## ADDENDUM

**August 31, 2022**

**To:** Commissioners and Interested Persons

**From:** California Coastal Commission  
San Diego Staff

**Subject:** Addendum to **Item W17a, 6-19-1374 (UCSD Slope Repair)**, for the Commission Meeting of September 7 - 9, 2022

---

The purpose of this addendum is to make several minor corrections to the staff report. Staff recommends the following corrections be made to the above-referenced staff report. Deletions shall be marked by ~~strikethrough~~ and additions shall be underlined:

1. On Page 10 of the staff report, the last sentence of the second paragraph is an outdated reference and shall be removed as follows:

~~Excess cut material from the nearby UCSD Electromagnetics Research Facility (ERF) project is a potential source of import fill for the slope repair site. This material has been previously evaluated and found to be suitable for use as engineered fill for the La Jolla Shores Drive slope repair site, provided the fill is placed and compacted in accordance with the recommendations of this report.~~

2. On Page 13, Section E "Growth Inducement" is an incorrect reference and shall be removed from the staff report as follows:

~~E. Growth Inducement~~

~~As proposed, this development will not be growth-inducing. The proposed sewer facility upgrade is located within a developed public park which is surrounded by built-out urban communities. The proposed facilities are intended to provide a back-up safety system and stormwater interception for low flows. System capacity is not being increased, consistent with Section 30250 of the Coastal Act.~~
