ADDENDUM

DATE: May 7, 2024

TO: Coastal Commissioners and Interested Parties

FROM: South Coast District Staff

SUBJECT: **ADDENDUM TO ITEM W14a, APPEAL NO. A-5-23-0047 FOR THE COMMISSION MEETING ON May 18 2024.**

This addendum is designed to provide some corrections to the staff report.

The staff report states that the company that produces Ornilux bird safe glass makes both UV reflective bird safe glass and also makes after-market products that can be applied to windows externally such as decals, tapes, and external coatings. It appears, however, that the company that produces Ornilux may not make after-market products for external application (although other manufactures do make and sell such products). Coastal Commission staff interprets the phrase "Ornilux or equivalent" to mean transparent medium (such as glass) with UV reflective designs incorporated into the glass. Moving forward, Commission staff will use more specific language, such as: bird safe glass with UV designs visible to birds incorporated into the glass. In this case, the City will be responsible for interpreting and enforcing its Condition of Approval No. 8.
