the Chumash Sacred Landscape which encompasses the project area. Additionally the Phillips 66 proposed developments area is one huge Chumash Site, NCTC personally worked on the recent survey conducted by Phillips 66 for the expansion for the oil railroad project. Over 75% of the Phillips 66 site is a Chumash registered Sacred Site, and State Parks is proposing to destroy our Sacred Sites with OHV tracks and camp sites, not social or environmental justice in our understanding, nor has there been meaningful ongoing consultation.

#### 8.3.3 Impacts and Mitigation

Sentence 1, "Implementation of the PWP is not expected to result in a substantial adverse change in the significance of an archaeological resources as defined in Section 15064.5." This statement is not true, misleading, and makes conclusions leaving out substantial additional Tribal Cultural Resources data and information currently available through a simple records search. Phillips 66 Tribal Cultural Resources data was not included in this report, vital information. Additionally, once again Indigenous Peoples are not archaeological resources.

#### 8.3.3.1 Ongoing Park Operations and Regular Maintenance Activities

The ongoing park operation fall short of offering protections to Chumash Sacred Site.

#### 8.3.3.3 & 4. Oso Flaco Improvement Project (Initial and Future)

NCTC does not support the the additional use of the area. It would degrade the Chumash Sacred Landscape.

#### 8.3.3.5 Park Corporation Yard Improvement Project

Any and all proposed disturbance to native soils in or near Tribal Cultural Resources must include meaningful tribal consultation prior to finalization of work to be performed.

#### 8.3.3.6 Oceano Campground Infrastructure Improvement Project

Native American monitoring is not mitigation under CEQA. Meaningful consultation must be included prior to any finalization of plans for proposed project in this area.

#### 8.3.3.7 Pier and Grand Avenue Entrances & Lifeguard Towers Project

Meaningful consultation with Tribal Governments must occur.

#### 8.3.3.9 Butterfly Grove Public Access Project

Meaningful consultation with Tribal Governments must occur prior to finalization of proposed plan.

#### 8.3.3.10 Pismo State Beach Boardwalk Project

Native American monitoring is not mitigation under CEQA. Meaningful consultation with all affected Tribal Governments must occur prior to finalization of plans.

#### 8.3.3.11 Phillips 66/Southern Entrance Project

Tribal Cultural Resources were mapped and registered during the tribal cultural resources surveys done about 3 years ago, during the Phillips 66 rail extension for the transportation of additional crude oil to the Phillips 66 plant. Many sites were defined and recorded. If State Parks had been having ongoing meaningful consultations with NCTC they would have known this, Applied EarthWorks performed the on the ground survey. Phillips 66 site and proposed OHV road to the dunes is covered with sensitive species and many Chumash registered Sacred Sites.

#### Impact 8-2

The potential for human remains in our Indigenous Perspectives is extremely high, looking at the large area of Chumash Sacred Landscape, therefore it is NCTC position that the cumulative impact for human remains is very high, and must be a class 1 impact.

#### Impact 8-3

Consultation with Tribal Governments back in May of 2018 is not meaningful or ongoing consultation. In NCTC comments in the May of 2018, NCTC did strongly identify Tribal Cultural Resources as Chumash Sacred Landscapes, therefore the cumulative effect on these Sacred sites requires extensive tribal meaningful consultation, and must be mitigated.

#### 8.4 Cumulative Effects

Californian Native American Chumash Peoples lands stretch from Malibu to Ragged Point, inland to the Carrizo Plains. Today we the Chumash People have been able to protect less than 1% of our 100% stewardship of these lands, every small piece of impacts to our Sacred Sites from project like the PWP is a major loss, when you add up all the proposed impacts from our Indigenous Peoples perspectives we see great cumulative effects. Any loss is the loss of a priceless resource, not renewable. NCTC finds State Parks determination of “not expected to result in significant cumulative effects” to be false and misleading from our Indigenous Perspectives.

Thank you for the opportunity to comment on this FEIR for the Oceano Dunes proposed PWP projects.

Northern Chumash Tribal Council

The area's complex topography is the result of the meeting place of three major tectonic plates. The Farallon Plate, moving eastward, was subducting beneath the North American Plate. As the Pacific Plate moved northwest, the subduction eventually ceased in our area. Remnants of the Farallon Plate, microplates, were captured by the Pacific Plate beneath the North American Plate;

continental margins of the North American Plate became part of the Pacific Plate. That is, all land and sea floor west of the San Andreas Fault that was part of the North American Plate, became part of the Pacific Plate. The microplates ride the Pacific plate (see for details:

[californiahttps://pubs.geoscienceworld.org/geosphere/article-lookup/1/3/147](https://pubs.geoscienceworld.org/geosphere/article-lookup/1/3/147)

As the Pacific Plate continued its northwest migration subducting under Alaska, it rotated the

Arguello Microplate, also known as the Transverse block, forming the Southern California Bite. It is bordered on its eastern side by the Transverse Range, on the West side by the Channel Islands with the Ventura-Santa Barbara Basin in the middle, and to its north, the Arguello Canyon. The rotation ended with the capture of Baja that now presses against this block causing folding and uplift.

The Monterey Microplate from the Farallon Plate, beneath western Santa Barbara County and San Luis Obispo County, is bordered on the East by the San Andreas Fault, on the West by the Santa Lucia Bank and the Santa Lucia Escarpment and on the South boundary by the Arguello Microplate. This boundary's exact location is within the Arguello Canyon, a significant conduit directing the West Coast's only persistent upwelling that provide nutrients for the nearshore and micro beach flora and fauna. The Monterey Microplate is deformed with a subsistence slant from the coastline to the Santa Lucia Bank. The Santa Lucia Bank is tilted with the uptrust on its eastern most side. Running nearshore is the Hosgri Fault, another huge crack in this microplate. The persistent nutrient-rich upwelling flows up the Arguello Canyon, enriching the Santa Lucia Bank, the Arguello Canyon and coastal waters from Point Sal to Point Conception. Here, in a transition zone blending upwelling nutrients with warm water from the South and cold water from the North, a unique, complex interaction of species and natural phenomena occurs. Feeding the web of life along the eastern rim of the Pacific Basin, the nutrients spread through and beyond both the dune tidal area, feeding planktonic communities, plants of the kelp forests, and various life stages of marine flora and fauna.

The northern portion of the transition zone between Southern California warm waters and Northern California cold waters is defined as beginning at Point Conception and extending 2 degrees north to 36 degree north latitude (20 miles south of Point Sur at Mill Creek Canyon). The proposed sanctuary expansions cover this area north to Santa Rosa Creek. The area is the meeting place of the Oregonian Temperate Eastern Pacific and the Californian Subtropical American Eastern Pacific climates and waters. The region is dependent upon as well as a cause of the complex interaction of the southward moving California current, the warmer northward moving subcurrent, the near-shore northward moving seasonal Davidson Current, and the upwelling. The dynamics are not fully understood, and systematic, ecosystem-based research is needed.

The Oregonian weather pattern brings strong northwesterly winds during the spring, a cool marine layer with much fog during the summer, and generally strong wet storms during the winter. The warm, clear autumn months are generally dominated by the California Subtropical climate, which also tempers colder winter weather from the North.

The California Current system flows from the North Pacific and is driven by planetary rotation and large scale winds. Offshore circulation is dominated by this current for most of the annual cycle. The current flows along the surface and near surface at the edge of the continental shelf. It is generally composed of low-temperature, low-saline, subarctic waters. The current's position and intensity varies with season and latitude; several coastal currents oppose it.

At the inner edge of this system is the California Undercurrent, characterized by warm saline water. The undercurrent ranges to within 100 kilometers of the coast; it runs from Baja California to Washington State. The undercurrent surfaces in the winter along the coast of Central California.

**Categories:** Public Comment

Dear California Coastal Commission,

When my mother used to visit her oldest friend, she took me to Oceano. We visited the dunes and marveled at the survival of snowy plovers there in the sand, their natural habitat for reproduction.

I've read about the plan of State Parks, which I usually consider on the right side of environmental protection, having plans to allow off road vehicles on the dunes. I ridden such vehicles on dunes along the Oregon coast, and after witnessing the damage, I definitely don't want to see that in California.

Please don't approve the Public Works Plan for Oceano Dunes State Park. It would not protect precious coastal resources there or endangered species, especially the marvelous snowy plover, and it doesn't satisfy the requirements of our 1972 Coastal Act.

Having directed State Parks to evaluate phasing out off road vehicles so as to move the park to excluding recreation with motorized vehicles, you must be upset with the proposed plan. It gives priority to motorized recreational vehicles off-road over protection of wildlife and fails to handle resource-protection issues that your agency has raised. Moreover, the plan doesn't even evaluate phase-out of such vehicles over a five-year time period, nor even the somewhat questionable alternative of limits for beach driving or camping proposed by your staff.

The plan fails to adequately discuss the solutions to specific issues that your agency had requested them to address: the crossing at Arroyo Grande Creek, any plans for endangered shorebird nests, and destructive off-road rides during the night, nor vehicle and camping use limits. Instead, the plan suggests only inadequate interim measures, vaguely promising future studies with uncertain outcomes.

Specifically, the Public Works Plan would damagingly open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Christopher Hamilton

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Last year your own commission directed State Parks to phase out off-roading with a management plan that protects Oceano Dunes' natural resources and sensitive endangered species. Instead, when the agency finally released its plan, it proposed to expand off-roading, putting recreation over conservation.

This awful plan would slash protected breeding areas for snowy plovers and least terns by one-third. Despite the fact that snowy plovers are threatened species! It also proposes a 120-acre development near Oso Flaco Lake, with yet more off-roading areas, hundreds of campsites, massive parking lots, offices, houses, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Don't let off-roaders drive snowy plovers to extinction. Reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Thomas Reif  
Huntington Beach, CA 92646

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Please care.

Sincerely,  
valerie Cooper

**Subject:** Oceano Dunes OHV

**Categories:** Public Comment

California Coastal Commission,

The Coastal Commission's purpose is to "**protect and enhance**" the California coast. The California State Park at the Oceano Dunes operates in willful disregard to this mandate.

I am a retired local physician and my wife is a retired marine biologist who helped direct the Channel Islands National Park development. We live near the Oceano Dunes and we both believe deeply in scientific knowledge. We have wanted to believe that reasonable people would come to understand, through basic observation and scientific knowledge, the destructive nature of OHV activity on the dunes. Scientific investigation has clearly demonstrated how OHV activity disrupts the natural dunes formations. It is now clear that this activity results in loss of wildlife, environmental degradation, air pollution and medical illness. More recently this activity is now shown to contribute directly, through small particles (PM 10), to serious lung and heart disease. As our local community has grown, we are now at a juncture that may represent the beginning of a community medical crisis. There is a significant increase in respiratory illness in our local area. Pulmonologists are now recommending respiratory patients move from our area because of the air pollution and dust conditions. We are aware that Coastal Commission staff are recommending a 5 year phase out of OHV activity. I would suggest shortening this time period because of increasing medical illness.

It is clear that the OHV activity cannot continue on the Oceano Dunes. California is currently at the forefront in environmental concerns and leads the world in highlighting the correct path. If we are to be serious and resolute in these concerns, then there is no real choice for the Coastal Commission.

Respectfully,

Allen R. Doran, M.D.

**Subject:** Stop Oceano Dunes' Reopening Until Coastal Permit Is In Place  
**Categories:** Public Comment

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. Since this plan doesn't adequately protect coastal resources or endangered species, and doesn't comply with the Coastal Act, why is it even being put forth for possible approval?

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third.

It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County. Birds provide ecosystem services we all depend on that would be destroyed by such an ill-conceived development. 2.9 billion breeding adult birds have been lost since 1970 because of humans.

As a reminder the mission of CA State Parks is: To provide for the health, inspiration and education of the people of California by helping to preserve the state's extraordinary biological diversity, protecting its most valued natural and cultural resources, and creating opportunities for high-quality outdoor recreation.

Off-roading is not a high-quality recreation.

and other language from your website:

"Together, state park system lands protect and preserve an unparalleled collection of culturally and environmentally sensitive structures and habitats, threatened plant and animal species..."

Please resoundingly reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Paola Berthoin  
Carmel, CA 93923

**Subject:** Trash on the beach south of Oso Flacco Lake

**Categories:** Public Comment

Dear Commissioners:

Walking south from where the boardwalk at Oso Flacco Lake meets the beach, one crosses a little creek. Few people venture south of the creek, so soon one is walking on a nearly deserted beach. Which is covered with garbage. More than a single trash bag could hold, even a hefty sized one.

How is it that a nearly deserted beach accumulates so much trash? No one is around. The wildlife on the nearby Guadeloupe dunes are not bringing it in.

No. The trash is being washed down the beach from the Oceano Dunes SVRA. Typical ocean tides carry flotsam offshore on the outgoing tide, only to redeposit it further down the coast on the incoming tide.

Trash harms wildlife which eats it and gets stuck in it. Plastic disintegrates into tiny bits that last for centuries. There is a reason we call it waste. It turns our coastline into a wasteland.

Our coast is too precious to allowed to be destroyed in this way. Once we stop the source of the trash, we can begin to heal the coast and beaches.

Please close the Oceano Dunes SVRA to all vehicles, effective immediately. Protect our coast and beaches.

Sincerely,  
Alice Reinheimer

Arroyo Grande, CA

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Sheila Goldner

**From:** Dale Johnson [dalepsi@dslextre.me.com]  
**Sent:** Friday, February 19, 2021 5:45 PM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Public Comment, Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Dale Johnson

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
anne veraldi

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't protect coastal resources or endangered species, and it doesn't comply with the Coastal Act. It, instead, promotes damaging exploitation.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan does the opposite. It prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan ignores solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

I understand that some people enjoy motorized recreation. It has a place. That place is not sensitive shoreline environments. The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Gloria Elizabeth

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Jason Nolasco

**Categories:** Public Comment

Dear California Coastal Commission,

Please, please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, such as enchanting snowy plovers, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan is the antithesis of your instruction—instead, it prioritizes off-road recreation (!) over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes. Of course, we all know it will be too late to leave things in such an uncertain and nebulous future....

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff. As the human species, we must come to understand that we have a responsibility and an obligation to share the planet with all species and to ensure their survival. That means taking them into account in such proposals, since they cannot speak for themselves. We must do so, on their behalf. We can't always continue to confiscate land that is needed for wildlife to merely exist because we wish to build more homes, etc. Ultimately, all species have an intrinsic right to survive and live as nature intended.

I thank you for doing what is ethically right, responsible, and proper for these animals. And, I thank you for protecting those who cannot speak for themselves.

Sincerely,  
M. B

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

The elimination of gasoline powered OHVs for recreation is especially relevant in light of the need to reduce CO2 emissions and greenhouse gasses. This is a priority of our Governor.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Krista Sexton

Dear California Coastal Commission,

I realize that a balance must be struck between recreation and conservation. However, allowing development and increasing off-road vehicle access to sensitive areas will only destroy the value of the lands and reduce the number of people who can enjoy those areas.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. Dear State Parks and California Coastal Commission,

I am writing in opposition to the State Parks Plan for Oso Flaco Lake.

I am shocked by the idea of putting so much infrastructure there as well as the number of people that would be involved. This plan is incompatible with the area and will do permanent damage to the environment. We should be working toward phasing out ORV use in the dunes, not building the facilities to attract more.

**Categories:** Public Comment, Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Paul Bonnel

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Elizabeth Coombs

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Frank Burke  
Los Angeles, CA 90007

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act. Besides, it is a really bad idea. Please!

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Mary Kennedy

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Donald Andreini  
San Francisco, CA 94114

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Debra Baker

**Categories:** Public Comment

Dear California Coastal Commission,

I am deeply troubled by the Public Works Plan for Oceano Dunes State Park. This highly flawed plan fails to adequately protect coastal resources and endangered species. And it does not comply with the Coastal Act!

At the same time your commission has directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation, this plan inexplicably prioritizes off-road recreation over protection of wildlife! Further, it does not address the resource-protection issues your agency raised, and completely fails to evaluate the five-year off-road vehicle phase-out, limited beach driving, and the camping alternative proposed by your staff.

This plan abdicates solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, this plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes. This is unacceptable.

Tragically, this Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third! Moreover, it also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. This misguided plan leaves sparse habitat for wildlife, while also destroying one of the best birdwatching spots in San Luis Obispo County!

I implore rejection of this irresponsibly disastrous plan and instead, impose your own permit conditions and a phase-out of off-roading, as recommended by your staff!

Sincerely,  
Susan Mayer

**Subject:** New Activities At Oceano Dunes

**Categories:** Public Comment

I recently heard a rumor that more camping, off road activities etc. was being considered at the Oso Flaco Lake area and at the Phillips 66 Facility area. At first I thought I thought this must be a bad joke. Don't get me wrong. I'm far far from being any tree hugger. I was under the impression that many people wanted to reduce these activities at the current Oceano Dunes area and now this is being considered. I believe that the activities at these new areas should be limited to nothing but hiking and horse back riding. Let's keep these new areas pristine for eternity for all future generations. The current area allows more than enough space for the camping and off road folks. If push comes to shove I believe that this proposal for Oso Flaco Lake and Phillips 66 area should be put to a vote by the 5 cities residents. We are the ones who will be impacted the most. My wife and I moved from San Diego in 2003 as that area was being spoiled by changes not too different than the ones proposed here.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

It will slash protected breeding area for threatened snowy plovers and least terns by one-third! It would leave little room for wildlife, and destroy one of the best birdwatching spots in San Luis Obispo County! I really like bird watching and I don't think you should destroy one of the best spots in San Luis Obispo County. Also, if you have lots of off-roading areas, hundreds of campsites, massive parking lots, offices, houses, and other infrastructure near Oso Flaco Lake, then you would cut down the breeding areas for snowy plovers and least terns by ONE-THIRD! That's a lot! And they are threatened and endangered species, too!

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over the protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Nabila Badawy  
Redondo Beach, CA 90277

Dear California Coastal Commission,

I am so sorry to see that saving coastal land for such birds as Snowy Plovers isn't NUMBER ONE compared to allowing off-road vehicles access to Oceano Dunes State Park. Being a person born and raised in CA, I've seen us losing more of our beautiful coast for human activity and it is not the way it should be!

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Nancy Hiestand  
Davis, CA 95616

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

If you are going to allow vehicle and people to access to these beaches then you need to open Surf Beach in Santa Barbara County to all access. It has been closed for decades to walking, swimming and fishing. Also open the Ocean Park to water skiing as it was in the '50s & '60s along with fishing and bird hunting.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Katarina Grabowsky  
Castro Valley, CA 94546

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Robert Trent  
Nevada City, CA 95959

**Subject:** Written Comments on Oceano Dunes PWP for March 18th Meeting

**Categories:** Public Comment

To: Members Of The California Coastal Commission,

We've reviewed California State Parks' latest Public Works Plan/EIR for the Oceano Dunes Park and Oso Flaco Lake wildlife area. It is abundantly clear that their planners have ignored the directions of the California Coastal Commission, agreements with the San Luis Obispo County APCD, and the input of citizens who live in communities bordering the Oceano Dunes.

For years local residents have asked that State Parks address the undeniable problems brought on by OHVs on the dunes:

- The destruction of the dunes and native vegetation.
- The ruin of habitats for endangered species and the loss of precious wildlife.
- The air/dust pollution that carries into the lungs of men, women and children living in the vicinity of the dunes.
- The local streets laden with sand stripped from the beaches, and never replaced to protect our shore. Rather, it is eventually hauled off to a nearby landfill.
- The ongoing OHV roar of revving engine noise ... an offensive noise pollution that carries miles beyond the park itself.
- The never-ending hordes of OHVs that act as if they own the beaches and the rest of us be damned.
- The ATVs, pickup trucks and RVs that, regardless of park rangers, have a complete disregard for speed restrictions ... endangering families seeking to have safe, peaceful outings ... putting their lives at risk as they walk from the dunes to the ocean.
- The vehicle exhaust that families must breathe as vehicles pass by.
- The gun violence that has occurred when off-roaders gather and "party" (sometimes at non-permitted events).
- The on-site OHV accidents and personal injuries/deaths that have become a way of life for aggressive, reckless riders.

State Parks response to "fixing" the Oceano Dunes unit is spelled out in the PWP:

- Turning the pristine Oso Flaco location into a **Magic Mountain** for thrill-seeking riders on ATVs, dune buggies, dirt bikes, pickup trucks ... all with destructive, heavy-duty tires and deep, open treads.
- Even greater acreage for OHVs to roam and tear up the landscape.
- Opening the door to an even greater negative impact on native vegetation, wildlife habitats and the species themselves.
- No limits on the quantity, types or sizes of OHVs.

- The introduction of on-site facilities to make riders' activities more electrifying and convenient than ever ... a “kids’ track”, “pro tracks”, cabins, concessions ... thereby attracting even larger throngs of vehicles more frequently.
  - A “Special Event” arena (e.g., the potential return of the out-of-control “Huckfest” ... “*the world’s largest offroad jumping competition*”).
  - No real plans to significantly reduce air/dust pollution ... just vague statements implying that somehow it will work out sometime in the distant future.
  - No new scientific studies or EIRs regarding the impact of the new Oso Flaco sites and its activities on the air/dust pollution that the winds will drive into local communities.
  - Suggestions for yet another entrance via the Phillips 66 property, which will put thousands of vehicles and enormous RVs on the one-lane, coastal Highway 1 and feeder roads, bringing far more air pollution, noise and traffic jams even closer to local citizens and businesses.
- **No mention of any area of peace and tranquility at the park.**

The PWP states that State Parks' new plan is bringing “*an acceptable balance between motorized recreation and protection of natural resources.*” That’s an outrageously misleading statement. Where does the “balance” truly address the needs of the environment and local communities? State Parks' scale of “balance” is brazenly weighted in favor of “motorized recreation.” The environment and local communities are a minor or non-existing part of the plan’s equation!

In reality, the State Park’s PWP planners are rewarding those who bring havoc to the dunes, all in the name of revenue generated for State Parks.

All of the above is why we welcome your recent statement/press release - “California Coastal Commission to Consider New Activities at Oceano Dunes.” You obviously recognize that State Parks has disdain for the stated views and directions of the California Coastal Commission, and that you will not allow them to continue on their destructive path.

We wholeheartedly endorse your staff’s recommendation to protect the Oceano Dunes and Oso Flaco Lake from the incursion of OHVs, and to “*reimagine the Park operating in a more environmentally sustainable way.*” We look forward to your March 18th hearing.

Respectfully,  
 Thomas and Gail Ryan  
 Nipomo, California

It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Julie May

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Dorothea King

**Subject:** Re: Public Hearing Notice, California Coastal Commission Hearing on Oceano Dunes CDP 4-82-300 Review

**Categories:** Public Comment

Good afternoon.

Thank you for this. There was info in our local newspaper about the hearing. Now that Eric Howell is no longer on the Commission, I do not know what is going to happen. Naturally people are up in arms about closing any of the Dunes. There are reports about how much money funnels into Grover when the idiots are here. All I see are people at the service stations, in their convenience stores; and people going up and down Grand Avenue with the American flag upside down in the back of pick-up trucks, Trump flags (still) in the back of vehicles, and graffiti on signs and buildings when they all leave. I have put up with this since 1974.

All is well. Robert is in a virtual City Council meeting discussing city priorities for 2021-2024. I am working away on this wonderful trash paper. At the request of my Content Expert (who I chose as I met her during my last Residency on campus) with plenty of reasons for a possible change in my committee members, I now have a new Methodologist, one added member to oversee my progress, and a suggestion for a top-notch editor who I will need at the end. My Chair pushes me along every day.

Dogs are good. Moxie was two on the 13th of this month. Weather is beautiful.

Tomorrow is one year since my left hip surgery. I am great!

How about you?

Love,  
Neetzie

**Attachments:** Chevron-Union Oil\_\_Guadalupe Restoration Project\_Handout.pdf; Oceano Dunes plan would turn refinery land into a massive newpark area.docx

**Categories:** Public Comment

To: Members Of The California Coastal Commission ...

We've read newspaper articles (*see attached*) wherein California State Parks' is discussing its intent to acquire the Phillips 66 Refinery property in Arroyo Grande, and using the acreage to increase the size of it's Oceano Dunes off-road riding park.

This idea is completely at odds with reducing the environmental impact of off-road riding on the Oceano Dunes, and on the neighboring Nipomo Mesa community.

There is a significant amount of extremely hazardous chemicals on the surface and under the surface of the Phillips 66 refinery property. The extent of proper soil remediation would necessitate a remediation project similar to that which Chevron is now undertaking on the old Union Oil property known as the Guadalupe Restoration Project (*see attached file*). That site is just north of the Santa Maria River and west of Highway 1 in San Luis Obispo County. The Guadalupe Restoration site is approximately 10 miles south of the Phillips 66 refinery property.

The goal of the Guadalupe Restoration Project is to return native plants to the entire acreage. This also should be the goal of any remediation and clean-up of the entire Phillips 66 refinery property in Arroyo Grande.

Please do not allow the California State Park's Oceano Dunes unit to acquire the Phillips 66 refinery property. California State Parks have demonstrated over the years that they cannot be trusted to adhere to the mission of the California Coastal Commission.

We look forward to your March 18th hearing.

Respectfully,  
Thomas and Gail Ryan  
Nipomo, California

# guadalupe restoration project

## soil management area

### background

- Property is a 2,800-acre former oil and gas production facility operated from 1949 to 1994 with approximately 240 oil producing wells and over 180 miles of pipeline.
- for impacted soil and groundwater began in 1996.
- 1.36 million gallons of diluent have been recovered to date, and 1.11 million cubic yards of non-soil have been removed and hauled since 2006.
- Approximately 260 surface acres have been remediated and restored or are under restoration, including 21 wetland restoration locations.

### what's happening now

- There is ~1.85 million cubic yards of non-hazardous hydrocarbon
  - This volume requires 69,720 haul trucks (3,000,000 total)
  - Issues with current project:
    - T infrastructure wear-and-tear
    - Air pollution/emissions
    - onsite, excavation, and stockpiling)

### what's being proposed

- soil would be managed onsite in an engineered Soil Management Area (SMA).
- Designed to exceed the CCR Title 27 requirements (double liner system)
  - The proposed location is within a previously disturbed area that will undergo remediation and restoration
  - Nearest residential/commercial/industrial development is ~2 miles away
  - Title 22 regulations will be placed within the SMA
  - No on-site construction debris, household, or other waste will be placed within the SMA

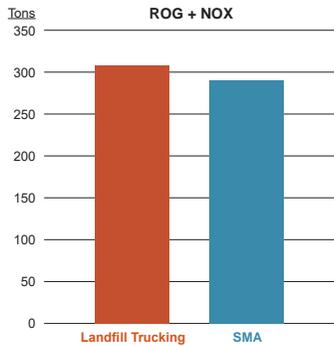

The proposed project would eliminate over 69,000 haul truck round trips on public roadways, resolving the major issues with transporting offsite.

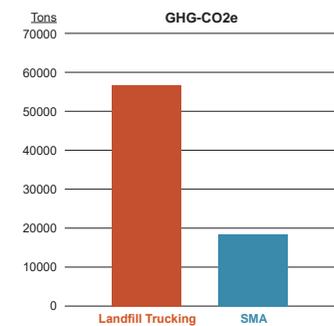

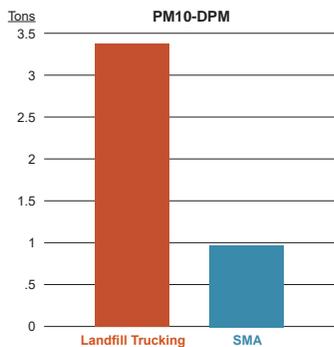

The proposed location for the SMA (highlighted in the yellow box above and at left) is 18.2 acres; less than 1% of the total property.

## benefits of the proposed project

- 69,720 fewer haul truck round trips on public roadways
- Greatly reduced air emissions:
  - Lower ROG and NOx Ozone Precursor emissions
  - 71% Lower Diesel Particulate Matter (DPM) emissions
  - 67% Lower Greenhouse Gas (GHG) emissions

Air emissions shown are total tons for 2021-2016 project period.

- The SMA is less than 1% of total property
- The SMA will be restored to match surrounding topography
- No negative impacts to wildlife
- No negative impacts to humans
- The SMA will be monitored in accordance to CCR Title 27 requirements (30+ years)
- Soil placed in the SMA will be amended with nutrients to enhance biodegradation process

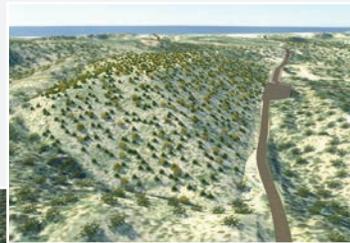

## SMA looking forward

*Present Day:* The proposed SMA is a 18.2-acre depression in the natural landscape and contains former oil field material requiring remediation and restoration.

*After 5 Years:* The SMA is double-lined with a leachate collection system, filled, and capped with 4 feet of clean soil. Natural vegetation is beginning to establish.

*After 10 Years:* The SMA is fully restored and matches the surrounding undisturbed habitat as a result of the proven restoration program implemented at the Guadalupe Restoration Project.

# Oceano Dunes plan would turn refinery land into a massive new off-road playground

SLO Tribune

[By Mackenzie Shuman](#)

February 12, 2021 08:00 AM,

California State Parks has announced plans for a massive recreational development on the Phillips 66 Santa Maria oil refinery property, even though the oil company will not [cease operations at the plant near Arroyo Grande for another two years](#).

Those plans, proposed by State Parks in its Public Works Plan and subsequent environmental impact report, hinge on whether the agency buys or leases the property from Phillips 66.

Additionally, State Parks would have to wait until the property has been remediated from the environmental damage caused by the oil refinery before it could begin construction, according to the Public Works Plan.

State Parks says it wants to develop on the land to “support recreational activities” for the nearby Oceano Dunes State Vehicular Recreation Area. Should State Parks acquire the Phillips 66 property, about 1,800 acres would be added to the nearly 3,500 acres the park currently encompasses.

Bernardo Fallas, a spokesperson for Phillips 66, told The Tribune that the energy company is “aware of the California State Parks conceptual plan” and it “has no comment on the plan at this time.”

## History of Phillips 66 Santa Maria refinery

Located off Highway 1 just north of Willow Road, the Santa Maria Refinery [was built in 1955](#) by the Union Oil Co. of California. Through the years, the energy company was bought by Tosco Corp., Phillips Petroleum and eventually ConocoPhillips — from which Phillips 66 was formed in 2011.

On average, the facility produces about 44,500 barrels of crude oil per day and employs 140 people.

The entire property encompasses 1,780 acres, but only 200 acres are used for the refinery and other Phillips 66 operations. The remaining 89% of the property is used to graze cattle and for nature preservation purposes, according to the oil company.

The crude oil produced at the Santa Maria Refinery is transported north by a 200-mile pipeline to a refining facility in Rodeo on the banks of the San Pablo Bay.

In August 2020, the [refinery announced plans to end](#) its 66-year run in 2023 because its sister refinery in Rodeo is set to transition into the world's largest renewable fuels plant, according to the company.

Phillips 66 Santa Maria Refinery next to Highway 1 on the Nipomo mesa can be seen from Oceano Dunes SRVA California Department of Parks and Recreation.

## **State Parks plans for massive development on Phillips 66 property**

State Parks is the first to come forward with comprehensive plans to transform the coastal property into something new.

Included in the agency's roughly 900-page plan and report released at the end of December 2020 were ideas for extensive new facilities on the property.

They include:

- An entrance kiosk, visitor center and concessions for groceries and general merchandise;
- Six acres of paved parking spaces and 25 acres of staging areas for off-highway vehicles that would include picnic tables and stoves as well as concessions for OHV equipment rentals;
- An OHV track for youth, a 33-acre professionals-only track for motocross, ATV practice and quarter midget racing, and a separate area for a 4-by-4 obstacle course, plus a training area with an OHV safety and basic training center;
- An environmental education center that could include a campfire center, outdoor classroom and amphitheater; and
- An RV sanitation station with space for two three-hole dump stations.

Additionally, State Parks wants to build 225 RV campsites, up to 20 cabins, 50 drive-in tent sites, 25 hike-in or bike-in sites and a minimum of six group campsites. Another 15 acres would be allotted for equestrian use and up to 75 more campsites.

A new office building for park operations could be added to the property, along with storage facilities, residences for park staff and a weapons range for peace officer training.

OHV and walking trails would connect the Phillips 66 site to the southern part of the Oceano Dunes park and beach area, according to the plan.

State Parks' conceptual plan identifies area for possible development at the Phillips 66 Santa Maria Refinery property. Courtesy of California State Parks

## **Land set aside for conservation in decades-old agreement**

A portion of the Phillips 66 site — 630 acres — was set aside in January 1999 for preservation, according to the Guadalupe-Nipomo Dunes Preserve Management Program released in 2000.

An agreement between State Parks and Tosco Corp., the oil company acquired by Phillips 66 in 2001, stated that 630 acres along the western part of the property would not be developed, to maintain “the sensitive ecosystem that exists on the property.”

That agreement lasted five years. But Fallas told The Tribune via email that the oil company “continues to honor” the 1999 preservation agreement.

State Parks considers the property part of the Oceano Dunes SVRA, though it says no OHV riding is allowed there.

An OHV access trail currently runs through that portion of the property from the Phillips 66 refinery site to the dunes. State Parks notes in its plan that the trail “could be enhanced to provide access to the open riding area on the beach.”

Kara Woodruff, a former program director for The Nature Conservancy and the author of the 2000 Guadalupe-Nipomo Dunes Preserve Management Program, said State Parks’ plan to develop the Phillips 66 site would destroy an ecologically important area.

“It is odd that we’re talking about now running a southern entrance (to the dunes) through there,” which would undermine efforts by The Nature Conservancy to protect the land, Woodruff said.

## **Oil leak leads to groundwater contamination**

State Parks points out in its Public Works Plan that the groundwater under the Santa Maria Refinery is contaminated with a light non-aqueous phase liquid, or LNAPL, which can be a liquid such as petroleum oil. The contaminated groundwater plume extends about 3.7 acres, at a depth of 50 to 70 feet underground, according to the plan.

It is unknown when the LNAPL leak began, but a line carrying the fluid was last “visually inspected in 2006” and the leak was stopped when the line was replaced in April 2016, according to [a letter sent to Phillips 66](#) by the Central Coast Regional Water Quality Control Board in 2019.

Though the leak does not pose any immediate human health threats, it could have significant impacts on development in the area.

“Chemicals could travel upwards through the soil and volatilize inside new buildings, which could result in an indoor human health hazard,” the plan states.

In addition, if groundwater is withdrawn from the area under the Phillips 66 site, “such withdrawal could either directly encounter contaminants or indirectly cause contaminants in the

plume to migrate, thereby expanding the size of the plume and potentially resulting in additional contaminated groundwater,” according to the plan.

Remediation efforts by Phillips 66 are currently underway, and the company had extracted nearly 3,000 gallons of the LNAPL as of January, according to Stantec Consulting Services, a company contracted by Phillips 66 to research and plan required environmental remediation on the property.

Matthew Keeling, executive officer of the Central Coast Regional Water Quality Control Board, told The Tribune in an email that the amount of LNAPL remaining is “currently uncertain and subject to interpretation.”

Once the recovery system is built — likely in the third quarter of 2021 — it’s expected to take less than five years to remove the LNAPL from the water “to the maximum extent practicable,” Keeling said.

Not mentioned in State Parks’ plan is additional environmental damage on the site, including an area contaminated by piles of unused petroleum coke — a solid material that is a byproduct of petroleum refining — and another area contaminated after being used as a dumpsite for chemicals and building waste.

The former dumpsite, which measures 0.8 acres, contains 13,000 cubic yards of oily soil that was first discovered in the 1990s and still exists there today. Contaminants identified in the soil include total petroleum hydrocarbons and two types of asbestos: amosite and chrysotile, among other things, according to [analyses by Stantec](#).

The former waste site was tentatively set to be excavated in the summer of 2020, but work has been delayed until summer 2021 or 2022 pending permits from the San Luis Obispo County Planning and Building and Environmental Health departments, Keeling wrote to The Tribune.

The area with [10,320 cubic yards of unused petroleum coke](#) had elevated levels of nickel and vanadium that exceeded the California Environmental Protection Agency limits, according to Stantec. Both substances can have negative health impacts to humans and the environment.

The unused petroleum coke piles were removed from the site, according to Keeling, though additional piles remain on the property because the refinery is currently in operation.

When asked about the remediation efforts, Adrienne Ursino, Phillips 66 public affairs director, said the company “has no comment at this time.”

Before State Parks were to continue with any of its plans for the Phillips 66 site, the plan notes that it would conduct extensive health risk assessments and hydraulic analysis to determine whether it can safely build and extract water from the area.

## BEHIND OUR REPORTING

### Behind our reporting

Tribune reporter Mackenzie Shuman spent hours reading and analyzing more than 900 pages of California State Parks' Public Works Plan and related Environmental Impact Report for Oceano Dunes State Vehicular Recreation Area and Pismo State Beach, released in December 2020.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Marianna Mejia Contact

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Albert Eurs  
Cypress, CA 90630

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan does not adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and does not address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving, and camping alternative proposed by your staff.

The plan seems to have ignored solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, this development would destroy one of the best birdwatching spots in San Luis Obispo County. This site is subject to an agreement to set aside 630 acres for preservation. Portions of this site are contaminated, and remediation could take until 2016 or later. What will it cost to make sure the site is safe to build on? The development could endanger all life if the contamination is not properly removed and managed in a safe manner.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,

**Subject:** Stop Oceano Dunes' Reopening Until Coastal Permit Is In Place  
**Categories:** Public Comment

Dear California Coastal Commission,

I implore you to reject the Public Works Plan for Oceano Dunes State Park. It doesn't provide enough protection for coastal resources or endangered species, and it does not seem to comply with the Coastal Act.

State Parks is supposed to evaluate transitioning the park to non-motorized recreation only. This terrible plan prioritizes off-road vehicles instead of protection of wildlife and doesn't address the resource-protection issues your agency raised. It completely fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The Public Works Plan as written would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. This is moving in exactly the wrong direction. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

I ask you to please reject this terrible plan and impose your own permit conditions and a gradual but complete phase-out of destructive off-roading, as recommended by your staff.

Sincerely,  
Matt Michaelis

But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Justin Chernow

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Tracey Myers

**Sent:** Friday, February 19, 2021 2:22 PM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Public Comment, Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

david kovacs

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Gabriella Sidhu

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act. It puts birds and the environment in jeopardy of permanent damage, just so people can drive around off road.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act. There comes a point in time when the desire for recreation must be set aside in favor of saving a threatened specie and this is one of those times!

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Michelle Davis  
Vacaville, CA 95688

It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Mike Acosta

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Joel Leong  
Sacramento, CA 95835

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan does not protect coastal resources or endangered species adequately, nor does it comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to non-motorized recreation. However, this plan prioritizes off-road recreation over protection of wildlife and does not address the resource-protection issues your agency raised. It completely fails to evaluate the five-year off-road vehicle phase-out and limited beach driving/camping alternative proposed by your staff.

The plan does not present solutions to specific issues that you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and reduce protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including even more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Dorothy Brown

Dear California Coastal Commission,

Vehicles have no reason to be on the beaches, especially where sensitive species like Snowy Plovers nest. These birds have a difficult enough time surviving heavy human use without adding the threat of being flattened by vehicles.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

Dear California Coastal Commission,

Last year the State Parks were told to protect the Oceano Dunes natural resources and endangered species with a plan that phases out off-roading. Instead, they are asking the opposite. Their proposal doesn't comply with the Coastal Act nor do what was requested.

Future studies and inadequate responses now are the wrong answer. You gave them guidance, please make them adhere to it. Reject this proposal.

In addition, you have the power to force the State Parks to begin limiting off-roading immediately. Follow the advice of your staff and save Oceano Dunes.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Nancy Brodersen

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Tracy Shortle

Parks Plows Trash Under - Watch Video

When State Parks closed to vehicles for 7 months in 2020 some people ventured down into the area they normally allowed camping, campfires and ATV use. The amount of trash they discovered was shocking and sad. Tossing anything and everything into a campfire appears to have been common practice. Many of the trash problems were solved when the beach and dunes were not accessible to vehicles. It's very important the CA Coastal Commission & Natural Resources hear your vision for the future of this park and links to contact them are below.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
WILLIAM HARRIS

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act. We should be strengthening protections not abandoning them. Off-road vehicles are destructive devices operated by selfish individuals who care only for momentary 'fun' whilst they destroy places of great ecological value to wildlife and those who care for coastal preservation.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Sheila Sperber  
Los Angeles, CA 90025

Dear California Coastal Commission,

All along California's highways, we see the scars of off-road abuse. Expanding off-road vehicle access at Oceano Dunes State Park on the central coast will just exacerbate the decades of problems with vehicles flattening snowy plovers and damaging coastal dunes habitat. Just Don't Allow it!

I urge you to reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

Dear California Coastal Commission,

Off- roading may be fun but is in no way essential and there are some safe places to do it. Running over bird nests and babies is inexcusable, cruel and unnecessary. This world does not belong to humans alone. It is essential that we protect and share with other species.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Marie Gasparrini

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Benjamin Schlau

Dear California Coastal Commission,

Bottom line: we humans are the most dangerous species and a threat to every other species. Who cares about birds if we want to have fun. We kill fir kicks and we destroy to have fun. The sane among us need to stop this. Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
kathleen fernandez

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Scott Stender

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Linda Freeman  
Yuba City, CA 95991

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. Dear California Coastal Commission,

I am an elderly, third generation Californian - my great-grandfather's barn still stands outside of Patterson in the Central Valley not far from another off-road vehicle site at Carnegie SVRA. Off road vehicles have all but destroyed that stretch of land which still was untouched when I was a kid. I guess it saved some other area from ruin but what a waste of land!

Now that area is good for nothing cause even the off-roaders don't want to ride in such a mess that is beyond repair. Recreation should NEVER have been put above conservation!!! We MUST learn from our mistakes and save something for the future when those recreators are no longer here.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Joseph Colton

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

**From:** Scott Schloegel [sschloegel@mic.org]  
**Sent:** Friday, February 19, 2021 12:42 PM  
**To:** OceanoDunesReview@Coastal  
**Subject:** Please oppose restricting or ending powersports access to Oceano Dunes SVRA

**Categories:** Public Comment, Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

- Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).
- Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).
- Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).
- Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Scott Schloegel

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Dan Matthews  
Valley Center, CA 92082

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
John Hailey  
Danville, CA 94526

Dear California Coastal Commission,

I have written about and advocated for Western snowy plover protections for years. Now this ill-conceived plan for Oceano Dunes is contrary to any ecological balancing measures the state must consider in light of sea level rise and climate change.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Cheryl Maslin

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Martha Siegel

Dear California Coastal Commission,

I implore you to reconsider the Coastal Commission's directive, we count on their expertise! I've been a State Park volunteer for years in monitoring Snowy Plover beach nesting. They frequently return to the same beach to nest year after year. They sit on well camouflaged nests on beaches for 30 days to hatch their young. These birds are threatened and struggling to maintain population numbers. Don't open these areas up to off-roaders.

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Dear California Coastal Commission,

Last year, the Coastal Commission directed State Parks to phase out off-roading with a management plan that protects Oceano Dunes' natural resources and endangered species like the snowy plover. But when the agency finally released its plan, it proposed to EXPAND off-roading -which puts recreation over conservation and does just the opposite of what the Commission instructed.

The plan proposed by State Parks would slash protected breeding areas for threatened snowy plovers and least terns by a third. It also proposes a 120-acre development near Oso Flaco Lake with even more off-roading areas, hundreds of campsites, massive parking lots, offices, houses, and other infrastructure. Where is the wildlife supposed to live? wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please don't let off-roaders dictate policy to state parks - reject this plan, let staff come up with its own permit conditions, and eliminate off-roading.

Sincerely,

But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Judith Anshin

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Duncan McFarland

It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Nancy Haiston

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. **Categories:** Public Comment

Dear California Coastal Commission,

Please reject the Public Works Plan for Oceano Dunes State Park. This plan doesn't adequately protect coastal resources or endangered species, and it doesn't comply with the Coastal Act.

Your commission directed State Parks to evaluate phasing out off-roading and transitioning the park to nonmotorized recreation. But this plan prioritizes off-road recreation over protection of wildlife and doesn't address the resource-protection issues your agency raised. It utterly fails to evaluate the five-year off-road vehicle phase-out, limited beach driving and camping alternative proposed by your staff.

The plan punts on solutions to specific issues you requested be addressed, such as Arroyo Grande Creek crossing, endangered shorebird nesting plans, nighttime off-road riding, and vehicle and camping use limits. Instead, the plan offers inadequate interim measures and promises future studies and plans with uncertain outcomes.

The Public Works Plan would open more sensitive dune habitat to off-road vehicles and slash protected breeding areas for threatened snowy plovers and least terns by one-third. It also proposes a massive 120-acre development near Oso Flaco Lake, including yet more off-roading, hundreds of campsites, huge parking lots, offices, residences, and other infrastructure. Leaving little room for wildlife, the development would destroy one of the best birdwatching spots in San Luis Obispo County.

Please reject this plan and impose your own permit conditions and a phase-out of off-roading, as recommended by your staff.

Sincerely,  
Eliza Ludwig

We had the fortune to be able to visit Oceano Dunes State Park last summer while vehicle access was restricted. It is such a beautiful place. I can only imagine how vehicle traffic would devastate the area. Our family enjoys off-roading, but I think it is important to place a premium on the wild areas and endangered species that we have left and certainly not increase the development and vehicle area of areas like these.

Sincerely,  
Stephanie de los Rios

These little birds are totally vulnerable and have been for years. Please preserve their dune habitat and the species survival!! Thank you.

Sincerely,
