Subject: August-2021- Agenda- Mission Beach storm drain comment

Coastal Commission-

Just a suggestion concerning this project. I was living in South Mission Beach during the 80's when a sewer project was completed on the bayside of South Mission Beach. They replace a half mile sewer pipe along the beach in the sand next to the houses.

The problem. When they dug up the sand to replace the pipe. They cover up the pipes and the top layer with millions of tiny rocks and cobblestone. I think I still have scars on my knees from playing sand volleyball at the time. (joking).

It was so bad with all the rocks that the city had the construction bring out a ten foot high by four wide sifter. They spent about three weeks sifting the sand.

Recommendation for today's project. They need to scrape off the top two feet of where they are digging and storing the sand. Then when finished in that area. Put the old clean sand back on top.

Thank you for your service.
