RE: Appeal No. A-3-STC-22-0018, Staff Report re: Substantial Issue Determination

Dear Chair Brownsey and Commissioners,

The City of Santa Cruz (“City”) has reviewed the Commission’s staff report for the above-referenced matter. The **City appreciates and agrees with the Commission’s staff’s recommendation of “no substantial issue”** and wanted to take the opportunity to provide some additional information and clarifications to supplement the report and the materials previously provided by the City. In particular, as detailed below, the City would like to emphasize the following points: 1) the City’s Oversized Vehicle (OV) Amendments and Safe Parking programs aim to protect sensitive species and Environmentally Sensitive Habitat Areas (ESHA), along with alleviating coastal parking demands; (2) the City’s OV Amendments and Safe Parking programs, together, aim to encourage people living in OVs to utilize Safe Parking facilities, in order to promote additional public access to the coast and to address environmental impacts related to entrenched OVs, many of which are located in the Coastal Zone; and (3) people living in OVs will not be unjustly impacted by the City’s OV Amendments, particularly given the broad range of options available to people living in OVs. This final section includes additional details about the City’s Safe Parking program that were not previously provided.

I. The City’s OV Amendments and Safe Parking Programs Aim to Protect Sensitive Species and Environmentally Sensitive Habitat Areas (ESHA), Along with Alleviating Coastal Parking Demands.

The Commission’s staff report cited concerns regarding the City’s evidentiary linkage between the impacts that the City is aiming to address and the City’s overnight OV parking prohibition. City staff previously provided photos, primarily of refuse in and around OVs but also of blackwater dumping, public access being occupied by OVs and associated belongings, and leaking fluids from OVs. (*See Exhibit 10* to the City’s June 23, 2022 letter to the Commission.) However, more emphasis could have been provided that these conditions are prevalent in areas with sensitive species, ESHA, and significant coastal access parking demands.

As noted in the City’s letter to the Commission dated June 23, 2022, the majority of OVs in the Coastal Zone are located on the Lower Westside of Santa Cruz. Specifically, the OVs are often parked

along Delaware Avenue, Natural Bridges Drive, and Schaffer Road. See City's Exhibit 11 (submitted with this letter, identifying areas of concentrated OV parking).

Natural Resources. Many areas in the City with severe impacts related to overnight OV parking are in close proximity to and often immediately adjacent to three creeks (Moore Creek, Natural Bridges Creek, and Arroyo Seco Creek) identified in the City's Creeks and Wetlands Management Plan from 2008¹, which is part of the City's Local Coastal Program (LCP). These areas are ESHA for a wide range of sensitive species.

The sensitive species listed below, identified by the City's Creeks and Wetlands Management Plan, are likely to be adversely impacted by improper sewage disposal, inadequate sanitation resources, and trash because their habitat is immediately adjacent to or in very close proximity to areas with a high concentration of overnight OV parking. See City's Exhibit 11 (submitted with this letter, identifying areas of concentrated OV parking and adjacent ESHA).

- *California red-legged frog* (federally listed as threatened and California species of special concern): known to occur in Antonelli Pond and marsh at Natural Bridges;
- *Monarch butterfly* (locally unique species in Santa Cruz's General Plan and LCP): roosts at Natural Bridges;
- *Tidewater goby* (federally listed as endangered and California species of special concern): potentially present at mouth of Moore Creek at Natural Bridges State Beach;
- *Southwestern pond turtle* (federal and California species of special concern): known to occur in Moore Creek, Antonelli Pond, and marsh at Natural Bridges;
- *White-tailed kite* (California-designated Fully Protected Species): known to nest at Natural Bridges and potential habitat along portions of Moore Creek;
- *Coopers hawk* (California species of special concern): known to nest along Moore Creek;
- *Yellow warbler* (California species of special concern): formerly bred at and potential nesting habitat at Antonelli Pond;
- *Yellow-breasted chat* (California species of special concern): potential nesting habitat at Antonelli Pond;
- *Tricolored blackbird* (California species of special concern): historically nested at and potential nesting habitat at Antonelli Pond; and
- *Yuma myotis*, *Townsend's western big-eared bat*, and *San Francisco dusky-footed woodrat* (each federal and California species of special concern): each has potential habitat along Moore Creek.

Coastal Commission Senior Ecologist Dr. Lauren Garske-Garcia confirms concerns for some of these species in a letter dated July 17, 2019, where she called for a wildlife corridor for the California red-legged frog leading between Schaffer Road and Antonelli Pond. She also cited the potential for the Western pond turtle and tri-colored blackbirds near Antonelli Pond and cited the need to evaluate the presence of wetlands on the site at the northeast corner of Delaware Avenue and Schaffer Road, all locations immediately adjacent to a high concentration of regular OV parking. Dr. Garske-Garcia also says of the vacant site adjacent to many entrenched OVs that "even highly invaded grasslands may be

¹ See <https://www.cityofsantacruz.com/government/city-departments/planning-and-community-development/long-range-policy-planning/area-plans-and-city-zoning-code/city-wide-creeks-and-wetlands-management-plan>.

considered ESHA.” See Exhibit 15 for excerpts from Coastal Commission Senior Ecologist Dr. Lauren Garske-Garcia's July 17, 2019 letter to the City.

The City of Santa Cruz and its residents are highly environmentally conscious. The potential impacts to ESHA and sensitive species are of significant concern to both the Council and the citizenry, as is certainly the case for the Commission as well. Exhibit 11 to this letter provides a map showing locations of creeks, wetlands, and habitat, along with a key showing where additional photos in Exhibit 12 were taken. The photos in Exhibit 12 show recent situations related to long-term OV entrenchment and the resulting environmental impacts, such as OVs leaking fluids, riparian areas used as restrooms, and trash associated with OVs, which is often immediately adjacent to ESHA. Contaminants related to long-term OV entrenchment can create environmental damage and be detrimental to both ESHA and the many special status species in the immediate vicinity. Notably, many of the pictures in Exhibit 12 are very recent, having been taken in just the past week or two, as was the case with many of the photos provided in Exhibit 10 to the City's June 23, 2022 letter to the Commission. The purpose of providing these photographs is to show that, even with resources in place (for example, dumpster services nearby and safe parking facilities available), OV entrenchment results in significant pollution in close proximity to ESHA and sensitive species. While the City recognizes that not all OV dwellers cause environmental damage, the pictures show that OV entrenchment in the City is a serious, current, and ongoing problem.

The City also takes its public access requirements seriously. In addition to the environmental concerns noted above, the photographs in Exhibit 12 also show how the OVs occupy many parking spaces along Delaware Avenue and Natural Bridges Drive. These locations are directly adjacent to Natural Bridges State Park. The State Park charges for parking, and thus, the adjacent, free on-street parking is very popular with beachgoers in the spring and summer and with eco-tourists watching the Monarch butterflies in the fall. Because current parking rules allow vehicles to stay in one place for 72 continuous hours, and vehicles tend to only move a short distance after those 72-hours have expired, OVs often remain stagnant in popular on-street parking areas for extended periods of time, occupying parking spaces (with both vehicles and belongings) that would otherwise provide free parking for coastal visitors. See Exhibit 11.

II. The City's OV Ordinance Amendments and Safe Parking Programs, Together, Aim to Encourage People Living in OVs to Utilize Safe Parking Facilities, In Order to Promote Additional Public Access to the Coast and Address Environmental Impact Related to Entrenched OVs, Many of Which are Located in the Coastal Zone.

Page 15 of the Commission's staff report states the following:

Parking restrictions are proposed in local jurisdictions for a variety of reasons. Sometimes it is a matter of a desire to generate a funding stream, other times it is to facilitate desired use patterns (e.g., where a time limit is added to ensure turnover so potential visitor use is not thwarted by vehicles that never move), and yet other times it is to address an identified problem that the parking itself is generating. The parking restrictions proposed here have been framed by the City in terms of the latter, and the City has cited to public safety and public health problems, public nuisance issues, camping in areas not called out for camping (and thus not equipped to handle that type

Additional Materials
A-3-STC-22-0018
Page 3 of 704

and intensity of use), and coastal resource impacts associated with such overnight parking.

The City's position is that the OV Ordinance Amendments and Safe Parking Programs are aimed at: (1) facilitating desired use patterns (disrupting OV entrenchment and improving vehicle turnover for the benefit of the community, including potential visitors, thereby reducing the likelihood of environmental impacts and public access impacts); (2) encouraging those living in OVs to utilize Safe Parking lots, thereby addressing public health and safety issues that are associated with OVs that have become entrenched on City streets; and (3) addressing visibility issues related to OVs parked too close to intersections.

The City currently has a problem with entrenched OVs parked on City rights-of-way, and the OV Amendments and Safe Parking Programs are intended to disrupt entrenchment by directing OV dwellers to safe and hygienic OV parking alternatives. The City's experience is that OVs parked in the City tend to stay in one area.² The Vehicle Code requires all cars to move every 72-hours. *See* Vehicle Code 22651(k). With that said, the City's experience is that OVs tend to park in one spot for 72-hours, then move to a nearby location and stay there for another 72-hours, and then move back to the initial location, or somewhere else nearby. *See Exhibit 16*. The record includes ample evidence, showing the impacts of OV entrenchment on City streets. *See, for example, Exhibit 16, Exhibit 10 and Exhibit 12.*

One of the Council's goals in passing the OV Amendments is to break the cycle of entrenchment and encourage OV dwellers to, at minimum, spend the night at a Safe Parking location, where they will be able to access restrooms and trash facilities, reducing the amount that OV dwellers urinate/defecate/litter on City streets, sidewalks, and nearby areas, such as ESHA. If OVs are required to move every night, the City's hope and reasonable expectation is that: (1) OVs will not accumulate the same level of trash, debris, furniture, etc. that currently impact City streets and sidewalks (including streets and sidewalks in the Coastal Zone), and (2) OVs will move daily, helping with on-street parking turnover for the benefit of the community, including potential visitors to the coast.

It is also worth emphasizing that the City's current Safe Parking Programs are *not close* to full. As of the time of this writing, eight out of the nine City-operated Safe Parking spots are available. City staff has provided significant outreach to OV dwellers in the City, but the program, so far, is underutilized.

The demand for these programs has been low, most likely because OV dwellers, under the current regulations, are only required to move, at most, once every 72 hours, and, when movement does occur, it is often a very short distance. Current and former OV dwellers have made comments to City staff along the lines of "Why would I use Safe Parking when I currently don't have to move?"

² *See, for example, Exhibit 16.* Note that Exhibit 16 is select public comment taken from Exhibit 5 to the City's 6-23-2022 letter. It is unclear if Commission staff provided the Commission with the City's bulkier exhibits, so these select public comments are being provided again, in case they were not previously received by the Commission.

The daily movement associated with the Tier 2 Safe Parking program represents a trade-off between an ability for OV dwellers to remain in place for extended periods of time and an attempt to better manage both environmental damage and public access. As described in Section III below, the Safe Parking locations are generally centrally located in the City, so OV dwellers will not need to travel far to reach them. Upon departure from Safe Parking facilities, it is unlikely that the same, large number of OVs will all go to where they are currently concentrated on and around Delaware Avenue and Natural Bridges State Park, where ESHA and sensitive species are concentrated and where coastal public access demand is very high. That location is approximately three miles from the downtown safe parking places, which is relatively far in Santa Cruz's compact boundaries. Instead, many of the OV dwellers will choose to park in other free parking spaces, closer to their designated Safe Parking location, many of which will likely be either outside of the Coastal Zone or in areas of the Coastal Zone where parking is not in such high demand.

III. People Living in OVs Will Not Be Unjustly Impacted by the City's OV Amendments, Particularly Given the Broad Range of Options Available to People Living in OVs.

The City would like to emphasize three points related to the limited potential for parking tickets resulting from the City's OV Ordinance amendments for people living in OVs who make a good-faith effort to comply with the City's Municipal Code.

First, Santa Cruz Municipal Code (SCMC) 10.40.120(g)(7) assures that people living in OVs who are actively seeking safe, legal overnight parking or shelter opportunities will not receive a parking ticket. This section exempts the following individuals from the City's midnight to 5:00 a.m. OV parking restriction:

A person and oversized vehicle that are, collectively, registered and participating in a safe parking program or other safe sleeping or transitional shelter program operated or sanctioned by the city, but do not have access to a safe parking space or other shelter options under such programs due to a lack of capacity.

SCMC 10.40.120(g)(7). This exception will not be difficult or complex to implement. If there is a shortage of available Safe Parking capacity, the City plans to issue overnight parking permits to people living in OVs who register for sanctioned City, County, or non-profit Safe Parking or shelter programs.

Second, the City currently has readily available Safe Parking capacity, and that capacity is vastly expanding. It is worth emphasizing again that, so far, demand for City-sponsored safe parking has been minimal, most likely because, as described above, OVs can legally park in other locations, without needing to relocate daily. To summarize, the following resources are currently available, or will be available, in the very near term:

- Within City limits, the Association of Faith Communities (AFC) manages approximately 21 safe parking spaces, including approximately 20 on religious assembly sites and one on City-owned property. AFC also manages up to an additional 21 spaces within the County of Santa Cruz, but outside City limits.

- As of March 1, 2022, the City began operating three Safe Parking Program locations on public parking lots that allow for nine OV's as part of the Tier 1 and Tier 2 parking programs. Currently, nine spaces are available in two Tier 1 and Tier 2 lots (Police Department Lot and Lot 4, respectively, with six of eight spaces in Lot 4 currently offered). *See Exhibit 14* for a map of the existing and planned Safe Parking facilities.
- On June 14, 2022, the City Council approved a one-year, approximately \$400,000 contract for a Tier 3 Safe Parking Program which will serve approximately 22 OV's, with the operator providing wrap-around services with case management to support people in moving from their vehicles into housing. This is a 24/7 parking program, and participants are provided with free transportation to/from the Armory location and various points in the City. The City is investing in infrastructure improvements at the Armory and working with operators (AFC and The Free Guide) towards an expected start in July 2022.
- The City has direction from the Council to operate at least 30 Tier 2 Safe Parking spaces. While only six Tier 2 spaces are currently in operation (the other three mentioned above are in Tier 1), the City has locations identified for 40 additional Tier 2 spaces in the City, for a total of at least 46 Tier 2 spaces in the City, with most of those centrally located in and around the Downtown. *See Exhibit 14*. The current expectation is that 13 of the potential 49 Tier 1 and 2 Safe Parking spaces will be in the Coastal Zone. Another 18 spots are in Safe Parking locations within 650 feet of the Coastal Zone, and another 12 spots are in Safe Parking locations within approximately one quarter mile of the Coastal Zone. In fact, only six Tier 1 or 2 spaces are planned at any appreciable distance from the Coastal Zone, and even those are only an approximately one-and-a-half mile driving distance to the Coastal Zone. A number of the planned locations have additional capacity that would allow for future expansion beyond the 49 existing/planned spaces, should demand for additional Tier 2 Safe Parking spaces arise. At this time, the City's approach is to operate each location with a relatively small number of OV's and expand locations and capacity at sites when demand increases, while maintaining capacity for a minimum of 30 Tier 2 spaces.
- The City recently significantly liberalized regulations regarding vehicular dwellers on private property. Religious assembly uses can now host six (up from three, pre-2021) OV's on each property with no permits or authorizations required. (SCMC 6.36.030(a)(2).) The City also allows businesses to host up to three safe parking spaces (up from two, pre-2021). (SCMC 6.36.030(a)(3).) The City allows people to dwell in an OV indefinitely (previously only three days per month, pre-2021) on residential properties when certain conditions are met. (SCMC 6.36.030(a)(4).)
- The Santa Cruz Harbor, located in the City of Santa Cruz Coastal Zone and Coastal Appeal Zone, designates 15 parking spaces for recreational vehicles to park. Outside the City but in nearby areas, at least 429 additional recreational vehicle camp sites are available in at least five other locations within the Coastal Zone, for a total of at least 444 recreational vehicle spaces in Coastal Zone areas in and near the City. Exhibit 13 identifies the locations and number of recreational vehicles that can be accommodated at

each location. Many additional recreational vehicle camp sites are available in the County but outside the Coastal Zone.

Third, the City would like to provide some clarity with respect to the number of people residing in OV's that could be impacted by the City's OV Amendments. A recent Google aerial map (dated September 2021) found approximately 110 OV's parked on City streets. The count did not include trucks over 20 feet in length without a camper shell (SCMC Section 10.40.120(g)(8) exempts commercial vehicles from the 12:00 a.m. to 5:00 a.m. parking prohibition if a permit is properly displayed, and with the potential environmental impacts more likely to stem from people living in vehicles, trucks without a camper shell are unlikely to include a vehicle dweller). ***Of the 110 oversized vehicles identified, many are clearly not used as dwellings.*** For example, City residents might park their OV's or vans, such as Sprinter vans, on public streets. As such, ***the number of OV's used as shelter for people residing in them is likely substantially less than 110.*** A total of 52 of the OV's shown were located within the Coastal Zone, with the vast majority of those parked in the lower West Side neighborhood, raising public access and environmental issues in that area. See Exhibit 9 (submitted with 6-23-2022 letter), City's OV Count Methodology. See also Exhibits 9A-9G (Google Earth Images, submitted with 6-23-2022 letter). With 71 Safe Parking spots identified, the capacity to expand at many of those locations, and the Municipal Code providing for the issuance of parking permits to people living in OV's who register for Safe Parking or other sanctioned programs but cannot park due to lack of capacity, the City's OV Amendments will not result in parking tickets for those who seek to comply with the Municipal Code by utilizing Safe Parking spaces or registering for a Safe Parking program.

No single or simple solution exists that can fully address the environmental and public access impacts associated with OV entrenchment in the City. The City's strategy of prohibiting overnight OV parking on City rights-of-way, while at the same time providing Safe Parking locations, was the City Council's reasonable attempt to balance the needs of RV dwellers, parking access, roadway safety, community quality of life, and environmental resources. This approach is similar to the approach taken by dozens of other coastal communities (*see Exhibit 8*, submitted with the City's June 23, 2022 letter) and was supported by a wide range of the local community, including one Marine Scientist who provided a public comment that is quite relevant to the Commission's decision today:

"I support your efforts to ban overnight parking in our coastal community. As a marine scientist, it is painful to observe the abuse and neglect of our coastal treasures in this community. Santa Cruz is blessed with incredible coastal and marine biodiversity which is being actively degraded by stormwater pollution, human waste, plastic pollution and hazardous materials disposal from RV and large vehicles who live on our streets.

We should protect our coastal watersheds as they are critical to climate change resilience and adaptation in the near term. . . . Protecting our coastal community while finding solutions to our surging homeless issue is not mutually exclusive, but it does mean identifying critical areas and habitats, such as our rivers, low lying areas, and coastal zone which demand immediate attention and protection. Please I urge you to put neighborhood, community and environmental well being at the top of your list when deciding among solutions."

Additional Materials
A-3-STC-22-0018
Page 7 of 704

See Exhibit 16, p. 746 (comment from Rikki Eriksen, Ph.D.
California Marine Sanctuary Foundation, Marine Ecologist, Director of Marine Programs).

This comment reflects the environmental stewardship that is at the heart of many City efforts, and while that environmental consciousness serves as guidepost for various efforts, the City's actions related to the OV Amendments also heed the local community's strong social consciousness by providing three tiers of robust Safe Parking options for people living in vehicles who would be affected by the midnight to 5:00 a.m. OV parking restrictions.

Thank you for your attention to this letter, submitted on behalf of the City of Santa Cruz. We look forward to discussing this matter with the Commission and hope that the Commission concurs with its staff in finding no substantial issue.

Sincerely,

Lee Butler, Director of Planning & Community Development
Cassie Bronson, Deputy City Attorney

Excerpts from Coastal Commission Senior Ecologist Dr. Lauren Garske-Garcia's July 17, 2019 Letter to the City

The letter is related to considerations for potential development on the property at the northeast corner of Delaware Avenue and Shaffer Road, which is immediately adjacent to concentrations of entrenched oversized vehicles. (Emphases in the excerpts are from Dr. Garske-Garcia.)

Natural Bridges Gardens: Wetland Delineation

Dr. Lauren Garske-Garcia, Ecologist (July 17, 2019)

A preliminary delineation was submitted for Commission feedback ahead of any application to develop the subject parcel. Prior discussions have relayed concerns and potential issues to the extent possible in the absence of actual data. Overall, the submitted delineation has a multitude of challenges to address before we will be able to effectively use it in any permit analysis. Some of these present substantial hurdles while others may be resolved with another delineation that captures lacking information. Further research will be needed to determine whether wetlands were historically present on the site...

...

While we can appreciate that the land had also been used for agriculture historically, we also know that as land fallows, features such as wetlands can reappear following long-term suppression and manipulation. Indeed, this is the case on the adjacent property at UCSC's Coastal Science Campus, where several wetlands were mapped over the course of developing their Coastal Long-Range Development Plan and continue to be managed today. In the absence of on-the-ground data, we are going to have to **seek out other forms of information** such as aerial imagery and do our best to interpret from that. I note that in such circumstances, our conservative **judgement favors the resources of the State over private interests** and so it is to the benefit of all parties to pursue clarity. This is something the developer should be taking a lead on and we will review as well as supplement with knowledge from our own research during the review process.

...

The consequence of this error is significant in that a few key plant species relied upon in the delineation based upon WMVC have a different indicator status in the AW, and which actually [further] favor recognition of additional wetlands. In particular: *Conium maculatum* goes from FAC to FACW, and *Rubus ursinus* and *Plantago lanceolata* go from FACU to FAC – this then necessitates reevaluation of data and calculations on the sheets, **resulting in recognition of SP2, SP3, and SP8 as Commission wetlands and thus, all sampled points in this delineation qualifying**. Note that we have also separately verified that the delineations completed at UCSC's Coastal Campus adjacent to this parcel used the AW supplement.

...

In looking at the broader area's soil maps (on NRCS), it becomes evident that the UCSC property has similar soil composition (namely composed of units 132 and 178, the latter of which is classified as hydric) and **although 132 (Elkhorn Sandy Loam) is not listed as hydric, significant wetlands occur over these areas on the UCSC campus and directly adjacent to the subject parcel**. The report seems to rely on this non-listed status as grounds for dismissing the potential for wetlands to occur except for the few occurrences it specifically documents and explains by way of farm runoff and a seep. I find this premature given the evidence at the adjacent property...

...

Buffers would be applied to all known wetlands in the vicinity, whether or not they are on the actual parcel of interest. For example, the wetlands near the railroad would benefit from protective buffers as would those on the adjacent UCSC campus. Generally, the Commission requires a 100-foot buffer surrounding wetland areas, which would also be consistent with the City-wide Creeks & Wetlands Management Plan (CCWMP) and the certified LRDP for the UCSC Coastal Campus.

...

Similarly, **other important natural resources would be protected and buffered** so as to be consistent with the surrounding area. For example, habitat connectivity for California red-legged frogs (CRLF) should not be bottlenecked between Antonelli Pond and UCSC, where a **300-ft wildlife corridor** is established along the northern parcel edge – we would want to preserve the 300-foot width across the subject parcel. Coincidentally, that corridor would include the railroad wetland buffer and possibly others (e.g., wetland observed at SP9). Though the CCWMP cites setbacks for riparian areas as being based from the centerline of the watercourse, note that the Commission more often relies on the outer edge of riparian vegetation as the *starting point* for buffers and these are most often on the order of 50-100 feet for perennial bodies so this too should be considered when identifying a development envelope.

...

While there is reportedly a dominance of non-native grassland vegetation, I note that the Commission recognizes this problem is universal statewide and **even highly invaded grasslands may be considered ESHA**. For example, grassland is typically characterized by a presence of herbaceous species (grasses, forbs and ferns) and by the limited presence of woody species. Specifically, herbaceous species should constitute at least 25% of the total landscape area, while woody species should represent no more than 25% of this (usually, this is encroaching scrub). To qualify as a native grassland such as coastal terrace prairie ESHA, 10% or more of the total cover should be comprised of native grassland vegetation. This will be considered when reviewing biological surveys.

...

Habitat for listed species such as CRLF is also protected, even if not demonstrably occupied but with a high probability of occupation provided the surrounding environment. Western pond turtles and tri-colored blackbirds are also reported from the immediate area and potentially other species could factor in.

Re: Substantial Issue Determination for Santa Cruz Coastal Permit Appeal, Project CP21-0174, Parking Restrictions

California Coastal Commission:

The American Civil Liberties Union of Northern California (“ACLU”), Disability Rights Advocates (“DRA”), Abbi Samuels, Peter Gelblum, and Veronica Crow respond to the staff recommendation of “no substantial issue” for the appeal associated with the City of Santa Cruz’s Ordinance 2021-20 (the “OSV Ordinance” or “Ordinance”), Project CP21-0174.

Although the staff report correctly found the City’s support for the parking restrictions were unsubstantiated and that unhoused people are an environmental justice community, the staff report erroneously determined that the appeal raises no substantial issue. **The staff recommendation failed to consider the impact of the 24-hour (or daytime) parking restrictions** proposed by the City and otherwise underestimated the extent to which the Ordinance and Permit impede coastal access. Further **the staff’s interpretation of the Commission’s Environmental Justice Policy effectively makes it meaningless**. As in 2016 when this matter was last before the Commission, we request that the Commission reject the staff recommendation and find a substantial issue here. **If the City’s plan is allowed to go forward, localities across the state will be encouraged to adopt similar plans and to severely curtail coastal access for unhoused people, people with disabilities, people of color, and other populations that the Commission’s Environmental Justice Policy is meant to protect.**

I. The Staff Recommendation Underestimates the Extent to Which the Ordinance and Permit Unlawfully Limit Access to the Coast, Ignoring the 24-Hour Restrictions.

The staff report recognizes that “free and/or lower cost parking, particularly along public streets and rights-of-way, is an important public access need, especially for those coming from further away and least able to afford pay parking options.”¹ Yet, the staff report did not consider the full scope of the ordinance’s parking restrictions in its public access analysis. In determining that there was no substantial issue regarding public access, the report failed to address or acknowledge the City’s 24-hour² parking restrictions, writing only that “the program would operate between midnight and 5am, a time when public access pursuits are typically quite limited.”³ As we noted in our appeal, **in addition to these nighttime parking restrictions, the City’s ordinance also prohibits parking of oversized vehicles (OSVs) at any time within 100 feet of a “crosswalk, intersection, boulevard, stop sign,” traffic signal, or arterial street.**⁴ These daytime restrictions are under the Commission’s purview.⁵ The City provides no analysis of the impact of these 24-hour restrictions on coastal access and the staff report makes no mention of them in their report. **This omission is reason alone to reject the staff recommendation.**

¹ Cal. Coastal Comm’n, Staff Report: Substantial Issue Determination at 15 (June 24, 2022) [hereinafter Staff Report], <https://documents.coastal.ca.gov/reports/2022/7/Th14a/th14a-7-2022-report.pdf>.

² At times, these restrictions are referred to as “daytime” restrictions given the more expansive nighttime prohibitions.

³ Staff Report at 3.

⁴ Santa Cruz, Cal., Ordinance 2021-20 (Oct. 28, 2021) (“Oversized vehicles shall not be parked at any place within 100 feet of a crosswalk, intersection, boulevard, stop sign, official electric flashing device or approach to any traffic signal.”).

⁵ Coastal Act §§ 30106, 30200 state that “‘Development’ means, on land, in or under water, the . . . change in the density or intensity of use of land,” and that “the policies of this chapter shall constitute the standards by which the adequacy of local coastal programs . . . and the permissibility of proposed developments subject to the provisions of this division are determined.” The extensive daytime restrictions will change the intensity of coastal use, and are development subject to the Commission’s oversight.

Sample Map Showing the Impact of the Oversized Vehicle Ordinance's 100-Foot Restrictions on the Lower Westside of Santa Cruz (purple lines show prohibited parking areas.)

As seen in the above map, this 24-hour restriction severely limits coastal access for owners of OSVs, including during daytime hours when the “public . . . pursuit[]”⁶ of coastal access is popular—for example, by prohibiting any OSV parking at all along nearly the entire length of multiple streets in the City. Though the staff report concludes the restrictions would affect “very few public . . . users” because “there is simply not a lot of public access occurring between midnight and 5am,” the City’s 24-hour parking restrictions make it practically impossible for OSV dwellers to park their vehicles at any hour, including the daytime.⁷ This lack of permissible places for OSV parking in the coastal area will have a particularly negative impact on people with mobility disabilities, including the elderly.

In addition to overlooking the 24-hour restrictions, the staff report also misconstrues how nighttime parking restrictions have impede coastal access. First, the staff report wrongly suggests that there must be some undefined threshold of impacted people before it can make a substantial issue finding. Then, without any factual support, the staff report simply assumes that there will be few who seek nighttime coastal access.⁸ Critically, the staff report fails to account for

⁶ Staff Report at 18.

⁷ Staff Report at 18-19.

⁸ *Id.*

how nighttime parking facilitates daytime coastal access. Though there may be less coastal use at night, the staff report does not address the fact that overnight parking restrictions will require OSV drivers to seek out parking somewhere far from the coast at night, and then drive back for daytime use. **The need to travel back-and-forth to the coastal zone is cost prohibitive** and will be **particularly arduous for people with mobility disabilities**, severely impeding their coastal access.

For example, appellant Veronica Crow is a 70-year-old trans woman who lives in her RV for safety and to be close to the beach, which helps her manage the mental health impact of her various conditions. Ms. Crow has several disabilities, including chronic brain cancer and arthritis in her hands and knees. Being able to park on the westside allows her to walk along the beach and along the cliffs daily, which is a significant source of comfort and solace to her.⁹ She reports that the parking restrictions would make it impossible for her to access the coast. She cannot move her vehicle on a nightly basis because of the high price of gas, her vehicle's low gas mileage, and her limited income. The only available parking spots she knows of are within 100 feet of intersections, meaning that under the City's proposed plan she will have **no parking access during the day**. The daytime and nighttime parking bans will effectively put the coast entirely out of Ms. Crow's reach.

Together, the City's daytime and nighttime parking restrictions severely limit coastal access, especially for OSV owners with disabilities and limited mobility. The proposed development, as the staff report acknowledges, is also inconsistent with Coastal Act Section 30210 and Local Coastal Program (LCP) Policy 3.5, which require Santa Cruz to **maximize recreational access opportunities**. Far from maximizing recreational access opportunities, the City's proposal will effectively leave disadvantaged OSV dwellers with no access at all.

II. The Staff Recommendation Fails to Remedy the Environmental Justice Issue Posed by the Ordinance and Permit.

The adoption of the 2019 Environmental Justice Policy provides that the Coastal Commission should consider environmental justice principles in its permit decisions. The Environmental Justice Policy states that "[t]he coast belongs to everyone, and access cannot be denied or *diminished* on the basis of race, ethnicity, income, socio-economic status, [] place of residence or other factors listed in the Policy Statement," including "*disability status*, sexual orientation, or

⁹ As included in our original appeal, Ms. Crow loves the water and used to surf. Her dog Eric also loves it. She has said that "the ocean is the only thing that keeps me sane." She has always lived relatively close to the beach, claiming "the peace and tranquility are in [her] blood, giving [her] a sense of calm." She used to take her daughter to the seashore frequently and said that it has always been part of her life. She says that once one has lived so close to the ocean and had it in one's life, it is hard not to feel that way. She would not know what to do without access to it.

gender identity.”¹⁰ In fact, developments and permits should “identify[] and *eliminat[e] barriers . . .* in order to provide for those who may be otherwise deterred from going to the beach or coastal zone.”¹¹

The staff report correctly identified unsheltered individuals sleeping in OSVs as an environmental justice community, which the Commission’s Environmental Justice Policy is intended to protect.¹² Unsheltered individuals, the report states, are a lower income segment of the population.¹³ Indeed, the staff report openly acknowledges that “the City’s program would **disproportionately affect unsheltered individuals**,” and that the City’s alternative parking program **lacks sufficient detail to mitigate punitive and regressive treatment of the unsheltered**.¹⁴ However, the report then dismisses these environmental justice concerns outright, stating simply that they do not rise to the level of a substantial issue because “such situations are a function of other societal issues, and not so much an issue of impeded public access”¹⁵—a conclusion that directly contradicts the staff report’s finding that the City’s program itself, not some “other societal issue,” would “disproportionately affect unsheltered individuals.”¹⁶

In doing so, the staff report again relies on wholly unsubstantiated conclusions that “the overall public access impact [is] relatively small” and that “the public access issues” are “limited.”¹⁷ The staff recommendation’s analysis of public access and environmental justice implies that because (supposedly) relatively few people are adversely affected by the parking restrictions, there is no substantial issue. However, the substantial issue determination does not focus on the size of population affected, but is centered on equitable access. The Environmental Justice Policy explicitly states that the “coast belongs to *everyone*,”¹⁸ regardless of the size of their group.

¹⁰ Cal. Coastal Comm’n, Environmental Justice Policy at 4, 7 (Mar. 8, 2019) [hereinafter Environmental Justice Policy] (emphasis added), https://documents.coastal.ca.gov/assets/env-justice/CCC_EJ_Policy_FINAL.pdf.

¹⁸ Environmental Justice Policy at 7 (emphasis added).

In concluding that there can be no substantial issue simply because the minority group disproportionately affected by a discriminatory policy is small, the staff report turns the Commission's Environmental Justice policies—which were intended to protect just such a minority group—on its head.

As previously discussed, the City's parking restrictions directly obstruct coastal access for the unsheltered, a recognized environmental justice community, by preventing both daytime and nighttime access. **The report gives short shrift to the impact of the City's proposal on people of color, and contains no discussion at all regarding the impact on people with disabilities,** another recognized environmental justice community. By requiring daily travel to and from the coastal zone and leaving few if any daytime parking options for people in OSVs, the City's restrictions significantly burden people with limited mobility.

In sum, the City's proposed parking restrictions are directly contrary to the Commission's Environmental Justice policies—they actively erect barriers to access for lower income people, people of color, and people with disabilities.

III. The Public Access and Environmental Justice Concerns Amount to Substantial Issues.

In 2016, the City passed a similar OSV ordinance and approved a coastal permit, but the Commission found the ordinance and permit unlawfully restricted access to the coast and posed a substantial issue, notwithstanding a staff report recommending otherwise.¹⁹ **The City's permit and ordinance today is just as discriminatory and unjustified as it was in 2016.** If anything, the need for parking for coastal access has increased. The unsheltered population in Santa Cruz has only grown over the past 6 years, meaning that the Ordinance and Permit will have an even greater effect on coastal access than the comparable restrictions in 2016.²⁰ Since 2016, the Coastal Commission expressly adopted a policy of considering environmental justice principles in its determinations, granting it an additional reason to find a substantial issue that was not present when it rejected the City's proposed restrictions the first time.²¹

¹⁹ Cal. Coastal Comm'n, Draft Minutes of Meeting of August 10-12, 2016 at 4 (June 29, 2017), <https://documents.coastal.ca.gov/reports/2017/7/w19/w19a-7-2017.pdf> (recording a vote of "substantial issue[] found" for the Appeal No. A-3-STC-16-0064, the Santa Cruz 2016 parking ordinance).

²⁰ Applied Survey Research, *2019 Santa Cruz County Homeless Point-In-Time Survey*, SANTA CRUZ CNTY. 8 (2019), <https://housingmatterssc.org/wp-content/uploads/2019/08/2019-PIT-Count-Full-Report.pdf>.

²¹ Pub. Res. Code § 30604(h).

This “past practice” and the environmental justice principles, alone, demand a finding of substantial issue. CCR Section 13115(c). Moreover, **the Commission has a “presumption of a substantial issue” finding,** per its implementing regulations.²²

In truth, all five factors that the Commission must analyze in determining whether the City’s plan poses a barrier to coastal access weigh clearly in favor of a finding that the Ordinance and Permit create substantial issues.

The degree of factual and legal support for the local government’s decision

First, the staff report already found that the City lacks any factual and legal basis to support the conclusion that its program addresses a coastal resource concern. This conclusion is correct, and should be upheld.

The extent and scope of the development approved by the local government

Here the staff recommendation was clearly mistaken in concluding the scope is only nighttime hours. Factually, the staff recommendation ignored the 100 feet restrictions in place at all hours. See *supra* page 3 for a sample map of restrictions.

The significance of the coastal resources affected by the decision

The coastal resources affected are significant: Public access is of “paramount concern[]” to the Commission,²³ and the Ordinance severely impedes access given both the growing unsheltered population with a need for coastal access and the full-day restrictions.

The precedential value of the local government’s decision for future interpretations of its LCP

The City’s decision here is also precedential. It is pursuing a policy directly contrary to its own stated LCP and Environmental Justice considerations, which will undoubtedly inform the local government’s future LCP interpretations—as well as providing a model of discriminatory and unjustified coastal access restrictions for other public entities to adopt. In 2016, Commissioners indicated the need for a policy as it relates to similar parking restrictions, to guide future cases—the substantial issue determination here is therefore precedential.

²² Staff Report at 10.

²³ Staff Report at 27.

Whether the appeal raises only local issues as opposed to those of regional or statewide significance

Finally, the restrictions are also of statewide concern related to coastal resources: Other California communities will likely follow with similar ordinances if this permit is upheld, obstructing more and more of the coast.²⁴

The staff report supports its recommendation by citing previous appeals where no substantial issue was found, despite a development being inconsistent with the LCP. However, these appeals—A-3-SCO-16-0069 (Verizon), A-3-SCO-17-0037 (Britt SFD), A-2-SON-20-0042 (Chapman), and A-2-SON-22-0015 (Chang)—are all distinguishable from this case.

The Verizon project was designed to mitigate and minimize effects inconsistent with the LCP.²⁵ Here, the City takes no action to mitigate the coastal access impact of its development: Even the staff report acknowledges the City's alternative parking program lacks detail or steps for implementation.²⁶ In both Britt SFD and Chang, the staff determined that the developments were sufficiently consistent with the relevant LCP policies²⁷—here, the restrictions are clearly at odds with the relevant policies requiring the maximization of access and the consideration of environmental justice.²⁸ Finally, in Chapman, the staff found that a new development that deviated slightly from lot requirements posed no substantial issue because it did not differ “in any significant way” from existing, surrounding developments.²⁹ We are, here, dealing with an

²⁴ ACLU, *Outside the Law: The Legal War Against Unhoused People* 12 (2021), <https://www.aclusocal.org/sites/default/files/outsidethelaw-aclufdnsca-report.pdf> (“Throughout California, local governments have attempted to rid their communities of unhoused people by harassing, segregating, banishing and confining them.”).

²⁷ Cal. Coastal Comm’n, Staff Report: Substantial Issue Determination at 2-3 (July 27, 2017), <https://documents.coastal.ca.gov/reports/2017/8/th12a/th12a-8-2017-report.pdf>; Cal. Coastal Comm’n, Staff Report: Substantial Issue Determination at 2-3 (May 20, 2022), <https://documents.coastal.ca.gov/reports/2022/6/F10a/F10a-6-2022-report.pdf>.

²⁸ Staff Report at 20 (“[A]ccess opportunities are not maximized.”).

²⁹ Cal. Coastal Comm’n, Staff Report: Substantial Issue Determination at 12 (Sep. 25, 2020), <https://documents.coastal.ca.gov/reports/2020/10/F13a/F13a-10-2020-report.pdf>.

entirely new set of parking restrictions and proposed developments, not comparable to any existing restrictions in the City.

To our knowledge, **no prior decision of the Commission has ever approved restrictions as sweeping as the ones proposed by Santa Cruz.** This appeal does not concern a single beach or resource, but rather the entirety of Santa Cruz's coast. **Under the staff recommendation, a locality need not substantiate or justify parking restrictions that target unhoused people or other minority groups, because there is a presumption of minimal impact as long as the group affected is small in number. This cannot stand and contradicts the 2016 substantial issue finding, as well as the Commission's newly adopted Environmental Justice policies.**

Because the City's parking restrictions are contrary to Coastal Act Section 30210, LCP Policy 3.5, and the environmental justice concerns, and significantly limit coastal access, they pose substantial issues.

Sincerely,

John Thomas H. Do, Senior Staff Attorney

Subject: Agenda Item 14.a.; July 14; Substantial Issue on OVO; A-3-SCT-22-0018
Date: Friday, July 8, 2022 4:49:13 PM

Dear California Coastal Commissioners,

You are in the unique position to determine whether the Oversized Vehicle Ordinance (OVO) appeal brings forward a substantial issue. The City Council majority who voted to adopt this ordinance are not tasked with the responsibility of upholding the California Coastal Act as you are. Within this context, your decision has farther reaching implications on whether the Coastal Act is being upheld and how its provisions will be enacted. Your decision holds tremendous weight in how we treat minority environmental justice groups and their right to equal and fair coastal access.

Staff provided very useful information in their staff report. I'm structuring this public comment according to the 5 factors they've laid out that are to be assessed for finding a substantial issue:

1. Substantial Issue Assessment Factor #1. From staff: ***"The degree of factual and legal support for the local government's decision that the development is consistent or inconsistent with the certified LCP and the Coastal Act's public access provisions.."***
 - Staff's research in this area concluded the following: *"[S]taff evaluated the City's evidence supporting the need for the CDP and concluded that the record does not include adequate evidence to support the City's case that there is a coastal resource reason for the CDP for the nighttime parking restrictions and related program elements (e.g., clear evidence suggesting that those parking in oversized vehicles at these times are leading to significant coastal resource impacts). In fact, the City's evidence that nighttime oversized vehicle parking leads to public health, safety, and nuisance problems, and associated coastal resource concerns (to which the City-approved project purports to be a solution) appears to actually be fairly limited and is not well fleshed-out in a way that would allow more detailed conclusions to be drawn as it relates to oversized vehicles as compared to non- oversized vehicles, daytime versus nighttime hours, and actual coastal resource impacts. Thus, staff believes that the record does not provide full support for the City's argument that the CDP is needed to address coastal resource impacts."*
 - In my public comment at the city level as well as in my appellant application - I point out with associated codes/resources - that all of the concerns named as being driving forces behind a perceived need for OVO, may be addressed with current laws. No new law is needed to address those issues which means it is a failure of our local government and societal structure that allows the issues to continue that are being associated with oversized vehicle parking.
2. Substantial Issue Assessment Factor #2. From staff: ***"the extent and scope of the development"***
 - The design permit for signage of the ordinance is minimal in extent and scope of development. However, enforcement should be considered. The OVO would create a patrolling, enforcing and criminalization element to the coastal region in Santa Cruz. The existence of the signs and associated enforcement, would send a loud message that some people are allowed to be here all the time, while some are restricted to only certain hours. The signage and enforcement are a physical

presence with far reaching implications.

3. Substantial Issue Assessment Factor #3. From staff: *"the significance of the coastal resources affected by the decision"*

- The City contends that coastal resources would be better protected and more accessible with the OVO. However, as staff has also concluded, the evidence for this is weak. The complaints from community members leading to the OVO are not about the vehicles being there at night and hence the need to restrict their access. All complaints leading to OVO may be handled with existing laws, as delineated in my appellant paperwork.

4. Substantial Issue Assessment Factor #4. From staff: *"the precedential value of the local government's decision for future interpretation of its LCP"*

- Currently, everyone in Santa Cruz has fair and equal access to coastal resources. Adopting and enforcing OVO prejudicially limits coastal access for a subset of the population and on a basis of whether they depend on their oversized vehicles for shelter or as their mode of transportation.

5. Substantial Issue Assessment Factor #5. From staff: *"whether the appeal raises only local issues, or those of regional or statewide significance"*

- It is my understanding that there are similar ordinances in other cities in California. What is different about this one is that it is being officially appealed directly to the only governing body with the responsibility to uphold the California Coastal Act and its equal access right provisions. Perhaps in the other cities in which something similar exists, an environmental justice group would not be prejudicially excluded from that right to coastal access. In Santa Cruz, it is explicitly clear that this is a direct goal of the ordinance - to restrict coastal access for this minority group, and to criminalize them if they continue to access the coastal region at nighttime.
- A city's regulation of parking can take many things into consideration and generally function within its municipal needs. They are not responsible for upholding the CA Coastal Act; however, you are. A decision by the Commission that this type of prejudicial coastal access is not a substantial issue would set a huge and very public precedent.

For finding a substantial issue, staff also says, *"The Commission may, but need not, assign a particular weight to a factor, and may make a substantial issue determination for other reasons as well."* Staff has rightly concluded that the community members who rely on their oversized vehicles are an environmental justice group. However, their dismissal of the implications of preventing coastal access to this group as trivial comes from their classification of it being small. They say *"it would only affect that subset of that very small sample size"*. **That is the definition of a minority.** What the City of Santa Cruz and CCC staff recommendation are asking you to do is to say that prejudicially restricting coastal access for a minority environmental justice group is not a substantial issue and fits fine within the Coastal Act provisions.

I have seen the great care taken by the commission to ensure equitable access for all as well as your acknowledgement that access is becoming harder and harder for many folks struggling to survive in a society with ever-escalating cost of living. The ocean is a touching stone of sanity for a large percentage of the population. And whenever damage is not the result of such access, the access must be maximized. I agree with staff that the city provided little to no evidence that our coastal resources or access are being damaged by the presence of oversized

vehicles. Deductively, that means restricting access for those living in them or who depend on them for transport (some ADA), is strictly prejudicial.

In essence, if this appeal is not upheld, California Coastal Commissioners are publicly ruling that it is ok to restrict the coastal access of a low income minority - an environmental justice group. From my experience following the Commission's work and the great care that is taken to uphold the Coastal Act - from individual appeals all the way to the energy and focus given to periodically amend each area's LCP - I believe you will find substantial issue.

Thank you for your thoughtful consideration on this important matter.

-Lira Filippini

Santa Cruz, CA 95062

p.s. There is a mistake in the staff report about process and appeals at the city level. The appeal held by the Planning Commission resulted in significant changes to the safe parking program element of OVO, including what must be in place before enforcement and criminalization. Those "Conditions of Approval" passed by the Planning Commission were actually appealed by a City Council member. The City Council voted to reject the Planning Commission's changes and that is when we appealed to the CCC. City staff, City Council and the Planning Commissioners were not all on the same page about the structure of OVO.

Subject: Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)
Date: Wednesday, July 6, 2022 10:20:28 AM

Dear Coastal Commissioners,

I am writing to you today to say that I support the appeals of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California.

This ordinance allows for zero exemptions or variances as it is written. Homeowners and renters all over this city who own larger vehicles, including myself and my husband, who don't have access to off street/driveway parking will now be penalized/cited for reasons they have zero options to change. We don't have a driveway. We own a sprinter van, and it is my husband's daily driver. Its dimensions exceed the new (wildly arbitrary) guidelines for what is now allowed. We purchased our home in the heart of Santa Cruz in 2021 after living here as renters for 8 years. No one has answers for us. This is wrong.

This ordinance is incredibly harmful to our unhoused neighbors, makes it impossible for homeowners in the Coastal Zone to own an RV or cargo van, restricts public access and recreational access to the coast for low-income residents, violates the spirit of the City's Housing Element and Sensitive Coastal Resource Areas, and allows a backdoor to development in the Coastal Zone with no accountability.

Please find that the Oversized Vehicle Ordinance has a substantial issue.

Thank you,

Marisol Goulett

Homeless United for Friendship & Freedom (HUFF)
309 Cedar PMB #14B
Santa Cruz, CA 95060

Subject: Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)

Dear Commissioners,

I'm writing on behalf of *HUFF (Homeless United for Friendship and Freedom)*, an organization of housed and homeless folks in Santa Cruz concerned about the impact of the City's Oversized Vehicle Ordinance on coastal access particularly for the poor and homeless population. It also impacts anyone of whatever class who attempts to access the Coast between midnight and 5 AM, whether traveler or resident.

I addressed the City Council on this issue when it was formally raised last year and spoke as well as at subsequent local Appeals hearings--at the Zoning Examiner, the Public Works Commission, and the final City Council meeting this spring when it was approved in modified form.

I also appealed a prior Santa Cruz nighttime-RV ban City Ordinance to the Coastal Commission in 2016. At that time, the Commission was persuaded 11-1 to find that a substantial issue was involved and essentially reject its own staff's recommendation. To my understanding, this was based on the fact that the City--its claims notwithstanding--had no parking facilities for those in vans of all economic stripes who wanted coastal access in the early morning hours. Also there seemed to be a City presumption of criminality on the part of whose only home was their vehicle, suggesting that a complete late night ban would address this problem. The Commission suggested that more real evidence was required both on the issue of homeless criminality and adequate storage. Until now, the City has not returned to appear before a de novo hearing.

The staff report suggests five considerations for finding whether an appeal raises a significant issue. Public access here is key. The main argument of the report seems to be that there are too few vehicles involved for public access to be a meaningful issue. However, City and Commission staff present no evidence of the numbers of vehicles or the number of unhoused, travelers, and residents affected. Since a main concern of the Coastal Commission

is coastal access, total denial of access during five hours requires some evidence. Ironically, the City's claims of a "crime" problem based on citizen calls for service--indicates there are significant numbers of folks using the coastal zone during that period of time. Of course, "calls for service" without evidence of citation, much less conviction, does not equate with crime, but does show numbers of people affected.

Many folks are not comfortable with the homeless minority being visibly present in their neighborhood--something African-American minorities have had to contend with for decades. In response Santa Cruz has adopted a broader unstated anti-homeless policy of eliminating visible poverty from public areas without respecting the rights of the entire community to have access to those areas. Limiting public access unnecessarily and in such a sweeping fashion in Coastal Zone is not justified by the staff report nor by the facts.

Regarding the storage issue which the Commission in its August 2016 hearing also found significant: The Safe Parking program proposed by the City is essentially a handful of spaces for scores of vehicles--a homeless population that has escalated because of COVID, spiraling rents, wildfires, job flight, and other factors.

We agree with the staff's finding that the factual and legal support for the OVO is inconsistent with the Coastal Act's public access provisions. However accessibility to coastal resources is clearly impacted and significantly so--particularly for those whose housing is their vehicle. At the August 2016 hearing, Commissioners asked staff to establish city and regional standards on an issue that was reappearing (exclusion of the homeless under pretext of "oversized vehicles")--so precedential value of the Commission's action on the OVO will have state-wide impacts for other coastal towns and for the rights of the homeless minorities there.

On the storage issue, it is already true that the City's Safe Parking programs have high barriers, have not been established, and seem to be a pretext to persuade the Coastal Commission without actually making resources realistically available. More than that, it seems farfetched to claim that travelers arriving in Santa Cruz will be able to find, apply, and be accepted in programs ("Safe Parking") or face hundreds of dollars in parking citations and possible tows.

The 2022 OVO law discriminates against those who do not own or rent property in Santa Cruz by denying them access to the permit process.. The law was done without determination on its impact on those living in their vehicles and threatens their health and safety in a time of public health uncertainty.

We feel this law needs to be more closely examined anew by the Coastal Commission with more public input from individuals seriously affected (poor people who live in their vans, homeless service providers, rv associations) and to more closely consider its consistency with

the City's LCP.

We support the concerns as articulated in the ACLU/Disability Rights and Santa Cruz Cares appeals which go into greater detail on a number of these issues.

Subject: Oversize Vehicle Ordinance in Santa Cruz California

To: California Coastal Commission Members:

The Association of Faith Communities (AFC) is a faith based non-profit with the mission to relieve suffering through interfaith action. Our 10-year ministry is focused on walking with our unhoused neighbors as they shelter in our rotating shelter and the first and only safe parking program in Santa Cruz County. SafeSpaces serves nearly 50 individuals nightly and in its three years of operation has rarely had an opening.

Over the years, these programs have been occasionally funded by state and federal funds administered by local governments. As a result, we know both City of Santa Cruz staff and Council members, as we have consulted with them to develop a solid, safe parking program. We are the only bidder in partnership with the Santa Cruz Free Guide to operate the third tier of the City's parking program in response to the City RFQ posting some months ago. We have enjoyed working with the City and trust that the City's staff and those we know on the Council are committed to finding the most workable solution to the political and resource problems surrounding the Oversized Vehicle Ordinance (OVO).

We take no position on the ordinance except to share and support the Coastal Commission's insistence that alternative safe parking must be found prior to implement.

The AFC does not know the criteria that the City used to assure the Commission that their safe parking program, in number and services offered, will meet the current and future needs of those the OVO will most certainly displace. We urge the Commission to take an oversight role to also prevent the ordinance from merely creating an exodus to unincorporated area of Santa Cruz County where this vulnerable population would continue to live on the edge.

Vagueness in either area could allow the City, as staff and council turnover, to walk back any commitment they made to support those displaced while simultaneously continuing costly enforcement and criminalization thus, subjecting this population to more misery, more debt and more insecurity. We would ask that the Commission examine the City's criteria closely to ensure their safe parking program is based on the real demand, and monitor their performance to hold them accountable not just at the enactment of the OVO but for the years it will take to find permanent housing for our vulnerable neighbors.

Sincerely,

s/Judith Hutchison
AFC Board Chair

Subject: Deny the appeals to the OVO, A-3-STC-22-0018-2
Date: Tuesday, July 5, 2022 6:33:24 PM

Dear Coastal Commission Members:

I write to ask that you deny the appeals to the OVO, A-3-STC-22-0018-2. I am the former chair of the Santa Cruz County chapter of the ACLU, and a former director of programs in Constitutional Law at Stanford and Yale Universities. I also am a home owner living in a modest house, on a modest but increasingly busy street on the westside of the City of Santa Cruz. I ask that you take heed of the significant deleterious impacts that oversized vehicles have on residential streets such as mine.

Campers and other oversized vehicles are specialized vehicles that present special, often undesirable, uses that significantly affect the health and safety of residential neighborhoods. These impacts include the following:

1) Oversized vehicles impede visibility on narrow two-way streets, reducing lane-size, and causing passing vehicles to have to cross the center lane divider in order to obtain adequate clearance. They also create harrowing situations between drivers who suddenly find a significant part of the lane in which they are traveling obstructed and bicycle riders. In addition, they obstruct drivers from “seeing ahead” cyclists, and homeowners exiting their own driveways. They also make it also impossible for homeowners to exit their own driveways safely.

2) Public streets and residential neighborhoods are turned into campgrounds when oversized vehicles are unregulated and permitted to park, often for multiple days, in places not intended for such activity. When such vehicles have parked in front of or near my house, I have often had to clean up all manner of discarded, and often disgusting, trash and garbage left in the gutter and on the adjacent lawn strip. Sometimes the garbage is thrown into my hedge, or even farther up my driveway or into my front yard. These items include common trash, but also dirty diapers, food waste, used sanitary napkins, glass bottles (some of them full of human urine, and used hypodermic needles. I have on occasion found “campers” on my property using my water spigots, and “discretely” using my shrubbery to screen bodily functions not properly inflicted on others.

Of course I feel compassion for the people who must live in their vehicles. No doubt, there should be designated places where camping in a vehicle can be done with relative safety and proper facilities for waste disposal. But just letting people camp in and around their vehicles on public street in residential neighborhoods is dangerous, reprehensible, and constitutes a dereliction of duty on the part of public entities that allow such things. Surely, less perilous and more humane solutions are possible.

Thank you for your consideration.

Subject: Deny the appeals to the OVO, A-3-STC-22-0018-2
Date: Tuesday, July 5, 2022 2:58:05 PM

Dear Coastal Commission,

I am a resident of Santa Cruz who is both heartily opposed to NIMBYism and strongly supportive of effectively addressing California's and our county's homelessness crisis and growing economic disparities. However, I am writing to convey that parking of large numbers of recreational and other vehicles serving as homes in Santa Cruz is occurring in ways that impact basic safety and access to community parks, sidewalks and in some cases streets. It does not need to be banned, but it does need to be regulated and subject to city oversight - that is a reasonable expectation for a community, as all of us - housed and unhoused - strive to life safely and in a way that works for everyone. I no longer feel comfortable letting my kids bike to school on their own because the route takes them through multiple blocks of long-term RV parking with trash, unleashed dogs, and at times people behaving erratically on the sidewalk and in the street. Similarly, I now drive rather than bike if I am going to leave work after dark because of increasingly frequent thefts, robberies, assaults and harassment along my route and at my workplace parking lot (Coastal UCSC Campus). My route there and back includes several blocks of permanent, vehicle-based living.

Parks in Santa Cruz are to varying degrees increasingly unusable to residents, and RVs parked along parks contribute to this through unsustainable/inappropriate use of bathrooms and picnic facilities, cooking on open fires, burning trash, residents passed out or asleep on playing fields and benches, and so on. The severity of impacts ranges - for example, Riverfront Park downtown is completely unusable; bathrooms at parks such as Garfield are only marginally usable at certain times due to trash dumping, drug use and unsanitary use; and the greenbelt park between Woodrow and Almar Avenues is usable in daytime but increasingly a site for late-night dumping, urinating and noise.

While I am not affected by declines in the availability of parking, I know this is also affecting others in our community, and this is especially so as recreational RV- and van-dwellers flock to our community in addition to those who are living in their vehicles out of economic or social necessity.

I know that a common rejoinder to this line of reasoning is that not everyone parking an RV contributes in any way to these safety issues, and of course that is true. But it also true that everyone or nearly everyone contributing to these safety issues in these areas and along these routes is living in their vehicle or visiting someone who is. Allowing the city to maintain some oversight and authority (we are not talking about a ban) is central to maintaining peace, safety and environmental quality - not just for the housed in our community but also, and more importantly so, for the unhoused who deserve clean, safe settings with city oversight and services to live in.

We need to solve the inequitable economic state of affairs in California, particularly along the coast. However, the appeals to the OVO, A-3-STC-22-0018-2 are not a way to do it while also maintaining reasonable city oversight of its population, who all - housed and unhoused - are subject to community-based rules that enable the community and all of us to function and thrive. Please deny these appeals and encourage appropriately scaled, durable, non-zero-sum

solutions to housing inequities on our coast.

Sincerely,
Erika

Subject: PLEASE support sensible RV parking permit laws

Hi

I am a long time citizen of Santa Cruz and am very concerned with the overflow of RVs and unsafe vehicles on the west side of my community. It threatens our coastal wildlife, our children and our safety. Please support sensible parking permits to reduce the destruction of our community.

Thank you

From: [Westside Neighbors](#)
To: Ford_Kiana@Coastal
Subject: Fwd: We support "no substantial issue", A-3-STC-22-0018-2
Date: Monday, July 4, 2022 8:25:19 AM
Attachments: [camping app5.PNG](#)
[petition_signatures_overnight RV parking\(1\).pdf](#)
[Planning Commission letter OVO appeal\(1\).docx](#)
[Staff summary sheet 91621 OVO.pdf](#)

Dear Coastal Commission Members:

Thank you for allowing our group to comment on the appeals of the City of Santa Cruz coastal permit to prohibit parking of oversized vehicles citywide on public streets between midnight and 5 a.m. (OVO).

Westside Neighbors is a large neighborhood group organized in 2019 in response to a proposal to allow overnight RV parking in our neighborhood. We have attached the comprehensive email that we sent to the City of Santa Cruz's Planning Commission at its March meeting where the appellants filed their original appeal for further information about our organization and detail about the issues necessitating the city's Oversized Vehicle Ordinance. We also attach the petition created by one of our members which gathered 1,054 signatures requesting that the city implement and enforce a "no overnight RV parking" ordinance.

We support the Coastal Commission's staff finding of "no substantial issue" and request that the commissioners vote to uphold the staff recommendation and permit the OVO to proceed with the establishment of a permit parking program and a safe spaces parking program.

We support the Coastal Commission's staff report, and stress the following key points:

- Protect coastal recreation areas, maintain all existing coastal access points open to the public, and enhance public access, **open space quality and recreational enjoyment** in a manner that is consistent with the California Coastal Act. The Coastal Act and the LCP require the Commission to analyze the impacts holistically and **not to focus only on maximizing public recreational access opportunities in a vacuum.**
- At the same time, the Coastal Act and the LCP also require that such access not be maximized at all costs, and explicitly require that the public access policies be implemented in a way that takes into account the "time, place, and manner of public access depending on the facts and circumstances in each case", including evaluating the capacity of the area in question to sustain use and at what level of intensity, the potential need for "limiting public access to the right to pass and repass depending on such factors as the fragility of the natural resources in the area and the **proximity of the access area to adjacent residential uses. Five of the most impacted streets are Swanton, Delaware, Shaffer, Natural Bridges and Mission, four of which are in residential neighborhoods.** (See City of Santa Cruz staff report dated 9/21/21, below).

- Similarly, the direction in LUP Policy 1.7 to maximize public access and enjoyment of recreational areas is tempered by the **need for such maximizing to be consistent with “sound resource conservation principle[s], safety, and rights of private property owners”**.
- “Environmental justice” - The **deterrence, reduction, and elimination of pollution burdens for populations and communities experiencing the adverse effects of that pollution. At a minimum, the meaningful consideration of recommendations from populations and communities most impacted by pollution.**

When considering maximizing access to the coast, we respectfully ask that you consider the needs of neighbors, seniors, children and bicycles and the impacts that unregulated overnight vehicle camping has on coastal access and enjoyment for these groups.

Thank you for listening to our input, and for your service to our coast.

Carol Polhamus, Manuel Prado for steering committee and members of Westside Neighbors

angelnumbers - 3/15/2022

Stayed near this spot on national st, fairly quiet, no signs posted.

ohcanadan on Instagram - 1/14/2022

I spent the night here last night. Street night was minimal after 11pm and in the morning sounds of sea lions barking and waves crashing. Great way to wake up! :)

The views from the nearby walkway along the ocean are amazing!

megan.mensch - 10/11/2021

PACKED! we got here around 5 but pulled down to the beach parking for dinner & sunset, we headed back to Columbia around 8 and there were 2 other camper vans there, but 12 the entire street, bumper to bumper, was packed with rigs, it was a quiet night and no one left any trash behind, a good spot but a little too busy to be "stealth"

jbenson2008 - 9/3/2021

Decent spot to park, no signs on the street restricting hours. The municipal code makes car camping illegal but there are a ton of camping vans all over this neighborhood so I don't think it's enforced.

hhawkins - 12/28/2019

Residential street next to apartment complex, block away from ocean. We slept in our car for one night without issues. No street signs prohibiting overnight parking. Right next to apartment complex so probably best to be discrete. At 6 am we drove down a block to one of many parking spots right by the ocean that allows parking after 5 am. Also public restrooms at the beach but not very clean.

luke.sederholm - 2/25/2022

quiet residential neighborhood with street parking. Was not bothered

Prairie - 2/25/2022

Pulled in here for a place to park our shortie bus for a few hours (not to stay overnight) and walk down to the beach and shops. A couple walking by glared at us as we got out of the bus and we're shaking their heads. When we came back and were getting ready to head out an old Karen pulled up beside up to yell "you can't stay here - get going!" Wanted to stay here after that just to spite her lol, but wasn't in our plan. Just a heads up that this is a super residential spot with some very unfriendly folks.

consultandosaita - 9/8/2021

Residential area chill spot great to park around 9 pm and leave early. For van suv or RV.

chalu.kim - 8/21/2021

it is quiet and good sleep. nothing special. after long surfing day, quiet and good sleep is what I need. perfect

andreandronnie - 10/16/2020

Dear Planning Commission:

March 2, 2022

Please include and consider the comments below in your deliberation regarding the appeal of the Oversized Vehicle Ordinance (OVO) filed by the activist groups, Santa Cruz Cares and the local ACLU chapter.

Westside Neighbors is a large neighborhood organization established in 2019 in response to one city councilman's proposal to allow overnight RV parking on Delaware Avenue. As you are aware, the lower Westside, in particular, has been significantly negatively impacted by issues related to people living in their vehicles/RVs on city streets, particularly on Swanton, Delaware, Fair, Shaffer, Mission Extension, Mission/Grandview, Ingalls, Swift, McPherson and Garfield Park, as well as the side streets adjacent to West Cliff Drive. Our local neighborhoods have been regularly subjected to the consequences of illegal dumping, greywater/blackwater discharge, fires, garbage, environmental degradation, criminal behavior including drug dealing, theft, weapons, and domestic violence, documented by SCPD/SCFD calls for service. For a more detailed background and review of these neighborhood concerns and attempted mitigations, including calls for service and vehicle abatement data, please read the city's Staff Report on the City Council agenda dated 9/21/21. Concerns about overnight vehicle/RV parking on city streets are long-standing, documented in city records as far back as 2013, when the Public Safety Committee recommended that an ordinance be brought forward to address these significant impacts, which, although passed by the City Council, was suspended following a homeless activist lawsuit to the Coastal Commission in 2016. Following multiple requests to Council and the Santa Cruz Police Department, this issue was addressed by City Council in 2021 and an ordinance brought forward, the Oversized Vehicle Ordinance.

There are two distinct components to this issue that require differentiation. There are those who camp overnight in vehicles/RVs by choice, visiting for a limited period of time (VanLife, Boondockers, etc.), people on vacation who are attracted to the lower Westside due to the mention on their apps about the minimal enforcement of "no overnight parking" signs on the lower Westside. And then there are those who camp overnight in vehicles/RVs out of necessity, using their vehicles for shelter. These two groups both negatively impact the neighborhoods, but need to be addressed in very different ways.

We believe the first group (those on vacation or adventuring) are the easier of the two groups to address. People on vacation, and those who can afford a \$100,000 sprinter van or a \$150,000 RV can easily afford to go to one of the dozen commercial/state RV parks and campgrounds in the county, and need to do so. Those people visiting to see friends/family locally can alternately apply for a permit to park in front of their friend's/family's house for a limited time period. First problem solved (with enforcement). The OVO as written outlines this and also provides for a permitting process.

The second group, those living in vehicles/RVs out of necessity and using them for shelter, present a much more challenging situation, one that the city is currently attempting to address. People living in vehicles/RVs long term need sanitation services for dumping grey/black water tanks, garbage, clean water, etc., and also require social services to assist them in improving their living situations. Allowing unsanctioned overnight parking on city streets without services

makes it much more difficult to consolidate service providers and sanitation services to assist those who need them. City streets and neighborhoods are not appropriate places for people to live in their RVs/vehicles. We believe the OVO exerts significant pressure on the city/county to locate safe places for overnight parking on city/county property with services for people who need them, and we support the city's current efforts to do so. The complete staff package of the OVO included safe night time parking areas in an attempt to stabilize people's living situations and connect them to services. The homeless activists actually obstruct progress toward getting people services by paralyzing the city/county under threat of lawsuit into maintaining the status quo, much as has been seen at the Benchlands. Maintaining the status quo helps no one, not the neighborhoods and not the homeless. Granting this appeal would effectively halt the progress the city has made and continues to make in identifying sanctioned places for people to live in their vehicles safely with services, and would serve only to undermine the progress made to date.

We would like to address a few specific points noted in the appeals:

- The city **has** adequately engaged with the public for many years on this issue. One has only to review the more than 1,000 e-mails in support of an RV ordinance received during the City Council meetings about this issue, or take note of the 1,050 signatures on the June, 2020 petition requesting the city to address overnight RV camping in neighborhoods, to see that there has been much public engagement on this subject. We refer you to the 9/21 Staff Report for further information, and to the public correspondence e-mails received on 9/16/21, 10/14/21, and 11/2/21 to document the many hundreds of requests to create/enforce no overnight RV parking in city neighborhoods. The city has also created commissions to study and address this issue (Public Safety Committee, CACH), both arriving at similar conclusions (regulation is necessary; sanctioned safe spaces need to be established with services provided). Enough public input and comment has been received and included to feel confident that the OVO is the direction most people in the city want to see put into practice to address this issue and address related needs.
- We believe that the city **can** defend itself against the constraints of *Martin v Boise* based on the fact that it is providing places for people to go, and that with the addition of more safe spaces parking this will be recognized at the Coastal Commission level as well.
- The person identified by name in the ACLU appeal is well known to the lower Westside, as she has lived in her 29 foot FMC motorhome (with her accompanying VW beetle) for over five years, primarily parking overnight at Garfield Park but also on David Way, Woodrow, and Bethany Curve, as stated "deliberately parking within a half-mile from the ocean". Contrary to the benign statements made by the ACLU, this vehicle has been the subject of numerous complaints to Westside Neighbors and Vehicle Abatement. Contrary to ACLU statements that the OVO would result in blocking her access to the coast, she could simply park her motorhome in a safe spaces lot and drive her VW to the beach every day. (See photo below taken today at W Cliff/Woodrow of the FMC with VW). With oversized vehicles such as this one parking 24/7 for three days or longer at a time, these vehicles are actually blocking coastal access for the general public. There are a number of similar long-term RV residents such as this one parked in the lower Westside neighborhood streets that we could highlight, the reason that regulation is necessary.
- We do not believe the OVO conflicts with the General Plan, one of the basic tenets of which is to "Protect natural resources and the public health and safety". The natural

environment you are sworn to protect and the quality of life for Westside residents have both been significantly compromised by unsanctioned RV/vehicle camping, and we encourage you to make your decision in alignment with this principle of the General Plan. Enforcement is required to ensure that those living in their vehicles move to a sanctioned place where they can receive services and support, at the same time mitigating the negative impacts on the environment and city neighborhoods that unsanctioned camping creates.

In conclusion, Westside Neighbors requests that the Planning Commission reject the appeal of the OVO for the following reasons:

- 1) The lower Westside neighborhoods have suffered from significant negative impacts of unregulated RV/vehicle camping, well documented by city staff, and regulations have been attempted to be put in place since 2013. These neighborhoods have been waiting eight years for regulations to be implemented including enforcement and mitigation strategies to be put in place to address this situation.
- 2) Recreational camping on city streets must be prohibited, except for what is outlined in the OVO permit program. Neighborhood streets should not be used as unregulated RV campgrounds. Those with means must use commercial/state RV campgrounds.
- 3) We support an expanded safe sleeping program as outlined in the OVO and currently being developed by the city/county. People living in vehicles/RVs out of necessity need to have safe places to park, with sanitation services and social services to assist them improve their living situations. These safe parking spaces need to be on city/county property and not in residential neighborhoods. Supporting the OVO will apply pressure to support the city's efforts in identifying and establishing additional safe spaces for those who need them.

Good government creates and enforces effective policies to manage identified problems. We are counting on the Planning Commission to uphold the ordinance that the City Council has passed to address this long-standing problem. It's long past time to move forward from continuous stalemate to actually beginning to take steps to solve this problem. Please reject this appeal and uphold the OVO.

Thank you for listening and considering our viewpoint in your deliberations.

Manuel Prado Carol Polhamus
for the steering committee and members of Westside Neighbors.

City Council Special Meeting AGENDA REPORT

DATE: 09/16/2021

AGENDA OF: 09/21/2021

DEPARTMENT: City Council

SUBJECT: An Ordinance Amending Title 10 “Vehicles and Traffic” at Chapter 10.04 “Definitions” and Chapter 10.40 “Stopping, Standing and Parking” and Chapter 10.41 “City-Wide Parking Permit” Pertaining to the Parking of Oversized Vehicles and Chapter 16.19 “Storm Water and Urban Runoff Pollution Control” at Section 16.19.070 “Discharge of Sewage Prohibited” (CN/CM/PD/CA)

RECOMMENDATION: Motion to:

1. Introduce for publication an ordinance amending Title 10 “Vehicles and Traffic” at Chapter 10.04 “Definitions” and Chapter 10.40 “Stopping, Standing and Parking” and Chapter 10.41 “City-Wide Parking Permit” Pertaining to the Parking of Oversized Vehicles and Chapter 16.19 “Storm Water and Urban Runoff Pollution Control” at Section Section 16.19.070 “Discharge of Sewage Prohibited.”
 2. Direct staff, in cooperation with an ad hoc subcommittee to be appointed by the Mayor to develop, and return for Council consideration, policy direction on expansion of city operated or sponsored safe parking permit programs for unhoused City residents living in licensed and registered oversized vehicles in the City of Santa Cruz, to be implemented prior to enforcement of overnight parking component of the proposed ordinance.
-

BACKGROUND: The City of Santa Cruz is experiencing an increasing number of oversized vehicles parking for long periods of time on city streets, impacting public safety, health, and the environment for those who are housed and unhoused. The City must balance the preservation of health and safety with helping our most vulnerable.

Local Context. The increase in the number of oversized vehicles parking in the City of Santa Cruz, and the subsequent impacts, may be quantified in multiple ways. In July 2021, local residents conducted a two-week oversized vehicle count of the most heavily impacted streets on the lower Westside (Delaware, Shaffer, Natural Bridges, McPherson, Ingalls, Fair, Mission St., and Garfield Park), as well as some other areas of the city (Harvey West etc.). An average of 65 oversized vehicles were found to be parked on city streets in those areas. This number can and does ebb and flow based on a variety of factors.

Community residents contact the city regularly with requests to address the presence of and/or impacts from extended oversized vehicle parking. These requests come via Santa Cruz Police

Dispatch, Public Works Parking Division, and through emails, phone calls, and verbal communications directly to staff and council.

The types of issues raised through these calls for service include: the illegal dumping of trash, debris, and human waste onto City streets, sidewalks, and waterways; fires associated with oversized vehicles; lack of access to neighborhood and coastal parking; and increased criminal activities in areas where oversized vehicles are parked, including theft of bicycles and other property, private water connections being used, and gasoline thefts.

Local data demonstrates the extent of the challenges. To date in 2021, there have been at least 15 emergency calls for service to 911 that have been related to oversized vehicles, with seven of those calls related to fire and/or gas leakage. In calendar year 2020 and to date in 2021, the Santa Cruz Fire Department reported 38 fire incidents that are vehicle related, three that were specifically related to oversized vehicles. Also to date in 2021, there were 12 oversized vehicle related service calls and 14 public right of way calls to the Wastewater Collection Division. Additionally, police vehicle abatement activities have continued over the years. According to the Vehicle Abatement Officer, in the calendar year 2020, 2,243 abatement notices were issued, 197 vehicles were towed, including 20 which were oversized vehicles or camper vans. Since January of this year, the Police Department has received 2,456 calls with a recreational vehicle/motorhome or abandoned vehicle associated with the call. In regard to the vehicle abatement program, the Police Department tagged 294 recreational vehicle/motorhome and towed about 12 of them. More oversized vehicles could be towed by police and Public Works parking enforcement personnel. The challenge is adequate storage space. Tow companies are incapable of storing oversized vehicles on their property. The City created its own tow yard at the landfill. The landfill space is maxed out and logistically cumbersome for staff at the landfill.

Attachment 3 provides additional vehicle abatement information including recent heat map data and graphs of frequency and locations of vehicle abatement activities. As the graph demonstrates, various parts of the city are disproportionately impacted. The five streets with the most vehicle abatement activity (Delaware, Natural Bridges, Shaffer, Mission, and Almar) were all on the West Side, and approximately one third of the abatements citywide are focused on the far West Side. The Vehicle Abatement Officer counted 15 out of state license plates on oversized vehicles that he was able to assess in one morning in certain areas of the West Side. A pilot parking study was conducted using the city's Smart City Sensor located at the Cowell overview parking lot, and showed that fewer than 6% of vehicles were blocking access for almost 30% of all parking spaces (see Attachment 4), with some of those vehicles being oversized vehicles. The City Manager's Office has spent approximately \$10,000 so far this calendar year in refuse services solely on the far Westside to mitigate the illegal dumping from oversized vehicle/car dwellers. This does not include staff time from the City Manager's office or Public Works in coordinating these efforts.

One of the issues that is most often raised with regard to extended oversized vehicle parking is the discharge of raw sewage onto City streets and into storm drains. Runoff from the City's storm drain system is periodically tested as part of regional testing efforts, but not at a scale that would be able to quantify the environmental impacts under discussion. Any verified discharge of human waste into the storm sewer system is considered a violation of the City's Municipal Code (Section 16.19.090); if left unaddressed, the City is at risk of violating its National Pollutant Discharge Elimination System (NPDES) Municipal Regional Permit, which could lead to enforcement actions by the Regional Water Quality Control Board.

The challenges described above have been on-going. In 2013, the Public Safety Citizens Task Force came together to address the negative impacts (as described above) experienced by oversized vehicles on city streets. In late 2013, the Task Force recommended that the City review and implement strict parking ordinances related to oversized vehicles parking on City streets and called for additional enforcement of existing parking restrictions (see Attachment 5). On November 24, 2015 City Council approved the first reading and on December 8, 2015, it finally adopted Ordinance No. 2015-17 adding Section 10.04.085, 10.04.104, 10.04.106, 10.04.165, 10.40.120 and amending Section 10.41.060 of the Municipal Code Relating to the Parking of Oversized Vehicles. After consultation with Coastal Commission staff, City staff processed a Coastal Development Permit (CDP) for implementation of the Ordinance in the Coastal Zone. On June 1, 2016 the City of Santa Cruz Zoning Administrator approved a CDP to prohibit overnight oversized vehicle parking on City streets within the coastal zone from midnight to 5 a.m., which was appealed to the Coastal Commission. On August 10, 2016, the Coastal Commission found “substantial issue” with respect to the Ordinance’s consistency with Coastal Act policies. The appeal is currently pending. Since the 2016 Coastal Commission decision, other cities in the coastal zone have passed similar ordinances.

Outreach, Council Direction and Efforts Underway.

This report responds to city council direction at the June 22, 2021 hearing to: Direct staff to begin evaluating the City’s existing RV ordinance (2015-2017) for amendments to align with the existing Camping Services and Standards ordinance including programming such as designated safe parking programs, in partnership with faith community/community partners; as well as time, place, and manner of use of RVs for daytime and nighttime camping, and return to Council to provide input on community engagement approach, with an update in October on ordinance amendment approach, and with an update on California Coastal Commission process for approvals in the coastal zone.

The community input regarding the challenges and impacts of oversized vehicle parking have been substantial since the 2016 Coastal Commission appeal. In February 2019, after a previous Councilmember's proposal to permit overnight oversized vehicle camping on Delaware Avenue on the lower Westside, over 400 letters in opposition were sent to the City Council. Community input concerns cited included environmental impacts, neighborhood safety, increased crime, garbage, human excrement, fire danger, drug dealing, and other illegal and nuisance behaviors. One recent example in which the community provided input regarding impacts from illegally parked oversized vehicles was on Olive Street, a one-block residential street off Mission Street. Many community members contacted council to request that oversized vehicle’s not be permitted to park in this area due to public health and safety impacts and ultimately their request was honored by council. A petition with over 1000 signatures, urging city staff and council to address the public health and safety impacts of oversized vehicle parking was created on Change.org and sent to city staff and council.

Information was gathered on approximately 30 coastal communities throughout California, in order to explore existing practices and to explore options the City of Santa Cruz may have in addressing the ongoing oversized vehicle parking challenges in our City. Commonalities in impacts of oversized vehicles in like communities were reviewed. The city modelled the proposed permit parking provisions of the proposed ordinance after Santa Monica’s ordinance.

The city currently has approximately 15 known safe parking spaces managed by the Association of Faith Communities (AFC), including approximately 13 on religious assembly sites and two on

city-owned property. AFC also has an additional 21 spaces outside the city limits. The city also allows businesses to host safe parking spaces; however, since no permits are required to allow such parking, it is unknown how many such spaces are being provided by businesses. This is a significant increase and improvement to what was present and available in the city when this ordinance was first introduced to the City Council in 2015.

Neighborhood allies have already begun working with county representatives and faith based groups to identify additional spaces, including spaces outside the city and in unincorporated areas of the county. Council members are also working with County Board members, non-profit organizations, neighborhood groups and faith-based groups to identify potential expanded safe parking spaces and partnerships on the development of a comprehensive program and policies to address the required services for people who are residing in oversized vehicles.

DISCUSSION: The purpose of this ordinance amendment and policy direction is to:

1. Provide parameters on time, place, and manner of parking of oversized vehicles on city streets in order to address environmental and public health impacts.
2. Form an ad hoc committee consisting of the three councilmembers and City Manager's Office staff to develop policy direction on expansion of city operated or sponsored safe parking programs. Implementation of the overnight parking prohibition component, pursuant to Section 5 of the proposed ordinance, would be deferred pending Council approval of such expanded programs.

The ordinance amendments build on existing Santa Cruz Municipal Code that address Oversized Vehicles' environmental and public health impacts while providing policy direction to expand safe parking programming.

A summary of the amendments are provided below.

Overnight Parking Permit. The following provisions would apply to Overnight Parking Permits:

- Available to a "resident" or "out-of-town visitor," as defined in Section 10.04.165 and 10.04.104, respectively.
 - Residents
 - Valid for one year, allowing parking of an oversized vehicle for four periods of up to 72 consecutive hours per calendar month.
 - Parking location: Street curb immediately adjacent to the residence, or within four hundred feet of that person's residence if adjacent parking is not possible.
 - Out-of-town visitors
 - Valid for a maximum of 72 hours in the location identified above for residents, or
 - Valid for a maximum of 30 days in specific, non-residential parking areas designated by the city.
- Fee
 - A future Council resolution would establish the permit fee(s).

- Denial of Permits
 - The city may deny the issuance of an oversized vehicle overnight parking permit for up to one year if the city manager or his/her designee finds that: the applicant is not a resident; the resident or out-of-town visitor guests have been issued four or more citations for violations in the same calendar year; the out-of town visitor is not a guest of the resident applicant; or an owner of an oversized vehicle has procured any oversized vehicle parking permit through fraud or misrepresentation.

City Operated or Sponsored Safe Parking Programs.

- In addition to the private property allowances authorized through Chapter 6.36.030, the City may operate, sponsor, or authorize safe parking programs for oversized vehicles on any City owned or leased properties in non-residential areas of the City. The City Manager shall develop a policy that establishes operational criteria for safe parking programs and shall submit that policy to the Council for review and approval.

At the time of the proposed amendments of this ordinance, a scan conducted on the most highly impacted areas, showed an average of 65 unpermitted oversized vehicles. We acknowledge that the parameters set forth and permitting requirements in this ordinance may be challenging for some community members with oversized vehicles. Therefore, as part of its consideration of the proposed ordinance, it is proposed that an ad hoc committee be formed to develop policy direction recommendations on expansion of city operated or sponsored safe parking programs. The recommendations will evaluate sanitation resources, requisite permits for participation (if any), costs for permits (if any), length of allowable stay, and oversight or supervision of the locations/program. The ad hoc committee will also explore low barrier programs, including but not limited to how low/no cost permits or parking, expired registration, and/or other factors can be accommodated for limited duration. The committee will continue to work with partners including the faith community, nonprofits and the County, so that safe parking sites will be dispersed throughout the County, including in the unincorporated areas of the County. Safe parking sites will link to existing community services that will lead to a pathway to housing.

The Santa Cruz Community Advisory Committee on Homelessness (CACH) recommended that the Council adopt “municipal code amendments to increase safe parking capacity at faith-based parking lots” in their August 11, 2020 final report to the Council. The Council has already made such amendments through the Camping Services and Standards Ordinance. While not explicitly called out as one of the final CACH recommendations, the recommendation in this report to further expand the number of safe sleeping locations available within the City and County, including through a City-sponsored program, is consistent with the CACH’s desire to expand safe parking capacity on faith-based parking lots (Attachment 6).

Additional Supports

Members of the community are committed to the success of these efforts in both mitigating negative impacts on surrounding neighborhoods where oversized vehicles are parked as well as supporting individuals who reside long-term in oversized vehicles. After analyzing the best practices in other communities, members of the community suggested some ideas to bring forward that they would initiate. These include:

- A voucher Program for Oversized Vehicle Wastewater Dumping. Developing and funding a voucher program for Santa Cruz city residents with a partial or full subsidy of the \$15 dump fee at the nearest dumping station. Community members interested in initiating this would coordinate with local nonprofit service providers to distribute and track the vouchers.
- A limited number of financial support subsidies for individuals who are Santa Cruz city residents needing support towards vehicle repair and registration. These funds would be established through partnerships with neighborhood groups.

Consistency with Prior Council Direction.

- Public Safety Task Force Recommendations of 2013 (Attachment 5)
- Adoption of Ordinance No. 2015-17 adding Section 10.04.085, 10.04.104, 10.04.106, 10.04.165, 10.40.120 and amending Section 10.41.060 of the Municipal Code Relating to the Parking of Oversized Vehicles, December 2015
- CACH Final Report and Recommendations, August 2020 (Attachment 6)
- Current council direction provided on June 22, 2021

Health in All Policies.

Health. The health and well-being of all Santa Cruz residents are of utmost importance. The public health impacts of extended oversized vehicle parking include: dumping of trash, debris, and human waste onto City streets, sidewalks, and waterways, fires and criminal activities such as bicycle and other personal property theft, private water connections being used, and gasoline thefts.

Equity. We acknowledge that the parameters set forth and permitting requirements in this ordinance may be challenging for some community members with oversized vehicles. Therefore, the council directs staff to work with a council ad hoc committee to develop policy direction on expansion of city operated or sponsored safe parking programs. The policy shall evaluate sanitation resources, requisite permits for participation (if any), costs for permits (if any), length of allowable stay, and oversight or supervision of the locations/program. The ad hoc committee will also explore low barrier programs, including but not limited to how low/no cost permits or parking, expired registration, and/or other factors can be accommodated for limited duration.

Sustainability. Environmental sustainability is a core value of the City of Santa Cruz and informs all City operations. Prohibiting the use of public right-of-way for oversized vehicle parking throughout the City of Santa Cruz would accomplish reduction of the likelihood of human waste entering the storm drain system or contaminating the nearby environment.

Environmental Review.

The California Environmental Quality Act (CEQA) provides several “categorical exemptions” which are applicable to categories of projects and activities that the Natural Resource Agency has determined generally do not pose a risk of significant impacts on the environment. Section 15307 of the CEQA Guidelines “consists of actions taken by regulatory agencies... to assure the maintenance, restoration, or enhancement of a natural resource where the regulatory process involves procedures for protection of the environment.” Section 15308 of the CEQA Guidelines “consists of actions taken by regulatory agencies... to assure the maintenance, restoration, enhancement, or protection of the environment where the regulatory process involves procedures for the protection of the environment.” The proposed ordinance is not anticipated to result in any

new construction, including but not limited to any construction of new facilities for public services such as police, parks, or fire. Many individuals already park oversized vehicles in the City, and the ordinance is not anticipated to result in any additional impacts associated with parking of oversized vehicles. By providing safe parking locations where sanitation facilities would be present and by prohibiting overnight parking elsewhere, the proposed ordinance is expected to result in significantly fewer instances of overnight parking on City streets where sanitation facilities, including restrooms and trash services, are unavailable. That change, in and of itself, will create beneficial impacts to the environment through an increase in the proper disposal of waste compared to existing conditions and allowances, where the City has no mandated safe parking locations. Further, the City's experience has been that the most significant environmental degradation associated with oversized vehicle overnight parking occurs in places where groups of oversized vehicles become entrenched in an area and remain in that area for an extended period of time. As such, the ordinance will reduce environmental impacts when comparing its outcomes to the status quo. As the majority of environmental impacts resulting from the ordinance will be beneficial rather than detrimental and with the other potential environmental effects being de minimis, the project is also exempt under Code of Regulations Section 15061(b), the "common sense exemption," since it can be seen with certainty that no significant effect on the environment will occur. Therefore, the adoption of this ordinance is exempt from CEQA.

Summary.

The approaches proposed by City staff includes the amendment of existing codes to prohibit oversized vehicles parking in the City of Santa Cruz for extended periods of time; and an online oversized vehicles Permitting system that limits the total amount of time any oversized vehicles or registered owner of an oversized vehicle parks their vehicle on the City's right-of-way, streets, and off-street parking lots in a calendar year.

Additionally, the council proposes the formation of an ad hoc committee that will work with City staff and community partners to expand the existing safe parking spaces for long-term City residents who, due to their financial circumstances, are determined to be involuntarily unhoused and incapable of availing themselves of alternative parking arrangements, such as at state parks, privately owned RV parks, or similar facilities designated for oversize vehicle parking.

FISCAL IMPACT: The exact fiscal impacts of the ordinance and the policy direction contained in these recommendations will vary based on a variety of factors. Cost sharing with the County and with local non-governmental organizations is desirable and would be sought but is not guaranteed. City staff will need to dedicate time towards the issuance of oversized vehicle parking permits. Costs for said permits, along with the extent of cost recovery, are yet to be determined. The costs for the safe parking program will vary depending on the number of locations, number of vehicles, and hours of operation, each of which will affect the number of staff necessary to provide oversight and services to the program and participants. Cost estimates for the safe parking sites can be explored as part of the recommended policy direction.

City staff currently spend significant time and incur direct expenses for various work associated with oversized vehicles, such as trash removal surrounding oversized vehicles. The safe parking program could result in a reduction of certain expenditures; however, it is expected that the regular and ongoing staffing of such a program will be a net expense to the City.

Dear Coastal Commission:

I'm a local oceanographer, instructor at UC Santa Cruz, and resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance.

Overnight parking/camping cannot be allowed in areas without proper waste management (i.e., trash receptacles and bathrooms), especially areas **within 0.25 miles of a federally protected marine sanctuary**. Heaps of garbage and human waste do not belong next to this city's beaches and public access areas.

Thank you for your consideration -
Dr. Katlin Bowman

Subject: Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)

Dear Honorable Coastal Commission members,

This is in reference to the City of Santa Cruz City coastal development permit application number CP21-0174, approved by the City of Santa Cruz Planning Commission by a 4-3 vote on March 3, 2022, and upheld by the City Council by a 5-2 vote on April 12, 2022.

Please support the Staff recommendation to “. . . find that the City’s CDP action does not raise a substantial public access issue, and decline to take jurisdiction over the CDP application on that basis.”

I am a resident of Soquel but manage property in the City. I am in the City of Santa Cruz daily. The city is justified in trying to bring order to unregulated large vehicle curbside camping.

As a career environmental and social responsibility manager and former groundwater and soil specialist, I can attest that curbside camping needs to be well managed to ensure that there are no significant impacts to local storm drains and to the overall trash and chemical loads to Monterey Bay.

Please allow the city to pursue its efforts to try to bring some degree of protection to Monterey Bay from unregulated large vehicle camping.

Yours respectfully,

Michael

To: CentralCoast@Coastal
Subject: The Oversized Vehicle Ordinance in Santa Cruz is inhuman and must be voted against
Date: Thursday, July 7, 2022 4:23:56 PM

The Oversized Vehicle Ordinance in Santa Cruz must be voted against. Nearly every week one or more elderly people come to Food Not Bombs asking about how to get into a shelter after their vehicle was towed and junked by the City of Santa Cruz. After seeking shelter that is always full I had the person a \$35 pup tent and ask one of our volunteers to help them find a place on the levee or Benchlands to camp. Many of these people are signal women in their late 60s, 70s and at time in their 80s. It is heart breaking to have to tell them that they will be sleeping on the cold ground knowing they may be attacked and robbed.

I hand out between \$500 to as much as \$2,000 a month in pup tents often to people who have just had their RV or camper taken by the city.

The Oversized Vehicle Ordinance if enacted will be a huge crisis as the number of people moving into their vehicles increase as a result of the failing economy. One of the first things a person who is facing homelessness does if they have the resources is to by a van or RV. Hundreds more "Oversized Vehicles" are likely to settle on our streets and the industrial areas on and near Delaware Streets on the West Side of Santa Cruz are the least intrusive to those who still live in houses.

The chaos and potential violence that could result from efforts to drive this ever growing population could be a huge crisis for everyone, housed and unhoused. The desperation of those being forced into tents is already intense and if hundreds of people are threatened with the lose of their only safety things could get very chaotic and dangerous for the police who at no fault of their own will be put into a position of having to confront and very angry mob with nothing left to loose.

If enforced and hundreds are driven into the doorways and parks this will also spark anger from those who must wake to camps outside their homes or shops.

If toilets, showers and dumpsters are provided in these industrial areas and people are allowed to sleep in their vehicles in those locations conditions for all of us in Santa Cruz will be must more safer and relaxed.

Again for all of us who live in Santa Cruz please vote to end the enforcement of the Oversized Vehicle Ordinance in the coastal area.

Subject: Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)
Date: Thursday, July 7, 2022 9:32:46 PM

Dear Coastal Commission:

As a Santa Cruz City Council appointed past member of the "Public Safety Task Force" by Mayor Bryant 7+ years ago...

Our group listened to the citizens of the city of Santa Cruz over the time period of a year+ in twice monthly meetings who were concerned about illegal street camping, noise, trash, gray and black water dumping, drug dealing, prostitution, etc. etc....

We, the Task Force, presented our recommendations to the Council and all were accepted by Council.

Our Monterey Bay is now part of a World Surfing Reserve and Marine Sanctuary and we want to keep it clean and safe for future generations.

YES, I am a resident in the City of Santa Cruz. I request that you **reject the appeal** of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that issues fall outside the purview of the Commission's coastal resource protection mandates.

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration -

Respectfully, Kim W. Stoner

One of the founders and a current board member of the Santa Cruz Surfing Museum.

Date: Tuesday, July 5, 2022 12:10:35 PM

Dear Coastal Commission:

I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the recommendation. As someone who has lived in Santa Cruz since birth, I support the city's OVO permit parking and safe spaces programs. Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. The time is long overdue to allow Santa Cruz to have an ordinance put in place. Thank you for supporting the no substantial issue finding.

Dear Coastal Commission -

I am a resident of Santa Cruz, in fact I live at the end of Delaware Ave and Shafer Rd where all these over sized RVs park all the time. I am VERY familiar with how these RV dwellers take care of there surrounding grounds. There is trash everywhere, most of these RVs are not in running order and can NOT make it to a sewer dump station and therefore use the streets Delaware, Shafer, Natural Bridges and Fair streets as a dump area or just pee and poop right there in the gutters or field where they are parked.

I support the City of Santa Cruz's Oversized Vehicle Ordinance.

Unfortunately, many of the occupants of Oversize Vehicles cause significant damage to our beautiful coast -- examples of this abuse starting fires in the wooded areas, defecating in Natural Bridges woodlands and the beaches, leaving garbage everywhere.

Therefore I am asking for your help to aid the City of Santa Cruz in managing Oversized vehicles.

Thanks in advance,

Dear Coastal Commission,

I am a Resident of Santa Cruz and support the City of Santa Cruz's Oversized Vehicle Ordinance.

Tragically, many of the occupants of Oversize Vehicles are destroying our beautiful coastline. Delaware Avenue has become filled with trash, abandoned furniture, broken down trailers, loose pets, late night partying and drug dealing.

I watched a trailer catch on fire with men running out of it right across the street from my home last week.

I watched another man defecate all over the ground next to the bus stop a few doors down from my home.

These are not "polite vacationers" traveling through, they are squatters starting fires in our forest and dumping discarded trash all over Natural Bridges woodlands and beaches, Antonelli Pond and Our beautiful UCSC Oceanside campus.

We have great horned owl babies, in red tailed hawk nests, long tailed weasels, coyotes, white egrets, great gray herons and many other beautiful species of animals in this area.

Please help us save this unique and beautiful place along the California coast. I am asking for your help to aid the City of Santa Cruz in managing Oversized Vehicles.

Sincerely,

Lisa L Carlton

Dear Coastal Commission:

I am a resident of Westside Santa Cruz. I live on Delaware Avenue between Natural Bridges State Park and the UCSC Seymour Marine Discovery Center. I support the City of Santa Cruz's Oversized Vehicle Ordinance because many of the occupants of the Oversize Vehicles cause damage to our beautiful coast by:

- 1) starting fires in wooded areas
- 2) using the wooded areas and even the streets for bathrooms
- 3) disposing of garbage in the Natural Bridges wooded areas and Antonelli Pond
- 4) servicing the vehicles on the street

In addition they congregate and thus create an environment that prohibits safe and peaceful walking on MY street.

Therefore, I am asking for your help to aid the City of Santa Cruz in managing Oversized Vehicles.

Dear Coastal Commission,

I am a Resident of the DeAnza Mobile Home Park on Delaware Avenue in Santa Cruz. I support the City of Santa Cruz's Oversized Vehicle Ordinance.

However, and unfortunately, many of the occupants of these Oversized Vehicles cause significant damage to our beautiful coast by leaving their trash on the roadway or just piled up on the sidewalk, and defecating in Natural Bridges woodlands and beaches. Some even have storage containers, dressers and tables along side their vehicles. When I am driving on Delaware Avenue in either direction, these Oversized Vehicles and cars parked so close to each other you can't even see if they are licensed. There are also trailers not even hitched to vehicles and no related vehicle nearby. Therefore, I am asking for your help to aid the City of Santa Cruz in managing Oversized Vehicles.

There are families that bike and park along Delaware and are frequent visitors to the UC science campus, can access the Natural Bridges State Park through the Crespi Court trail, walk or bike the trail around Antonelli pond (managed by Santa Cruz Land Trust) and bike up Shaffer Road to gain access to the Sanctuary bike and hiking trail to Wilder Ranch. Unfortunately, these families must walk past all of these illegally parked vehicles and the smell of urine and trash.

Please, I hope you can hear us. Yes, it is unfortunate these folks have no where to live or they prefer to live where they please, but there are rules and they need to be followed. Curious why the "No Parking Midnight to 6 am" is not enforced????? Thank you for your attention to this very troubling and ongoing issue in the City of Santa Cruz.

Sincerely,

Winnie Mulé

Dear Commissioners,

Please follow the suggestions of Santa Cruz City Staff and deny the appeal of the Oversize Vehicle Ordinance. I am a neighbor of Natural Bridges Park and have personally witnessed the environmental damage the unsupported camping vehicles have wrought on our neighborhood. They have for years lined the streets next to our parks and limited the ability of others to access the coast while damaging the environment by dumping trash, sewage, and starting fires. There have been several violent interactions with neighbors, dangerous unleashed dogs, drug sales and fires started in the vehicles. Our area is so desirable near the coast that people drive from all over California and the US to visit and have to compete with oversized vehicles for a parking spot by the coast. We need some kind of reasonable enforced parking regulations so all may have access to our spectacular coastline. Many other California coastal cities have been able to implement reasonable parking restrictions to allow more people the opportunity to access the coast but for some reason, Santa Cruz has been denied the opportunity by local activists who engage in endless litigation. Please allow us to keep our neighborhoods clean, safe, and welcoming.

Thank you,
Anne Friscia

I am going to make this short and sweet. I take my children to Harvey West in Santa Cruz county. Besides the fact that there is trash, motor homes leaking fluids all over the place. It seems to be just a haven for drug use. Let's just say I am not happy to have to subject my children to seeing this. I am thankful they are young and have no understanding of what is going on. So please respect the families that live in and surrounding areas. This is not the answer to solving the homeless situation.

Thank you,
Concerned Parents

Hello,

I am a long time resident of coastal Santa Cruz. I am concerned about the interference with access that camping in RV parking has on the coast parks. I am also deeply, deeply concerned about the illegal dumping of effluent into the "flows to ocean" street drains and river/ streams. What else do RVs, many non working, do with their sewage? It is head in the sand to not appreciate the negative affects of RV camping near our parks. I am deeply concerned about our waterways and about the public access. Thank you for this opportunity to be heard.

Sincerely,

Dear Commission Members,

As a resident in the DeAnza Mobile Home Park located at 2395 Delaware Ave Delaware, Santa Cruz 95060, I am confronted daily along the route of morning jog with the situation of homeless individuals living in recreational vehicles, attached and unattached trailers and automobiles that are being parked and lived in along both sides of this stretch of Delaware Ave. The west side of Delaware Ave at this point is the borderline of Natural Bridges State Park and dead ends into the entry gate for the University of California Santa Cruz's Marine Science campus. The east side of the street affronts Antonelli's Pond.

The number of these vehicles have increased significantly over the past six months. A large percentage of these have been parked here, unmoved for months on end. Two of these long-term vehicles now have flat tires. All of this is happening in spite of the fact that this section of Delaware Ave. is posted with signage stating that parking is prohibited between 12 midnight and 6 AM every day of the week.

During daylight hours I have seen many of their occupants doing major mechanical work on their vehicles and then leaving removed parts, worn out tires and spilled motor fluids behind. This is in spite of a city ordinance that prohibits doing mechanical work on a car on any city street in Santa Cruz. I have even witnessed one individual taking a bucket of engine oil and pouring it down a rainwater collection grate who contents flow directly into Monterey Bay. Food waste and other refuse is piled up on the embankment of the state park and next to Antonelli's Pond. It's a common sight to see the disposed of food waste scattered by the animals that reside within the park and the pond area.

Two days ago I saw a gentleman coming down off the bream from the state park with a roll of toilet paper in his hand. He then entered a vehicle that had sunscreens blocking out both its front and side windows. With no restroom facilities on this side of the park, nor any available port-a-potties, it's no surprise that the individuals sleeping in cars use the park's wooded area as their toilets.

During the night time hours some of my neighbors have complained about the noise coming from generators being used in these vehicles. And they have also observed the use barbecue grills and even open fire pits next to the wooded and grassy embankments on several occasions.

Since parking is extremely limited within the UCSC Marine Science campus, a large number of students use Delaware Avenue as a place to park their vehicle while attending classes. With the growth in the number of these long-term camping units on Delaware Ave. many students are now unable to do so.

These vehicles also block parking access to city residents and visitors wanting to visit Natural Bridges State Park using one of the three trail heads that originate on Delaware Avenue.

I fully realize that these homeless individuals need a location where they can park their

vehicles for long periods of time and use them as their residence. But allowing them to use this area in growing numbers, ungoverned by any rules, regulations and laws, is extremely problematic and potentially dangerous.

Also during my morning jog along Delaware Ave. I have mentioned to three of these vehicle owners that this area is closed overnight parking. In each case I've been met with responses of "mind your own business", "what are you going to do about it" and "f... off.

I've included photos with this email that I've taken over the last two days.

In closing I want to thank each member of the commission for taking my statements into consideration in your discussions and rulings.

Sincerely,

James Carraher

Dear Coastal Commission,
I am a Resident of Santa Cruz and support the City of Santa Cruz's Oversized Vehicle Ordinance.
Unfortunately, many of the occupants of Oversize Vehicles cause significant damage to our beautiful coast: examples are starting fires in wooded areas, defecating in Natural Bridges woodlands and beaches, leaving garbage. Therefore, I am asking for your help to aid the City of Santa Cruz in managing Oversized Vehicles.

Dear Coastal Commission members,

The purpose of this email is to formally request the commission to uphold the city of Santa Cruz Oversized Vehicle ordinance.

As a homeowner in the coastal zone, I am increasingly concerned that environmental issues as well as access issues are not being considered in the decision-making processes of many governmental organizations.

I have seen first hand, the rapid rise of oversized vehicles presenting environmental issues of vehicle owners using the beaches, walkways, paths and yards as toilet facilities. I have actually had to clean up many times, human waste, and scrub down walkways from oversized vehicle owners who either do not have bathrooms in their vehicle or do not make use of them.

In addition, I have witnessed multiple vehicles being utilized as a drug dealing location, with people coming and going from the vehicles in differing states of influence. I have witnessed these vehicles being the sites for parties and other disturbing activities.

I have seen the vehicles taking up multiple parking spaces and the ensuing lack of parking for families that wish to access the beach areas. Often these vehicles are camped and remain parked in these spaces for days or weeks at a time, denying parking for families and group access.

I urge the commission to deny this appeal so that we can keep the beaches and walkways clean and provide access to all of the public instead of a few who happen to own these large vehicles.

Thanks Ellen Kett

Dear Coastal Commission,

I am a Resident of Santa Cruz and support the City of Santa Cruz's Oversized Vehicle Ordinance.

Motorhomes parked on Delaware Ave. These people are openly doing drugs, taking showers outside, leaving disgusting messes everywhere and defecating openly. I am truly disturbed and very embarrassed as all my visitors ask me what's going on. Nobody wants to walk down Delaware Ave. as it is truly scary and I personally see exchanging of Money for Drugs daily, they don't even care!

Something really needs to be done here, I am really considering leaving Santa Cruz as it is just overwhelmed with Homeless people which I really feel sorry for but most of these people are mentally ill and act crazy. I will not allow my family or visitors to walk down this disgusting street.

Please do something about this!

We do not want our city streets to be turned into another Eureka South Jetty situation. It is already getting there with an entire sub-culture establishing their lawless community. The South Jetty has been reclaimed but it took a tremendous effort. Please prevent this from happening again.

Dear Coastal Commission:

I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the recommendation. I support the city's OVO permit parking and safe spaces programs. Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. The time is long overdue to allow Santa Cruz to have an ordinance put in place. Thank you for supporting the no substantial issue finding.

I live close to Natural Bridges State Park and hike in that park regularly. I have seen firsthand the damage done to the natural environment that has occurred due to the overnight camping that should not occur.

Very Truly Yours,

The City of Santa Cruz has a problem, people living in oversized vehicles parked on public streets, people who dump raw sewage into storm drains, which pollutes the Monterey Bay. The City ordinance on parking of oversized vehicles is a reasonable regulatory step toward controlling this illegal lifestyle. I ask you to support the City and deny appeal. Thanks.

Dear Coastal Commission,

I am a Santa Cruz resident and am in support of the Santa Cruz City oversized vehicle ordinance.

I live in DeAnza and our backyard backs up to the preserve which should be peaceful, clean, safe and enjoyable for all. Currently the people who live in their vehicles are destroying this space that is meant for the public. Since we live so close, we can hear them arguing at all hours of the day, see the drug deals that are being done, loud music, **hear them cutting at the trees, watch the trash piles grow larger everyday, block the entrance to the trails**, called the police when the fighting gets out of control and fear that a gunshot will come toward our home and **have personally seen them dump human waste**.

I am a person who has empathy. I understand when people need help and are struggling.

I also personally know when people have drug addictions and are hiding.

I understand that many want to let them be and give them a safe place to live. My question to those who make these decisions is what about the people who are negatively affected by them? Besides all the ways they are destroying the environment, they are also destroying my quality of life. Not just because they are there, but because it affects my PTSD. I unfortunately had a father who was an addict and would drag me to places with people like this. I hate to drive outside of my home down Delaware because it gives me such anxiety. I realize this ordinance is about oversized vehicles, but the small vehicles will double or triple and we will be back at square one. Be ready for another round of this mess.

Please take action and allow this ordinance.

Thank you,
Bridgette Andersen

I am writing this email to you asking that you **do not repeal** the Santa Cruz City ordinance concerning unregulated vehicle camping on city streets. Due to lack of enforcement the current situation is a prerequisite to what will happen if the city has no ability to regulate street camping.

The West Side streets (Delaware, Natural Bridges, and Shaffer), have over 30 street campers at any given time. The campers hinder access to our residences, take up visitor parking access to the UCSC Longs Marine campus, Natural Bridges State Park, and Antonilli pond.

We are not comfortable walking along the street as some of the street campers parked there are doing and dealing drugs, and make rude aggressive comments to my wife. There is always trash left behind when they do move, and often there is the strong smell of human waste from the dumping of their holding tanks into the street drains that goes into the lagoon at Natural Bridges, and Antonelli Pond.

The Coastal Commission should mandate that the current ordinance be aggressively enforced by the city for the protection of the fragile environment, and maintaining the visiting public access to this splendid area that is winter home to the endangered Monarch Butterfly.

I would suggest that the Coastal Commission enact regulations that no camping or RV parking take place outside of designated areas designed for the purpose of camping or RV parking throughout their entire jurisdiction. The environmental degradation caused by the unrestricted camping and parking needs to be curtailed.

Please do not let the streets of Santa Cruz, or the rest of the California Coast, be turned into a trash heap.

Thank You
Mark Kesterson

As a resident at the DeAnza Mobile Home Park, I drive by the overnighting-vehicles on Delaware daily. It has become difficult to know what the rules actually are for parking on Delaware. Currently, there appears to be no rules.

The overnighting-vehicles are often in a state of disrepair with trash surrounding them. The occupants often pull everything out of their vehicles and just leave it in a huge trash pile next to the road. It is extremely unpleasant to walk down the street. Many of the occupants are engaged in some drug use as you are passing by and it does not feel safe.

There needs to be designated parking lots where these people can go and not feel constant pressure to leave because parking overnight on the streets makes a health and safety hazard for the residents nearby.

Thank you for representing our concerns.

Dear Coastal Commission,

I live on Delaware Ave in Santa Cruz, and I am contacting you regarding the Oversized Vehicle Ordinance. Please enforce the rules. Do not let people stay overnight in their campers and trailers in my neighborhood! It's scary. It's ugly. It's smelly. They dump their sewage tanks on our street. They leave piles of trash on the side of the road. They treat my street like a campground. They set up BBQs on the dry grass and put their beach chairs around the BBQ and party all night! They stay for weeks and months at a time. I feel unsafe in my own neighborhood.

Lynn Slade
2395 Delaware Ave #18

===== BELOW IS CUT AND PASTED FROM A RECENT THREAD ON
WESTSIDE SANTA CRUZ NEXTDOOR=====

Armed robbery attempt on Delaware this morning at 8:30am...a buddy was riding his electric skateboard to work and battery died so he ended up having to walk along Delaware down by the marine science lab with his backpack and board. A dude that was one of the vehicle dwellers sees him, goes to his car, gets a knife and starts coming after him holding the knife. Luckily my buddy is very self aware and was able observe the sketchy situation developing and to get away but he said another 5 feet closer his board and bag would have surely been jacked. Police were called and suspect located but PD said nothing they could do since no actual crime was committed and my buddy prevented the actual crime from happening by getting away...WTF...when is enough enough?

Im sorry this happened to your friend. On July 14, the coastal commission will be hearing appeals of the Oversized Vehicle Ordinance which, although it was passed by council, has been in limbo enforcement wise awaiting this hearing. If you would like to voice support for the city ordinance, email the Coastal Commission by July 8 to let them know you want them to deny the appeals and uphold the city's ordinance. Email them at Centralcoast@coastal.ca.gov Put Re: A3-STC-22-0018-2 in the subject line.

It was a SUV dweller, not an RV. I personally am not a fan of the Oversized ordinance and wish the City would simply enforce the 72 hour parking rule and cite people for discharging of waste and trash.

No...I think the oversized ordinance is going to 100% target more regular citizens and homeowners that happen to have large vehicles at their residence than solve the vehicle dwellers setting up camp on the streets issue when they can't/won't even enforce the 72 hour parking rule that already exist on the books...while that is an issue, that proposed ordnance would not have had any bearing on this guy as he was not in an RV...but the ability to move him out for being parked there longer than 72 hours sure would have.

My understanding is that the ordinance prohibits parking on city streets 12-5 am without a permit if the vehicle is over 20 feet long or 8 feet high . Doesn't have to necessarily be an RV.

your absolutely right, rather than pointing the finger, they need to address the ISSUES... littering, stealing, 72 hours limit parking... Not put all RV owners in a category and seen as criminals...

Anybody who thinks the oversized ordinance solves anything is just plain ignorant.... My grandparents own an RV... Now targeting them would be outright SILLY...

unless your grandparents park on the street, this won't affect them. If they do the ordinance requires them to get a permit. As it is now, they can only park legally for 72 hours even in front of their house.

No crime wtf??!! California Penal Code 417 PC makes it a crime to brandish a firearm or deadly weapon. “Brandishing” means to draw or exhibit the weapon in a threatening manner, or to use it in a fight, other than in self-defense. Law enforcement needs to start enforcing laws.

I agree with you. Were there any witnesses? If not, then it may be a "he said, he said" situation for the police. As the mother of a police officer (and mother-in-law of a 2nd) I know that when there are no witnesses or other evidence, police are often troubled over who/what to believe.

It's amazing a progressive town like Santa Cruz ignores the environmental issues caused by most of these rvs dumping raw sewage down the drains or into the streets. Not to mention the garbage and needles ending up in the river from the drug camp. I guess enabling addiction and thievery trumps the environment. And yes I have seen the sewer hoses from rvs flowing into the drains and have called police with no action. Find safe parking spots for responsible rv owners with dump facilities and start enforcing the laws.

In my small experience with crime, you simply tell the officer you want a report and you want to press charges and they will proceed. Otherwise they might convince you it's not worth the time.

Enough is enough only after it has gone too far. At that time the police will show up, the next day, and take notes on their opinion of what happened while your friends and relatives plan for your funeral. Sadly, that is a reality in Santa Cruz

Just a note: pepper spray is not a "do all""end all" type of defense. I took a class about using pepper spray at Cabrillo many years ago, had to use it- and that guy I sprayed right in the eyes got just plain mad. Someone called the cops and at that time (mid 1980s) they came immediately. Some people are immune to pepper spray- especially doped out people who are flying high! Airhorn may have been just as useful!

I also carry a taser. If the pepper spray wouldn't have stopped him, I am sure the taser would have done the trick. Santa Cruz is no longer a safe place. And forget about the police to help you. You have to be prepared.

Well it is all over calif. except cities like los gatos and beverly hills. I have lived in Santa Cruz for 45 years. It is out of control. I used to talk with the old timers on the westside in my neighborhood about the early 1900s to 1960s. they did let me know Santa cruz always had times when things were a little more dangerous but this is definitely out of control and we have more than our share problems given the size of the city. I dont just post here I do try to organize, as do others, but it seems like if you dont live in the seabright neighborhood or off park aVe in Soquel we on the westside dont get heard. Time for a city council and city manager that will also protect the tax paying citizens and turn this city around quickly. This should not be the wild west. Also FYI the coastal commission needs a change. I cant understand why they give Santa Cruz so much difficulty. They seem to have different rules in SC than other coastal cities in CA. this is not rocket science we just need to deal with the problems our city has allowed to fester. Thank you and I am off line on this thread now.

Now that is a novel solution. If as people claim, the police are not doing their job, who is going to lock them up? Shall we call in the National Guard or perhaps the armed forces? Aren't their better solutions that serve the entire community and relieve the stress that has people so churned up?

Seems to me everyone walking around that neighborhood is well armed with pepper spray, tasers and bull horns. With recent supreme court ruling we can now also carry a gun with a holster. We don't have to lock them up, just shoot 'em and claim self defense. Please...

Dear Coastal Commission:

I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the recommendation. I support the city's OVO permit parking and safe spaces programs. Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. The time is long overdue to allow Santa Cruz to have an ordinance put in place. Thank you for supporting the no substantial issue finding.

Best regards,
Heather Boesser

I applaud the efforts of the Santa Cruz City Council to address the unhoused issues in our city. I support their proposed ordinance.

The lack of regulations creates an incentive for RV owners to park anywhere they please in city streets. The lack of services such as places for garage and human waste disposal creates an unsanitary situation.

Why can't these RV owners go to campgrounds or the countryside where there are plenty of places to park? Why should our city be expected to solve the unhoused issue when it should be the county or state that has the resources to mitigate the situation.

Sincerely,
John Shurtleff

I live on the corner of Clark Ave and Columbia Street. Every evening there are 2 to 4 rvs parking in front of my home. 90 % of them are respectable , quiet and don't leave a mess on the street. The remaining 10% ruin it for everyone.

I have had to call the police because of drug deals and prostitution. I find condoms on the street along with garbage. The street in front of my house smells like sewage because they dump urine and feces in the gutter. How about steam cleaning the gutters?

This is not the image we want to present to visitors.

Dear Coastal Commision,

People living in oversized vehicles in Santa Cruz are a threat to the safety of people and the environment of Santa Cruz. I have witnessed on numerous occasions activity in the city streets that are harmful to our coastal environment. These activities include the improper disposal of trash, of human waste, of auto parts and motor oil. The problem is especially acute on Delaware street near the entrance to Long Marine lab. Please uphold the city's oversized vehicle ordinance. Homelessness is a complicated problem that needs to be solved. While the ordinance won't solve the homeless problem it will help slow the destruction of our coastal environment.

**Subject:** Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)

Dear Coastal Commission:

I have been a resident in the City of Santa Cruz for nearly 50 years. I strongly urge you to reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that “societal issues ... fall outside the purview of the Commission’s coastal resource protection mandates”

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities. Please listen to your constituents’ concerns and honor this appeal.

Thank you for your consideration -

Susan Karon

Commissioners,

I am writing to express my support for the ACLU's appeal of the "oversize" vehicles parking ban in the City of Santa Cruz. The ban restricts access to the coast and disproportionately impacts low-income residents and people of color, who have been systematically priced out of their homes and forced to live in their vehicles. The City Council's actions favor real estate interests over the wellbeing of its own constituents.

If the City Council wishes to address the problems it associates with RV living, it may do so without discriminating based on class. I would encourage more collaboration with the community of people living in RVs.

Sincerely,  
Krista Corwin, 6-year Santa Cruz resident

**Subject:** Considering Appeal of Oversized Vehicle Ordinance

Hello,

I am writing in regards to the appeal of the Oversized Vehicle Parking Ordinance.

I own a home in Santa Cruz, not far from where dozens of RVs have 'set up shop'.

We cannot walk on the sidewalks past these RVs, as there is trash, clothes, people laying out, etc. ; this is pretty infuriating that as a taxpayer, I cannot use the sidewalks that I help pay to maintain, and have to walk into the street to pass by.

There are also typically stolen bikes attached to the top of the RVs, fluid that leaks out underneath (into the streets), etc.

I also have personally seen people stealing from the Safeway around the corner and running into those same RVs.

In other words - these aren't benign vehicles parking on the street. They are driving mess, crime, etc.

I see the same issue when I visit LA (see the link here about the RV encampment in Playa Vista). [https://www.westsidcurrent.com/news/rv-fire-started-at-same-encampment-dead-body-discovered-near-playa-vista-school/article\\_9c0d0fe6-5c75-11ec-86ae-d31b05d8426a.html](https://www.westsidcurrent.com/news/rv-fire-started-at-same-encampment-dead-body-discovered-near-playa-vista-school/article_9c0d0fe6-5c75-11ec-86ae-d31b05d8426a.html)

That was meant to be a protected wetlands, and has been utterly destroyed.

Please honor the will of the people of Santa Cruz who voted for this permit requirement, and do not overturn this ruling.

Kindly,  
Tia Christianson

**Subject:** Deny the appeals to the OVO, A-3-STC-22-0018-2

I am writing this email to you asking that you **do not repeal** the Santa Cruz City ordinance concerning unregulated vehicle camping on city streets. Due to lack of enforcement the current situation is a prerequisite to what will happen if the city has no ability to regulate street camping.

The West Side streets (Delaware, Natural Bridges, and Shaffer), have over 30 street campers at any given time. The campers hinder access to our residences, take up visitor parking access to the UCSC Longs Marine campus, Natural Bridges State Park, and Antonilli pond.

We are not comfortable walking along the street as some of the street campers parked there are doing and dealing drugs, and make rude aggressive comments to my wife. There is always trash left behind when they do move, and often there is the strong smell of human waste from the dumping of their holding tanks into the street drains that goes into the lagoon at Natural Bridges, and Antonelli Pond.

The Coastal Commission should mandate that the current ordinance be aggressively enforced by the city for the protection of the fragile environment, and maintaining the visiting public access to this splendid area that is winter home to the endangered Monarch Butterfly.

I would suggest that the Coastal Commission enact regulations that no camping or RV parking take place outside of designated areas designed for the purpose of camping or RV parking throughout their entire jurisdiction. The environmental degradation caused by the unrestricted camping and parking needs to be curtailed.

Please do not let the streets of Santa Cruz, or the rest of the California Coast, be turned into a trash heap.

Thank You  
Mark Kesterson  
2395 Delaware Ave.  
Santa Cruz, Ca.

Hello,

I am a long time resident of coastal Santa Cruz. I am concerned about the interference with access that camping in RV parking has on the coast parks. I am also deeply, deeply concerned about the illegal dumping of effluent into the "flows to ocean" street drains and river/ streams. What else do RVs, many non working, do with their sewage? It is head in the sand to not appreciate the negative affects of RV camping near our parks. I am deeply concerned about our waterways and about the public access. Thank you for this opportunity to be heard.

Sincerely,

L. Taylor

Every day I walk to Natural Bridges and UCSC Seymore Center via Delaware Ave. Santa Cruz-(do you want pictures?) and it's a gauntlet of unmovable vehicles, obvious bicycle chop shop, dangerous BBQ propane tanks, garbage and litter, and last week a reported attack by a man with a knife going after a young man with an electric skateboard, who was on his way to work. This is the RV encampment reality. There are not enough police hours to monitor the situation. It is not a solution. to allow this. It creates more problems. It is not safe by any means for the people who live here, do we matter?

Dear Coastal Commission:

I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the recommendation. I support the city's OVO permit parking and safe spaces programs. Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. The time is long overdue to allow Santa Cruz to have an ordinance put in place. Thank you for supporting the no substantial issue finding.

Thank you for supporting the no substantial issue finding.

Oversized vehicles have been parking in front on my house on Alta Avenue for the 6 years I have lived here. My house butts up to Bethany Curve and many transients feel that this is a great place to park. I have called the police for years to help out, and have never been able to get one vehicle moved. I have two children and I don't want them to have to pass by strangers on the street when they come home at night. In addition, my children have attended PCS for the last 6 years and they have had to ride their bikes along Delaware and Natural Bridges which are often full of OVOs. I have often worried about my daughter riding her bike alone on these streets as she rode to school. Please let this ordinance be implemented!

Sincerely,

Angelique Schuppek

Dear Coastal Commissioners,

I am writing to you today to say that I support the appeals of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California. Instead of punishing people for trying to survive in one of the most expensive housing markets in the U.S., the city should fund affordable housing, designate areas where people can park safely, and generally care about the well-being of its citizens.

This ordinance is incredibly harmful to our unhoused neighbors, makes it impossible for homeowners in the Coastal Zone to own an RV or cargo van, restricts public access and recreational access to the coast for low-income residents, violates the spirit of the City's Housing Element and Sensitive Coastal Resource Areas, and allows a backdoor to development in the Coastal Zone with no accountability.

Thank you for reading and I implore you again to change this regressive ordinance,

Spencer Kim Holmes

**Subject:** Oversize Vehicle Parking Ordinance appeal

Dear California Coastal Commissioners,

Please deny the appeal of the City of Santa Cruz Oversize Vehicle Ordinance (OVO). The OVO is not criminalizing homelessness. Instead, it provides more reasonable and available access and safe parking standards for all of our beachside community visitors and residents.

The OVO can help channel entry into the city's expanded safe parking program sites and to services for those in need. The OVO establishes equitable parking rules that opens up fair access to all, not just those who arrive first, or to the biggest vehicles, or to those who stay the longest and never leave.

Please deny the appeal.

Thank you,  
Susan Negro

I am a resident of a dean a mobile home park.we have lived with squalor and stench on Delaware. ave for far too long. I stopped a police car coming out of Schaffer rd to report a person standing in the middle of the street shooting up drugs without a care.These actions are against the law asks public degradation nudity dealing drugs and making it unsafe to walk passed this area. I have called the non emergency police number to report unlawful activity on this area several times with little or no response.unless it is concerning drugs they will do nothing.the same vehicles have been there for far to Long.months.there are vehicles parked filled with nothing but tires that nobody could live in a large Silk er covering attached to a tree making a permanent dwelling. This is the recreational areas of Santa Cruz tourists use these areas make long this town undesirable to return. Please listen to us no one is concerned about this area because it is out of the way so they don't bother.please help us as it is a problem that has not been addressed. Capitola and Carmel do not have this problem why do we?

To all concerned parties:

My name is Margaret Gannon and I live at DeAnza Mobile Home Park  
2395 Delaware Avenue Spc 172 Santa Cruz Ca 95060.

Because of the RV's and other Oversized Parking Vehicles it has become unsafe to walk and at  
sometimes drive down certain areas on Delaware Avenue Santa Cruz.

There are drug dealers,  
outside sitting by RV there are barbecues, propane tanks, toilet's, furniture etc  
It has become a Health and Safety issue for 200 Spaces (300) of Senior Residents of DeAnza Mobile  
Home Park.

Please keep the Santa Cruz City Ordinance in place regarding Oversized Vehicle Parking.

Thank You  
Margaret Gannon

Hello,

We are residence of Santa Cruz at 415 Manor Avenue South. We requesting rejecting the appeal of a few activists requesting to allow parking of RV's in streets close to west Cliff drive Santa Cruz.

Currently the RV's are a distracting to our peaceful and beautiful neighborhood. They take away large parking space from our guests and family members, they open their RV's canopies like they are on their private paid property, urinate and leave garbage. I pay high Dollars to be close to the ocean as well as high property taxes. At times I feel unsafe special at night.

Thanks for listening

**Subject:** Please deny the appeal of the City of Santa Cruz Oversize Vehicle Ordinance

Dear California Coastal Commissioners,

Please deny the appeal of the City of Santa Cruz Oversize Vehicle Ordinance (OVO).  
The OVO absolutely does not criminalize homelessness. It provides reasonable and more available access and safe parking standards for all of our beachside community visitors and residents.

The OVO is a positive means of channeling entry into the city's expanded safe parking program sites and services for those in need.

The OVO establishes equitable parking rules that opens up fair access to all comers not just to those who arrive first, in the biggest vehicles, who stay the longest and never leave.

In addition the oversized vehicles in our area are the biggest contributors polluting our local creeks by parking adjacent to them in our neighborhood and using them as bathrooms, they also block intersections making safe turning onto busy street impossible.

Please deny the appeal.

Thank you,  
Forrest Hirtzel  
Live Oak Santa Cruz Resident

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration -

Bob Lamonica, Santa Cruz

**Subject:** Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)

Dear Coastal Commission:

I am encouraging you to deny the appeal of Santa Cruz's Oversized vehicle ordinance. Although I wholeheartedly support efforts to provide our houseless neighbors safe parking of their RV domiciles in appropriate sites that the city is working on providing, parking on our city streets, particularly those close to the ocean, has devolved into an unsightly, unsanitary dangerous mess that detracts, not enhances, the coastal experience we all wish to enjoy. Isn't this one of the key missions of the CA Coastal a commission after all?

I could write many words to describe the untenable situation here in Santa Cruz but I believe pictures tell a better story. The enclosed photos were taken just a day ago in two key impacted streets, Delaware Ave and Natural Bridges St, just blocks from our ocean cliffs.

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration -

Dear Coastal Commission:

Please keep Santa Cruz stable by retaining the current Santa Cruz Oversized Vehicle Parking Ordinance that you already approved and please reject the appeal to it. RV parking throughout the city of Santa Cruz is out of control and needs the order and management of the current RV Parking Permit Plan.

I appeal to you as a 36 year (former) resident of Santa Cruz who moved to the city next door from Santa Cruz in part because of the transients living directly outside my Santa Cruz home and around my neighborhood.

We are overwhelmed by the numbers of people and live-in vehicles (arriving from all over the country) taking up residence on our streets and often parked outside our homes.

In Santa Cruz I have had to close my windows to keep the marijuana smoke and noise of drunken arguments from invading my home and sense of security. Some RV occupants used my Santa Cruz yard as a potty for themselves and their pets and walked into my yard to avail themselves of my water spigot for their needs. These people were living in their vehicles 15' from my bedroom window as uninvited housemates and were part of the reason I moved to the town next door.

Thank you for your consideration in preserving the current Santa Cruz Oversized Vehicle Parking Ordinance that you currently have in place.

Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates" 26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities. I have personally observed camped RV's discharging the contents of their holding tanks into drain inlets and gutters that flow directly to the ocean. We have also witnessed vehicles parking across the street from our house, then leaving trash, bottles etc on the curb. These situations need to be regulated and eliminated.

Thank you for your consideration -

Wes Musitelli

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration -

Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)

**Body:**

Dear Coastal Commissioners,

I am writing to you today to say that I support the appeals of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California.

This ordinance is incredibly harmful to our unhoused neighbors, makes it impossible for homeowners in the Coastal Zone to own an RV or cargo van, restricts public access and recreational access to the coast for low-income residents, violates the spirit of the City's Housing Element and Sensitive Coastal Resource Areas, and allows a backdoor to development in the Coastal Zone with no accountability.

Please find that the Oversized Vehicle Ordinance has a substantial issue.

Sincerely,

Susan Kohen

Dear Coastal Commissioners,

I am writing to you today to say that I support the appeals of the Oversized Vehicle Ordinance and hope to see it dismissed. As a mom to an unhoused individual, I can say that many of these folks will lose the roof over their head if this passes, and this city can't afford financially or ethically for this to happen.

This ordinance is incredibly harmful to our unhoused neighbors, makes it impossible for homeowners in the Coastal Zone to own an RV or cargo van, restricts public access and recreational access to the coast for low-income residents, violates the spirit of the City's Housing Element and Sensitive Coastal Resource Areas, and allows a backdoor to development in the Coastal Zone with no accountability.

Thanks for considering,  
Heather Mietz Egli

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

On any day of the week, you will find piles of garbage next to RV's who have been parked along Delaware Avenue and Natural Bridges Road for extended periods of time. I have personally witnessed people using Antonelli pond as a toilet as well as the Natural Bridges woodlands. Consequently, do not go into those areas anymore.

**Subject:** Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration -

Dear Coastal Commissioners,

I am writing to you today to say that I support the appeals of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California.

This ordinance is incredibly harmful to our unhoused neighbors, makes it impossible for homeowners in the Coastal Zone to own an RV or cargo van, restricts public access and recreational access to the coast for low-income residents, violates the spirit of the City's Housing Element and Sensitive Coastal Resource Areas, and allows a backdoor to development in the Coastal Zone with no accountability.

Please find that the Oversized Vehicle Ordinance has a substantial issue.

Thank you,  
Amanda Harris Altice

**Subject:** Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)

Dear Coastal Commission:

I'm a resident of Santa Cruz, living a few blocks from Natural Bridges State Park. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots and parking on area streets are continuously filled with unmoving oversized vehicles, preventing others from taking a turn parking there.

I'm an avid walker, so I see these vehicles almost every day. I have witnessed many of these vehicles parked on local streets for months or even years, moving occasionally to avoid to avoid the police. I have seen (and smelled) sewage dumped on Delaware St. from RV tanks (twice), where it runs into the street sewers and down into the ocean. I have seen their garbage dumped by the side of the road, and overflowing the few dumpsters the city has placed in the area to accomodate these semi-permanent RVs. I have seen these RV residents putting furniture, BBQs, and other personal belongings on sidewalks, forcing pedestrians to walk around them in the street. I have seen at least two fires started in the dry grass near Shaffer and Delaware behind Natural Bridges State park adjacent to RV encampments. Many of them are running noisy generators for hours, especially in the evening, to power appliances.

The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by these issues and others. Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates" 26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities. Thank you for your consideration -

Please find that the Oversized Vehicle Ordinance has a substantial issue.

I am one of these people on SSI and working as much as I can. I take my trash to a dumpster and dump my sewer at New Brighton. I don't walk good but I do work when my body let's me. I get people yelling at me and tell me to move on out of their city. This is also my city too and I have a right to be here. Please remove this OVO so I can feel safe in my RV once again.

Dear Coastal Commission:

I live at 320 Broadway, Santa Cruz, CA.

I request that you reject the appeal of the Oversized Vehicle Parking Ordinance.

The OVO will improve beach access in areas where state beach parking lots and adjacent streets are filled with unmoving oversized vehicles, causing a public nuisance and preventing others from parking near(er) their homes.

The restrictions in overnight parking will also reduce police and fire service calls caused by unauthorized nighttime fires, barbecues and other hazards, not to mention drug use, raw sewage and trash near some of these vehicles.

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities. Tent encampments are not allowed in most of these same areas, and neither should RV encampments.

Thank you for your consideration

Indrajit Rajeev Gajendran

**Subject:** Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance.

The OVO does not substantially reduce coastal access and will IMPROVE access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration!

Michelle

Dear Coastal Commission,

In addition to forwarding the letter below, I would like to add more information. I live on Cayuga in the Seabright area just a couple blocks from Seabright State Beach. On my daily oceanside walks, I see big RV's spend day after day parking in front of the beach. They are supposed to move at night, but unless actually ticketed, they remain for days, preventing tourists from having access, as well as locals who would like to spend some time relaxing at the beach or simply parking for a while to gaze.. Additionally, this small area of Seabright is the second home for these large vehicles. A forty foot bus just spent three days in front of my house without moving. While the 72 hours is technically allowed, he simply moves a few spaces and repeats. While empathetic to the houseless needs, it is a real concern about dumping into drains or on the street, trash left on the street, unpleasant encounters and more.

As noted below, the city is trying to accommodate needs at great financial and resource expense on an already deficient budgetary situation.

Please help us by denying the appeal and letting us go forward with reasonable parking restrictions.

Thank you,

Maura Kelsea

229 Cayuga St.

Santa Cruz, CA 95062

**Subject:** Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)

Dear Coastal Commission:

I'm a home owner in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. For several years my Natural Bridges neighbors have been trying to be as cooperative and as proactive as possible in dealing with the constant issue of oversize RVs and campers illegally parking overnight in our neighborhood. We can't walk to local businesses on Delaware, to the Farmers Market, even to Natural Bridges park without seeing the trash, and pollution that these RVs leave behind. We have signs, we have laws. They need to be ENFORCED!

The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Please reject the appeal of the Oversized Vehicle Parking Ordinance. Those who are trying to appeal are obviously not personally affected by this-- otherwise they would respect and understand the reasoning why the residents have worked so hard to get this ordinance passed.

Sincerely,

Lori-Ann Tarter  
Natural Bridges neighborhood

**Subject:** Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

I'm a resident of DeAnza Manufactured Home Park. My home, #147, is the only home in the park with frontage on Delaware Ave and a view of Antonelli Pond. From our unique vantage point, we've seen "street campers" park on both sides of the street for weeks on end, urinating and defecating next to our yard, throw unimaginable trash in the street and into the creek leading directly to Natural Bridges State Beach. I have sent photos of vehicles, license plates, and drainage hoses leading directly from the vehicles waste receptacles to the creek itself. Many of the vehicles park here for weeks, even months, without ever moving. Many are trailers or 5th wheels up on blocks or jacks, with no moving vehicle attached. We've seen "campers" fight, use drugs, play loud music, run generators into the night, cut vegetation on and spray paint state park property. One camper screamed and cursed for hours, apparently on the phone, clearly disturbed. I was told, after multiple calls to SCPD, that it "wasn't illegal to scream". All this has happened about 25 feet from, in plain sight of my living room, bedroom and deck.

The residents of these vehicles are not, for the most part, tourists and beach-goers seeking access to the coast. Many never leave their vehicles. Some erect semi-permanent external shelters and actual wooden furniture. One resident installed a full-sized childrens swing set which remained in place for months. Several have chosen Delaware Ave as a location to rebuild their engines or remodel their campers, leaving all their trash behind when they left. This is not Coastal Access, these are homeless encampments on public streets.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates" Allowing this mis-use/abuse serves neither the interest of the Commissions resource protection, nor the individuals living in their vehicles from necessity. To enforce the already-posted "no overnight parking" restrictions does not limit coastal accessibility. There are few areas in Santa Cruz where oversized vehicles can park, occupied, with no services, sanitation, or fees.

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not

Additional Materials

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

The worst part of having people living in RVs on our neighborhood streets is the pollution. At the very least, we should not allow them to park near storm drains that flow into the ocean. I think that rule should be statewide. I go for a walk along the coast most every morning and when I smell sewage it makes me sick to think of it draining onto our beautiful beaches.

Sincerely,  
Mark O'Neill

The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration -

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I was thrilled with the passage of the Oversized Vehicle Parking Ordinance. I just heard that others are trying to nulify it. Please keep it! I would add a 3 hour time limit also! The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will help stop the excessive nightly police and fire service calls and other environmental hazards such a dumping waste along our coastline.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Dear Coastal Commission:

I'm a homeowner on the Westside of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there.

The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues, and the abundance of trash and human waste created.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration,

Adam Soffrin

Dear Coastal Commission: I'm a resident in the City of Santa Cruz. I request that you reject the attempts of the special interest group, "Santa Cruz Together" to further restrict nighttime parking and require permits to park RVs on our City streets. These ordinances disproportionately impact the working poor and homeless (often the same people), as well as residents who may own RVs but don't have 100% access to a driveway (it may be shared, etc). As a City Resident and RV owner, I oppose this overreach that restrict my ability to do so much as load and unload my vehicle (which is stored in another town) if I need to park it overnight.

It is ironic that this group of individuals feel entitled enough to request this restriction of personal freedom on one hand but then feels perfectly justified in indicating that the vacant home tax is an overreach of the government. Santa Cruz Together does NOT represent Santa Cruz; they represent themselves, a group of wealthy real estate owners. Please consider this when evaluating the submissions of their bogus form letters.

Thank You,

Emily Kenville

Dear Coastal Commission,

I'm a resident in the City of Santa Cruz and I am requesting that you reject the appeal of the Oversized Vehicle Parking Ordinance.

The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. I often cannot find parking when my husband and I want to spend time at the beach.

I also live near where oversized vehicles are parked for long periods of time, and I witness all the trash, feces and needles which litter the streets and flow to our ocean. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates" 26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration.

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and instead will serve to *improve* access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues, dumped waste, and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

**Subject:** Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)

Dear Coastal Commission: I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards. Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates" 26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities. Thank you for your consideration -

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

As of this morning when I pulled out of De Anza Mobile home park which is on Delaware next to Natural Bridges, I counted 102 vehicles and RVS that people are living in. (Some have children living in them) Over the 4<sup>th</sup> July weekend others were not able to park to enjoy the beaches. Furthermore, some of these Vehicles and RV's have been parked their for over a month and NOW have all of their Items around their vehicle or RV. Whomever is appealing this needs to drive down Delaware at the end, park your car and take a walk to the beach.

These groups of people walk across the street to their friends and hold up traffic, as though they own the streets of Santa Cruz. I always wonder where do they go to the bathroom? In the bushes, on the ground? SO unsanitary!

Thank you for your consideration - Jody Turner Resident of De Anza

Please reject the appeal of OVO. This area has been inundated with people from out of the area parking near the ocean. This has caused great environmental problems I have witnessed myself.

Sincerely Joe De Meo

**Subject:** Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)

Dear Coastal Commission:

My husband and I are property owners in the City of Santa Cruz. We are writing you to ask that you please reject the appeal of the Oversized Vehicle Parking Ordinance. The citizens of Santa Cruz have spoken and voted to enact the Oversized Vehicle Ordinance. Repealing the Oversized Vehicle Parking Ordinance would negate the will of most of the citizens of Santa Cruz!

There are always many oversized vehicles parked near our Santa Cruz home and they are not just eyesores, sources of trash and human waste, and magnets for drugs and other illicit activities. They also tend to occupy parking near the beach for weeks on end, making it hard for locals and out-of-towners alike to have access to the shore. They also make the area feel unsafe and dirty. In other words, they are a problem.

Certainly there should be places for people to park their large vehicles, and even live in them, if they must. But it makes no sense for these vehicles to be occupying the relatively rare commodity of coastal parking. Twenty six other coastal communities have oversized vehicle ordinances similar to that proposed for Santa Cruz. Why should Santa Cruz not have parking rules like other coastal cities?

Thank you for your consideration,

Sincerely,

Silvia Grassetti-Kruglikov

Dear Coastal Commission:

I'm a long-time resident of Santa Cruz and have raised a family here. We live very close to Natural Bridges SP and Delaware Road where several dozen RVs have taken up permanent residence over the last few years. Because of this, my family and many other families with children in the area have stopped visiting Natural Bridges SP due to the ongoing safety and environmental concerns related to all of the RVs.

I respectfully request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration -

Sincerely,

Gene Manako

The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards. Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates" 26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities. Thank you for your consideration - This is SO impactful!  
In appreciation,  
Sara Broderick

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Over the 4th of July weekend, we could not find any parking. I am too lame to walk blocks to the ocean. I would have loved one of those parking spaces for a 1/2 hour to feel the ocean spray.

Thank you for your consideration -

Take care, jewel Auvinen

Dear Coastal Commission:

I am a resident of Santa Cruz's Westside and have been a witness to the influx of RVs and other vehicles that park for sometimes long periods in our residential streets and create enormous problems: waste disposal, drug use, illegal activity, noise, fire danger.

***I request that you reject the appeal of the Oversized Vehicle Parking Ordinance.*** The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Dear Coastal Commission:

I'm a long-time resident of Santa Cruz and have raised a family here. We live very close to Natural Bridges SP and Delaware Road where several dozen RVs have taken up permanent residence over the last few years. Because of this, my family and many other families with children in the area have stopped visiting Natural Bridges SP due to the ongoing safety and environmental concerns related to all of the RVs.

I respectfully request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration -

Sincerely,

Gene Manako

Dear Coastal Commissioners,

I am writing to you today to say that I support the appeals of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California.

This ordinance is incredibly harmful to our unhoused neighbors, makes it impossible for homeowners in the Coastal Zone to own an RV or cargo van, restricts public access and recreational access to the coast for low-income residents, violates the spirit of the City's Housing Element and Sensitive Coastal Resource Areas, and allows a backdoor to development in the Coastal Zone with no accountability.

Please find that the Oversized Vehicle Ordinance has a substantial issue.

Caroline Elam

Coastal Commission members,

I've read through the thorough documentation by the City of Santa Cruz refuting key points of the appeal. The environmental degradation and public health hazards seen in the submitted photos are present every day in many sensitive areas. It's not uncommon for a sidewalk to be impassable.

The City continues to expand it's safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

I appreciate the balanced analysis by the staff. Limiting overnight parking will ultimately free up more convenient parking for a greater number of people. Consider the parking lot by Lighthouse Park and the best access to view the Monterey Bay and watch world famous surfing at Steamer's Lane. That lot is dominated the by oversized vehicles that rarely move to open up a spot for someone else. This is the best location for someone with limited mobility to park, walk on a flat sidewalk, and enjoy the view.

Thank you,  
Lynn Renshaw

Dear Coastal Commission:

I'm a long time (30+ years) resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance.

My home and business have been adversely affected by oversized vehicles, their inhabitants and refuse left behind.

Please reject the appeal to help the citizens of Santa Cruz that have been dealing with all of the consequences of not having a plan like this in place already.

The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration -

Richard W. Steere

Dear Coastal Commissioners,

I am writing to you to say that I strongly support all of the appeals of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California.

This ordinance hurts our unhoused neighbors, makes it impossible for homeowners in the Coastal Zone to own an RV or cargo van, restricts public access and recreational access to the coast for low-income residents, violates the spirit of the City's Housing Element and Sensitive Coastal Resource Areas, and allows a backdoor to development in the Coastal Zone with no accountability.

Please find that the Oversized Vehicle Ordinance should be appealed and we should examine alternatives to both help folks get the housing they need and deserve along with allowing public access to the coastline, something everyone should be able to enjoy.

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. If anything, the presence of these unmoving, oversized vehicles has reduced coastal access for others by continually taking up much of the available parking space.

Frankly, these OV parking areas have become a health and safety issue due to illegal dumping, unauthorized fires, loose dogs, and rampant drug and alcohol use. I used to walk my dog every afternoon at Antonelli's Pond on Delaware Avenue, near the back entrance to Natural Bridges State Park, but have stopped doing so due to the amount of garbage and human waste coming from the OVs. Plus it's a struggle now to find a place to park! I can only imagine how many others, both locals and tourists, are no longer accessing these two natural resources due to the overwhelmingly negative presence of the OVs.

26 other coastal communities have passed similar oversized vehicle ordinances. In order to protect our natural resources for the enjoyment of everyone, Santa Cruz must do the same.

Thank you,  
Tara Leonard  
Santa Cruz

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance.

There is a huge problem with homeless people living in their vehicles in the coastal region of Santa Cruz. They pollute the environment, disturb the peace, and frequently use illegal drugs. The city needs to deal with this problem and the nighttime oversized vehicle parking restriction is a step in the right direction.

The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration -

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz.

Please reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration -

I live on a narrow street in SC city and regularly see near accidents from drivers that can't see past these RV's as we exit our driveways.

We pay property taxes, those of us that are landlords pay the city to have rentals through the rental inspection program and others in broken down vehicles with trash hanging off of them live in our neighborhoods making it congested, unsafe and unsightly.

This town is degrading. It is a sad state to see.

Thank you for your consideration -

Lynn Richards

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

This is also a safety issue for our community. Drug use and other illegal behavior in residential neighborhoods occur in many of these Oversized vehicles and was a huge problem before this ordinance was passed. Our community is finding many other ways to house and help people in a way that makes living in their RVs not needed.

Thank you for your consideration and for rejecting this unfounded appeal,  
Sincerely, George Ow and Gail Michaelis-Ow 203 Highland Avenue Santa Cruz CA 95060

Dear Coastal Commissioners,

I am writing to you today to say that I support the appeals of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California.

This ordinance is incredibly harmful to our unhoused neighbors, makes it impossible for homeowners in the Coastal Zone to own an RV or cargo van, restricts public access and recreational access to the coast for low-income residents, violates the spirit of the City's Housing Element and Sensitive Coastal Resource Areas, and allows a backdoor to development in the Coastal Zone with no accountability.

Please find that the Oversized Vehicle Ordinance has a substantial issue.

Permanent housing solutions need to be made a priority for the houseless and those in cars, the OVO and policies like it are NOT solutions.

Bijan Ashtiani-Eisemann (He/Him)

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you **reject the appeal** of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there.

The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards. Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity.

Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates" 26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

In addition when people are allowed to drive to Santa Cruz and simply park and live, they do not respect the privilege. The areas around long term campers are an environmental hazards. Due to excessive untended garbage and human waste, rats congregate and garbage blows into the ocean and the neighborhoods. It is not only an eyesore but a concern that I feel would be best addressed by more oversight and a sense that camping in Santa Cruz is a privilege not a right.

Thank you for your consideration -

Jennifer Greene

**Subject:** Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance.

The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards. Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity.

Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates." 26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration -

Dennis Webb

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities. WE HAVE TO DRIVE DOWN TWO STREETS TO LEAVE AND ARRIVE HOME. THE STREETS ARE LINED WITH OVERSIZED VEHICLES. WE HAVE WITNESSED HUMAN AND ANIMAL WASTE. I SAW A MAN URINATING THREE FEET FROM THE CURB AT TWO IN THE AFTERNOON, A FEW DAYS AGO. ON THE NIGHTS OF JULY 3 AND 4, GUN FIRE SHOTS ERUPTED FOM ONE OF THOSE STREETS. LOUD MUSIC, DRUGS, ALCOHOL, AND DISCARDED TRASH, FURNITURE, MATTRESSES, DRUG NEEDLES, CAR PARTS ARE THE NORM. THEIR VEHICLES ARE UNREGISTERED AND HAVE VARIOUS ILLEGAL VEHICLE CODE PER A LOCAL POLICE OFFICER.

THEY HAVE NO RESPECT FOR OUR BEAUTIFUL COASTLINE.

.

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz, and the owner of an oversized camper van. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. In my own experience, the current broken-down RV parking scene limits coastal access - there are several areas along the coast that my 7-year-daughter does not feel safe; and we end up avoiding them. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration -

Dear Coastal Commissioners,

I am writing to you today to say that I support the appeals of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California.

This ordinance is incredibly harmful to our unhoused neighbors, makes it impossible for homeowners in the Coastal Zone to own an RV or cargo van, restricts public access and recreational access to the coast for low-income residents, violates the spirit of the City's Housing Element and Sensitive Coastal Resource Areas, and allows a backdoor to development in the Coastal Zone with no accountability.

Please find that the Oversized Vehicle Ordinance has a substantial issue.

Thank you,  
Jasmeen Miah

**Subject:** Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)

Dear Coastal Commission

I'm a longtime resident in the City of Santa Cruz. Please reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards. Additionally, it will reduce the widespread dumping of garbage and sewage on neighborhood streets.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates." 26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration.

Dear Coastal Commission

We are residents of the City of Santa Cruz. We request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach and other parking lots are burdened by oversized vehicles that prevent others from taking a turn parking there.

We live near West Cliff Drive. One or more RVs park overnight near our house daily. Daily, not occasionally. Other RVs occupy parking spaces along the street, overlooking the sea, continuously -- at most moving during the night, then returning to the same spot. That makes coastal access more difficult for others. Waste accumulates on sidewalks and enters the sea that you seek to protect. Please don't prevent cities from trying to limit the associated problems.

Your staff report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities. Thank you for your consideration.

James and Catharine Gill

Dear Coastal Commissioners,

Please help us stand up to those who are criminalizing poverty in Santa Cruz! I want a more compassionate policy.

I am writing to you today to say that I support the appeals of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California.

This ordinance is incredibly harmful to our unhoused neighbors, makes it impossible for homeowners in the Coastal Zone to own an RV or cargo van, restricts public access and recreational access to the coast for low-income residents, violates the spirit of the City's Housing Element and Sensitive Coastal Resource Areas, and allows a backdoor to development in the Coastal Zone with no accountability.

Please find that the Oversized Vehicle Ordinance has a substantial issue.

Your organization is making th coastal area unsafe for families and children. We are forced to drive cars rather than cycle to destinations located in your jurisdiction due to unsafe conditions. Recently, someone in a Living Vehicle blew meth smoke in my childs face on our last bike ride near Natural Bridges. You should not be able to dictate city ordinances that create dangerous conditions for the residents.

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration -

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. Restrictions in overnight parking are really needed and will keep our beaches cleaner and safer. Many people living in oversized vehicles have made lifestyle choices to live freely by the beach. That is their choice, but the public spaces are owned by ALL of us, and its not their right to inhabit these coastal areas as if they own them.

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for supporting our precious coast!

Val Cole

Dear Coastal Commissioners,

I am writing to you today to say that I support the appeals of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California.

This ordinance is incredibly harmful to our unhoused neighbors, makes it impossible for homeowners in the Coastal Zone to own an RV or cargo van, restricts public access and recreational access to the coast for low-income residents, violates the spirit of the City's Housing Element and Sensitive Coastal Resource Areas, and allows a backdoor to development in the Coastal Zone with no accountability.

Please find that the Oversized Vehicle Ordinance has a substantial issue.

Sincerely,

Leah Kaplan, LCSW

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

I walk the sidewalks by the bay and continually encountered issues. These issues fall into two categories: 1) unsafe or blocked sidewalks require walkers to move into the streets and 2) trash left by RV campers clogs the drains which flow into the bay.

1) Unsafe or blocked sidewalks:

It is not unusual for RV campers to occupy the sidewalk by their camper with chairs, boxes, items within their camper, and to use it as their own personal space. I have even encountered tarps hung across the sidewalk, given their space complete privacy. Some campers have dogs, which are often off leash and growl/nip at walker's heels. All of this, to be safe, require walkers to move onto the street with traffic, which is unsafe.

2) trash clogged drains which flow into the bay:

I have seen kitty litter dumped in a drain beside a camper, in addition to urine bottles, cans, trash bags tore open by animals, etc. , all left behind. At one point, RVs were dumping their waste tanks in a drain which flows to the bay. I understand the EPA was contacted.

We live in such a beautiful area, it is sad walkers have to move onto the street to pass campers and visitors must see the trash left on our sidewalks and streets. You have the power to help us reclaim our coastal community and beauty.

Thank you for your consideration -

**Subject:** Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration -

Dear Coastal Commissioners,

I am writing to you today to say that I support the appeals of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California.

This ordinance is incredibly harmful to our unhoused neighbors, makes it impossible for homeowners in the Coastal Zone to own an RV or cargo van, restricts public access and recreational access to the coast for low-income residents, violates the spirit of the City's Housing Element and Sensitive Coastal Resource Areas, and allows a backdoor to development in the Coastal Zone with no accountability.

Please find that the Oversized Vehicle Ordinance has a substantial issue.

The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that societal issues fall outside the purview of the Commission's coastal resource protection mandates.

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

I would also add that I have witnessed an increase in residential litter left by RVs and that coastal views have been substantially and negatively impacted by the presence of an increasing number of large vehicles parked on west cliff drive.

Thank you for your consideration -

Dear Coastal Commission,

I've been a resident in the City of Santa Cruz since 1974, and request that you reject the appeal of the Oversized Vehicle Parking Ordinance (OVO). The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with endlessly parked oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

**Subject:** RV parking permits

Living on the Westside of Santa Cruz for 7 years I became very familiar with the influx of RVs and all the things that come along with them, sidewalks cluttered with bikes, boxes, bags, auto parts..., cars coming and going, needles, dogs off leash, people defecating in the bushes, and trash left behind when they move on to the next spot. After being approached by men from one RV my wife stopped walking by herself during the day, in our own neighborhood. The final straw came when a Pit Bull jumped out of the window of one of the RVs and grabbed our black lab by the throat, locking on for several minutes before we could free her, only to have the owners of the RV and dog jump in a car and leave. We paid \$1,000 in vet bills and our dog and my wife and I were left traumatized by the incident. We sold our house and moved to Aptos... what a difference! We now feel safe walking in our neighborhood. Please don't let Santa Cruz become unfit and unsafe for its residents in order to accommodate all those that want to come here and live by their own rules.

**Subject:** RV parking restrictions in Santa Cruz - please reject the appeal of the OVO!!!!

Dear Coastal Commission,

My street (Columbia street) suffers from a lot of nightly RV parking and on my way to work by bike (on Delaware Avenue, close to Swanton Blvd), I am passing lots and lots more very smelly and some downright scary "RVs" and their more or less permanent residents. Apart from being disgusting, I cannot believe that the trash piles and the human waste disposal into the storm drains (especially near Natural Bridges) is good for the environment.

I urge the coastal commission to reject the appeal of the Oversized Vehicle Parking Ordinance. Other nearby coastal cities have parking rules for RVs and do not seem to have to suffer from this problem.

Thank you,  
Catharina Lindley

Hello

I am writing to you regarding our OSVO in the City of Santa Cruz that the Coastal Commission will be hearing/reviewing an appeal filed with the commission.

Please deny this appeal. Our neighborhoods are not camp grounds and we have put up with so much in the last decade trying to ban these from our neighborhoods. We do not feel safe with strangers camping in front of our house. We witnessed someone pour a large Jug of urine on our sidewalk then return to the vehicle and not move it for 2 weeks and if we tried to talk to him, he totally flipped out. Why should we have to tolerate this (your home is suppose to be your sanctuary)? Where is our quality of life? You may ask, if you don't like it, move. My family has lived in the City of Santa Cruz for 5 generations so I don't want to leave, this is my home.

So, please, please allow the OSVO to pass and let us feel safe in our neighborhoods again

Best regards,  
Judith Vlassis

Dear Person,

I strongly support the Santa Cruz Oversized Parking Ordinance and hope that you will also. Here in Santa Cruz our environment is being threatened by folks that have oversized vehicles who come to town on a temporary basis and create hazardous conditions through human waste at natural bridges, state park, garbage, campfires, and other behaviors. Therefore, please Deny the appeals to the OVO, A-3-STC-22-0018-2

**Subject:** Santa Cruz oversized vehicle ordinance

Hello,

I'm a Santa Cruz resident and I'm writing to urge you to uphold the city's oversized vehicle ordinance and allow the city to enforce it. I often walk by people dwelling in RVs along Santa Cruz's streets and have witnessed dozens of instances of sewage being illegally dumped into the gutters and on the ground, RV residents throwing their garbage over the cliffs into the ocean, in the bushes, in the gutters and on the ground. In some locations, the accumulated trash around these vehicles is so great that it blocks sidewalks and adjacent dirt, and people have to walk into traffic just to get around the garbage. In one location on Delaware St., I saw a sea bird picking at one RV resident's trash and was alarmed to see that the bird had picked up drug paraphernalia.

I sympathize with the plight of the homeless. I also believe it's essential to protect our environment, prevent sewage waste and littering, and that our streets should be accessible for all residents. So I urge you to uphold the oversized vehicle ordinance and allow the city and police officers to enforce it.

Thanks for your consideration.  
Cimeron Morrissey

Dear Coastal Commission,

I am a Resident of Santa Cruz and support the City of Santa Cruz's Oversized Vehicle Ordinance. Unfortunately, many of the occupants of Oversize Vehicles cause significant damage to our beautiful coast; examples are starting fires in wooded areas, defecating in Natural Bridges woodland and beaches, leaving garbage. Therefore, I am asking for your help to aid the City of Santa Cruz in managing Oversized Vehicles.

Past experience with uncontrolled vehicles parking and camping on Delaware Street have resulted in huge amounts of litter, human waste, and a large increase in property crimes in our mobile home park and vicinity. My home was broken into during a past experiment with uncontrolled parking on city streets. Please do not let this activity resume in the area of Natural Bridges State Park.

Sincerely,

John Grant  
2395 Delaware St #183

Dear Coastal Commission: I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the recommendation. I support the city's OVO permit parking and safe spaces programs. Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. The time is long overdue to allow Santa Cruz to have an ordinance put in place. Thank you for supporting the no substantial issue finding.

Unregulated overnight camping is *not* OK.

I do *not* believe the ALCU and 'Santa Cruz Cares' are acting in the best interests and the well being of our community.

Dear Coastal Commission,

I am a Resident of Santa Cruz DeAnza Mobile Home Park and support the City of Santa Cruz's Oversized Vehicle Ordinance.

Unfortunately, many of the occupants of Oversize Vehicles cause significant damage to our beautiful coast: examples are starting fires in wooded areas, defecating in Natural Bridges woodlands and beaches, and leaving garbage.

I have attached a small sample of what Delaware Ave looks like today which borders our mobile home community. These squatters are pitching tents, constructing borders around their vehicles (taping them to the trees), and when they leave simply dumping their trash in plain sight. Not only that, but there is prevalent drug using and dealing. This strikes fear in our residents and promotes violence (shootings). For all these reasons we do not like to venture out on Delaware Ave on foot - even in broad daylight.

Therefore, I am asking for your help to aid the City of Santa Cruz in managing Oversized Vehicles.

Sincerely,  
Kathryn Caruso  
2395 Delaware Ave Space 38  
Santa Cruz. CA. 95060

Dear Coastal Commission:

I support the city's OVO permit parking and safe spaces programs. I live on Delaware Avenue, and it is lined with RVs that stay for weeks at a time. What do they do with their human excrement for that period of time? Dump it nearby, usually on the State Park property.

Dear Coastal Commission:

I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the recommendation. I support the city's OVO permit parking and safe spaces programs. Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. The time is long overdue to allow Santa Cruz to have an ordinance put in place.

You have a responsibility to protect the environment in the coastal zone. This situation is terrible for native wildlife, our watershed and coast, not to mention the local neighborhoods and access to nearby parks like Antonelli Pond and Natural Bridges State Beach, both of which have been subject to dumping, human waste and trash.

If I wanted to build a house in the coastal zone, I would need to jump through many hoops to do so to protect the environment and minimize my footprint on the coastal zone.. How can you permit people to basically live year round with no sewer connection and no cooking options on city streets? It is an invitation to wildfire (which has happened already), and an invitation to water and land pollution. Please allow the city to put sensible regulations in place to minimize the impacts that this has caused. City streets should not be RV campgrounds.

Thank you for supporting the no substantial issue finding.

Henry Raptor

Dear Coastal Commission:

I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the recommendation. I support the city's OVO permit parking and safe spaces programs. Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. The time is long overdue to allow Santa Cruz to have an ordinance put in place. Thank you for supporting the no substantial issue finding.

Permitting unregulated overnight camping in the coastal areas is an invitation to disaster. There are many people camping in our neighborhoods with no regard for what they do with their trash and using our neighborhood parks for bathrooms. Our local stream at Bethany Curve has been subject to repeated dumping of trash, urine and feces from vehicle dwellers, and where there used to be tree frogs and crawdads and herons, now there is nothing. I understand that people who need to live in cars and RVs need a place to park, and I am encouraged that the city is moving in that direction to provide safe spaces, but permitting people to live without bathrooms anywhere they want to is just crazy. What if you lived next to a park or waterway where you saw this happening on a daily basis? What would you choose to do? If the local government, including your agency, does not protect the environment, who will? Your agency was created in order to preserve our coastline, not permit it to be degraded continuously by turning a blind eye to the consequences of allowing overnight RV parking on the city streets.

Please allow the city to put in place an ordinance that the city voters have been waiting for for a long, long time. Thank you for caring for the environment and our coastline. Please prove that you do and vote to find "no substantial issue" with the appeals.

Thank you.  
Steven McCarty  
Santa Cruz, CA

Dear Coastal Commission:

I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the staff recommendation.

I started a petition which you have a copy of sent in by Westside Neighbors. As a member of that group, I know that our main issue is overnight vehicle parking in residential neighborhoods, which creates problems in terms of trash, dumping and drama, and forces the neighbors to turn into law enforcement officers to keep our neighborhoods safe and clean. This is not fair to people who have homes in the most impacted areas. The petition was signed by 1,054 residents requesting that the city enact an ordinance to address the issues. We elected a city council to represent the city residents, and that is what they have tried to do. I commend the city's efforts to create places for people to park who need to live in their vehicles, but our neighborhood streets are not the place for unregulated overnight camping.

I support the city's OVO permit parking and safe spaces programs. Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. The time is long overdue to allow Santa Cruz to have an ordinance put in place. Thank you for supporting the no substantial issue finding.

Thank you.

Dear Coastal Commission:

Unless you live on the lower westside of Santa Cruz, you might have no idea how long and how bad this situation has become. Those of us who do live here have had enough of the inaction on behalf of government to protect our beautiful environment near the coast. We have also had enough of the so-called activists who continually obstruct any attempt the city has made to help people out of the situations that result in them living on the streets in their vehicles. Every time the city attempts to do something good, you can bet that the ACLU and Disability Rights people will file a lawsuit to stop it. This is completely counterproductive to actually getting people help to better their living situations.

Our westside neighborhoods are fed up with having to police bad behavior on the part of some of the people living in RVs and trailers on the street here. We know that not everyone creates problems, but those that do create such huge problems that it cannot be overlooked. Things like weapons, fires, drug dealing, prostitution, overdoses have become a daily occurrence in our neighborhood. We have beautiful parks and natural spaces but people are afraid to bike or walk in these areas due to the potential for crime and crazy behavior, witnessed daily by people who live here. You only have to look on the Nextdoor app to see daily documentation of this. This has to stop. You can help stop it.

The city is trying to help reduce the problems by creating the OVO, which will help people get off the street by providing them free places to park with services, and this will decrease the number of people parking everywhere by requiring them to have parking permits and park in specific locations. This is a definite step in the right direction both for the neighborhoods and the people living in vehicles.

I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the recommendation. I support the city's OVO permit parking and safe spaces programs. Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. The time is long overdue to allow Santa Cruz to have an ordinance put in place. Don't pick on Santa Cruz just because our local ACLU and local fringe group Santa Cruz Cares have filed appeals. They do not represent the majority of the people who live here, and none of them live in the impacted areas. Stop giving them the power to disrupt and obstruct our city's attempts to address this issue. Let the elected officials and our city do their jobs.

Thank you for supporting the no substantial issue finding.

Dear Coastal Commission,

I am writing in support of Santa Cruz's OVO permit parking and safe spaces programs and its enforcement. I am a neighbor to an area that has increasingly been the place for temporary and permanent campers and RV's to remain, leaving human waste & dumpsters worth of trash, while making it feel unsafe to walk or bike past. This ordinance is critical to maintaining the health of our city and environment!

---

Dear Coastal Commission,

As a 37 year resident who has owned his home since 1997 and witnessed the devastating impact of homelessness, drug abuse, and unresolved mental health crises on our beach community, I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the recommendation. I support the city's OVO permit parking and safe spaces programs. Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. The time is long overdue to allow Santa Cruz to have an ordinance put in place.

Thank you for supporting the no substantial issue finding.

Sincerely,

Michael G. Vann, Ph.D., Professor

Dear Coastal Commission:

I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the recommendation. I support the city's OVO permit parking and safe spaces programs.

Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force.

Our neighborhood and coastal environment have been significantly negatively impacted by issues related to unregulated overnight vehicle camping , including trash, garbage and human waste.

The time is long overdue to allow Santa Cruz to have an ordinance put in place. Thank you for supporting the no substantial issue finding.

Dear Coastal Commission:

I am the owner of a family business that operates a cafe and food manufacturing business on Delaware Ave. in Santa Cruz that, for the past eleven years, has experienced the financial costs and negative impacts of unregulated overnight camping in our neighborhood.

I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the recommendation. I support the city's OVO permit parking and safe spaces programs. Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. The time is long overdue to allow Santa Cruz to have an ordinance put in place. Thank you for supporting the no substantial issue finding.

Thank you for supporting the no substantial issue finding.

I live in an area across the street from a park and we have had serious problems with long term oversized vehicles parking for days and weeks on some occasions. These vehicles limit the number of people from coming to enjoy the park and the beach. These vehicles take too much space and limit access to families wishing to access our wonderful coast. Please approve the local policies of limiting oversized vehicles.

Dear Coastal Commission:

I am sick and tired of having my cars ransacked, the dumping of garbage and the eyesore that is RV's parking in our neighborhoods. There needs to be some mechanism to regulate the amount of oversized vehicle parking (RVs) in out neighborhoods.

Ransacking and Theft: When I lived on Laguna Street (off of Pelton Ave) for the first 5 years or so, RV's and other transient vehicles parked on Pelton Ave. Some nights half a dozen cars on our street would be ransacked and valuables stolen. The town eventually painted car-sized parking spots on Pelton and disallowed overnight parking on that end of Pelton Ave. The ransacking and theft diminished immediately. For those who claim there is no correlation between out of the area-oversized-vehicle-parking and theft. They are being willfully untruthful. There is a direct correlation. Look at the demographics of the people living in the RV's and transient vehicles. Having them "live" right outside your house is a liability. I pay a significant amount of property taxes. I should not have to deal with this crap! I have lost thousands of dollars of my personal possessions in the past ten years (no exaggeration).

Garbage: Where there is transient RVs, there is seemingly no regard to the cleanliness of our streets. Drive past a bunch of RVs in town and witness the filth for yourself.

Property Value: A very compelling case could be made that allowing these vehicles in our neighborhoods unregulated directly impacts or property values. This is not acceptable. Shouldn't our property be protected with these tax dollars?

Tolerance for transient oversized vehicles and their (transient) owners is wearing very thin. Please uphold the Oversized Vehicle Ordinance.

Thank you, Peter Zwinakis

To the Coastal Commission:

I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the recommendation. I support the city's OVO permit parking and safe spaces programs. I have lived in Santa Cruz for the last 20 years and throughout those years have frequ been unable to access Antoinelli Pond watershed and UCSC Long Marine Lab due to overnight parking near the entrance to the sites. I am Often alone with my three young children and frequently do not feel safe entering areas that are lined with people camping on the streets due to frequency seeing illegal drug use done publicly in these site by individuals who are camping and because I have on several occasions been yelled at bu people who are camping. On two occasions I have witnessed dumping large amounts of garbage out of campers into the watershed. We have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. The time is long overdue to allow Santa Cruz to have an ordinance put in place. Thank you for supporting the no substantial issue finding.

Dear Coastal Commission:

I live on the west side of Santa Cruz. On my daily walks I regularly experience heaps of trash thrown from vehicles onto the sidewalk, gutters and open spaces. Motorhome residents often allow their dogs to be off leash around Antonelli pond and the adjacent UCSC owned lot, leaving me fearful of my little dogs being attacked. As well, there are areas where obvious signs of prostitution (used condoms and wrappers) can be found right outside certain vehicles.

I realize that there is no easy solution to homelessness, and many people make their homes in these vehicles. However, there must be a contained, regulated spot for these people to live so that they may have access to sanitary facilities, trash and recycling dumpsters, and hopefully receive some help whether it is mental health, drug related or just to help them get into permanent housing.

I support the city's OVO permit parking and safe spaces programs. Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. The time is long overdue to allow Santa Cruz to have an ordinance put in place. Dear Coastal Commission: I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the recommendation. I support the city's OVO permit parking and safe spaces programs. Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. The time is long overdue to allow Santa Cruz to have an ordinance put in place. Thank you for supporting the no substantial issue finding.

Maggie

**Date:** Sunday, July 3, 2022 7:35:36 PM

---

Dear Coastal Commission,

I support the "no substantial issue" finding made by Coastal Commission staff and encourage you to uphold it. Please deny the appeals to the Santa Cruz Oversized Vehicle Ordinance. As a mother to two young kids and a small business owner in this neighborhood, my access to the coast has been significantly negatively impacted due to feeling unsafe on our streets.

These issues related to unregulated overnight camping include human waste, greywater in storm drains, fires, and criminal activity - all well-documented by the City staff, SFPD and SFFD. My sons and I witnessed a knife fight on Delaware Street on our way to camp at Seymour and our preschool was ordered a shelter-in-place earlier this week (just two recent examples from this past week).

We've been waiting since 2013 for an ordinance to be put in place. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. By putting this ordinance into effect, it will allow access to the coast not just by the RV campers, but to all.

Thank you for your attention and coastal service,

Liz Fritz  
Lower Westside Santa Cruz Resident, Parent & Business Owner

**Date:** Tuesday, July 5, 2022 10:17:19 AM

---

Dear Coastal Commission:

Please uphold Commission staff's recommendation of ***no substantial issue finding*** on this matter.

The Santa Cruz City staff, elected officials and community members have crafted an ordinance that fairly takes into account the needs of both community members and RV owners. In particular, the OVO will provide alternative, healthier and safer sites for folks who live in their RV's while at the same time mitigating the negative effects of unregulated RV living on public streets in residential neighborhoods.

Thanks for your consideration,

-Eric Grodberg

Dear Coastal Commission,

I am a Resident of Santa Cruz and support the City of Santa Cruz's Oversized Vehicle Ordinance.

Unfortunately, many of the occupants of Oversize Vehicles cause significant damage to our beautiful coast: examples are starting fires in wooded areas, defecating in Natural Bridges woodlands and beaches, leaving garbage. Therefore, I am asking for your help to aid the City of Santa Cruz in managing Oversized Vehicles.

**Subject:** Nighttime Oversized Vehicle Parking Restrictions appeal hearing - A3-STC-22-0018-2  
**Date:** Wednesday, June 29, 2022 12:24:44 PM

---

Dear Commissioners:

I understand that we are not able to give verbal testimony at this hearing, but I appreciate the opportunity to address you in writing about my concerns related to the appeal of the Nighttime Oversized Vehicle Parking Restriction ordinance on July 14, 2022.

I am a long time resident of the city of Santa Cruz, and my family has lived here their entire lives, including my parents. My Mother, 83, lives at the DeAnza Mobile Home Park at 2395 Delaware Avenue on the lower westside of Santa Cruz. This is a senior mobile home park, with approximately 200 residents. The main reason my mother wanted to move to DeAnza to spend her remaining years is the proximity to the coast, Natural Bridges State Park, Wilder State Park, and the ability to walk to these parks.. I attach a map of the area for your review.

<https://goo.gl/maps/TLRatLhehm65PCTSA>

Unfortunately, as you can see and have already learned from the city staff's report, four of the city streets most impacted by unregulated overnight RV/vehicle camping are surrounding the DeAnza Mobile Home Park: Delaware Avenue, Shaffer Road, Swanton Boulevard, Natural Bridges Drive. Because of the situation on these streets with overnight campers, trash, illegal activity, violence, etc., my mother and other residents of the park do not feel safe to walk on these streets. She has had to call SCPD multiple times for observed drug dealing, domestic violence, psychotic behavior, etc. The police have told her and other residents that it isn't safe to walk in their neighborhood, especially after dusk. Because of my mother's financial situation, she is not able to move anywhere at this point as she invested her life savings in moving to DeAnza. She does not have a car, and is now basically a prisoner in her own home because of this situation. She is not the only one; most of the elderly women there feel exactly the same way. This is a terrible situation for them.

As I read the Coastal Commission's mission, I read two provisions that are being violated by this situation: Policy 1.7 to maximize public access and enjoyment of recreational areas is tempered by the need for such maximizing to be consistent with "sound resource conservation principle[s], **safety**, and rights of private property owners, and **maximizing public recreational access opportunities**.

Allowing people to camp overnight in neighborhoods with no regulations, no oversight, no services, has resulted in this disaster for the local residents, which COMPLETELY LIMITS their access to recreational opportunities, compromises their safety and security, and impacts their life on a daily basis. It is unconscionable to allow this situation to continue. After many years, the city has finally stepped up to create an ordinance that will require people to get permits and to move to sanctioned safe spaces, which will alleviate the problem in my mother's neighborhood. You have to let the Oversized Vehicle Ordinance stand. The people who are appealing it don't care one bit about the negative impacts that these "campers" have caused. Access includes seniors and residents, too. City streets are not designed to be unregulated RV campgrounds. Please do the right thing for these seniors and the other residents of the lower westside. Deny the appeals and allow the ordinance to proceed. Thank you.

Dear Coastal Commission:

When considering the appeals to the oversize vehicle ordinance, please consider the massive amount of trash and sewage these vehicles have generated and continue to generate as they park on city streets. The city of Santa Cruz has done a lot to provide for people in oversize vehicles, but for many of them staying in their vehicles is preferable than having any rules. Please - we need to stop having sewage and trash go down storm drains.

Further, people parking oversize vehicles long term appear to frequently be dealing with substance abuse issues. This has created a public safety issue for bicyclists and pedestrians near the oversize vehicle camps. Please consider that allowing long term parking creates a public safety and access issue for others. I can give many personal examples of these danger as can my neighbors, friends and visitors.

Thank you for denying the appeals to the OVO. It's important you deny them.

Dear Coastal Commission:

My family has lived in Santa Cruz for 50 years and in the last 10 years we have seen a substantial increase in overnight car camping all over the city and county. The norms no longer exist and we frequently have campers parked directly in front of our front door cooking, blocking the sidewalk, and using our street as a campground. This can be for one night or multiple. Regardless of the length of stay our children, aged 8 and 10, and our neighborhood has reduced access to the sidewalks and avoids using these areas that are taken over by campers. We have had urine dumped on our street and along our fence line. Garbage is often discarded and left for us to pick up when a camper drives away. Barking dogs are left in cars. And the associated noise from campers and their vehicles disrupts us at day and night. City streets were not designed to be campgrounds and are not appropriate places for campgrounds. We don't have the proper facilities, rules and oversight. And I argue that the toxic behaviors of the overnight campers actually discourages the use of the ocean and coastal zone by those who are intimidated and uncomfortable around such behavior. Citizens such as myself.

I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the recommendation. I support the city's OVO permit parking and safe spaces programs. Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in forced. The time is long overdue to allow Santa Cruz to have an ordinance put in place.

Thank you for supporting the no substantial issue finding.

Best,  
Masao Drexel

Please see a small selection of pictures I have taken on my street below.

RV Parked and cooking outside our front door

Same RF down the street with Urine poured on street. (my kids could smell it inside our living room later that day)

New RF parked on our street

RV and two busses blocking parking for multiple days limiting others ability to visit the coast and beach. One bus has two pit bulls that bark at anyone walking by making the street feel very unsafe. and the owners let the dogs off leach in the open lot to pee and poop.

Dear Coastal Commissioners:

I believe I am uniquely qualified to give my strong support for the Oversized Vehicle Ordinance for the City of Santa Cruz for the following reasons:

1. I actually read it and understand the need for and impacts if it's passed.
2. I witnessed first hand the egregious behavior of those parked illegally on Mission Street Ext everyday for over a year.( 2021-2022)
3. I have been verbally accosted and frightened by the aggressive behaviour by some of the people staying in their vehicles or hanging out on the sidewalk.
4. I watch students from nearby High School (PCS) and believe they should have a safe place to walk on our streets (the trash, illegal behaviour and those that are mentally unstable need immediate attention).
5. I watched the coroner remove dead bodies from oversized vehicles twice last summer (2021).
6. The businesses on Mission ext are negatively impacted as their employees and clients have been robbed, verbally threatened and have to deal with enormous amounts of trash left by those illegally parked in front of their rightful ( high rent I may add) place to operate services to our community.
7. I watch people throw lit cigarettes into the dry bush.
8. I saw a young child left unattended in the street while the adults were inside their vehicle. It took four different calls for services to actually get the family some help.
9. I watched those living in their vehicles rob those living in the street ( on the Caltrans side of the road) - they go through their possessions and take them.
10. I watched a bike stealing operation in plain sight.

### **About Access to the Coast**

I understand your mission is to protect access to the beach. I walk Westcliff daily and can assure you that access is not impeded at all- I see people parked in their vehicles ( all sizes) enjoying the views, cooking a meal, napping, hanging out - and then they leave as signs state "no overnight parking". With or without a vehicle the beach and views are open to all. But around the corner on Delaware, Mission Street Ex and the neighborhood streets near Natural Bridges overnight parking is accepted ( and all rules are ignored and even advertised on social media to encourage people to come here because "no" parking laws are not enforced! Please - that's a reputation you should end now. I doubt other coastal commissions or elected officials from San Diego to Oregon allow this law to be ignored. As far as access- as a senior citizen and a grandmother - I feel my access is threatened as I no longer go to Natural Bridges State Beach (especially not with the little ones because it is not safe anymore), Some of the people loitering on those streets are publicly intoxicated, mentally not well as they yell obscenities and spew trash and block the safe ways to walk. They need tender care and services and should not be left to stay on the streets without services - it's environmentally and mentally

toxic.

**I hope you will reject the appeals of a very small group** - they do not represent the majority of residents, businesses nor support the health of our environment, especially the fragile coast. Their arguments ( I heard at City Council Meetings and the articles they write in the local paper ) overwhelmingly are used as a platform for serious homeless issues across the country but are not not related to this ordinance. This ordinance actually helps the people they profess to care about with a sanctioned place to sleep. I also understand that this ordinance intends to help those living in their vehicles by providing services and sanitation plus it will provide a means to get the illegal and offensive behavior off our streets. I don't want to see Santa Cruz continue to be a safe haven ( most of whom are not locals) for lawlessness and tie the hands of those trying to enforce society's laws that protect all of us.

Respectfully,  
Carole Mulford

Dear Coastal Commission,

Our city desperately needs to have an oversize vehicle ordinance like other coastal cities have. Presently we have people flooding into our small city from all over the U.S. taking up valuable coastal parking by living in their vehicles, and without rules to discourage this we constantly have more people coming here to live by the beach. There are no services for these people so dumping into storm drains and littering all over is commonplace. By permanently parking in the coastal zone, they make it so that other people attempting to visit our coastline, parks and beaches cannot find adequate parking.

For instance, many of the parking spaces by Steamer Lane, our most frequently visited surfing destination are constantly taken by people who are living out of their vehicles for months (years). By monopolizing these parking spaces, the vehicle dwellers unfairly monopolize parking that should be available to all of our community on a first come first served basis.

As it is your duty to assure coastal access to all our community, I would ask you to please uphold the city of Santa Cruz's Oversized Vehicle Ordinance so that our city has the tools available to make sure coastal parking is properly regulated and available for all who come to visit our coastline.

Thank you for all that you do to assure coastal access for our state's residents.

Sincerely,

**Date:** Wednesday, July 6, 2022 12:19:04 PM

---

Dear Coastal Commissioners,

I am writing to you to **urgently support** the appeals of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California.

While the main focus of the appeal is on the harmful effect the ordinance would have on our unhoused neighbors, there is an additional MAJOR negative impact to residents who rent or own their homes in Santa Cruz, but do not have access to off street parking, and own a vehicle which is considered "Oversized" by the very arbitrary guidelines of the ordinance. If this ordinance is enacted, renters and homeowners will be in violation of the law simply for continuing to own vehicles they have always owned.

In our instance, my wife and I spent our life saving in 2021 to buy the duplex we had been renting for 8 years in mid-town Santa Cruz. There is no off street parking, and no option to build off street parking. We each own a daily driver vehicle, my wife a Prius, and myself a 2004 Sprinter van. My Sprinter van is now considered to be an "Oversized Vehicle" under the ordinance, and there is no option whatsoever for me to continue parking it on the street, in front of or near our home, without being in violation of this ordinance.

It is absolutely INSANE to think the city could enact an ordinances that would effectively make it illegal for a home owning resident to continue owning, driving, and parking their daily driven on the street in front of or near their home.

My van is not an RV, nobody lives in it, and it is simply my daily driver, which we also use a couple times a year to go on camping trips or other family adventures.

Very sincerely,  
Jeremiah Goulett

**Subject:** Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)  
**Date:** Thursday, July 7, 2022 9:03:22 AM

---

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz, and have lived on the Westside for 24 years. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. Delaware Avenue, Natural Bridges, Swanton Blvd, Mission Extension, and Shaffer Rd are CONSTANTLY impacted by overnight parking & long-term camping. This activity creates unsanitary trash, human waste in Natural Bridges State Park & Beach, drug activity, theft, crime and blockage of normal use of pedestrian pathways and sidewalks! There are camping apps that even advertise these areas as free camping spots! The City is attempting to address some of these issues with the OVO ordinance.

The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities. Please support the OVO ordinance!

Thank you for your consideration.

Nancy Knudegard  
2395 Delaware Ave  
Spc 21  
Santa Cruz, CA  
831-466-3331

**Subject:** Public Comment: REJECT THE APPEAL July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018  
**Date:** Tuesday, July 5, 2022 3:13:15 PM

---

To The Coastal Commission,

I'm a resident in the City of Santa Cruz and I am writing you today to request that you **reject the appeal** of the Oversized Vehicle Parking Ordinance.

I have seen first hand, the rise of oversized vehicles presenting environmental as well as health and safety issues in our coastal community. The occupants are using the beaches, walkways, paths and roadways as living and toilet facilities with complete disregard to the environmental and neighborhood impacts.

The city of Santa Cruz needs this ordinance to protect the coastal environment and coastal access.

The OVO will actually improve beach access in areas where parking near state beaches is filled with oversized vehicles that stay for days/weeks and prevent others from having access there.

The OVO restrictions will also mitigate the excessive police and fire service calls in these areas caused by illegal and unsafe activities by those residing in these vehicles and it should also help reduce the many other environmental hazards brought to our streets and beaches by the same.

Thanks to the your staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates". Many other coastal communities have passed similar oversized vehicle ordinances and in Santa Cruz, we desperately need it.

Please reject this appeal and allow Santa Cruz to move ahead with OVO.

Thank you,

Laurie Radovan

**Subject:** Vote NO on oversized vehicle ordinance

Dear Council,

I am so disappointed but not surprised to see the council once again employ criminalization as an attempt to regulate poverty, a method that has long proven to be expensive, ineffective, and harmful to people living in poverty and the community at large. (source: <https://www.cohsf.org/Punishing.pdf>)

Instead of pursuing productive solutions like helping vehicles get registered, providing free, sanitary methods for grey water disposal, and providing more refuse services (all services that would be of benefit to all community members), you have chosen to tow, ticket, and hand out misdemeanors to people who are financially unable to comply with this policy - directly creating more unsheltered homelessness. As with the reactive and unresearched Camping Services and Standards Ordinance- this anti-parking ordinance is not a novel idea where we will have to wait to see if it is effective. We can already see the direct impacts of policy like this both locally, and on a state level. Locally, as a result of SCPD's recent "Operation Westside Story" at least one person found themselves in new unsheltered homelessness- an elderly, disabled person who had his car towed. He was able to connect with someone who could share his story and attempt to help him, but how many weren't? (source: <https://www.facebook.com/groups/thegreatsharecollective/posts/959417751581772>)

On a state level, a report from The Western Center on Law and Poverty found that "for people who are low income the consequences of a towed vehicle can be devastating. The cost to retrieve a car after a city-ordered tow is out of reach for many. For many Californians, a vehicle tow means the permanent loss of their car and, along with it, the loss of employment, access to education and medical care, and, for some, their only shelter. Nonetheless, local governments throughout California regularly tow vehicles for relatively minor offenses: outstanding parking tickets, lapsed vehicle registration, and remaining parked in one place for more than 72 hours.

Despite constitutional limits on the government's ability to seize a vehicle in these non-emergency situations, cities routinely tow legally parked cars that pose no threat to public safety."

Also, "cities are losing money on tows, especially when the reason for the tow is someone's inability to pay government fines and fees. Towed vehicles sold at lien sale in San Diego generally accrue over \$3,000 in fees and fines, but the average sale price for these vehicles is about \$565. When governments target people of color and low-income people for minor violations, when they fund their programs by charging unreasonable fines and fees for these minor violations, and when they punish people because they can't afford to pay, it is unconstitutional, unfair, and ultimately, counterproductive." (source: <https://wclp.org/wp-content/uploads/2019/03/TowedIntoDebt.Report.pdf>)

Additionally, this ordinance ignores many of the recommendations of the Community Advisory on Homelessness Council (linked in the agenda packet) including this vital piece:

"Of paramount importance, the City must maintain connection with State, County and regional stakeholders, especially the homeless community, on policy considerations and ensure community engagement remains a top priority."

This ordinance is unresearched, counterproductive, and unacceptable! Do not allow it to become policy! Thank you for doing the right thing,

Jennifer

**Sent:** Sunday, October 17, 2021 10:09 AM  
**To:** City Council  
**Subject:** RV camping

Dear City Council members,

Please stop turning our public streets into RV camping grounds for the houseless.  
Please direct the RV's to RV camping grounds or State Parks or Federal Parks or BLM land where they are welcomed.

Please especially start taking care of our local green areas that tax paying residents enjoy . Particularly Antonellis Pond which has taken so much abuse from the houseless individuals in the past 10 years plus because they are continually allowed to use the streets as a private RV park without the facilities. And no, don't give them the facilities, we want Antonellis back!

In the past 9 years that I have walked to Antonellis pond from my westside home, I have witnessed people who are living in their vehicles defecate on the grounds that surround the UCSC building at 2300 Delaware and all around Antonell's pond in the bushes. I have found needles on the paths and a drug den set up beneath the railroad bridge that spans Antonell's Pond. Some live peacefully but so many more do not and there are times that I have not felt safe walking at Antonellis.

The first thing that happens when the houseless pull up in RV's, Campers or cars along Delaware or Natural Bridges Drive or Shaffer Road is to pull out their trash. The trash is left for the city of Santa Cruz to pick up daily if they manage to get to it and if not it is not scattered into the environment. Why are the houseless not driving to the dump to pay for their trash removal? Why aren't the grants for the houseless being used to offset the expense of the houseless invasion of our town?

The RV's that are parked along Antonellis Pond dump their waste water in the storm drain that goes to the Ocean and they have also dumped their sewage water in the pond. Their generators are a noise nuisance. The RV's are rolling environmental health hazards. They belong in a RV camping grounds that actually has the hook ups they need.

Antonellis Pond is a wildlife sanctuary that supports wild birds, deer, coyotes, bobcats, mountain lions, foxes, ect. Protect them, they can't speak for themselves. Give them back their peace and safety. And give the residence a beautiful place to enjoy that isn't blighted by trash, human feces, loud generators, and RV campgrounds on the streets!

Enough is Enough, stop enabling them and give the residence back their green spaces .

Sincerely,  
Aethia Danforth

**Subject:** Over sized and Homeless Car Parking on City Streets

Dear City Council,

I own a house (222 Buena Vista Ave, Santa Cruz CA 95062) that I rent out. There is at this time signs stating that no one may park their car from May 15th through Sept 15th between the hours of 5pm and 9am unless they obtain a parking permit from the City of Santa Cruz. This ordinance was passed to allow for residents to park their vehicles when they come home from work such that tourists that generally park here during the day will leave and allow space for the residents who live on this street. Since most of the houses on this street have no garages or on site parking, allowing anyone to buy a permit and stay here is hardly fair to the residents who live here.

My question is are you going to take this into consideration when you make this ruling? I rent this house out and my tenants have told me that there has been an increase in the amount of people sleeping in their cars in the evening and over night. Making someone park from one to several blocks from their residence is hardly fair. I think that people who do not own or do not rent on this street should not be able to obtain parking permits to park on this street. Furthermore, since there is an increase in homeless parking I would like to see the No Parking signs without permit parking to be extended to year round so as to allow residents access to nearby parking.

If you would respond to this email and answer my questions I would greatly appreciate it.

Thank you,

Joy Weaver

**From:** Carole Mulford <carolemu.switch@gmail.com>  
**Sent:** Wednesday, October 06, 2021 3:10 PM  
**To:** City Council  
**Subject:** Support For RV Ordinance

Dear Mayor Donna Meyers, Vice Mayor Sonja Brunner, Councilmember Sandy Brown, Councilmember Justin Cummings, Councilmember Renee Golder, Councilmember Shebreh Kalantari-Johnson and Councilmember Martine Watkins:

I am writing to you to implore you to act to remove the health and safety violations on Mission Street Extension. I am witnessing on a daily basis illegal overnight parking, littering, drug dealing, public intoxication and people using the sidewalks as a toilet.

### ***My perspective:***

Over the last decade, I have been a member of a fitness center located on Mission Street Ext. We are a close community of Westside residents that share a passion for health, fitness and well-being as we live, shop and voted you into office. Our gym owners took every precaution, followed every required health and safety measure during the pandemic to keep us safe. When we were forced to close, we were given the equipment for free to keep our fitness until the gym was allowed to re-open. Our owner/coaches took extra measures and spent thousands of dollars on air filters, and extra sanitation. Needless to say, I felt very safe and believed my well-being was of utmost concern from my coaches. I'm a senior citizen, so even more safety protocols were followed for me. I am grateful the gym is still operating. According to Councilwoman Anna Eshoo, 40% of the fitness industry closed permanently due to the pandemic. It's a daily struggle in this pandemic era for many businesses to keep afloat (especially for those in the business of health and fitness). Pandemic aside, our gym needs your immediate help.

Luckily, the gym may have survived the pandemic, but today, I am witnessing an alarming concern that impacts my safety going to and from the gym: it's what's happening outside on the street. I used to jog on the sidewalk to warm up before class. Those days are gone because of the illegal overnight RV campers that have encroached on the sidewalk. They leave mounds of trash, and broken greasy vehicle parts. One day the odor from one such RV was sadly that of a dead person. I witnessed the coroner come **twice** this summer.

Every day I see the garbage from the night of partying left in the street. Whatever food was eaten, scraps and trash are left knee high in places and I'm sure a gift to the rats and other hungry prey. I watch people smoke and flick their ashes in the dry brush. I see other vehicles drive over to visit both the RV's and those camping on the Caltrans side of the fence. They stay for a few minutes, sometimes longer to exchange "something". They know each other and they know nothing will happen if they stay illegally parked. I have talked with the police officers on many occasions and they say "our hands are tied" meaning we can't do anything to keep them from illegal parking. Your officers have been very professional and polite yet leave without being able to do anything. One day police officers from Santa Clara came ( I thought to help) but instead they were handing out recruitment flyers. I sure hope we can keep police officers from leaving to work in neighboring cities.

I have been screamed at and cursed at by a woman living on the street. Others have seen her throw rocks, excrement and food. I only witnessed the yelling but your police reports will tell more. Just today, a client from the 6am class had her car window smashed and her wallet and phone stolen!

Now that school is back, I watch the children from Pacific Collegiate School on their lunch break walking to 7/11. They walk in the middle of the street because the sidewalks aren't passable (trash and human waste). This scares me and should concern you too as you've been notified- check your own police logs- this is not a safe place for students to walk!

***To the homeless advocates:*** I too have deep compassion for the unhoused, however leaving them to die in their cars or alone on the streets with zero sanitation is not compassionate at all- its killing them and harming the rest of us. The garbage and illegal activities hurt everyone. I also care about those struggling to survive and see Mission Street a nomads land of illegal, unsafe activity - a haven for those that don't want the services you offer but prefer a lifestyle that flies in the face of law obeying citizens. Please work with Caltrans and other agencies to remove the debris and criminal behavior (stolen bikes, drug deals, prostitution, theft) and keep the ocean safe from the trash and pollution by not allowing RV campers and the dilapidated campsites.

I could provide hundreds of signatures if you need them but you can also just visit yourself. See with your own eyes and please read your police and coroner's reports. This is unacceptable behavior, a toxic waste site, and a dangerous place for children to walk. You have mentally not well people left alone that are harming themselves and potentially others.

***Please accept the recommendations from the last Staff Report for a RV Ordinance written by councilmembers with community input. As elected officials you have the power to act and help prevent more tragedy.***

Respectfully,

Carole Mulford, Santa Cruz County Office of Education, Child Development Department Manager (retired)

ORDINANCE NO. 2021- AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF SANTA CRUZ AMENDING TITLE 10 "VEHICLES AND TRAFFIC" AT CHAPTER 10.04 "DEFINITIONS" AND CHAPTER 10.40 "STOPPING, STANDING AND PARKING" AND CHAPTER 10.41 "CITYWIDE PARKING PERMIT" PERTAINING TO THE PARKING OF OVERSIZED VEHICLES. AND CHAPTER 16.19 "STORM WATER AND URBAN RUNOFF POLLUTION CONTROL" AND AMEND SECTION 16.19.070 "DISCHARGE OF SEWAGE PROHIBITED"

Dear Mayor & Council Members,

I fully support the ordinance amendments and efforts to control the problems associated with the oversize vehicle parking in Santa Cruz, however, there is one aspect to the proposed amendments which seems problematic as follows:

**(b) Oversized vehicle does not include pickup trucks, vans, or sport utility vehicles, which that are less than **twenty-five feet in length and eight feet in height.**"**

Sprinter Vans have become very popular. In some respects, they are replacing pickup trucks as utility vehicles. The vans typically come in two sizes 19 feet and 23 -24 feet. All of the vans are higher than 8 feet. The vans are used for commercial purposes, as utility vehicles by home owners and as camper vans. Many of the vans double as utility vehicles and weekend camper vehicles much like pickup trucks do. Some of the vans are over 20 feet in length, **all are over 8 feet in height.**

I can't see how one would be able to make a judgment call or enforce the ordinance as proposed with respect to the numerous Sprinter Vans (and the numbers are growing due to their popularity). If Sprinter Vans are swept up in the enforcement efforts, I imagine there will be some uncomfortable pushback due to unintended consequences. Sprinter Vans represent a considerable investment. The vans should be able to park on city streets. Constantly applying for permits seems problematic.

From my observation, the problems typically relate to older RV's and not with Sprinter Vans. In addition, I have observed older vans that are less the 20 feet in length and 8 feet in height camping overnight on the city streets along with pickup trucks with camper shells. I appears these vehicles would be exempt under the proposed ordinance illustrating how tricky it is to craft language around this issue.

Perhaps the language could exempt Sprinter Vans specifically.

**(b) Oversized vehicle does not include pickup trucks, vans, or sport utility vehicles, which that are less than twenty-five feet in length and eight feet in height.” The exception being Sprinter Vans which are more then eight feet in height or twenty feet in length.**

I recognize this is far from a perfect solution, however, it may serve to avoid an unintended issue while still addressing the vast majority of the problems associated the numerous RV's and campers parking in the neighborhoods.

Sincerely,

Michael Zelter

**Subject:** Overnight parking

I believe allowing oversized vehicles to park anywhere is making all our neighborhoods unsafe and ruining property values. There needs to be designated areas outside residential Areas for this. Unused govt land or parking lots in UCSC or Cabrillo overnight only or it becomes an eyesore with makeshift fences and accumulate junk, bicycles.

This only encourages more people to

Come here and adopt same lifestyle further devaluing our properties and making it unsafe for all. Our lenient policies do not support the citizens who contribute to making this a desirable place to live.

**Subject:** Oversize vehicles and sedans Delaware area Santa Cruz

Hello, I am a resident of Santa Cruz for over 40 years and I care about our community.

I am an avid bike rider and go through the Delaware and Santa Cruz Westside area over 5 times a week. During the early am and often in to the late evenings. I have seen so much ! Yes we do need to be compassionate but the situation is out of hand. RV waste, camping, trash, drug dealing, etc. Many vehicles staying long periods of time. Please start to enforce some standards it is not a save area. I have seen the 20 RVs that have been towed away in our landfill, there are many others that should not be on the road as well.

I have seen an RV leave the side of the road dragging a bathroom waste house as it pour out in to the street in front of me.

I was involved with others in the community for the Olive St. ( CVS) RV enforcement. That process went very well. The RV issue on Olive St. has improved a great deal and has almost stopped. I appreciated the city traffic efforts. Please continue.

Sincerely, Troy Mayers

Bay Street.

**Subject:** Homeless ness and RV's

HI CC

How about asking Newsome to open up areas of land and put in bathrooms and showers, Let him open up and work crews where like the parks the seniors get to camp free if they clean bathrooms etc. OR go out and have them plant trees where Newsome let our forest burn and blames it on the state. During the depression our state parks got built with people out of work and were put to work.

Ask Newsome that during winter months to open our local state parks that have camping spots and RV parking that have bathrooms and showers. But they must work and be able to pay for the parks garbage disposal and use of the parks. No freebies. If they are lawlessness and want to do drugs then they are out. Why should we want these homeless in our neighborhoods only to pick up their trash while we stare out our front window at the side of a giant RV? They need to be documented with an ID. That means they take out a permit to show who they are. Must be local people because if you allow this.....more will come from all over.

IF you made available such a place, it should be seniors and families first. They should not have to live next to people who do drugs and are lawlessness.

Each city should of do a growth assessment in terms of housing needed now and in the future. Don't make Santa Cruz become building on top of itself. Let it grow outward. Oh but wait..... wheres the water? have you planned for how much more water is needed for population growth and water usage? It seems that nothing is planned for the future but just for emergencies.

**Sent:** Wednesday, September 29, 2021 5:12 PM  
**To:** City Council  
**Subject:** Oversized vehicle parking

I'm writing in regard to the recent hearings on an oversized vehicle parking ordinance. I strongly support stricter regulation/enforcement regarding these types of vehicles and their parking on city streets. I live at the corner of Grant and Emmeline and there have been several times in the 2 years that I've lived here that someone living in an RV has parked directly in front of my house. On one occasion the person had a noisy compressor that they operated 24 hours a day. Law enforcement has always been ultimately successful in moving these vehicles (either under their own steam or with the help of a tow truck). But it would be really nice if took less than 4 or 5 days for that to happen.

Another problem spot is along May Ave, where it meets up with Water. I used to walk my dog every day along that route to go to Starbucks. But there were always 1 - 5 RVs parked in that area and after quite a few unpleasant run-ins with the residents of the campers, not to mention the smell and the trash in the surroundings, I stopped going to Starbucks and instead chose a different morning route. Just an example of the way this kind of thing restricts the life of people in the neighborhood and impacts business foot traffic.

Thanks,  
Dana Immertreu

**Subject:** Stop the overnight parking ban

Dear council members,

Today I am writing to urge the council not to pass the RV overnight parking ban for which discussion will resume on Oct. 26. Bans such as this directly target people without stable homes in our community. Instead of targeting those who are already suffering so much as a result of our skyrocketing rent, we must invest in community resources and affordable housing that will help people access stable work and living situations. An ordinance such as this will only increase inequity in our community. Please keep these concerns in mind as you reopen this discussion.

Sincerely,  
Hannah

**Sent:** Thursday, October 21, 2021 1:45 PM  
**To:** City Council  
**Subject:** Vote NO on Oversized Vehicle Ordinance

Dear Council,

The proposed Oversized Vehicles Ordinance (OVO) is unresearched, counterproductive, and unacceptable.

At the September 21, 2021 council meeting, we learned that the goal of OVO is to give police enhanced tools to move vehicles along. According to the City Attorney, enforcing current environmental and nuisance laws is ineffectual. He said, just writing a citation, even if it's a misdemeanor, even if you could arrest someone and take them into custody, the way the court process works these days, they would be right back out on the street within an hour and go back to a parked RV and continue to engage in the conduct we're trying to address. It seems that instead of acknowledging that ticketing, towing, and writing misdemeanors are not an effective way of managing homelessness (as supported by decades of research), the city will double down and create a new tool to incarcerate people who cannot afford to comply with the OVO, all while not significantly providing resources that would help people to avoid engaging in so-called nuisance behaviors. Many of these nuisance behaviors are acts of survival by our marginalized neighbors who have been abandoned by the city. The repeated reference to the need to address health and safety concerns, without acknowledging that the health and safety of people sleeping in vehicles for survival is severely impacted by removing their shelter is disgusting and clearly in opposition with Health In All Policies.

The proposed solution, as outlined by Mills, is that OVO will allow the city to cite misdemeanor infractions, take an individual into custody, have the city attorney prosecute the individual, levy fines on a person living in poverty, and then tow their vehicle when they are unable to comply. Additionally, Andy Mills disclosed that towing is incredibly resource intensive and expensive and that the city has had to create a brand new tow-yard in order to accommodate the RVs and vehicles seized during Operation Westside Story. Even more money and resources will be spent fighting lawsuits that challenge the constitutionality of OVO and appealing to the coastal commission, who called the last version of ordinance onerous, drastic and draconian. I am outraged that city resources will be used to create more unsheltered homelessness and deepen cycles of poverty. Those very same city resources should be used for productive solutions that use city property for safe sleeping programs, help vehicles get registered, provide free sanitary methods for grey water disposal, and provide more refuse services (all services that would be of benefit to all community members).

The bottom line is people have nowhere else to go. It is not enough to include vague mention of safe sleeping programs while prioritizing criminalization of our most vulnerable neighbors. The Affiliated Faith Community (AFC) has been operating its SafeSpaces Parking Program for years and it is currently the ONLY resource being offered when police force people to move their vehicles under threat of ticketing and misdemeanors. They are required by law to provide a safe place to sleep when they displace someone from their survival shelter; however, as program director, Reverend Joseph Jacobs, shared at the city council meeting a month ago: Despite this reliance on referral to AFC (who operates 41 overnight parking spaces), the city has \*never\* funded their services and, recently, even refused to financially support expansion. Instead, these programs have been mentioned only as an afterthought, despite being proven to provide stability and bolster the ability to transition to housing, in addition to offering a more dignified survival option to being unsheltered. The city continues to be disingenuous about their support of existing programs and there are simply not enough alternative shelters and housing available.

We need action that prioritizes listening to and coordinating with experts: our houseless community, community advocates and service providers, researchers who study houselessness, and the County Health and Human Service Departments.

We demand services without the threat of criminalization! Do not allow OVO to become policy!

Thank you,  
Christian Weihrauch

Dear Commissioners –

I am a resident of the City of Santa Cruz and in support of the City's Oversized Vehicle Ordinance. I live in De Anza Mobile Home Park. Many of the occupants of the oversize vehicles cause significant damages to our beautiful and vulnerable area. The daily trash and human waste in the area would be unacceptable to anyone whose home is near these vehicles. They start fires in the wooded areas, defecating in Natural Bridges, Antonelli and Wilder woodland and beaches ( it's disgusting to walk through and see it and smell it).

Please help the City of Santa Cruz and its residents to better manage the Oversized Vehicles. Those who would argue otherwise probably do not live near where the vehicles park. And there is no other way to get into or out of this Park without going through the long line of oversized vehicles and the trash.

Thank you for your consideration.

Mari Tustin

Dear Coastal Commission:

I am sure you are aware, many of us on Delaware Avenue deal with a continuous flow of RV offenders who continue to not follow the parking rules. Not only is it illegal, but the sanitation issues it presents is alarming. We have personally seen RV owners put their black water tubing into the drains which spews human waste into the ocean.

Recently, an attempted assault was reported in our area and the Seymour Marine Lab. Our residents in De Anza Mobile Home Park currently avoid walking along Delaware because of the trash, human waste and potential for physical harm. Please help to enforce the law pertaining to having the RV dwellers live in another environment that is not polluting our ocean and neighborhoods.

Sincerely,

Lorraine & Gary Smith

The Santa Cruz neighborhood called the Lower Westside has been significantly impacted by the consequences of unsanctioned large vehicle camping on our streets. It's not uncommon to see discarded water bottles full of urine along with other debris, including feces left along the curbs from OVOs in our area. I've heard that the org called "Santa Cruz Cares" and local ACLU have initiated an appeal for the OVO that was recently passed by the Santa Cruz city council with wide community support. Residents in this area, including myself do not want to go unheard. We support the OVO as it was recently passed.

Another important aspect of an overnight parking ordinance is **enforcing it along the other existing ordinances**. For example, the street that runs along the back side of Lighthouse Field State Park (Pelton Ave) has signage that prohibits overnight parking but it's rarely enforced which undermines the intention and effort that the city has put forth. A similar parking enforcement issue exists in general though. Cars park facing oncoming traffic, park in ways that block sidewalks forcing pedestrians onto the street, and encroach on driveway aprons frequently. All three of these are violations of the California Vehicle Code yet, go consistently unenforced throughout the Santa Cruz Westside community. Wouldn't it be better to enforce the rules or change them rather than ignore them?

I support the OVO provisions that were passed by the Santa Cruz city staff and trust that they will be enforced

**Subject:** Unregulated vehicle camping on Delaware Ave and other streets in Santa Cruz  
**Date:** Friday, July 1, 2022 9:41:39 AM

---

To Whom It May Concern,

Unregulated vehicle camping on Delaware Ave, Santa Cruz, impacts the safety and sanitation of this local area. Abandoned vehicles, wet garbage and broken debris ( Furniture, automobile body parts, used tires, clothing) as well as effluent from leaking oil, antifreeze and human excrement flowing into the gutters and storm drains as well as into Antonelli pond create environmental and public health and safety hazards. Some individuals exhibit bizarre behaviors; partially clothed, “dancing” In the street and responding to internal stimuli, shouting as I drive by or walk by in the daylight hours makes. It feels unsafe to be on the street. Last week, a man appearing to be in his mid to late 50’s slept overnight on the bus stop bench at the entrance to De Anza MHP and deposited a very large bowel movement next to the bench which remained there for approximately 36 hours. These behaviors make it impossible for residents as well as employees and students at the various agencies next door to safely see that public resource. Individuals on the streets (homeless, mentally ill, head injured and drug abusing (and for some, a combination of many or all of the above) are some of our most vulnerable members of society, ripe for physical and sexual abuse in unsafe places.

Please do not allow this unregulated camping to continue.

There are designated “safe camping and sleeping “ places and folks need to be redirected to use these resources, enforcing restrictions for unregulated camping in RVs, cars, trailers and tents.

Thank you,

Beth Goldfaden

Resident of De Anza MHP

To the Coastal Commission:

As a resident of Santa Cruz, I write in support of the Oversized Vehicle Ordinance. Living here at the DeAnza Residential Community, on the coast between Natural Bridges State Park and the UCSC natural reserves, I am specifically concerned about the continuation of—let alone escalation of—unregulated vehicle camping on Delaware Avenue, in what might otherwise be a perfectly idyllic setting. Everyone we know considers it unsafe and ill-advised to have any such vehicles camped here. The threats to residents and to the already fragile environment are numerous. Along with personal safety (having to pass through the messy and intimidating horde of oversized vehicles in order to go anywhere at all—bad enough in a car, but becoming almost unfaceable on foot or bicycle for those of us who are older, vulnerable, female), there is the filth and litter left behind, and the very real risk of fires from camp-stoves or simple carelessness with matches or cigarettes by those transients who may not be mentally sound or sober or concerned for others' property.

Please, *please* help the City find some healthy, practicable, innovative long-term solutions for this gargantuan problem in Santa Cruz, by finding or creating space elsewhere than city streets for oversized vehicles (and indeed smaller tents and shanties) that won't seriously impact both residents and the precious beauty of this land and its ecosystems in our care.

Respectfully yours,

Christie Cochrell  
2395 Delaware Ave., Spc. 78

**Date:** Thursday, July 7, 2022 2:51:42 PM

---

Dear Coastal Commission:

I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the staff's recommendation.

The lower westside neighborhoods have been significantly impacted by issues related to unregulated overnight vehicle camping, which has been occurring for years. The neighborhoods around Delaware, Swanton, and Natural Bridges have been the most severely impacted. The neighborhood group, Westside Neighbors, that I helped organize, has been working for several years with the city and county to try to encourage the city/county to create safe spaces parking for people living in their vehicles out of necessity, with sanitation and social services. This effort has been challenging because of the different jurisdictions, but as a result of the passage of the OVO, the city has committed to creating safe spaces parking. So far, three tiers of parking have been created. Other funding has also been allocated to the Association of Faith Communities (AFC) including at this last city council meeting. These funds will permit the AFC to expand their program and services. The city is also expanding theirs.

>

If the ACLU/Santa Cruz Cares appeals are upheld at this hearing, there will be no reason for the city to expend the financing necessary to fund these programs, since there will be no requirement for people to move to those spaces. People needing assistance will ultimately hurt by this, as will the lower westside neighborhoods.

I support the city's OVO permit parking and safe spaces programs. Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. The time is long overdue to allow Santa Cruz to have an ordinance put in place.

Thank you for supporting the no substantial issue finding and allowing the city's ordinance to proceed.

**Date:** Thursday, July 7, 2022 12:40:14 PM

---

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Our personal concern is the environmental issues which affect the ocean from unmoving vehicles. Please help Santa Cruz remove this threat to our ocean and coast.

Thank you for your consideration -

Dear Coastal Commission:

I am a resident in the City of Santa Cruz and I live by the far west side of town where large RVs park for days on end, especially along Delaware Avenue, in the coastal zone. This continues to pose an environmental and human health hazard but importantly this prevents all the other California residents who want to visit the coast from having access to these parking spots for themselves. For this reason, I ask that you reject the appeal of the Oversized Vehicle Parking Ordinance.

The OVO does not substantially reduce coastal access and will actually improve access in areas like Delaware Avenue where streetside parking areas are continuously being filled with unmoving oversized vehicles that prevent others from taking a turn parking there. The restrictions in overnight parking will also help mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards as well as reduce littering, drug use, and other behaviors that are impacting other residents who wish to access the coast.

Santa Cruz is expanding its safe parking programs with services for those living in their vehicles out of necessity. Twenty six other coastal communities have passed similar oversized vehicle ordinances. The report does not identify ANY reason why Santa Cruz cannot have these types of parking rules, like other coastal cities.

Thank you for your consideration.

George H Leonard  
Westside Santa Cruz resident

Dear Commissioners,

I am deeply concerned about the punitive response actions proposed against folks who have resorted to living in their vehicles in our community. For many houseless people it represents a safe and relatively comfortable option when there are no options available to them here. There are no shelter spaces available, no affordable housing options and no temporary encampment spaces that are stable for the hundreds, if not thousands of houseless folks in our county.

I urgently ask you to stop this ordinance from being implemented in whatever way is in your power. Thank you for your support in this matter.

Sincerely,  
Nita Hertel

Dear Coastal Commissioners,

I am writing to you today to say that I support the appeals of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California.

This ordinance is incredibly harmful to our unhoused neighbors, makes it impossible for homeowners in the Coastal Zone to own an RV or cargo van, restricts public access and recreational access to the coast for low-income residents, violates the spirit of the City's Housing Element and Sensitive Coastal Resource Areas, and allows a backdoor to development in the Coastal Zone with no accountability.

Please find that the Oversized Vehicle Ordinance has a substantial issue.

Respectfully,  
Laura Chatham

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. Please reject the appeal of the Oversized Vehicle Parking Ordinance.

I have lived here for over 15 years and have been shocked by the amount of RV's allowed to park in our city overnight. This reduces access to public parking spots in order to enjoy these coastal spots. There is a direct link in between the amount of RV overnight parking and how much it drains the resources of our police and fire personnel. There is also a direct link to the amount of garbage that is left behind.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

Dear Coastal Commissioners,

I am writing to you in support of the appeal of the Oversized Vehicle Ordinance (OVO) by Santa Cruz Cares, the ACLU, and Disability Rights California. I believe there are substantial issues with this ordinance.

The OVO is incredibly harmful to our unhoused neighbors. There is no evidence to suggest that it will alleviate the high rates of houselessness in this area and instead criminalizes those living in their vehicles. It is neither just nor humane.

Please find that the Oversized Vehicle Ordinance has a substantial issue.

Sincerely,  
Alex

Dear Coastal Commission:

I'm a West Cliff Drive coastal resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access, and will actually improve access to a greater number of vehicles in impacted areas throughout our community by giving others a chance to temporarily park in spaces previously monopolized by oversized vehicles. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards. I can testify first hand that often times the very limited street parking that is shared between residents, guests, and vacationers is frequently occupied by oversized vehicles that outstay their allowed occupation of any given street parking space in my neighborhood. I have personally called the City's Vehicle Abatement hotline over a dozen times thus far this calendar year, and we are only at the beginning of the traditionally busy Summer season. I have also contacted City Environmental Services twice to report illegal dumping activity that I have witnessed first hand related to oversized vehicles. Passage of the OVO would offer both residents and visitors alike a respite from the near constant vigilance required of those of us that enjoy living and recreating in the Coastal Zone.

As our community is grappling with the deleterious effects of excessive, oversized vehicle parking, we are simultaneously expanding our safe parking programs with services for those living in their vehicles. In this regard, Santa Cruz is doing more than what could reasonably be considered a city's "fair share" to mitigate the challenges being faced by coastal communities throughout the state. It has been brought to my attention that 26 other coastal communities have passed similar oversized vehicle ordinances, and I see no reason why Santa Cruz should be an exception.

Thank you for your consideration of my opinion.

Dear Coastal Commissioners,

I strongly support the appeals of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California.

This ordinance is incredibly harmful to many segments of our community, and the community as a whole. Not just the target of the unhoused, but it makes it impossible for homeowners in the Coastal Zone to own an RV or cargo van, restricts public access and recreational access to the coast for low-income residents, violates the spirit of the City's Housing Element and Sensitive Coastal Resource Areas, and allows a backdoor to development in the Coastal Zone with no accountability.

It is hard enough in our area for contractors, landscapers, anyone who works for any business that uses a truck to get by due to ridiculously high housing costs - now they will be unable to even work if they don't have the luxury of off-street parking! This is outrageous.

Please find that the Oversized Vehicle Ordinance has a substantial issue.

Regards

Desiree Sanchez

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz, and am simply worn down and disgusted by the increased level of environmental degradation, trash, and human waste that has become so prevalent in our community in the mixed residential areas of our city due to the out of control illegal overnight/prolonged for weeks and weeks parking of RVs on our city streets. While I appreciate the need to maintain coastal access to all citizens, this is not at all the pressing issue with the RV encampments. If the Coastal Commission actually cares about preserving the quality of our coastal environment, then it should not protect the perceived rights of RV encampments in the coastal zone – all you need to do is take a short tour of the areas and you will see this is not about coastal access. In light of this, I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Dear Coastal Commissioners,

I am writing to you today to say that I support the appeals of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California.

This ordinance is incredibly harmful. First off, it targets and criminalizes our unhoused neighbors. Sometimes living in a vehicle is the safest and best option for some. Other solutions put forth in the ordinance such as adding more safe parking spaces are vaguely written and insufficient.

This ordinance also makes it impossible for homeowners in the Coastal Zone to own an RV or cargo van, restricts public access and recreational access to the coast for low-income residents, violates the spirit of the City's Housing Element and Sensitive Coastal Resource Areas, and allows a backdoor to development in the Coastal Zone with no accountability.

Please find that the Oversized Vehicle Ordinance has a substantial issue.

Thank you,

Hello,

I live in my van in Santa Cruz and work as a social worker at a local non profit. I spend my days serving and advocating on behalf of people experiencing homelessness, while understanding some of the stressors through my own experiences being unhoused.

I am very concerned that the new oversized vehicle ordinance will add further difficulties to the lives those simply trying our best to survive.

Please find substantial issue with this ordinance, as it unjustly denies dignity and safety for those oppressed by race and class.

Thank you for acting for the good of all our community, regardless of property ownership.

In hope,

Calia Kammer

I am 72 years old and a retiree living in De Anza Park, a 55+ residential community at the corner of Delaware and Shaffer. I am bewildered that our elderly community continues to be targeted, arguably discriminated against, as a dumping ground for the town's unfortunate homeless population, which the city council and now the coastal commission seems to think it undesirable or unsafe to relocate elsewhere—to other residential neighborhoods, or near schools, or downtown, or along the waterfront (or heaven forbid, close to the Boardwalk and access to public restrooms). When my wife and I retired to De Anza five years ago, we could walk safely and unaccosted to nearby Natural Bridges or bike along Delaware to the stores. In recent years we've given up walking there, and I'm on the point of giving up biking there. The reason for this isn't just the unsightliness created by the RVs along Delaware (garbage and used tires and other debris, even an old sofa, along the sidewalk and grass verge) and the occasional noxious smells and sights (recently the odor of urine for several days around one vehicle, a pile of feces-covered toilet paper in the bike lane) or the obstacles barring access to the park entrances and exits closest to our community (on separate occasions in the past month, a car attached to giant trailer blocking two entrances to a footpath, a tent blocking a path, a barbecue—surely a fire hazard—blocking another entrance). The main reason is that we have been made to feel unsafe, having to go through what is essentially a homeless camp (albeit fragmented)—one lacking supervision, sanitation, and toilet facilities—in order to pass from our home to the larger community or to the local parks. We haven't yet been physically attacked, and it's been a couple of years since a dazed homeless man approached me to threaten to “fucking kill” me, but I have continued to feel more than a little intimidated by the homeless in their RVs on Delaware—in the last month, for example, when passing two unkempt young men with an unleashed dog, when being chased on my bike by a middle-aged but crazed woman who yelled at me to “stop and talk,” and when a stocky middle-aged man stood in the bike lane and yelled, “I'm not gonna get out of your way.” All very minor, you may say, but you too would find it unsettling not to be able to walk or ride in your neighborhood without being accosted.

I don't know whether the homeless residents along Delaware are there because they have permits or are parking illegally, but I have to say that if you must assign them to our neighborhood, please, in fairness, also assign them evenly across the whole Santa Cruz community. The resulting widespread public outcry might then prompt the powers that be to come up with sensible ways to help these unfortunate people.

Sincerely,
John Feneron

Dear Coastal Commission: I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the recommendation. I support the city's OVO permit parking and safe spaces programs. Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. The time is long overdue to allow Santa Cruz to have an ordinance put in place. Thank you for supporting the no substantial issue finding.

Date: Thursday, July 7, 2022 2:51:42 PM

Dear Coastal Commission:

I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the staff's recommendation.

The lower westside neighborhoods have been significantly impacted by issues related to unregulated overnight vehicle camping, which has been occurring for years. The neighborhoods around Delaware, Swanton, and Natural Bridges have been the most severely impacted. The neighborhood group, Westside Neighbors, that I helped organize, has been working for several years with the city and county to try to encourage the city/county to create safe spaces parking for people living in their vehicles out of necessity, with sanitation and social services. This effort has been challenging because of the different jurisdictions, but as a result of the passage of the OVO, the city has committed to creating safe spaces parking. So far, three tiers of parking have been created. Other funding has also been allocated to the Association of Faith Communities (AFC) including at this last city council meeting. These funds will permit the AFC to expand their program and services. The city is also expanding theirs.

>

If the ACLU/Santa Cruz Cares appeals are upheld at this hearing, there will be no reason for the city to expend the financing necessary to fund these programs, since there will be no requirement for people to move to those spaces. People needing assistance will ultimately hurt by this, as will the lower westside neighborhoods.

I support the city's OVO permit parking and safe spaces programs. Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. The time is long overdue to allow Santa Cruz to have an ordinance put in place.

Thank you for supporting the no substantial issue finding and allowing the city's ordinance to proceed.

Dear Coastal Commission,

I am a Resident of Santa Cruz and support the City of Santa Cruz's Oversized Vehicle Ordinance.

Unfortunately, many of the occupants of Oversize Vehicles cause significant damage to our beautiful coast: examples are starting fires in wooded areas, defecating in Natural Bridges woodlands and beaches, leaving garbage. Therefore, I am asking for your help to aid the City of Santa Cruz in managing Oversized Vehicles.

Attached are some pictures showing how dangerous it is for bikers since the RV take over half the path.

Dear Coastal Commission,

I live just off Delaware Avenue in Santa Cruz, and I am very concerned about all of the motorhomes that are parked along Delaware that people are living in and camping around. There are no facilities available to them, so human, drug, food and other waste ends up on the street and eventually goes down Moore Creek to Natural Bridges beach. When there were just a couple of these oversized vehicles, I used to walk with a trash bag and fill it by the time I got to Natural Bridges. Now I could fill it at just one camp site along the road, but I would not want to deal with the human feces.

It is getting harder and harder to bring families to Natural Bridges and for others like me to walk along Delaware to get there. One, because there is almost no parking on Delaware because of the number of camping vehicles and two, because many of them have dogs that are not friendly or people who yell at each other.

I am often afraid to walk by. This road is just not set up for camping and the vehicles that are permanently parked here are too dense. There is a lot of drug and alcohol use, and noise into the night because the occupants often sit outside at night. Also, they sometimes build campfires, which is pretty scary given our lack of rain. The camping also has a negative impact on the natural resources that the State Park is trying to protect.

Given the above, I ask you to deny the appeals that have been put before you to the City's Oversized Vehicle Ordinance. I support the work the City of Santa Cruz has done to try to deal with this problem and I want to give them the authority to do more. It will be a long process to deal with an untenable situation, but a lot of folks are working hard to come up with solutions.

I appreciate your careful attention to this difficult matter.

Thank you,

To whom it may concern,

As a UCSC student, activist, lifelong Santa Cruz resident, and someone with a safe and decent place to live, I ask you to uphold the ACLU and Santa Cruz Cares appeal against the Oversized Vehicle Ordinance. Homelessness is a hellish experience and we all need to take steps to reduce the harm experienced by its victims while we rush to solve our housing crisis. That said, OVO is not the right approach. OVO is punitive, draconian and the opposite of what we need in order to help those living in vehicles. I hope you agree and act to help us take steps towards introducing real meaningful harm reduction to help the people who need it most.

Sincerely,
Bodie Shargel

Subject: Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)
Date: Friday, July 8, 2022 2:08:16 PM

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance.

There are 26 other coastal communities who have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

I used to like to ride my bike or walk my dog on Delaware Ave and go into the rear entrance of Natural Bridges, or to the Marine Lab or walk around Antonelli Pond. I like to watch the birds, butterflies, squirrels, foxes, skunks and other wildlife that live at this beautiful State Beach that we are so fortunate to have in Santa Cruz. I no longer like to do this. There are so many vehicles, oversized and sedan types, that are parked on Delaware Ave. The owners of such vehicles are using this part of Delaware as their "garages", their trash cans, their bathrooms, and their meeting places for prostitution and drug activity. I have personally witnessed at least one of these "owners" using a bush near a trail in Natural Bridges as a bathroom, urinating and defecating under the bush. I have also seen piles of vomit near these trails. I have seen needles. This is disgusting and I have seen tourists turn around as I have and leave to explore a cleaner and safer environment. In addition to that, one can easily observe that some vehicle owners "fix" their vehicles by pouring liquids from their vehicles into the nearby area. One must know that these liquids coming from a vehicle are toxic!

All of these issues are unacceptable to our city, our community, and the wildlife that State Parks are supposedly protecting from harmful environmental activities.

Santa Cruz is providing places for the homeless and their vehicles. There is a fine line between helping and enabling. The OVO is a sound, fair ordinance for both the folks who need a place to park and for the community that lives in this area. Let's not enable the owners of vehicles with their destructive behaviors, to themselves, to Nature, and to our beautiful city.

For long time residents, such as myself, who have appreciated the beauty of Santa Cruz for decades, having an Ordinance for Oversized Vehicle is long overdue.

Please support the no substantial issue finding and reject the appeal regarding the OVO.

Thank you for your time and consideration of this important matter.

Dear Coastal Commissioners,

I am writing to you today to say that I support the appeals of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California.

This ordinance is incredibly harmful to our unhoused neighbors, makes it impossible for homeowners in the Coastal Zone to own an RV or cargo van, restricts public access and recreational access to the coast for low-income residents, violates the spirit of the City's Housing Element and Sensitive Coastal Resource Areas, and allows a backdoor to development in the Coastal Zone with no accountability.

Please find that the Oversized Vehicle Ordinance has a substantial issue.

Thank you,
Nicole Moreira

Subject: Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)
Date: Friday, July 8, 2022 1:49:07 PM

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you strongly reject the appeal of the Oversized Vehicle Parking Ordinance. The OVPO will increase Coastal Access for many more people. It will NOT reduce coastal access, as it will allow more cars access. A number of other coastal communities have passed similar oversized vehicle ordinances. Why would Santa Cruz be excluded from being able to protect its coastal access to more people?

There is broad support for this ordinance among Santa Cruz residents, and very few oppose it.

In our neighborhood, these oversized vehicles frequently have out of state license plates, are large and expensive appearing, and people are clearly here vacationing at the beach. They are not helping our economy by spending money on motels or hotels or on meals. They cook in these large RVs and watch their large TVs at night with generators on top making significant noise in front of our home. This should not be. How do I know this? Several of them have had advertisements on them advertising, " rent this vehicle to see the country". They stay for several, or more days and take up spaces our local and visiting surfers would normally be able to use when they go surfing here. That is a shame.

Please do the right thing and keep parking restrictions in place. Thank you.

Date: Friday, July 8, 2022 1:46:45 PM

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance.

Owning such a vehicle means taking on the responsibility to follow rules that Santa Cruz residents and visitors have always had to follow....either paying for storage when not on the road, or entering an agreement with a park or private camping site to live in the vehicle.

The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration -

Subject: PUBLIC COMMENT on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)
Date: Friday, July 8, 2022 1:45:00 PM

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I am asking you to reject the appeal of the Oversized Vehicle Parking Ordinance. Early one evening, last summer, my teenage daughters witnessed an RV fire close to Natural Bridges State Park where they had been skateboarding with friends. Luckily they had their cell phones and quickly called 911. They then realized they were standing right downwind of the toxic smoke that the RV was emitting and quickly moved further away in case anything might also explode (like a propane tank or other flammable items). Fortunately the fire department arrived quickly and the burning RV was put out before it could spread to the surrounding dry areas. I am hopeful that the restrictions in overnight parking will reduce the fire service calls caused by dangerous, illicit nighttime fires, barbecues and other environmental hazards. I am also hopeful teenagers will not be put in situations like my daughters found themselves in, while they were outside just trying to have some fun. I would also wonder if this would not help free up police times as calls like this might be reduced. The Oversized Vehicle Parking Ordinance does not substantially reduce coastal access and will improve access in areas where state beach parking lots and nearby streets are often filled with unmoving oversized vehicles preventing others from taking a turn parking there. I would also like to note that many of these vehicles that are parked for lengthy times on the streets, end up leaving lots of debris and garbage around them and also some of them are very old and at times appear to be leaking fluids, which eventually end up in the storm drains. I also wonder where these vehicles are dumping their sewage?

We do not have neighborhood electrical needs, waste disposal or garbage disposal for permanent RV dwellers in neighborhoods. There is a reason that the county has designated RV parks and camping areas for people to stay, where there are appropriate electrical, sewage and waste disposal systems.

It seems like the Coastal Commission places Santa Cruz under a different set of rules than other coastal communities, as 26 other coastal communities have already passed similar oversized vehicle ordinances, and yet the Coastal Commission is allowing an appeal of the Santa Cruz ordinance.. Why? The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities. I am wondering if it is the Coastal Commission's job to regulate social issues? Santa Cruz City staff have noted that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates".

Again, reject the appeal of the Oversized Vehicle Parking Ordinance and allow Santa Cruz to move forward with implementing the new ordinance.

Thank you for your consideration
Patty McNulty
Santa Cruz City resident

Subject: Reject the OVO ordinance!
Date: Friday, July 8, 2022 4:09:47 PM

Dear Coastal Commissioners,

I am writing to you today as a homeowner and a 50 year resident of Santa Cruz County to urge you to support the appeal of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California. I can only begin to imagine the incredible hardships our unhoused have to face simply to live day to day. We as a community need to relieve some of the pain and angst by providing safety and support services for those forced to use their vehicles as a home base.

This ordinance as written puts our unhoused neighbors in jeopardy of losing their rights to shelter, makes it impossible for homeowners in the Coastal Zone to own an RV or cargo van, restricts public access and recreational access to the coast for low-income residents, violates the spirit of the City's Housing Element and Sensitive Coastal Resource Areas, and allows a backdoor to development in the Coastal Zone with no accountability.

Please do NOT support the Oversized Vehicle Ordinance unless there are clear, accessible, free, and safe parking space or dwellings for ALL who must sleep in their vehicles, providing a substantial issue to validate the process!

Seeking compassion for our homeless.

Sheila Carrillo

From: [Serg Kagno](#)
To: CentralCoast@Coastal
Subject: Thu 7/14, 14a Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)
Date: Friday, July 8, 2022 3:16:06 PM

My name is Serg Kagno, and I live in a vehicle in the City of Santa Cruz. I spoke against the City's overnight oversized vehicle ban at all City Council meetings related to this issue and the City's Planning Commission meeting.

I ask that the Coastal Commission find that the City's RV night ban would raise a substantial issue in terms of the Coastal Act and LCP consistency finding.

The RV night ban would not "maximize public recreational access opportunities" as required by the Coastal Act and LCP. It would, in fact, limit my access. The City's offer of "Safe Parking", with the increased cost of gasoline, might make it infeasible for me to then access the Coastal Zone during the day.

The City's parking program is of limited duration, and with limited resources, limited funding, high prices of market rate housing, and limited, affordable housing options in Santa Cruz, it is highly unlikely that I or others would be housed within their timeframe. Many extremely low-income people do not qualify for Section 8 vouchers or are on ten year waiting lists. The limited duration of the program would then cause people to be exited and fall prey to the City's nighttime RV ban and, because I and others could not pay for the ongoing tickets, would have to face the likelihood of having to move out of the area and even further from the Coastal Zone and limit even further our access.

The City's parking program also has rules regarding behavior within the program but has no plan to have staff at night. Nor do they have staff highly trained for those suffering from untreated mental health and substance use issues. Those having suffered from domestic violence and PTSD sometimes react to their situations and yell and "break rules". These people, protected by the ADA, would then be exited and unfairly impacted by the tickets and overnight RV ban.

The City's action would also limit me and anyone with an oversized vehicle from working at night if they had to park away from the allowed sleeping sites and had to park on a public right-of-way in a different part of the city. It would limit staying overnight with friends, family, or a significant other. It would limit access to driving downtown to watch a late movie, or meeting friends at a bar or coffee shop, or meeting friends to go to the beach, listening to the waves, or looking at the stars. All of these activities done by someone who only has an oversized vehicle would be citable under this ordinance.

The City claims health and safety concerns but does not show a connection those specifically with oversized vehicles, as opposed to any other kind of vehicle. Nor do they show a connection with nighttime parking, as opposed to daytime parking. Noting "calls for service" proves nothing because of the majority of those calls not relating to actual law violations. The City already has laws against the behavior of dumping sewage, assault, and graffiti. This ordinance raises a substantial issue in terms of consistency.

As someone who is part of an environmental justice community, I and we are disproportionately affected by the City's action. In fact, the City gives homeowners

the option of getting limited parking more clearly showing the focus of this action on those who are lower-income and/or live in their vehicles.

Please support "maximizing access" and limit the targeting of a population, many of whom do not break the law, and do not cause trouble, and are doing the best they can.

With respect,

Serg Kagno

Dear Coastal Commission

I am a resident of Santa Cruz and live near Natural Bridges Park. I am a supporter of the City of Santa Cruz's Oversize Vehicles ordinance.

Why? I am very worried that the homeless do not get compassionate care and attention. One of the outcomes of the lack of housing in Santa Cruz is that some have parked near the entrance of the park and along side the street side boundary.

Without proper hygiene facilities, garbage disposal and social involvement they live in inhumane conditions and prevent many people from using the trails near their elaborate campsites.

For the sake of the users of the Natural Bridges State Park and for the RV dwellers it's important for you to know that Santa Cruz passed the ordinance with a lot of debate and evidence.

Please support the city of Santa Cruz and the democratic process that got them to pass the match debated oversize vehicle ordinance.

Most sincerely,

Teresa Ghilarducci,

Subject: Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)

Dear Commissioners

I walk my dogs daily in the areas that are used by individuals in RVs as their private residences. Many of these RV dwellers are in disabled vehicles. The overwhelming majority of them generate and accumulate piles of trash. In addition they use the grass areas on either side of the sidewalks as latrines.

There is one thing I can tell you with confidence – They are not here to access or appreciate the coast.

They need help, but letting them set up and defile our environment is not the answer.

Please help us –

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration -

Subject: Item 31: I support the no substantial issue and OVO, A-3-STC-22-0018-2
Date: Friday, July 8, 2022 1:34:43 PM

Dear Coastal Commission:

I have been a home and business owner in Santa Cruz for over 50 years, living near the coast. I respect the right for all folks to have ocean access; however things have really shifted in the last 25 years so that we have many unregulated RVs, run down beatup school buses, vehicles that roam our coastal streets, park there unregulated for weeks at a time, refuse to move even with tickets in their windows. i have witnessed them blocking access for others, urinating/defecating in the street in front of our houses, leaving trash (and needles!) in the gutters and streets. Our local law enforcement has been stretched but they need this support on this issue.

I support the no substantial issue finding made by Coastal Commission staff and encourage you to uphold the recommendation. I support the city's OVO permit parking and safe spaces programs. Coastal neighborhoods have been waiting since 2013 for an ordinance to mitigate negative impacts we experience due to unregulated overnight vehicle camping. In that time, 24 other coastal communities have passed oversized vehicle ordinances that are successfully in force. The time is long overdue to allow Santa Cruz to have an ordinance put in place.

Thank you for supporting the no substantial issue finding.

A coastal community member,

Val Leoffler

TO: California Coastal Commission

FROM: Nancy Steward

RE: July 14, 2022 Coastal Commission Meeting – Agenda Item #14a

I support the no substantial issue finding by the California Coastal Commission staff and ask that you approve the staff finding. Please deny the appeal of the city of Santa Cruz Oversized Vehicle Ordinance adopted last year and stop the unregulated overnight vehicle camping by occupants in oversized vehicles now occurring in our neighborhoods.

My husband and I have lived in Santa Cruz for forty years. Over the past eight to ten years the increase in unregulated vehicle camping has grown substantially. The organizations who have filed this appeal have made the argument that this unfairly targets poor people and is a social justice issue. I disagree. The issues that have arisen in my neighborhood are the result of unregulated camping on neighborhood streets. There have been all kinds of vehicles and “campers”. People roll into town with an expectation that they can camp anywhere they wish and to heck with the residents living in the neighborhood. Over the years, we have had to deal with all kinds of large vehicles including \$250,000 recreation vehicles pushing out their “pop-outs” and blocking sidewalks, putting out chairs and barbeques on the public sidewalks blocking pedestrian traffic, open fires in dry areas, partying at all hours, and use of our yard as a toilet for their dogs AND themselves. (Or, leaving urine in glass jars for us to clean up.) Additionally, vehicles in poor condition leak vehicle fluids onto neighborhood streets along with human waste, drug needles and trash, which in turn flow into the city storm drains. This is detrimental to a healthy coastal environment as well as our peace of mind.

There are coastal campgrounds in the area available for recreational vehicles and Santa Cruz has initiated a "safe parking" program for low-income vehicle dwellers and this program is currently being expanded. These areas have waste and toilet facilities and in the future additional services will be made available.

I understand the coastal commission’s responsibility of ensuring public access to coastal areas. However, regulating behaviors for the benefit of our community’s health and safety (including full-time vehicle dwellers) while allowing for public access is not unreasonable. This is not an issue of impeding public access, but of regulating the community for the benefit of all.

Over twenty other coastal communities have parking regulations of some sort governing oversized vehicles and these have been successfully enforced. The city of Santa Cruz needs to have the same tool.

Again, please adopt the recommendation of “no substantial issue” and allow the city of Santa Cruz to begin enforcement of our oversized vehicle ordinance.

Thank you for your consideration.

Subject: Oversized vehicle ordinance in Santa Cruz: Uphold the appeal
Date: Friday, July 8, 2022 12:35:25 PM

Good afternoon esteemed commissioners,

I am writing to commit to record my support for the appeal submitted by the ACLU and the organization Santa Cruz Cares. Their challenge to the oversized vehicle ordinance is legitimate and should be upheld by the Coastal Commission, whose job it is to protect access to our coastal areas. I believe that this ordinance would go against these mandates and be a strike at the heart of coastal access for all.

Ultimately it is a debate over public access to public space and should not be swayed by the interests of the current city council and their supporters. I believe that overwhelmingly in the city of Santa Cruz there is not support for this ordinance, and that the city council does not reflect the interests of the majority in this case.

Thank you for your consideration.

Subject: Please deny the Appeal of the Santa Cruz Oversize Vehicle Ordinance
Date: Friday, July 8, 2022 11:13:55 AM

Dear California Coastal Commissioners,

Please deny the appeal of the City of Santa Cruz Oversize Vehicle Ordinance (OVO).

The OVO absolutely does not criminalize homelessness. It provides reasonable and more available access and safe parking standards for all of our beachside community visitors and residents.

The OVO is a positive means of channeling entry into the city's expanded safe parking program sites and services for those in need.

The OVO establishes equitable parking rules that open up fair access to all comers not just to those who arrive first, in the biggest vehicles, who stay the longest and/or never leave.

Please deny the appeal.

Thank you,
Mike Becker

Re: Agenda Item 14a: Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)

Dear Chair Brownsey and Coastal Commissioners,

I am writing to you today to say that I support the appeals of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California.

While I congratulate commission staff on a fine “Summary Report ‘ in characterizing the issue of coastal access and the plight of a certain “environmental justice community,” namely the unsheltered, I cannot abide by their final recommendation to this commission, that the City of Santa Cruz’s Coast Development Permit does not raise red flags and is deemed “not significant.”

The City of Santa Cruz continues to drag its feet when dealing with vehicle-dwellers, and homeless campers in their parks as well. The “Over-sized Vehicle Ordinance” is yet another attempt for city administrators and councilmembers to apply a loose band-aid lacking proper adhesive material. I am keenly aware of the internal, and external, politics of the city council as I served for seven years on that body. We have had at least two commissions on homelessness in the past 23 years and both have come to similar conclusions: a vehicle parking area is sorely needed. That vehicle parking area has de facto become the coast. Yes, vehicle-dwellers should have access to the coast and the coastal commission can insure that access because it is where this “environmental justice community” has decided to dwell. Surely the city of Santa Cruz has multiple spaces where vehicles could park, but they have yet to offer any but a handful of spaces. Thus, vehicle-dwellers have chosen the coast and California Coastal Commission protects access to the coast. It is right and proper that you rule against the city’s rush to further criminalize those living in their vehicles until the city comes up with a better plan.

The fact is, so many Californians have come to rely on the Coastal Act especially when our local government policy fails us. We also rely on this commission to find ways to level the social, political, and quality of life playing field along the Golden State’s coastline. We look to you today to come to the aid and assistance of our community’s most vulnerable. I urge you to make a “significant “finding and send the city’s administrators back to their desks and back to the community for input. We need to maintain safe access to coastal vehicle parking areas, and also dig deeper and provide a safe and sanitary place where oversized vehicles, people’s homes in this case, can

actually park legally and safely. We are not talking about space for 9, or 55, because clearly the need is much greater as the staff report points out, and many members of the Santa Cruz community support the right to coastal access and the right to sleep. We look to this body for relief. Please find that the Oversized Vehicle Ordinance has a substantial issue.

Sincerely,

Chris Krohn

Subject: Public Comment on July 2022 Agenda Item Thursday 14a - Appeal No. A-3-STC-22-0018 (Nighttime Oversized Vehicle Parking Restrictions, Santa Cruz)
Date: Friday, July 8, 2022 11:10:47 AM

Dear Coastal Commission:

I am a long-time resident of the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

In my particular neighborhood, I witness the daily pollution of our streets and ocean, and the continued limiting of access for all by people living in their vehicles. I would be happy to provide photographic evidence of the environmental damage caused by these vehicles, but suffice it to say that no campground in California would allow the parking of large, unmaintained RVs without associated services and facilities.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that “societal issues ... fall outside the purview of the Commission’s coastal resource protection mandates”. Safe parking for people without housing is a critical issue, but it is completely unrelated to coastal access. The notion that a person can only access the coast if they can permanently park their large RV there is beyond reason, and it is damaging to our community, our environment, and the coastal access of other Californians.

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration.

Date: Friday, July 8, 2022 1:30:28 PM

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. Please reject the appeal of the Oversized Vehicle Parking Ordinance; it allows fair and equal access to the beach during hours when the beach is open.

It won't reduce coastal access and will improve access in areas where state beach parking lots and parking on adjacent streets. And RV owners are free to park nearby between 6 AM and midnight every day, so they have easy and equal access to the beach.

The ordinance only prevents the RV owners from sleeping there overnight, at a time when the beach access is closed. So they have equal and fair access to the beach during the hours when the beach is open.

Regrettably, the public streets are continuously filled with unmoving oversized vehicles and trailers, some from out of state and trailers without a towing vehicle. Regulating overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues, animal and human waste, and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates."

I respect and share your concerns about equitable access to the beach, but this ordinance in no way disadvantages RV owners from that. As I said, they can park on the street near the beach from 6 AM to midnight, allowing equitable access to the beach.

26 other coastal communities have passed similar oversized vehicle ordinances, and this was adopted after vigorous and democratic debate in our community, resulting in this fair compromise. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thanks for your consideration, and your commitment to fair and equitable beach access. Respectfully, in this particular case, your intervention overturning a fairly debated and enacted local ordinance is not necessary under your mandate.

A message to the Coastal Commission, re the question of oversize vehicle parking along our Santa Cruz coastline:

Please take this moment to consider the topic from the point of view of homeowners who live full time in small residential coastal neighborhoods, **as well as the hundreds of visitors who travel to the coast for a few hours on any given day.**

The **City of Santa Cruz has struggled to deliver solutions** for those who live in homes-on-wheels. **Their proposed ordinance has merit. Please allow them to implement this plan.**

Allowing large recreational vehicles to park for extended periods in coastline neighborhoods severely impacts both residents' quiet enjoyment of their homes, and for the countless other folk who arrive in passenger vehicles -- families, surfers, wheelchair and walker users, baby strollers, dog walkers, fishermen, etc. -- their access to the coastline is nearly impossible when the parking is monopolized by multiple huge RVs occupying large curbside areas.

Though governed by the vehicle code, many RVs are actually rolling residences more appropriately governed by residential codes. Many are so large they dwarf the houses. They need inputs our street cannot provide (such as power, water, waste facilities) - and they bring outputs that burden our neighborhoods (increased density, litter, waste, noise, and most important, a lack of accountability to the community). These homes on wheels can weigh in at 20 tons or more, their massive bulk blocking both the scenic views AND safe traffic sightlines. Many have expandable walls, further enlarging the footprint of the RV, obstructing street and sidewalk. They have huge waste tank capacities (many up to 100 gallons, both grey water and black water), and waste stations are few and far between (outside of RV Campgrounds). Countless times I have personally witnessed the dumping of waste tanks into the gutters and storm drains on our street. The police dept is rarely able to respond quickly enough to abate or cite, and heaven forbid one should attempt a face-to-face entreaty with someone who feels entitled to dump sewage on the street... why go to the trouble (and cost) of finding a waste station when you can dump for free??

Since buying our home over a decade ago, our experience with RV campers has been unpleasant, to say the least. Partying RV-ers run compression generators and loud stereos for hours, literally rattling the walls of our 90-year old cottage. Noise, littering and dumping is rampant.

My neighbors and I are aware that this area is meant for ALL to enjoy. Every day we enjoy seeing the tremendous variety of folks excited to arrive at the coast with their

kids and dogs and fishing poles. But to allow long-term "residential" access to folks who live and travel in oversized homes on wheels means that **all others will be crowded out**, simply by virtue of the size of these rolling homes.

Everyone knows that location is one of the most important components of a home's price/value - property taxes are based on this. To live on our street, we residents must pay our taxes, observe zoning and other regulations, and **behave as good neighbors. -- we are accountable.** I know who my neighbors are, and that they are invested as I am in the safety, maintenance, and peaceful life of our street. The large RVs that come and go defy any accountability, treat our area as a party playground, and we residents are left to clean up the mess after enduring their days-long visits. As a coastal community, we enjoy and welcome all those who come to enjoy the seaside for the day - but to allow oversized homes on wheels to occupy city streets long term, is exceedingly unfair to many many others, residents and visitors alike.

I attach just a few of the photos of the large vehicles that park in our seaside neighborhood for days at a time. Individual shots do not capture the overwhelming effect of several such vehicles parked along a neighborhood street. One parked RV attracts a second, and in no time a wall of RVs dominates the landscape - the sky might as well be blocked by billboards, same effect.

RV dwellers would be more properly accommodated within RV parks designed to provide the space and utilities these huge vehicles require - or in City-and County-sponsored parking areas, such as the program proposed in the City's OVO ordinance. Seaside neighborhoods are dense enough without additional RV bulk, activities, and "outputs".

It is wrong to expect any seaside residential neighborhood to provide for their long-term accommodation.

Please deny the appeal, and allow Santa Cruz to implement its proposed oversize vehicle ordinance.

Thanks for considering this from our point of view.

Megan and Jim Dawson, in the Coastal Zone, Santa Cruz CA

Dear Coastal Commissioners,

I am writing to you today to say that I support the appeals of the Oversized Vehicle Ordinance by Santa Cruz Cares, the ACLU, and Disability Rights California.

Not only would this ordinance disproportionately impact our unhoused neighbors, it appears to be a clear violation of the Coastal Act. The Oversized Vehicle Ordinance makes it impossible for homeowners in the Coastal Zone to own an RV or cargo van, restricts public access and recreational access to the coast for low-income residents and runs in opposition to the spirit of the City's Housing Element and Sensitive Coastal Resource Areas. If OVO is enforced, it also would create a dangerous backdoor to development in the Coastal Zone with no accountability.

I think it is incredibly important to highlight the fact that the Oversized Vehicle Ordinance includes language that **at first glance** seems to provide safe parking spaces that could be accessed by those displaced by the law. However, upon closer look, the ordinance does nothing to ensure the safe parking program would be resourced, managed, or run, instead stating that "...the city **may** operate, sponsor, or authorize safe parking programs". This language is not strong enough, and raises valid concerns that the safe parking program could be defunded or ended at any moment, resulting in no place for oversized vehicles to safely park. What's more, the ordinance does not make any effort to ensure enough safe parking spaces for those estimated to be displaced by the law. Currently, Santa Cruz provides only 50 safe parking spaces, less than 1/6 of the needed parking spaces. Without enough safe parking spaces, this ordinance drastically limits access to the coast in the city of Santa Cruz.

Please find that the Oversized Vehicle Ordinance has a substantial issue.

Subject: Support appeal of the Oversized Vehicle Ordinance
Date: Friday, July 8, 2022 12:26:54 PM

Dear Coastal Commission people,

Please support the **appeal** of the Oversized Vehicle Ordinance.

I am a Santa Cruz resident. Santa Cruz is a town full of people that love outdoor life, and consequently, many own camper vans or even RVs. At times, they have invested up to hundreds of thousands of dollars to own these vehicles. With our housing crisis, many residents must live in condos or homes that do not have sufficient private parking space to keep these vehicles in their private parking spots. By creating the oversized vehicle ordinance, you are affecting all of these people emotionally and financially.

I am also concerned that this ordinance can be discriminatory toward people that cannot afford a house. Is the solution really to make their life more complicated than it already is? Really? I think we can do better as a community.

Please find another way to deal with the issue of irresponsible people with RVs throwing garbage outside, being dangerous or doing drugs. Potential ideas are to install night vision cameras to identify the irresponsible people and their vehicle licence plates. Listen to the people of our community when they call out people and have good evidence for it. Or allow residents to have permit parking of oversized vehicles, as well as visitors that are doing road trips.

Thank you for listening,

Eva Salas

Hello,

I'm emailing to voice support for not financially burdening our Santa Cruz neighbors who live in OVOs. Please uphold the ACLU and Santa Cruz Cares appeal on this ordinance!

Cheers,

Date: Tuesday, July 5, 2022 4:55:30 PM

Dear Coastal Commission:

I'm a resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates"

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

Thank you for your consideration -
Anne Elder

05 VII 2o22

Hello Coastal Commission,

I'm a long time resident of the City of Santa Cruz. Please reject the pending Appeal of our RV Parking Ordinance. This Ordinance will actually increase coastal access by keeping one vehicle from occupying a parking space long term, to the detriment of many shorter term visitors.

The restrictions on overnight RV parking may also reduce police service calls due to the camping of RV's in areas which already experience the impacts of high visitation by out of towners.

Many coastal communities have passed similar RV ordinances, and I feel that Santa Cruz will greatly benefit from this Ordinance.

Thank you for your consideration.

Respectfully, Hugh D. Carter.

Date: Tuesday, July 5, 2022 6:47:39 PM

Dear Coastal Commission:

I'm a 45 year resident in the City of Santa Cruz. I request that you reject the appeal of the Oversized Vehicle Parking Ordinance. The OVO does not substantially reduce coastal access and will improve access in areas where state beach parking lots are continuously filled with unmoving oversized vehicles preventing others from taking a turn parking there. The restrictions in overnight parking will mitigate the excessive police and fire service calls caused by unauthorized nighttime fires, barbecues and other environmental hazards.

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that "societal issues ... fall outside the purview of the Commission's coastal resource protection mandates."

The OVO PROTECTS our coastal NEIGHBORHOODS from illegal activities that continually occur as a result of overnight camping, which I know from decades of experience defending the safety of my neighborhood.

26 other coastal communities have passed similar oversized vehicle ordinances. The report does not identify any reason why Santa Cruz cannot have these parking rules like other coastal cities.

My sincere thanks for your consideration of this important issue,
Robert deFreitas, beach area Santa Cruz resident

Dear Coastal Commission:

I endorse sensible RV parking ordinances in Santa Cruz, CA. I live here, and the RV parking abuses are the subject of much debate. Where there is no debate, a LOT of people are abusing parking RV's in Santa Cruz.

Some for years, and have no plans to do otherwise. They are bums taking up space and resources they don't pay for.

Dear Coastal Commission:

I live on Morrissey Boulevard in the East Side, an area that is being overrun with large RVs parked on the streets in what I believe is a contravention of regulations (people are living in them). Please **reject** the appeal of the Oversized Vehicle Parking Ordinance. The OVO improves access in areas where beach parking lots are occupied by stationary RVs that prevent others from using that space (often more than one).

Our city is expanding its safe parking programs with services for those living in their vehicles out of necessity. Thanks to the staff for noting that “societal issues ... fall outside the purview of the Commission’s coastal resource protection mandates”

26 other coastal communities have passed similar oversized vehicle ordinances. The report does give any reason why Santa Cruz cannot also have these parking rules. Thank you!

To whom it may concern,

A vote was passed to enact a parking permit ordinance along the coast for RVS.

I believe the argument is to keep access to the beach and the would mean for RVs too.

This needs to be implemented the RVS that have lined the streets do so because this is vacant space, the access to the beach is of no concern. Even if they were hoping to access the beach over a certain size they should be required to park in permitted spaces or RV parks. The people who live along these areas also deserve a peaceful place free of large RVS, litter and waste. Day trippers who are visiting the coast deserve to park and enjoy the coast as well.

This is for all and not just homeless many campers line the coast and camp out, cook and block the walk ways. All users of this area need to adhere to rules for everyone's enjoyment. Allowing them to camp, not just park for the night infringes on many peoples enjoyment of this space.

Ps I work with the homeless in two organizations and feel the lack of housing is HUGE problem, but allowing large, broken down RVS to line the streets is not the answer.

Thank you,

Michele Replogle

Subject: Santa Cruz Oversize Vehicle Ordinance
Date: Saturday, June 18, 2022 8:20:12 PM

I would like to express my support of the Oversize Vehicle Ordinance recently passed by the City Council in Santa Cruz.

Unlimited parking for oversized vehicles in raises a number of public health and safety issues. The city Council has considered this measure thoroughly and has put together a plan to address these issues. Upholding the appeal by the ACLU and Santa Cruz Cares is not the solution.

Thank you,
Thomas Gordon
Santa Cruz resident
