The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Preserving what is left of the fragile dunes and wildlife dependent on this unique habitat is important, both for wildlife and defense from sea level rise. I find it shocking that vehicles would be allowed to drive on and erode coastal sand dunes in 2021. Please make that illegal to preserve and protect our coast. Thank you!

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Dear California Coastal Commission,

California beaches are beautiful and unique, but they are also irreplaceable. We visit this area often, and enjoy the non-motorized section of the beach to the north. People, wildlife, and natural scenery are all at risk with motorized vehicles on the beach, and it is so unnecessary. People an park elsewhere, and enjoy the beach in other ways. Vehicles on the beach are loud, they encourage trash being brought and left behind, and they are destructive to wildlife and scenery. Please do not expand access to vehicles. Minimize or eliminate it.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Jim Spooner

Dear California Coastal Commission,

Please, these dunes are unique. We took our kids there when they were little and they should be preserved for future generations and for the good of the coastline.

Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Jay Linde

Dear California Coastal Commission,

I have traveled to the Oceano Dunes every year in the Fall with my children to camp at the Oceano campground. It has never made sense to me that cars are allowed on the beach there. Where there are no cars, you see snowy plovers. When the cars are there you see nothing. They also disrupt the enjoyment of the beach for everyone else.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear California Coastal Commission,

I understand how off road adventuring is a legitimate kind of recreation.
But, Oceano Dunes is not a good place for it.
This beach is too valuable to be torn up by vehicles.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Jay Atkinson

Dear California Coastal Commission,

Off-highway use of vehicles serves no purpose and harms wildlife. Wildlife should not be harmed for the pleasure of a few.

Dear California Coastal Commission,

Areas for "car camping" may make it easier to transition. It will be difficult to change the feeling of entitlement for those accustomed to driving all over the beach.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Glad you're helping us in the Senate, Sen. Padilla. Noisy, polluting, environmentally-upsetting OHV DO NOT belong in sacred spaces, where humans and other sentient beings go for health, safety, rejuvenation. The short-sighted needs of these vehicles' manufacturers and the consumers who use them are NOT in the best interest of the majority of us or the inhabitants of these delicate environments. EVERYONE'S environment is sensitive. (I'm getting headaches daily from an old, funky, NOISY refrigerator my landlord used to replace another unacceptable appliance.) WE ALL NEED PROTECTION. What's happening in Oceano is obscene. PLEASE MAKE SURE IT STOPS. IMPLEMENT YOUR STAFF'S RECOMMENDATIONS. AMEND STATE PARKS' PERMIT AS OUTLINED ABOVE. PLEASE LET US TRUST YOU! THANK YOU FOR YOUR EFFORTS.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

Please outlaw ORV's in Oceano Dunes. Our State Parks are meant for the enjoyment of all Cailifornians, and Oceano Dune is too special to be geadually destroyed by one particular subculture of dune buggy enthusiasts. Dune buggies cause erosin and destroy native vegetation.
. Other areas remain open to ORV riders nearby and in other areas.. Dunes are known to be a defense against rising sea levels and protect the city of Oceano. ORV riders impair enjoyment of the beach by more more gentle users, and banning them is unlikely to discourage tourism.
Mariquita West

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Mariquita West

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

James Feichtl

Dear California Coastal Commission,

My wife and I were visiting Pismo Beach from our Sonoma home last month and after we visited the Monarch Butterflies we went for a walk on the beach heading south. We had no idea that motorized vehicles were allowed in such an environmentally sensitive and beautiful area. These vehicles destroy the environment and ruin the natural experience of the California coast. We are happy tourists that support the local economies but will never support these OHV activities.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

There are many better options for off road enthusiasts. Having been one many years ago I can say with confidence that this is a minor concession for most people. They'd rather have a good time somewhere else knowing they haven't caused harm to the environment.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

My husband and I went to Cal Poly many years ago and loved seeing the dunes nearby. However, even then, we were against the off-road vehicles there. Please protect them for future generations to enjoy responsibly.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Dear California Coastal Commission,

Off highway vehicles do not belong on beaches and sand dunes. Lets consider why it is necessary or even advisable to have OHVs on dunes. Most people go to the coast to enjoy the ambiance - sun, waves, sand, water. wild life. People in OHVs do not go to the coast to enjoy such things. They just like to to vroom vroom with their vehicles . Insensitive and immature.

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

Vehicular traffic on these dunes is damaging to the safety and continuation of species of animals and our already endangered atmosphere we breathe. Those driving cars through the dunes may feel imposed upon but they leave without any idea of the damage caused by their momentary fun. Please be their conscience and phase out this destructive process. Thank you for your consideration in this highly sensitive matter before you.
Sincerely,
Marion Lackey

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Mary Ann Bomarito

Dear California Coastal Commission,

There are many places for off road vehicle recreation but not so for snowy plovers. Also vehicles make recreation unpleasant for all others.

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

I spent this last year walking with my family and dogs on the beach. It was so beautifully quiet and serene. No cars, no loud engines, no loud music. We got to enjoy the beauty, the birds and the beautiful quiet dunes.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Subject: Public Comment on 3/18/21 Coastal Commission Meeting ODSVRA Agenda Item

Categories: Elected Officials

Dear Commissioners,

Thank you for considering the Oceano Dunes State Vehicular Recreation Area's (ODSVRA's) existing use and operation against the requirements of the Coastal Act. I also appreciate Staff's comprehensive review of State Park's long awaited Public Works Plan (PWP). Unfortunately, the PWP fails to address many of the legitimate concerns raised or recommendations made by your Staff and the Commission at your July 11, 2019 hearing on this item. Even worse, the PWP contemplates expansion of off-highway vehicle (OHV) use into sensitive habitat areas without adequate air quality or environmental mitigation as opposed to seeking a compromise position that will balance competing interests. The Oso Flaco Lake and surrounding lands must continue to be preserved, not redeveloped.

Bringing the ODSVRA's existing use and operation into compliance with the Coastal Act is long overdue, as the issues surrounding the ODSVRA have persisted for decades. It is time for your Commission to take decisive and definitive action. We need an ODSVRA use and operation that supports economic vitality in the region while also complying with the Coastal Act, protecting public health and safety, supporting access and use for residents of the neighboring community of Oceano, and protecting environmentally sensitive habitat areas. In my opinion, the PWP, as submitted, does not accomplish these goals.

Please support a vision for the ODSVRA that balances the economic, environmental, and social aspects of the ODSVRA's use and operation. If vehicles are a part of the vision, please ensure that air quality, safety, and environmental impact concerns are properly addressed. Public health and safety should always come first.

Sincerely,

Jimmy Paulding

Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Jon Spitz

Dear California Coastal Commission,

I have recently moved back to CA and one of the biggest draws for this move was the beautiful CA coast. I support multiple use, but fragile dune habitat should NOT be used for OHV recreation. Please do the right thing and eliminate access by OVH and preserve this unique habitat for all generations to enjoy.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

Dunes and off-road vehicles are not really compatible. We as a human species do enough damage as is without invoking the probability of more.

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

Allow it to be multi-use for wildlife and recreational activities that have less impact on the dunes. In this time of climate crisis, we should not allow gas guzzling OMV's to wreck our natural features.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear California Coastal Commission,

I can remember as a child my family's outings into the Oceano dunes and the wonders of the giant dunes through a child's eyes. Then came the dune buggies and the desecration of that area. How many people die or are maimed in accidents there every year? I beg you to give that area back to nature and once again allow families to enjoy its natural beauty by walking the beach and hiking into the dunes.

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Sharon Marquez

Dear California Coastal Commission,

Please preserve our dunes. There are other sites for off-roaders. This is a sensitive habitat worthy of our care. PLEASE protect this small pocket of California. Thanks for reading and conscientious consideration:

Dear California Coastal Commission,

I think we have a responsibility to our environment and to the generations coming after our own to protect and preserve natural spaces, creatures, and landscapes. I hope you feel the same sense of responsibility I do and agree that these vehicles harm this unique environment. Let?s work together to preserve and responsibly protect Oceano Dunes by immediately phasing out OHV activity, and following the other suggestions offered by the Sierra Club. There are lots of places OHV drivers can go, but there is only one Oceano Dunes.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

I have loved to take trips to the different beaches and watch the wild life and plants along the California cost with the sand dunes. Is it possible to have a area just for the OHV activity so the natural habitat for the wild live is safe from the OHV activiitys Suzie

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

We need to start treasuring and respecting our natural resources if we are to have anything left for our children. Off-road vehicles have no place in our parks where they are destructive. Please stop OHV at Oceano Dunes.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

Continuing a bad practice just because "we've always done it" doesn't make sense. We know the dunes are rare and unsuitable as an automotive playground. Do the right thing for the natural world?the world the parks are meant to protect?and phase out OHVs at Oceano. Thank you.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

The dunes could be so much more than they are with the destructive OHV intrusion. If the buggies leave now, the difference and benefits to wildlife and the public in even a year or two will be stunning. The future could start right now.

Dear Chairman Padilla and Commissioners

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Wendy Mills

Dear California Coastal Commission,

I am asking that the Coastal Commission work to phase out off-roading activities at Oceano Dunes. This is a rare and fragile dune environment that needs to be protected and not degraded by OHV use.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Charles and Rita Rossmann

Dear California Coastal Commission,

Off-roaders can destroy wildlife and natural beauty with impunity, and create wastelands for others who want to enjoy and preserve what nature provides as a respite from a complex world. This behavior must be stopped.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

Dear California Coastal Commission,

I am pleased to sign on to the Sierra Club's letter, but I will also be submitting my own letter outlining my concerns as well as the fact that we have WSP and Least Tern at the Santa Ana River in Orange County that are also under attack. This must stop up and down our coast - with no exceptions!

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

This issue matters to me because here, or Oceano we should be protecting unique environments. Large areas of any ecosystem are rare these days and animals and other species that live in them evolved larger ecosystems are more fragile when they are split up and broken down at the edges. There is no reason this area cannot be kept for ecological preserve and off road vehicles use the other 8 State parks and other areas set aside for this activity. Thanks for considering our proposal.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Vehicular use was always a bad idea. It?s dangerous to beach combers and wildlife and destructive to the dunes

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Dear California Coastal Commission,

These vulnerable habitats and their wildlife need our protection and provide information to the public

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Nancy Boyd

Dear California Coastal Commission,

Please protect the dunes. The plants and animals of the California coast are desperately challenged by development and climate change. Unless we act now 40% of native coastal wildlife will be extinct by 2040. Please protect the Oceano Dunes for future generations!

Dear Chairman Padilla and Commissioners

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Nancy Stainton

Dear California Coastal Commission,

It's time to act NOW, and keep the dunes the way nature meant them to be.
You are the chosen voice who should act as guardian of the coast and its dunes. Act on it!!!

Dear Chairman Padilla and Commissioners

Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. Subject: Please oppose restricting or ending powersports access to Oceano Dunes SVRA

Categories: Oppose Staff Recommendation

Dear District Supervisor Kahn,

I am an outdoor enthusiast who enjoys powersport activities, and I am very concerned about the proposed Public Works Plan (PWP) for Oceano Dunes State Vehicular Recreation Area (ODSVRA) which was released on December 30, 2020. I am opposed to several provisions in the proposed PWP.

As drafted, the proposed PWP supports reducing and ultimately even eliminating off-highway vehicle recreation at ODSVRA. Within the PWP, the most concerning proposals are:

• Proposes an immediate 42 percent reduction of OHV day-use limits, from the current 1,720 vehicles/day, down to 1,000/day (p. 78 of the PWP).

• Proposes ending OHV/ATV rental concessions when their current contracts expire in 2022. Phasing out of OHV rental concessions would require visitors to bring in their own OHVs and would impact low- and middle-income individuals. (p. 79 of the PWP).

• Proposes an Environmental Impact Review (EIR) alternative to consider phase-out of OHV recreation over five years (see Volume 3, Chapter 2, Alternatives).

• Proposes to conduct an "independently peer-reviewed carrying capacity study" to determine appropriate limits for beach camping and day-use by OHVs and street-legal vehicles and update use limits accordingly, which could further limit access/use by OHV in the SVRA (p. 76 of the PWP).

The off-highway vehicle community strongly advocates for responsible use of our natural resources and ensuring powersports enthusiasts are well-trained in the proper use of their vehicles to foster an enjoyable and safe riding environment. Many people cannot afford to purchase their own vehicles and eliminating the rental option is something that would not only kill local jobs, but would also disenfranchise lower income individuals who rely on the ability to rent powersports equipment. The Oceano Dunes SVRA has been a significant part of many individuals' lives in the outdoor recreation community. It has been a place for people worldwide to gather and enjoy powersport use and beach camping. The proposed PWP could end access to the park for many Californians, hundreds of thousands of individuals, and their families who have been recreating the dunes for decades. At a time when so many people have turned to outdoor recreation as a form of stress release, we should be looking at ways to expand recreation opportunities, not eliminate them.

Please strike these provisions from the PWP and preserve access for a diverse group of recreation interests at Oceano Dunes SVRA.

Sincerely,

Geoff Beasley

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Anne-Catherine Roch Levecq

Dear California Coastal Commission,

My house in Los Osos is subject to Coastal Commission constraints, I had to get a Minimum Use Permit for it and prove that it was environmentally acceptable.

The use of the coastal dunes and habitat in our area should also meet environmental standards.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

I have visited these beautiful dunes and experienced the detrimental effect OHV have on the beach and on the non-driving visitors. OHV have no place in so sensitive and beautiful environment.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

Please stop the use of OHVs on Oceana Dunes. The ecosystem is too important and fragile to allow them. Thanks, Phyllis Gray

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Phyllis Chavez

Dear California Coastal Commission,

I've just returned from a visit to the once-pristine Giant Rock site near Landers, which has now been taken over by OHV enthusiasts. It is a travesty - constant noise, no mask-wearing, and a virtual wall-to-wall carpet of some truly gross trash and debris. Just sayin'...

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

Off-road vehicles do not belong on the dunes. They destroy wildlife and native plants, cause noise and air pollution, and disturb the serenity and beauty of our beaches.....not to mention result in many injuries and deaths each year due to reckless driving. I have loved hiking on the beaches this year with no vehicles, as have many of my friends and family. Please do whatever is needed to sustain the Ocean Dunes.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. Dear California Coastal Commission,

The people of Oceana Dunes deserve better than the bat s*** crazy dune buggies drivers flying thru their dunes. They can go to Glamis near the Arizona desert where they can ravage the natural landscape to their hearts content.

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

A quiet walk on the beach should not be interrupted with loud engine roaring from OHVs. Much more importantly, unique and irreplaceable wildlife habitat cannot be destroyed. Protect the Oceano Dunes!

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

I've had the extraordinary pleasure of visiting these dunes and it was one of my best days ever, so very beautiful. Please keep the off-road lunatics away from a sacred spot.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Enough with vehicles off road. It should not be a goal to allow off road vehicles on beaches, sensitive habitats, state parks etc. We as humans need to reconnect to the land and motorized vehicles is not the way.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Rene Flores

Dear California Coastal Commission,

In addition to the above reasons, the allowance of driving beach access has continued since the 40?s with dune buggies.We need to Preserve this jewel of the Central Coast!! The State parks over all these years, knowingly allowed Our Jewe be be destroyed for a ridiculous entrance fee!!
Save the Dunes and habitats!! Close the Beach for driving!!! Thank You

Dear California Coastal Commission,

Chairman Padilla and Coastal Commissioners, please support your staff's recommendations. The Dunes are such an integral and important part of our coastal environment eco system and we need the protection the Dunes offers. With Sea Level Rise and Climate Change already on us, we need the protection of the Dunes. Please support Staff's recommendation. Thank You.

Dear California Coastal Commission,

It's not as if there weren't enough roads and places to drive and I understand that some people enjoy the thrill of off road driving, but there is very little protected coastal habitat for the wildlife that was common when I was growing up and the state was less developed. When I visited the protected area of this dune system last month there were tire tracks running the length of the beach. It was clear that the boundaries weren't being observed.

Dear Chairman Padilla and Commissioners

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Heather Trappler

Dear California Coastal Commission,

I grew up in the dunes of western Texas, near what is now the Monahas Sandhills State Park, where my mother later worked as a Park Ranger I. Recreational vehicles are not allowed in that park, and I don't think they should be allowed at Oceano, either. The Monahans Park still attracts thousands of visitors annually, visitors who enjoy both the raucous fun of sand surfing, and the tranquil serenity of the sunrises and sunsets. Keep true to your mission, preserve the dunes for future generations.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

It's heartbreaking to surrender this very special area to people who literally drive out people and wildlife. Please plan for removing the takeover by roaring vehicles and returning this area to the wide range of activities currently made impossible by a single group of users.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

James Dodd

Dear California Coastal Commission,

When we need to reduce pollution it makes no sense to allow off-road vehicles in any state park. Our planet and our health depend on common sense answers to pollution.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Please do the right thing for our beautiful California coast and the incredible creatures we are duty-bound to protect. Do not allow the desires of the few?OHV users?overshadow the wishes of the many?all the rest of the people who want to enjoy the majestic beauty of our beaches without the noise and danger of off-road vehicles. Thank you.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

I have visited these dunes, which present a wonderful array of specialized dune species, a spectacular display adaptions to the demanding conditions of shoreline life. We see it in protected areas here on the Monterey Bay, but the dunes in the Guadalupe-Nipomo dunes complex are even more inspiring than here. While there, I was dismayed by the presence of many loud and fast off-road vehicles, and thought that, if I were the maker or rules, I would rule these fantastic dunes off-limits to this unnecessary destruction. State Parks and I agree on many things, and if we don't agree on this one, it probably has to do with money, and not with what is best for the ecosystem. I urge you to take the vehicles out of these dunes, and respect what is most important about them, namely the natural systems.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Implement the recommendations of the Coastal Commission staff. Phase out OHV use at Oceano Dunes.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

The Oceano Dunes have been a part of my family history for over 100 years. During the pandemic it was so nice to finally see the dunes begin to recover from the abuse that ecosystem has endured the last 40 years due to the abundance of off road vehicles. The birds, sea life and Pismo clams were returning and then...the opening of the dunes to those destructive, senseless machines began again last month and all gains made by the wildlife were gone. It is heartbreaking.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

I think protecting the beach wildlife and habitat is more important than providing a very few the right to ride their vehicles over the dunes, risking safety of those who live there, both plant and animal.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear California Coastal Commission,

In my youth I was ignorant of the damage done to this sensitive area and drove dune buggies in there. We must heed the recommendations to eliminate this practice and restore and protect the dunes and this fragile ecosystem.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

State Parks are charged with protecting and preserving the natural resources of the Park for the enjoyment and passive recreation of future generations. Motorized vehicles on this beach and our dunes is are not in compliance with State Parks' this mission. Please support the Coastal Commissions Staff recommendations.
Thank you.

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Marcia Flannery

Dear California Coastal Commission,

Now that we know about dune ecology, air pollution and the role of dunes in climate change and sea level rise, it's more important than ever to discontinue the OHV use at Oceano Dunes. Please move ahead with the decision to phase-out this activity. Most of us prefer a more sustainable and relaxing experience in our State Parks and on our beaches.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Paul Rea

Dear California Coastal Commission,

Protect the environmentally sensitive areas; there is no need to allow destructive activities on these lands. Protect the snowy plovers who nest on the beach who are trampled and squished under human activity.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

Decades ago I did a lot of things that were considered acceptable, but then learned they were wrong and harmful. That included smoking, planting genista, driving gas guzzlers and eating lots of junk food. Driving cars on the Oceana Dunes May have seemed harmless years ago, but now we see nature under attack everywhere and we must restore what we destroyed. Ban the driving and encourage kinder ways to enjoy this beautiful place. Thank you. Ruth Carter

Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear California Coastal Commission,

In this last year of covid we spent a lot of time in the dunes around Humboldt Bay, but were shocked that ORV were allowed in those incredibly beautiful dunes. Please follow science and the Coastal Act and make these dunes more friendly to people, animals and birds.

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

Please stop vehicles from using the dunes. It is dangerous for people who are walking/resting on the dunes and is damaging to wildlife habitats. Save our precious dunes, prohibit use of any type of vehicles on the dunes! Thank you.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Jessica Baldi

Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

I grew up in the area, rising go-carts on the Oceano beach and clamming with my dad, but time changes not only our understanding and cumulative impact but the amount of vehicular traffic. Fifty years ago, a few cars on the beach were understood differently. Today, they are devastating to various species and destroy a park that all people should be able to enjoy?from toddlers and young families to the elderly who want to go for a walk unmolested by polluting, noisy, view-obstructing vehicles. We have roads for that. Let?s get the beach back to being a safe space for nature and people. Please.

Thank you,
Marni Lynn Ager

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear California Coastal Commission,

We used to visit this sensitive and special place often but have not for several years. We came see the Snowy Plovers. Both my wife and I had a difficult time watching the roped off Plover nesting site abused by some folks in the OHV activity.

Dear Chairman Padilla and Commissioners

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear California Coastal Commission,

I visited this beach when I was a child and remember the vehicles on the beach then. So much damage must have happened since then!

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Julia Burke

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. Dear California Coastal Commission,

Another issue revolves around the dust creation and the air particles that lead to respiratory issues for the surrounding communities. This makes already overburdened communities more vulnerable to multiple and compounding health impacts, magnifying disparities.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

Aren't there enough vehicles everywhere? To argue to allow engine-driven vehicles and machines access to wildlife and recreation areas is to argue we need more toxic poisons in our food, water, and air. That's plain ignorance.

Wildlife is always more significant than people's use of machines. Machines DON'T creates ecological continuance. Healthy biodiverse biology does.

Beaches and dune wildlife refugees are not only places that should be free from the noise, pollution, and land degradation of machines; dunes are habitats for a diversity of species that ALL depend on one another's health to survive and thrive.

The result of a healthy dune ecosystem is erosion control and a much-needed refuge for humans to enjoy and rejuvenate in the NATURAL world by escaping the mechanized world. Of course, both benefits have positive impacts on most people in more ways than allowing vehicles to trample over fragile wildlife and fauna.

Any decision other than legislating the protection of dunes from off-road vehicles is in itself a failure of both common sense and a blatant attack on the public good. A decision against safeguarding dunes from vehicles supports biodiverse ecosystems' needless destruction. ALL life, our plant and animal kin, and humanity require healthy biodiverse ecosystems to live in.

Do your job and protect the natural world, not the special interests of the few adolescents who have NEVER grown up and would use utilitarian technology (mechanized vehicles/cars) to destroy the natural world we require to live in and enjoy for future generations.

To the extent wild nature is destroyed, so humanity destroys itself.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Commissioners,
There are places where OHV can use, but there are VERY limited numbers of places left where birds, such as the Snowy Plover, can nest. Please recognize CA's unique role in helping to preserve these Federally-listed species. They are my favorite bird, and now my 4-year old's favorite bird. I don't want to tell her that she can't see them anymore. We need be smart and keep these precious lands open to the uses that are compatible with them! Thank you so much!

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Dear California Coastal Commission,

I'm sure that riding a dune buggy around Oceano Dunes is a lot of fun, but the Coastal Commission has the responsibility (as does the State Parks, for that matter) to preserve the dunes, and if recreational riding on the dunes threatens them, then riding has to go.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

In addition to protecting coastal ecology, you should dramatically restrict use of off-road vehicles in all Coastal areas. Why? Global warming and the enjoyment of other users. Who wants to hike or picnic with roaring engines in the background?!

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear California Coastal Commission,

I've stayed near Oceano dunes park, and unless you're in a vehicle, it's nearly impossible to enjoy the beach the way you can any other beach. Getting to the waves is like crossing a highway. Please change the regulations - thank you.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Dear California Coastal Commission,

Please do all you can to eliminate vehicular use of the dunes. A wide range of recreational activities would still be available to visitors even if vehicular traffic on the dunes were to be eliminated. Preserving California's coastal environment should be a main objective of State Parks. Thank you.

Dear Chairman Padilla and Commissioners

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Chairman Padilla and Commissoners,
We have lost so many bird species etc., over the years due to loss of habit, no longer on the protection list etc., Please stop this destruction of the Oceano Dunes with allowing OHV access and protect all species that live there.
Thank you kindly,
Colleen Doing

Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Louise Johnson

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear California Coastal Commission,

Dear commission, I am a local owner and when the park was closed it was a wonderful clean and safe experience enjoying the local beach. The beach closure had no impact on my rentals, and I heard only positive responses that the beach can finally be safely enjoyed by families.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Michael Garitty

Dear California Coastal Commission,

The Democratic Party platform should support: Animal Rights, Defending the Affordable Care Act, Ending Citizens United, Ending Marijuana Prohibition, Giving Greater Visibility to Pro-Life Democrats, Gun Control, Net Neutrality, Raising the Minimum Wage to $15 an Hour, Responding to the Scientific Consensus on Global Warming, and a Sustainable Energy Policy.

Democrats for Life of America, 10521 Judicial Drive, #200, Fairfax, VA 22030, (703) 424-6663

Dear California Coastal Commission,

In the ?70?s I rode my motorcycle from Portland or in the rain to testify for the closure to motors of the dunes near Florence. This time more clearly,I hope, I state NO motors. Maybe one boardwalk for wheelchairs End the unfair unjust expropriation and destruction even only one motor wrests from the rest of us

Dear California Coastal Commission,

The Oceano Dunes belong to all Californians. How you can allow activity by a few to destroy the dunes is inexplicable. Every tire track is displacing sand and potentially maiming or killing natural inhabitants is this delicate environment, for the thrill of a few. Make the dunes enjoyable for all by ending OHV activity sooner rather then later.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

A number of years ago my wife and I had one of the rudest awakenings of decades of tent camping at Oceano Dunes after driving up a beautiful beach and setting up our tent in an area with many others. We saw no signs that we would be buzzed by multiple loud vehicles at sunrise driving between tents at high speeds but that was our wakeup call.

We tried exploring the dunes on foot only to discover the damage the OHVs had inflicted on this delicate environment and had several more close calls with OHVs flying over the top of dunes and coming down close to us. This was an unsafe place for campers and hikers and though we saw the beautiful potential of these dunes we have not returned to Oceano Dunes because of the danger and incompatibility of activities and the sadness of seeing such destruction of nature.

Must we leave our destructive footprints everywhere we visit? NO! We need to return Oceano Dunes to the natural environment that supported life there for so long,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. Dear California Coastal Commission,

The last paragraph of the Sierra Club letter , giving the effects of the harm to the dunes by OHVs is so important. The vehicles have other places to ride. Hills in my area (South Pasadena) were eroded by hill-climbing motorcycles more than 40 years ago, and nothing grows on the long-ago trails left by the motorcycles.

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

PLEASE! For the sake of the native wildlife, the human non-OHV-riding users, and future human generations, take action NOW to save the Oceano Dunes while there's still time.

Sea levels are rising, can the Oceano area survive the loss of its barrier dunes? Or, will what is left of them, if OHV usage is allowed to continue, simply be leveled by wave action, allowing greater ocean flooding of inland areas?

I have camped at beautiful Oceano many times, it's a favorite destination. Please do not allow any further degradation of the magnificent Oceano Dunes by allowing continued OHV usage on the dunes.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Dear California Coastal Commission,

this is a matter of seeing the bigger picture and longevity of the coastline and environment at this location, its time to phase out the OHV use and salvage what we have left. There are a multitude of other available places to enjoy OHV recreation. Lets save Oceano Dunes Please!

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

those dunes are very special and should be used only by people who respect their uniqueness. Also we must allow the birds who nest there to raise their young in peace, let alone not allow the destruction of their nest by those incredibly noxious OHVs

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear California Coastal Commission,

This horridly destructive OHV activity has absolutely no place in Oceano Dunes, or any beach area along our Coast! This irresponsible activity destroys the beach, the wildlife, and the quiet enjoyment of the residents and other recreational activities alike. It is long past time to Stop this.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

We desperately need to secure the future of the Oceano Dunes. The OHVs now allowed within the Oceano Dunes are not compatible with the protection of a fragile coastal dunes complex, threatened species, and environmentally sensitive habitat area. For those reasons and more, OHV use must be phased out at Oceano Dunes in favor of traditional, low-impact beach recreational use.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Dear California Coastal Commission,

I have been worried about the dunes here on the Sonoma County Coast where I live. I've seen for years how the dune grass holds the sand. Without it - the beach will get smaller and smaller. We must educate folks, put up barriers while dune grass is protected so that it can recover from damage. People don't understand their impact, but with education will care more for these important dunes.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. Dear California Coastal Commission,

As California parents of two children, we strongly want our kids to grow up with large, clean, wild beaches WITHOUT vehicles cluttering up the beauty. Please.....we urge you to adopt ALL the recommendations of the Coastal Commission. WE WANT CLEAN BEACHES.....WITHOUT THE NOISE AND POLLUTION AND DAMAGE CAUSED BY VEHICLES. Thank you for your clear vision and your political courage. Sally and Jake Schwartz, Petaluma

Subject: Ensure Sustainable Management of the Oceano Dunes

Categories: Public Comment

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Grace Tam

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

Dear California Coastal Commission,

A second generation Californian, I would hope to preserve the beautiful state I grew up in for the next generations. My grandfather homesteaded in southern California and my mother and I were both born and raised to appreciate the fragile dune ecosystem.

Dear Chairman Padilla and Commissioners

Dear California Coastal Commission,

I have loved visiting and playing on dunes without a vehicle and would never use an environment-damaging OHV. Please protect this wonderful part of the coast for those of us who want to play in harmony with nature.

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Sandy Zelasko

Dear California Coastal Commission,

Do we really need to compel you further to stop this damage to dune habitat? The answer is unquestionable; dune habitats are essential to the success and safety of coastal communities - human and animal.

Make the decision that will protect our future.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Dear California Coastal Commission,

This beach is more like a highway. We shouldn't be using our beautiful coast for loud, polluting, damaging vehicles.

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Please phase out OHV use in the dunes system ... Thank You M. Bourke

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. Subject: Plans for Oceano Dunes

Categories: Public Comment

Hello! I would like to voice my thoughts on the CA Coastal Commission vs CA State Parks plans for Oceano Dunes. My husband and I moved to Nipomo after living in Southern CA for years. We had vacationed for years on the central coast, mainly for the open, natural settings, and miles of uncrowded beaches to walk with our dogs. We dreamed of being able to retire here, and were finally able to make that happen here in Nipomo. However, we quickly discovered that beach access for walkers was very limited in the south county. Oceano Dunes beach was right there, and yet unusable because of the constant noisy and dangerous vehicle traffic allowed on the beaches there. Not only that, but we learned about the terrible, unhealthy air caused by the destructive OHV use in the dunes. We also heard about the many accidents and illegal activities such as unpermitted concerts and shootings that have gone on. The cost in medical care, increased police protection, and trash services can't be covered by the nominal entry fee, so we are subsidizing outsiders use with our tax dollars. Then COVID hit, and driving on the beach and OHV use were stopped. We walked on the beach for miles several times a week. Accompanied only by other walkers, horseback riders, fishermen and surfers. How quiet and wonderful that was! We thought, why isn't this available to all of us, all the time; instead of to a group out of the area OHV enthusiasts?

Now, however vehicle use has returned and we are either limited to a short section of beach north of Grand Ave that is crowded with tourists, or to go south and try to dodge the numerous vehicles, with blaring music, and a crowd intent on partying, not enjoying the beauty of the beach. The people using the OHV park mainly come from the central valley and the Riverside area. We need access for local residents. It is the only real beach access for Oceano, Nipomo, Guadeloupe, and Santa Maria residents. So I heartily endorse the CCC plans to phase out vehicle use of the beach south of Grand Ave. It would protect the many native plants and animals in the area. The area would become a mecca for natural tourism. Revenue from destructive, polluting OHV businesses would be replaced by eco-tourism. The air quality would gradually improve, especially if OHV use was phased out in two to three years. Conscientious development of Oso Flaco and the Phillips refinery area into tent camping areas, nature walks and the like would be wonderful. The plans recently released for the Diablo power plant area are much more suited to the beautiful central coast that the awful oil fueled Disneyland the State Parks proposes.

The State Park plan would increase traffic, noise and air pollution. 200 RV sites with dump stations? An obstacle course? Miles of beach adjacent farmland paved over. The operating budget and insurance costs would be astronomical. All that so people from out of the area can destroy our dunes and pollute our air?? Common sense must prevail here. The State Parks have obfuscated and delayed and outright ignored the Oceano Dunes ESHA regulations for years. The time has come- protect and preserve our dunes and beaches for generations to come. The CCC plans should be approved to keep our beautiful beaches accessible to everyone.

Regards,

Lori Forbes
Nipomo CA

Dear California Coastal Commission,

Dear Chairman Padilla and Commissioners -

Respectfully.
As a lifelong coastal, rural, coastal Northern Californian I speak from experience. ORV create extensive damage and lingering harm to ecosystems as well as to specifically sanctioned, designated access areas for human activity?whether these ecosystems are considered and determined to be hardy or delicate.

Since allowing accommodation for ORV?after extensive pressures to conform to engine-run and cross-country bike ORV enthusiasts? usage?within our expansive and grand far northcoast Redwood forests and our once pristine beaches?the level of structural damage and erosion that compromise environments and habits has been a continual hardship?across the actual, aesthetic and financial spectrum.

The aesthetic negative costs of consequences are immeasurable. The annual restoration and labor expenses to effectively maintain and restore both designated accessible areas and restricted areas is never-ending in the considerable sum within the ever-dwindling park budgets.

After over four decades of observation, it could be said that ORV enthusiasts do not honor areas that have become specifically open to their usage. Limitations become temptations that beckon ORV enthusiasts to cavalierly ignore. There is an incessant will to drive or peddle into, over, across, through, beyond clearly marked barriers. These transgressions are easily achieved because of the parks? inability to even adequately monitor the most popular locations, let alone the more isolated ones. Oversight is physically and financially prohibited in the short and long term.

I implore you to do everything in your power to secure the highest protections for Oceano Dunes as A unique environmental nature reserve.

As you are aware, like the National and State Redwood Park, Oceano Dunes is a treasure. Photographers Fromm throughout our nation and world honor its beauty with inspiring images. Images that may become become mere historical documentation of a once thriving, sacred site.

Please reject all proposal that would reduce responsible conservation and instead, focus on a steward-base plan that prioritizes the irreplaceable values that Oceano Dunes possesses.

With every good intention - Rita

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks? Coastal Development Permit to bar night riding and driving across Arroyo Grande Creek, close the Pier Avenue ramp, preserve the plover exclosures, leave Oso Flaco as it is, and all other short-term management measures you have held in abeyance since July 2019, when

you gave State Parks a year -- now stretching to 18 months -- to put these measures into effect on their own.

Above all, start the clock on the phase out of OHV activity.

The Park would continue to offer unique experiences such as car camping on the beach, along with walking and swimming, horseback riding, birding, fishing and hiking the dunes; the kinds of activities that characterize the healthy economies of every other beachfront community in California, with the exception of Oceano. Please dispense with the fears and economic arguments against doing this, which were rebutted during the park?s closure to vehicles from March to October of last year. Tourism continued, and supported the local economy, as it does the length of California?s coast.

The residents of the town of Oceano can?t walk on their beach without taking their lives in their hands, and they are watching the coastal dunes complex ? their defense against rising sea levels ? being eroded away. The plume of health-destroying particles from foredunes denuded of vegetation by off-road activity continues to stretch to Nipomo and Guadalupe. All of this is an environmental injustice. You know this, and you know State Parks is not fixing the problem and has not heeded your directive to come up with a plan to protect the Environmentally Sensitive Habitat Area. You must do so now.

Thank you,

Sincerely,

Dear California Coastal Commission,

Vehicles do NOT belong on the dunes. Period!

Dear Chairman Padilla and Commissioners

Please support and implement your staff?s recommendations for the Oceano Dunes and amend State Parks?
