## CORRESPONDENCE

**Received between** 

8:00am, August 1, 2022 and 4:30pm, September 2, 2022

**Individual Emails Part 2** 

Point Reyes is the only national seashore on the Pacific Coast and is designated an International Biological Preserve for its abundant biodiversity and proximity to other protected lands and waters.

I recently read that beaches at Point Reyes received failing grades for water quality, and that these issues have been going on for decades. A National Park in California should not have unsafe water quality.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

Please reconsider your approval of ranching in the national park.

Sincerely, Anne Eastman

Point Reyes is the only National Seashore on the west coast and needs the California Coastal Commission to protect it from degradation by industrial ag interests.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

We are in the midst of a climate crisis, and most are being too slow to address it. For example, many are not actively working to decrease water use, nor actively working toward the protection of water quality of the water we have.

The Channel Islands recently got rid of cattle. We ask the Coastal Service to work with the National Park Service and do the same.

Sincerely, Jan Modjeski

Thank you for your involvement in helping protect the Seashore! We need your leadership to help finally make this park a park.

I have hiked a lot in Point Reyes National Seashore, and I have stopped going to many places because there's so much cow crap everywhere, in streams and on trails and draining onto a lot of beaches there. It's disgusting and really unhealthy. Why is this allowed to continue for years and years and years?

I am concerned that if ranching is not eliminated soon, it may be too late to prevent the loss of already threatened or endangered wildlife that depend the park's natural resources for their survival.

Thank you for your serious sincere attention and action on this matter! No more private ranching, no more cows in Point Reyes National Seashore!

Sincerely, Thomas Ervin

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, Clifford Weixel

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, Clifford Weixel

I am astonished at the continued, ongoing destruction of our public lands in Point Reyes National Seashore. For decades a blind eye has been turned on the pollution, lease violations, habitat loss, biodiversity loss, invasive plants, septic tank violations, illegal bulldozing, the list goes on and on. The NPS is clearly not managing this public land for the benefit of the public. It is continually influenced by ranching operators and politicians who prioritize personal interests above the public good.

It is time for all government and state agencies to do the right thing and retire private ranching from our National Parks.

Sincerely, Daniel Dietrich

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

As a regular visitor to the park, I frequently see cattle trampling through creeks and streams, and even standing and pooping in Drakes Estero. In places where cattle are seen, I step over cow feces on trails and shorelines. It's no wonder the water quality is terrible.

The Park Service, park management, and multiple regulatory agencies been tap dancing around this for decades and the damage and harm out there is worse and worse! Please do whatever you can to get rid of ranchers and their cattle, and return our national seashore to nature, not cow crap all over the place!

Please use your influence so the Park Service will follow its own mission.

Sincerely, Mary Cooke

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

Manure discharged from cows and other livestock at Point Reyes National Seashore not only contaminates our beaches with potentially disease causing fecal bacteria they add nitrogen and phosphorus which cause surface waters to be so choked with emergent vegetation you can hardly see the water.

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

This is a national seashore for the American people and for wildlife and habitat—not a playground or business landscape for private, industrial-level, factory animal operations. Please help get the ranchers out of Point Reyes National Seashore.

Sincerely, SARAH SWINERTON

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

The National Park Service has not performed water quality monitoring in the known polluted waterways in Point Reyes for years – this is unacceptable. If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

During this drought, the National Park Service has let hundreds of our famous and rare Tule elk perish from dehydration. Elk and cows cannot coexist on the Seashore.

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. Would you let your own children wade, walk, hike, traipse, splash, swim, or do any other activity on, in, or near the cattle-dung waters, beaches, creeks, estuaries, tide pools, and fields there? Wouldn't you worry about their health and safety? Please make this park a park and help us protect the coast.

Sincerely, ELAINA OZEROFF

It is crucial that the State of California have control over the ecosystems and wildlife within the Seashore. I thank you for taking the time to read my thoughts on Point Reyes.

It is a tragedy to see the park deteriorate, especially over the last decade. Cattle operations, made worse by drought, have turned the landscape into a sea of bare dirt and manure. Cattle have no business in a National Park. This is a practice we must stop to protect our public National Parks.

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues. The park Service should try to live up to its name and serve the Parks not private business.

Please hold the park service accountable, and withdraw your concurrence of the NPS's plan to deliver 20-year leases to ranchers.

Sincerely, Theresa Bucher

As one who is proud and awestruck by the unique California coastline and biodiversity, especially in Point Reyes, I would like to thank you for your efforts to protect the only National seashore on the West coast.

There is a severe drought in this state. At Point Reyes, cows are using up all the water that should be going to animals and natural habitats, including tule elk.

The Park Service, park management, and multiple regulatory agencies been tap dancing around this for decades and the damage and harm out there is worse and worse! Please do whatever you can to get rid of ranchers and their cattle, and return our national seashore to nature, not cow crap all over the place!

This is our land. Please hold the National Park Service accountable.

Sincerely, Tracey katsouros

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

Why is it allowed for Point Reyes to have the most contaminated waters on the California Coast if it is unique enough to be a national park and an UN-designated Biodiversity Hot Spot?

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Janice Cumming

Thank you for taking the time to read my comments about the many problems with the out at Point Reyes National Seashore. I have visited there for decades, and am appalled at the bad conditions and management there.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

Ranchers say the run their operations "sustainably" while they pollute the water, degrade coastal habitats and endanger rare wildlife in order to produce milk and meat that's produced in abundance elsewhere.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Claudia Johansen

Thank you for your work to protect our coast, especially at Point Reyes National Seashore.

This state is in an extreme drought. Cows at Point Reyes are consuming all the water that should be going to natural habitat and wildlife, like the tule elk.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Dorothea Stephan

As one who is proud and awestruck by the unique California coastline and biodiversity, especially in Point Reyes, I would like to thank you for your efforts to protect the only National seashore on the West coast.

Why do ranchers have so much power over our national park? Their cattle create vast dead zones out on the Point. The ranchers and their cattle shouldn't even be there anymore! They constantly manipulate park management and regulatory agencies for private profit and hurt wildlife and visitors with their shady dealings with park management.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Patrick Randow

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

Recent news reports revealed that not only livestock manure is being discharged onto land and into surface waters at Point Reyes National Seashore – human feces have also been spilling into ponds and onto land from failing septic systems that the ranchers are required to maintain as part of their lease agreements.

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, John Staunton

Point Reyes is the only National Seashore on the west coast and needs the California Coastal Commission to protect it from degradation by industrial ag interests.

Too many cattle have turned vast areas of the park into a virtual dead zone.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Help the conservation groups to end the pollution and protect this biodiversity hotspot.

Sincerely, Herb Evert

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

Why is it allowed for Point Reyes to have the most contaminated waters on the California Coast if it is unique enough to be a national park and an UN-designated Biodiversity Hot Spot?

As the pandemic has shown us, we need to increase public recreation and access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up keeping people out of our parklands.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Michelle Schramm

I was at Point Reyes for the first time in years, and it was clear that something has to change.

I used to love kayaking at Point Reyes but when I heard about how the water quality goes unmonitored, I just couldn't go there anymore.

It's time for the California Coastal Commission to step in and stop this absurdity! For the sake of people, wildlife, and habitat, stop this long-time tragedy! Point Reyes could be a model for sound and sane climate policy practices, biodiversity restoration, and leading edge drought science.

Any plan that is ultimately produced to address the water and climate impacts of ranching, as the Commission has required, must include measurable benchmarks and deadlines for achieving them, enforcement mechanisms, and consequences—including closing down private ranching in the park— for failure to perform.

Sincerely, CAROL DEVARIEUX

Thank you for considering my comment. Point Reyes National Seashore is the "Island in Time" created during the Kennedy Administration that gives so many visitors a beautiful and peaceful way to connect with the natural world.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, B G

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Deborah Richerson

Date:	Thursday, September 1, 2022 11:05:09 AM

I feel privileged to have the Point Reyes National Seashore virtually in my backyard.

Why are dairy and beef cattle allowed to defecate over so much of Point Reyes National Seashore? There is cattle manure in creeks and streams, and covering trails. It's bad for adults, kids, pets, every visitor! Why doesn't the park management stop it? Why do these ranchers abuse the land and water in our national park?

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore.

The National Park Service has not kept its agreements and can't be relied upon to do so.

Sincerely, Jeff Gutierrez

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

The National Park Service has not kept its agreements and can't be relied upon to do so.

Sincerely, Susan Brisby

Thank you for considering my comment. Point Reyes National Seashore is the "Island in Time" created during the Kennedy Administration that gives so many visitors a beautiful and peaceful way to connect with the natural world.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Michsel Lerner

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

There is a severe drought in this state. At Point Reyes, cows are using up all the water that should be going to animals and natural habitats, including tule elk.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, Monica Riedler

Date:	Thursday, September 1, 2022 10:57:12 AM

We appreciate you taking action to improve the appalling situation in Point Reyes.

Why is so much of the Point Reyes National Seashore permitted to be covered in cow manure from dairy and beef cattle? Cattle excrement can be found on footpaths, in creeks, and in streams. Every visitor—adults, children, pets—should avoid it! Why doesn't the park administration put a stop to it? Why do these ranchers misuse our national park's land and water?

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Chris Ray

I want to thank the Coastal Commissioners for providing an opportunity for the public to share their position on the ongoing issues associated with private cattle ranching in Point Reyes National Seashore.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

Cattle ranching at Point Reyes is clearly not sustainable. Ranchers buy supplemental water and grass for cows, while wildlife are expected to die, according to the park service. The climate crisis will only worsen conditions.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Elisabeth Carroll

Thank you for using your authority to address the terrible conditions at Point Reyes.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

Ranches are not self-supporting and would not be in the park were they not subsidized by our tax dollars.

Please protect human health for beachgoers at Point Reyes. Hold the ranches accountable. Eliminate the water pollution.

Sincerely, Linda Tabor-Beck

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

Migratory birds from all over the Western United states stop in the Seashore in search of a safe place to rest and refuel along the Pacific Flyway. Endangered marine mammals along the Pacific Coast call Point Reyes home. We now know that Point Reyes provides poor habitat for these protected wildlife. At Point Reyes, water is polluted by cattle manure and land is barren due to too many cows.

It's time for the California Coastal Commission to step in and stop this absurdity! For the sake of people, wildlife, and habitat, stop this long-time tragedy! Point Reyes could be a model for sound and sane climate policy practices, biodiversity restoration, and leading edge drought science.

Please take urgent action befitting the critical environmental crisis at Point Reyes.

Sincerely, Kate Crowley

Point Reyes is the only national seashore on the Pacific Coast and is designated an International Biological Preserve for its abundant biodiversity and proximity to other protected lands and waters.

Citizens look to national parks – "our best idea" – for leadership in the climate crisis, but Point Reyes is an example of the worst practices in conserving water and protecting biodiversity.

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Chris Bowman

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, Margaret Cobb

Thank you for your involvement in helping protect the Seashore! We need your leadership to help finally make this park a park.

The trash, heaps of cattle manure, beaches closed to the public because of dangerous levels of bacteria from cows—shouldn't be happening in a national park.

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

Politics should not be used as the basis for decisions that may influence the future of the Seashore. We need real action now in order to secure a future for Point Reyes.

Sincerely, Sheree Goecke

Thank you for taking the time to read my comment! I am very concerned with what I have heard about Point Reyes, and I hope you all can take leadership and help solve these issues.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

Ranchers say the run their operations "sustainably" while they pollute the water, degrade coastal habitats and endanger rare wildlife in order to produce milk and meat that's produced in abundance elsewhere.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, Kirk Rhoads

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

Why is it allowed for Point Reyes to have the most contaminated waters on the California Coast if it is unique enough to be a national park and an UN-designated Biodiversity Hot Spot?

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Sharon Longyear

I have been a frequent visitor to Point Reyes for many years--it is one of the main reasons I visit California. I am therefore deeply concerned about recent reports that the streams, lagoons, and estuaries at Point Reyes National Seashore have very high levels of disease-causing fecal bacteria: these water features attract visitors to enjoy the park but now threaten our health and safety.

I don't understand how this ongoing problem continues to be ignored or why a few ranchers who were supposed to leave long ago have not yet done so, and now contribute to pollution of a resource that should be enjoyed by all. No one comes to Point Reyes to see cattle.

Please immediately address the water quality issues that are being created by subsidized private industry in our National Seashore. The National Park System should be protecting wilderness and providing equitable access to the natural world, not supporting private profits that degrade the Pacific Coastline.

Thank you, Cindy L Hoffman

Sincerely, Cindy Hoffman

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Kenneth Bouley

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

This is our land. Please hold the National Park Service accountable.

Sincerely, ann malyon

I am a Bay Area resident. I have visited Point Reyes with friends and family my entire life.

The bike paths at Point Reyes are the worst in Marin – dusty, barren and full of cow poop that gets into your tires, shoes, clothes and skin.

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

Thank you for your serious sincere attention and action on this matter! No more private ranching, no more cows in Point Reyes National Seashore!

Sincerely, Linda Jennings

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

As a regular visitor to the park, I frequently see cattle trampling through creeks and streams, and even standing and pooping in Drakes Estero. In places where cattle are seen, I step over cow feces on trails and shorelines. It's no wonder the water quality is terrible.

We should be protecting and restoring wildlife habitat at Point Reyes National Seashore. Scientists say we are in the sixth mass extinction event. critical wildlife habitat.

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, Karen Stamm

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

The thousands of acres in Point Reyes National leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, clara zahadek

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

The thousands of acres in Point Reyes National leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

This is our land. Please hold the National Park Service accountable.

Sincerely, Steve S

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

As a regular visitor to the park, I frequently see cattle trampling through creeks and streams, and even standing and pooping in Drakes Estero. In places where cattle are seen, I step over cow feces on trails and shorelines. It's no wonder the water quality is terrible.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Kaarina Moilanen

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

The bike paths at Point Reyes are the worst in Marin – dusty, barren and full of cow poop that gets into your tires, shoes, clothes and skin.

The National Park Service lacks the resources (money and personnel) necessary to control the profit-driven, opportunistic ranchers who don't spare a thought about environmental health and safety.

Any plan that is ultimately produced to address the water and climate impacts of ranching, as the Commission has required, must include measurable benchmarks and deadlines for achieving them, enforcement mechanisms, and consequences—including closing down private ranching in the park— for failure to perform.

Sincerely, Rocky Reuter

Thank you for considering my comments about the damage to Point Reyes National Seashore from cattle operations. I know that I am not alone in saying the impacts are so apparent and disheartening that I no longer visit the park.

The cattle ranches cover over a third of Point Reyes National Seashore! They were supposed to be gone decades ago! Why are they still allowed to stay there? There are barbed wire and electric fences everywhere that block public access to tens of thousands of acres, and signs saying don't trespass, keep out.

Point Reyes National Seashore is at grave risk to be destroyed by the horrible decades-long practices and consequences of cattle ranching among the current and present dangers of climate warming, biodiversity loss, and extended drought. The California Coastal Commission MUST step up and push the National Park Service NOW to rid ranchers and cattle from the American public's National Seashore here, the only national park unit on the West Coast.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Rocky Reuter

Thank you for taking the time to read my comments about the many problems with the out at Point Reyes National Seashore. I have visited there for decades, and am appalled at the bad conditions and management there.

Manure discharged from cows and other livestock at Point Reyes National Seashore not only contaminates our beaches with potentially disease causing fecal bacteria they add nitrogen and phosphorus which cause surface waters to be so choked with emergent vegetation you can hardly see the water.

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Claire Ackland

We need our Commissioners to protect and defend our coastal resources for all the people of California for generations to come.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, Camilo Echavarria

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

Over a third of Point Reyes National Seashore is taken up by livestock farms! Years ago, they were supposed to be gone! Why are they still permitted to occupy that space? Tens of thousands of acres are barred off from public access by barbed wire, electric fences, and signs that read "stay out" and "don't trespass."

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

Please reconsider your approval of ranching in the national park.

Sincerely, AJ Ireland

Point Reyes is the only National Seashore on the west coast and needs the California Coastal Commission to protect it from degradation by industrial ag interests.

The thousands of acres in Point Reyes National leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors. It also makes no sense to allow our coast to be destroyed for the benefit of a few people who want to ranch there.

Please hold the park service accountable, and withdraw your concurrence of the NPS's plan to deliver 20-year leases to ranchers.

Sincerely, Tammy Morgan

We need our Commissioners to protect and defend our coastal resources for all the people of California for generations to come.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Adriana Nunez

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

Our family has enjoyed visiting the Pt Reyes for decades, but the news about unsafe levels of E.coli in the park's streams and beaches is deeply concerning. As a mother, I worry that my children will be exposed to water that is polluted by cattle manure or even human sewage from leaking septic systems. Until these WQ is adequately addressed, we will find alternative places to safely picnic and play.

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, carol broll

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

Manure discharged from cows and other livestock at Point Reyes National Seashore not only contaminates our beaches with potentially disease causing fecal bacteria they add nitrogen and phosphorus which cause surface waters to be so choked with emergent vegetation you can hardly see the water.

During this drought, the National Park Service has let hundreds of our famous and rare Tule elk perish from dehydration. Elk and cows cannot coexist on the Seashore.

Thank you for your serious sincere attention and action on this matter! No more private ranching, no more cows in Point Reyes National Seashore!

Sincerely, Mark Mansfield

Point Reyes is the only national seashore on the Pacific Coast and is designated an International Biological Preserve for its abundant biodiversity and proximity to other protected lands and waters.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

If we only have ten years to do something about climate change, why are we doing nothing about the critical conditions at Point Reyes?

The Channel Islands recently got rid of cattle. We ask the Coastal Service to work with the National Park Service and do the same.

Sincerely, Christi Dillon

What is going on at Point Reyes?

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

We are in a climate and extinction crisis. We the public, and all agencies should be focused on taking the right steps to address these human-caused issues. Per scientific publications, we are almost out of time, so the time is now.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Kate Kenner

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

If Point Reyes is special enough to be a national park and UN-designated Biodiversity Hot Spot, why is it permitted to have the most polluted waters on the California Coast?

Cattle ranching at Point Reyes is clearly not sustainable. Ranchers buy supplemental water and grass for cows, while wildlife are expected to die, according to the park service. The climate crisis will only worsen conditions.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, leslie lund

Thank you for reading my comment, Coastal Commissioners. I am a lifelong visitor to Point Reyes.

I used to enjoy going to the Seashore with friends to hike, kayak, watch birds and take pictures.

What happens to the wildlife when the water runs out?

Please reconsider your approval of ranching in the national park.

Sincerely, Sara Graziosa

Commissions, your help is urgently needed to clean up Point Reyes National Seashore.

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life.

The National Park Service knew there was water contamination starting in 2001. Their solution? Just stop sampling in 2013! We look to the Coastal Commission to expeditiously protect and clean up our coastal waters.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, Charity Schultz

Commissions, your help is urgently needed to clean up Point Reyes National Seashore.

Sincerely, Charity Schultz

Thank you for taking the time to read my comment. I live in the Bay Area and visit Point Reyes National Seashore several times a month.

As a Marin resident who comes to the park to picnic and kayak, I have become very concerned about water pollution from cattle manure and human sewage spills. It is appalling to learn that some ranch houses have never had septic systems, the NPS knew and did nothing much about it.

This saga has gone on long enough, the park continues to do nothing! This is a national park which should mean something.

Please reconsider your approval of ranching in the national park.

Sincerely, Caroline Sévilla

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

I've seen cattle where they don't belong—wading in creeks and estuaries that are choked with algae from cattle manure.

The Coastal Commission was created to protect our coast and needs to use the power it has to affect change at the National Park Service.

This is our land. Please hold the National Park Service accountable.

Sincerely, Haydée Pisa

Thank you for considering my comment. Point Reyes National Seashore is the "Island in Time" created during the Kennedy Administration that gives so many visitors a beautiful and peaceful way to connect with the natural world.

Why is it allowed for Point Reyes to have the most contaminated waters on the California Coast if it is unique enough to be a national park and an UN-designated Biodiversity Hot Spot?

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Judy Rees

I greatly appreciate you taking the time to consider my comment. Point Reyes National Seashore holds a special place in my heart.

It is a tragedy to see the park deteriorate, especially over the last decade. Cattle operations, made worse by drought, have turned the landscape into a sea of bare dirt and manure.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

Please protect human health for beachgoers at Point Reyes. Hold the ranches accountable. Eliminate the water pollution.

Sincerely, Anna Brewer

Thank you for reading my comment about Point Reyes. Years ago my partner proposed to me at the Seashore, so park holds a very special place in my heart.

The National Park Service has not performed water quality monitoring in the known polluted waterways in Point Reyes for years – this is unacceptable. If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

Point Reyes National Seashore is at grave risk to be destroyed by the horrible decades-long practices and consequences of cattle ranching among the current and present dangers of climate warming, biodiversity loss, and extended drought. The California Coastal Commission MUST step up and push the National Park Service NOW to rid ranchers and cattle from the American public's National Seashore here, the only national park unit on the West Coast.

Please use your influence so the Park Service will follow its own mission.

Sincerely, Jodi Weiskott

Please use your influence so the Park Service will follow its own mission.

Sincerely, Jodi Weiskott

The Commissioners have an important role protecting our coast.

A national park should not contain this wide breadth of environmental problems. Nor should over a third of a national park be placed aside for private industry.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

Please reconsider your approval of ranching in the national park.

Sincerely, Rucha Harde

Protecting our public lands from environmental impacts should be a goal of all local, state and national agencies, especially during a climate crisis, therefore I am writing to urge the Commissioners to protect Point Reyes from constant impacts causing by cattle ranching.

I've been to other historic National Parks such as Williamsburg, VA, where I was welcomed into historic homes for demonstrations of how butter was made and horses cared for. It's horrible to visit the "historic" ranches at Point Reyes National Seashore where I was greeted with "keep out" signs, hostile ranchers on ATVs, and miles of barbed wire. Leasing our National Park provides no educational activities and no benefit to the public, it only feeds the pockets of the greedy beef and dairy operators.

The National Park Service knew there was water contamination starting in 2001. Their solution? Just stop sampling in 2013! We look to the Coastal Commission to expeditiously protect and clean up our coastal waters.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, Stephanie Hausle

Protecting our public lands from environmental impacts should be a goal of all local, state and national agencies, especially during a climate crisis, therefore I am writing to urge the Commissioners to protect Point Reyes from constant impacts causing by cattle ranching.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Lauren Murdock

We need our Commissioners to protect and defend our coastal resources for all the people of California for generations to come.

Manure discharged from cows and other livestock at Point Reyes National Seashore not only contaminates our beaches with potentially disease causing fecal bacteria they add nitrogen and phosphorus which cause surface waters to be so choked with emergent vegetation you can hardly see the water.

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, Rabbi Dr Adele Plotkin

I want to thank the Coastal Commissioners for providing an opportunity for the public to share their position on the ongoing issues associated with private cattle ranching in Point Reyes National Seashore.

Why is so much of the Point Reyes National Seashore permitted to be covered in cow manure from dairy and beef cattle? Cattle excrement can be found on footpaths, in creeks, and in streams. Every visitor—adults, children, pets—should avoid it! Why doesn't the park administration put a stop to it? Why do these ranchers misuse our national park's land and water?

We are running out of time to limit climate change and the loss of species resulting from sea level rise and hotter, drier conditions.

Please protect human health for beachgoers at Point Reyes. Hold the ranches accountable. Eliminate the water pollution.

Sincerely, Mickey Ramirez

It is crucial that the State of California have control over the ecosystems and wildlife within the Seashore. I thank you for taking the time to read my thoughts on Point Reyes.

This state is in an extreme drought. Cows at Point Reyes are consuming all the water that should be going to natural habitat and wildlife, like the tule elk.

Cattle ranching at Point Reyes is clearly not sustainable. Ranchers buy supplemental water and grass for cows, while wildlife are expected to die, according to the park service. The climate crisis will only worsen conditions.

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, Michelle Hur

It is crucial that the State of California have control over the ecosystems and wildlife within the Seashore. I thank you for taking the time to read my thoughts on Point Reyes.

Beef and dairy operators at Point Reyes National Seashore have dammed surface streams to create watering ponds for livestock, thereby depriving downstream fish and native wildlife of the habitat needed to sustain them, especially during drought years.

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

The National Park Service has not kept its agreements and can't be relied upon to do so.

Sincerely, Lisa Trendall

Too many cattle have turned vast areas of the park into a virtual dead zone.

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

We need to take better care of what is left of our environment, for animals, people, and plant life.

Help the conservation groups to end the pollution and protect this biodiversity hotspot.

Sincerely, priscilla martinez

We need our Commissioners to protect and defend our coastal resources for all the people of California for generations to come.

I recently read that beaches at Point Reyes received failing grades for water quality, and that these issues have been going on for decades. A National Park in California should not have unsafe water quality.

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, Richard Wightman

I have lived in northern California a long time, and am really upset about what's going on out at Point Reyes National Seashore.

Why are dairy and beef cattle allowed to defecate over so much of Point Reyes National Seashore? There is cattle manure in creeks and streams, and covering trails. It's bad for adults, kids, pets, every visitor! Why doesn't the park management stop it? Why do these ranchers abuse the land and water in our national park?

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, g m

Thank you for your involvement in helping protect the Seashore! We need your leadership to help finally make this park a park.

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Politics should not be used as the basis for decisions that may influence the future of the Seashore. We need real action now in order to secure a future for Point Reyes.

Sincerely, Ann Bailleul

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

I've seen cattle where they don't belong—wading in creeks and estuaries that are choked with algae from cattle manure.

We should be protecting and restoring wildlife habitat at Point Reyes National Seashore. Scientists say we are in the sixth mass extinction event. critical wildlife habitat.

Please reconsider your approval of ranching in the national park.

Sincerely, Deborah Brown

Sincerely, Joyce Dixon

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

Why do ranchers have so much power over our national park? Their cattle create vast dead zones out on the Point. The ranchers and their cattle shouldn't even be there anymore! They constantly manipulate park management and regulatory agencies for private profit and hurt wildlife and visitors with their shady dealings with park management.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. Would you let your own children wade, walk, hike, traipse, splash, swim, or do any other activity on, in, or near the cattle-dung waters, beaches, creeks, estuaries, tide pools, and fields there? Wouldn't you worry about their health and safety? Please make this park a park and help us protect the coast.

Sincerely, Dennis Hoppin

Point Reyes is one of the most beautiful places in California, and it concerns me that to read about the level of pollution that occurs in places which were intended to be for the public

The trash, heaps of cattle manure, beaches closed to the public because of dangerous levels of bacteria from cows—shouldn't be happening in a national park.

If we only have ten years to do something about climate change, why are we doing nothing about the critical conditions at Point Reyes?

This is a national seashore for the American people and for wildlife and habitat—not a playground or business landscape for private, industrial-level, factory animal operations. Please help get the ranchers out of Point Reyes National Seashore.

Sincerely, Kay Labo

Point Reyes is one of the most beautiful places in California, and it concerns me that to read about the level of pollution that occurs in places which were intended to be for the public

The trash, heaps of cattle manure, beaches closed to the public because of dangerous levels of bacteria from cows—shouldn't be happening in a national park.

Sincerely, Kay Labo

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

Any plan that is ultimately produced to address the water and climate impacts of ranching, as the Commission has required, must include measurable benchmarks and deadlines for achieving them, enforcement mechanisms, and consequences—including closing down private ranching in the park— for failure to perform.

Sincerely, Carol Patton

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Please take urgent action befitting the critical environmental crisis at Point Reyes.

Sincerely, Shadoe Drury

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore.

Politics should not be used as the basis for decisions that may influence the future of the Seashore. We need real action now in order to secure a future for Point Reyes.

Sincerely, Jim Watkins

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife.

We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

If you care about the ocean, coastal biodiversity, and the health, safety, and well-being of people, wildlife, and clean air, oceans, and lands, PLEASE, as the preeminent California coastal regulator, restore and protect the Point Reyes Seashore.

Politics should not be used as the basis for decisions that may influence the future of the Seashore. Action is needed now in order to secure a future for Point Reyes.

Sincerely, Lisa Ferguson

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

The Park Service, park management, and multiple regulatory agencies been tap dancing around this for decades and the damage and harm out there is worse and worse! Please do whatever you can to get rid of ranchers and their cattle, and return our national seashore to nature, not cow crap all over the place!

Any plan that is ultimately produced to address the water and climate impacts of ranching, as the Commission has required, must include measurable benchmarks and deadlines for achieving them, enforcement mechanisms, and consequences—including closing down private ranching in the park— for failure to perform.

Sincerely, Rachel Wolf

Point Reyes National Seashore is one of the world's biodiversity hotspots.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

The National Park Service has allowed hundreds of our rare and iconic Tule elk to die of thirst during this drought. The Seashore cannot support both cows and elk. And tourists don't come to look at cows.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Maryanne Gordon

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

The ranchers have had decades to do the right thing for the environment, and insist to manipulate and obfuscate every chance they can. Raw sewage leaking on lands and in fresh and ocean waters; cattle excrement covering half the park; methane fouling the air; cows as eyesores in what is to be a natural wilderness; and actual dead zones of soil and waters—all by disingenuous ranchers and compliant park management and staff.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

The Channel Islands recently got rid of cattle. We ask the Coastal Service to work with the National Park Service and do the same.

Sincerely, CARYL SPECK

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

Beef and dairy operators at Point Reyes National Seashore have dammed surface streams to create watering ponds for livestock, thereby depriving downstream fish and native wildlife of the habitat needed to sustain them, especially during drought years.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Jeff Nadler

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Carla Din

Thank you for considering my comment. Point Reyes National Seashore is the "Island in Time" created during the Kennedy Administration that gives so many visitors a beautiful and peaceful way to connect with the natural world.

I used to enjoy going to the Seashore with friends to hike, kayak, watch birds and take pictures.

Point Reyes National Seashore is at grave risk to be destroyed by the horrible decades-long practices and consequences of cattle ranching among the current and present dangers of climate warming, biodiversity loss, and extended drought. The California Coastal Commission MUST step up and push the National Park Service NOW to rid ranchers and cattle from the American public's National Seashore here, the only national park unit on the West Coast.

The Coastal Commission is our best hope for cleaning up the water at Point Reyes. Please ensure that the park service develops and implements a strict water quality plan as soon as possible.

Sincerely, Janelle George

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

There is a severe drought in this state. At Point Reyes, cows are using up all the water that should be going to animals and natural habitats, including tule elk.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, Michelle Krueger

Please take this opportunity to clean up the only national park on the west coast!

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Please take urgent action befitting the critical environmental crisis at Point Reyes.

Sincerely, John Barger

Point Reyes is one of the most beautiful places in California, and it concerns me that to read about the level of pollution that occurs in places which were intended to be for the public

Beef and dairy operators at Point Reyes National Seashore have dammed surface streams to create watering ponds for livestock, thereby depriving downstream fish and native wildlife of the habitat needed to sustain them, especially during drought years.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Victor Carmichael

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

We are in a climate and extinction crisis. We the public, and all agencies should be focused on taking the right steps to address these human-caused issues. Per scientific publications, we are almost out of time, so the time is now.

Please protect human health for beachgoers at Point Reyes. Hold the ranches accountable. Eliminate the water pollution.

Sincerely, Michael Frost

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

What happens to the wildlife when the water runs out?

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, andrea glass

I want to trust the California Coastal Commission is doing all in its power to help fix the problems out on Point Reyes National Seashore.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

Point Reyes National Seashore is at grave risk to be destroyed by the horrible decades-long practices and consequences of cattle ranching among the current and present dangers of climate warming, biodiversity loss, and extended drought. The California Coastal Commission MUST step up and push the National Park Service NOW to rid ranchers and cattle from the American public's National Seashore here, the only national park unit on the West Coast.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Dawn Florio

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

The ranchers have had decades to do the right thing for the environment, and insist to manipulate and obfuscate every chance they can. Raw sewage leaking on lands and in fresh and ocean waters; cattle excrement covering half the park; methane fouling the air; cows as eyesores in what is to be a natural wilderness; and actual dead zones of soil and waters—all by disingenuous ranchers and compliant park management and staff.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

This is our land. Please hold the National Park Service accountable.

Sincerely, Dale Sorensen

Thank you, Coastal Commissioners, for reading my concerns that Point Reyes National Seashore is under threat by its current management practices.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

We should be protecting and restoring wildlife habitat at Point Reyes National Seashore. Scientists say we are in the sixth mass extinction event. critical wildlife habitat.

This is our land. Please hold the National Park Service accountable.

Sincerely, Sagar Patel

I live in the Bay Area and visit Point Reyes National Seashore several times a year. Point Reyes National Seashore has some of the most polluted waterways in California, and the cause of the pollution is due to cattle ranching on leased parcels. Therefore it is unclear why ranching tenants can continue their ranching operations while scientific documentation notes the impact to water and air quality on these public lands.

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, Alexandra Mummery

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

What happens to the wildlife when the water runs out?

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Jeff Howe

I want to thank the Coastal Commissioners for providing an opportunity for the public to share their position on the ongoing issues associated with private cattle ranching in Point Reyes National Seashore.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

The National Park Service has not kept its agreements and can't be relied upon to do so.

Sincerely, Jane Broendel

I want to trust the California Coastal Commission is doing all in its power to help fix the problems out on Point Reyes National Seashore.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

Point Reyes National Seashore is at grave risk to be destroyed by the horrible decades-long practices and consequences of cattle ranching among the current and present dangers of climate warming, biodiversity loss, and extended drought. Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Patricia Patteson

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

The ranchers have had decades to do the right thing for the environment, and insist to manipulate and obfuscate every chance they can. Raw sewage leaking on lands and in fresh and ocean waters; cattle excrement covering half the park; methane fouling the air; cows as eyesores in what is to be a natural wilderness; and actual dead zones of soil and waters—all by disingenuous ranchers and compliant park management and staff.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

This is our land. Please hold the National Park Service accountable.

Sincerely, Frederica Rohlen

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

The ranchers have had decades to do the right thing for the environment, and insist to manipulate and obfuscate every chance they can. Raw sewage leaking on lands and in fresh and ocean waters; cattle excrement covering half the park; methane fouling the air; cows as eyesores in what is to be a natural wilderness; and actual dead zones of soil and waters—all by disingenuous ranchers and compliant park management and staff.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

This is our land. Please hold the National Park Service accountable.

Sincerely, Frederica Rohlen

We are fortunate to have Point Reyes National Seashore located in a metropolitan area, and only 60 minutes from San Francisco..

Point Reyes National Seashore has some of the most polluted waterways in California, and the cause of the pollution is due to cattle ranching on leased parcels. Therefore it is unclear why ranching tenants can continue their ranching operations while scientific documentation notes the impact to water and air quality on these public lands.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, Dr. Steven J. Prince

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

The Coastal Commission is our best hope for cleaning up the water at Point Reyes. Please ensure that the park service develops and implements a strict water quality plan as soon as possible.

Sincerely, Eleanor Navarro

Commissions, your help is urgently needed to clean up Point Reyes National Seashore.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Sylvi Christiansen

I greatly appreciate you taking the time to consider my comment. Point Reyes National Seashore holds a special place in my heart.

As a Marin resident who comes to the park to picnic and kayak, I have become very concerned about water pollution from cattle manure and human sewage spills. It is appalling to learn that some ranch houses have never had septic systems, the NPS knew and did nothing much about it.

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

Please protect human health for beachgoers at Point Reyes. Hold the ranches accountable. Eliminate the water pollution.

Sincerely, Robert Umbreit

I greatly appreciate you taking the time to consider my comment. Point Reyes National Seashore holds a special place in my heart.

As a Marin resident who comes to the park to picnic and kayak, I have become very concerned about water pollution from cattle manure and human sewage spills. It is appalling to learn that some ranch houses have never had septic systems, the NPS knew and did nothing much about it.

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

Please protect human health for beachgoers at Point Reyes. Hold the ranches accountable. Eliminate the water pollution.

Sincerely, Susan Aime

Commissions, your help is urgently needed to clean up Point Reyes National Seashore.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Richard Barker

Commissions, your help is urgently needed to clean up Point Reyes National Seashore.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Carol Goerke

I feel privileged to have the Point Reyes National Seashore virtually in my backyard.

The cattle ranches cover over a third of Point Reyes National Seashore! They were supposed to be gone decades ago! Why are they still allowed to stay there? There are barbed wire and electric fences everywhere that block public access to tens of thousands of acres, and signs saying don't trespass, keep out.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

This is our land. Please hold the National Park Service accountable.

Sincerely, Burkhard Broecker

It is crucial that the State of California have control over the ecosystems and wildlife within the Seashore. I thank you for taking the time to read my thoughts on Point Reyes.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. Would you let your own children wade, walk, hike, traipse, splash, swim, or do any other activity on, in, or near the cattle-dung waters, beaches, creeks, estuaries, tide pools, and fields there? Wouldn't you worry about their health and safety? Please make this park a park and help us protect the coast.

Sincerely, Michael White

Thank you for using your authority to address the terrible conditions at Point Reyes.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, Rhonda Oxley

We need our Commissioners to protect and defend our coastal resources for all the people of California for generations to come.

Point Reyes National Seashore has some of the most polluted waterways in California, and the cause of the pollution is due to cattle ranching on leased parcels. Therefore it is unclear why ranching tenants can continue their ranching operations while scientific documentation notes the impact to water and air quality on these public lands.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Cansu Koroglu

We need our Commissioners to protect and defend our coastal resources for all the people of California for generations to come.

Point Reyes National Seashore has some of the most polluted waterways in California, and the cause of the pollution is due to cattle ranching on leased parcels. The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Cheryl Henley

Thank you for using your authority to address the terrible conditions at Point Reyes.

I have hiked a lot in Point Reyes National Seashore, and I have stopped going to many places because there's so much cow crap everywhere, in streams and on trails and draining onto a lot of beaches there. It's disgusting and really unhealthy. Why is this allowed to continue for years and years and years?

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. Would you let your own children wade, walk, hike, traipse, splash, swim, or do any other activity on, in, or near the cattle-dung waters, beaches, creeks, estuaries, tide pools, and fields there? Wouldn't you worry about their health and safety? Please make this park a park and help us protect the coast.

Sincerely, Erin Gulick

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Point Reyes National Seashore has some of the most polluted waterways in California, and the cause of the pollution is due to cattle ranching on leased parcels. Therefore it is unclear why ranching tenants can continue their ranching operations while scientific documentation notes the impact to water and air quality on these public lands.

The National Park Service knew there was water contamination starting in 2001. Their solution? Just stop sampling in 2013! We look to the Coastal Commission to expeditiously protect and clean up our coastal waters.

This is our land. Please hold the National Park Service accountable.

Sincerely, Sharon Monkhouse

I was at Point Reyes for the first time in years, and it was clear that something has to change.

As a Marin resident who comes to the park to picnic and kayak, I have become very concerned about water pollution from cattle manure and human sewage spills. It is appalling to learn that some ranch houses have never had septic systems, the NPS knew and did nothing much about it.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, Nadine James

Thank you for using your authority to address the terrible conditions at Point Reyes.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, Brandie Deal

As a long-time California resident, I am writing to express sadness and outrage over the conditions at Point Reyes National Seashore.

Our family has enjoyed visiting the Pt Reyes for decades, but the news about unsafe levels of E.coli in the park's streams and beaches is deeply concerning. As a mother, I worry that my children will be exposed to water that is polluted by cattle manure or even human sewage from leaking septic systems. Until these WQ is adequately addressed, we will find alternative places to safely picnic and play.

If we only have ten years to do something about climate change, why are we doing nothing about the critical conditions at Point Reyes?

Please hold the park service accountable, and withdraw your concurrence of the NPS's plan to deliver 20-year leases to ranchers.

Sincerely, Alan Michels

As a long-time California resident, I am writing to express sadness and outrage over the conditions at Point Reyes National Seashore.

Our family has enjoyed visiting the Pt Reyes for decades, but the news about unsafe levels of E.coli in the park's streams and beaches is deeply concerning. The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

Migratory birds from all over the Western United states stop in the Seashore in search of a safe place to rest and refuel along the Pacific Flyway. Endangered marine mammals along the Pacific Coast call Point Reyes home. We now know that Point Reyes provides poor habitat for these protected wildlife. At Point Reyes, water is polluted by cattle manure and land is barren due to too many cows.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, margo wyse

Point Reyes is the only National Seashore on the west coast and needs the California Coastal Commission to protect it from degradation by industrial ag interests.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

Scientists say we are in the sixth mass extinction event. California is attempting to protect 30% of our land and waters by 2030 to help protect our state's wildlife. We can't afford to continue to degrade critical wildlife habitat.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Joelle Hildebrand

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, Laraine Bowen

Thank you, Coastal Commissioners, for reading my concerns that Point Reyes National Seashore is under threat by its current management practices.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

The Channel Islands recently got rid of cattle. We ask the Coastal Service to work with the National Park Service and do the same.

Sincerely, David Boyer

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

It's time for the California Coastal Commission to step in and stop this absurdity! For the sake of people, wildlife, and habitat, stop this long-time tragedy! Point Reyes could be a model for sound and sane climate policy practices, biodiversity restoration, and leading edge drought science.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, Jerry Banks

We need the California Coastal Commission to protect the only National Seashore on the west coast.

Why is so much of the Point Reyes National Seashore permitted to be covered in cow manure from dairy and beef cattle? Cattle excrement can be found on footpaths, in creeks, and in streams. Every visitor—adults, children, pets—should avoid it! Why doesn't the park administration put a stop to it? Why do these ranchers misuse our national park's land and water?

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Stefanie Flax

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Caryn Graves

We need our Commissioners to protect and defend our coastal resources for all the people of California for generations to come.

The thousands of acres in Point Reyes National leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

What happens to the wildlife when the water runs out?

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, Margaret Halbeisen

I want to thank the Coastal Commissioners for providing an opportunity for the public to share their position on the ongoing issues associated with private cattle ranching in Point Reyes National Seashore.

Aquatic life in the Pacific Ocean adjacent to Point Reyes National Seashore are harmed by pollution from ranches. These include the federally endangered Central Coast Coho salmon as well as whales which migrate through the area.

We are in a climate and extinction crisis. We the public, and all agencies should be focused on taking the right steps to address these human-caused issues. Per scientific publications, we are almost out of time, so the time is now.

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. Would you let your own children wade, walk, hike, traipse, splash, swim, or do any other activity on, in, or near the cattle-dung waters, beaches, creeks, estuaries, tide pools, and fields there? Wouldn't you worry about their health and safety? Please make this park a park and help us protect the coast.

Sincerely, sara sang

Thank you for your work to protect our coast, especially at Point Reyes National Seashore.

Citizens look to national parks – "our best idea" – for leadership in the climate crisis, but Point Reyes is an example of the worst practices in conserving water and protecting biodiversity.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, Donald Taylor

Thank you for your work to protect our coast, especially at Point Reyes National Seashore.

It is a tragedy to see the park deteriorate, especially over the last decade. Cattle operations, made worse by drought, have turned the landscape into a sea of bare dirt and manure.

Addressing unsafe water in a park ought to be an urgent public health priority, but the park service acts as if they can deal when it's convenient.

This is our land. Please hold the National Park Service accountable.

Sincerely, Claire Perricelli

Point Reyes is the only national seashore on the Pacific Coast and is designated an International Biological Preserve for its abundant biodiversity and proximity to other protected lands and waters.

I recently read that beaches at Point Reyes received failing grades for water quality, and that these issues have been going on for decades. A National Park in California should not have unsafe water quality.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

Please reconsider your approval of ranching in the national park.

Sincerely, Kelly Murphy-Kennerson

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

Why are dairy and beef cattle allowed to defecate over so much of Point Reyes National Seashore? There is cattle manure in creeks and streams, and covering trails. It's bad for adults, kids, pets, every visitor! Why doesn't the park management stop it? Why do these ranchers abuse the land and water in our national park?

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

My request is that the Coastal Commission holds the park service accountable to its mission, to prioritize the health of the park over the financial interests of cattle ranches.

Sincerely, Carol E Gentry

Thank you for using your authority to address the terrible conditions at Point Reyes.

I have hiked a lot in Point Reyes National Seashore, and I have stopped going to many places because there's so much cow crap everywhere, in streams and on trails and draining onto a lot of beaches there. It's disgusting and really unhealthy. Why is this allowed to continue for years and years and years?

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

Cattle were recently removed from the Channel Islands. We want the National Park Service and the Coastal Service to collaborate and take similar action.

Sincerely, Dawn Williamson

I was at Point Reyes for the first time in years, and it was clear that something has to change.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

What happens to the wildlife when the water runs out?

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, Diana Bryant

Point Reyes is the only national seashore on the Pacific Coast and is designated an International Biological Preserve for its abundant biodiversity and proximity to other protected lands and waters.

I recently read that beaches at Point Reyes received failing grades for water quality, and that these issues have been going on for decades. A National Park in California should not have unsafe water quality.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

Please reconsider your approval of ranching in the national park.

Sincerely, Maggie Kauffman

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

Manure discharged from cows and other livestock at Point Reyes National Seashore not only contaminates our beaches with potentially disease causing fecal bacteria they add nitrogen and phosphorus which cause surface waters to be so choked with emergent vegetation you can hardly see the water.

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

This is a national seashore for the American people and for wildlife and habitat—not a playground or business landscape for private, industrial-level, factory animal operations. Please help get the ranchers out of Point Reyes National Seashore.

Sincerely, Andrew Arneson

Thank you for considering my comment. Point Reyes National Seashore is the "Island in Time" created during the Kennedy Administration that gives so many visitors a beautiful and peaceful way to connect with the natural world.

Our family has enjoyed visiting the Pt Reyes for decades, and have seen first hand the toxic effect of all the cattle grazing that goes on there, but the news about unsafe levels of E.coli in the park's streams and beaches is deeply concerning. As a concerned citizen I worry that our children will be exposed to water that is polluted by cattle manure or even human sewage from leaking septic systems. Until these WQ is adequately addressed, we will find alternative places to safely picnic and play.

Ranchers say the run their operations "sustainably" while they pollute the water, degrade coastal habitats and endanger rare wildlife in order to produce milk and meat that's produced in abundance elsewhere.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now - the stink that they create in and of itself is an insult to the senses and the land!!

Sincerely, Doug Lenier

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

Manure discharged from cows and other livestock at Point Reyes National Seashore not only contaminates our beaches with potentially disease causing fecal bacteria they add nitrogen and phosphorus which cause surface waters to be so choked with emergent vegetation you can hardly see the water.

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

I have hiked a lot in Point Reyes National Seashore, and I have stopped going to many places because there's so much cow crap everywhere, in streams and on trails and draining onto a lot of beaches there. It's disgusting and really unhealthy. Why is this allowed to continue for years and years and years?

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

Please take urgent action befitting the critical environmental crisis at Point Reyes.

Sincerely, Brian Zidian Beans

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

I've been to other historic National Parks such as Williamsburg, VA, where I was welcomed into historic homes for demonstrations of how butter was made and horses cared for. It's horrible to visit the "historic" ranches at Point Reyes National Seashore where I was greeted with "keep out" signs, hostile ranchers on ATVs, and miles of barbed wire. Leasing our National Park provides no educational activities and no benefit to the public, it only feeds the pockets of the greedy beef and dairy operators.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

Please reconsider your approval of ranching in the national park.

Sincerely, Nichole Abramovitz

Thank you for your work to protect our coast, especially at Point Reyes National Seashore.

Beef and dairy operators at Point Reyes National Seashore have dammed surface streams to create watering ponds for livestock, thereby depriving downstream fish and native wildlife of the habitat needed to sustain them, especially during drought years.

The Park Service, park management, and multiple regulatory agencies been tap dancing around this for decades and the damage and harm out there is worse and worse! Please do whatever you can to get rid of ranchers and their cattle, and return our national seashore to nature, not cow crap all over the place!

Thank you for your serious sincere attention and action on this matter! No more private ranching, no more cows in Point Reyes National Seashore!

Sincerely, Karin Ahlf

I feel privileged to have the Point Reyes National Seashore virtually in my backyard.

I've seen cattle where they don't belong—wading in creeks and estuaries that are choked with algae from cattle manure.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Please hold the park service accountable, and withdraw your concurrence of the NPS's plan to deliver 20-year leases to ranchers.

Sincerely, J Lasahn

What is going on at Point Reyes?

The cattle ranches cover over a third of Point Reyes National Seashore! They were supposed to be gone decades ago! Why are they still allowed to stay there? There are barbed wire and electric fences everywhere that block public access to tens of thousands of acres, and signs saying don't trespass, keep out.

This saga has gone on long enough, the park continues to do nothing! This is a national park which should mean something.

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, Peggy Cavanaugh

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

I've seen cattle where they don't belong—wading in creeks and estuaries that are choked with algae from cattle manure.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, Mary Dosch

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

I've been to other historic National Parks such as Williamsburg, VA, where I was welcomed into historic homes for demonstrations of how butter was made and horses cared for. It's horrible to visit the "historic" ranches at Point Reyes National Seashore where I was greeted with "keep out" signs, hostile ranchers on ATVs, and miles of barbed wire. Please reconsider your approval of ranching in the national park.

Sincerely, Eva Johansson

Thank you for considering my comments about the damage to Point Reyes National Seashore from cattle operations. I know that I am not alone in saying the impacts are so apparent and disheartening that I no longer visit the park.

The bike paths at Point Reyes are the worst in Marin – dusty, barren and full of cow poop that gets into your tires, shoes, clothes and skin.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

The National Park Service has not kept its agreements and can't be relied upon to do so.

Sincerely, Patricia Blevins

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Nora Coyle

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

I am confused as to how its legal that some of the worst water quality in the state occurs within a National Park!

The National Park Service has allowed hundreds of our rare and iconic Tule elk to die of thirst during this drought. The Seashore cannot support both cows and elk. And tourists don't come to look at cows.

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, Anita Tsutsunen

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

Manure discharged from cows and other livestock at Point Reyes National Seashore not only contaminates our beaches with potentially disease causing fecal bacteria they add nitrogen and phosphorus which cause surface waters to be so choked with emergent vegetation you can hardly see the water.

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

This is a national seashore for the American people and for wildlife and habitat—not a playground or business landscape for private, industrial-level, factory animal operations. Please help get the ranchers out of Point Reyes National Seashore.

Sincerely, Jill Mulato

This is a national seashore for the American people and for wildlife and habitat—not a playground or business landscape for private, industrial-level, factory animal operations. Please help get the ranchers out of Point Reyes National Seashore.

Sincerely, Darlene Wolf

I am astonished at the continued, ongoing destruction of our public lands in Point Reyes National Seashore. For decades a blind eye has been turned on the pollution, lease violations, habitat loss, biodiversity loss, invasive plants, septic tank violations, illegal bulldozing, the list goes on and on. The NPS is clearly not managing this public land for the benefit of the public. It is continually influenced by ranching operators and politicians who prioritize personal interests above the public good.

It is time for all government and state agencies to do the right thing and retire private ranching from our National Parks.

Sincerely, Daniel Dietrich

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

This is a national seashore for the American people and for wildlife and habitat—not a playground or business landscape for private, industrial-level, factory animal operations. Please help get the ranchers out of Point Reyes National Seashore.

Sincerely, Shiela Cockshott

I want to trust the California Coastal Commission is doing all in its power to help fix the problems out on Point Reyes National Seashore.

I used to enjoy going to the Seashore with friends to hike, kayak, watch birds and take pictures.

What happens to the wildlife when the water runs out?

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Marti Foley

I want to trust the California Coastal Commission is doing all in its power to help fix the problems out on Point Reyes National Seashore.

I used to enjoy going to the Seashore with friends to hike, kayak, watch birds and take pictures.

What happens to the wildlife when the water runs out?

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Laraine Lebron

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

Sincerely, SARAH SWINERTON

I respectively request the California Coastal Commissioners to do everything possible to protect our public lands in Point Reyes National Seashore.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

The Park Service, park management, and multiple regulatory agencies been tap dancing around this for decades and the damage and harm out there is worse and worse! Please do whatever you can to get rid of ranchers and their cattle, and return our national seashore to nature, not cow crap all over the place!

This is our land. Please hold the National Park Service accountable.

Sincerely, marina sagardua

Commissions, your help is urgently needed to clean up Point Reyes National Seashore.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

We should be protecting and restoring wildlife habitat at Point Reyes National Seashore. Scientists say we are in the sixth mass extinction event. critical wildlife habitat.

Please reconsider your approval of ranching in the national park.

Sincerely, minna niemi

Thank you for your work to protect our coast, especially at Point Reyes National Seashore.

This state is in an extreme drought. Cows at Point Reyes are consuming all the water that should be going to natural habitat and wildlife, like the tule elk.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Dorothea Stephan

As a long-time California resident, I am writing to express sadness and outrage over the conditions at Point Reyes National Seashore.

Recent news reports revealed that not only livestock manure is being discharged onto land and into surface waters at Point Reyes National Seashore – human feces have also been spilling into ponds and onto land from failing septic systems that the ranchers are required to maintain as part of their lease agreements.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Marie Mildner

Thank you for reading my comment, Coastal Commissioners. I am a lifelong visitor to Point Reyes.

This state is in an extreme drought. Cows at Point Reyes are consuming all the water that should be going to natural habitat and wildlife, like the tule elk.

Addressing unsafe water in a park ought to be an urgent public health priority, but the park service acts as if they can deal when it's convenient.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, Warren TenHouten

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

Why is it allowed for Point Reyes to have the most contaminated waters on the California Coast if it is unique enough to be a national park and an UN-designated Biodiversity Hot Spot?

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, maria gritsch

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, John Staunton

I am a Bay Area resident. I have visited Point Reyes with friends and family my entire life.

The bike paths at Point Reyes are the worst in Marin – dusty, barren and full of cow poop that gets into your tires, shoes, clothes and skin.

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

Thank you for your serious sincere attention and action on this matter! No more private ranching, no more cows in Point Reyes National Seashore!

Sincerely, Michael White

Thank you for considering my comment. Point Reyes National Seashore is the "Island in Time" created during the Kennedy Administration that gives so many visitors a beautiful and peaceful way to connect with the natural world.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, B G

I was at Point Reyes for the first time in years, and it was clear that something has to change.

I used to love kayaking at Point Reyes but when I heard about how the water quality goes unmonitored, I just couldn't go there anymore.

It's time for the California Coastal Commission to step in and stop this absurdity! For the sake of people, wildlife, and habitat, stop this long-time tragedy! Point Reyes could be a model for sound and sane climate policy practices, biodiversity restoration, and leading edge drought science.

Any plan that is ultimately produced to address the water and climate impacts of ranching, as the Commission has required, must include measurable benchmarks and deadlines for achieving them, enforcement mechanisms, and consequences—including closing down private ranching in the park— for failure to perform.

Sincerely, Judy Fairless

Thank you for your involvement in helping protect the Seashore! We need your leadership to help finally make this park a park.

The thousands of acres in Point Reyes National leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

Cattle were recently removed from the Channel Islands. We want the National Park Service and the Coastal Service to collaborate and take similar action.

Sincerely, Carol Hoke

As a longtime resident of California, I am writing to express my sadness and concern at the current state of Point Reyes National Seashore.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

As the pandemic has shown us, we need to increase public recreation and access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up keeping people out of our parklands.

Because they are an agency of the federal government, the National Park Service at Point Reyes National Seashore has been operating on the mistaken assumption that they are exempt from California laws. Their disregard is intolerable. Please act now and save our land.

Sincerely, Maureen Reardon

Point Reyes is one of the most beautiful places in California, and it concerns me that to read about the level of pollution that occurs in places which were intended to be for the public

Beef and dairy operators at Point Reyes National Seashore have dammed surface streams to create watering ponds for livestock, thereby depriving downstream fish and native wildlife of the habitat needed to sustain them, especially during drought years.

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore.

Because they are an agency of the federal government, the National Park Service at Point Reyes National Seashore has been operating on the mistaken assumption that they are exempt from California laws. Their disregard is intolerable. Please act now and save our land.

Sincerely, Maribel Jerez

I feel privileged to have the Point Reyes National Seashore virtually in my backyard.

Migratory birds from all over the Western United states stop in the Seashore in search of a safe place to rest and refuel along the Pacific Flyway. Endangered marine mammals along the Pacific Coast call Point Reyes home. We now know that Point Reyes provides poor habitat for these protected wildlife. At Point Reyes, water is polluted by cattle manure and land is barren due to too many cows.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, John Hoffman

This issue is and has been ONGOING for years! There is only one answer & fix to this - remove the livestock & take down the fences. How it will be possible to clean up and restore this area - I dont know. I hope it can be.

I want to trust the California Coastal Commission is doing all in its power to help fix the problems out on Point Reyes National Seashore.

Why are dairy and beef cattle allowed to defecate over so much of Point Reyes National Seashore? There is cattle manure in creeks and streams, and covering trails. It's bad for adults, kids, pets, every visitor! Why doesn't the park management stop it? Why do these ranchers abuse the land and water in our national park?

Point Reyes National Seashore is at grave risk to be destroyed by the horrible decades-long practices and consequences of cattle ranching among the current and present dangers of climate warming, biodiversity loss, and extended drought. The California Coastal Commission MUST step up and push the National Park Service NOW to rid ranchers and cattle from the American public's National Seashore here, the only national park unit on the West Coast.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, Maggie Frazier

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Why do ranchers have so much power over our national park? Their cattle create vast dead zones out on the Point. The ranchers and their cattle shouldn't even be there anymore! They constantly manipulate park management and regulatory agencies for private profit and hurt wildlife and visitors with their shady dealings with park management.

Ranchers say the run their operations "sustainably" while they pollute the water, degrade coastal habitats and endanger rare wildlife in order to produce milk and meat that's produced in abundance elsewhere.

Please take urgent action befitting the critical environmental crisis at Point Reyes.

Sincerely, M Goodale Ms

Thank you for considering my comment. Point Reyes National Seashore is the "Island in Time" created during the Kennedy Administration that gives so many visitors a beautiful and peaceful way to connect with the natural world.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Michsel Lerner

Subject:	Agend Item 10b
Date:	Thursday, September 1, 2022 10:57:12 AM

We appreciate you taking action to improve the appalling situation in Point Reyes.

Why is so much of the Point Reyes National Seashore permitted to be covered in cow manure from dairy and beef cattle? Cattle excrement can be found on footpaths, in creeks, and in streams. Every visitor—adults, children, pets—should avoid it! Why doesn't the park administration put a stop to it? Why do these ranchers misuse our national park's land and water?

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Chris Ray

Sincerely, Les Waters

I have lived in northern California a long time, and am really upset about what's going on out at Point Reyes National Seashore.

Too many cattle have turned vast areas of the park into a virtual dead zone.

Scientists say we are in the sixth mass extinction event. California is attempting to protect 30% of our land and waters by 2030 to help protect our state's wildlife. We can't afford to continue to degrade critical wildlife habitat.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Tim Porter

I hope you care about Point Reyes National Seashore as much as I and so many millions of people do.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

The Channel Islands recently got rid of cattle. We ask the Coastal Service to work with the National Park Service and do the same.

Sincerely, Andrea Rohr

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

Why is it allowed for Point Reyes to have the most contaminated waters on the California Coast if it is unique enough to be a national park and an UN-designated Biodiversity Hot Spot?

As the pandemic has shown us, we need to increase public recreation and access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up keeping people out of our parklands.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Rebecca Bufford

Point Reyes is the only national seashore on the Pacific Coast and is designated an International Biological Preserve for its abundant biodiversity and proximity to other protected lands and waters.

Citizens look to national parks – "our best idea" – for leadership in the climate crisis, but Point Reyes is an example of the worst practices in conserving water and protecting biodiversity.

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Chris Bowman

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

This is our land. Please hold the National Park Service accountable.

Sincerely, Brenda Gamache

I am a Bay Area resident. I have visited Point Reyes with friends and family my entire life.

The bike paths at Point Reyes are the worst in Marin – dusty, barren and full of cow poop that gets into your tires, shoes, clothes and skin.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Help the conservation groups to end the pollution and protect this biodiversity hotspot.

Sincerely, Mark Vargo

Sincerely, Hazel Greenstiles

I have been a frequent visitor to Point Reyes for many years--it is one of the main reasons I visit California. I am therefore deeply concerned about recent reports that the streams, lagoons, and estuaries at Point Reyes National Seashore have very high levels of disease-causing fecal bacteria: these water features attract visitors to enjoy the park but now threaten our health and safety.

I don't understand how this ongoing problem continues to be ignored or why a few ranchers who were supposed to leave long ago have not yet done so, and now contribute to pollution of a resource that should be enjoyed by all. No one comes to Point Reyes to see cattle.

Please immediately address the water quality issues that are being created by subsidized private industry in our National Seashore. The National Park System should be protecting wilderness and providing equitable access to the natural world, not supporting private profits that degrade the Pacific Coastline.

Thank you, Cindy L Hoffman

Sincerely, Cindy Hoffman

Protecting our public lands from environmental impacts should be a goal of all local, state and national agencies, especially during a climate crisis, therefore I am writing to urge the Commissioners to protect Point Reyes from constant impacts causing by cattle ranching.

Aquatic life in the Pacific Ocean adjacent to Point Reyes National Seashore are harmed by pollution from ranches. These include the federally endangered Central Coast Coho salmon as well as whales which migrate through the area.

With continued ranching and the drought at Point Reyes National Seashore, I worry very much about the continued loss of biodiversity there. Please do not let the ranchers or the park service continue their mismanagement of this special place.

Please help address and end the constant impact of ranching on our public lands on the Pacific Coast. It is time for our environment to come first, especially on public land.

Sincerely, elizabeth mostov

Thank you for reading my comment, Coastal Commissioners. I am a lifelong visitor to Point Reyes.

Why are dairy and beef cattle allowed to defecate over so much of Point Reyes National Seashore? There is cattle manure in creeks and streams, and covering trails. It's bad for adults, kids, pets, every visitor! Why doesn't the park management stop it? Why do these ranchers abuse the land and water in our national park?

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

Because they are an agency of the federal government, the National Park Service at Point Reyes National Seashore has been operating on the mistaken assumption that they are exempt from California laws. Their disregard is intolerable. Please act now and save our land.

Sincerely, Richard Barker

Thank you for reading my comment, Coastal Commissioners. I am a lifelong visitor to Point Reyes.

Why are dairy and beef cattle allowed to defecate over so much of Point Reyes National Seashore? There is cattle manure in creeks and streams, and covering trails. It's bad for adults, kids, pets, every visitor! Why doesn't the park management stop it? Why do these ranchers abuse the land and water in our national park?

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

Because they are an agency of the federal government, the National Park Service at Point Reyes National Seashore has been operating on the mistaken assumption that they are exempt from California laws. Their disregard is intolerable. Please act now and save our land.

Sincerely, Sandi Aden

Thank you for reading my comment, Coastal Commissioners. I am a lifelong visitor to Point Reyes.

Because they are an agency of the federal government, the National Park Service at Point Reyes National Seashore has been operating on the mistaken assumption that they are exempt from California laws. Their disregard is intolerable. Please act now and save our land.

Sincerely, Dianne Douglas

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

Citizens look to national parks – "our best idea" – for leadership in the climate crisis, but Point Reyes is an example of the worst practices in conserving water and protecting biodiversity.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Any plan that is ultimately produced to address the water and climate impacts of ranching, as the Commission has required, must include measurable benchmarks and deadlines for achieving them, enforcement mechanisms, and consequences—including closing down private ranching in the park— for failure to perform.

Sincerely, Rhonda Anderson

I feel privileged to have the Point Reyes National Seashore virtually in my backyard.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

This saga has gone on long enough, the park continues to do nothing! This is a national park which should mean something.

This is our land. Please hold the National Park Service accountable.

Sincerely, Liz Erpelding-Garratt

Thank you for reading my comment, Coastal Commissioners. I am a lifelong visitor to Point Reyes.

Why are dairy and beef cattle allowed to defecate over so much of Point Reyes National Seashore? There is cattle manure in creeks and streams, and covering trails. Because they are an agency of the federal government, the National Park Service at Point Reyes National Seashore has been operating on the mistaken assumption that they are exempt from California laws. Their disregard is intolerable. Please act now and save our land.

Sincerely, Therese DeBing

As a longtime resident of California, I am writing to express my sadness and concern at the current state of Point Reyes National Seashore.

I used to enjoy going to the Seashore with friends to hike, kayak, watch birds and take pictures.

With continued ranching and the drought at Point Reyes National Seashore, I worry very much about the continued loss of biodiversity there. Please do not let the ranchers or the park service continue their mismanagement of this special place.

Please protect human health for beachgoers at Point Reyes. Hold the ranches accountable. Eliminate the water pollution.

This, like numerous other issues (climate change, gun safety, immigration reform, prison reform, education reform, short-term lending regulation, healthcare reform, banking regulation, opioid regulation) remains a vexing problem primarily due to corporations' ability to curry favor with elected officials. The corrupting influence of money in our political system is undermining our democratic traditions and discouraging Americans from voting and/or running for office. This ominous development may well end our experiment in representative democracy unless we alter this decades-long trend. For the sake of the republic, we must amend the US Constitution to state that corporations are not people (and do not have constitutional rights) and money is not speech (and thus can be regulated by state and/or federal campaign finance laws). Short of accomplishing this, no other reform of significance will be achieved. The moneyed interests will turn any reform to their benefit, often at the expense of the nation as a whole.

Sincerely, James Klein

I respectively request the California Coastal Commissioners to do everything possible to protect our public lands in Point Reyes National Seashore.

The thousands of acres in Point Reyes National leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

What happens to the wildlife when the water runs out?

Please hold the park service accountable, and withdraw your concurrence of the NPS's plan to deliver 20-year leases to ranchers.

Sincerely, Nicole Berkheimer

From:	Moss Henry
To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 4:45:11 PM

The California Coastal Commission must address the issue of water quality and biodiversity at Point Reyes National Seashore. I believe ranches have recently been permitted to remain on the Point. I don't think that was the right direction to go in. The ranches were supposed to be time-limited. But, since the decision has been made, I believe it's essential that water quality and biodiversity be high priorities. With that in mind, I would like to see clear and measurable benchmarks, with timelines, established for water quality. If the benchmarks are not met, the Commission, in conjunction with the Federal and State authorities should take appropriate action to facilitate compliance. If no satisfactory resolution is achieved, I would support eliminating private ranches from Point Reyes.

Sincerely, Moss Henry

Please hold the park service accountable, and withdraw your concurrence of the NPS's plan to deliver 20-year leases to ranchers.

Sincerely, Anne Henry

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

Ranchers say the run their operations "sustainably" while they pollute the water, degrade coastal habitats and endanger rare wildlife in order to produce milk and meat that's produced in abundance elsewhere.

Politics should not be used as the basis for decisions that may influence the future of the Seashore. We need real action now in order to secure a future for Point Reyes.

Sincerely, Mike Cass

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

Over a third of Point Reyes National Seashore is taken up by livestock farms! Years ago, they were supposed to be gone! Why are they still permitted to occupy that space? Tens of thousands of acres are barred off from public access by barbed wire, electric fences, and signs that read "stay out" and "don't trespass."

What happens to the wildlife when the water runs out?

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, Pablo Bobe

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Any plan that is ultimately produced to address the water and climate impacts of ranching, as the Commission has required, must include measurable benchmarks and deadlines for achieving them, enforcement mechanisms, and consequences—including closing down private ranching in the park— for failure to perform.

Sincerely, Lynette McLamb

Thank you for considering my comments about the damage to Point Reyes National Seashore from cattle operations. I know that I am not alone in saying the impacts are so apparent and disheartening that I no longer visit the park.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, El Pe

To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 4:23:10 PM

I am a Bay Area resident. I have visited Point Reyes with friends and family my entire life.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

If you visit Point Reyes National Seashore, you will witness vast degradation by ranchers of lands and waters bequeathed in trust to the American people in perpetuity as a natural wonder. Please do ALL in your power to get the National Park Service (and Seashore management) to enforce existing environmental law, and plan for the removal of all ranching from the park within the next five years, period!

Sincerely, Ruben Terveen

Thank you for your time in reading my remark. I reside in Sacramento and visit Point Reyes National Seashore whenever I can. I have been concerned about the National Park Service's irresponsible management of Point Reyes for several years and was appalled by its plan to kill native tule elk in order to provide more space for cattle ranching.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

Please help us get the ranchers out of our National Seashore! Point Reyes is the only National Seashore on the West Coast of the U.S., and it's becoming a cesspool, even though ranchers were supposed to leave decades ago.

Sincerely, Karen Jacques

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

Citizens look to national parks – "our best idea" – for leadership in the climate crisis, but Point Reyes is an example of the worst practices in conserving water and protecting biodiversity.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Any plan that is ultimately produced to address the water and climate impacts of ranching, as the Commission has required, must include measurable benchmarks and deadlines for achieving them, enforcement mechanisms, and consequences—including closing down private ranching in the park— for failure to perform.

Sincerely, Deborah Richards

I want to trust the California Coastal Commission is doing all in its power to help fix the problems out on Point Reyes National Seashore.

It is a tragedy to see the park deteriorate, especially over the last decade. Cattle operations, made worse by drought, have turned the landscape into a sea of bare dirt and manure.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Kelly Riley

What is going on at Point Reyes?

I am confused as to how its legal that some of the worst water quality in the state occurs within a National Park!

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

The Coastal Commission is our best hope for cleaning up the water at Point Reyes. Please ensure that the park service develops and implements a strict water quality plan as soon as possible.

Sincerely, Cathy Thomas

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

I used to love kayaking at Point Reyes but when I heard about how the water quality goes unmonitored, I just couldn't go there anymore.

As the pandemic has shown us, we need to increase public recreation and access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up keeping people out of our parklands.

Cattle were recently removed from the Channel Islands. We want the National Park Service and the Coastal Service to collaborate and take similar action.

Sincerely, Julie Ford

I am a Bay Area resident. I have visited Point Reyes with friends and family my entire life.

Please do ALL in your power to get the National Park Service (and Seashore management) to enforce existing environmental law, and plan for the removal of all ranching from the park within the next five years, period!

Sincerely, Rolf Friis

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

The bike paths at Point Reyes are the worst in Marin – dusty, barren and full of cow poop that gets into your tires, shoes, clothes and skin.

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

Thank you for your serious sincere attention and action on this matter! No more private ranching, no more cows in Point Reyes National Seashore!

Sincerely, Thomas Dorsey

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

There is a severe drought in this state. At Point Reyes, cows are using up all the water that should be going to animals and natural habitats, including tule elk.

During this drought, the National Park Service has let hundreds of our famous and rare Tule elk perish from dehydration. Elk and cows cannot coexist on the Seashore.

Please reconsider your approval of ranching in the national park.

Sincerely, Anthony Jammal

Thank you for reading my comment about Point Reyes. Years ago my partner proposed to me at the Seashore, so park holds a very special place in my heart.

Beef and dairy operators at Point Reyes National Seashore have dammed surface streams to create watering ponds for livestock, thereby depriving downstream fish and native wildlife of the habitat needed to sustain them, especially during drought years.

We should be protecting and restoring wildlife habitat at Point Reyes National Seashore. Scientists say we are in the sixth mass extinction event. critical wildlife habitat.

The National Park Service has not kept its agreements and can't be relied upon to do so.

Sincerely, Robin Pappas

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

There is a severe drought in this state. At Point Reyes, cows are using up all the water that should be going to animals and natural habitats, including tule elk.

During this drought, the National Park Service has let hundreds of our famous and rare Tule elk perish from dehydration. Elk and cows cannot coexist on the Seashore.

Please reconsider your approval of ranching in the national park.

Sincerely, Janeene Porcher

Thank you for reading my comment about Point Reyes. Years ago my partner proposed to me at the Seashore, so park holds a very special place in my heart.

Migratory birds from all over the Western United states stop in the Seashore in search of a safe place to rest and refuel along the Pacific Flyway. Endangered marine mammals along the Pacific Coast call Point Reyes home. We now know that Point Reyes provides poor habitat for these protected wildlife. At Point Reyes, water is polluted by cattle manure and land is barren due to too many cows.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

Please take urgent action befitting the critical environmental crisis at Point Reyes.

Sincerely, Kaayla Roth

I have visited northern California a number of times and am really upset about what's going on out at Point Reyes National Seashore.

The bike paths at Point Reyes are the worst in Marin – dusty, barren and full of cow poop that gets into your tires, shoes, clothes and skin.

I am concerned that if ranching is not eliminated soon, it may be too late to prevent the loss of already threatened or endangered wildlife that depend the park's natural resources for their survival.

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. Would you let your own children wade, walk, hike, traipse, splash, swim, or do any other activity on, in, or near the cattle-dung waters, beaches, creeks, estuaries, tide pools, and fields there? Wouldn't you worry about their health and safety? Please make this park a park and help us protect the coast.

Sincerely, Susan Brandes

Thank you for using your authority to address the terrible conditions at Point Reyes.

Too many cattle have turned vast areas of the park into a virtual dead zone.

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, Michelle Macy

Thank you for your involvement in helping protect the Seashore! We need your leadership to help finally make this park a park.

Manure discharged from cows and other livestock at Point Reyes National Seashore not only contaminates our beaches with potentially disease causing fecal bacteria they add nitrogen and phosphorus which cause surface waters to be so choked with emergent vegetation you can hardly see the water.

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, renee vesely

I have lived in northern California a long time, and am really upset about what's going on out at Point Reyes National Seashore.

Migratory birds from all over the Western United states stop in the Seashore in search of a safe place to rest and refuel along the Pacific Flyway. Endangered marine mammals along the Pacific Coast call Point Reyes home. We now know that Point Reyes provides poor habitat for these protected wildlife. At Point Reyes, water is polluted by cattle manure and land is barren due to too many cows.

Scientists say we are in the sixth mass extinction event. California is attempting to protect 30% of our land and waters by 2030 to help protect our state's wildlife. We can't afford to continue to degrade critical wildlife habitat.

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, Laura Wagner

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

Aquatic life in the Pacific Ocean adjacent to Point Reyes National Seashore are harmed by pollution from ranches. These include the federally endangered Central Coast Coho salmon as well as whales which migrate through the area.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Tanja Rieger

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

Please help us get the ranchers out of our National Seashore! Point Reyes is the only National Seashore on the West Coast of the U.S., and it's becoming a cesspool, even though ranchers were supposed to leave decades ago.

Sincerely, Patricia Poock

We need the California Coastal Commission to protect the only National Seashore on the west coast.

Why do ranchers have so much power over our national park? Their cattle create vast dead zones out on the Point. The ranchers and their cattle shouldn't even be there anymore! They constantly manipulate park management and regulatory agencies for private profit and hurt wildlife and visitors with their shady dealings with park management.

During this drought, the National Park Service has let hundreds of our famous and rare Tule elk perish from dehydration. Elk and cows cannot coexist on the Seashore.

The National Park Service has not kept its agreements and can't be relied upon to do so.

Sincerely, Beth Herman

I have lived in northern California a long time, and am really upset about what's going on out at Point Reyes National Seashore.

The bike paths at Point Reyes are the worst in Marin – dusty, barren and full of cow poop that gets into your tires, shoes, clothes and skin.

I am concerned that if ranching is not eliminated soon, it may be too late to prevent the loss of already threatened or endangered wildlife that depend the park's natural resources for their survival.

To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 3:55:10 PM

Point Reyes National Seashore is one of the world's biodiversity hotspots.

As a Marin resident who comes to the park to picnic and kayak, I have become very concerned about water pollution from cattle manure and human sewage spills. It is appalling to learn that some ranch houses have never had septic systems, the NPS knew and did nothing much about it.

Addressing unsafe water in a park ought to be an urgent public health priority, but the park service acts as if they can deal when it's convenient.

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. Would you let your own children wade, walk, hike, traipse, splash, swim, or do any other activity on, in, or near the cattle-dung waters, beaches, creeks, estuaries, tide pools, and fields there? Wouldn't you worry about their health and safety? Please make this park a park and help us protect the coast.

Sincerely, Deidre and Ronald Brown

As a long-time California resident, I am writing to express sadness and outrage over the conditions at Point Reyes National Seashore.

Why is so much of the Point Reyes National Seashore permitted to be covered in cow manure from dairy and beef cattle? Cattle excrement can be found on footpaths, in creeks, and in streams. Every visitor—adults, children, pets—should avoid it! Why doesn't the park administration put a stop to it? Why do these ranchers misuse our national park's land and water?

If we only have ten years to do something about climate change, why are we doing nothing about the critical conditions at Point Reyes?

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Heather Walker-Dale

The Commissioners have an important role protecting our coast.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Mary Jeffrey

The Commissioners have an important role protecting our coast.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Shannan Johnson

I respectively request the California Coastal Commissioners to do everything possible to protect our public lands in Point Reyes National Seashore.

The bike paths at Point Reyes are the worst in Marin – dusty, barren and full of cow poop that gets into your tires, shoes, clothes and skin.

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

Cattle were recently removed from the Channel Islands. We want the National Park Service and the Coastal Service to collaborate and take similar action.

Sincerely, Bridgette Guin

I want to thank the Coastal Commissioners for providing an opportunity for the public to share their position on the ongoing issues associated with private cattle ranching in Point Reyes National Seashore.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore.

The Channel Islands recently got rid of cattle. We ask the Coastal Service to work with the National Park Service and do the same.

Sincerely, Lynn Dutton

From:	Amber Sumrall
To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 3:49:11 PM

Commissions, your help is urgently needed to clean up Point Reyes National Seashore.

Our family has enjoyed visiting the Pt Reyes for decades, but the news about unsafe levels of E.coli in the park's streams and beaches is deeply concerning. As a mother, I worry that my children will be exposed to water that is polluted by cattle manure or even human sewage from leaking septic systems. Until these WQ is adequately addressed, we will find alternative places to safely picnic and play.

As the pandemic has shown us, we need to increase public recreation and access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up keeping people out of our parklands.

Help the conservation groups to end the pollution and protect this biodiversity hotspot.

Sincerely, Amber Sumrall

Point Reyes is the only National Seashore on the west coast and needs the California Coastal Commission to protect it from degradation by industrial ag interests.

The ranchers have had decades to do the right thing for the environment, and insist to manipulate and obfuscate every chance they can. Raw sewage leaking on lands and in fresh and ocean waters; cattle excrement covering half the park; methane fouling the air; cows as eyesores in what is to be a natural wilderness; and actual dead zones of soil and waters—all by disingenuous ranchers and compliant park management and staff.

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. Would you let your own children wade, walk, hike, traipse, splash, swim, or do any other activity on, in, or near the cattle-dung waters, beaches, creeks, estuaries, tide pools, and fields there? Wouldn't you worry about their health and safety? Please make this park a park and help us protect the coast.

Sincerely, Tony Espinosa

The Commissioners have an important role protecting our coast.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Kate Griffin

I am a Bay Area resident. I have visited Point Reyes with friends and family my entire life.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

"First gradually, then all at once." That is the history of the environmental crisis at Point Reyes. Please address this urgent need.

Sincerely, M S Dillon III

I was at Point Reyes for the first time in years, and it was clear that something has to change.

Too many cattle have turned vast areas of the park into a virtual dead zone.

The Coastal Commission was created to protect our coast and needs to use the power it has to affect change at the National Park Service.

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Date:	Tuesday, August 30, 2022 3:38:10 PM

The Commissioners have an important role protecting our coast.

Recent news reports revealed that not only livestock manure is being discharged onto land and into surface waters at Point Reyes National Seashore – human feces have also been spilling into ponds and onto land from failing septic systems that the ranchers are required to maintain as part of their lease agreements.

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, graciela ramirez

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

We should be protecting and restoring wildlife habitat at Point Reyes National Seashore. Scientists say we are in the sixth mass extinction event. critical wildlife habitat.

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, Jennifer Valentine

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

If Point Reyes is special enough to be a national park and UN-designated Biodiversity Hot Spot, why is it permitted to have the most polluted waters on the California Coast?

The Coastal Commission was created to protect our coast and needs to use the power it has to affect change at the National Park Service.

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. Would you let your own children wade, walk, hike, traipse, splash, swim, or do any other activity on, in, or near the cattle-dung waters, beaches, creeks, estuaries, tide pools, and fields there? We appreciate you taking action to improve the appalling situation in Point Reyes.

Why do ranchers have so much power over our national park? Their cattle create vast dead zones out on the Point. The ranchers and their cattle shouldn't even be there anymore! They constantly manipulate park management and regulatory agencies for private profit and hurt wildlife and visitors with their shady dealings with park management.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Please help address and end the constant impact of ranching on our public lands on the Pacific Coast. It is time for our environment to come first, especially on public land.

Sincerely, Sue Hall

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, Steve Lustgarden

Thank you for using your authority to address the terrible conditions at Point Reyes.

It is a tragedy to see the park deteriorate, especially over the last decade. Cattle operations, made worse by drought, have turned the landscape into a sea of bare dirt and manure.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, S. Chapek

ernon.margaret0@gmail.comThank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Margaret Vernon

The Commissioners have an important role protecting our coast.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Deanna Mousaw

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

As a regular visitor to the park, I frequently see cattle trampling through creeks and streams, and even standing and pooping in Drakes Estero. In places where cattle are seen, I step over cow feces on trails and shorelines. It's no wonder the water quality is terrible.

We are in the midst of a climate crisis, and most are being too slow to address it. For example, many are not actively working to decrease water use, nor actively working toward the protection of water quality of the water we have.

If you visit Point Reyes National Seashore, you will witness vast degradation by ranchers of lands and waters bequeathed in trust to the American people in perpetuity as a natural wonder. Please do ALL in your power to get the National Park Service (and Seashore management) to enforce existing environmental law, and plan for the removal of all ranching from the park within the next five years, period!

Sincerely, Angela Buckley

Thank you for reading my comment about Point Reyes. Years ago my partner proposed to me at the Seashore, so park holds a very special place in my heart.

Migratory birds from all over the Western United states stop in the Seashore in search of a safe place to rest and refuel along the Pacific Flyway. Endangered marine mammals along the Pacific Coast call Point Reyes home. We now know that Point Reyes provides poor habitat for these protected wildlife. At Point Reyes, water is polluted by cattle manure and land is barren due to too many cows.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

Please take urgent action befitting the critical environmental crisis at Point Reyes.

Sincerely, Robert Jehn

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, Aida Marina

The Commissioners have an important role protecting our coast.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Vanessa Seay

The Commissioners have an important role protecting our coast.

If Point Reyes is special enough to be a national park and UN-designated Biodiversity Hot Spot, why is it permitted to have the most polluted waters on the California Coast?

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Elaine Benjamin

The Commissioners have an important role protecting our coast.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Sharon Frank

The Commissioners have an important role protecting our coast.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Dina Frigo

I am a San Rafael resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Over a third of Point Reyes National Seashore is taken up by livestock farms! Years ago, they were supposed to be gone! Why are they still permitted to occupy that space? Tens of thousands of acres are barred off from public access by barbed wire, electric fences, and signs that read "stay out" and "don't trespass."

Ranches are not self-supporting and would not be in the park were they not subsidized by our tax dollars.

My request is that the Coastal Commission holds the park service accountable to its mission, to prioritize the health of the park over the financial interests of cattle ranches.

Sincerely, Alexander Vollmer

The Commissioners have an important role protecting our coast.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Natalie Bonus

It is crucial that the State of California have control over the ecosystems and wildlife within the Seashore. I thank you for taking the time to read my thoughts on Point Reyes.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

Please reconsider your approval of ranching in the national park.

Sincerely, Elaine Cook

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, Jane Larson

I greatly appreciate you taking the time to consider my comment. Point Reyes National Seashore holds a special place in my heart.

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life.

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Laura Chinofsky

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

Point Reyes is the only national seashore on the West Coast. Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, Kelli Petersen

I am a Bay Area resident. I have visited Point Reyes with friends and family my entire life.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

The Coastal Commission is our best hope for cleaning up the water at Point Reyes. Please ensure that the park service develops and implements a strict water quality plan as soon as possible.

Sincerely, Bernadette Belcastro

Point Reyes is the only national seashore on the Pacific Coast and is designated an International Biological Preserve for its abundant biodiversity and proximity to other protected lands and waters.

Why is it allowed for Point Reyes to have the most contaminated waters on the California Coast if it is unique enough to be a national park and an UN-designated Biodiversity Hot Spot?

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

Please protect human health for beachgoers at Point Reyes. Hold the ranches accountable. Eliminate the water pollution.

Sincerely, Carolyn Anderson

The Commissioners have an important role protecting our coast.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Matthew Schaut

The Commissioners have an important role protecting our coast.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Pamela Shaw

I want to thank the Coastal Commissioners for providing an opportunity for the public to share their position on the ongoing issues associated with private cattle ranching in Point Reyes National Seashore.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending ranching, and allow conservation efforts to be initiated.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, Jeff Hoffman

Thank you for reading my comment, Coastal Commissioners. I am a lifelong visitor to Point Reyes.

Too many cattle have turned vast areas of the park into a virtual dead zone.

The Park Service, park management, and multiple regulatory agencies been tap dancing around this for decades and the damage and harm out there is worse and worse! Please do whatever you can to get rid of ranchers and their cattle, and return our national seashore to nature, not cow crap all over the place!

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Ann DeBolt

Commissions, your help is urgently needed to clean up Point Reyes National Seashore.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

Scientists say we are in the sixth mass extinction event. California is attempting to protect 30% of our land and waters by 2030 to help protect our state's wildlife. We can't afford to continue to degrade critical wildlife habitat.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Debra Rehn

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

There is a severe drought in this state. At Point Reyes, cows are using up all the water that should be going to animals and natural habitats, including tule elk.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. Would you let your own children wade, walk, hike, traipse, splash, swim, or do any other activity on, in, or near the cattle-dung waters, beaches, creeks, estuaries, tide pools, and fields there? Wouldn't you worry about their health and safety? Please make this park a park and help us protect the coast.

Sincerely, Nancy Fleming

We need the California Coastal Commission to protect the only National Seashore on the west coast.

Why do ranchers have so much power over our national park? Their cattle create vast dead zones out on the Point. The ranchers and their cattle shouldn't even be there anymore! They constantly manipulate park management and regulatory agencies for private profit and hurt wildlife and visitors with their shady dealings with park management.

During this drought, the National Park Service has let hundreds of our famous and rare Tule elk perish from dehydration. Elk and cows cannot coexist on the Seashore.

The National Park Service has not kept its agreements and can't be relied upon to do so.

Sincerely, Cassandra Cranmer

Sincerely, Robert Ferrara

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Tracey Aquino

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

As the pandemic has shown us, we need to increase public recreation and access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up keeping people out of our parklands.

The Channel Islands recently got rid of cattle. We ask the Coastal Service to work with the National Park Service and do the same.

Sincerely, Elise Mallove

What is going on at Point Reyes?

The thousands of acres in Point Reyes National leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

It's time for the California Coastal Commission to step in and stop this absurdity! For the sake of people, wildlife, and habitat, stop this long-time tragedy! Point Reyes could be a model for sound and sane climate policy practices, biodiversity restoration, and leading edge drought science.

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, Rebecca Skalsky

I was at Point Reyes for the first time in years, and it was clear that something has to change.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

We are in the midst of a climate crisis, and most are being too slow to address it. For example, many are not actively working to decrease water use, nor actively working toward the protection of water quality of the water we have.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Orysia Twerdochlib

The Commissioners have an important role protecting our coast.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

Point Reyes is the only national seashore on the Pacific Coast and is designated an International Biological Preserve for its abundant biodiversity and proximity to other protected lands and waters.

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life.

Addressing unsafe water in a park ought to be an urgent public health priority, but the park service acts as if they can deal when it's convenient.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, Ken Martin

Thank you, Coastal Commissioners, for reading my concerns that Point Reyes National Seashore is under threat by its current management practices.

As a regular visitor to the park, I frequently see cattle trampling through creeks and streams, and even standing and pooping in Drakes Estero. In places where cattle are seen, I step over cow feces on trails and shorelines. It's no wonder the water quality is terrible.

We should be protecting and restoring wildlife habitat at Point Reyes National Seashore. Scientists say we are in the sixth mass extinction event. critical wildlife habitat.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Ken Martin

Thank you for taking the time to read my comment. I live in the Bay Area and visit Point Reyes National Seashore several times a month.

The thousands of acres in Point Reyes National leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

If we only have ten years to do something about climate change, why are we doing nothing about the critical conditions at Point Reyes?

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, John Barger

What is going on at Point Reyes?

The thousands of acres in Point Reyes National leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

Sincerely, Jacqui Skill

It is crucial that the State of California have control over the ecosystems and wildlife within the Seashore. I thank you for taking the time to read my thoughts on Point Reyes.

I recently read that beaches at Point Reyes received failing grades for water quality, and that these issues have been going on for decades. A National Park in California should not have unsafe water quality.

Our planet needs to be saved from constant, known environmental impact, and the general public deserves the opportunity to visit this National Seashore and experience clean surface waters in the creeks and on the beaches, and public access to all of the park, rather than having over 300 miles of electric and barb-wire fences used for cattle ranching.

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, Lilly Knuth

As a longtime resident of California, I am writing to express my sadness and concern at the current state of Point Reyes National Seashore.

Why do ranchers have so much power over our national park? Their cattle create vast dead zones out on the Point. The ranchers and their cattle shouldn't even be there anymore! They constantly manipulate park management and regulatory agencies for private profit and hurt wildlife and visitors with their shady dealings with park management.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

Please hold the park service accountable, and withdraw your concurrence of the NPS's plan to deliver 20-year leases to ranchers.

Sincerely, LESLIE COHEN

Point Reyes National Seashore is one of the world's biodiversity hotspots.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Ben Martin

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

Recent news reports revealed that not only livestock manure is being discharged onto land and into surface waters at Point Reyes National Seashore – human feces have also been spilling into ponds and onto land from failing septic systems that the ranchers are required to maintain as part of their lease agreements.

Cattle ranching at Point Reyes is clearly not sustainable. Ranchers buy supplemental water and grass for cows, while wildlife are expected to die, according to the park service. The climate crisis will only worsen conditions.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Michael Hegemeyer

Point Reyes is the only National Seashore on the west coast and needs the California Coastal Commission to protect it from degradation by industrial ag interests.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Helen Salyers

Point Reyes is the only National Seashore on the west coast and needs the California Coastal Commission to protect it from degradation by industrial ag interests.

The trash, heaps of cattle manure, beaches closed to the public because of dangerous levels of bacteria from cows—shouldn't be happening in a national park.

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

Help the conservation groups to end the pollution and protect this biodiversity hotspot.

Sincerely, Arifa Isabel

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 2:58:17 PM

We appreciate you taking action to improve the appalling situation in Point Reyes.

Why is so much of the Point Reyes National Seashore permitted to be covered in cow manure from dairy and beef cattle? Cattle excrement can be found on footpaths, in creeks, and in streams. Every visitor—adults, children, pets—should avoid it! Why doesn't the park administration put a stop to it? Why do these ranchers misuse our national park's land and water?

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

"First gradually, then all at once." That is the history of the environmental crisis at Point Reyes. Please address this urgent need.

Sincerely, Vittorio Ricci

Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 2:58:16 PM

Commissions, your help is urgently needed to clean up Point Reyes National Seashore.

Why do ranchers have so much power over our national park? Their cattle create vast dead zones out on the Point. The ranchers and their cattle shouldn't even be there anymore! They constantly manipulate park management and regulatory agencies for private profit and hurt wildlife and visitors with their shady dealings with park management.

With continued ranching and the drought at Point Reyes National Seashore, I worry very much about the continued loss of biodiversity there. Please do not let the ranchers or the park service continue their mismanagement of this special place.

Any plan that is ultimately produced to address the water and climate impacts of ranching, as the Commission has required, must include measurable benchmarks and deadlines for achieving them, enforcement mechanisms, and consequences—including closing down private ranching in the park— for failure to perform.

Sincerely, Connie Dunn

I want to trust the California Coastal Commission is doing all in its power to help fix the problems out on Point Reyes National Seashore.

Too many cattle have turned vast areas of the park into a virtual dead zone.

This saga has gone on long enough, the park continues to do nothing! This is a national park which should mean something.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Rachael Glogovsky

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life.

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Ibrahim Moreno

We are fortunate to have Point Reyes National Seashore located in a metropolitan area, and only 60 minutes from San Francisco..

I am confused as to how its legal that some of the worst water quality in the state occurs within a National Park!

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, John Hagen

I want to trust the California Coastal Commission is doing all in its power to help fix the problems out on Point Reyes National Seashore.

Too many cattle have turned vast areas of the park into a virtual dead zone.

This saga has gone on long enough, the park continues to do nothing! This is a national park which should mean something.

Decisions affecting the future of the Seashore should be based in science, not politics. The cattle need to go elsewhere. This national park belongs to all the people not just a few cattle ranchers. The pollution and degradation to the shoreline, ocean and surrounding areas is very concerning.

Sincerely, PATRICIA BROWNE

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, Kathryn Beyers

The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, Margo Salone

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

Addressing unsafe water in a park ought to be an urgent public health priority, but the park service acts as if they can deal when it's convenient.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Charleen Strelke

Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 2:52:07 PM

Thank you for using your authority to address the terrible conditions at Point Reyes.

Why do ranchers have so much power over our national park? Their cattle create vast dead zones out on the Point. The ranchers and their cattle shouldn't even be there anymore! They constantly manipulate park management and regulatory agencies for private profit and hurt wildlife and visitors with their shady dealings with park management.

The National Park Service lacks the resources (money and personnel) necessary to control the profit-driven, opportunistic ranchers who don't spare a thought about environmental health and safety.

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. Would you let your own children wade, walk, hike, traipse, splash, swim, or do any other activity on, in, or near the cattle-dung waters, beaches, creeks, estuaries, tide pools, and fields there? Wouldn't you worry about their health and safety? Please make this park a park and help us protect the coast.

Sincerely, nadine vergilia

What is going on at Point Reyes?

The thousands of acres in Point Reyes National leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

It's time for the California Coastal Commission to step in and stop this absurdity! For the sake of people, wildlife, and habitat, stop this long-time tragedy! Point Reyes could be a model for sound and sane climate policy practices, biodiversity restoration, and leading edge drought science.

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, Bob Johnston

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, David Gross

Thank you for considering my comment. Point Reyes National Seashore is the "Island in Time" created during the Kennedy Administration that gives so many visitors a beautiful and peaceful way to connect with the natural world.

Point Reyes National Seashore has some of the most polluted waterways in California, and the cause of the pollution is due to cattle ranching on leased parcels. Therefore it is unclear why ranching tenants can continue their ranching operations while scientific documentation notes the impact to water and air quality on these public lands.

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

If you visit Point Reyes National Seashore, you will witness vast degradation by ranchers of lands and waters bequeathed in trust to the American people in perpetuity as a natural wonder. Please do ALL in your power to get the National Park Service (and Seashore management) to enforce existing environmental law, and plan for the removal of all ranching from the park within the next five years, period!

Sincerely, Tony Menechella

We need the California Coastal Commission to protect the only National Seashore on the west coast.

I used to enjoy going to the Seashore with friends to hike, kayak, watch birds and take pictures.

As the pandemic has shown us, we need to increase public recreation and access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up keeping people out of our parklands.

Help the conservation groups to end the pollution and protect this biodiversity hotspot.

Sincerely, Candace Klein-Loetterle

Thank you for considering my comment. Point Reyes National Seashore is the "Island in Time" created during the Kennedy Administration that gives so many visitors a beautiful and peaceful way to connect with the natural world.

Point Reyes National Seashore has some of the most polluted waterways in California, and the cause of the pollution is due to cattle ranching on leased parcels. Therefore it is unclear why ranching tenants can continue their ranching operations while scientific documentation notes the impact to water and air quality on these public lands.

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

If you visit Point Reyes National Seashore, you will witness vast degradation by ranchers of lands and waters bequeathed in trust to the American people in perpetuity as a natural wonder. Please do ALL in your power to get the National Park Service (and Seashore management) to enforce existing environmental law, and plan for the removal of all ranching from the park within the next five years, period!

Sincerely, Carina Chadwick

Thank you for taking the time to read my comment. I live in the Bay Area and visit Point Reyes National Seashore several times a month.

The ranchers have had decades to do the right thing for the environment, and insist to manipulate and obfuscate every chance they can. Raw sewage leaking on lands and in fresh and ocean waters; cattle excrement covering half the park; methane fouling the air; cows as eyesores in what is to be a natural wilderness; and actual dead zones of soil and waters—all by disingenuous ranchers and compliant park management and staff.

We are in the midst of a climate crisis, and most are being too slow to address it. For example, many are not actively working to decrease water use, nor actively working toward the protection of water quality of the water we have.

Any plan that is ultimately produced to address the water and climate impacts of ranching, as the Commission has required, must include measurable benchmarks and deadlines for achieving them, enforcement mechanisms, and consequences—including closing down private ranching in the park— for failure to perform.

Sincerely, Robert Reed

Thank you for considering my comments about the damage to Point Reyes National Seashore from cattle operations. I know that I am not alone in saying the impacts are so apparent and disheartening that I no longer visit the park.

Why is it allowed for Point Reyes to have the most contaminated waters on the California Coast if it is unique enough to be a national park and an UN-designated Biodiversity Hot Spot?

The Park Service, park management, and multiple regulatory agencies been tap dancing around this for decades and the damage and harm out there is worse and worse! Please do whatever you can to get rid of ranchers and their cattle, and return our national seashore to nature, not cow crap all over the place!

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Dawn Barclift

We need the California Coastal Commission to protect the only National Seashore on the west coast.

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

Addressing unsafe water in a park ought to be an urgent public health priority, but the park service acts as if they can deal when it's convenient.

The National Park Service has not kept its agreements and can't be relied upon to do so.

Sincerely, Tristan Sophia

Point Reyes is the only National Seashore on the west coast and needs the California Coastal Commission to protect it from degradation by industrial ag interests.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

We are in a climate and extinction crisis. We the public, and all agencies should be focused on taking the right steps to address these human-caused issues. Per scientific publications, we are almost out of time, so the time is now.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Victor Carmichael

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Rosamund Downing

What is going on at Point Reyes?

The thousands of acres in Point Reyes National leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

It's time for the California Coastal Commission to step in and stop this absurdity! For the sake of people, wildlife, and habitat, stop this long-time tragedy! Point Reyes could be a model for sound and sane climate policy practices, biodiversity restoration, and leading edge drought science.

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, Lacey Levitt

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Karen Berger

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Gail Veiby

Thank you for considering my comment. Point Reyes National Seashore is the "Island in Time" created during the Kennedy Administration that gives so many visitors a beautiful and peaceful way to connect with the natural world.

There is a severe drought in this state. At Point Reyes, cows are using up all the water that should be going to animals and natural habitats, including tule elk.

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, Tara Bond

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life.

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Robert Gerosa

Thank you for considering my comment. Point Reyes National Seashore is the "Island in Time" created during the Kennedy Administration that gives so many visitors a beautiful and peaceful way to connect with the natural world.

There is a severe drought in this state. At Point Reyes, cows are using up all the water that should be going to animals and natural habitats, including tule elk.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, Mona Bond

I respectively request the California Coastal Commissioners to do everything possible to protect our public lands in Point Reyes National Seashore.

Our family has enjoyed visiting the Pt Reyes for decades, but the news about unsafe levels of E.coli in the park's streams and beaches is deeply concerning. As a mother, I worry that my children will be exposed to water that is polluted by cattle manure or even human sewage from leaking septic systems. Until these WQ is adequately addressed, we will find alternative places to safely picnic and play.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Colleen Lobel

Thank you for considering my comment. Point Reyes National Seashore is the "Island in Time" created during the Kennedy Administration that gives so many visitors a beautiful and peaceful way to connect with the natural world.

There is a severe drought in this state. At Point Reyes, cows are using up all the water that should be going to animals and natural habitats, including tule elk.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, Lisa Tichenor

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

The National Park Service knew there was water contamination starting in 2001. Their solution? Just stop sampling in 2013! We look to the Coastal Commission to expeditiously protect and clean up our coastal waters.

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, Katlyn Stranger

Thank you for considering my comments about the damage to Point Reyes National Seashore from cattle operations. I know that I am not alone in saying the impacts are so apparent and disheartening that I no longer visit the park.

This state is in an extreme drought. Cows at Point Reyes are consuming all the water that should be going to natural habitat and wildlife, like the tule elk.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, Patricia Gregory

Thank you for considering my comments about the damage to Point Reyes National Seashore from cattle operations. I know that I am not alone in saying the impacts are so apparent and disheartening that I no longer visit the park.

Why is it allowed for Point Reyes to have the most contaminated waters on the California Coast if it is unique enough to be a national park and an UN-designated Biodiversity Hot Spot?

The Park Service, park management, and multiple regulatory agencies been tap dancing around this for decades and the damage and harm out there is worse and worse! Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, vana spear

It is crucial that the State of California have control over the ecosystems and wildlife within the Seashore. I thank you for taking the time to read my thoughts on Point Reyes.

Too many cattle have turned vast areas of the park into a virtual dead zone.

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, kirk francis

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

If ranches weren't funded by our taxes, they couldn't exist and wouldn't be allowed in the park. Why are we paying for them to pollute our waters?

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Gillian Miller

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Laura Guttridge

Point Reyes is the only National Seashore on the west coast and needs the California Coastal Commission to protect it from degradation by industrial ag interests.

I used to enjoy going to the Seashore with friends to hike, kayak, watch birds and take pictures.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Dobi Dobroslawa

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Nicholas Mouzourakis

The California Coastal Commission must do everything in its power to correct the problems on Point Reyes National Seashore.

Cattle have converted vast areas of the park into a virtual dead zone.

This has gone on far too long, and the park does nothing. The fact that this is a national park should mean something.

Decisions affecting the Seashore's future must be based in science rather than politics.

Sincerely, Marilyn Martin

Thank you for reading my comment, Coastal Commissioners. I am a lifelong visitor to Point Reyes.

Too many cattle have turned vast areas of the park into a virtual dead zone.

The Park Service, park management, and multiple regulatory agencies been tap dancing around this for decades and the damage and harm out there is worse and worse! Please do whatever you can to get rid of ranchers and their cattle, and return our national seashore to nature, not cow crap all over the place!

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Elizabeth Smith

Thank you for reading my comment, Coastal Commissioners. I am a lifelong visitor to Point Reyes.

Too many cattle have turned vast areas of the park into a virtual dead zone.

The Park Service, park management, and multiple regulatory agencies been tap dancing around this for decades and the damage and harm out there is worse and worse! Sincerely, l lee

I want to trust the California Coastal Commission is doing all in its power to help fix the problems out on Point Reyes National Seashore.

Too many cattle have turned vast areas of the park into a virtual dead zone.

This saga has gone on long enough, the park continues to do nothing! This is a national park which should mean something.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Susana Soares

Save Point Reyes!

The thousands of acres in Point Reyes National leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

It's time for the California Coastal Commission to step in and stop this absurdity! For the sake of people, wildlife, and habitat, stop this long-time tragedy! Point Reyes could be a model for sound and sane climate policy practices, biodiversity restoration, and leading edge drought science.

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, David Sumner

As a longtime resident of California, I am writing to express my sadness and concern at the current state of Point Reyes National Seashore.

Migratory birds from all over the Western United states stop in the Seashore in search of a safe place to rest and refuel along the Pacific Flyway. Endangered marine mammals along the Pacific Coast call Point Reyes home. We now know that Point Reyes provides poor habitat for these protected wildlife. At Point Reyes, water is polluted by cattle manure and land is barren due to too many cows.

Cattle ranching at Point Reyes is clearly not sustainable. Ranchers buy supplemental water and grass for cows, while wildlife are expected to die, according to the park service. The climate crisis will only worsen conditions.

Thank you for your serious sincere attention and action on this matter! No more private ranching, no more cows in Point Reyes National Seashore!

Sincerely, Julie Hansen

Thank you for taking the time to read my comment. I live in the Bay Area and visit Point Reyes National Seashore several times a month.

The thousands of acres in Point Reyes National Seashore leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

If we only have ten years to do something about climate change, why are we doing nothing about the critical conditions at Point Reyes?

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Pt. Reyes is a unique environment that should be protected as was the original intent in designating it as a National Seashore, NOT a National For-profit Dairy! It is time to bring the polluting dairies on Pt. Reyes to an end and restore the land to its natural state!

Sincerely, Chuck Wilson

From:	Michael Zeller
To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 2:33:07 PM

We are fortunate to have Point Reyes National Seashore located in a metropolitan area, and only 60 minutes from San Francisco..

The National Park Service has not performed water quality monitoring in the known polluted waterways in Point Reyes for years – this is unacceptable. If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

Our planet needs to be saved from constant, known environmental impact, and the general public deserves the opportunity to visit this National Seashore and experience clean surface waters in the creeks and on the beaches, and public access to all of the park, rather than having over 300 miles of electric and barb-wire fences used for cattle ranching.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Michael Zeller

I want to thank the Coastal Commissioners for providing an opportunity for the public to share their position on the ongoing issues associated with private cattle ranching in Point Reyes National Seashore.

My son and I have visited this area and seen the damage from cattle personally. The area stinks of cow manure! He was absolutely disgusted and neither of us consume cow products after having seen how they are impacting this important area. Furthermore, there is no way we should be subsidizing this industry that is not friendly to climate or marine conservation. Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, Kristin Reed

Sincerely, anne veraldi

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

The National Park Service knew there was water contamination starting in 2001. Their solution? Just stop sampling in 2013! We look to the Coastal Commission to expeditiously protect and clean up our coastal waters.

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, Nina Monasevitch

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Sheila Kelley

Thank you, Coastal Commissioners, for reading my concerns that Point Reyes National Seashore is under threat by its current management practices.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Thank you for your serious sincere attention and action on this matter! No more private ranching, no more cows in Point Reyes National Seashore!

Sincerely, Arden Green

Thank you.

Sincerely, Maree Penhart

I have lived in northern California over 50 years, and am really upset about what's going on out at Point Reyes National Seashore. The park is hardly recognizable to me at this point.

A national park should not contain this wide breadth of environmental problems. Nor should over a third of a national park be placed aside for private industry !! At the same time, Tule Elk are dying of thirst because they are fenced in and cannot access the water they need to survive. This is extremely cruel to a native species that was returned with much fanfare to its native habitat after having been extirpated in the past.

Why are we not protecting and restoring wildlife habitat at Point Reyes National Seashore? Scientists say we are in the sixth mass extinction event. We need to protect all critical wildlife habitat to save as many native species as possible.

This is a national seashore for the American people and for wildlife and habitat—not a playground or business landscape for private, industrial-level, factory animal operations. Ranchers don't belong in a National Seashore. Please help get the ranchers out of Point Reyes National Seashore. I hope you are on the side of wildlife rather than for profit ranching. Thank you for considering my views.

Sincerely, R. Zierikzee

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

The National Park Service has not performed water quality monitoring in the known polluted waterways in Point Reyes for years – this is unacceptable. If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, patricia cachopo

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

As a regular visitor to the park, I frequently see cattle trampling through creeks and streams, and even standing and pooping in Drakes Estero. In places where cattle are seen, I step over cow feces on trails and shorelines. It's no wonder the water quality is terrible.

This saga has gone on long enough, the park continues to do nothing! This is a national park which should mean something.

The Channel Islands recently got rid of cattle. We ask the Coastal Service to work with the National Park Service and do the same.

Sincerely, Charity Moschopoulos

I want to trust the California Coastal Commission is doing all in its power to help fix the problems out on Point Reyes National Seashore.

Too many cattle have turned vast areas of the park into a virtual dead zone.

This saga has gone on long enough, the park continues to do nothing! This is a national park which should mean something.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Gary Goetz

We appreciate you taking action to improve the appalling situation in Point Reyes.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, Alan P Socol

I respectively request the California Coastal Commissioners to do everything possible to protect our public lands in Point Reyes National Seashore.

I used to love kayaking at Point Reyes but when I heard about how the water quality goes unmonitored, I just couldn't go there anymore.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. Would you let your own children wade, walk, hike, traipse, splash, swim, or do any other activity on, in, or near the cattle-dung waters, beaches, creeks, estuaries, tide pools, and fields there? Wouldn't you worry about their health and safety? Please make this park a park and help us protect the coast.

Sincerely, erik melear

Point Reyes is the only National Seashore on the west coast and needs the California Coastal Commission to protect it from degradation by industrial ag interests. PLEASE DO THIS!

Why is so much of the Point Reyes National Seashore permitted to be covered in cow manure from dairy and beef cattle? Cattle excrement can be found on footpaths, in creeks, and in streams. Every visitor—adults, children, pets—should avoid it! Why doesn't the park administration put a stop to it? Why do these ranchers misuse our national park's land and water?

What happens to the wildlife when the water runs out?

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, Saran K.

It's vital that the State of California has oversight authority over the coastal areas and ecosystems within the Seashore.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

Ranches are not self-supporting and would not be in the park were they not subsidized by our tax dollars.

Please help address and end the constant impact of ranching on our public lands on the Pacific Coast. It is time for our environment to come first, especially on public land.

Sincerely, Mike Shields

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Emerson Spry

We are fortunate to have Point Reyes National Seashore located in a metropolitan area, and only 60 minutes from San Francisco..

The ranchers have had decades to do the right thing for the environment, and insist to manipulate and obfuscate every chance they can. Raw sewage leaking on lands and in fresh and ocean waters; cattle excrement covering half the park; methane fouling the air; cows as eyesores in what is to be a natural wilderness; and actual dead zones of soil and waters—all by disingenuous ranchers and compliant park management and staff.

Scientists say we are in the sixth mass extinction event. California is attempting to protect 30% of our land and waters by 2030 to help protect our state's wildlife. We can't afford to continue to degrade critical wildlife habitat.

For the sake of Californians, not cattle businesses, please protect the state's coastline!

Sincerely, Randall Hartman

Thank you for using your authority to address the terrible conditions at Point Reyes.

Why do ranchers have so much power over our national park? Their cattle create vast dead zones out on the Point. The ranchers and their cattle shouldn't even be there anymore! They constantly manipulate park management and regulatory agencies for private profit and hurt wildlife and visitors with their shady dealings with park management.

The National Park Service lacks the resources (money and personnel) necessary to control the profit-driven, opportunistic ranchers who don't spare a thought about environmental health and safety.

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. Would you let your own children wade, walk, hike, traipse, splash, swim, or do any other activity on, in, or near the cattle-dung waters, beaches, creeks, estuaries, tide pools, and fields there? Wouldn't you worry about their health and safety? Please make this park a park and help us protect the coast.

Sincerely, Darlene Baker

Point Reyes is the only National Seashore on the west coast and needs the California Coastal Commission to protect it from degradation by industrial ag interests.

Point Reyes National Seashore has some of the most polluted waterways in California, and the cause of the pollution is due to cattle ranching on leased parcels. Therefore it is unclear why ranching tenants can continue their ranching operations while scientific documentation notes the impact to water and air quality on these public lands.

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, Debbie Kearns

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life.

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Jean Cameron

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Laurie Tabor

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

What happens to the wildlife when the water runs out?

Cattle were recently removed from the Channel Islands. We want the National Park Service and the Coastal Service to collaborate and take similar action.

Sincerely, Meredith Needham

Thank you for taking the time to read my comments about the many problems with the out at Point Reyes National Seashore. I have visited there for decades, and am appalled at the bad conditions and management there.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

I am concerned that if ranching is not eliminated soon, it may be too late to prevent the loss of already threatened or endangered wildlife that depend the park's natural resources for their survival.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, cindy curran

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

I've seen cattle where they don't belong—wading in creeks and estuaries that are choked with algae from cattle manure.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, Jody Gibson

It is crucial that the State of California have control over the ecosystems and wildlife within the Seashore. I thank you for taking the time to read my thoughts on Point Reyes.

I've been to other historic National Parks such as Williamsburg, VA, where I was welcomed into historic homes for demonstrations of how butter was made and horses cared for. It's horrible to visit the "historic" ranches at Point Reyes National Seashore where I was greeted with "keep out" signs, hostile ranchers on ATVs, and miles of barbed wire. Leasing our National Park provides no educational activities and no benefit to the public, it only feeds the pockets of the greedy beef and dairy operators.

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, Frédéric Pulcini

As one who is proud and awestruck by the unique California coastline and biodiversity, especially in Point Reyes, I would like to thank you for your efforts to protect the only National seashore on the West coast.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Alana Hendrickson

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Maureen O'Neal

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Christy Carico

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

I've seen cattle where they don't belong—wading in creeks and estuaries that are choked with algae from cattle manure.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Liz Sypek

I have lived in northern California a long time, and am really upset about what's going on out at Point Reyes National Seashore.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

We are in a climate and extinction crisis. We the public, and all agencies should be focused on taking the right steps to address these human-caused issues. Per scientific publications, we are almost out of time, so the time is now.

Cattle were recently removed from the Channel Islands. We want the National Park Service and the Coastal Service to collaborate and take similar action.

Sincerely, Natalie Alexander

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

The National Park Service has allowed hundreds of our rare and iconic Tule elk to die of thirst during this drought. The Seashore cannot support both cows and elk. And tourists don't come to look at cows.

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, Lisa Reich

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Mark Chudzik

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

As a Marin resident who comes to the park to picnic and kayak, I have become very concerned about water pollution from cattle manure and human sewage spills. It is appalling to learn that some ranch houses have never had septic systems, the NPS knew and did nothing much about it.

I am concerned that if ranching is not eliminated soon, it may be too late to prevent the loss of already threatened or endangered wildlife that depend the park's natural resources for their survival.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Robert Blumenthal

I want to thank the Coastal Commissioners for providing an opportunity for the public to share their position on the ongoing issues associated with private cattle ranching in Point Reyes National Seashore.

It is a tragedy to see the park deteriorate, especially over the last decade. Cattle operations, made worse by drought, have turned the landscape into a sea of bare dirt and manure.

The Coastal Commission was created to protect our coast and needs to use the power it has to affect change at the National Park Service.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Janet Neihart

I am writing to express sadness and outrage over the conditions at Point Reyes National Seashore.

It is a tragedy to see the park deteriorate, especially over the last decade. Cattle operations, made worse by drought, have turned the landscape into a sea of bare dirt and manure.

With continued ranching and the drought at Point Reyes National Seashore, I worry very much about the continued loss of biodiversity there. Please do not let the ranchers or the park service continue their mismanagement of this special place.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, Jim Head

Point Reyes is one of the most beautiful places in California, and it concerns me that to read about the level of pollution that occurs in places which were intended to be for the public

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, Jeniffer Graham

Thank you, Coastal Commissioners, for reading my concerns that Point Reyes National Seashore is under threat by its current management practices.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Thank you for your serious sincere attention and action on this matter! No more private ranching, no more cows in Point Reyes National Seashore!

Sincerely, Georgia Shankel

Point Reyes National Seashore is one of the world's biodiversity hotspots.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

With continued ranching and the drought at Point Reyes National Seashore, I worry very much about the continued loss of biodiversity there. Please do not let the ranchers or the park service continue their mismanagement of this special place.

Please use your influence so the Park Service will follow its own mission.

Sincerely, Lisa Mazzola

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

I recently read that beaches at Point Reyes received failing grades for water quality, and that these issues have been going on for decades. A National Park in California should not have unsafe water quality.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, C.K. Nuetzie Jasiorkowski

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

Scientists say we are in the sixth mass extinction event. California is attempting to protect 30% of our land and waters by 2030 to help protect our state's wildlife. We can't afford to continue to degrade critical wildlife habitat.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Alison Date

As a long-time California resident, I am writing to express sadness and outrage over the conditions at Point Reyes National Seashore.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

With continued ranching and the drought at Point Reyes National Seashore, I worry very much about the continued loss of biodiversity there. Please do not let the ranchers or the park service continue their mismanagement of this special place.

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, Pat Padilla

Thank you for your work to protect our coast, especially at Point Reyes National Seashore.

I am confused as to how its legal that some of the worst water quality in the state occurs within a National Park!

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, Laura Ray

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Steve Prince

We appreciate you taking action to improve the appalling situation in Point Reyes.

I am confused as to how its legal that some of the worst water quality in the state occurs within a National Park!

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

The National Park Service has not kept its agreements and can't be relied upon to do so.

Sincerely, Catherine Susman

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

As a Marin resident who comes to the park to picnic and kayak, I have become very concerned about water pollution from cattle manure and human sewage spills. It is appalling to learn that some ranch houses have never had septic systems, the NPS knew and did nothing much about it.

I am concerned that if ranching is not eliminated soon, it may be too late to prevent the loss of already threatened or endangered wildlife that depend the park's natural resources for their survival.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Michael Kunkel

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

Our family has enjoyed visiting the Pt Reyes for decades, but the news about unsafe levels of E.coli in the park's streams and beaches is deeply concerning. As a mother, I worry that my children will be exposed to water that is polluted by cattle manure or even human sewage from leaking septic systems. Until these WQ is adequately addressed, we will find alternative places to safely picnic and play.

If we only have ten years to do something about climate change, why are we doing nothing about the critical conditions at Point Reyes?

Please reconsider your approval of ranching in the national park.

Sincerely, susannah biggs

Point Reyes is one of the most beautiful places in California, and it concerns me that to read about the level of pollution that occurs in places which were intended to be for the public

I recently read that beaches at Point Reyes received failing grades for water quality, and that these issues have been going on for decades. A National Park in California should not have unsafe water quality.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. Would you let your own children wade, walk, hike, traipse, splash, swim, or do any other activity on, in, or near the cattle-dung waters, beaches, creeks, estuaries, tide pools, and fields there? Wouldn't you worry about their health and safety? Please make this park a park and help us protect the coast.

Sincerely, Slowomir and irene Przybysz

Thank you for your work to protect our coast, especially at Point Reyes National Seashore.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

During this drought, the National Park Service has let hundreds of our famous and rare Tule elk perish from dehydration. Elk and cows cannot coexist on the Seashore.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Bruce and Maureen DeNunzio

Thank you for reading my comment, Coastal Commissioners. I am a lifelong visitor to Point Reyes.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

If we only have ten years to do something about climate change, why are we doing nothing about the critical conditions at Point Reyes?

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Ashok and Kiran Bajaj

Thank you for reading my comment, Coastal Commissioners. I am a lifelong visitor to Point Reyes.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

If we only have ten years to do something about climate change, why are we doing nothing about the critical conditions at Point Reyes?

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Valerie Sotere

What is going on at Point Reyes?

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

With continued ranching and the drought at Point Reyes National Seashore, I worry very much about the continued loss of biodiversity there. Please do not let the ranchers or the park service continue their mismanagement of this special place.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, James Lansing

Thank you for reading my comment, Coastal Commissioners. I am a lifelong visitor to Point Reyes.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

If we only have ten years to do something about climate change, why are we doing nothing about the critical conditions at Point Reyes?

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Susan Hanlon

I want to thank the Coastal Commissioners for providing an opportunity for the public to share their position on the ongoing issues associated with private cattle ranching in Point Reyes National Seashore.

The ranchers have had decades to do the right thing for the environment, and insist to manipulate and obfuscate every chance they can. Raw sewage leaking on lands and in fresh and ocean waters; cattle excrement covering half the park; methane fouling the air; cows as eyesores in what is to be a natural wilderness; and actual dead zones of soil and waters—all by disingenuous ranchers and compliant park management and staff.

If we only have ten years to do something about climate change, why are we doing nothing about the critical conditions at Point Reyes?

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Nancy Thelot

Point Reyes is one of the most beautiful places in California, and it concerns me that to read about the level of pollution that occurs in places which were intended to be for the public

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, Cindy and Christine Guarnieri

I want to thank the Coastal Commissioners for providing an opportunity for the public to share their position on the ongoing issues associated with private cattle ranching in Point Reyes National Seashore.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

As the pandemic has shown us, we need to increase public recreation and access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up keeping people out of our parklands.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Cynthia Liss

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

I recently read that beaches at Point Reyes received failing grades for water quality, and that these issues have been going on for decades. A National Park in California should not have unsafe water quality.

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, Rosalind Kotlar

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

A national park should not contain this wide breadth of environmental problems. Nor should over a third of a national park be placed aside for private industry.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Joanna Martin

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

Recent news reports revealed that not only livestock manure is being discharged onto land and into surface waters at Point Reyes National Seashore – human feces have also been spilling into ponds and onto land from failing septic systems that the ranchers are required to maintain as part of their lease agreements.

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Sally Hinshaw

Thank you for taking the time to read my comment.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

The National Park Service knew there was water contamination starting in 2001. Their solution? Just stop sampling in 2013! We look to the Coastal Commission to expeditiously protect and clean up our coastal waters.

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, Anna Jasiukiewicz

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

As a Marin resident who comes to the park to picnic and kayak, I have become very concerned about water pollution from cattle manure and human sewage spills. It is appalling to learn that some ranch houses have never had septic systems, the NPS knew and did nothing much about it.

I am concerned that if ranching is not eliminated soon, it may be too late to prevent the loss of already threatened or endangered wildlife that depend the park's natural resources for their survival.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, John Macdonald

Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 1:53:22 PM

As a California resident, and frequent visitor to Point Reyes, I am writing to express sadness over the current conditions at Point Reyes National Seashore.

The level of pollution from farm operations needs to be addressed for this sensitive natural area. Point Reyes is a real gem, and the Park Service can do a better job of protecting it. Thanks for considering!

Sincerely, Gordon Beebe

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

I used to enjoy going to the Seashore with friends to hike, kayak, watch birds and take pictures.

The National Park Service knew there was water contamination starting in 2001. Their solution? Just stop sampling in 2013! We look to the Coastal Commission to expeditiously protect and clean up our coastal waters.

"First gradually, then all at once." That is the history of the environmental crisis at Point Reyes. Please address this urgent need.

Sincerely, George Beasley

Point Reyes is the only national seashore on the Pacific Coast and is designated an International Biological Preserve for its abundant biodiversity and proximity to other protected lands and waters.

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, Kimberly Short

As a longtime resident of California, I am writing to express my sadness and concern at the current state of Point Reyes National Seashore.

Aquatic life in the Pacific Ocean adjacent to Point Reyes National Seashore are harmed by pollution from ranches. These include the federally endangered Central Coast Coho salmon as well as whales which migrate through the area.

We should be protecting and restoring wildlife habitat at Point Reyes National Seashore. Scientists say we are in the sixth mass extinction event. critical wildlife habitat.

Please use your influence so the Park Service will follow its own mission.

Sincerely, Kaatje Adams

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

The National Park Service has not kept its agreements and can't be relied upon to do so.

Sincerely, Antonio Scognamiglio

We need our Commissioners to protect and defend our coastal resources for all the people of California for generations to come.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

The Coastal Commission was created to protect our coast and needs to use the power it has to affect change at the National Park Service.

The Coastal Commission is our best hope for cleaning up the water at Point Reyes. Please ensure that the park service develops and implements a strict water quality plan as soon as possible.

Sincerely, Barbara Harper

As a longtime resident of California, I am writing to express my sadness and concern at the current state of Point Reyes National Seashore.

The ranchers have had decades to do the right thing for the environment, and insist to manipulate and obfuscate every chance they can. Raw sewage leaking on lands and in fresh and ocean waters; cattle excrement covering half the park; methane fouling the air; cows as eyesores in what is to be a natural wilderness; and actual dead zones of soil and waters—all by disingenuous ranchers and compliant park management and staff.

Point Reyes National Seashore is at grave risk to be destroyed by the horrible decades-long practices and consequences of cattle ranching among the current and present dangers of climate warming, biodiversity loss, and extended drought. The California Coastal Commission MUST step up and push the National Park Service NOW to rid ranchers and cattle from the American public's National Seashore here, the only national park unit on the West Coast.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Marty Crowley

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

The National Park Service knew there was water contamination starting in 2001. Their solution? Just stop sampling in 2013! We look to the Coastal Commission to expeditiously protect and clean up our coastal waters.

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, Joan Glasser

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Elizabeth Osborne

I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

I have become very concerned about water pollution from cattle manure and human sewage spills. It is appalling to learn that some ranch houses have never had septic systems, the NPS knew and did nothing much about it.

I am concerned that if ranching is not eliminated soon, it may be too late to prevent the loss of already threatened or endangered wildlife that depend the park's natural resources for their survival.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Kathey Norton

Thank you for taking the time to read my comment! I am very concerned with what I have heard about Point Reyes, and I hope you all can take leadership and help solve these issues.

I used to love kayaking at Point Reyes but when I heard about how the water quality goes unmonitored, I just couldn't go there anymore.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

The National Park Service has not kept its agreements and can't be relied upon to do so.

Sincerely, Rhonda Bradley

It is crucial that the State of California have control over the ecosystems and wildlife within the Seashore. I thank you for taking the time to read my thoughts on Point Reyes.

Beef and dairy operators at Point Reyes National Seashore have dammed surface streams to create watering ponds for livestock, thereby depriving downstream fish and native wildlife of the habitat needed to sustain them, especially during drought years.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. Would you let your own children wade, walk, hike, traipse, splash, swim, or do any other activity on, in, or near the cattle-dung waters, beaches, creeks, estuaries, tide pools, and fields there? Wouldn't you worry about their health and safety? Please make this park a park and help us protect the coast.

Sincerely, Erica Johanson

It is crucial that the State of California have control over the ecosystems and wildlife within the Seashore. I thank you for taking the time to read my thoughts on Point Reyes.

Beef and dairy operators at Point Reyes National Seashore have dammed surface streams to create watering ponds for livestock, thereby depriving downstream fish and native wildlife of the habitat needed to sustain them, especially during drought years.

Sincerely, Enid Cardinal

We need our Commissioners to protect and defend our coastal resources for all the people of California for generations to come.

I used to enjoy going to the Seashore with friends to hike, kayak, watch birds and take pictures.

If ranches weren't funded by our taxes, they couldn't exist and wouldn't be allowed in the park. Why are we paying for them to pollute our waters?

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Anna Drummond

What is going on at Point Reyes?

Why are we jeopardizing precious native species to support cattle that can live anywhere?

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, Judy Fairless

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

Scientists say we are in the sixth mass extinction event. California is attempting to protect 30% of our land and waters by 2030 to help protect our state's wildlife. We can't afford to continue to degrade critical wildlife habitat.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Elizabeth Watts

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

Why do ranchers have so much power over our national park? Their cattle create vast dead zones out on the Point. The ranchers and their cattle shouldn't even be there anymore! They constantly manipulate park management and regulatory agencies for private profit and hurt wildlife and visitors with their shady dealings with park management.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, Claude Robert

From:	Katherine Parker
To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 1:48:08 PM

We appreciate you taking action to improve the appalling situation in Point Reyes.

Migratory birds from all over the Western United states stop in the Seashore in search of a safe place to rest and refuel along the Pacific Flyway. Endangered marine mammals along the Pacific Coast call Point Reyes home. We now know that Point Reyes provides poor habitat for these protected wildlife. At Point Reyes, water is polluted by cattle manure and land is barren due to too many cows.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

For the sake of Californians, not cattle businesses, please protect the state's coastline!

Sincerely, Katherine Parker

From:	Barbara Wright
To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 1:47:13 PM

The Commissioners have an important role protecting our coast.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

It's time for the California Coastal Commission to step in and stop this absurdity! For the sake of people, wildlife, and habitat, stop this long-time tragedy! Point Reyes could be a model for sound and sane climate policy practices, biodiversity restoration, and leading edge drought science.

My request is that the Coastal Commission holds the park service accountable to its mission, to prioritize the health of the park over the financial interests of cattle ranches.

Sincerely, Barbara Wright

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

Citizens look to national parks – "our best idea" – for leadership in the climate crisis, but Point Reyes is an example of the worst practices in conserving water and protecting biodiversity.

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Jason Bowman

Thank you for reading my comment, Coastal Commissioners. I have visited Point Reyes.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

Please use your influence so the Park Service will follow its own mission.

Sincerely, Harold T. Hodes

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, midori furutate

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

I am confused as to how its legal that some of the worst water quality in the state occurs within a National Park!

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Karen Toyohara

Thank you for considering my comments about the damage to Point Reyes National Seashore from cattle operations. I know that I am not alone in saying the impacts are so apparent and disheartening that I no longer visit the park.

I've seen cattle where they don't belong—wading in creeks and estuaries that are choked with algae from cattle manure.

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

My request is that the Coastal Commission holds the park service accountable to its mission, to prioritize the health of the park over the financial interests of cattle ranches.

Sincerely, Jennifer Bergovoy

I greatly appreciate you taking the time to consider my comment. Point Reyes National Seashore holds a special place in my heart.

I recently read that beaches at Point Reyes received failing grades for water quality, and that these issues have been going on for decades. A National Park in California should not have unsafe water quality.

I am concerned that if ranching is not eliminated soon, it may be too late to prevent the loss of already threatened or endangered wildlife that depend the park's natural resources for their survival.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, Jonathan Mitchell

Thank you for taking the time to read my comments about the many problems with the out at Point Reyes National Seashore. I have visited there for decades, and am appalled at the bad conditions and management there.

I used to enjoy going to the Seashore with friends to hike, kayak, watch birds and take pictures.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Because they are an agency of the federal government, the National Park Service at Point Reyes National Seashore has been operating on the mistaken assumption that they are exempt from California laws. Their disregard is intolerable. Please act now and save our land.

Sincerely, Rob Jursa

Commissions, your help is urgently needed to clean up Point Reyes National Seashore.

I am confused as to how its legal that some of the worst water quality in the state occurs within a National Park!

If ranches weren't funded by our taxes, they couldn't exist and wouldn't be allowed in the park. Why are we paying for them to pollute our waters?

Please take urgent action befitting the critical environmental crisis at Point Reyes.

Sincerely, Elaine Sloan

Sincerely, Meg Doyle

I have been a California resident for 60 years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

As a California resident who comes to the park, I have become very concerned about water pollution from cattle manure and human sewage spills. It is appalling to learn that some ranch houses have never had septic systems, the NPS knew and did nothing much about it.

I am concerned that if ranching is not eliminated soon, it may be too late to prevent the loss of already threatened or endangered wildlife that depend the park's natural resources for their survival.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Daniel Farr

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

Scientists say we are in the sixth mass extinction event. California is attempting to protect 30% of our land and waters by 2030 to help protect our state's wildlife. We can't afford to continue to degrade critical wildlife habitat.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Anne Mazzone

I have lived in northern California a long time, and am really upset about what's going on out at Point Reyes National Seashore.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

We are in a climate and extinction crisis. We the public, and all agencies should be focused on taking the right steps to address these human-caused issues. Per scientific publications, we are almost out of time, so the time is now.

Cattle were recently removed from the Channel Islands. We want the National Park Service and the Coastal Service to collaborate and take similar action.

Sincerely, Nicolas Duonn

Date:	Tuesday, August 30, 2022 1:40:20 PM

The Commissioners have an important role protecting our coast.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

It's time for the California Coastal Commission to step in and stop this absurdity! For the sake of people, wildlife, and habitat, stop this long-time tragedy! Point Reyes could be a model for sound and sane climate policy practices, biodiversity restoration, and leading edge drought science.

My request is that the Coastal Commission holds the park service accountable to its mission, to prioritize the health of the park over the financial interests of cattle ranches.

Sincerely, Rena Rouse

Date:	Tuesday, August 30, 2022 1:40:19 PM

Please take this opportunity to clean up the only national park on the west coast!

I have hiked a lot in Point Reyes National Seashore, and I have stopped going to many places because there's so much cow crap everywhere, in streams and on trails and draining onto a lot of beaches there. It's disgusting and really unhealthy. Why is this allowed to continue for years and years and years?

During this drought, the National Park Service has let hundreds of our famous and rare Tule elk perish from dehydration. Elk and cows cannot coexist on the Seashore.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Jewell Batway

As one who is proud and awestruck by the unique California coastline and biodiversity, especially in Point Reyes, I would like to thank you for your efforts to protect the only National seashore on the West coast.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Jamie Shultz

I have lived in California a long time, and am really upset about what's going on out at Point Reyes National Seashore.

From:	Christina Babst
To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 1:39:17 PM

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

Please reconsider your approval of ranching in the national park.

Sincerely, Christina Babst

Point Reyes is one of the most beautiful places in California, and it concerns me that to read about the level of pollution that occurs in places which were intended to be for the public

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, Diane Kraft

Thank you for taking the time to read my comment. I live in the Bay Area and visit Point Reyes National Seashore several times a month.

Manure discharged from cows and other livestock at Point Reyes National Seashore not only contaminates our beaches with potentially disease causing fecal bacteria they add nitrogen and phosphorus which cause surface waters to be so choked with emergent vegetation you can hardly see the water.

The Coastal Commission was created to protect our coast and needs to use the power it has to affect change at the National Park Service.

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, Tamm Zaryski

Date:	Tuesday, August 30, 2022 1:38:10 PM

We are fortunate to have Point Reyes National Seashore located in a metropolitan area, and only 60 minutes from San Francisco..

The ranchers have had decades to do the right thing for the environment, and insist to manipulate and obfuscate every chance they can. Raw sewage leaking on lands and in fresh and ocean waters; cattle excrement covering half the park; methane fouling the air; cows as eyesores in what is to be a natural wilderness; and actual dead zones of soil and waters—all by disingenuous ranchers and compliant park management and staff.

Scientists say we are in the sixth mass extinction event. California is attempting to protect 30% of our land and waters by 2030 to help protect our state's wildlife. We can't afford to continue to degrade critical wildlife habitat.

For the sake of Californians, not cattle businesses, please protect the state's coastline!

Sincerely, Susan Watts

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

A national park should not contain this wide breadth of environmental problems. Nor should over a third of a national park be placed aside for private industry.

I am concerned that if ranching is not eliminated soon, it may be too late to prevent the loss of already threatened or endangered wildlife that depend the park's natural resources for their survival.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Simone Butler

Point Reyes is the only national seashore on the Pacific Coast and is designated an International Biological Preserve for its abundant biodiversity and proximity to other protected lands and waters.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

With continued ranching and the drought at Point Reyes National Seashore, I worry very much about the continued loss of biodiversity there. Please do not let the ranchers or the park service continue their mismanagement of this special place.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Mary Thorpe

As one who is proud and awestruck by the unique California coastline and biodiversity, especially in Point Reyes, I would like to thank you for your efforts to protect the only National seashore on the West coast.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Catherine Beauchamp

Thank you for your involvement in helping protect the Seashore! We need your leadership to help finally make this park a park.

Why do ranchers have so much power over our national park? Their cattle create vast dead zones out on the Point. The ranchers and their cattle shouldn't even be there anymore! They constantly manipulate park management and regulatory agencies for private profit and hurt wildlife and visitors with their shady dealings with park management.

We are in the midst of a climate crisis, and most are being too slow to address it. For example, many are not actively working to decrease water use, nor actively working toward the protection of water quality of the water we have.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Phillip Mitchell

As one who is proud and awestruck by the unique California coastline and biodiversity, especially in Point Reyes, I would like to thank you for your efforts to protect the only National seashore on the West coast.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Barry Medlin

Commissions, your help is urgently needed to clean up Point Reyes National Seashore.

Aquatic life in the Pacific Ocean adjacent to Point Reyes National Seashore are harmed by pollution from ranches. These include the federally endangered Central Coast Coho salmon as well as whales which migrate through the area.

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

Any plan that is ultimately produced to address the water and climate impacts of ranching, as the Commission has required, must include measurable benchmarks and deadlines for achieving them, enforcement mechanisms, and consequences—including closing down private ranching in the park— for failure to perform.

Sincerely, Rob Roberto

Point Reyes is one of the most beautiful places in California, and it concerns me that to read about the level of pollution that occurs in places which were intended to be for the public

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life.

I have lived in northern California a long time, and am really upset about what's going on out at Point Reyes National Seashore.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

We are in a climate and extinction crisis. We the public, and all agencies should be focused on taking the right steps to address these human-caused issues. Per scientific publications, we are almost out of time, so the time is now.

Cattle were recently removed from the Channel Islands. We want the National Park Service and the Coastal Service to collaborate and take similar action.

Sincerely, Kellen Dunn

Protecting our public lands from environmental impacts should be a goal of all local, state and national agencies, especially during a climate crisis, therefore I am writing to urge the Commissioners to protect Point Reyes from constant impacts causing by cattle ranching.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

As the pandemic has shown us, we need to increase public recreation and access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up keeping people out of our parklands.

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, Robert Honish

As one who is proud and awestruck by the unique California coastline and biodiversity, especially in Point Reyes, I would like to thank you for your efforts to protect the only National seashore on the West coast.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Cheryl Watters

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

Migratory birds from all over the Western United states stop in the Seashore in search of a safe place to rest and refuel along the Pacific Flyway. Endangered marine mammals along the Pacific Coast call Point Reyes home. We now know that Point Reyes provides poor habitat for these protected wildlife. At Point Reyes, water is polluted by cattle manure and land is barren due to too many cows.

The National Park Service lacks the resources (money and personnel) necessary to control the profit-driven, opportunistic ranchers who don't spare a thought about environmental health and safety.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, dorinda kelley

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Eric Morey

Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 1:32:17 PM

Thank you for reading my comment, Coastal Commissioners. I am a VISITOR TO Point Reyes FOR OVER 30M YEARS.

I've SEEN LOTS OF CATTLE HERE THEY DON'T BELONG —WADING creeks and estuaries THAT ARE CHOKED WITH ALGAE FROM CATTLE MANURE..THIS IS UNNACEPTABLE!

The National Park Service HAS ALLOWED 100'S OF RARE AND ICONIC TULE ELK TO DIE OF THIRST DURING THIS TERRIBLE DROUGHT. The Seashore CNANNOT SUPPORT BOTH COWS AND ELK. ALSO, TOURISTS AND PARK GOERS DON'T COME TO LOOK AT COWS THAT ARE DESTROYING THE PARK.

This is a national seashore FOR THE American people and FOR WOLDLIFE AND HABITAT—NOT a playground OR business landscape FOR PRIVATE, INDUSTRAIL-LEVEL, DESTRUCTIVE FACTORY ANIMAL OPERATIONS. PLEASE HELP AND ACT SWIFTLY TO GET THE RANCHERS OUT OF Point Reyes National Seashore FOR THE GOOD OF THE PARK, VISITORS AND THD THE TULE ELK.

REMINDER: The National Park System IS INTENEDED TO PROTECT wilderness and provide equitable access to the natural world, NOT TO SUPPORT PRIVATE PROFITS THAT DEGRADE THE THE PACIFIC COASTLINE. STOP TAKING \$\$\$ FROM THE CATTLE INDUSTRY AND DO YOUR JOB FOR THE PUBLIC INTEREST NOT CORPORATE INTERESTS.

Sincerely, Mark Feldman

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

Manure discharged from cows and other livestock at Point Reyes National Seashore not only contaminates our beaches with potentially disease causing fecal bacteria they add nitrogen and phosphorus which cause surface waters to be so choked with emergent vegetation you can hardly see the water.

With continued ranching and the drought at Point Reyes National Seashore, I worry very much about the continued loss of biodiversity there. Please do not let the ranchers or the park service continue their mismanagement of this special place.

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, DALE STEICHEN

As one who is proud and awestruck by the unique California coastline and biodiversity, especially in Point Reyes, I would like to thank you for your efforts to protect the only National seashore on the West coast.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

Please take this opportunity to clean up the only national park on the west coast!

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

The National Park Service lacks the resources (money and personnel) necessary to control the profit-driven, opportunistic ranchers who don't spare a thought about environmental health and safety.

Please help us get the ranchers out of our National Seashore! Point Reyes is the only National Seashore on the West Coast of the U.S., and it's becoming a cesspool, even though ranchers were supposed to leave decades ago.

Sincerely, Silvia Hall

I want to thank the Coastal Commissioners for providing an opportunity for the public to share their position on the ongoing issues associated with private cattle ranching in Point Reyes National Seashore.

A national park should not contain this wide breadth of environmental problems. Nor should over a third of a national park be placed aside for private industry.

It's time for the California Coastal Commission to step in and stop this absurdity! For the sake of people, wildlife, and habitat, stop this long-time tragedy! Point Reyes could be a model for sound and sane climate policy practices, biodiversity restoration, and leading edge drought science.

The Channel Islands recently got rid of cattle. We ask the Coastal Service to work with the National Park Service and do the same.

Sincerely, Catherine Krug

I hope you care about Point Reyes National Seashore as much as I and so many millions of people do.

Migratory birds from all over the Western United states stop in the Seashore in search of a safe place to rest and refuel along the Pacific Flyway. Endangered marine mammals along the Pacific Coast call Point Reyes home. We now know that Point Reyes provides poor habitat for these protected wildlife. At Point Reyes, water is polluted by cattle manure and land is barren due to too many cows.

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

Please hold the park service accountable, and withdraw your concurrence of the NPS's plan to deliver 20-year leases to ranchers.

Sincerely, Monika Heiniger

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Laura Herndon

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

As a Marin resident who comes to the park to picnic and kayak, I have become very concerned about water pollution from cattle manure and human sewage spills. It is appalling to learn that some ranch houses have never had septic systems, the NPS knew and did nothing much about it.

I am concerned that if ranching is not eliminated soon, it may be too late to prevent the loss of already threatened or endangered wildlife that depend the park's natural resources for their survival.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Adrienne Metter

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

Our family has enjoyed visiting the Pt Reyes for decades, but the news about unsafe levels of E.coli in the park's streams and beaches is deeply concerning. As a mother, I worry that my children will be exposed to water that is polluted by cattle manure or even human sewage from leaking septic systems. Until these WQ is adequately addressed, we will find alternative places to safely picnic and play.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Karen Kravcov Malcolm

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

What happens to the wildlife when the water runs out?

Cattle were recently removed from the Channel Islands. We want the National Park Service and the Coastal Service to collaborate and take similar action.

Sincerely, Tim Porter

Thank you, Coastal Commissioners, for reading my concerns that Point Reyes National Seashore is under threat by its current management practices.

The National Park Service has not performed water quality monitoring in the known polluted waterways in Point Reyes for years – this is unacceptable. If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Susan Messerschmitt

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

Please take urgent action befitting the critical environmental crisis at Point Reyes.

Sincerely, Tracey katsouros

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Jeffrey Freilich

I am a Monterey Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Why are dairy and beef cattle allowed to defecate over so much of Point Reyes National Seashore? There is cattle manure in creeks and streams, and covering trails. It's bad for adults, kids, pets, every visitor! Why doesn't the park management stop it? Why do these ranchers abuse the land and water in our national park?

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, eric nylen

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

Recent news reports revealed that not only livestock manure is being discharged onto land and into surface waters at Point Reyes National Seashore – human feces have also been spilling into ponds and onto land from failing septic systems that the ranchers are required to maintain as part of their lease agreements.

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Hilary Capstick

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

Citizens look to national parks – "our best idea" – for leadership in the climate crisis, but Point Reyes is an example of the worst practices in conserving water and protecting biodiversity.

With continued ranching and the drought at Point Reyes National Seashore, I worry very much about the continued loss of biodiversity there. Please do not let the ranchers or the park service continue their mismanagement of this special place.

Please help us get the ranchers out of our National Seashore! Point Reyes is the only National Seashore on the West Coast of the U.S., and it's becoming a cesspool, even though ranchers were supposed to leave decades ago.

Sincerely, Christa Neuber

I hope you care about Point Reyes National Seashore as much as I and so many millions of people do.

When I next visit America, I would really like to visit Point Reyes to hike, kayak, watch birds and take pictures.

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, Julie Botten

Please take this opportunity to clean up the only national park on the west coast!

I used to love visiting Point Reyes. It's so upsetting to hear about the damage from cattle overgrazing and trampling so much of the park.

The National Park Service lacks the resources (money and personnel) necessary to control the profit-driven, opportunistic ranchers who don't spare a thought about environmental health and safety. Ranch houses without septic systems?! Unchecked pollution of the watershed and the waterways, including the ocean?! All this is wrong.

Please help us get the ranchers out of our National Seashore! Point Reyes is the only National Seashore on the West Coast of the U.S., and it's becoming a cesspool, even though ranchers were supposed to leave decades ago.

Thank you for your attention and consideration of this precious area.

Sincerely, Annamaria Laverty

Sincerely, Annamaria Laverty

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

Aquatic life in the Pacific Ocean adjacent to Point Reyes National Seashore are harmed by pollution from ranches. These include the federally endangered Central Coast Coho salmon as well as whales which migrate through the area.

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, Edna Mullen

Point Reyes is one of the most beautiful places in California, and it concerns me that to read about the level of pollution that occurs in places which were intended to be for the public

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, Deborah Mastrandrea

Point Reyes is one of the most beautiful places in California, and it concerns me that to read about the level of pollution that occurs in places which were intended to be for the public

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Help the conservation groups to end the pollution and protect this biodiversity hotspot.

Sincerely, Bridget Irons

Thank you, Coastal Commissioners, for reading my concerns that Point Reyes National Seashore is under threat by its current management practices.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

Please hold the park service accountable, and withdraw your concurrence of the NPS's plan to deliver 20-year leases to ranchers.

Sincerely, Helene Christina Weiss

As one who is proud and awestruck by the unique California coastline and biodiversity, especially in Point Reyes, I would like to thank you for your efforts to protect the only National seashore on the West coast.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, Jane Chischilly

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

Point Reyes National Seashore has some of the most polluted waterways in California, and the cause of the pollution is due to cattle ranching on leased parcels. Therefore it is unclear why ranching tenants can continue their ranching operations while scientific documentation notes the impact to water and air quality on these public lands.

Our planet needs to be saved from constant, known environmental impact, and the general public deserves the opportunity to visit this National Seashore and experience clean surface waters in the creeks and on the beaches, and public access to all of the park, rather than having over 300 miles of electric and barb-wire fences used for cattle ranching.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Janine Moore

Thank you for taking the time to read my comment! I am very concerned with what I have heard about Point Reyes, and I hope you all can take leadership and help solve these issues.

The ranchers have had decades to do the right thing for the environment, and insist to manipulate and obfuscate every chance they can. Raw sewage leaking on lands and in fresh and ocean waters; cattle excrement covering half the park; methane fouling the air; cows as eyesores in what is to be a natural wilderness; and actual dead zones of soil and waters—all by disingenuous ranchers and compliant park management and staff.

We should be protecting and restoring wildlife habitat at Point Reyes National Seashore. Scientists say we are in the sixth mass extinction event. critical wildlife habitat.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, George Beasley

Point Reyes is one of the most beautiful places in California, and it concerns me that to read about the level of pollution that occurs in places which were intended to be for the public

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Help the conservation groups to end the pollution and protect this biodiversity hotspot.

Sincerely, Marya Zanders

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

Scientists say we are in the sixth mass extinction event. California is attempting to protect 30% of our land and waters by 2030 to help protect our state's wildlife. We can't afford to continue to degrade critical wildlife habitat.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Sean Harper

Thank you for taking the time to read my comment! I am very concerned with what I have heard about Point Reyes, and I hope you all can take leadership and help solve these issues.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

With continued ranching and the drought at Point Reyes National Seashore, I worry very much about the continued loss of biodiversity there. Please do not let the ranchers or the park service continue their mismanagement of this special place.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Barbara Root

I respectively request the California Coastal Commissioners to do everything possible to protect our public lands in Point Reyes National Seashore.

I've seen cattle where they don't belong—wading in creeks and estuaries that are choked with algae from cattle manure.

The Park Service, park management, and multiple regulatory agencies been tap dancing around this for decades and the damage and harm out there is worse and worse! Please do whatever you can to get rid of ranchers and their cattle, and return our national seashore to nature, not cow crap all over the place!

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Jodi Rodar

Please take this opportunity to clean up the only national park on the west coast!

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

The National Park Service lacks the resources (money and personnel) necessary to control the profit-driven, opportunistic ranchers who don't spare a thought about environmental health and safety.

Please help us get the ranchers out of our National Seashore! Point Reyes is the only National Seashore on the West Coast of the U.S., and it's becoming a cesspool, even though ranchers were supposed to leave decades ago.

Sincerely, Elaine Sorensen

Date:	Tuesday, August 30, 2022 1:18:14 PM

We appreciate you taking action to improve the appalling situation in Point Reyes.

I have hiked a lot in Point Reyes National Seashore, and I have stopped going to many places because there's so much cow crap everywhere, in streams and on trails and draining onto a lot of beaches there. It's disgusting and really unhealthy. Why is this allowed to continue for years and years and years?

I am concerned that if ranching is not eliminated soon, it may be too late to prevent the loss of already threatened or endangered wildlife that depend the park's natural resources for their survival.

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, Nicholas Chatfield

Date:	Tuesday, August 30, 2022 1:18:13 PM

Please take this opportunity to clean up the only national park on the west coast!

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

Our planet needs to be saved from constant, known environmental impact, and the general public deserves the opportunity to visit this National Seashore and experience clean surface waters in the creeks and on the beaches, and public access to all of the park, rather than having over 300 miles of electric and barb-wire fences used for cattle ranching.

Cattle were recently removed from the Channel Islands. We want the National Park Service and the Coastal Service to collaborate and take similar action.

Sincerely, Anne Hamre

I greatly appreciate you taking the time to consider my comment. Point Reyes National Seashore holds a special place in my heart -- when I was a very young woman, I sat in a flowering meadow high above the ocean and saw the migrating humpback whales cruise by. I felt like I could see the curve of the earth at the horizon. It was devastatingly beautiful.

I recently read that beaches at Point Reyes received failing grades for water quality, and that these issues have been going on for decades. A National Park in California should not have unsafe water quality.

I am concerned that if ranching is not eliminated soon, it may be too late to prevent the loss of already threatened or endangered wildlife that depend the park's natural resources for their survival.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, Felicia Lewis

Point Reyes National Seashore is one of my favorite places. I used to enjoy going to the Seashore to see birds and take pictures. As the pandemic has shown us, we need to increase public recreation and access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up keeping people out of our parklands. The National Park Service has not kept its agreements and can't be relied upon to do so.

Sincerely, Lawrence Thompson

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

Scientists say we are in the sixth mass extinction event. California is attempting to protect 30% of our land and waters by 2030 to help protect our state's wildlife. We can't afford to continue to degrade critical wildlife habitat.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Daniel Shapiro

Point Reyes is the only national seashore on the Pacific Coast and is designated an International Biological Preserve for its abundant biodiversity and proximity to other protected lands and waters.

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, Jeff Thiemann

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

We should be protecting and restoring wildlife habitat at Point Reyes National Seashore, especially water quality. Scientists say we are in the sixth mass extinction event. Critical wildlife habitat helps us as well.

The National Park Service has not kept its agreements and must be encouraged to do so.

Sincerely, Judith Henckel

What is going on at Point Reyes?

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

It's time for the California Coastal Commission to step in and stop this absurdity! For the sake of people, wildlife, and habitat, stop this long-time tragedy! Point Reyes could be a model for sound and sane climate policy practices, biodiversity restoration, and leading edge drought science.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Joyce Coogan

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

If Point Reyes is special enough to be a national park and UN-designated Biodiversity Hot Spot, why is it permitted to have the most polluted waters on the California Coast?

As the pandemic has shown us, we need to increase public recreation and access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up keeping people out of our parklands.

This is a national seashore for the American people and for wildlife and habitat—not a playground or business landscape for private, industrial-level, factory animal operations. Please help get the ranchers out of Point Reyes National Seashore.

Sincerely, Julija Merljak

Point Reyes is the only national seashore on the Pacific Coast and is designated an International Biological Preserve for its abundant biodiversity and proximity to other protected lands and waters.

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, CARL LUHRING

Thank you for taking the time to read my comment. I live in the Bay Area and visit Point Reyes National Seashore several times a month.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Jan Modjeski

The Commissioners have an important role protecting our coast.

I used to enjoy going to the Seashore with friends to hike, kayak, watch birds and take pictures.

If ranches weren't funded by our taxes, they couldn't exist and wouldn't be allowed in the park. Why are we paying for them to pollute our waters?

The Channel Islands recently got rid of cattle. We ask the Coastal Service to work with the National Park Service and do the same.

Sincerely, Sharon Balzano

As one who is proud and awestruck by the unique California coastline and biodiversity, especially in Point Reyes, I would like to thank you for your efforts to protect the only National seashore on the West coast.

As a regular visitor to the park, I frequently see cattle trampling through creeks and streams, and even standing and pooping in Drakes Estero. In places where cattle are seen, I step over cow feces on trails and shorelines. It's no wonder the water quality is terrible.

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

Please use your influence so the Park Service will follow its own mission.

Sincerely, Connie Kirkham

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, Joshua Konheim Heffron

Point Reyes is the only national seashore on the Pacific Coast and is designated an International Biological Preserve for its abundant biodiversity and proximity to other protected lands and waters.

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, Diane Kent

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

What happens to the wildlife when the water runs out?

Cattle were recently removed from the Channel Islands. We want the National Park Service and the Coastal Service to collaborate and take similar action.

Sincerely, karen Moulder

It's vital that the State of California has oversight authority over the coastal areas and ecosystems within the Seashore.

There is a severe drought in this state. At Point Reyes, cows are using up all the water that should be going to animals and natural habitats, including tule elk.

If ranches weren't funded by our taxes, they couldn't exist and wouldn't be allowed in the park. Why are we paying for them to pollute our waters?

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Connie Kirkham

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast!

Recent news reports revealed that not only livestock manure is being discharged onto land and into surface waters at Point Reyes National Seashore – human feces have also been spilling into ponds and onto land from failing septic systems that the ranchers are required to maintain as part of their lease agreements! Unacceptable and irresponsible!

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore!

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands!

With sincere appreciation!

Sincerely, Rita Cross

Save Pt Reyes National Seashore

Sincerely, Jenna Contuchio

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

I've been to other historic National Parks such as Williamsburg, VA, where I was welcomed into historic homes for demonstrations of how butter was made and horses cared for. It's horrible to visit the "historic" ranches at Point Reyes National Seashore where I was greeted with "keep out" signs, hostile ranchers on ATVs, and miles of barbed wire. Leasing our National Park provides no educational activities and no benefit to the public, it only feeds the pockets of the greedy beef and dairy operators.

Addressing unsafe water in a park ought to be an urgent public health priority, but the park service acts as if they can deal when it's convenient.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Linda Fighera

Thank you for taking the time to read my comment! I am very concerned with what I have heard about Point Reyes, and I hope you all can take leadership and help solve these issues.

Beef and dairy operators at Point Reyes National Seashore have dammed surface streams to create watering ponds for livestock, thereby depriving downstream fish and native wildlife of the habitat needed to sustain them, especially during drought years.

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

My request is that the Coastal Commission holds the park service accountable to its mission, to prioritize the health of the park over the financial interests of cattle ranches.

Sincerely, Diane Eisenhower

We appreciate you taking action to improve the appalling situation in Point Reyes.

Migratory birds from all over the Western United states stop in the Seashore in search of a safe place to rest and refuel along the Pacific Flyway. Endangered marine mammals along the Pacific Coast call Point Reyes home. We now know that Point Reyes provides poor habitat for these protected wildlife. At Point Reyes, water is polluted by cattle manure and land is barren due to too many cows.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

For the sake of Californians, not cattle businesses, please protect the state's coastline!

Sincerely, diane geary

From:	Marnie Gaede
To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 1:10:10 PM

The Commissioners have an important role protecting our coast.

Point Reyes National Seashore has some of the most polluted waterways in California, and the cause of the pollution is due to cattle ranching on leased parcels. Therefore it is unclear why ranching tenants can continue their ranching operations while scientific documentation notes the impact to water and air quality on these public lands.

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Marnie Gaede

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

As a Marin resident who comes to the park to picnic and kayak, I have become very concerned about water pollution from cattle manure and human sewage spills. It is appalling to learn that some ranch houses have never had septic systems, the NPS knew and did nothing much about it.

I am concerned that if ranching is not eliminated soon, it may be too late to prevent the loss of already threatened or endangered wildlife that depend the park's natural resources for their survival.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Robert Ortiz

I want to thank the Coastal Commissioners for providing an opportunity for the public to share their position on the ongoing issues associated with private cattle ranching in Point Reyes National Seashore.

A national park should not contain this wide breadth of environmental problems. Nor should over a third of a national park be placed aside for private industry.

It's time for the California Coastal Commission to step in and stop this absurdity! For the sake of people, wildlife, and habitat, stop this long-time tragedy! Point Reyes could be a model for sound and sane climate policy practices, biodiversity restoration, and leading edge drought science.

The Channel Islands recently got rid of cattle. We ask the Coastal Service to work with the National Park Service and do the same.

Sincerely, Laraine Lebron

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

Aquatic life in the Pacific Ocean adjacent to Point Reyes National Seashore are harmed by pollution from ranches. These include the federally endangered Central Coast Coho salmon as well as whales which migrate through the area.

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, Petra Klages

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

Recent news reports revealed that not only livestock manure is being discharged onto land and into surface waters at Point Reyes National Seashore – human feces have also been spilling into ponds and onto land from failing septic systems that the ranchers are required to maintain as part of their lease agreements.

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

The Commissioners have an important role protecting our coast.

I have hiked a lot in Point Reyes National Seashore, and I have stopped going to many places because there's so much cow crap everywhere, in streams and on trails and draining onto a lot of beaches there. It's disgusting and really unhealthy. Why is this allowed to continue for years and years and years?

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, Lynn Graham

I greatly appreciate you taking the time to consider my comment. Point Reyes National Seashore holds a special place in my heart.

I recently read that beaches at Point Reyes received failing grades for water quality, and that these issues have been going on for decades. A National Park in California should not have unsafe water quality.

I am concerned that if ranching is not eliminated soon, it may be too late to prevent the loss of already threatened or endangered wildlife that depend the park's natural resources for their survival.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, Carlos Ferreira

We need the California Coastal Commission to protect the only National Seashore on the west coast.

Too many cattle have turned vast areas of the park into a virtual dead zone.

Point Reyes National Seashore is at grave risk to be destroyed by the horrible decades-long practices and consequences of cattle ranching among the current and present dangers of climate warming, biodiversity loss, and extended drought. The California Coastal Commission MUST step up and push the National Park Service NOW to rid ranchers and cattle from the American public's National Seashore here, the only national park unit on the West Coast.

Any plan that is ultimately produced to address the water and climate impacts of ranching, as the Commission has required, must include measurable benchmarks and deadlines for achieving them, enforcement mechanisms, and consequences—including closing down private ranching in the park— for failure to perform.

Sincerely, Carol Patton

I greatly appreciate you taking the time to consider my comment. Point Reyes National Seashore holds a special place in my heart.

I recently read that beaches at Point Reyes received failing grades for water quality, and that these issues have been going on for decades. A National Park in California should not have unsafe water quality.

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Tracy Templin

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Please reconsider your approval of ranching in the national park.

Sincerely, Cindy P.

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

Scientists say we are in the sixth mass extinction event. California is attempting to protect 30% of our land and waters by 2030 to help protect our state's wildlife. We can't afford to continue to degrade critical wildlife habitat.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Frances Carpenter

Point Reyes National Seashore is one of the world's biodiversity hotspots.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, Janet Wallace

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life. There is a plan to cull the indigenous Tule Elk because the cattle require the space and the water also needed to sustain these magnificent and native elk. We fought to have this National Park established and in so doing did not

fight to maintain private profit making that degrades our Pacific Coastline.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

Please reconsider your approval of ranching in the national park.

Sincerely, Sandra Morey

Date:	Tuesday, August 30, 2022 1:04:41 PM

I was at Point Reyes for the first time in years, and it was clear that something has to change.

As a regular visitor to the park, I frequently see cattle trampling through creeks and streams, and even standing and pooping in Drakes Estero. In places where cattle are seen, I step over cow feces on trails and shorelines. It's no wonder the water quality is terrible.

With continued ranching and the drought at Point Reyes National Seashore, I worry very much about the continued loss of biodiversity there. Please do not let the ranchers or the park service continue their mismanagement of this special place.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, A Kirk

As one who is proud and awestruck by the unique California coastline and biodiversity, especially in Point Reyes, I would like to thank you for your efforts to protect the only National seashore on the West coast.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

As the pandemic has shown us, we need to increase public recreation and access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up keeping people out of our parklands.

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, Mike LeHew

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, John Staunton

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

During this drought, the National Park Service has let hundreds of our famous and rare Tule elk perish from dehydration. Elk and cows cannot coexist on the Seashore.

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, Cindy Moczarney

I have visited the Bay Area many times. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

Please reconsider your approval of ranching in the national park.

Sincerely, Nancy Heck

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

The bike paths at Point Reyes are the worst in Marin – dusty, barren and full of cow poop that gets into your tires, shoes, clothes and skin.

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

"First gradually, then all at once." That is the history of the environmental crisis at Point Reyes. Please address this urgent need.

Sincerely, Patricia PERRON

Thank you for taking the time to read my comments about the many problems with the out at Point Reyes National Seashore. I have visited there for decades, and am appalled at the bad conditions and management there.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

What happens to the wildlife when the water runs out?

My request is that the Coastal Commission holds the park service accountable to its mission, to prioritize the health of the park over the financial interests of cattle ranches.

Sincerely, J M

I respectively request the California Coastal Commissioners to do everything possible to protect our public lands in Point Reyes National Seashore.

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Irena Franchi

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, Lori Beth Kidd

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

Why are dairy and beef cattle allowed to defecate over so much of Point Reyes National Seashore? There is cattle manure in creeks and streams, and covering trails. It's bad for adults, kids, pets, every visitor! Why doesn't the park management stop it? Why do these ranchers abuse the land and water in our national park?

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Patti Fink

As a longtime resident of California, I am writing to express my sadness and concern at the current state of Point Reyes National Seashore.

Aquatic life in the Pacific Ocean adjacent to Point Reyes National Seashore are harmed by pollution from ranches. These include the federally endangered Central Coast Coho salmon as well as whales which migrate through the area.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Charlene Kerchevall

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Joyce Devlin

Please take this opportunity to clean up the only national park on the west coast!

I recently read that beaches at Point Reyes received failing grades for water quality, and that these issues have been going on for decades. A National Park in California should not have unsafe water quality.

We are in the midst of a climate crisis, and most are being too slow to address it. For example, many are not actively working to decrease water use, nor actively working toward the protection of water quality of the water we have.

Please help address and end the constant impact of ranching on our public lands on the Pacific Coast. It is time for our environment to come first, especially on public land.

Sincerely, Anita Wisch

Thank you for reading my comment, Coastal Commissioners. I am a lifelong visitor to Point Reyes.

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, Andarin Arvola

It's sad we've come to a point as a people that we are begging for clean water and air but the lack of these things is a life and death situation.

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Alicia Edmunds

Thank you for your work to protect our coast, especially at Point Reyes National Seashore.

I used to love kayaking at Point Reyes but when I heard about how the water quality goes unmonitored, I just couldn't go there anymore.

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Meg Paton

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Bridgett Heinly

As a long-time California resident, I am writing to express sadness and outrage over the conditions at Point Reyes National Seashore.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, susan ponchot

I greatly appreciate you taking the time to consider my comment. Point Reyes National Seashore holds a special place in my heart.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

Ranchers say the run their operations "sustainably" while they pollute the water, degrade coastal habitats and endanger rare wildlife in order to produce milk and meat that's produced in abundance elsewhere.

Please help us get the ranchers out of our National Seashore! Point Reyes is the only National Seashore on the West Coast of the U.S., and it's becoming a cesspool, even though ranchers were supposed to leave decades ago.

Protect the only National Seashore on the Pacific Ocean from unregulated water pollution is a California leadership example on environmental safeguards before private interests.

Thank you.

Sincerely, Ralph Sanchez

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, Kenneth Lapointe

I was at Point Reyes for the first time in years, and it was clear that something has to change.

If Point Reyes is special enough to be a national park and UN-designated Biodiversity Hot Spot, why is it permitted to have the most polluted waters on the California Coast?

The Park Service, park management, and multiple regulatory agencies been tap dancing around this for decades and the damage and harm out there is worse and worse! Please do whatever you can to get rid of ranchers and their cattle, and return our national seashore to nature, not cow crap all over the place!

Thank you for your serious sincere attention and action on this matter! No more private ranching, no more cows in Point Reyes National Seashore!

Sincerely, Fredrik Larsson

The purpose of the National Park is to protect our wilderness and provide equitable access for all folks. Please, do whatever you can to send a message and remind the Park Service of their DUTY.

Citizens look to national parks – "our best idea" – for leadership in the climate crisis, but Point Reyes is an example of the worst practices in conserving water and protecting biodiversity.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Please protect our remaining water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Bruce Hlodnicki

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

Citizens look to national parks – "our best idea" – for leadership in the climate crisis, but Point Reyes is an example of the worst practices in conserving water and protecting biodiversity.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Michelle Palladine

I greatly appreciate you taking the time to consider my comment. Point Reyes National Seashore holds a special place in my heart.

I am confused as to how its legal that some of the worst water quality in the state occurs within a National Park!

The National Park Service lacks the resources (money and personnel) necessary to control the profit-driven, opportunistic ranchers who don't spare a thought about environmental health and safety.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Jessica Cresseveur

I want to trust the California Coastal Commission is doing all in its power to help fix the problems out on Point Reyes National Seashore.

I am confused as to how its legal that some of the worst water quality in the state occurs within a National Park!

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, Gregory Freeman

Thank you for considering my comments about the damage to Point Reyes National Seashore from cattle operations. I know that I am not alone in saying the impacts are so apparent and disheartening that I no longer visit the park.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Cattle were recently removed from the Channel Islands. We want the National Park Service and the Coastal Service to collaborate and take similar action.

Sincerely, Donna Delisi

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Barbara Blackwood

Thank you for using your authority to address the terrible conditions at Point Reyes.

As a regular visitor to the park, I frequently see cattle trampling through creeks and streams, and even standing and pooping in Drakes Estero. In places where cattle are seen, I step over cow feces on trails and shorelines. It's no wonder the water quality is terrible.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Politics should not be used as the basis for decisions that may influence the future of the Seashore. We need real action now in order to secure a future for Point Reyes.

Sincerely, Donna Delisi

It's vital that the State of California has oversight authority over the coastal areas and ecosystems within the Seashore.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Janet Heinle

To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 12:51:37 PM

I was at Point Reyes for the first time in years, and it was clear that something has to change.

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Amy Bursky

We appreciate you taking action to improve the appalling situation in Point Reyes.

I recently read that beaches at Point Reyes received failing grades for water quality, and that these issues have been going on for decades. A National Park in California should not have unsafe water quality.

If ranches weren't funded by our taxes, they couldn't exist and wouldn't be allowed in the park. Why are we paying for them to pollute our waters?

The Coastal Commission is our best hope for cleaning up the water at Point Reyes. Please ensure that the park service develops and implements a strict water quality plan as soon as possible.

Sincerely, Anne Kaufmann

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Arlene Zuckerman

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

Too many cattle have turned vast areas of the park into a virtual dead zone.

Point Reyes National Seashore is at grave risk to be destroyed by the horrible decades-long practices and consequences of cattle ranching among the current and present dangers of climate warming, biodiversity loss, and extended drought. The California Coastal Commission MUST step up and push the National Park Service NOW to rid ranchers and cattle from the American public's National Seashore here, the only national park unit on the West Coast.

Any plan that is ultimately produced to address the water and climate impacts of ranching, as the Commission has required, must include measurable benchmarks and deadlines for achieving them, enforcement mechanisms, and consequences—including closing down private ranching in the park— for failure to perform.

Sincerely, Shiela Cockshott

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

I've been to other historic National Parks such as Williamsburg, VA, where I was welcomed into historic homes for demonstrations of how butter was made and horses cared for. It's horrible to visit the "historic" ranches at Point Reyes National Seashore where I was greeted with "keep out" signs, hostile ranchers on ATVs, and miles of barbed wire. Leasing our National Park provides no educational activities and no benefit to the public, it only feeds the pockets of the greedy beef and dairy operators.

Addressing unsafe water in a park ought to be an urgent public health priority, but the park service acts as if they can deal when it's convenient.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Katy Whitehouse

I respectively request the California Coastal Commissioners to do everything possible to protect our public lands in Point Reyes National Seashore.

The National Park Service has not performed water quality monitoring in the known polluted waterways in Point Reyes for years – this is unacceptable. If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Lois White

As one who is proud and awestruck by the unique California coastline and biodiversity, especially in Point Reyes, I would like to thank you for your efforts to protect the only National seashore on the West coast.

As a bay area resident who comes to the park to enjoy the wild and scenic nature, I have become very concerned about water pollution from cattle manure and human sewage spills. It is appalling to learn that some ranch houses have never had septic systems, the NPS knew and did nothing much about it.

We are in the midst of a climate crisis, and most are being too slow to address it. For example, many are not actively working to decrease water use, nor actively working toward the protection of water quality of the water we have.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Reetta Raag

We need the California Coastal Commission to protect the only National Seashore on the west coast.

It is a tragedy to see the park deteriorate, especially over the last decade. Cattle operations, made worse by drought, have turned the landscape into a sea of bare dirt and manure.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

The National Park Service has not kept its agreements and can't be relied upon to do so.

Sincerely, Simone Fonseca

I was at Point Reyes for the first time in years, and it was clear that something has to change.

If Point Reyes is special enough to be a national park and UN-designated Biodiversity Hot Spot, why is it permitted to have the most polluted waters on the California Coast?

The Park Service, park management, and multiple regulatory agencies been tap dancing around this for decades and the damage and harm out there is worse and worse! Please do whatever you can to get rid of ranchers and their cattle, and return our national seashore to nature, not cow crap all over the place!

Thank you for your serious sincere attention and action on this matter! No more private ranching, no more cows in Point Reyes National Seashore!

Sincerely, Debra Castellana

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

Too many cattle have turned vast areas of the park into a virtual dead zone.

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

My request is that the Coastal Commission holds the park service accountable to its mission, to prioritize the health of the park over the financial interests of cattle ranches.

Sincerely, Molly Mendez

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Debora Sayre

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

The trash, heaps of cattle manure, beaches closed to the public because of dangerous levels of bacteria from cows—shouldn't be happening in a national park.

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Susan Sloan

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Please protect human health for beachgoers at Point Reyes. Hold the ranches accountable. Eliminate the water pollution.

Sincerely, Blaise Brockman

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

The trash, heaps of cattle manure, beaches closed to the public because of dangerous levels of bacteria from cows—shouldn't be happening in a national park.

With continued ranching and the drought at Point Reyes National Seashore, I worry very much about the continued loss of biodiversity there. Please do not let the ranchers or the park service continue their mismanagement of this special place.

"First gradually, then all at once." That is the history of the environmental crisis at Point Reyes. Please address this urgent need.

Sincerely, Fay Payton

As a longtime resident of California, I am writing to express my sadness and concern at the current state of Point Reyes National Seashore.

Recent news reports revealed that not only livestock manure is being discharged onto land and into surface waters at Point Reyes National Seashore – human feces have also been spilling into ponds and onto land from failing septic systems that the ranchers are required to maintain as part of their lease agreements.

The National Park Service lacks the resources (money and personnel) necessary to control the profit-driven, opportunistic ranchers who don't spare a thought about environmental health and safety.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, Greg Pennington

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

The National Park Service has not performed water quality monitoring in the known polluted waterways in Point Reyes for years – this is unacceptable. If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

This saga has gone on long enough, the park continues to do nothing! This is a national park which should mean something.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Tracy Nguyen

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Barb Sager

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

Our family has enjoyed visiting the Pt Reyes for decades, but the news about unsafe levels of E.coli in the park's streams and beaches is deeply concerning. As a mother, I worry that my children will be exposed to water that is polluted by cattle manure or even human sewage from leaking septic systems. Until these WQ is adequately addressed, we will find alternative places to safely picnic and play.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Nina Wouk

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

The National Park Service has not performed water quality monitoring in the known polluted waterways in Point Reyes for years – this is unacceptable. If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

This saga has gone on long enough, the park continues to do nothing! This is a national park which should mean something.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Lillian Fitton.

Icallersmom@ncbb.net greatly appreciate you taking the time to consider my comment. Point Reyes National Seashore holds a special place in my heart.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, Marion Barry

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

The National Park Service has not performed water quality monitoring in the known polluted waterways in Point Reyes for years – this is unacceptable. If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

This saga has gone on long enough, the park continues to do nothing! This is a national park which should mean something.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Natascha Thaler

The National Park Service knew there was water contamination starting in 2001. Their solution? Just stop sampling in 2013! We look to the Coastal Commission to expeditiously protect and clean up our coastal waters.

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, Lisa M Mintz Kavas

I respectively request the California Coastal Commissioners to do everything possible to protect our public lands in Point Reyes National Seashore.

The National Park Service has not performed water quality monitoring in the known polluted waterways in Point Reyes for years – this is unacceptable. If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Anita Scheunemann

Thank you for your involvement in helping protect the Seashore! We need your leadership to help finally make this park a park.

Migratory birds from all over the Western United states stop in the Seashore in search of a safe place to rest and refuel along the Pacific Flyway. Endangered marine mammals along the Pacific Coast call Point Reyes home. We now know that Point Reyes provides poor habitat for these protected wildlife. At Point Reyes, water is polluted by cattle manure and land is barren due to too many cows.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Jamie Reifman

Sincerely, Camille Gilbert

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

I used to love kayaking at Point Reyes but when I heard about how the water quality goes unmonitored, I just couldn't go there anymore.

The National Park Service knew there was water contamination starting in 2001. Their solution? Just stop sampling in 2013! We look to the Coastal Commission to expeditiously protect and clean up our coastal waters.

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, Vira Confectioner

Thank you for taking the time to read my comments about the many problems with the out at Point Reyes National Seashore. I have visited there for decades, and am appalled at the bad conditions and management there.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

Help the conservation groups to end the pollution and protect this biodiversity hotspot.

Sincerely, Teresia LaFleur

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

Please take urgent action befitting the critical environmental crisis at Point Reyes.

Sincerely, Arshad Ameen

From:	M Ruth Correia
To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 12:43:36 PM

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

Manure discharged from cows and other livestock at Point Reyes National Seashore not only contaminates our beaches with potentially disease causing fecal bacteria they add nitrogen and phosphorus which cause surface waters to be so choked with emergent vegetation you can hardly see the water.

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, M Ruth Correia

Thank you for taking the time to read my comment! I am very concerned with what I have heard about Point Reyes, and I hope you all can take leadership and help solve these issues.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

If you visit Point Reyes National Seashore, you will witness vast degradation by ranchers of lands and waters bequeathed in trust to the American people in perpetuity as a natural wonder. Please do ALL in your power to get the National Park Service (and Seashore management) to enforce existing environmental law, and plan for the removal of all ranching from the park within the next five years, period!

Sincerely, April Parkins

As a long-time California resident, I am writing to express sadness and outrage over the conditions at Point Reyes National Seashore.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Tracy Drake

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

I am confused as to how its legal that some of the worst water quality in the state occurs within a National Park!

Our planet needs to be saved from constant, known environmental impact, and the general public deserves the opportunity to visit this National Seashore and experience clean surface waters in the creeks and on the beaches, and public access to all of the park, rather than having over 300 miles of electric and barb-wire fences used for cattle ranching.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, JAN GOLICK

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

I used to love kayaking at Point Reyes but when I heard about how the water quality goes unmonitored, I just couldn't go there anymore.

The National Park Service knew there was water contamination starting in 2001. Their solution? Just stop sampling in 2013! We look to the Coastal Commission to expeditiously protect and clean up our coastal waters.

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, Pam Evans

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Jennifer Scull

I respectively request the California Coastal Commissioners to do everything possible to protect our public lands in Point Reyes National Seashore.

The National Park Service has not performed water quality monitoring in the known polluted waterways in Point Reyes for years – this is unacceptable. If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Liz Field

I greatly appreciate you taking the time to consider my comment. Point Reyes National Seashore holds a special place in my heart.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, Barbara Greenwood

Thank you for considering my comment. Point Reyes National Seashore is the "Island in Time" created during the Kennedy Administration that gives so many visitors a beautiful and peaceful way to connect with the natural world.

This state is in an extreme drought. Cows at Point Reyes are consuming all the water that should be going to natural habitat and wildlife, like the tule elk.

If ranches weren't funded by our taxes, they couldn't exist and wouldn't be allowed in the park. Why are we paying for them to pollute our waters?

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Robert Brown

As a longtime resident of California, I am writing to express my sadness and concern at the current state of Point Reyes National Seashore.

This state is in an extreme drought. Cows at Point Reyes are consuming all the water that should be going to natural habitat and wildlife, like the tule elk.

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

The Coastal Commission is our best hope for cleaning up the water at Point Reyes. Please ensure that the park service develops and implements a strict water quality plan as soon as possible.

Sincerely, Rocio Luparello

Date:	Tuesday, August 30, 2022 12:41:08 PM

We need our Commissioners to protect and defend our coastal resources for all the people of California for generations to come.

Why are dairy and beef cattle allowed to defecate over so much of Point Reyes National Seashore? There is cattle manure in creeks and streams, and covering trails. It's bad for adults, kids, pets, every visitor! Why doesn't the park management stop it? Why do these ranchers abuse the land and water in our national park?

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

This is a national seashore for the American people and for wildlife and habitat—not a playground or business landscape for private, industrial-level, factory animal operations. Please help get the ranchers out of Point Reyes National Seashore.

Sincerely, Robert Gibb

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Lisa Cubeiro

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. "No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Susan Lantow

As a long-time California resident, I am writing to express sadness and outrage over the conditions at Point Reyes National Seashore.

If Point Reyes is special enough to be a national park and UN-designated Biodiversity Hot Spot, why is it permitted to have the most polluted waters on the California Coast?

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

If you visit Point Reyes National Seashore, you will witness vast degradation by ranchers of lands and waters bequeathed in trust to the American people in perpetuity as a natural wonder. Please do ALL in your power to get the National Park Service (and Seashore management) to enforce existing environmental law, and plan for the removal of all ranching from the park within the next five years, period!

Sincerely, Marcia Flannery

I have lived in northern California a long time, and am really upset about what's going on out at Point Reyes National Seashore.

Why do ranchers have so much power over our national park? Their cattle create vast dead zones out on the Point. The ranchers and their cattle shouldn't even be there anymore! They constantly manipulate park management and regulatory agencies for private profit and hurt wildlife and visitors with their shady dealings with park management.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Ron Parsons

We need the California Coastal Commission to protect the only National Seashore on the west coast.

It is a tragedy to see the park deteriorate, especially over the last decade. Cattle operations, made worse by drought, have turned the landscape into a sea of bare dirt and manure.

It's time for the California Coastal Commission to step in and stop this absurdity! For the sake of people, wildlife, and habitat, stop this long-time tragedy! Point Reyes could be a model for sound and sane climate policy practices, biodiversity restoration, and leading edge drought science.

Politics should not be used as the basis for decisions that may influence the future of the Seashore. We need real action now in order to secure a future for Point Reyes.

Sincerely, Steve Sheehy

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

I've seen cattle where they don't belong—wading in creeks and estuaries that are choked with algae from cattle manure.

We are in the midst of a climate crisis, and most are being too slow to address it. For example, many are not actively working to decrease water use, nor actively working toward the protection of water quality of the water we have.

If you visit Point Reyes National Seashore, you will witness vast degradation by ranchers of lands and waters bequeathed in trust to the American people in perpetuity as a natural wonder. Please do ALL in your power to get the National Park Service (and Seashore management) to enforce existing environmental law, and plan for the removal of all ranching from the park within the next five years, period!

Sincerely, Neal Steiner

Date:	Tuesday, August 30, 2022 12:39:10 PM

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

Manure discharged from cows and other livestock at Point Reyes National Seashore not only contaminates our beaches with potentially disease causing fecal bacteria they add nitrogen and phosphorus which cause surface waters to be so choked with emergent vegetation you can hardly see the water.

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, M Rute Correia

Date:	Tuesday, August 30, 2022 12:38:15 PM

The Commissioners have an important role protecting our coast.

I have hiked a lot in Point Reyes National Seashore, and I have stopped going to many places because there's so much cow crap everywhere, in streams and on trails and draining onto a lot of beaches there. It's disgusting and really unhealthy. Why is this allowed to continue for years and years and years?

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, Renee Janton

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. "No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Nick Flaig

What is going on at Point Reyes?

I am confused as to how its legal that some of the worst water quality in the state occurs within a National Park!

The Park Service, park management, and multiple regulatory agencies been tap dancing around this for decades and the damage and harm out there is worse and worse! Please do whatever you can to get rid of ranchers and their cattle, and return our national seashore to nature, not cow crap all over the place!

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Sherry Macias

Thank you for taking the time to read my comment. I live in the Bay Area and visit Point Reyes National Seashore several times a month.

Beef and dairy operators at Point Reyes National Seashore have dammed surface streams to create watering ponds for livestock, thereby depriving downstream fish and native wildlife of the habitat needed to sustain them, especially during drought years.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

My request is that the Coastal Commission holds the park service accountable to its mission, to prioritize the health of the park over the financial interests of cattle ranches.

Sincerely, Judith Hoaglund

People come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, Martha Waltman

Point Reyes is the only national seashore on the Pacific Coast and is designated an International Biological Preserve for its abundant biodiversity and proximity to other protected lands and waters.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore.

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, Joanie Steinhaus

We need our Commissioners to protect and defend our coastal resources for all the people of California for generations to come.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

With continued ranching and the drought at Point Reyes National Seashore, I worry very much about the continued loss of biodiversity there. Please do not let the ranchers or the park service continue their mismanagement of this special place.

The Channel Islands recently got rid of cattle. We ask the Coastal Service to work with the National Park Service and do the same.

Sincerely, R.A.L. West

Thank you for considering my comment. Point Reyes National Seashore is the "Island in Time" created during the Kennedy Administration that gives so many visitors a beautiful and peaceful way to connect with the natural world.

A national park should not contain this wide breadth of environmental problems. Nor should over a third of a national park be placed aside for private industry.

This saga has gone on long enough, the park continues to do nothing! This is a national park which should mean something.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Michelle Weber

Thank you for taking the time to read my comment! I am very concerned with what I have heard about Point Reyes, and I hope you all can take leadership and help solve these issues.

The news about unsafe levels of E.coli in the park's streams and beaches is deeply concerning. As a mother and grandmother, I worry that my children and grandchildren will be exposed to water that is polluted by cattle manure or even human sewage from leaking septic systems. Until these WQ is adequately addressed, we will find alternative places to safely picnic and play.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Mary Zack

Thank you for taking the time to read my comments about the many problems with the out at Point Reyes National Seashore. I have visited there for decades, and am appalled at the bad conditions and management there.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

Help the conservation groups to end the pollution and protect this biodiversity hotspot.

Sincerely, steve kent

I hope you care about Point Reyes National Seashore as much as I and so many millions of people do.

I used to enjoy going to the Seashore with friends to hike, kayak, watch birds and take pictures.

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, Stewart Cresswell

From:	Antje Fray
To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 12:35:13 PM

Point Reyes is one of the most beautiful places in California, and it concerns me that to read about the level of pollution that occurs in places which were intended to be for the public

The thousands of acres in Point Reyes National leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

Point Reyes National Seashore is at grave risk to be destroyed by the horrible decades-long practices and consequences of cattle ranching among the current and present dangers of climate warming, biodiversity loss, and extended drought. The California Coastal Commission MUST step up and push the National Park Service NOW to rid ranchers and cattle from the American public's National Seashore here, the only national park unit on the West Coast.

Thank you for your serious sincere attention and action on this matter! No more private ranching, no more cows in Point Reyes National Seashore!

Sincerely, Antje Fray

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

Why is it allowed for Point Reyes to have the most contaminated waters on the California Coast if it is unique enough to be a national park and an UN-designated Biodiversity Hot Spot?

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Ian Shelley

We need the California Coastal Commission to protect the only National Seashore on the west coast.

The ranchers have had decades to do the right thing for the environment, and insist to manipulate and obfuscate every chance they can. Raw sewage leaking on lands and in fresh and ocean waters; cattle excrement covering half the park; methane fouling the air; cows as eyesores in what is to be a natural wilderness; and actual dead zones of soil and waters—all by disingenuous ranchers and compliant park management and staff.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, Tracy Marotta

Thank you for taking the time to read my comment! I am very concerned with what I have heard about Point Reyes, and I hope you all can take leadership and help solve these issues.

A national park should not contain this wide breadth of environmental problems. Nor should over a third of a national park be placed aside for private industry.

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

Please help us get the ranchers out of our National Seashore! Point Reyes is the only National Seashore on the West Coast of the U.S., and it's becoming a cesspool, even though ranchers were supposed to leave decades ago.

Sincerely, Tracy Marotta

Thank you for reading my comment, Coastal Commissioners. I am a lifelong visitor to Point Reyes.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Linda Bescript

As one who is proud and awestruck by the unique California coastline and biodiversity, especially in Point Reyes, I would like to thank you for your efforts to protect the only National seashore on the West coast.

Recent news reports revealed that not only livestock manure is being discharged onto land and into surface waters at Point Reyes National Seashore – human feces have also been spilling into ponds and onto land from failing septic systems that the ranchers are required to maintain as part of their lease agreements.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Meryl Pinque

As one who is proud and awestruck by the unique California coastline and biodiversity, especially in Point Reyes, I would like to thank you for your efforts to protect the only National seashore on the West coast.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Carol Collins

I am not a Bay Area resident but I cherish the existence of all the National Parks I have visited in 78 years. I would hope that they all can continue to exist in fulfillment of their reasons for being.

I've been to other historic National Parks such as Williamsburg, VA, where I was welcomed into historic homes for demonstrations of how butter was made and horses cared for. It's horrible to visit the "historic" ranches at Point Reyes National Seashore where I was greeted with "keep out" signs, hostile ranchers on ATVs, and miles of barbed wire. Leasing our National Park provides no educational activities and no benefit to the public, it only feeds the pockets of the greedy beef and dairy operators.

Addressing unsafe water in a park ought to be an urgent public health priority, but the park service acts as if they can deal when it's convenient.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Jane Clark

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

I have hiked a lot in Point Reyes National Seashore, and I have stopped going to many places because there's so much cow crap everywhere, in streams and on trails and draining onto a lot of beaches there. It's disgusting and really unhealthy. Why is this allowed to continue for years and years and years?

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

Please hold the park service accountable, and withdraw your concurrence of the NPS's plan to deliver 20-year leases to ranchers.

Sincerely, Hank Ramírez

Thank you for your involvement in helping protect the Seashore! We need your leadership to help finally make this park a park.

Our family has enjoyed visiting the Pt Reyes for decades, but the news about unsafe levels of E.coli in the park's streams and beaches is deeply concerning. As a mother, I worry that my children will be exposed to water that is polluted by cattle manure or even human sewage from leaking septic systems. Until these WQ is adequately addressed, we will find alternative places to safely picnic and play.

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Tatiana Medina

I respectively request the California Coastal Commissioners to do everything possible to protect our public lands in Point Reyes National Seashore.

Cows and other livestock at Point Reyes National Seashore trample the ground causing erosion and siltation which fills in streams and degrades habitat for fish and aquatic life.

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Mercy Sidbury

As one who is proud and awestruck by the unique California coastline and biodiversity, especially in Point Reyes, I would like to thank you for your efforts to protect the only National seashore on the West coast.

Sincerely, Debi Griepsma

Thank you for reading my comment, Coastal Commissioners. I am a lifelong visitor to Point Reyes.

I am confused as to how its legal that some of the worst water quality in the state occurs within a National Park!

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

Help the conservation groups to end the pollution and protect this biodiversity hotspot.

Sincerely, ingrid woods

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

If Point Reyes is special enough to be a national park and UN-designated Biodiversity Hot Spot, why is it permitted to have the most polluted waters on the California Coast?

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Bruce Sowden

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

I am confused as to how its legal that some of the worst water quality in the state occurs within a National Park!

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, Georgia Brewer

As a longtime resident of California, I am writing to express my sadness and concern at the current state of Point Reyes National Seashore.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

We are in a climate and extinction crisis. We the public, and all agencies should be focused on taking the right steps to address these human-caused issues. Per scientific publications, we are almost out of time, so the time is now.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, Winnie Wrightway

As a longtime resident of California, I am writing to express my sadness and concern at the current state of Point Reyes National Seashore.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

We are in a climate and extinction crisis. We the public, and all agencies should be focused on taking the right steps to address these human-caused issues. Per scientific publications, we are almost out of time, so the time is now.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, Derek Gendvil

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

Why is it allowed for Point Reyes to have the most contaminated waters on the California Coast if it is unique enough to be a national park and an UN-designated Biodiversity Hot Spot?

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, DAVID HARRON

Thank you for taking the time to read my comment! I am very concerned with what I have heard about Point Reyes, and I hope you all can take leadership and help solve these issues.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, JOHN HARRIS

Thank you for considering my comment. Point Reyes National Seashore is the "Island in Time" created during the Kennedy Administration that gives so many visitors a beautiful and peaceful way to connect with the natural world.

The bike paths at Point Reyes are the worst in Marin – dusty, barren and full of cow poop that gets into your tires, shoes, clothes and skin.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

The Channel Islands recently got rid of cattle. We ask the Coastal Service to work with the National Park Service and do the same.

Sincerely, Kathleen Moraski

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

I've been to other historic National Parks such as Williamsburg, VA, where I was welcomed into historic homes for demonstrations of how butter was made and horses cared for. It's horrible to visit the "historic" ranches at Point Reyes National Seashore where I was greeted with "keep out" signs, hostile ranchers on ATVs, and miles of barbed wire. Leasing our National Park provides no educational activities and no benefit to the public, it only feeds the pockets of the greedy beef and dairy operators.

Addressing unsafe water in a park ought to be an urgent public health priority, but the park service acts as if they can deal when it's convenient.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Anthony Mehle

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

The National Park Service has not performed water quality monitoring in the known polluted waterways in Point Reyes for years – this is unacceptable. If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

We are in a climate and extinction crisis. We the public, and all agencies should be focused on taking the right steps to address these human-caused issues. Per scientific publications, we are almost out of time, so the time is now.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, Stephen Cutler

Thank you for taking the time to read my comment! I am very concerned with what I have heard about Point Reyes, and I hope you all can take leadership and help solve these issues.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

From:	Joan Walker
To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 12:30:20 PM

The Commissioners have an important role protecting our coast.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

We are in the midst of a climate crisis, and most are being too slow to address it. For example, many are not actively working to decrease water use, nor actively working toward the protection of water quality of the water we have.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Joan Walker

From:	Karyn Morales
To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 12:30:12 PM

I was at Point Reyes for the first time in years, and it was clear that something has to change.

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Karyn Morales

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

I have hiked a lot in Point Reyes National Seashore, and I have stopped going to many places because there's so much cow crap everywhere, in streams and on trails and draining onto a lot of beaches there. It's disgusting and really unhealthy. Why is this allowed to continue for years and years and years?

With continued ranching and the drought at Point Reyes National Seashore, I worry very much about the continued loss of biodiversity there. Please do not let the ranchers or the park service continue their mismanagement of this special place.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Patti Mckinley

Thank you for taking the time to read my comment. I live in the Bay Area and visit Point Reyes National Seashore several times a month.

Manure discharged from cows and other livestock at Point Reyes National Seashore not only contaminates our beaches with potentially disease causing fecal bacteria they add nitrogen and phosphorus which cause surface waters to be so choked with emergent vegetation you can hardly see the water.

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

This is our land. Please hold the National Park Service accountable.

Sincerely, Beverly Hoff

Sincerely, Jennifer Murray

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

If we only have ten years to do something about climate change, why are we doing nothing about the critical conditions at Point Reyes?

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Steve Schueth

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

Between all the septic issues I have heard of, the dying of Elk, gross cattle, and the foul water quality, I am confused as to why no action has been taken.

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, Jeanne Held-Warmkessel

Thank you for taking the time to read my comment! I am very concerned with what I have heard about Point Reyes, and I hope you all can take leadership and help solve these issues.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

Politics should not be used as the basis for decisions that may influence the future of the Seashore. We need real action now in order to secure a future for Point Reyes.

Sincerely, Marce Walsh

From:	Michael Halloran
To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 12:27:01 PM

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

With continued ranching and the drought at Point Reyes National Seashore, I worry very much about the continued loss of biodiversity there. Please do not let the ranchers or the park service continue their mismanagement of this special place.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Michael Halloran

I respectively request the California Coastal Commissioners to do everything possible to protect our public lands in Point Reyes National Seashore.

This state is in an extreme drought. Cows at Point Reyes are consuming all the water that should be going to natural habitat and wildlife, like the tule elk.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, Krin Asselta

Thank you, Coastal Commissioners, for reading my concerns that Point Reyes National Seashore is under threat by its current management practices.

Citizens look to national parks – "our best idea" – for leadership in the climate crisis, but Point Reyes is an example of the worst practices in conserving water and protecting biodiversity.

The National Park Service knew there was water contamination starting in 2001. Their solution? Just stop sampling in 2013! We look to the Coastal Commission to expeditiously protect and clean up our coastal waters.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Jody Goldstein

I want to thank the Coastal Commissioners for providing an opportunity for the public to share their position on the ongoing issues associated with private cattle ranching in Point Reyes National Seashore.

The bike paths at Point Reyes are the worst in Marin – dusty, barren and full of cow poop that gets into your tires, shoes, clothes and skin.

Scientists say we are in the sixth mass extinction event. California is attempting to protect 30% of our land and waters by 2030 to help protect our state's wildlife. We can't afford to continue to degrade critical wildlife habitat.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Jim Petkiewicz

We are fortunate to have Point Reyes National Seashore located in a metropolitan area, and only 60 minutes from San Francisco..

As a regular visitor to the park, I frequently see cattle trampling through creeks and streams, and even standing and pooping in Drakes Estero. In places where cattle are seen, I step over cow feces on trails and shorelines. It's no wonder the water quality is terrible.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

Politics should not be used as the basis for decisions that may influence the future of the Seashore. We need real action now in order to secure a future for Point Reyes.

Sincerely, Janet Rauscher

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

It is a tragedy to see the park deteriorate, especially over the last decade. Cattle operations, made worse by drought, have turned the landscape into a sea of bare dirt and manure.

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, Tracy Ouellette

It is crucial that the State of California have control over the ecosystems and wildlife within the Seashore. I thank you for taking the time to read my thoughts on Point Reyes.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, Sherry Marsh

I hope you care about Point Reyes National Seashore as much as I and so many millions of people do.

Our family has enjoyed visiting the Pt Reyes for decades, but the news about unsafe levels of E.coli in the park's streams and beaches is deeply concerning. As a mother, I worry that my children will be exposed to water that is polluted by cattle manure or even human sewage from leaking septic systems. Until these WQ is adequately addressed, we will find alternative places to safely picnic and play.

I am concerned that if ranching is not eliminated soon, it may be too late to prevent the loss of already threatened or endangered wildlife that depend the park's natural resources for their survival.

Please help address and end the constant impact of ranching on our public lands on the Pacific Coast. It is time for our environment to come first, especially on public land.

Sincerely, Armando A. Garcia

We are fortunate to have Point Reyes National Seashore located in a metropolitan area, and only 60 minutes from San Francisco..

As a Marin resident who comes to the park to picnic and kayak, I have become very concerned about water pollution from cattle manure and human sewage spills. It is appalling to learn that some ranch houses have never had septic systems, the NPS knew and did nothing much about it.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

Please help us get the ranchers out of our National Seashore! Point Reyes is the only National Seashore on the West Coast of the U.S., and it's becoming a cesspool, even though ranchers were supposed to leave decades ago.

Sincerely, Julia Okada

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

Our family has enjoyed visiting the Pt Reyes for decades, but the news about unsafe levels of E.coli in the park's streams and beaches is deeply concerning. As a mother, I worry that my children will be exposed to water that is polluted by cattle manure or even human sewage from leaking septic systems. Until these WQ is adequately addressed, we will find alternative places to safely picnic and play.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Jason Chin

We appreciate you taking action to improve the appalling situation in Point Reyes.

While Point Reyes may seem like a fairly sizable National Park, much of the park is only for the cattle industry. There are over 300 miles of barbed wire fences that keep the public and wildlife from enjoying a large portion of California's coast at Point Reyes.

We are in the midst of a climate crisis, and most are being too slow to address it. For example, many are not actively working to decrease water use, nor actively working toward the protection of water quality of the water we have.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Judy Miller-Lyons

The thousands of acres in Point Reyes National leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, Cathy Barton

Date:	Tuesday, August 30, 2022 12:21:15 PM

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

I've been to other historic National Parks such as Williamsburg, VA, where I was welcomed into historic homes for demonstrations of how butter was made and horses cared for. It's horrible to visit the "historic" ranches at Point Reyes National Seashore where I was greeted with "keep out" signs, hostile ranchers on ATVs, and miles of barbed wire. Leasing our National Park provides no educational activities and no benefit to the public, it only feeds the pockets of the greedy beef and dairy operators.

Addressing unsafe water in a park ought to be an urgent public health priority, but the park service acts as if they can deal when it's convenient.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Dori Cole

I hope you care about Point Reyes National Seashore as much as I and so many millions of people do.

The trash, heaps of cattle manure, beaches closed to the public because of dangerous levels of bacteria from cows—shouldn't be happening in a national park.

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Beverly Foster

It's vital that the State of California has oversight authority over the coastal areas and ecosystems within the Seashore.

There is a severe drought in this state. At Point Reyes, cows are using up all the water that should be going to animals and natural habitats, including tule elk.

Cattle ranching at Point Reyes is clearly not sustainable. Ranchers buy supplemental water and grass for cows, while wildlife are expected to die, according to the park service. The climate crisis will only worsen conditions.

This is a national seashore for the American people and for wildlife and habitat—not a playground or business landscape for private, industrial-level, factory animal operations. Please help get the ranchers out of Point Reyes National Seashore.

Sincerely, Martin Reifinger

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

During this drought, the National Park Service has let hundreds of our famous and rare Tule elk perish from dehydration. Elk and cows cannot coexist on the Seashore.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, Deborah DeSimone

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

Why is it allowed for Point Reyes to have the most contaminated waters on the California Coast if it is unique enough to be a national park and an UN-designated Biodiversity Hot Spot?

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Mary Workman

I am a native Californian and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Courtney Lemmon

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

Aquatic life in the Pacific Ocean adjacent to Point Reyes National Seashore are harmed by pollution from ranches. These include the federally endangered Central Coast Coho salmon as well as whales which migrate through the area.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

The Coastal Commission is our best hope for cleaning up the water at Point Reyes. Please ensure that the park service develops and implements a strict water quality plan as soon as possible.

Sincerely, Lyn du Mont

Thank you for reading my comment about Point Reyes. Years ago my partner proposed to

A national park should not contain this wide breadth of environmental problems. Nor should over a third of a national park be placed aside for private industry.

The National Park Service lacks the resources (money and personnel) necessary to control the profit-driven, opportunistic ranchers who don't spare a thought about environmental health and safety.

Because they are an agency of the federal government, the National Park Service at Point Reyes National Seashore has been operating on the mistaken assumption that they are exempt from California laws. Their disregard is intolerable. Please act now and save our land.

Sincerely, Deborah Wilson

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

I've seen cattle where they don't belong—wading in creeks and estuaries that are choked with algae from cattle manure.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

Please help address and end the constant impact of ranching on our public lands on the Pacific Coast. It is time for our environment to come first, especially on public land.

Sincerely, Pat Bryan

Thank you for considering my comments about the damage to Point Reyes National Seashore from cattle operations. I know that I am not alone in saying the impacts are so apparent and disheartening that I no longer visit the park.

This state is in an extreme drought. Cows at Point Reyes are consuming all the water that should be going to natural habitat and wildlife, like the tule elk.

If ranches weren't funded by our taxes, they couldn't exist and wouldn't be allowed in the park. Why are we paying for them to pollute our waters?

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Paul Carvalho

We are fortunate to have Point Reyes National Seashore located in a metropolitan area, and only 60 minutes from San Francisco..

Why is so much of the Point Reyes National Seashore permitted to be covered in cow manure from dairy and beef cattle? Cattle excrement can be found on footpaths, in creeks, and in streams. Every visitor—adults, children, pets—should avoid it! Why doesn't the park administration put a stop to it? Why do these ranchers misuse our national park's land and water?

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Nicholas Prychodko

Date:	Tuesday, August 30, 2022 12:17:51 PM

Point Reyes National Seashore is one of the world's biodiversity hotspots.

Why are dairy and beef cattle allowed to defecate over so much of Point Reyes National Seashore? There is cattle manure in creeks and streams, and covering trails. It's bad for adults, kids, pets, every visitor! Why doesn't the park management stop it? Why do these ranchers abuse the land and water in our national park?

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Peter Ayres

I visit Point Reyes National Seashore to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Marylucia Arace

Thank you for considering my comments about the damage to Point Reyes National Seashore from cattle operations. I know that I am not alone in saying the impacts are so apparent and disheartening that I no longer visit the park.

There is a severe drought in this state. At Point Reyes, cows are using up all the water that should be going to animals and natural habitats, including tule elk.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Melinda Armistead

As a long-time California resident, I am writing to express sadness and outrage over the conditions at Point Reyes National Seashore.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Vicky Brandt

Thank you for reading my comment, Coastal Commissioners. I am a lifelong visitor to Point Reyes.

This state is in an extreme drought. Cows at Point Reyes are consuming all the water that should be going to natural habitat and wildlife, like the tule elk.

Ranches are not self-supporting and would not be in the park were they not subsidized by our tax dollars.

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, Ms Katherine DaSilva Jain

I feel privileged to have the Point Reyes National Seashore virtually in my backyard.

Point Reyes National Seashore has some of the most polluted waterways in California, and the cause of the pollution is due to cattle ranching on leased parcels. Therefore it is unclear why ranching tenants can continue their ranching operations while scientific documentation notes the impact to water and air quality on these public lands.

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, lonna richmond

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

During this drought, the National Park Service has let hundreds of our famous and rare Tule elk perish from dehydration. Elk and cows cannot coexist on the Seashore.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, Gloria Shen

As a long-time California resident, I am writing to express sadness and outrage over the conditions at Point Reyes National Seashore.

I used to love kayaking at Point Reyes but when I heard about how the water quality goes unmonitored, I just couldn't go there anymore.

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

Please help us get the ranchers out of our National Seashore! Point Reyes is the only National Seashore on the West Coast of the U.S., and it's becoming a cesspool, even though ranchers were supposed to leave decades ago.

Sincerely, Susan Berzac

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Lanelle Lovelace

I greatly appreciate you taking the time to consider my comment. Point Reyes National Seashore holds a special place in my heart.

The trash, heaps of cattle manure, beaches closed to the public because of dangerous levels of bacteria from cows—shouldn't be happening in a national park.

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Sylvia Vairo

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Tamara Cain

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

Recent news reports revealed that not only livestock manure is being discharged onto land and into surface waters at Point Reyes National Seashore – human feces have also been spilling into ponds and onto land from failing septic systems that the ranchers are required to maintain as part of their lease agreements.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Help the conservation groups to end the pollution and protect this biodiversity hotspot.

Sincerely, Jean Saja

Sincerely, Linda Pemberton

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Ann Bicking

Date:	Tuesday, August 30, 2022 12:14:08 PM

I was at Point Reyes for the first time in years, and it was clear that something has to change.

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Linda Pemberton

I am a California resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Recent news reports revealed that not only livestock manure is being discharged onto land and into surface waters at Point Reyes National Seashore – human feces have also been spilling into ponds and onto land from failing septic systems that the ranchers are required to maintain as part of their lease agreements.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Fred Granlund

Sincerely, Michelle Setaro

What is going on at Point Reyes?

Aquatic life in the Pacific Ocean adjacent to Point Reyes National Seashore are harmed by pollution from ranches. These include the federally endangered Central Coast Coho salmon as well as whales which migrate through the area.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

Please hold the park service accountable, and withdraw your concurrence of the NPS's plan to deliver 20-year leases to ranchers.

Sincerely, Helen Jones

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Migratory birds from all over the Western United states stop in the Seashore in search of a safe place to rest and refuel along the Pacific Flyway. Endangered marine mammals along the Pacific Coast call Point Reyes home. We now know that Point Reyes provides poor habitat for these protected wildlife. At Point Reyes, water is polluted by cattle manure and land is barren due to too many cows.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Politics should not be used as the basis for decisions that may influence the future of the Seashore. We need real action now in order to secure a future for Point Reyes.

I greatly appreciate you taking the time to consider my comment. Point Reyes National Seashore holds a special place in my heart.

The trash, heaps of cattle manure, beaches closed to the public because of dangerous levels of bacteria from cows—shouldn't be happening in a national park.

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Elizabeth Metcalf

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Sincerely, Jared Brenner

Thank you for your involvement in helping protect the Seashore! We need your leadership to help finally make this park a park.

Why are dairy and beef cattle allowed to defecate over so much of Point Reyes National Seashore? There is cattle manure in creeks and streams, and covering trails. It's bad for adults, kids, pets, every visitor! Why doesn't the park management stop it? Why do these ranchers abuse the land and water in our national park?

Ranchers say the run their operations "sustainably" while they pollute the water, degrade coastal habitats and endanger rare wildlife in order to produce milk and meat that's produced in abundance elsewhere.

This is our land. Please hold the National Park Service accountable.

Sincerely, EDWARD MRKVICKA

Sincerely, Heide Coppotelli

I hope you care about Point Reyes National Seashore as much as I and so many millions of people do.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

The National Park Service knew there was water contamination starting in 2001. Their solution? Just stop sampling in 2013! We look to the Coastal Commission to expeditiously protect and clean up our coastal waters.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

I went backpacking many years ago in Pt Reyes. It was a great experience, except for the awful water at the campground. I haven't been there for years, since I have retired in the state of Washington. That doesn't mean I don't still love flying over Pt Reyes when I fly south. It brings back wonderful memories, and I still recall the wonderful wildlife I saw there. The place needs to be protected. Wildlife habitat needs to be preserved, even if businesses don't get to profit as much as a result. In a priority contest, nature should win over profits.

We are in the midst of a climate crisis, and most are being too slow to address it. For example, many are not actively working to decrease water use, nor actively working toward the protection of water quality of the water we have.

Because they are an agency of the federal government, the National Park Service at Point Reyes National Seashore has been operating on the mistaken assumption that they are exempt from California laws. Their disregard is intolerable. Please act now and save our land.

Sincerely, Roger Martin

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

I've been to other historic National Parks such as Williamsburg, VA, where I was welcomed into historic homes for demonstrations of how butter was made and horses cared for. It's horrible to visit the "historic" ranches at Point Reyes National Seashore where I was greeted with "keep out" signs, hostile ranchers on ATVs, and miles of barbed wire. Leasing our National Park provides no educational activities and no benefit to the public, it only feeds the pockets of the greedy beef and dairy operators.

Addressing unsafe water in a park ought to be an urgent public health priority, but the park service acts as if they can deal when it's convenient.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Pela Tomasello

Thank you for reading my comment about Point Reyes. Years ago my partner proposed to me at the Seashore, so park holds a very special place in my heart.

The National Park Service has not performed water quality monitoring in the known polluted waterways in Point Reyes for years – this is unacceptable. If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

The National Park Service lacks the resources (money and personnel) necessary to control the profit-driven, opportunistic ranchers who don't spare a thought about environmental health and safety.

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, Diana Kliche

As a longtime resident of California, I am writing to express my sadness and concern at the current state of Point Reyes National Seashore.

I used to love kayaking at Point Reyes but when I heard about how the water quality goes unmonitored, I just couldn't go there anymore.

The Park Service, park management, and multiple regulatory agencies been tap dancing around this for decades and the damage and harm out there is worse and worse! Please do whatever you can to get rid of ranchers and their cattle, and return our national seashore to nature, not cow crap all over the place!

My request is that the Coastal Commission holds the park service accountable to its mission, to prioritize the health of the park over the financial interests of cattle ranches.

Sincerely, Jarrett Cloud

From:	<u>L Reeves</u>

Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 12:08:35 PM

The Commissioners have an important role protecting our coast.

I have hiked a lot in Point Reyes National Seashore, and I have stopped going to many places because there's so much cow crap everywhere, in streams and on trails and draining onto a lot of beaches there. It's disgusting and really unhealthy. Why is this allowed to continue for years and years and years?

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, L Reeves

Date:	Tuesday, August 30, 2022 12:08:28 PM

I was at Point Reyes for the first time in years, and it was clear that something has to change.

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Alan Wojtalik

Sincerely, Laura De la Garza Blanca

I greatly appreciate you taking the time to consider my comment. Point Reyes National Seashore holds a special place in my heart.

A national park should not contain this wide breadth of environmental problems. Nor should over a third of a national park be placed aside for private industry.

Point Reyes National Seashore is at grave risk to be destroyed by the horrible decades-long practices and consequences of cattle ranching among the current and present dangers of climate warming, biodiversity loss, and extended drought. The California Coastal Commission MUST step up and push the National Park Service NOW to rid ranchers and cattle from the American public's National Seashore here, the only national park unit on the West Coast.

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, Britta Gehler

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

I've been to other historic National Parks such as Williamsburg, VA, where I was welcomed into historic homes for demonstrations of how butter was made and horses cared for. Thank you for reading my comment, Coastal Commissioners. I am a lifelong visitor to Point Reyes.

This state is in an extreme drought. Cows at Point Reyes are consuming all the water that should be going to natural habitat and wildlife, like the tule elk.

Ranches are not self-supporting and would not be in the park were they not subsidized by our tax dollars.

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, Mireille Urbain

Protecting our public lands from environmental impacts should be a goal of all local, state and national agencies, especially during a climate crisis, therefore I am writing to urge the Commissioners to protect Point Reyes from constant impacts causing by cattle ranching.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

For the sake of Californians, not cattle businesses, please protect the state's coastline!

Sincerely, Hilarie Ericson

I have lived in northern California a long time, and am really upset about what's going on out at Point Reyes National Seashore.

There is a severe drought in this state. At Point Reyes, cows are using up all the water that should be going to animals and natural habitats, including tule elk.

This saga has gone on long enough, the park continues to do nothing! This is a national park which should mean something.

My request is that the Coastal Commission holds the park service accountable to its mission, to prioritize the health of the park over the financial interests of cattle ranches.

Sincerely, Iris Sinai

Thank you for your work to protect our coast, especially at Point Reyes National Seashore.

The ranchers have had decades to do the right thing for the environment, and insist to manipulate and obfuscate every chance they can. Raw sewage leaking on lands and in fresh and ocean waters; cattle excrement covering half the park; methane fouling the air; cows as eyesores in what is to be a natural wilderness; and actual dead zones of soil and waters—all by disingenuous ranchers and compliant park management and staff.

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, David Burns

Thank you for using your authority to address the terrible conditions at Point Reyes.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Emily Dickinson-Adams

I greatly appreciate you taking the time to consider my comment. Point Reyes National Seashore holds a special place in my heart.

The trash, heaps of cattle manure, beaches closed to the public because of dangerous levels of bacteria from cows—shouldn't be happening in a national park.

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Tami Palacky

As a long-time California resident, I am writing to express sadness and outrage over the conditions at Point Reyes National Seashore.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Evelyn Boeckman

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, M Lopez

Sincerely, Mary Thornton

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

Please help address and end the constant impact of ranching on our public lands on the Pacific Coast. It is time for our environment to come first, especially on public land.

Sincerely, Carol Savary

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Mari Mennel-Bell

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

This state is in an extreme drought. Cows at Point Reyes are consuming all the water that should be going to natural habitat and wildlife, like the tule elk.

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Darian Mark

As a longtime resident of California, I am writing to express my sadness and concern at the current state of Point Reyes National Seashore.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Dana Palka

Point Reyes is one of the most beautiful places in California, and it concerns me that to read about the level of pollution that occurs in places which were intended to be for the public

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

It's time for the California Coastal Commission to step in and stop this absurdity! For the sake of people, wildlife, and habitat, stop this long-time tragedy! Point Reyes could be a model for sound and sane climate policy practices, biodiversity restoration, and leading edge drought science.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, Sue Wood

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. "No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Mary Walls

What is going on at Point Reyes?

Aquatic life in the Pacific Ocean adjacent to Point Reyes National Seashore are harmed by pollution from ranches. These include the federally endangered Central Coast Coho salmon as well as whales which migrate through the area.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

Please hold the park service accountable, and withdraw your concurrence of the NPS's plan to deliver 20-year leases to ranchers.

Sincerely, Marsha Smith

Thank you for using your authority to address the terrible conditions at Point Reyes.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Cecilia Rivas

Thank you for taking the time to read my comment! I am very concerned with what I have heard about Point Reyes, and I hope you all can take leadership and help solve these issues.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

Addressing unsafe water in a park ought to be an urgent public health priority, but the park service acts as if they can deal when it's convenient.

If you visit Point Reyes National Seashore, you will witness vast degradation by ranchers of lands and waters bequeathed in trust to the American people in perpetuity as a natural wonder. Please do ALL in your power to get the National Park Service (and Seashore management) to enforce existing environmental law, and plan for the removal of all ranching from the park within the next five years, period!

Sincerely, Michelle Waters

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. "No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Erica Munn

Thank you, Coastal Commissioners, for reading my concerns that Point Reyes National Seashore is under threat by its current management practices.

The thousands of acres in Point Reyes National leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

Addressing unsafe water in a park ought to be an urgent public health priority, but the park service acts as if they can deal when it's convenient.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, Robert Wohlberg

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

Why are dairy and beef cattle allowed to defecate over so much of Point Reyes National Seashore? There is cattle manure in creeks and streams, and covering trails. It's bad for adults, kids, pets, every visitor! Why doesn't the park management stop it? Why do these ranchers abuse the land and water in our national park?

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

Politics should not be used as the basis for decisions that may influence the future of the Seashore. We need real action now in order to secure a future for Point Reyes.

Sincerely, Kimberly Allen

What is going on at Point Reyes?

Aquatic life in the Pacific Ocean adjacent to Point Reyes National Seashore are harmed by pollution from ranches. These include the federally endangered Central Coast Coho salmon as well as whales which migrate through the area.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

Please hold the park service accountable, and withdraw your concurrence of the NPS's plan to deliver 20-year leases to ranchers.

Sincerely, Oliver Guichard

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Paola Catapano

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Michelle Blackley

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

As a Marin resident who comes to the park to picnic and kayak, I have become very concerned about water pollution from cattle manure and human sewage spills. It is appalling to learn that some ranch houses have never had septic systems, the NPS knew and did nothing much about it.

The Coastal Commission was created to protect our coast and needs to use the power it has to affect change at the National Park Service.

Please help address and end the constant impact of ranching on our public lands on the Pacific Coast. It is time for our environment to come first, especially on public land.

Sincerely, Gary Herwig

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Annie Phillips

Point Reyes is the only national seashore on the Pacific Coast and is designated an International Biological Preserve for its abundant biodiversity and proximity to other protected lands and waters.

The National Park Service has not performed water quality monitoring in the known polluted waterways in Point Reyes for years – this is unacceptable. If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, J. Barry Gurdin

What is going on at Point Reyes?

Aquatic life in the Pacific Ocean adjacent to Point Reyes National Seashore are harmed by pollution from ranches. These include the federally endangered Central Coast Coho salmon as well as whales which migrate through the area.

To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 12:03:28 PM

As a longtime resident of California, I am writing to express my sadness and concern at the current state of Point Reyes National Seashore.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

Point Reyes National Seashore is at grave risk to be destroyed by the horrible decades-long practices and consequences of cattle ranching among the current and present dangers of climate warming, biodiversity loss, and extended drought. The California Coastal Commission MUST step up and push the National Park Service NOW to rid ranchers and cattle from the American public's National Seashore here, the only national park unit on the West Coast.

For the sake of Californians, not cattle businesses, please protect the state's coastline!

Sincerely, Sharon McCormick

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

During this drought, the National Park Service has let hundreds of our famous and rare Tule elk perish from dehydration. Elk and cows cannot coexist on the Seashore.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, Dacia Murphy

I have been a Bay Area resident for many years. I appreciate your taking time to read my deep concerns about the issues at Point Reyes National Seashore.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

We are in the midst of a climate crisis, and most are being too slow to address it. For example, many are not actively working to decrease water use, nor actively working toward the protection of water quality of the water we have.

Because they are an agency of the federal government, the National Park Service at Point Reyes National Seashore has been operating on the mistaken assumption that they are exempt from California laws. Their disregard is intolerable. Please act now and save our land.

Sincerely, Tracey Bonner

What is going on at Point Reyes?

Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Tuesday, August 30, 2022 12:03:10 PM

The Commissioners have an important role protecting our coast.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

We are in the midst of a climate crisis, and most are being too slow to address it. For example, many are not actively working to decrease water use, nor actively working toward the protection of water quality of the water we have.

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Sandra Zaninovich

I am a Bay Area visitor and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

If ranches weren't funded by our taxes, they couldn't exist and wouldn't be allowed in the park. Why are we paying for them to pollute our waters?

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Denise Martini

Thank you for using your authority to address the terrible conditions at Point Reyes.

As a regular visitor to the park, I frequently see cattle trampling through creeks and streams, and even standing and pooping in Drakes Estero. In places where cattle are seen, I step over cow feces on trails and shorelines. It's no wonder the water quality is terrible.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Politics should not be used as the basis for decisions that may influence the future of the Seashore. We need real action now in order to secure a future for Point Reyes.

Sincerely, Carol Fletcher

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

During this drought, the National Park Service has let hundreds of our famous and rare Tule elk perish from dehydration. Elk and cows cannot coexist on the Seashore.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Michelle MacKenzie

It's vital that the State of California has oversight authority over the coastal areas and ecosystems within the Seashore.

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

Ranchers say the run their operations "sustainably" while they pollute the water, degrade coastal habitats and endanger rare wildlife in order to produce milk and meat that's produced in abundance elsewhere.

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, roger hollander

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

The thousands of acres in Point Reyes National leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, clara zahadek

Sincerely, Cassandra Fazio Dear California Coastal Commission and Comission Staff,

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

Why is so much of the Point Reyes National Seashore permitted to be covered in cow manure from dairy and beef cattle? Cattle excrement can be found on footpaths, in creeks, and in streams. Every visitor—adults, children, pets—should avoid it! Why doesn't the park administration put a stop to it? Why do these ranchers misuse our national park's land and water?

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Staci Tefertiller

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Staci Tefertiller Dear California Coastal Commission and Comission Staff,

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

As a regular visitor to the park, I frequently see cattle trampling through creeks and streams, and even standing and pooping in Drakes Estero. In places where cattle are seen, I step over cow feces on trails and shorelines. It's no wonder the water quality is terrible.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Kaarina Moilanen Dear California Coastal Commission and Comission Staff,

It is crucial that the State of California have control over the ecosystems and wildlife within the Seashore. I thank you for taking the time to read my thoughts on Point Reyes.

I've seen cattle where they don't belong—wading in creeks and estuaries that are choked with algae from cattle manure.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, Rebecca Ruiz

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

The bike paths at Point Reyes are the worst in Marin – dusty, barren and full of cow poop that gets into your tires, shoes, clothes and skin.

The National Park Service lacks the resources (money and personnel) necessary to control the profit-driven, opportunistic ranchers who don't spare a thought about environmental health and safety.

Any plan that is ultimately produced to address the water and climate impacts of ranching, as the Commission has required, must include measurable benchmarks and deadlines for achieving them, enforcement mechanisms, and consequences—including closing down private ranching in the park— for failure to perform.

Sincerely, Rocky Reuter Dear California Coastal Commission and Comission Staff,

Thank you for taking the time to read my comments about the many problems with the out at Point Reyes National Seashore. I have visited there for decades, and am appalled at the bad conditions and management there.

Manure discharged from cows and other livestock at Point Reyes National Seashore not only contaminates our beaches with potentially disease causing fecal bacteria they add nitrogen and phosphorus which cause surface waters to be so choked with emergent vegetation you can hardly see the water.

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Roger Hollander

Thank you for taking the time to read my comments about the many problems with the out at Point Reyes National Seashore. I have visited there for decades, and am appalled at the bad conditions and management there.

We need our Commissioners to protect and defend our coastal resources for all the people of California for generations to come.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, Camilo Echavarria

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

The ranchers have had decades to do the right thing for the environment, and insist to manipulate and obfuscate every chance they can. Raw sewage leaking on lands and in fresh and ocean waters; cattle excrement covering half the park; methane fouling the air; cows as eyesores in what is to be a natural wilderness; and actual dead zones of soil and waters—all by disingenuous ranchers and compliant park management and staff.

Cattle ranching at Point Reyes is clearly not sustainable. Ranchers buy supplemental water and grass for cows, while wildlife are expected to die, according to the park service. The climate crisis will only worsen conditions.

Please reconsider your approval of ranching in the national park.

Sincerely, Chad Lent

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

Point Reyes National Seashore has some of the most polluted waterways in California, and the cause of the pollution is due to cattle ranching on leased parcels. Therefore it is unclear why ranching tenants can continue their ranching operations while scientific documentation notes the impact to water and air quality on these public lands.

The National Park Service has allowed hundreds of our rare and iconic Tule elk to die of thirst during this drought. The Seashore cannot support both cows and elk. And tourists don't come to look at cows.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Anne Cantal Dear California Coastal Commission and Comission Staff,

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Friday, September 2, 2022 7:01:08 AM

Please take this opportunity to clean up the only national park on the west coast!

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

Point Reyes National Seashore is at grave risk to be destroyed by the horrible decades-long practices and consequences of cattle ranching among the current and present dangers of climate warming, biodiversity loss, and extended drought. The California Coastal Commission MUST step up and push the National Park Service NOW to rid ranchers and cattle from the American public's National Seashore here, the only national park unit on the West Coast.

For the sake of Californians, not cattle businesses, please protect the state's coastline!

Sincerely, Allisyn Snyder

What is going on at Point Reyes?

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

We are in the midst of a climate crisis, and most are being too slow to address it. For example, many are not actively working to decrease water use, nor actively working toward the protection of water quality of the water we have.

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, Margo Salone

Point Reyes is the only national seashore on the Pacific Coast and is designated an International Biological Preserve for its abundant biodiversity and proximity to other protected lands and waters.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

If we only have ten years to do something about climate change, why are we doing nothing about the critical conditions at Point Reyes?

The Channel Islands recently got rid of cattle. We ask the Coastal Service to work with the National Park Service and do the same.

Sincerely, Doris Steinkopf

What is going on at Point Reyes?

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

We are in a climate and extinction crisis. We the public, and all agencies should be focused on taking the right steps to address these human-caused issues. Per scientific publications, we are almost out of time, so the time is now.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Kate Kenner

I am a Bay Area resident. I have visited Point Reyes with friends and family my entire life.

I used to love kayaking at Point Reyes but when I heard about how the water quality goes unmonitored, I just couldn't go there anymore.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

Please use your influence so the Park Service will follow its own mission.

Sincerely, Colleen Dammert

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

Why do ranchers have so much power over our national park? Their cattle create vast dead zones out on the Point. The ranchers and their cattle shouldn't even be there anymore! They constantly manipulate park management and regulatory agencies for private profit and hurt wildlife and visitors with their shady dealings with park management.

Cattle ranching at Point Reyes is clearly not sustainable. Ranchers buy supplemental water and grass for cows, while wildlife are expected to die, according to the park service. The climate crisis will only worsen conditions.

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, Sonja Nielsen

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

If Point Reyes is special enough to be a national park and UN-designated Biodiversity Hot Spot, why is it permitted to have the most polluted waters on the California Coast?

Cattle ranching at Point Reyes is clearly not sustainable. Ranchers buy supplemental water and grass for cows, while wildlife are expected to die, according to the park service. The climate crisis will only worsen conditions.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, leslie lund

Thank you for reading my comment, Coastal Commissioners. I am an ardent visitor to Point Reyes.

I used to enjoy going to the Seashore with friends to hike, kayak, watch birds and take pictures.

What happens to the wildlife when the water runs out?

Please reconsider your approval of ranching in the national park.

Sincerely, The Rev Dr Edward Kern

Thank you for taking the time to read my comment. I live in the Bay Area and visit Point Reyes National Seashore several times a month.

As a Marin resident who comes to the park to picnic and kayak, I have become very concerned about water pollution from cattle manure and human sewage spills. It is appalling to learn that some ranch houses have never had septic systems, the NPS knew and did nothing much about it.

This saga has gone on long enough, the park continues to do nothing! This is a national park which should mean something.

Please reconsider your approval of ranching in the national park.

Sincerely, Caroline Sévilla

Thank you for reading my comment about Point Reyes. Years ago my partner proposed to me at the Seashore, so park holds a very special place in my heart.

I used to enjoy going to the Seashore with friends to hike, kayak, watch birds and take pictures.

We should be protecting and restoring wildlife habitat at Point Reyes National Seashore. Scientists say we are in the sixth mass extinction event. critical wildlife habitat.

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, Monica Licwinko

As one who is proud and awestruck by the unique California coastline and biodiversity, especially in Point Reyes, I would like to thank you for your efforts to protect the only National seashore on the West coast.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

The National Park Service knew there was water contamination starting in 2001. Their solution? Just stop sampling in 2013! We look to the Coastal Commission to expeditiously protect and clean up our coastal waters.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Raleigh Koritz

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Michèle Lebourg

I want to trust the California Coastal Commission is doing all in its power to help fix the problems out on Point Reyes National Seashore.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

The National Park Service does not have the budget or staff needed to supervise the cornercutting, for-profit, ranchers who don't care about environmental health and safety.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, Robert Piller

We appreciate you taking action to improve the appalling situation in Point Reyes.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

Cattle ranching at Point Reyes is clearly not sustainable. Ranchers buy supplemental water and grass for cows, while wildlife are expected to die, according to the park service. The climate crisis will only worsen conditions.

Politics should not be used as the basis for decisions that may influence the future of the Seashore. We need real action now in order to secure a future for Point Reyes.

Sincerely, Lesley Bosworth

Thank you for your involvement in helping protect the Seashore! We need your leadership to help finally make this park a park.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

Please protect human health for beachgoers at Point Reyes. Hold the ranches accountable. Eliminate the water pollution.

Sincerely, josh pelleg

We need the California Coastal Commission to protect the only National Seashore on the west coast.

I recently read that beaches at Point Reyes received failing grades for water quality, and that these issues have been going on for decades. A National Park in California should not have unsafe water quality.

Scientists say we are in the sixth mass extinction event. California is attempting to protect 30% of our land and waters by 2030 to help protect our state's wildlife. We can't afford to continue to degrade critical wildlife habitat.

The Channel Islands recently got rid of cattle. We ask the Coastal Service to work with the National Park Service and do the same.

Sincerely, Neli Teofilova

The Commissioners have an important role protecting our coast.

A national park should not contain this wide breadth of environmental problems. Nor should over a third of a national park be placed aside for private industry.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

Please reconsider your approval of ranching in the national park.

Sincerely, Rucha Harde

As a longtime resident of California, I am writing to express my sadness and concern at the current state of Point Reyes National Seashore.

I've been to other historic National Parks such as Williamsburg, VA, where I was welcomed into historic homes for demonstrations of how butter was made and horses cared for. It's horrible to visit the "historic" ranches at Point Reyes National Seashore where I was greeted with "keep out" signs, hostile ranchers on ATVs, and miles of barbed wire. Leasing our National Park provides no educational activities and no benefit to the public, it only feeds the pockets of the greedy beef and dairy operators.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

Help the conservation groups to end the pollution and protect this biodiversity hotspot.

Sincerely, Georgia Griego

It's vital that the State of California has oversight authority over the coastal areas and ecosystems within the Seashore.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

What happens to the wildlife when the water runs out?

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, D D

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

I've been to other historic National Parks such as Williamsburg, VA, where I was welcomed into historic homes for demonstrations of how butter was made and horses cared for. It's horrible to visit the "historic" ranches at Point Reyes National Seashore where I was greeted with "keep out" signs, hostile ranchers on ATVs, and miles of barbed wire. Leasing our National Park provides no educational activities and no benefit to the public, it only feeds the pockets of the greedy beef and dairy operators.

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Jessica Larsen

Date:	Thursday, September 1, 2022 8:54:07 PM

Commissions, your help is urgently needed to clean up Point Reyes National Seashore.

Manure discharged from cows and other livestock at Point Reyes National Seashore not only contaminates our beaches with potentially disease causing fecal bacteria they add nitrogen and phosphorus which cause surface waters to be so choked with emergent vegetation you can hardly see the water.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Because they are an agency of the federal government, the National Park Service at Point Reyes National Seashore has been operating on the mistaken assumption that they are exempt from California laws. Their disregard is intolerable. Please act now and save our land.

Sincerely, Theresa Fuller

Please take this opportunity to clean up the only national park on the west coast!

It is a tragedy to see the park deteriorate, especially over the last decade. Cattle operations, made worse by drought, have turned the landscape into a sea of bare dirt and manure.

The National Park Service lacks the resources (money and personnel) necessary to control the profit-driven, opportunistic ranchers who don't spare a thought about environmental health and safety.

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, Jelica Roland

It is crucial that the State of California have control over the ecosystems and wildlife within the Seashore. I thank you for taking the time to read my thoughts on Point Reyes.

This state is in an extreme drought. Cows at Point Reyes are consuming all the water that should be going to natural habitat and wildlife, like the tule elk.

Cattle ranching at Point Reyes is clearly not sustainable. Ranchers buy supplemental water and grass for cows, while wildlife are expected to die, according to the park service. The climate crisis will only worsen conditions.

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, Michelle Hur

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

The Coastal Commission is our best hope for cleaning up the water at Point Reyes. Please ensure that the park service develops and implements a strict water quality plan as soon as possible.

Sincerely, Sandi Cornez

Thank you, Coastal Commissioners, for reading my concerns that Point Reyes National Seashore is under threat by its current management practices.

A national park should not contain this wide breadth of environmental problems. Nor should over a third of a national park be placed aside for private industry.

The Coastal Commission was created to protect our coast and needs to use the power it has to affect change at the National Park Service.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, James Jachimiak

The Coastal Commission was created to protect our coast and needs to use the power it has to affect change at the National Park Service.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Do your most important job. Protect our coast.

Sincerely, Robert McArtor

Thank you for your involvement in helping protect the Seashore! We need your leadership to help finally make this park a park.

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

Politics should not be used as the basis for decisions that may influence the future of the Seashore. We need real action now in order to secure a future for Point Reyes.

Sincerely, Ann Bailleul

I want to thank the Coastal Commissioners for providing an opportunity for the public to share their position on the ongoing issues associated with private cattle ranching in Point Reyes National Seashore.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Carolyn Massey

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

I've seen cattle where they don't belong—wading in creeks and estuaries that are choked with algae from cattle manure.

Marin County is experiencing "extreme drought" conditions, yet thousands of cattle are polluting what little water is available to sustain over 100 endangered plant and animal species.

The National Park Service has not kept its agreements and can't be relied upon to do so.

Sincerely, Andrelene Babbitt

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

Commissions, your help is urgently needed to clean up Point Reyes National Seashore.

Too many cattle have turned vast areas of the park into a virtual dead zone.

We are in the midst of a climate crisis, and most are being too slow to address it. For example, many are not actively working to decrease water use, nor actively working toward the protection of water quality of the water we have.

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, Richard Magyar

Sincerely, Richard Magyar

I am a Bay Area resident and cherish the proximity of Point Reyes National Seashore to a highly urbanized area, which affords enjoyment of nature for millions of visitors per year.

It is a tragedy to see the park deteriorate, especially over the last decade. Cattle operations, made worse by drought, have turned the landscape into a sea of bare dirt and manure.

What happens to the wildlife when the water runs out?

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, Diana Bohn

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

We are in a climate and extinction crisis. We the public, and all agencies should be focused on taking the right steps to address these human-caused issues. Per scientific publications, we are almost out of time, so the time is now.

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. Would you let your own children wade, walk, hike, traipse, splash, swim, or do any other activity on, in, or near the cattle-dung waters, beaches, creeks, estuaries, tide pools, and fields there? Wouldn't you worry about their health and safety? Please make this park a park and help us protect the coast.

Sincerely, mary more

Point Reyes is the only National Seashore on the west coast and needs the California Coastal Commission to protect it from degradation by industrial ag interests.

The trash, heaps of cattle manure, beaches closed to the public because of dangerous levels of bacteria from cows—shouldn't be happening in a national park.

We are in a climate and extinction crisis. We the public, and all agencies should be focused on taking the right steps to address these human-caused issues. Per scientific publications, we are almost out of time, so the time is now.

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, K Danowski

Sincerely, K Danowski

Thank you for reading my comment about Point Reyes. Years ago my partner proposed to me at the Seashore, so park holds a very special place in my heart.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Susan Allen

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

Migratory birds from all over the Western United states stop in the Seashore in search of a safe place to rest and refuel along the Pacific Flyway. Endangered marine mammals along the Pacific Coast call Point Reyes home. We now know that Point Reyes provides poor habitat for these protected wildlife. At Point Reyes, water is polluted by cattle manure and land is barren due to too many cows.

As the pandemic has shown us, we need to increase public recreation and access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up keeping people out of our parklands.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, Grant Fujii

Point Reyes National Seashore is one of the world's biodiversity hotspots.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

The National Park Service has allowed hundreds of our rare and iconic Tule elk to die of thirst during this drought. The Seashore cannot support both cows and elk. And tourists don't come to look at cows.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, Maryanne Gordon

We appreciate you taking action to improve the appalling situation in Point Reyes.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

The National Park Service has allowed hundreds of our rare and iconic Tule elk to die of thirst during this drought. The Seashore cannot support both cows and elk. And tourists don't come to look at cows.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Jill McAnally

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

Beef and dairy operators at Point Reyes National Seashore have dammed surface streams to create watering ponds for livestock, thereby depriving downstream fish and native wildlife of the habitat needed to sustain them, especially during drought years.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Nikki Nafziger

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

Beef and dairy operators at Point Reyes National Seashore have dammed surface streams to create watering ponds for livestock, thereby depriving downstream fish and native wildlife of the habitat needed to sustain them, especially during drought years.

Please take this opportunity to clean up the only national park on the west coast!

The thousands of acres in Point Reyes National leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

We are in a climate and extinction crisis. We the public, and all agencies should be focused on taking the right steps to address these human-caused issues. Per scientific publications, we are almost out of time, so the time is now.

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, R. Miles Mendenhall

Thank you for taking the time to read my comments about the many problems with the out at Point Reyes National Seashore. I have visited there for decades, and am appalled at the bad conditions and management there.

Migratory birds from all over the Western United states stop in the Seashore in search of a safe place to rest and refuel along the Pacific Flyway. Endangered marine mammals along the Pacific Coast call Point Reyes home. We now know that Point Reyes provides poor habitat for these protected wildlife. At Point Reyes, water is polluted by cattle manure and land is barren due to too many cows.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, Ed and Bee Simpson

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

We are in a climate and extinction crisis. We the public, and all agencies should be focused on taking the right steps to address these human-caused issues. Per scientific publications, we are almost out of time, so the time is now.

Please protect human health for beachgoers at Point Reyes. Hold the ranches accountable. Eliminate the water pollution.

Sincerely, kathryn Reichard

What is going on at Point Reyes?

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, Jeff Nadler

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

There is a severe drought in this state. At Point Reyes, cows are using up all the water that should be going to animals and natural habitats, including tule elk.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, Michelle Krueger

I want to believe that the California Coastal Commission is doing all possible to assist in the resolution of the issues at the Point Reyes National Seashore.

Aquatic life in the Pacific Ocean adjacent to Point Reyes National Seashore are harmed by pollution from ranches. These include the federally endangered Central Coast Coho salmon as well as whales which migrate through the area.

Cattle ranching at Point Reyes is clearly not sustainable. Ranchers buy supplemental water and grass for cows, while wildlife are expected to die, according to the park service. The climate crisis will only worsen conditions.

Decisions affecting the future of the Seashore should be based in science, not politics.

Sincerely, scott messenger

Sincerely, Margaret Hannan

We are fortunate to have Point Reyes National Seashore located in a metropolitan area, and only 60 minutes from San Francisco..

The cattle ranches cover over a third of Point Reyes National Seashore! They were supposed to be gone decades ago! Why are they still allowed to stay there? There are barbed wire and electric fences everywhere that block public access to tens of thousands of acres, and signs saying don't trespass, keep out.

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

This is our land. Please hold the National Park Service accountable.

Sincerely, Sue Jones

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

If Point Reyes is special enough to be a national park and UN-designated Biodiversity Hot Spot, why is it permitted to have the most polluted waters on the California Coast?

The National Park Service knew there was water contamination starting in 2001. Their solution? Just stop sampling in 2013! We look to the Coastal Commission to expeditiously protect and clean up our coastal waters.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Jose de Arteaga

What is going on at Point Reyes?

I used to enjoy going to the Seashore with friends to hike, kayak, watch birds and take pictures.

We are running out of time to limit climate change and the loss of species resulting from sea level rise and hotter, drier conditions.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Rachel Onstott

It is crucial that the State of California have control over the ecosystems and wildlife within the Seashore. I thank you for taking the time to read my thoughts on Point Reyes.

Citizens look to national parks – "our best idea" – for leadership in the climate crisis, but Point Reyes is an example of the worst practices in conserving water and protecting biodiversity.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Marilyn Hanson

Commissions, your help is urgently needed to clean up Point Reyes National Seashore.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Anthony Wong

Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Thursday, September 1, 2022 2:54:09 PM

I want to trust the California Coastal Commission is doing all in its power to help fix the problems out on Point Reyes National Seashore.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

Point Reyes National Seashore is at grave risk to be destroyed by the horrible decades-long practices and consequences of cattle ranching among the current and present dangers of climate warming, biodiversity loss, and extended drought. The California Coastal Commission MUST step up and push the National Park Service NOW to rid ranchers and cattle from the American public's National Seashore here, the only national park unit on the West Coast.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Patricia Patteson

Thank you for taking the time to read my comment. I live in the Bay Area and visit Point Reyes National Seashore several times a month.

I used to love kayaking at Point Reyes but when I heard about how the water quality goes unmonitored, I just couldn't go there anymore.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

My request is that the Coastal Commission holds the park service accountable to its mission, to prioritize the health of the park over the financial interests of cattle ranches.

Sincerely, John Crowley

I was at Point Reyes for the first time in years, and it was clear that something has to change.

The National Park Service has not performed water quality monitoring in the known polluted waterways in Point Reyes for years – this is unacceptable. If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, Angela Leventis

We need our Commissioners to protect and defend our coastal resources for all the people of California for generations to come.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Annie Bien

We need our Commissioners to protect and defend our coastal resources for all the people of California for generations to come.

It is crucial that the State of California have control over the ecosystems and wildlife within the Seashore.

Thank you in advance for taking the time to read my thoughts on Point Reyes.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. This is public land NOT for private businesses!

Please protect not only the water but the wildlife and plants as this should not be used for ranching and cattle grazing. Our public lands should be protected for all to enjoy and for the wildlife that calls the area home.

Sincerely, Donna Beal

From:	Parrie Henderson
To:	Energy@Coastal
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Thursday, September 1, 2022 2:26:08 PM

We are fortunate to have Point Reyes National Seashore located in a metropolitan area, and only 60 minutes from San Francisco..

Point Reyes National Seashore has some of the most polluted waterways in California, and the cause of the pollution is due to cattle ranching on leased parcels. Therefore it is unclear why ranching tenants can continue their ranching operations while scientific documentation notes the impact to water and air quality on these public lands.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, Parrie Henderson

I greatly appreciate you taking the time to consider my comment. Point Reyes National Seashore holds a special place in my heart.

As a Marin resident who comes to the park to picnic and kayak, I have become very concerned about water pollution from cattle manure and human sewage spills. It is appalling to learn that some ranch houses have never had septic systems, the NPS knew and did nothing much about it.

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

Please protect human health for beachgoers at Point Reyes. Hold the ranches accountable. Eliminate the water pollution.

Sincerely, Susan Aime

Commissions, your help is urgently needed to clean up Point Reyes National Seashore.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

I feel privileged to have the Point Reyes National Seashore virtually in my backyard.

The cattle ranches cover over a third of Point Reyes National Seashore! They were supposed to be gone decades ago! Why are they still allowed to stay there? There are barbed wire and electric fences everywhere that block public access to tens of thousands of acres, and signs saying don't trespass, keep out.

The park service has had years to address these issues, but instead of acting, it seems to be delaying - allowing ranchers to continue to ruin our beautiful seashore.

This is our land. Please hold the National Park Service accountable.

Sincerely, Agnetha Broecker

We are fortunate to have Point Reyes National Seashore located in a metropolitan area, and only 60 minutes from San Francisco..

The trash, heaps of cattle manure, beaches closed to the public because of dangerous levels of bacteria from cows—shouldn't be happening in a national park.

This saga has gone on long enough, the park continues to do nothing! This is a national park which should mean something.

Because they are an agency of the federal government, the National Park Service at Point Reyes National Seashore has been operating on the mistaken assumption that they are exempt from California laws. Their disregard is intolerable. Please act now and save our land.

Sincerely, John Burridge chem engineer

To:	Energy@Coastal
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Thursday, September 1, 2022 1:49:11 PM

Thank you for your work to protect our coast, especially at Point Reyes National Seashore.

The ranchers have had decades to do the right thing for the environment, and insist to manipulate and obfuscate every chance they can. Raw sewage leaking on lands and in fresh and ocean waters; cattle excrement covering half the park; methane fouling the air; cows as eyesores in what is to be a natural wilderness; and actual dead zones of soil and waters—all by disingenuous ranchers and compliant park management and staff.

The National Park Service lacks the resources (money and personnel) necessary to control the profit-driven, opportunistic ranchers who don't spare a thought about environmental health and safety.

Please rescind your approval of ranching and help the conservation groups end the pollution and protect this biodiversity hotspot.

Sincerely, Jaromir Guzinski

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

Migratory birds from all over the Western United states stop in the Seashore in search of a safe place to rest and refuel along the Pacific Flyway. Endangered marine mammals along the Pacific Coast call Point Reyes home. We now know that Point Reyes provides poor habitat for these protected wildlife. At Point Reyes, water is polluted by cattle manure and land is barren due to too many cows.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, margo wyse

Thank you, Coastal Commissioners, for reading my concerns that Point Reyes National Seashore is under threat by its current management practices.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

The Channel Islands recently got rid of cattle. We ask the Coastal Service to work with the National Park Service and do the same.

Sincerely, David Boyer

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

The National Park Service knew there was water contamination starting in 2001. Their solution? Just stop sampling in 2013! We look to the Coastal Commission to expeditiously protect and clean up our coastal waters.

The National Park Service at Point Reyes National Seashore has been operating under the delusion that because they are under the Federal government, they don't need to care about California regulations. Their indifference is unconscionable. Please conserve California's coastline for Californians, not cattle corporations!

Sincerely, Laraine Bowen

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

It's time for the California Coastal Commission to step in and stop this absurdity! For the sake of people, wildlife, and habitat, stop this long-time tragedy! Point Reyes could be a model for sound and sane climate policy practices, biodiversity restoration, and leading edge drought science.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, Jerry Banks

Thank you for taking the time to read my comment. I live in the Bay Area and visit Point Reyes National Seashore several times a month.

The cattle ranches cover over a third of Point Reyes National Seashore! They were supposed to be gone decades ago! Why are they still allowed to stay there? There are barbed wire and electric fences everywhere that block public access to tens of thousands of acres, and signs saying don't trespass, keep out.

Water is a precious and limited commodity. We need to do everything we can to protect our water supply from being overused and polluted, especially on public lands on the Pacific coast. It is time to take the right step, and protect Point Reyes National Seashore.

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, Alfred Mancini

We need the California Coastal Commission to protect the only National Seashore on the west coast.

Why is so much of the Point Reyes National Seashore permitted to be covered in cow manure from dairy and beef cattle? Cattle excrement can be found on footpaths, in creeks, and in streams. Every visitor—adults, children, pets—should avoid it! Why doesn't the park administration put a stop to it? Why do these ranchers misuse our national park's land and water?

At this critical point in the planning process, I am grateful that the CCC has taken a firm stand--refusing to allow more NPS deferrals postponements, and rejecting an inadequate water quality plan that lacks priorities, standards or enforcement.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Stefanie Flax

Thank you for your work to protect our coast, especially at Point Reyes National Seashore.

Citizens look to national parks – "our best idea" – for leadership in the climate crisis, but Point Reyes is an example of the worst practices in conserving water and protecting biodiversity.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, Andy Carman

As a long-time California resident, I am writing to express sadness and outrage over the conditions at Point Reyes National Seashore.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

Please use your influence so the Park Service will follow its own mission.

Sincerely, Kathy Nix

As a long-time California resident, I am writing to express sadness and outrage over the conditions at Point Reyes National Seashore.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

Please use your influence so the Park Service will follow its own mission.

Sincerely, Kathy Nix

I want to thank the Coastal Commissioners for providing an opportunity for the public to share their position on the ongoing issues associated with private cattle ranching in Point Reyes National Seashore.

Aquatic life in the Pacific Ocean adjacent to Point Reyes National Seashore are harmed by pollution from ranches. These include the federally endangered Central Coast Coho salmon as well as whales which migrate through the area.

We are in a climate and extinction crisis. We the public, and all agencies should be focused on taking the right steps to address these human-caused issues. Per scientific publications, we are almost out of time, so the time is now.

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. Would you let your own children wade, walk, hike, traipse, splash, swim, or do any other activity on, in, or near the cattle-dung waters, beaches, creeks, estuaries, tide pools, and fields there? Wouldn't you worry about their health and safety? Please make this park a park and help us protect the coast.

Sincerely, sara sang

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

I have hiked a lot in Point Reyes National Seashore, and I have stopped going to many places because there's so much cow crap everywhere, in streams and on trails and draining onto a lot of beaches there. It's disgusting and really unhealthy. Why is this allowed to continue for years and years and years?

The creeks and the springs are drying up, but the Park Service's response is to drill more wells to supply water to the thousands of cattle.

Please take urgent action befitting the critical environmental crisis at Point Reyes.

Sincerely, Marcia Henderson

Thank you for your work to protect our coast, especially at Point Reyes National Seashore.

It is a tragedy to see the park deteriorate, especially over the last decade. Cattle operations, made worse by drought, have turned the landscape into a sea of bare dirt and manure.

Addressing unsafe water in a park ought to be an urgent public health priority, but the park service acts as if they can deal when it's convenient.

This is our land. Please hold the National Park Service accountable.

Sincerely, Claire Perricelli

I have lived in northern California a long time, and am really upset about what's going on out at Point Reyes National Seashore.

Our family has enjoyed visiting the Pt Reyes for decades, but the news about unsafe levels of E.coli in the park's streams and beaches is deeply concerning. As a mother, I worry that my children will be exposed to water that is polluted by cattle manure or even human sewage from leaking septic systems. Until these WQ is adequately addressed, we will find alternative places to safely picnic and play.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

For the sake of Californians, not cattle businesses, please protect the state's coastline!

Sincerely, ilene gudelsky

Thank you for considering my comments about the damage to Point Reyes National Seashore from cattle operations. I know that I am not alone in saying the impacts are so apparent and disheartening that I no longer visit the park.

The bike paths at Point Reyes are the worst in Marin – dusty, barren and full of cow poop that gets into your tires, shoes, clothes and skin.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

The National Park Service has not kept its agreements and can't be relied upon to do so.

Sincerely, Diana Duffy

I was at Point Reyes for the first time in years, and it was clear that something has to change.

Between all the septic issues I have heard of, the dying of Elk, and the foul water quality, I am confused as to why no action has been taken.

What happens to the wildlife when the water runs out?

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, Diana Bryant

Thank you for considering my comment. Point Reyes National Seashore is the "Island in Time" created during the Kennedy Administration that gives so many visitors a beautiful and peaceful way to connect with the natural world.

Our family has enjoyed visiting the Pt Reyes for decades, but the news about unsafe levels of E.coli in the park's streams and beaches is deeply concerning. As a mother, I worry that my children will be exposed to water that is polluted by cattle manure or even human sewage from leaking septic systems. Until these WQ is adequately addressed, we will find alternative places to safely picnic and play.

Ranchers say the run their operations "sustainably" while they pollute the water, degrade coastal habitats and endanger rare wildlife in order to produce milk and meat that's produced in abundance elsewhere.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Jon Anderholm

Thank you for your involvement in helping protect the Seashore! We need your leadership to help finally make this park a park.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore.

Help the conservation groups to end the pollution and protect this biodiversity hotspot.

Sincerely, Julie Robertson

Point Reyes is the only national seashore on the Pacific Coast and is designated an International Biological Preserve for its abundant biodiversity and proximity to other protected lands and waters.

I recently read that beaches at Point Reyes received failing grades for water quality, and that these issues have been going on for decades. A National Park in California should not have unsafe water quality.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

Please reconsider your approval of ranching in the national park.

Sincerely, Maggie Kauffman

What is going on at Point Reyes?

The cattle ranches cover over a third of Point Reyes National Seashore! They were supposed to be gone decades ago! Why are they still allowed to stay there? Sincerely, Peggy Cavanaugh

I come to Point Reyes National Seashore to take in beautiful vistas of the Pacific Ocean and Drakes Bay.

I've seen cattle where they don't belong—wading in creeks and estuaries that are choked with algae from cattle manure.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, Mary Dosch

From:	Pat Rose
To:	Energy@Coastal
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Thursday, September 1, 2022 12:07:11 PM

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

I've been to other historic National Parks such as Williamsburg, VA, where I was welcomed into historic homes for demonstrations of how butter was made and horses cared for. It's horrible to visit the "historic" ranches at Point Reyes National Seashore where I was greeted with "keep out" signs, hostile ranchers on ATVs, and miles of barbed wire. Leasing our National Park provides no educational activities and no benefit to the public, it only feeds the pockets of the greedy beef and dairy operators.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

Please reconsider your approval of ranching in the national park.

Sincerely, Pat Rose

It is crucial that the State of California have control over the ecosystems and wildlife within the Seashore. I thank you for taking the time to read my thoughts on Point Reyes.

Our family has enjoyed visiting the Pt Reyes for decades, but the news about unsafe levels of E.coli in the park's streams and beaches is deeply concerning. As a mother, I worry that my children will be exposed to water that is polluted by cattle manure or even human sewage from leaking septic systems. Until these WQ is adequately addressed, we will find alternative places to safely picnic and play.

The Park Service, park management, and multiple regulatory agencies been tap dancing around this for decades and the damage and harm out there is worse and worse! Please do whatever you can to get rid of ranchers and their cattle, and return our national seashore to nature, not cow crap all over the place!

Any plan that is ultimately produced to address the water and climate impacts of ranching, as the Commission has required, must include measurable benchmarks and deadlines for achieving them, enforcement mechanisms, and consequences—including closing down private ranching in the park— for failure to perform.

Sincerely, Kalliopi Grafakou

Point Reyes is the only National Seashore on the west coast and needs the California Coastal Commission to protect it from degradation by industrial ag interests.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

We are in the midst of a climate crisis, and most are being too slow to address it. For example, many are not actively working to decrease water use, nor actively working toward the protection of water quality of the water we have.

The Channel Islands recently got rid of cattle. We ask the Coastal Service to work with the National Park Service and do the same.

Sincerely, Jan Modjeski

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Nora Coyle

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

Point Reyes National Seashore is at grave risk to be destroyed by the horrible decades-long practices and consequences of cattle ranching among the current and present dangers of climate warming, biodiversity loss, and extended drought. The California Coastal Commission MUST step up and push the National Park Service NOW to rid ranchers and cattle from the American public's National Seashore here, the only national park unit on the West Coast.

Please help address and end the constant impact of ranching on our public lands on the Pacific Coast. It is time for our environment to come first, especially on public land.

Sincerely, David Bonnell

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

I am confused as to how its legal that some of the worst water quality in the state occurs within a National Park!

The National Park Service has allowed hundreds of our rare and iconic Tule elk to die of thirst during this drought. The Seashore cannot support both cows and elk. And tourists don't come to look at cows.

We all need a safe and clean outdoor place to go to, especially with so much going on in our world. Please reassess your position on private ranching in our National Seashore, and help us create a safer and cleaner Park.

Sincerely, Anita Tsutsunen

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

Manure discharged from cows and other livestock at Point Reyes National Seashore not only contaminates our beaches with potentially disease causing fecal bacteria they add nitrogen and phosphorus which cause surface waters to be so choked with emergent vegetation you can hardly see the water.

The intention of a national park is to protect and connect with wilderness. NPS seems to be acting more so as representatives of private industry than public good. Time and time again the Park Service continues to put off dealing with these troubling environmental issues.

This is a national seashore for the American people and for wildlife and habitat—not a playground or business landscape for private, industrial-level, factory animal operations. Please help get the ranchers out of Point Reyes National Seashore.

Sincerely, Darlene Wolf

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

Why is so much of the Point Reyes National Seashore permitted to be covered in cow manure from dairy and beef cattle? Cattle excrement can be found on footpaths, in creeks, and in streams. Every visitor—adults, children, pets—should avoid it! Why doesn't the park administration put a stop to it? Why do these ranchers misuse our national park's land and water?

If ranches weren't funded by our taxes, they couldn't exist and wouldn't be allowed in the park. Why are we paying for them to pollute our waters?

Make this National Park an actual National Park and change your stance on ranching on the seashore.

Sincerely, Beth Olson

I respectively request the California Coastal Commissioners to do everything possible to protect our public lands in Point Reyes National Seashore.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

The Park Service, park management, and multiple regulatory agencies been tap dancing around this for decades and the damage and harm out there is worse and worse! Please do whatever you can to get rid of ranchers and their cattle, and return our national seashore to nature, not cow crap all over the place!

This is our land. Please hold the National Park Service accountable.

Sincerely, marina sagardua

Date:	Thursday, September 1, 2022 11:35:15 AM

Commissions, your help is urgently needed to clean up Point Reyes National Seashore.

Water quality data clearly shows that streams, lagoons, and estuaries at Point Reyes National Seashore have alarmingly high levels of potentially disease-causing fecal bacteria. So the water features that attract visitors to enjoy the park are the same things that endanger our health. This should be criminal.

We should be protecting and restoring wildlife habitat at Point Reyes National Seashore. Scientists say we are in the sixth mass extinction event. critical wildlife habitat.

Please reconsider your approval of ranching in the national park.

Sincerely, minna niemi

I want to thank the Coastal Commissioners for providing an opportunity for the public to share their position on the ongoing issues associated with private cattle ranching in Point Reyes National Seashore.

Over a third of Point Reyes National Seashore is taken up by livestock farms! Years ago, they were supposed to be gone! Why are they still permitted to occupy that space? Tens of thousands of acres are barred off from public access by barbed wire, electric fences, and signs that read "stay out" and "don't trespass."

It's time for the California Coastal Commission to step in and stop this absurdity! For the sake of people, wildlife, and habitat, stop this long-time tragedy! Point Reyes could be a model for sound and sane climate policy practices, biodiversity restoration, and leading edge drought science.

I ask that the Commission continues to insist on a timely plan will bring water quality into compliance with healthy standards—for the safety of park visitors, resident workers and wildlife.

Sincerely, Charlene Kerchevall

I visit Point Reyes National Seashore frequently to view and photograph the amazing biodiversity. It is the only place in the world where one can see iconic species like Tule Elk and elephant seals in the same place!

Why is it allowed for Point Reyes to have the most contaminated waters on the California Coast if it is unique enough to be a national park and an UN-designated Biodiversity Hot Spot?

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

The Seashore is a national treasure, but it appears that the state of California will need to step in to save it. I ask the Commission to do everything possible to remove cattle and restore our coast.

Sincerely, Christina Williams

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

This state is in an extreme drought. Cows at Point Reyes are consuming all the water that should be going to natural habitat and wildlife, like the tule elk.

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

Because they are an agency of the federal government, the National Park Service at Point Reyes National Seashore has been operating on the mistaken assumption that they are exempt from California laws. Their disregard is intolerable. Please act now and save our land.

Sincerely, Diane Gentile

Thank you for considering my comment. Point Reyes National Seashore is the "Island in Time" created during the Kennedy Administration that gives so many visitors a beautiful and peaceful way to connect with the natural world.

I have enjoyed visiting the Pt Reyes several times over the years, but the news about unsafe levels of E.coli in the park's streams and beaches is very disturbing. Water that is polluted by cattle manure or even human sewage from leaking septic systems is a serious threat to all visitors as well as working there and is completely unacceptable.

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

Please help address and end the constant impact of ranching on our public lands on the Pacific Coast. It is time for our environment to come first, especially on public land.

Sincerely, Robert Marvos

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Deborah Richerson

As a longtime resident of California, I am writing to express my sadness and concern at the current state of Point Reyes National Seashore.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

As the pandemic has shown us, we need to increase public recreation and access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up keeping people out of our parklands.

Because they are an agency of the federal government, the National Park Service at Point Reyes National Seashore has been operating on the mistaken assumption that they are exempt from California laws. Their disregard is intolerable. Please act now and save our land.

Sincerely, Maureen Reardon

Point Reyes is one of the most beautiful places in California, and it concerns me that to read about the level of pollution that occurs in places which were intended to be for the public

Beef and dairy operators at Point Reyes National Seashore have dammed surface streams to create watering ponds for livestock, thereby depriving downstream fish and native wildlife of the habitat needed to sustain them, especially during drought years.

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore.

Because they are an agency of the federal government, the National Park Service at Point Reyes National Seashore has been operating on the mistaken assumption that they are exempt from California laws. Their disregard is intolerable. Please act now and save our land.

Sincerely, Maribel Jerez

Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Thursday, September 1, 2022 11:00:12 AM

I feel privileged to have the Point Reyes National Seashore virtually in my backyard.

Migratory birds from all over the Western United states stop in the Seashore in search of a safe place to rest and refuel along the Pacific Flyway. Endangered marine mammals along the Pacific Coast call Point Reyes home. We now know that Point Reyes provides poor habitat for these protected wildlife. At Point Reyes, water is polluted by cattle manure and land is barren due to too many cows.

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, John Hoffman

Point Reyes is the only National Seashore on the west coast and needs the California Coastal Commission to protect it from degradation by industrial ag interests.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

"First gradually, then all at once." That is the history of the environmental crisis at Point Reyes. Please address this urgent need.

Sincerely, Karen Warren

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

Why is it allowed for Point Reyes to have the most contaminated waters on the California Coast if it is unique enough to be a national park and an UN-designated Biodiversity Hot Spot?

As the pandemic has shown us, we need to increase public recreation and access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up keeping people out of our parklands.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Joe Quirk

Thank you for taking the time to read my comment. I live in the Bay Area and visit Point Reyes National Seashore several times a month.

Citizens look to national parks – "our best idea" – for leadership in the climate crisis, but Point Reyes is an example of the worst practices in conserving water and protecting biodiversity.

The National Park Service has allowed hundreds of our rare and iconic Tule elk to die of thirst during this drought. The Seashore cannot support both cows and elk. And tourists don't come to look at cows.

This is our land. Please hold the National Park Service accountable.

Sincerely, MARIE BOTEILHO

It's vital that the State of California has oversight authority over the coastal areas and ecosystems within the Seashore.

I've seen cattle where they don't belong—wading in creeks and estuaries that are choked with algae from cattle manure.

If we only have ten years to do something about climate change, why are we doing nothing about the critical conditions at Point Reyes?

Cattle were recently removed from the Channel Islands. We want the National Park Service and the Coastal Service to collaborate and take similar action.

Sincerely, Jo Pepper

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

I don't see how it is acceptable that a National Seashore has some of the state's poorest water quality!

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

This is our land. Please hold the National Park Service accountable.

Sincerely, Brenda Gamache

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. From:	Julie Brickell
To:	Energy@Coastal
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Thursday, September 1, 2022 10:28:09 AM

Thank you for your work to protect our coast, especially at Point Reyes National Seashore.

The cattle ranches cover over a third of Point Reyes National Seashore! They were supposed to be gone decades ago! Why are they still allowed to stay there? There are barbed wire and electric fences everywhere that block public access to tens of thousands of acres, and signs saying don't trespass, keep out.

The National Park Service lacks the resources (money and personnel) necessary to control the profit-driven, opportunistic ranchers who don't spare a thought about environmental health and safety.

The Coastal Commission is our best hope for cleaning up the water at Point Reyes. Please ensure that the park service develops and implements a strict water quality plan as soon as possible.

Sincerely, Julie Brickell

As a resident of West Marin and a frequent visitor to our beloved Point Reyes National Seashore which is minutes from where I live, I am writing today with deep concern for the degradation of water quality due to private extraction of resources from our public lands due to the subsidized dairy and cattle industries.

I spend much of my free time kayaking and hiking in Point Reyes, and I have noticed a decrease in water quality and clarity, in our streams - including endangered coho salmon runs - copious amounts of cow dung on trails and agriculture runoff draining onto beaches and directly into lagoons which contain endangered plant species.

It is already horrible and wrong that our public lands are being used for private profit. The fact that water pollution due to agricultural runoff is now noticeable indicates that it is at far too high a level and likely has been for some time.

We are very fortunate to live in an area where biodiversity still exists, but it is on the decline due to the volume of cows present on our public lands. Grazing cattle on these lands is incredibly invasive. It threatens and destroys endangered species habitat as they trample and consume endemic plants and their waste runoff pollutes coastal waters - there is nothing ok about this.

Wildlife deserve a clean, healthy habitat and so do human beings. I most strongly urge the Coastal Commissioners and the National Park System to do all you can to protect and clean up Point Reyes National Seashore.

Sincerely, Jennie Pakradooni

To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Thursday, September 1, 2022 10:19:09 AM

We are fortunate to have Point Reyes National Seashore located in a metropolitan area, and only 60 minutes from San Francisco..

The National Park Service has not performed water quality monitoring in the known polluted waterways in Point Reyes for years – this is unacceptable. If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

We should be protecting and restoring wildlife habitat at Point Reyes National Seashore. Scientists say we are in the sixth mass extinction event. critical wildlife habitat.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, Winifred Burkett

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

The National Park Service has allowed hundreds of our rare and iconic Tule elk to die of thirst during this drought. The Seashore cannot support both cows and elk. And tourists don't come to look at cows.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Anna Rossini

The purpose of the National Park is to protect wilderness and provide equitable access for all folks. Please do everything you can to send a message and remind the Park Service of their duty.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

The Coastal Commissioners have an opportunity to protect the watersheds in Point Reyes National Seashore, much of which drains into the Pacific Ocean. It is time for water protection to be prioritized in Point Reyes, for the sake of our environment and generations to come.

Please help us get the ranchers out of our National Seashore! Point Reyes is the only National Seashore on the West Coast of the U.S., and it's becoming a cesspool, even though ranchers were supposed to leave decades ago.

Sincerely, Maria Russo

Thank you for your involvement in helping protect the Seashore! We need your leadership to help finally make this park a park.

The thousands of acres in Point Reyes National leased for cattle ranching have been denuded of native vegetation, and the water quality in the numerous waterways has been significantly impacted for decades. It is a concern that very few steps are being taken to address these plus numerous other issues related to private ranching on these lands.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

Cattle were recently removed from the Channel Islands. We want the National Park Service and the Coastal Service to collaborate and take similar action.

Sincerely, Toni Adisano

Thank you for considering my comments about the damage to Point Reyes National Seashore from cattle operations. I know that I am not alone in saying the impacts are so apparent and disheartening that I no longer visit the park.

There is a severe drought in this state. At Point Reyes, cows are using up all the water that should be going to animals and natural habitats, including tule elk.

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

Service is driven by politically motivated ag interests; Coastal Commission members and staff may have also come under some of this political pressure. But it is your responsibility to protect California's coasts.

Sincerely, Diane-Michele Petrillo

Thank you for considering my comment. Point Reyes National Seashore is the "Island in Time" created during the Kennedy Administration that gives so many visitors a beautiful and peaceful way to connect with the natural world.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

We should be protecting and restoring wildlife habitat at Point Reyes National Seashore. Scientists say we are in the sixth mass extinction event. critical wildlife habitat.

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, Dan Perdios

We are fortunate to have Point Reyes National Seashore located in a metropolitan area, and only 60 minutes from San Francisco..

There is a severe drought in this state. At Point Reyes, cows are using up all the water that should be going to animals and natural habitats, including tule elk.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

This is our land. Please hold the National Park Service accountable.

Sincerely, maria lopes

I watched the CCC hearings on Point Reyes in April and was inspired by your knowledge and concern about the conditions at the Seashore.

Aquatic life in the Pacific Ocean adjacent to Point Reyes National Seashore are harmed by pollution from ranches. These include the federally endangered Central Coast Coho salmon as well as whales which migrate through the area.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

Thank you for your serious sincere attention and action on this matter! No more private ranching, no more cows in Point Reyes National Seashore!

Sincerely, Lucy Guerra

Commissions, your help is urgently needed to clean up Point Reyes National Seashore.

It is a tragedy to see the park deteriorate, especially over the last decade. Cattle operations, made worse by drought, have turned the landscape into a sea of bare dirt and manure.

Cattle ranching at Point Reyes is clearly not sustainable. Ranchers buy supplemental water and grass for cows, while wildlife are expected to die, according to the park service. The climate crisis will only worsen conditions.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Debi Combs

Thank you for taking the time to read my comment! I am very concerned with what I have heard about Point Reyes, and I hope you all can take leadership and help solve these issues.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

If we only have ten years to do something about climate change, why are we doing nothing about the critical conditions at Point Reyes?

Please conserve California's coast line for Californians, not cattle corporations!

Sincerely, Lynn Copping

I hope you care about Point Reyes National Seashore as much as I and so many millions of people do.

Point Reyes National Seashore has some of the most polluted waterways in California, and the cause of the pollution is due to cattle ranching on leased parcels. Therefore it is unclear why ranching tenants can continue their ranching operations while scientific documentation notes the impact to water and air quality on these public lands.

The park service has had years to correct these problems, but seems to delay or defer rather than taking action.

Coastal Commissioners, sincerely. The ranchers on Point Reyes National Seashore have literally commandeered this national park from the American people and the wildlife, wild lands, and wild waters that exist there. Would you let your own children wade, walk, hike, traipse, splash, swim, or do any other activity on, in, or near the cattle-dung waters, beaches, creeks, estuaries, tide pools, and fields there? Wouldn't you worry about their health and safety? Please make this park a park and help us protect the coast.

Sincerely, Barbara Danko

The Commissioners have an important role protecting our coast.

I have hiked a lot in Point Reyes National Seashore, and I have stopped going to many places because there's so much cow crap everywhere, in streams and on trails and draining onto a lot of beaches there. It's disgusting and really unhealthy. Why is this allowed to continue for years and years and years?

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

"First gradually, then all at once." That is the history of the environmental crisis at Point Reyes. Please address this urgent need.

Sincerely, Geraldine Card

I am writing to voice my support for the CCC's efforts to protect Point Reyes National Seashore.

Point Reyes National Seashore has some of the most polluted waterways in California, and the cause of the pollution is due to cattle ranching on leased parcels. Therefore it is unclear why ranching tenants can continue their ranching operations while scientific documentation notes the impact to water and air quality on these public lands.

The National Park Service knew there was water contamination starting in 2001. Their solution? Just stop sampling in 2013! We look to the Coastal Commission to expeditiously protect and clean up our coastal waters.

Please protect the water for all the hikers, bike riders, campers, kayakers, and families who learn to love and protect nature by visiting Point Reyes.

Sincerely, Julie Rose

As one who is proud and awestruck by the unique California coastline and biodiversity, especially in Point Reyes, I would like to thank you for your efforts to protect the only National seashore on the West coast.

The National Park Service has not performed water quality monitoring in the known polluted waterways in Point Reyes for years – this is unacceptable. If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

The Coastal Commission was created to protect our coast and needs to use the power it has to affect change at the National Park Service.

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, Julie Rose

Thank you for taking the time to read my comment! I am very concerned with what I have heard about Point Reyes, and I hope you all can take leadership and help solve these issues.

The land and water in Point Reyes deserve to be protected, not only for the public but also for the native wildlife. We all need a healthy environment so let's prioritize and protect these public lands on the Pacific Coast.

If we only have ten years to do something about climate change, why are we doing nothing about the critical conditions at Point Reyes?

I was at Point Reyes for the first time in years, and it was clear that something has to change.

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

The National Park Service lacks the resources (money and personnel) necessary to control the profit-driven, opportunistic ranchers who don't spare a thought about environmental health and safety.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, MariaGrazia Sanguin

We appreciate you taking action to improve the appalling situation in Point Reyes.

Ranchers have let their septic systems fail on several ranches in our National Seashore. There is cattle waste all over the place in fields, streams, creeks, and ponds.

The National Park Service lacks the resources (money and personnel) necessary to control the profit-driven, opportunistic ranchers who don't spare a thought about environmental health and safety.

Please use your influence so the Park Service will follow its own mission.

Sincerely, Holly gilzow

As a long-time California resident, I am writing to express sadness and outrage over the conditions at Point Reyes National Seashore.

The bike paths at Point Reyes are the worst in Marin – dusty, barren and full of cow poop that gets into your tires, shoes, clothes and skin.

Addressing unsafe water in a park ought to be an urgent public health priority, but the park service acts as if they can deal when it's convenient.

Honestly, Point Reyes National Seashore would be better served if it were a State Park - at least then it would be managed properly and in accordance with California regulations.

Sincerely, Angela Gantos

Thank you for your time in reading my remark. I reside in the Bay Area and visit Point Reyes National Seashore on a regular basis.

Manure discharged from cows and other livestock at Point Reyes National Seashore not only contaminates our beaches with potentially disease causing fecal bacteria they add nitrogen and phosphorus which cause surface waters to be so choked with emergent vegetation you can hardly see the water.

As the pandemic has shown us, we need to increase public recreation and access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up keeping people out of our parklands.

Please represent the interest of the people and rescind your approval of ranching in the National Seashore.

Sincerely, Mason Winton

Thank you for your work to protect our coast, especially at Point Reyes National Seashore.

The ranchers have had decades to do the right thing for the environment, and insist to manipulate and obfuscate every chance they can. Raw sewage leaking on lands and in fresh and ocean waters; cattle excrement covering half the park; methane fouling the air; cows as eyesores in what is to be a natural wilderness; and actual dead zones of soil and waters—all by disingenuous ranchers and compliant park management and staff.

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore.

Please help address and end the constant impact of ranching on our public lands on the Pacific Coast. It is time for our environment to come first, especially on public land.

Sincerely, Ronald Huetter

I feel privileged to have the Point Reyes National Seashore virtually in my backyard.

I rarely go to Point Reyes anymore because it's upsetting to see the damage from cattle overgrazing and trampling so much of the park.

Ranches are not self-supporting and would not be in the park were they not subsidized by our tax dollars.

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, Ronald Huetter

Sincerely, CARYL SPECK

I only just learned that the CCC can influence NPS policies at Point Reyes -- that is good news.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

Cattle ranching at Point Reyes is clearly not sustainable. Ranchers buy supplemental water and grass for cows, while wildlife are expected to die, according to the park service. The climate crisis will only worsen conditions.

This is a national seashore for the American people and for wildlife and habitat—not a playground or business landscape for private, industrial-level, factory animal operations. Please help get the ranchers out of Point Reyes National Seashore.

Sincerely, Gerhardt Gerckens

I hope you care about Point Reyes National Seashore as much as I and so many millions of people do.

It is a tragedy to see the park deteriorate, especially over the last decade. Cattle operations, made worse by drought, have turned the landscape into a sea of bare dirt and manure.

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, Joanne Tenney

I hope you care about Point Reyes National Seashore as much as I and so many millions of people do.

It is unacceptable that my tax dollars subsidize private industry in a national park that causes some of the worst water quality in California.

During this drought, the National Park Service has let hundreds of our famous and rare Tule elk perish from dehydration. Elk and cows cannot coexist on the Seashore.

My request is that the Coastal Commission holds the park service accountable to its mission, to prioritize the health of the park over the financial interests of cattle ranches.

I am an enthusiast of public lands, and it is a gift for all to have Point Reyes National Seashore located in the Bay Area on the Northern California coast.

The National Park Service has not performed water quality monitoring in the known polluted waterways in Point Reyes for years – this is unacceptable. If the Park Service is not going to protect our public lands from environmental degradation, it is asked of the Commission to please require the ending of ranching in the National Seashore in order to help restore our public lands along the California coast.

The Coastal Commission was established to safeguard our coastline, and it must make use of its authority to influence the National Park Service. Endangered wildlife needs a voice and it is our time to speak up for them.

Stand up for your oaths as true California Coastal stewards. Be plain and forthright: The ranchers, and their park management enablers, have had long enough to demonstrate good stewardship. Please help facilitate the removal of ranchers and cattle from Point Reyes within the next three years.

Sincerely, Ken Stack

We need the California Coastal Commission to protect the only National Seashore on the west coast.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

Cattle were recently removed from the Channel Islands. We want the National Park Service and the Coastal Service to collaborate and take similar action.

Sincerely, Karen kindel Canton ohio

Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Thursday, September 1, 2022 9:47:09 AM

Thank you for using your authority to address the terrible conditions at Point Reyes.

Why do ranchers have so much power over our national park? Their cattle create vast dead zones out on the Point. The ranchers and their cattle shouldn't even be there anymore! They constantly manipulate park management and regulatory agencies for private profit and hurt wildlife and visitors with their shady dealings with park management.

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

Politics should not be used as the basis for decisions that may influence the future of the Seashore. We need real action now in order to secure a future for Point Reyes.

Sincerely, Jeffrey Hastie

We hope you care about "Point Reyes National Seashore" as much as we, and, so many millions of people do?

Our family is telling the "California Coastal Commission" that, chronic, water pollution caused by, private, ranching operations in the, only, "National Seashore", on the West Coast, is shameful, and, unacceptable!

"Turtle Island Restoration Network", just, released the, most, rigorous independent water quality report ever conducted in "Point Reyes National Seashore" -- revealing water, pollution that is dangerous to humans, wildlife, and, the, local, habitats that sustain us all!

The "Park Service" has had years to correct these, degradation, problems, but, you insist on delaying or, deferring rather than taking action!

Point Reyes National Seashore" has some of the, most, polluted waterways in California, and the cause of the pollution is due to cattle ranching on leased parcels. Therefore, it is disturbing to know that, ranching, tenants are allowed to continue their, ranching, operations while, scientific, documentation notes the impact to water, and, air, quality on these, public, lands!

Coastal Commissioners, sincerely! The ranchers, on "Point Reyes National Seashore", have, literally, commandeered this, National Park from the American people, and, the wildlife, wild, lands, and, wild, waters that exist there!

We are telling the "California Coastal Commission" to protect our "National Park" and wildlife, from dangerous, toxic, water pollution!

Our family members are telling the "California Coastal Commission" that water pollution dangerous to, public, health, and, the environment is unacceptable, and, deplorable, in the "Point Reyes National Seashore"!

Cattle operations, made worse by drought, have turned the landscape into a sea of, bare, dirt, and, manure, turning the lands, and, waters, into disgusting, and, dangerous, waste, areas!

Eight, popular, destinations in the Park, contained, bacteria, concentrations exceeding, state, standards!

Some bacteria, concentrations were more than 170 times the, health-based, standards for, fecal, coliform!

Unacceptable, health, risks identified for wading, swimming, kayaking, and, other, forms of water, recreation in, popular, Park locations, including, shellfish, harvesting in Drakes Estero!

Would you let your, own, children wade, walk, hike, traipse, splash, swim, or, do, any, other activity on, in, or near the, cattle-dung, waters, beaches, creeks, estuaries, tide pools, and, fields there? Wouldn't you worry about their health, and, safety? You MUST make this Park a

Park and, help us protect the coast!

Sincerely, Diane Kastel

We need the California Coastal Commission to protect the only National Seashore on the west coast.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

Cattle were recently removed from the Channel Islands. We want the National Park Service and the Coastal Service to collaborate and take similar action.

Sincerely, Valentina Sanchez

I have lived in northern California a long time, and am really upset about what's going on out at Point Reyes National Seashore.

Clean and abundant water is necessary to support the wildlife on land in Point Reyes National Seashore, the freshwater aquatic life in these Point Reyes watersheds, the marine life along the Pacific Coast, and the avian life passing through the Pacific Flyway. Sadly, insufficient water is available for native wildlife as leased cattle operations are prioritized for water use, and the water that is available is polluted from these operations.

If we only have ten years to do something about climate change, why are we doing nothing about the critical conditions at Point Reyes?

Please use your influence so the Park Service will follow its own mission.

Sincerely, Wendi Myers

Thank you for taking the time to read my comment. I live in Northern California, and I love Point Reyes National Seashore.

Migratory birds from all over the Western United states stop in the Seashore in search of a safe place to rest and refuel along the Pacific Flyway. Endangered marine mammals along the Pacific Coast call Point Reyes home. We now know that Point Reyes provides poor habitat for these protected wildlife. At Point Reyes, water is polluted by cattle manure and land is barren due to too many cows.

With continued ranching and the drought at Point Reyes National Seashore, I worry very much about the continued loss of biodiversity there. Please do not let the ranchers or the park service continue their mismanagement of this special place.

Please protect human health for beachgoers at Point Reyes. Hold the ranches accountable. Eliminate the water pollution.

Sincerely, Anne Streeter

Point Reyes is the only national seashore on the Pacific Coast and is designated an International Biological Preserve for its abundant biodiversity and proximity to other protected lands and waters.

Citizens look to national parks – "our best idea" – for leadership in the climate crisis, but Point Reyes is an example of the worst practices in conserving water and protecting biodiversity.

The Coastal Commission was created to protect our coast and needs to use the power it has to affect change at the National Park Service.

Any plan that is ultimately produced to address the water and climate impacts of ranching, as the Commission has required, must include measurable benchmarks and deadlines for achieving them, enforcement mechanisms, and consequences—including closing down private ranching in the park— for failure to perform.

Sincerely, Vasileios Grigoriou

We need the California Coastal Commission to protect the only National Seashore on the west coast.

Point Reyes is the only national seashore on the West Coast. There are so many problems in Point Reyes National Seashore that the California Coastal Commission can influence for remedy, including the horrible water quality from ranching in many park locations; rancher abuse of soil, water, and air; ranchers fencing off thousands of acres from visitors; ranchers threatening or acting aggressively toward park visitors, including families with children; ranchers breaking federal and state environmental laws, and ignoring basic water and soil quality regulations and policies that injure or kill wildlife or damage habitat.

Drought will only get worse in California. The Seashore cannot support both cows and elk. Streams will dry up and wildlife will die of thirst.

Cattle were recently removed from the Channel Islands. We want the National Park Service and the Coastal Service to collaborate and take similar action.

Sincerely, Evelyn Betancourt

Point Reyes is the only National Seashore on the west coast and needs the California Coastal Commission to protect it from degradation by industrial ag interests.

Citizens look to national parks – "our best idea" – for leadership in the climate crisis, but Point Reyes is an example of the worst practices in conserving water and protecting biodiversity.

The National Park Service has allowed hundreds of our rare and iconic Tule elk to die of thirst during this drought. The Seashore cannot support both cows and elk. And tourists don't come to look at cows.

Thank you for giving me the chance to express my worries and problems over the ongoing environmental effect on the Point Reyes National Seashore. I kindly ask the Commissioners to work with conservation organizations to save the land, water, and wildlife on these public lands.

Sincerely, Jane Drews

Thank you, Coastal Commissioners, for reading my concerns that Point Reyes National Seashore is under threat by its current management practices.

Why are we jeopardizing precious native species to support cattle that can live anywhere?

It's time for the California Coastal Commission to step in and stop this absurdity! For the sake of people, wildlife, and habitat, stop this long-time tragedy! Point Reyes could be a model for sound and sane climate policy practices, biodiversity restoration, and leading edge drought science.

Please help us get the ranchers out of our National Seashore! Point Reyes is the only National Seashore on the West Coast of the U.S., and it's becoming a cesspool, even though ranchers were supposed to leave decades ago.

Sincerely, Gerri Finkelstein-Lurya

I hope you care about Point Reyes National Seashore as much as I and so many millions of people do.

This state is in an extreme drought. Cows at Point Reyes are consuming all the water that should be going to natural habitat and wildlife, like the tule elk.

If you care about the ocean, the climate, coastal biodiversity, and the health, safety, and wellbeing of people, wildlife, and clean air, oceans, and lands, PLEASE do something as the preeminent California coastal regulator – restore and protect our Point Reyes Seashore.

Please partner with concerned citizens, and help protect our National Seashore. It is time for our public land to be prioritized over commercial cattle ranching.

Sincerely, Jeff Regan

I hope you care about Point Reyes National Seashore as much as I and so many millions of people do.

It is a tragedy to see the park deteriorate, especially over the last decade. Cattle operations, made worse by drought, have turned the landscape into a sea of bare dirt and manure.

For the sake of our public land, our limited water source, our wildlife, and our future generations, it is time to end the constant pollution to our National Seashore. Let's restore this incredible coastal landscape, by ending private ranching, and allow conservation efforts to be initiated.

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, Henry Rosenfeld

From:	Peter Warner
To:	Coastal Point Reyes Management Plan
Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Thursday, September 1, 2022 9:43:09 AM

Point Reyes National Seashore is one of the world's biodiversity hotspots.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

"No challenge poses a greater threat to our way of life, prosperity, and future as a state than climate change," said Governor Newsom.

Politics should not be used as the basis for decisions that may influence the future of the Seashore. We need real action now in order to secure a future for Point Reyes.

Sincerely, Peter Warner

From:	Susan Watts

Subject:	Agenda Item 10b: Sepetember 8th CCC Meeting: Point Reyes
Date:	Thursday, September 1, 2022 9:43:08 AM

Thank you for your work to protect our coast, especially at Point Reyes National Seashore.

Why do ranchers have so much power over our national park? Their cattle create vast dead zones out on the Point. The ranchers and their cattle shouldn't even be there anymore! They constantly manipulate park management and regulatory agencies for private profit and hurt wildlife and visitors with their shady dealings with park management.

It makes no sense for a few ranchers to have more influence over a national park than millions of visitors.

Any plan that is ultimately produced to address the water and climate impacts of ranching, as the Commission has required, must include measurable benchmarks and deadlines for achieving them, enforcement mechanisms, and consequences—including closing down private ranching in the park— for failure to perform.

Sincerely, Susan Watts

Protecting our public lands from environmental impacts should be a goal of all local, state and national agencies, especially during a climate crisis, therefore I am writing to urge the Commissioners to protect Point Reyes from constant impacts causing by cattle ranching.

Over a third of Point Reyes National Seashore is taken up by livestock farms! Years ago, they were supposed to be gone! Why are they still permitted to occupy that space? Tens of thousands of acres are barred off from public access by barbed wire, electric fences, and signs that read "stay out" and "don't trespass."

The National Park Service lacks the resources (money and personnel) necessary to control the profit-driven, opportunistic ranchers who don't spare a thought about environmental health and safety.

Clearly the Point Reyes National Seashore is significantly under-resourced and relies on its staff to enforce environmental regulations rather than professionals with the specific experience required. Please withdraw your approval of ranching in the national park.

Sincerely, Andrelene Babbitt

We need our Commissioners to protect and defend our coastal resources for all the people of California for generations to come.

Why is so much of the Point Reyes National Seashore permitted to be covered in cow manure from dairy and beef cattle? Cattle excrement can be found on footpaths, in creeks, and in streams. Every visitor—adults, children, pets—should avoid it! Why doesn't the park administration put a stop to it? Why do these ranchers misuse our national park's land and water?

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

The National Park Service has not kept its agreements and can't be relied upon to do so.

Sincerely, Harry van Horn

Point Reyes is the only National Seashore on the west coast and needs the California Coastal Commission to protect it from degradation by industrial ag interests.

Cattle tracks gouging the hillsides, ultra-green polluted ponds and streams, bone-dry fields laden cattle manure, and hundreds of miles of barbed wire fences—an ugly and unwelcoming site to visitors who come to the park for inspiration. An even greater concern is what this damage means for native plants and animals.

If we only have ten years to do something about climate change, why are we doing nothing about the critical conditions at Point Reyes?

Please conserve California's coast line for Californians, not cattle corporations!

Date:	Thursday, September 1, 2022 9:42:06 AM

Thank you for your time in reading my remark.

Why is so much of the Point Reyes National Seashore permitted to be covered in cow manure from dairy and beef cattle? Cattle excrement can be found on footpaths, in creeks, and in streams. Every visitor—adults, children, pets—should avoid it! Why doesn't the park administration put a stop to it? Why do these ranchers misuse our national park's land and water?

This has gone on long enough! The Coastal Commission needs to protect our coast and clean up our coastal waters.

Thank you for the opportunity to share concerns and issues related the constant environmental impact to Point Reyes National Seashore. I respectfully request the Commissioners to align with conservation groups to protect our land, water, wildlife on these public lands.

Sincerely, Tracey Mangus

Thank you for your involvement in helping protect the Seashore! We need your leadership to help finally make this park a park.

Why is it allowed for Point Reyes to have the most contaminated waters on the California Coast if it is unique enough to be a national park and an UN-designated Biodiversity Hot Spot?

We are in a climate and extinction crisis. We the public, and all agencies should be focused on taking the right steps to address these human-caused issues. Per scientific publications, we are almost out of time, so the time is now.

NPS lacks both the will and capacity to protect the Seashore from a politically powerful special interest.

Sincerely, Frauke Brandt

We need the California Coastal Commission to protect the only National Seashore on the west coast.

I used to enjoy going to the Seashore with friends to hike, kayak, watch birds and take pictures.

When will the California Coastal Commission force the National Park Service and park management to obey environmental laws and regulations to protect visitor, wildlife, and habitat health and safety?

If you visit Point Reyes National Seashore, you will witness vast degradation by ranchers of lands and waters bequeathed in trust to the American people in perpetuity as a natural wonder. Please do ALL in your power to get the National Park Service (and Seashore management) to enforce existing environmental law, and plan for the removal of all ranching from the park within the next five years, period!

Sincerely, Betty Kowall

Ranches were not meant to continue forever in the PRNS when the park was established. The ranchers negotiated with politicians, especially Trump, to extend their leases. They are environmentally and ecologically destructive. Cattle are not a part of other national parks.

Thank you for reading my comment about Point Reyes. Years ago my partner proposed to me at the Seashore, so park holds a very special place in my heart.

Why do ranchers have so much power over our national park? Their cattle create vast dead zones out on the Point. The ranchers and their cattle shouldn't even be there anymore! They constantly manipulate park management and regulatory agencies for private profit and hurt wildlife and visitors with their shady dealings with park management.

We need to increase public access to our coastline for public benefit and inspiration. We cannot continue to approve plans that end up excluding people and endangering their health.

Hold the National Park Service – and especially the park management and staff – accountable to enforce environmental laws and regulations Get the cattle out of our National Seashore now!

Sincerely, Jayne Cerny

What is going on at Point Reyes?

The trash, heaps of cattle manure, beaches closed to the public because of dangerous levels of bacteria from cows—shouldn't be happening in a national park.

This has been going on for six decades! The ranchers were never supposed to stay this long, and they just turn the lands and waters into disgusting and dangerous waste areas, and nothing ever changes. The park management doesn't do anything to enforce federal or state environmental laws. Especially about ocean protection! Please do something!

We should all feel comfortable going into the water that drains out of Point Reyes, rather than worrying about the health risk to humans, and environmental damage to our fresh water, and marine aquatic life. Please prioritize our public lands for the sake of the public and the environment.

Sincerely, Miriam Leiseroff
