Subject: Public Comment on May 2023 Agenda Item Wednesday 7a - Application No. 5-22-0852 (Gallaughner, Huntington Beach)

Here are my concerns and questions regarding the subject project:

How long with this project take? Will there be extra vehicles blocking our circle and street preventing people who live here from parking in front of their houses? If so, the workers need to be considerate to the neighbors/homeowners and park far away, not leave trash in the street and not loiter in front of our houses. We have had a bad past experience with this homeowner building their house that took over 3 years.

Another concern is what time and day will the work be done? Should be weekdays only and after 8am PST and end by 5pm PST. No weekend work. Same issue here when they were building their house. Workers worked off hours during holidays and weekends and early in the morning making very loud noise. If there is going excessive noise we need to be warned in advance due to virtual work.

Sincerely,

A concern neighbor/homeowner
