The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Dear California Coastal Commission,

There's no reason people with off road vehicles need to be on the dunes, destroying habitat...there are plenty of low impact areas where they can ride. Please put a stop to it before it's too late. Thank you.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

I have spent time on a beautiful beach only to be horrified by the about of destruction - and danger to beach walkers - when vehicles hit the sands for joyriding. There is absolutely NO excuse for this to be allowed.

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Earl Bates

Dear California Coastal Commission,

We no longer have the luxury of treating wildlife habitats as areas for recreational destruction. Wildlife is not rebounding fast enough to mitigate the extinction level losses. It is on us to make sure ecosystems and the life in them gets a fighting chance against climate change. Really, we don't need to destroy natural resources for pleasure.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Please protect our dunes!

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

Dear California Coastal Commission,

I have visited the dunes and found it to be a beautiful place. I took a commercially-offered dune buggy ride and wish I hadn't. The dunes and Oso Flaco need to be peaceful, protected places where the beauty of nature can captivate and calm one's mind. There are not enough protected dunes in the state, which I know from visiting several of them and being distressed by the OHV activity. The dunes need to be preserved not only for their amazing beauty and sense of solitude, but as a barrier to the rising seas. Please support and implement your staff's recommendations in full.

Dear Chairman Padilla and Commissioners

Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Neva Dyer

Dear California Coastal Commission,

My family has lived in the Central Coast region for more than 100 years. I have heard many stories of family visits to the beaches there. While some are protected, places like Oceano are not. At peak times, it is impossible to enjoy that location because of noise and air pollution from the recreational vehicle there. Please help us get our beach back.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

I love the dunes and live nearby. It was great when the dunes were closed this summer to all off road vehicles. Nature was not intended to be destroyed that way. We took many walks on that side of the strand this summer and enjoyed the wildlife that was safe from the destruction of the unsafe off road vehicles and the uncaring people who use them.

Dear California Coastal Commission,

My husband and I have frequently visited the Central Coast for the past 40 years. We appreciate it for many reasons but particularly for its pristine beauty and local efforts to maintain it in this condition. I urge the discontinuation of off road vehicles on the Oceano Dunes.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

For 20 years I volunteered as an interpretive naturalist at local Southern California preserves. I escorted hundreds of adults and children on nature walks. Special places like the Oceano Dunes need to remain pristine.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

I am positive that following the staffs recommendations for the Oceano Dunes will be beneficial to everyone. I speak from experience because I have lived through something similar in Germany on the island of Sylt. There the dunes are treasured now and everyone is enjoying the landscape and the wildlife. The preservation is also highly effective agains land lost through wind and water which was a problem previously.
Sincerely, Katrin Czinger

Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

It's easy plea keep harmful recreational trucks of the dune for the baby animals that sleep on the ground in bushes!!!

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

We are vehemently opposed to the California proposals. A weapons range? What the @@# are you thinking? We want less guns, not more.

The off-highway vehicle training area? No thank you. Our air quality is so bad 90 days out of the year that it keeps us indoors thanks to the ATV Park.

Oso Flaco is a refreshing change because it is natural, not developed. Why ruin a good thing.

Do you really want to look like the stretch of shoreline between Ventura and Carpenteria with back to back RV's?

What the State is proposing is ugly, unsafe, polluting and very undesirable. Again, what the @#$& are you thinking?

Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear California Coastal Commission,

We here in Del Norte County (Tolowa Dunes State Park and Lake Earl Estuary area) also struggle with illegal vehicles damaging dunes and wildlife areas. Even the passenger vehicles permitted on the beach here are a nuisance, noisy, often don?t just stay on the beach, and destroy/damage habitat, wildlife, and threaten endangered species and/or their nesting areas. These recreational vehicles are also adding to carbon emissions into the atmosphere with dangerous concomitant results. Please protect California?s incomparable natural beauty and diversity and ban off-road vehicles on Oceano Dunes. Let?s put into practice respect for nature, natural habitats, and wildlife. Off-road vehicle parks can be built on brown fields, not on coastal beaches. Thank you for the opportunity to express my views.

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Neil Stanton

Dear California Coastal Commission,

PLEASE phase out off-roading at the Oceano dunes and adopt a management plan that allows more compatible recreational uses that won?t harm coastal resources, including car-camping on the beach and hike-in/bike-in camping.

Off-road enthusiasts will continue to be able to ride at eight other State Parks that allow vehicular recreation, as well as at nearly 70 other public OHV areas in California.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commissioners,

I have been a resident of San Luis Obispo County for 40 years. In the 1980s, I was active in the environmental movement to stop off-road vehicle damage to the coastal dunes. I remember the campaign, and I still remember the opposition. I remember the Pismo Beach Chamber of Commerce, the Grover Beach Chamber of Commerce, and the Oceano Chamber of Commerce all opposing any restrictions on off-road vehicle use on the coastal dunes. I remember the Pismo Beach Conservancy, and many others, working hard to protect the dunes. I remember the Coastal Commission, and many others, working hard to protect the dunes. I remember the Coastal Commission, and many others, working hard to protect the dunes. I remember the Coastal Commission

Dear California Coastal Commission,

I love the California coastline! Because of the efforts of the California population to help keep it pristine, the beaches don?t look like the commercialized strips elsewhere in Many parts of the country and the world and bring us closer to nature?s wonders. Please don?t take that away from us and future generations.

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

Motorized transport of any kind does not belong on a beach anywhere; on more sensitive beach areas such as this there should be no increased activity with the intrusion of people at all.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

David Boyer

Dear California Coastal Commission,

We would be so grateful to you for making this step to protect the natural environment on the Dunes from further assault by these off road vehicles. This public land is entrusted to you to secure the health and wellbeing of all species into the future, and this is in need of you protecting the public trust. Thanks so much, Cathy Ward and Rich Salaiz and family

Dear California Coastal Commission,

The Oceano Dunes are too precious to be damaged by careless land management policies. Please act now to protect the dunes, and find another area with a less fragile ecosystem and less value it the local economy to sacrifice to off-roading.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear California Coastal Commission,

I'm a birder and love birding at Osos Flaco and the Oceano campground at Pismo Beach. They are both great places to find an abundance of wildlife. Changing these natural wonders would be a huge step backward in preserving California's beautiful coastline property.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

OHVs are not compatible with the protection of a fragile coastal dunes complex, threatened species, and environmentally sensitive habitat area. Please! OHV use must be phased out at Oceano Dunes in favor of traditional, low-impact beach recreational use.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Tara Gonzales

Dear California Coastal Commission,

The Oceano Dunes are a unique, sensitive, and endangered habitat that needs protection from off-road vehicle use. I grew up in San Luis Obispo County and loved going down to this special place. Please set aside this habitat for future generations and not destroy it in the name of a few individual's destructive recreation.

Dear Chairman Padilla and Commissioners

Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Maria Jesus

Dear California Coastal Commission,

The Central Coast is a national treasure that needs to be protected from the assault of the beach vehicles. Our grandchildren deserve to enjoy this priceless beauty while it remains in it's natural state free from this kind of harm. Thank you, Linda Wise, RN

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

The damage caused by off road vehicles has always been obvious to me and I have wondered how it could ever have been allowed in any State Park. It is simply too destructive and it has done significant damage at Oceano Dunes. It has caused air pollution including CO2 emissions, endangered people walking on the beach, destroyed habitat, is a threat to birds and other wildlife and makes the Dunes an unpleasant, unsafe place to visit for people like me who go to state parks to enjoy nature, not to watch off road drivers careen around destroying things. State Parks has had the opportunity to phase out this horrible activity at Oceano Dunes, but it hasn't done so. That is mismanagement. It is past time for the Coastal Commission to step in and protect Oceano Dunes. Sadly, there are plenty of other places that off road vehicle enthusiasts can still ride through, pollute and destroy so they won't even have to be deprived of this pastime..

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Marion Frank

Dear California Coastal Commission,

One of my patients lives next to the dunes with his little children and reports that the air pollution from exhaust and dust is at levels that make staying at home on weekends often not possible and that, frankly, sound damaging to one?s health. He also reports a large spike in crime that seeps into the town over the weekends and holidays. Please end this madness.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

I'd like to Request I write to the Dunes/Park Natural Inventory in the San Luis Obispo County. Oftentimes/Park Rich In Coastal Commission and right Park staff agents to eliminate OHV riding at the Oceano Dunes SVRA Park. Living in Southern California, I personally know what it is like to pass over a while to visit the natural environs along our precious Federal Coastline.

I also Recommend that the Vice Hueneme Commission open the proposed Air Base Area Public Works Office for the expansion, and redesignation of the Park. Which, as on the Oceano Dunes. These are precious reference areas that should be just as that. Please, whether decision open a park to no show, then, please there is an open space that no one has to unsightly/unsuitable and appealing visit the habitat or unsuspecting promotional/informal natural environments.

Namely, there is no legal rights to prohibit the the use of motorized vehicles that this Arizona rule only their open wetlands traveling intelligent injurious.

- The Dune Habitat,
- The Bird Habitat,
- The Wildlife Habitat,
- The Unique Habitat of Dune Plants,
- The Unique Habitat of Dune Plants,
- The Unique Habitat of Dune Plants

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Off-highway vehicles are not compatible with the protection of a very fragile coastal dunes complex, threatened species, and environmentally sensitive habitat area. For these reasons, and more, off-highway vehicles must be phased out at Oceano Dunes in agreement of a more traditional, lower impact beach recreational use. Thank you for your consideration on this matter.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

I've hiked all over these dunes, including some of the areas open to vehicles. The destruction is clear where vehicles are allowed, and even some areas where they are not supposed to be. Wonderful area! Allowing vehicles is a travesty!

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

Our family visited the Oceano Dunes last summer. It is a beautiful place and we were able to enjoy it thoroughly since vehicle traffic was not allowed on the beach due to the pandemic. It is such a special and unique place and it would be a shame and highly destructive to continue to allow vehicles to access it.

Dear Chairman Padilla and Commissioners

Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

The continued erosion of our coast is causing damage and problems along the entire West coast, not just here in California. Whatever we can do to slow and stop the erosion will be helpful now and in the future.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

Please act to require State Parks phase out off-highway vehicle use on the dunes. I regret I am unable to be present to offer my plea in person March 18, Thank you for doing the right thing by saving our state's most important beach dune complexes from mismanagement and abuse.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Barbara Burke

Dear California Coastal Commission,

Our California coast and the dunes are so beautiful and fragile. Off road vehicles destroy the dunes, its wildlife and the quiet that benefits everyone. Please protect them and phase out vehicle use.

Dear California Coastal Commission,

While we have only visited the Oceano Dunes a couple of times, it?s beauty and access to nature have lingered in our memories. For future trips we may take to the Dunes and for the generations to come, we ask that you approve a planned phase out of vehicular traffic on its beaches. Thank you.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

James Harper

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Katherine Haley

Dear California Coastal Commission,

Human beings have essentially become the planet's biggest virus. We have left little land for the continuation of other species. Please allow this park to retain not only its natural beauty, but its natural life.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Subject: Argument in Support of the Proposed ODSVRA CDP Changes - A legal necessity.

Categories: Public Comment

I urge the Commissioners to support the Oceano Dunes (OD) SVRA Coastal Development Permit changes as put forth in the Staff Report. These changes are long overdue. In fact, since the original CDP was granted, the OD SVRA has never been in conformance with permit conditions or the Coastal Act. State Parks has demonstrated time and again that it is unwilling to abide by the laws that authorize and regulate vehicular access to the dunes. It is up to the Coastal Commission decide the future of the park. Indeed, it is the sworn duty of each Commissioner to do so.

On the essential question of phasing out off highway vehicle access to the dunes, the Commissioners have heard, and will continue to hear at the March 18 special meeting, the same arguments pro and con. The Commissioners are being asked to sort through issues of politics, potential economic impacts, environmental impacts, environmental justice, public health and safety, family values, recreational benefits and public access rights. Passion, anger, fear and hope are expressed on all sides. By what measure can the Commissioners weigh the competing arguments and emotional pleas?

When all is said, and politics and emotions are set aside, the Commissioners must turn to the law they are sworn to uphold. The requirements of the Coastal Act provide the sole basis by which a decision on the future of the OD SVRA should be made. The Staff Report makes a strong factual and legal case for the proposed CDP changes. The report's recommendations provide the legal and moral high ground upon which the Commissioners can stand with confidence. Approve the CDP changes knowing that it is the right decision and defensible action.

Chris Sorensen
Nipomo Mesa Resident

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

I recently visited this lovely area for the first time, being new in Arroyo Grande. It's well work protecting.

Dear Chairman Padilla and Commissioners

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

Dear California Coastal Commission,

My own experience monitoring Snowy Plovers on California beaches has given me a special fondness for these vulnerable birds. PLEASE consider their safety as most important.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Margaret Goodale

Sent: Tuesday, March 9, 2021 1:15 PM
To: OceanoDunesReview@Coastal
Subject: Please oppose restricting or ending powersports access to Oceano Dunes SVRA

Categories: Oppose Staff Recommendation

Dear District Supervisor Kahn,

As an outdoor enthusiast who enjoys powersport activities, I'm concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

• Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).

• Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).

• Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).

• Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Nick Radovcich

Dear California Coastal Commission,

Phasing out OHV use at Oceano Dunes will preserve the unique natural landscape (including its ability to buffer nearby communities from the rising ocean), protect the plants and animals, improve local air quality, and allow low-impact beachgoers to fully enjoy the coastal experience. Please do not cater to a narrow minority which represents the noisiest, most disruptive and destructive possible use of the beach. OHV use in the dunes benefits only the riders. It is detrimental to other beachgoers, plants, animals, air quality, the natural soundscape and features of the land. Please do the right thing and protect Oceano Dunes!

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dave Whipple

Dear California Coastal Commission,

OHV use has gotten completely out of hand everywhere! The destruction of our land, the pollution of the air, the noise, and losing lots of natural wildlife species needs to be stopped or at least reduced dramatically. As a retired Science teacher who taught about our life on this planet, we all need to understand how humans affect our environment. The OHV industry has gone crazy building and selling huge numbers of vehicles for profit without regard to ever stopping increase the numbers in the future. We need the coast line to be free of masses of humans so the wildlife there can survive. If we kill all animals and plants everywhere eventually we will destroy all human life on our planet. Save the Oceano Dunes now, not "someday"!

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

As a former resident of Oceano, I found it terrifying to go hiking in the dunes where I could be run over or crashed into whenever I crested a dune. Please get these infernal machines out of there!
Stuart Bair MD

Dear California Coastal Commission,

One of my continuing biggest thrills is seeing snowy plovers and other shore birds running along the beach dodging waves, gathering their nourishment. I loved it as a child, teen, young adult and now grandfather.

Dear Chairman Padilla and Commissioners

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dennis Mcvey

Dear California Coastal Commission,

I am a birdwatcher and nature love, mostly retired, and l travel all over the state in pursuit of my avocation.
Twice this past winter l?ve been in SLO county enjoying the wildlife of the Oceano and Oso Flaco areas. Please keep me coming back by protecting the natural and wild values that would be lost by allowing the disruption and erosion that comes with OHV access to fragile dune systems and riparian areas.
Thank you!
Al DeMartini

Dear California Coastal Commission,

I know that it is fun to ride vehicles on the dunes... but the cost to the dune ecosystem is real and long-lasting. I am a regular supporter and user of our State Parks. We have to use what we know to protect our valuable dunes and dune life.

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

Yes, please, let's celebrate this beach with no smelly, noisy, destructive off highway vehicles (OHV). Instead, enjoy the wildlife and beauty of the beach on foot with the sound of the ocean.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Gayle Spencer

Dear California Coastal Commission,

Please! Consider the impacts of your decision today for a more robust and fully functioning ecosystem tomorrow. Which side of history will you find yourself standing on? The time is now to take steps to protect these last unique places for MORE HARM and stand beside solutions to provide for the future of ALL living things to not just exist but to THRIVE. Thank you for your service on the commission. May it truly be selfless for what is best for all.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Dear California Coastal Commission,

As a Nipomo resident, nearly early every day I receive a text message alerting me to poor air quality where I live due to blowing dust on the mesa. But I don't need the text to tell me: I feel it. My son feels it. We have asthma and allergies, and this issue affects our very quality of life every day. Please don't value recreation and tourism above the lives and health of the people who call this place home.

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

It is time for us human beings to step up and protect the integrity of ecosystems like the Oceano Dunes from destructive practices, like OHV.

These fragile systems have survived for centuries, nurturing countless species, including our own. Our grandchildren and their grandchildren deserve to experience the intangible wealth of wild lands into perpetuity.

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

It is all of our responsibility to protect our oceans, beaches and wildlife. We cannot continue to disrupt nature and not have dire consequences.
There is NO GOOD REASON for allowing recreational vehicles on our beaches. To do so, would be disastrous to our coast and would be selfish and irresponsible.

Thank you for your time and consideration.

Sincerely,
Linda Arellano

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Dear California Coastal Commission,

I would like to urge the California Coastal Commission to please phase out the use of OHV in Oceano Dunes State Park. There is no significant economic impact to the region for doing this, but the environmental impacts would be multiple and significant. An as the area is home to nesting threatened/endangered species, this is even more important. California already devotes thousands of acres to off-road enthusiasts elsewhere. There is no reason Oceano needs to add more acreage to that. Thanks for your time and consideration.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear California Coastal Commission,

There's no reason to have these dune buggys on the beach. There is a very small percentage of people who ride them and it would be nice to be able to use the dunes without worrying about vehicles driving up and down the beaches

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Linda Espino

Dear California Coastal Commission,

Some great trails where I used to walk were taken over by Off Road Vehicles and it scared me so much when one came toward us speeding and pushing my elderly friend and I off the trail to avoid being hit by that Off Road Vehicle.

We no longer walk there. Please protect the Dunes. That is your job as care givers to State Parks, for heaven's sake. Off Road Vehicles should be banned completely from State Park Recreation areas that are supposed to be protected. Only allow Off Road Vehicles in certain places, and keep medics nearby as so many are hurt riding those. A child of a person I used to know nearly died riding one of those. They are dangerous to people and they tear up sensitive habitat.

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

We need to be more actively preserving the little habitat we have left!

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Lynn Adams

Subject: Plan for Oceano Dunes

Categories: Public Comment

To Members of the California Coastal Commission and California State Parks,

I am writing to express support for the Plan for the Oceano Dunes prepared by the California Coastal Commission. We strongly support protecting the coastal resources at the Park, the environment and wildlife. We support use of the Park for non-vehicular public recessional access and enhanced habitat protection especially on the southern portion of the Park and Oso Flaco Lake. We do not believe that the Plan proposed by the California State Parks is in the best interests of the community and our environment.

Sincerely,

Bill and Nancy Doherty

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

I love walking and riding my horse at the dunes. We don't need crazy OHV disturbing nature.

Dear California Coastal Commission,

There is nothing more disturbing than being in nature, and having to encounter off road vehicles on trails and on the coast. They are unnecessary, dangerous and destructive to biodiversity. Really, don't humans have enough habitat to drive and make noise in ? Can't we please leave nature alone without off road vehicles crashing through. So many of us want to enjoy nature's beauty, simplicity and peace. Thank you !

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

Retired medical professional, long-time advocate for wildlife, Education chair for local Audubon chapter 7 years, native songbird rescue/caregiver 8 years. Born in San Diego, loved the beaches there and of ALL California! Activities which damage/destroy birds, plants, etc. should NEVER be allowed in protected areas. If up to me, they would not be allowed on any naturally beautiful or special areas! Only those who respect, appreciate them, finding inspiration and peace therein.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

There are fewer and fewer large natural areas where the peace and quiet of nature can be enjoyed without the interruption of vehicular noise. Please keep the dunes peaceful!

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

You need to require a minimum of one year airborne deposition measurements in the occupied areas as a baseline and then post-decision monitoring. Not breathing zone sampling but deposition sampling from which re-suspension evaluatons may be made. Nuisance issues must be considered as well as Human Health risk.

Dear Chairman Padilla and Commissioners

Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear California Coastal Commission,

There is nothing more annoying to people, wildlife and plants than destructive OHV use. It's fun for only one group: those off-road people who think they get to scar beaches and race across the dunes disregarding anyone else in the area. We love visiting and staying at different beaches along the coast, but we avoid Oceano Dunes like the plague. It's not tranquil, but full of aggressive off-roaders who ruin the experience for everyone else. My husband and I take our Sand Rail to Jawbone Canyon and other managed OHV areas. That kind of noise and speed belongs on planned trails, not on fragile dunes!

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

This is one of the most beautiful and pristine areas of the California coast. Please preserve the dunes and sea life for future generations to enjoy.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Victoria Ramos

Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

We need to protect this fragile ecosystem from furthet destruction caused by off road vehicles!

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

Now is the time, get off your Backsides and get this done.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Richard Stewart

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Karen Stephenson

Dear California Coastal Commission,

Please vote to protect this rare ecosystem and its sensitive wildlife from this senseless OHV assault. OHV use of Oceano Dunes is a danger to nearby residents as well due to the extensive air pollution it generates, especially small particulates that serious cause lung disease. Thank you.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

Please protect this precious section of our coastline. I have seen a handful of people in my office from being injured on the beach! Hit by cars, ATVs. Then there is the environmental impact! This is not right and we need to make this change, finally. Please consider ending car/ATV access on the beach/dunes.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Destruction of this beautiful and ecologically important area is wrong and sad.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

If we want to conserve the dunes for the future, we should no longer permit vehicles that damage the environment. And sites that are still fun to ride without damage to coastal dunes should be promoted

Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Please put a stop to the reckless environmental impact of off road vehicles on sand dune habitat. There is so little of this habitat left. Please secure it and its wildlife for future generations to appreciate and honor.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear California Coastal Commission,

I ride dirtbikes and have a 4x4 sand SUV. I want the dunes closed so the sensitive beach can heal. I am willing to not ride or use the area for this.

Dear California Coastal Commission,

Don't prioritize greedy, polluting, and rude dune buggy drivers.

They don't need to destroy the animals and environment, and pollute the air and ocean just to "have fun." It's not "family friendly" entertainment.

They can ride bikes, which don't pollute. Go kayaking, which doesn't smash animals and plants. Go fishing, which allow plenty of quality family time.

Put the selfless people who want to help others first, not greedy people who pollute and generate tons of noise.

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

I realize there are many people that for many years have enjoyed OHV activities in CA but we do have to make decision with the information we have now. If we now know that this activity is harmful to the natural order of Oceano Dunes we must make changes that protect this order. There are many other places that are still available for off-road activities in CA. Please make the hard decisions that you were appointed to make for all of us. Thank you.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Jill Davine

Dear California Coastal Commission,

I was an off-highway vehicle commissioner appointed by the Senate for a number of years. The world has changed and we face a crisis due to consumption of carbon based fuels. What is any agency of this state doing promoting new opportunity to burn carbon as a recreational past time. Please send the message that carbon fueled recreation has no role in our lives if only to prevent the destruction of our children's planet... Thank You s/ Harold M. Thomas

Give out kids the chance to really see what nature does with sandy dunes.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Gary Shumm

Dear California Coastal Commission,

Oceano Dunes is one of the last of what was once prevalent in our Golden State. These millions of acres of sand dunes once protected both wildlife and land. Therefore, I think the Coastal Commission is duty-bound to continue to protect Oceano Dunes.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

There just have to be areas that are beautiful and fragile that we set as "off limits" to off road vehicles and operators who are more committed to the thrill than to the health and survival of these special areas.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear California Coastal Commission,

Off-road vehicles or hunting do not belong on public land. Off roaders are notorious for abuse.
Ocotillo wells and lucerne valley are prime examples.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Christine Nagel

Dear California Coastal Commission,

The beach and the dunes are not a place for off-road vehicles and their owners who do not respect the environment they are ripping up. There is no future in this. Please implement the recommendations that will ensure sustainable management of this environmentally sensitive area.

Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. Dear California Coastal Commission,

OHVs have deeply impacted out Fragile ecosystems in the Mojave Desert. PLEASE make the right choice and ban the usage of OHVs to preserve these dunes that are rare and special to the world.

thank you for your time,

Manuel

Dear California Coastal Commission,

Sand dunes are an integral part of all beach ecosystems and helping humans (and other animals) attenuate the adverse effects from climate change. We need to be doing all we can now to save these precious ecosystems and features of the beach. Humans have trammeled over the vast majority if nature's wonderful bounty for far too long!!

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

the Oceano Dunes have been the best outdoor laboratory for our classes since the early 90's....Oso Flaco Lake : unique for the Central Coast!!!!

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Stewart Winchester

Dear California Coastal Commission,

I camped there as a child, took my son there when he was a child. It is unlike any other place I have been, but even 25 years ago I could see the destruction that OHVs were beginning to cause, and get an idea of what was in store for the area unless it was stopped. OHVs are not like skis; the damage that they do to terrain is permanent.

Dear Chairman Padilla and Commissioners

Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Please fulfill your responsibility to protect our coast and all environments and life that is a part of it.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Anne Corrigan

Subject: The Future of the Oceano Dunes

Categories: Public Comment

Dear Coastal Commission,

I wanted to let you know our thoughts on the future of the Oceano Dunes. My husband and I live in Trilogy, Nipomo. We want you to know that we fully support the Coastal Commission's proposal for the Oceano Dunes area, to be voted on March 18, 2021. Year round, when the recreational vehicles are zooming around the dunes, it creates extremely bad air quality for those of us who live in the path of the wind. With all of those vehicles in that area it also endangers wildlife and makes it unapproachable for those of us who just wish to enjoy a lovely beach walk. We have been fighting for years to get the Oceano Dunes area to be vehicular-free and opened only to recreational uses that will not harm coastal resources and our personal health. Please fight hard at the March 18th hearing to get your proposal to win, for a solution that balances the social, economic, and environmental needs of our community.

Thank you,

Catherine Walker and Alan McGee

Dear California Coastal Commission,

PLEASE, as a neighbor of the 'Inglenook Fen' and the '10 Mile Dune Preserve,' just North of Fort Bragg, I understand the importance of preserving and protecting these critically fragile oceanside marvels. Areas like these are home to many different wildlife species and next-door neighbors!! As friends and family members, we appreciate and cherish the importance of saving ALL wilderness area and wildlife preserves! Please support and implement your staff?s recommendations for the critical care necessary to preserve these irreplaceable treasures!!!

Dear California Coastal Commission,

We need to stop destroying this valuable ecosystem for posterity.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Charles Gordon

Dear California Coastal Commission,

Remember - once the dunes are destroyed they will never return. Not only flora, but fauna too. Think of our children and grandchildren, and their children and grand children. Let the dunes stay natural and pristine for them to enjoy.

Dear California Coastal Commission,

Please consider making these Dunes part of a safe environmental habitat for all of the flora and fauna natural to the area. Also keep it a place where persons can walk and enjoy the area safely by not having vehicles permitted in these areas.

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

I see the scars of off-road use along the highways all the time. The delicate habitat along the dunes is equally damaged by off-road use. Just stop the vehicular harm! People can access the beauty better without the noise, pollution, and dangers.

Dear Chairman Padilla and Commissioners

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Tim Katz

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. Dear California Coastal Commission,

I have long wanted to visit the dunes but have stayed away because of the noise, congestion and pollution from off road vehicles. I would hope to see their beauty and peace restored. Please ban off road vehicles from the dunes!!!

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Susan Stoveken

Dear California Coastal Commission,

The State operates ORV parks in mostly less environmentally sensitive areas. There is no reason for a beach to allow off-road vehicles at all.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Richard Manley

Dear California Coastal Commission,

Dunes are nature's protection against beach erosion, which has been and will be impacted by rising sea level. Vehicles are destructive in such a fragile environment and conservation must override any pleasure-seeking activity.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Melissa Smith

Dear California Coastal Commission,

I AGREE! Kevn Eisenstaedt

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Unfortunately, too many Off Roaders are not adverse to disturbing wildlife, destroying nests and outright killing animals with their vehicles. ORV access in not a ?right? and should only be allowed where it is prudent to do so. Our vulnerable shorebirds and turtles need protection and Americans expect our National Park Service to be more responsive to our threatened species than to off road vehicle owners. The birds and turtles that build their nests on beaches cannot nest anywhere else ? they need safe and secure beach nest sites. I truly believe that the majority of Americans would prefer our National Seashores free of vehicle traffic and full of scenic beauty and wildlife.

Dear California Coastal Commission,

This is important to me as a plant ecologist (UC Davis M.S. Ecology '01), a citizen of California, and a mother who cares about how we leave this planet for our children.
