June 30, 2025

California Coastal Commission
455 Market Street, Suite 228
San Francisco, CA 94105

Dear Esteemed Commissioners,

I am writing to convey my great disappointment in the Coastal Commission's recent May 8, 2025 decision to review *de novo* at a future board meeting, the City of Half Moon Bay Coastal Development Permit Number PDP-072-13, approved by the Half Moon Bay City Council on January 30, 2025 (Hyatt Hotel).

As you are aware, Coastal Commission Professional Staff's recommendation was to deny appeal A-2-HMB-25-0003:

"...staff does not believe that the approved development results in significant public view problems of the type that would warrant the Commission's intervention in this project. It is true that the project would result in a large structure inland of Highway 1 that would, from certain vantage points, enter into views of the upland slopes and the ridgeline of the foothills to the east. However, its effect on these views is also tempered by the fact that the buildings would be well set back from the highway (between 120 and 180 feet or so from the edge of the pavement), and their massing would be broken up into two main buildings. In addition, the area is not without its large structures as is, including the City's Coastside Fire Station just inland of Main Street near this location (and its four-story fire training tower) and the two-story Coastal Repertory Theatre building just north of that and opposite the hotel site. The project site is also located at the southern-most extent of the City's downtown "Town Center", where the LCP encourages commercial development to be clustered. In short, staff believes that the intent of the LCP's scenic corridor protection provisions in this regard is adequately respected by the City's action in this case, and that the development can be found visually compatible with the character of the viewshed at this location. Thus, staff recommends that the Commission determine that the appeal contentions do not raise a substantial LCP conformance issue, and that the Commission decline to take jurisdiction over the CDP application for the project."

I agree with the Coastal Commission Professional Staff analysis.

The City of Half Moon Bay has historically dealt with revenue challenges. In the coming 2025/2026 fiscal year, the city is projected to have a \$3 million structural deficit. At the same time the city faces growing and significant infrastructure challenges resulting from climate change, rising sea levels, powerful wind and rainstorms, and threat from wildfire. The transit occupancy tax revenue from this project, frankly, is vital to stabilize the city's budget and help secure the public health of the residents of Half Moon Bay. Additionally, city budget stabilization is in the interest of the Coastal Commission, as it reduces the pressure on the city to approve future developments that may not align with the Coastal Commission's mission.

I write to express my continued support of this project and ask you to approve it.

Sincerely,

A handwritten signature in blue ink, appearing to read "Ray Mueller", is written over a light blue rectangular background.

Ray Mueller
Supervisor, Third District

July 2, 2025

The Honorable Meagan Harmon, Chair
California Coastal Commission
455 Market Street, Suite 300
San Francisco, California 94105

Dear Chairwoman Harmon,

I am the member of Congress representing Half Moon Bay and the rest of California. The project proposal from RGJC South LLC to build a two to three-story, 102 room hotel in the City of Half Moon Bay was brought to my attention by a local resident who felt intensely frustrated that the City could not move forward on a project after nine years of planning and process, despite the project's broad support by Coastal Commission staff, City staff, the City Council and community members.

My office consulted with community leaders—all who have substantial environmental sensibilities—who scratched their heads over the rationale cited by former Coastal Commission members at the May 8, 2025 hearing. The notion that a 2-3 story hotel in the very urbanized downtown of Half Moon Bay poses an impediment to the viewscape to the east puzzled me as well; any visitor enjoying a trip down Highway 1 will have their eyes fixated *to the west*, on the beautiful coastal landscape and ocean.

I write to request full and fair consideration, under all applicable laws and regulations, of the project proposal from RGJC South LLC. Developer Greg Jamison is a 40-year resident of Half Moon Bay who cares about the city's history and tight-knit community. He has worked tirelessly to garner support for this project, and I'm confident that he will be a good steward of his property.

This project's design has incorporated significant public input since first being proposed in 2016, and the city can benefit from increased tourism in the downtown area. The applicant has prioritized open space and coastal architecture. Furthermore, the hotel will provide local employment opportunities, and struggling Downtown businesses will see approximately \$11,000-\$22,000 more in daily revenue. This project will help attract local and international visitors who are thinking about visiting the Coastside for Half Moon Bay's beautiful beaches, vibrant downtown, and proximity to other local attractions in San Mateo County.

Thank you in advance for your consideration.

Sincerely,

Sam Liccardo
Member of Congress
16th District of California

California Legislature

Re: Support for proposed hotel in downtown Half Moon Bay

As elected officials in San Mateo County, we strongly support the development of a guest-room hotel in the downtown center of Half Moon Bay, located in our district. We recognize the critical importance of providing a hotel that would attract visitors to stay overnight and support the local small businesses, while providing an estimated \$1 million in Transient Occupancy Tax for the city. Additionally, the hotel property would add over 30 permanent jobs for local residents. As you know, the socioeconomic well-being of Coastside residents was greatly impacted by the pandemic, and many hospitality jobs have not rebounded. The addition of this small Hyatt Hotel would have a positive impact on all aspects of the Coastside economy.

This project has been in the works for nine years, and in January, the City of Half Moon Bay unanimously approved the project, which is located on an undeveloped five-acre parcel at the southern gateway to the city. The original plan called for a much larger hotel, but through years of thoughtful input and careful consideration, it was scaled down to just two stories and 102 rooms. In addition to hotel amenities, the property will offer public recreation opportunities and restoration of native species and improvements to the City's southern gateway entrance.

The denial of this project by the Coastal Commission, which was recommended by your own planners, is a devastating blow to the Coastside and Half Moon Bay economy and to the region's travel and tourism industry. We strongly urge the Coastal Commission to take action to move this project forward, not just for the Coastside community, but for future visitors to our beautiful beaches, bluffs, trails, seasonal wetlands, and small businesses.

Thank you for your attention to this matter and for moving this critical project forward.

Sincerely,

A handwritten signature in black ink, appearing to read "Josh Becker". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Congrats! Good luck as well. Sleep while you can!

To pass on to your team - the LCP is pretty darned unequivocal in its language - reducing impact on views is not the language in there --- impacting views of the inland hills is prohibited, precluded, not allowed (ref. multiple code sections previously entered into the record). I hope that is the standard to which this project will be held. The visual qualities of HMB are what draw people there, they are an intangible, but also invaluable asset.

The term "access" which is a prime directive of your agency, refers not only to the ability of people to get to the coastal regions, but also consider that views are only able to be accessed as a coastal resource if they are not obstructed by impermissible development. It is a slippery slope, and you can't get back the visual resources once they are gone, nor can you recreate them elsewhere, as you might be able to do with wetlands. The line that must be drawn is very clearly called out in the LCP, which was certified by the CCC. 18-19 feet of height is about all that site will accommodate to remain in compliance. And even that will be quite ugly IMHO.

It has been a pleasure to work with you over the past several years. I look forward to hearing from you again after your leave.

Hi Dave!

Nice to hear from you, I hope all is well. We're continuing to work with Greg on alternative designs/approaches with the goal of reducing visual impacts to the ridgeline/upland slopes, but this is definitely still in the brainstorming stage and we haven't yet settled on an alternative that we would be comfortable taking back to hearing yet.

Just a note that I will be going on maternity leave starting next Wednesday and wont return to work until the end of September, so please be sure to reach out to our district manager, Stephanie Rexing Stephanie.Rexing@coastal.ca.gov, with any questions about the project over the summer!

Best,

Ah - I will update the contact info. No idea where that number came from.

Thx for the concise update on the status of the project. I'm curious if you gave him targets for height and length (assuming same/similar footprint and setbacks from SR1). Happy to see something built there, as long as it conforms with the LCP Visual Resource protection standards. By my estimation, 18-19 feet height would not impinge on protected views beyond the extent to which existing structures on Main St already do. For better or worse, it is a highly visible parcel to build on.

Dave,

Looking back at several of our email threads, it looks like the number I'd provided you was 415-795-9988

We've given feedback to Greg on the types of alternatives we'd like to see, namely designs with reduced height and length. We have yet to receive such alternatives that satisfy our request and that we would analyze as part of a future staff recommendation.

Thanks,

Isobel

Thanks for the quick response.

The number I had on file from last year or so was 415-904-5244, which I believe is your office number. Currently, it just rings, nothing picks up, no voicemail. I'm pretty sure that's the number I reached you on at some point last year.

The pace of this process is of less concern to me, the substance of it is. Are you saying that Greg has not come back with a revised plan set, reducing room count, height, or length? I've got no insight as to his thought process.

Thanks for the update, such as it is :-)

Hello Dave,

What number are you dialing?

At this time there are no revised plans to share and there are no substantive updates to disclose. It has been several weeks since we've last touched base with Greg. While I understand that you may not be satisfied with the incremental progress at this point, our staff have repeatedly assured you that once substantive developments on a future project have been made you and any other members of the public will have the opportunity to weigh in, consistent with how all other projects are processed by our agency. You are absolutely welcome to share any concerns or considerations with myself or other relevant Commission staff at any time.

Kind regards,

Isobel

Subject: Hyatt HMB

Hi Isobel

Your office voicemail does not answer, does not allow one to leave a message. I hope you're still with the Commission.

I'd like to talk briefly to understand the current status of the Hyatt project, a rough idea of where the revised plans stand, and a timeline for further steps. Public input only after the staff report is fully baked tends to be pretty ineffective.

Please give me a call for a brief update at 650-576-1998. If I don't hear from you by the end of the week, I will put concerns and considerations into writing to you and the full Commission. However, without any background information, speculation will be required, and that will make my submission potentially less accurate and less helpful. My goal is not to waste anybody's time, but to make objective comments on whatever the state of play is currently.

Please help me out with that.

Thank you!

Re: Appeal Number A-2-HMB-25- 0003 Half Moon Bay, Hyatt Hotel

To whom it may concern,

The City of Half Moon Bay is submitting the following comments on the Hyatt Hotel Coastal Development Permit (CDP) Appeal (No. A-2-HMB-25-003). First, we would like to acknowledge the work that Coastal Commission (Commission) staff have put into reviewing the extensive record for this project, which was initiated over ten years ago, and is quite extensive.

We concur with the staff recommendation to find that the appeal contentions do not raise a substantial Local Coastal Program conformance issue and to decline to take jurisdiction over the CDP application.

The contentions raised in the appeal have been previously addressed in Planning Commission and City Council staff reports and presentations, as well as in the project Environmental Impact Report (EIR). These materials are part of the administrative record provided to Commission staff. Consequently, we will not be providing detailed rebuttals to all of the claims in the appeal. However, the appeal materials contain a pattern of misrepresenting findings in the EIR and then using these misrepresentations to assert erroneous conclusions concerning project compliance with Local Land Use Plan (LUP) policies. Although CEQA compliance is not primarily within the purview of the Commission, LUP compliance is. Therefore, we are providing the following information to clarify the facts in the record and to assist the Commission in reaching an informed decision.

One representative example, of this misunderstanding or misuse of CEQA, is found on the 6th page of the [Appeal Attachment](#). The appellant asserts that the FEIR (page 3-19) states that the project is not in compliance with Policy 9-12 and therefore, the project would be inconsistent with Policy 9-12.

The above cited assertion, is from Table 4.1-1, in Chapter 3 of the FEIR. This FEIR chapter addresses revisions to the Draft EIR (DEIR). These revisions were based on comments and additional information provided during review of the DEIR. Based on that new information “project” consistency with LUP Policy 9.12 was revised to state that the “project” was not

consistent with this policy. However, if one reviews the DEIR Alternatives Chapter, it shows that Alternative 2, which was for a smaller 102 room hotel and a four-lot parcel map would substantially reduce visual impacts. Based on this assessment It was then determined that smaller Alternative 2 would be consistent with LUP Policy 9-12.

In assessing this claim, it is important to understand that the term “project” has a specific legal meaning under CEQA that differs from the more general use of the term. In this case, the “project” referenced in FEIR Chapter 3, Table 4.1-1 is the original proposal for a larger, 129 room hotel. The City approved a smaller 102 room hotel, described in the DEIR as “Modified Alternative 2”.

The appellant’s claim, based on a selective reading of the record, indicates a basic misunderstanding or misuse of CEQA terminology and processes. This pattern of asserting significant impacts or LUP inconsistency based on the wrong “project” description and ignoring other sections of the EIR reappears repeatedly throughout the appeal materials and serves only to confuse and obfuscate what the facts are.

In closing, we appreciate the time and resources that Commissioners and Staff have put into reviewing this matter and look forward to working with you in the future.

Sincerely,

Douglas Garrison,
Senior Planner

Subject: Public Comment on May 2025 Agenda Item Thursday 11a - Appeal No. A-2-HMB-25-0003 (Hyatt Hotel, Half Moon Bay)

Dear California Coastal Commission Members & Staff,

On behalf of the Half Moon Bay Coastside Chamber of Commerce, I am writing to express our strong support for the proposed Hyatt Hotel Half Moon Bay project. This development represents a critical investment in our local economy and aligns with the Chamber's mission to support sustainable economic growth and enhance the vitality of the Coastside community.

The addition of a quality, mid-priced hotel in downtown Half Moon Bay will bring numerous economic benefits to our city. One of the most significant contributions is the Transient Occupancy Tax (TOT) revenue, estimated to generate between \$800,000 and \$1,000,000 annually for the City. These funds will provide vital support for city services, infrastructure improvements, and community programs, directly benefiting our visitors and residents.

In addition to its fiscal impact, the Hyatt Hotel project will create local jobs across a range of skill levels, from hospitality and guest services to operations and management. This will expand employment opportunities for Coastside residents, contribute to workforce development, and provide long-term career pathways within the community.

Furthermore, the Hyatt Hotel will address a long-standing need in our downtown area by providing hotel accommodations and flexible meeting space. This will allow us to host more business conferences, weddings, retreats, and other group events, many of which currently leave our area due to limited space, limited availability, and pricing options. Increased visitation from these hosted events will also stimulate spending at our local restaurants, shops, and service providers.

The Hyatt project brings a thoughtful approach to development that complements the

character of our community while enhancing our ability to compete in the tourism and business travel sectors. We encourage the California Coastal Commission to approve this project for the.

Thank you for your consideration.

RE: Appeal Number A-2-HMB-25-0003 (Hyatt Hotel, Half Moon Bay

WRITTEN RESPONSE TO STAFF REPORT DATED April 18, 2025

As the party appealing the Hyatt Hotel project to the Coastal Commission, I am requesting that the Commissioners reject the Staff Report recommendations, that the Commissioners find Substantial Issue, and take jurisdiction over this project. For Coastal Commission to find Substantial Issue here would simply be affirming the well-reasoned conclusions of the finders of fact, the Half Moon Bay Planning Commission.

As the Staff Report makes clear, there are some conditions arguing in favor of the project, and some arguing against the project, as it relates to LCP compliance. It all comes down to a very subjective assessment of “How big is too big?”.

In advance of the May 8, 2025 hearing, I urge the Commissioners to go and walk, bicycle, or drive past the project site in Half Moon Bay. Seeing the story poles in situ is much more realistic than a dry recitation of facts in a printed document. This is a project 34 feet in height and nearly 500 feet long along SR-1. It is not a small project.

When you look at the site in person, please bear in mind that the story poles do not give an accurate impression of the impact upon protected visual resources. That is because the City has allowed the Applicant to use story poles which are not compliant with written story pole policy. That policy requires 24 inch wide orange netting across the upper roof ridge lines of all building profiles. Instead, there is a thin string, with barely visible flagging. This greatly minimizes the simulated impact to protected visual resources.

It was for this reason, the inaccurate representation of impact, that photos of the story poles against the background of protected visual resources were digitally masked, and presented as evidence, both to the City, and in the Appeal to the Coastal Commission. These photos are

attached to this letter, for your convenience. But even those are not a substitute for viewing the site with your own eyes.

As you deliberate on this matter, please take into consideration that the hotel would provide a benefit of accommodation to a very small number of people, occupying on average 50 or 60 rooms per night. By contrast, the loss of visitor (and resident) access to protected visual resources would impact thousands and thousands of people every day transiting SR-1 both northbound and southbound.

I take exception to language in the Staff Report (page 15): “Appellant provided visual simulations that **appear** to show large swaths of the upland slopes and ridgeline obstructed”. The visual simulations in fact do show large swaths of upland slopes and ridgeline obstructed. Deliberate usage of the word “appear” calls into question my credibility and honesty, and the plain fact of what one can see with one’s own eyes.

Additional problematic language in the Staff Report is regarding occupancy (page 18); “what the Appellant **asserts** is a 50% occupancy rate for such facilities”. Use of the word “asserts” again calls into question my credibility and honesty. I am not “asserting” a 50% occupancy rate in this class of hotel rooms -- I am stating the facts as delineated by Chamber of Commerce data. The City has chosen to ignore this data, which in fact shows consistently declining hotel occupancy rates in Half Moon Bay over the past nine years.

Also in this section of the Staff report is the incorrect statement “the project’s visual impacts were not justified on the back of visitor serving benefits”. In fact, visitor serving benefits were a prominent part of the rather minimal deliberations undertaken by City Council in overturning the Planning Commission denial of the project.

To take a step back from this, City Council made a political decision to approve the project, based on economic and visitor serving arguments. In their very brief deliberations on appeal, they barely mentioned the LCP, it was viewed as a speed bump. In their approval of the project, they overturned the well-reasoned and fact-based denial of the project by Planning Commission, wherein the Planning Commission found substantial noncompliance with multiple sections of the LCP. **For Coastal Commission to find Substantial Issue here would simply to be affirming the well-reasoned conclusions of the finders of fact, the Half Moon Bay Planning Commission.**

A final and significant concern with the Staff Report is the claim that approving this project would not set precedent for future development. Inconsistency there is with the CCC declaring in 2016 that approval of the fire training tower would not set precedent for future development in that area, but in this 2025 matter, citing the now approved and existing fire training tower as a large structure in the immediate area which helps justify development of this very large hotel project. Therefore, the statement that allowing the Hyatt Hotel to proceed would not create precedent, cannot be accepted at face value.

Even beyond the limited interpretation where one considers only how Coastal Commission might or might not interpret this or other approvals as precedential, it is naïve to assume that City staff, City Council, Planning Commission, and local developers will not see approval of this very large project as precedent for future development. They most certainly will. Allowing the LCP to be bent this way is setting the stage for future inappropriate development.

In the end, it comes down to the subjective judgment of individual Commissioners as to whether or not the impact upon protected visual resources raises a Substantial Issue. Since this is subjective in nature, please also consider as equally valid the subjective concerns of 1000 people who have signed a petition against this project (list attached, and <https://chnng.it/Bfs7tH4m5D>), and the volume of written testimony opposing the project over the past years. These are members of the public, coastal residents, as well as visitors, who firmly believe that this project would create an irreversible and unacceptable impact to the scenic views that people here hold dear. Opposition to this project is both deep and wide in the community, and it is based primarily upon impact to protected visual resources. By contrast, the project is supported by a small number of business owners and developers, and members of the City staff and Council. The broader community of coastal residents and visitors would be negatively impacted, including those who are currently unaware of this project.

A smaller hotel project on this site would in large part meet the goals of both Applicant and City, while eliminating conflict with the certified LCP, and preserving protected visual resources.

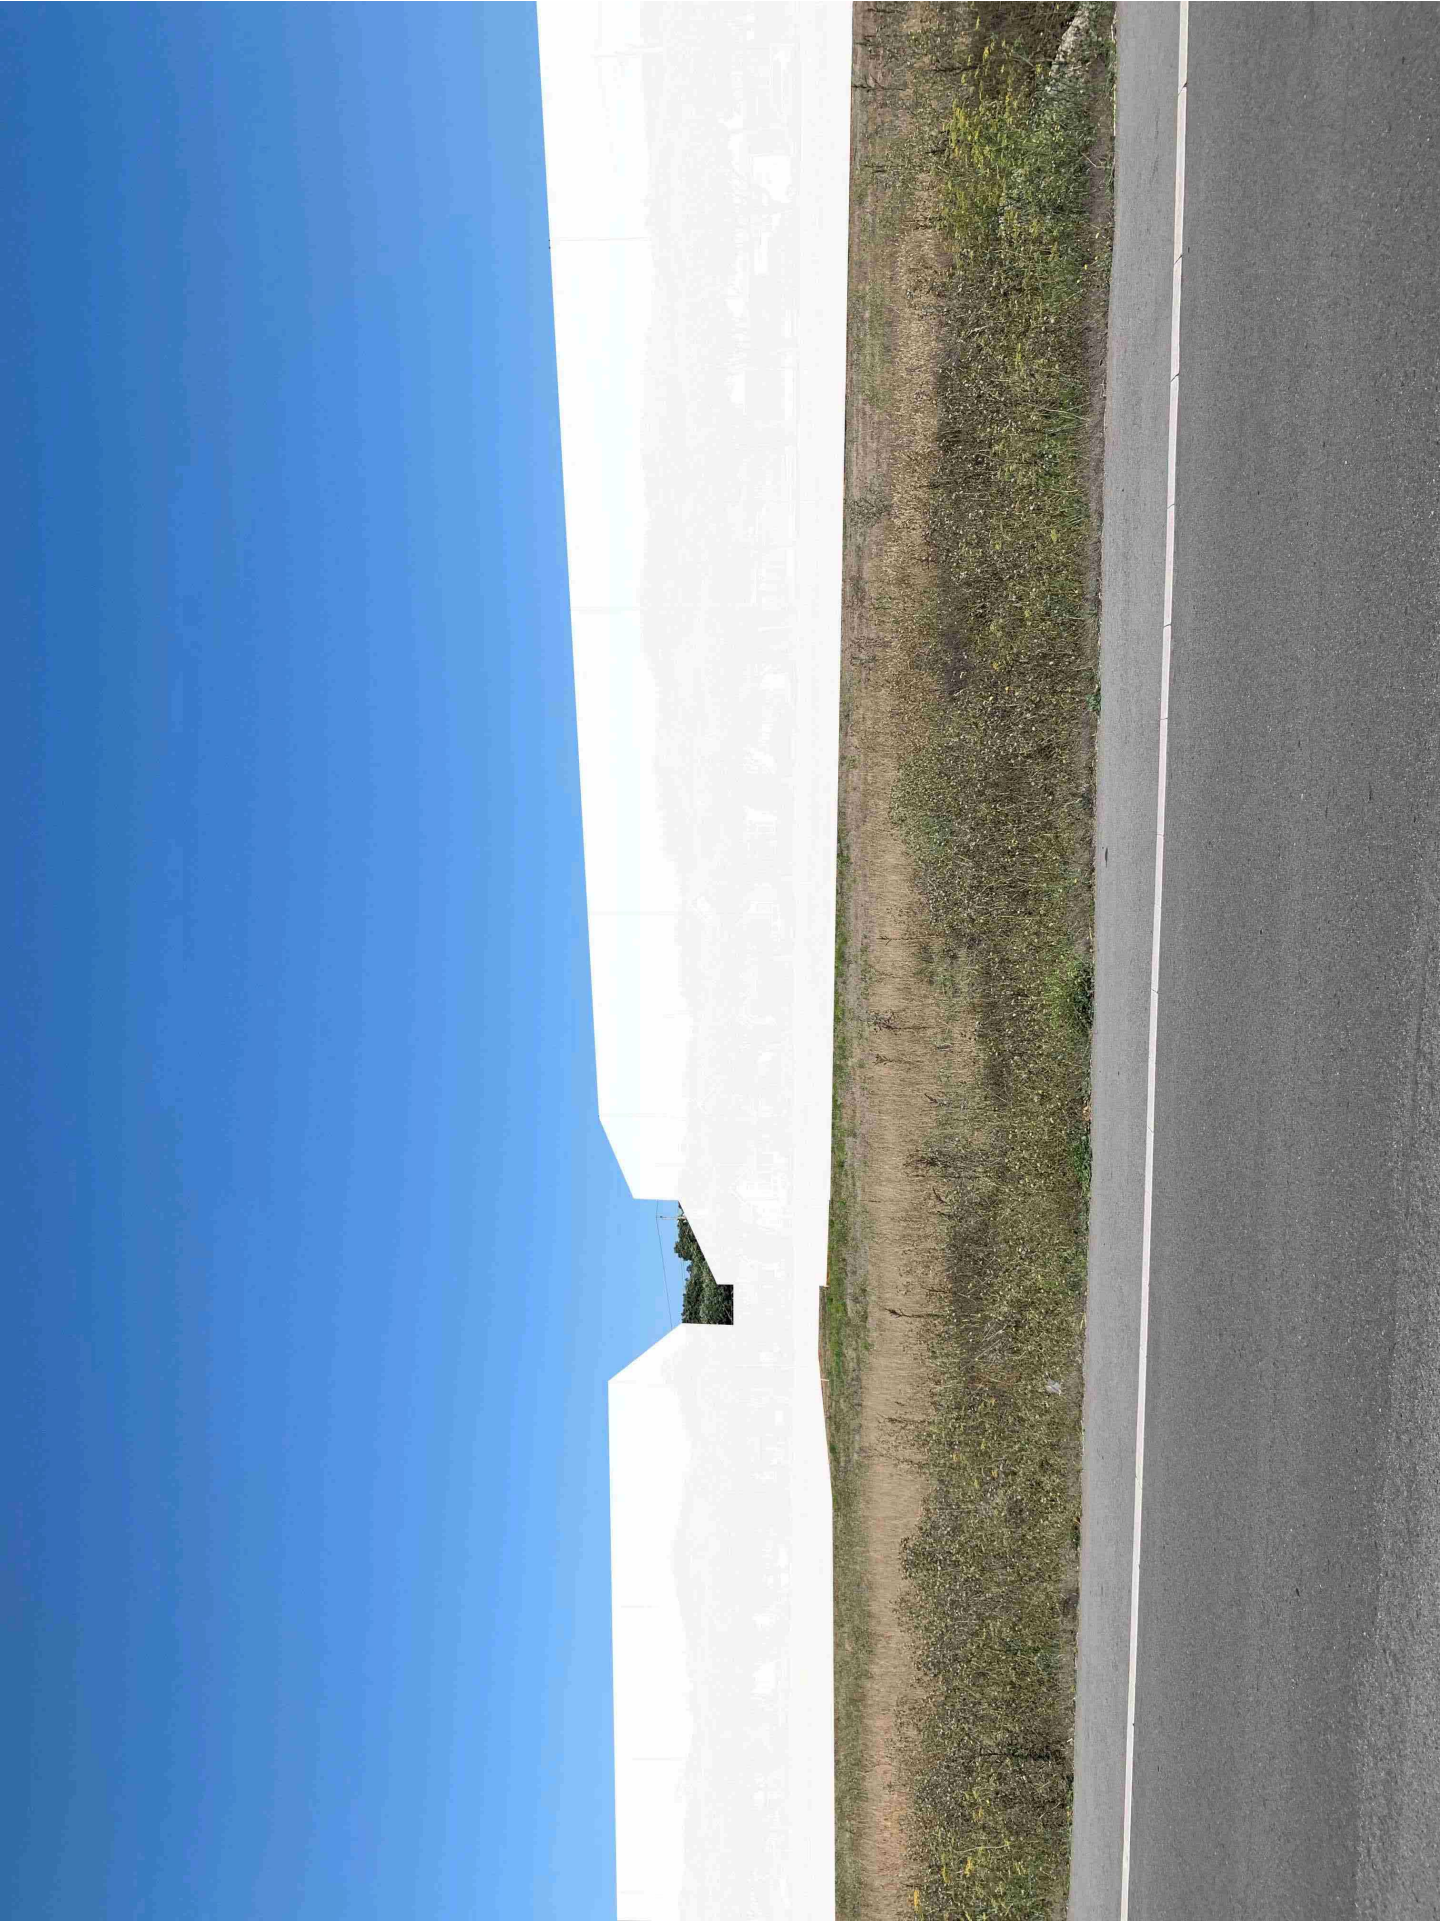

Thank you for your consideration of this Appeal.

Sincerely,

David Schorr

Subject: Public Comment on May 2025 Agenda Item Thursday 11a - Appeal No. A-2-HMB-25-0003 (Hyatt Hotel, Half Moon Bay)

Dear Coastal Commissioners,

I am writing to you in dual roles, that of a nearly quarter-century resident of Half Moon Bay and that of a representative of the Coastal Repertory Theatre.

As a resident we made a conscious choice to move to HMB wholly centered around quality of life. Our natural environment, the rural nature of our community, coastal adjacency, and amenities are critical to why we came and why we stay. I am neither pro or anti growth but rather focused on quality and consistency. I have followed this project for probably six of the approximate nine years the sponsor has been pursuing it. I've seen the sponsor take heed to comments and suggestions from both "official" sources such as planning staff, planning commissioners, city council members, as well as those from the broader community. The project that was ultimately approved by the Half Moon Bay City Council is the reflection of a highly collaborative and responsive process. It is a project that I wholeheartedly believe is an asset to those living in and visiting Half Moon Bay.

The appellant contends that the hotel is too large for the site, it degrades views of the eastern hills, and is out of character with Half Moon Bay. The massing of the buildings has been painstakingly reduced, modified, and adjusted on this site. It should be noted and underscored that there is a nearly 2.5 acre buffer between the structures and highway one, a buffer that is substantially dedicated to open space, bike path, interpretive walking path, and wetlands. Contrasting the Hyatt Hotel site to the structures and massing on the east side of highway one north of the site, I would argue the hotel would be the jewel in the crown of that section of highway one. There was substantive discussion and investigation of the views of the eastern hills, including but not limited to as driven past, walking-biking-pushing a stroller on the Naomi Partridge Trail, from Smith Field, etc. There is naturally subjectivity as to perception of impact. That said the preponderance of public testimony as well as that of commissioners and council members found it to be negligible and mitigated. As to out of character with Half Moon Bay, I find the structure, the materials, the textures, and massing, to be wholly comparable and compatible with what we aspire Half Moon Bay to be. I use aspire purposefully because if your baseline of comparison is the adjacent fire station and fire training center or the "up the block" senior center and housing project, the Hyatt Hotel outshines them all.

I am a former board member, board chair, and current emeritus board member of Coastal Repertory Theatre. The theatre is located immediately across Main Street from the hotel. We are incredibly excited by the prospect of this development. Our end of Main Street has been the proverbial back-water of the Main Street Corridor. We believe the Hyatt Hotel will serve to extent and expand the vibrant retail/restaurant/business of the critical Main Street corridor, positively activate the streetscape, improve infrastructure, improve safety, provide much needed jobs and taxes, and be an unparalleled synergistic partner to the Theatre.

In conclusion, wearing either of the hats I note above, I implore you to reject this appeal.

Sincerely,

Michael W. Adler

Subject: Public Comment on May 2025 Agenda Item Thursday 11a - Appeal No. A-2-HMB-25-0003 (Hyatt Hotel, Half Moon Bay)

Dear Commissioners,

After initially being against this project when it was first presented to the Planning Commission in Half Moon Bay, I now fully support it. Mr. Jamieson continued to make changes to the project over many years after listening to the objections of the planning commissioners and other townspeople and now has a structure that will enhance the south entrance to Half Moon Bay and provide the coast with more mid price range accommodations in downtown Half Moon Bay. Most of the downtown businesses have come out in support of this project.

Given Half Moon Bay's financial woes, this hotel would bring in much needed revenue to the city. Our beautiful coast will always bring in more people and this would be a great place for them to stay, given it's walkable access to downtown as well as our beaches.

Subject: Appeal No. A-2-HMB-25-0003 (Hyatt Hotel, Half Moon Bay) - SUPPORT THE PROJECT

April 27, 2025

To Whom It May Concern:

I'd like to provide some comments in support of the planned development of the new Hyatt Hotel in HMB, CA.

First, a new hotel of this size and caliber is PERFECT for this region. It not only provides additional options and amenities that will undoubtedly serve locals and their families, but especially those of us that travel to HMB on a regular basis. Oftentimes, my family and I would like to stay a few more days in town, but we cannot endure the exuberant prices of the Ritz yet would appreciate something a little more upscale than the current options available in HMB. We believe this project does just that.

Second, my understanding is that HMB has been running at a deficit for several years. Imagine had this project been approved years ago how helpful it would have been to help solve some of those impacts.

Lastly, I feel it's important that we comment on the tactics used by the person who filed this appeal to try and derail the project. The HMB City Council vigorously investigated each of the concerns raised in several public hearings and gave an ample amount of attention and opportunity to everyone, on all sides of this issue. They were thoughtful, thorough and collaborative in addressing these concerns in a very comprehensive manner.

It's one thing to stand on principle, it's another thing when one tries to use or create flimsy arguments to support one's cause. On its face, to most reasonable people, whose perspectives and non-bias interpretations are sound and measured, the arguments submitted in the appeal are simply overstated.

I've pulled these from the staff report:

Appellant's Argument for Appeal after the City of HMB's City Council Approved the Project

“The Appellant primarily contends that the City-approved project is too large for the site and the area, would degrade views of the City’s eastern hills and ridgelines as seen from an LCP-

designated Highway 1 scenic corridor (as well as degrading the scenic corridor itself), and would be larger than and out of character with nearby development, all of which the Appellant argues is inconsistent with LCP provisions that require preservation of the City's scenic resources."

My Rebuttal:

It's simply not true. The project may have been too big at one point in time. However, the Applicant and the City of HMB's planning commission, City Staff and Council did a terrific job in providing feedback and direction that ultimately led to the reduction in its scope. The "impacted views" are fleeting at best; and for maybe 5 - 8 seconds. That is, if you're a passenger in the vehicle that's moving at the posted speed limit.

Appellant's Argument for Appeal after the City of HMB's City Council Approved the Project

"The Appellant also contends that the project does not adequately address traffic impacts, should not be seen as a visitor-serving benefit (because there are already adequate similar such facilities in the City), and that it inappropriately defers evaluation of potential future residential development on the 4 lot subdivision area."

My Rebuttal:

Again, it's simply not true. The City staff and engineers provided several options for which these concerns were to be addressed. The applicant appropriately responded as required. As for not considering this new project as a visitor -serving benefit (and that HMB already has enough) is preposterous. Here's just a handful of them:

- Creates two acres of Open Space of the five-acre site (40% of the site)
 - Installs Bike & Walking Paths, Park Benches and Interpretive Signage
 - Provides new public access & views to the west over the Wavecrest area
 - Rehabilitates Native Plant Species
 - Protects Seasonal Wetlands
- Installing sidewalks and a crosswalk on Main Street
 - Safer travels crossing Main Street
 - Safer travels to the Signaled light at Hwy 1 - the Southern Gateway to the city.
 - Provide safer access to the coastal trails
- Enhances the Southern Gateway as you enter the City of HMB
 - Highlighted by Open Space with bike paths, walking paths and the rehabilitation of native plant species

In closing, I understand and appreciate the importance of "process", including the appeal process. However, it's time to move forward with this project so that the public can enjoy the coast and all it has to offer. Remember, the coast is supposed to be for everyone (especially visitors), not just for the appellant and those that live in HMB to keep it all for themselves.

Sincerely,

Jim Mercurio

To: NorthCentralCoast@Coastal <NorthCentralCoast@coastal.ca.gov>
Subject: Public Comment on May 2025 Agenda Item Thursday 11a - Appeal No. A-2-HMB-25-0003 (Hyatt Hotel, Half Moon Bay)

Dear Coastal Commissioners-

My name is Lawrence Gandelman and I was a resident of Half Moon Bay for over 35 years. For 15 of those years I lived at 740 Arroyo Leon Drive which is a 5-minute walk south on Main Street to the Project Site. I have attended either in person or virtually HMB Planning Commission Meetings for over 9+ years. I have known the Applicant and his Family for almost 30 years. They have supported Half Moon Bay and the community tirelessly during that time. Through their Ford Dealership they have been a great corporate citizen and steadfast employer.

The Applicant has “redesigned” this project to accommodate the requests of many in the community and has worked diligently with HMB’s Planning Staff to ensure that a “high quality” project would be delivered. Below is a “recap” of many of the benefits that the development and completion of this project would provide to many stakeholders that love Half Moon Bay (as I do):

Here are some of the benefits the hotel will provide for our community:

- The location of this hotel downtown greatly benefits our local shops, restaurants, and businesses
- Creates good local jobs for our residents
- Creating two acres of Open Space of the five-acre site (40% of the site)
 - Installing Bike Paths, Walking Paths, Park Benches and Interpretive Signage
 - Providing new public access with views to the west over the Wavecrest area
 - Rehabilitating Native Plant Species
 - Protecting Seasonal Wetlands
- Installing sidewalks and a cross walk on Main Street
 - Safer travels crossing Main Street

- Safer travels to the Signaled light at Hwy 1 (the Southern Gateway to the city)
 - Providing safer access to the coastal trails
- Enhancing our Southern Gateway as you enter the city
 - Highlighted by Open Space with bike paths, walking paths and the rehabilitation of native plant species
- Anchoring the south end of Main Street
 - Creating collective support between the hotel and the adjacent Coastal Repertory Theatre
- Economic Benefits
 - Providing Transient Occupancy Tax (TOT) paid to the City an estimated \$800,000 to \$1,000,000 per year
 - Providing hotel rooms and meeting space downtown
- Supporting the Community with a well-planned development
 - It has been nine years since the Applicant first made application for the proposed development. Many design changes have occurred during this period through the multiple city meetings and public input. The result is a better and more beautifully designed development.

There will **always** be those that reject change, growth and improvements for their own reasons and motivations. It is time to “finally” move beyond these roadblocks and support the advancement of this project which will enhance the southern gateway to HMB, add jobs and support the many independent business owners who have invested in making Main Street a special place for residents and visitors alike. I trust you will deny this Appeal so the project can be built.

Thank you for your consideration...

Sincerely,

Lawrence M. Gandelman

To whom it may concern,

I am in favor of the project on Half Moon Bay hotel development. The community is in much need of this project. I have been visiting Half Moon Bay for decades and always have difficulty finding a hotel that is reasonably priced. My family enjoys Half Moon Bay.

Thank you,

Jami Gleeson

Subject: FW: Appeal No. A-2-HMB-25-003 (Hyatt Hotel) Substantial Issue Determination

-----Original Message-----

From: Mimi and David Pasternak <marbeach@coastside.net>
Sent: Wednesday, April 30, 2025 11:37 AM
To: NorthCentralCoast@Coastal <NorthCentralCoast@coastal.ca.gov>
Subject: Appeal No. A-2-HMB-25-003 (Hyatt Hotel) Substantial Issue Determination

Members of The Commission:

As a longtime San Mateo Coastside resident, who supports both an expanding, vibrant local economy and preservation of our beautiful environment, I urge you to find a “substantial issue” in connection with this proposed development’s adherence to the requirement’s of Half Moon Bay’s L.C.P.

After reviewing voluminous documentation and conducting multiple, often long, public hearings, the Half Moon Bay’s Planning Commission concluded that the proposed construction plan could not and should not be approved. That decision, focused on visual obstruction, though there was recognition in public testimony and the Staff’s deliberation of the elephant in the room: hope for economic gain from construction.

The City Council’s decision in granting appeal from its Planning Commission’s determination was far quicker, with a decision rendered promptly after public comment and rather brief deliberation. Focus was on view obstruction, with what your Staff acknowledges to have been a “notoriously fairly subjective” approach. (page 2 of Report). However, the perceived revenue from Hotel taxes was again highlighted, notwithstanding evidence to the contrary.

Your Staff appears to accept that notion of “subjectivity” in assessing the significance of visual impacts in considering this Appeal. (page 19 of Report). The Report goes on to admit that, in this case, the visual factor “somewhat does and somewhat does not weigh in favor of finding a substantial issue.” What, then, is that factor?

Please do not rely solely on either the City Council’s “evidence” or interpretation of that evidence by the Council or your Staff in considering that issue. The latter refers to Applicant’s fotos that “appear to show large swaths of the upland slopes and ridgeline obstructed.” In fact, they do depict the view or lack thereof, not an appearance. Please exercise your own independent judgement.

Your Staff denies any intention of accepting a “lighter” version of LCP consistency in making its recommendation. In fact, that is exactly what they urge you to do. Instead, please stay true to our mission of supporting and enforcing LUP's Policy 9-3 to “preserve and enhance the unique visual qualities that contribute to Half Moon Bay’s coastal and small town character, including its expansive views”, by finding a substantial issue.

Respectfully,

David Pasternak

California Coastal Commission
c/o Oceana Hotel
Princeton, CA

Agenda Item 11a, New Appeals – Appeal No. A-2-HMB-25-0003

My name is Naomi Patridge, 487 Laurel Ave., Half Moon Bay and I am in favor of the Half Moon Bay Hotel Development on Main St.

Half Moon Bay has been designated as a visitor serving city by the California Coastal Commission. For the city to provide facilities for our visitors, the city needs to provide and develop accommodations. This project will provide much needed hotel rooms and meeting space downtown. It will also provide revenue through the city's Transient Occupancy Tax (TOT) in an estimated \$800,000 to \$1,000,000 per year. The hotel will provide local jobs for our residents.

The location of the hotel downtown will benefit our local shops, restaurants, and businesses. It will anchor the south end of Main St. It will enhance our southern gateway as you enter the city. The two-acre open space provided by the project will be highlighted with bike paths, walking paths and the rehabilitation of native plant species. There will be interpretive signage and the protection of seasonal wetlands.

There has been design changes during the nine years of the proposed development through multiple city meetings and public input. The result is a better designed development.

I urge the Commission to approve the project. Thank you

To: NorthCentralCoast@Coastal <NorthCentralCoast@coastal.ca.gov>
Subject: Public Comment on May 8, 2025 Agenda Item: No A-2HMB-25-0003 (Hyatt Hotel, Half Moon Bay)

Dear Commissioners -

I am writing to ask that you deny the appeal of the Hyatt Hotel (Agenda Item: No A-2HMB-25-0003) in Half Moon Bay, CA. I am a 15 year resident of Half Moon Bay who has served on the General Plan/Local Coastal Plan Advisory Committee, Park and Recreation Committee, Planning Commission, and Economic Recovery Initiative Committee for the City of Half Moon Bay. I had the pleasure of serving on the Planning Commission during initial rounds of review of the Hyatt Hotel.

The project applicant has been exceedingly responsive to input on the project scope and design. They worked collaboratively with staff and incorporated input from the Planning Commission and Architectural Advisory Committee to achieve a design that minimizes visual impacts of the project to the maximum extent feasible while providing a design that is consistent with the communities agricultural heritage. The project site is designated for commercial development and activation of the southern end of Main Street has been a community goal for many decades.

Permitting development within lands designated for development in the General Plan and Local Coastal Plan is critical towards providing economic development, providing for affordable coastal access and accommodations, and ensuring those lands designated for open space, agriculture, and resource protection are protected from unwanted development proposals. Sensible development on lands planned for development helps prevent sprawl and unwanted development elsewhere.

The site is currently a fallow field at the gateway to the community of Half Moon Bay. The site is planned and zoned for commercial and visitor serving development. The project would be a visual improvement to the community. The project would provide affordable accommodations that support coastal access. The minor intrusions to the skyline are

fleeting and consistent with development elsewhere throughout the community. This project would not change the overall visual character of the surrounding area of the community and the narrow, prescriptive interpretation of the LCP visual policies would be in conflict with the overall intent of the LCP.

Thank you for your ongoing work to protect the California coast and protect access while supporting development consistent with those goals.

Dear Sirs/ Madams

We are in support of the Hyatt hotel in Half Moon Bay. We live south of town and this is easy access for us. We are looking forward to another restaurant/bar to patronize. The architecture is in keeping with Half Moon Bay; is low impact, and very aesthetic. We support this project. Please approve it.

Sincerely yours,

Charise Hale McHugh and John D. McHugh II

Subject: The proposed Hyatt Hotel - Main St.

The Hyatt planned hotel on Main Street and Highway 1 will be unsightly. It is hard to see HMB develop in this way. The area will bring more traffic through town. Downtown is already an accident waiting to happen as trucks are allowed to park sticking out into the driving lane, cars, motorcycles and trucks barrel through and all around is little parking and putting the Hyatt in the planned area will destroy the residential look of this part of main. The hotel will be across from residents where children play and that could be another accident waiting to happen. The appearance of the area, hills, ocean view, etc. will be destroyed.

I'm sorry to see the new buildings in town which do not fit in into the design of a quaint downtown. I suspect soon the entire atmosphere that was once so delightful will become overly developed. Too bad the council doesn't spend more time trying to beautify the downtown. The Hyatt will not make HMB beautiful.

(Correction to Comment)

Regarding the Hyatt Hotel,

The applicant has taken a considerable amount of time to restructure the property plans within the parameters set forth by the planning and coastal commissions.

The property owner created a beautiful and all encompassing plan for the community and travelers alike. It's time to deny the Appeal.

The Hotel has the potential to revitalize the area, and revive the businesses within the community.

Deny the Appeal and Move Forward for Half Moon Bay.

Dear Commission Members,

My wife and I have been residents of Half Moon Bay for 33 years, currently living in Miramar and previously on Oak Avenue in Half Moon Bay. Over the years, we have watched the coastside change in many ways. It is wonderful that it is still a highly regarded community that is blessed with much natural beauty.

I am here today, to request that the Commission rejects the Staff recommendation and finds a Substantial Issue with this project and that the Commission take jurisdiction over the underlying CDP application for the proposed hotel project to insure that the eventual development conforms with the Coastal Act and LCP.

If the Coastal Commission resolves to find no substantial issue, the decision will encourage developers to ignore past and future Coastal Commission decisions, as opposed to encouraging them to work to honor the LCP. The LCP was developed over many years to ensure that local development complies with the Coastal Act. It should be followed.

Additionally, such a resolution will encourage developers to question LCP's developed in other communities, and the Coastal Act itself.

Approval of this project will encourage:

- developers to use decisions like this to push for more development that disregards the LCP in this community and resets the basis for what is defined as a town's character and ambience.
- city councils of other municipalities to ignore the thorough and resource intensive efforts of their Planning Commissions and make decisions based purely on their own economic and financial standards as opposed to the standards defined in the Coastal Act and resultant Local Coastal Programs.
- developers to lobby the Coastal Commission to ignore the efforts of local parties to ensure that development conforms with both the spirit of the Coastal Act and the development standards defined in their LCPs.

Why do I make these assertions?

- The proposed building would be one of the largest buildings in the city. The buildings, because they are connected, extend between 350 and 400 feet across the property. The gap between the buildings, though only one story, does not provide sufficient space to provide a view of the hills behind town when driving past on Highway 1. Therefore, the project is not visually compatible with the character of surrounding areas. Also, if it is among the largest buildings in the town, it is de facto changing the 'character of the surrounding area' by establishing a new normal for buildings..
- The City Planning Commission rejected this project. The Planning Commission determined the project did not conform with the LCP. The developer decided to disregard this finding and ask a higher authority, the City Council, to approve the project despite the fact that the project does not conform with the standards set in multiple elements in Section 9 of the LCP.
- Additionally, in their recommendation suggesting that this project does not raise significant LCP conformance issues, the CCC Staff used a Fire Tower as a comparison and metric for developing their recommendation. It implied that because the Fire Tower is four stories, that this project's height is not egregious. There are two problems with this.
 - First, it represents an erosion of standards. The Fire Tower is substantially less of an obstruction to views since it is narrower and set much farther back from Highway 1.
 - Secondly, the Coastal Commission stated that the Fire Tower approval would not become a precedent for future projects. The Coastal Commission Staff is using the Fire Tower as a justification for recommending the Hyatt project. This undermines the Coastal Commission's credibility for establishing standards and maintaining those standards. If the Fire Tower was approved on an exception basis, it should not be used to justify new and even more egregious exceptions.
- This building will undoubtedly block views of the hills behind Half Moon Bay for a very long distance. As such, it will direct travelers' attention to the building itself as an indicator of the town's spirit and feel. Because the building is so large, it will communicate that the town is a municipality of large sprawling buildings. The community has gone to considerable effort to make sure that this is not the case. A good portion of Half Moon Bay's charm and attraction is based on avoiding such projects and buildings. Other developers have gone to considerable effort in recent years to build new structures that are representative of the town's character and spirit. Approval of this project, in its current form, would initiate many more projects to abandon those standards. The developer of this project could build a project that is less obtrusive and complies with the design standards that other projects were required to follow.

In conclusion, as stated at the beginning, I request the Commission to take jurisdiction of this project to insure that this hotel project. Once built in its proposed form, it will never be removed and will always obstruct the viewshed. If built as currently defined, it would establish a new baseline for ever bigger projects. The projects should be modified to conform with the LCP and Coastal Act. The LCP is an established code to follow. Let's follow the rules we established in the LCP of 2020 and avoid the practice of ignoring rules and regulations carefully formed over previous years and decades.

Thank you for your work on the Commission, your time and your consideration of my input.

Sincerely,

Alec Hogg

Importance: High

Dear Sir/Madam,

PLEASE see the value to the current residents and larger community of denying the Hyatt access to build a property at the southern edge of our scenic and lovely town. This project will permanently alter the visual beauty of the coastline and its adjacent foothills and sets a precedence for future developments to do further damage. This part of California is one of the most naturally beautiful stretches of coastline on the planet. Please help us keep it this way.

Furthermore, it is my understanding that this development also lacks compliance with local regulations. How could you allow it on just those terms regardless of the visually negative and PERMANENT impact?

Please vote "no" and stand up to big business!!!!

Respectfully,
Alison Grant

Dear Commissioners,

RE: Comment on Appeal Number A-2-HMB-25-0003 (Hyatt Hotel, Half Moon Bay) agenda item Th11a

I am writing to express my opposition to the proposed Hyatt Hotel in Half Moon Bay due to its significant visual impact. I've lived on the coast for over 35 years and have watched the area grow in population, tourism, and development. We are at real risk of losing the small-town charm and open vistas that define our community—qualities that draw people here in the first place.

The planned buildings would block or diminish the clear sightlines to the inland hills and ridgelines—views that are part of what makes this area so special. These view corridors are not just scenic; they define the visual character of our town and should be preserved for the public benefit. The presence of a large hotel so close to Highway 1 would intrude upon this natural experience, replacing open vistas with a commercial development that feels out of scale and out of place.

In addition, I am concerned that this project does not fully comply with local land use policies designed to protect these views and maintain the rural, coastal identity of Half Moon Bay. Allowing it to proceed as proposed would send the wrong message about how seriously we value and enforce our planning guidelines.

Finally, approving this hotel would set a troubling precedent. If we permit one project to compromise key visual corridors and stretch local regulations,

it becomes much harder to say no to future developments with similar impacts. That could change the fabric of this community forever.

I urge you to exercise your discretion in defense of the coast and the values the Commission was created to uphold. Please deny the Hyatt application.

Thank you for your time and attention.

Sincerely,

Dru Devlin

Hello,

Please accept my comments below on the subject item.

This proposed Hyatt Hotel is just too large for the scenic area of Half Moon Bay. It will block the significant cherished and protected views of the hills and more. The massive size will out scale anything else in the area. It would be a intense visual hit that will deteriorate our small town character that exists today, and set a precedent that I would not like to see allowed.

Furthermore, the size and style of what is proposed would not tell visitors they are entering a historic seaside community. Better, the plan should be broken up into well done smaller separate buildings that would blend with the character of the community much better.

Please do not allow this project to move forward.

Thank you,

RE: Comment on Appeal No. A-2-HMB-25-0003 (Hyatt Hotel Project)

Honorable Commissioners,

I have followed the progression of this proposed project for several years, particularly during my tenure on the City of Half Moon Bay Planning Commission. As a former Planning Commissioner, I initially recognized the potential benefits of this project to the City. However, after listening to the City Staff presentation and public feedback, I decided to vote against the project.

The basis for my denial was as follows:

- City Staff were unable to provide satisfactory answers regarding the project's compliance with the Implementation Plan (IP) Section 18.08.015.
- The City is not applying C-G zoning standards to the hotel property as required by the existing Implementation Plan (Chapter 18.08) and the Floor Area Ratio requirements noted in Chapter 2 of the Local Coastal Land Use Plan.
- The City confirmed that the FEIR included erroneous responses that need correction.
- The City is operating without an updated IP, resulting in inconsistent application of the City's Visual Resources Policies.
- Table A-2 of the City's LCLUP clearly states the need to update the Visual Resources Zoning Ordinance. Without an updated IP and zoning ordinance, City staff lack guidance or set "guardrails" to assist them in determining visual impacts. Consequently, City staff are allowed to use their own subjective personal perspective to interpret policy.

I urge the Commission to determine that the City's decision on the project raises a substantial issue of LCP conformity, warranting the Commission's jurisdiction over the CDP application 'de novo' (i.e., a complete review of the project for LCP and Coastal Act consistency) for such development.

Sincerely,

Hazel Joanes

Members of California Coastal Commission:

As a former Chair of the Half Moon Bay Planning Commission, I support the arguments put forth in the appeal and I urge you to make a finding that the proposed Hyatt Hotel project raises a substantial issue of compliance with the Half Moon Bay Local Coastal Program (LCP) and the associated Implementation Plan (IP).

Page 14 of the staff report states (underline added):

"...[T]he LCP's public view protections that apply to the proposed development site are a mix of broadly applicable requirements in terms of views more generally, but also more specific requirements applicable to views of inland slopes and ridgelines. In terms of the latter, the IP is quite specific that these views must be protected, are not allowed to be obstructed, and allowable development must be located where least visible from the public view (see IP Section 18.37.030(B))."

Page 16 of the staff reports states (underline added):

"...[T]he LCP requires that public views of the eastern hillsides and ridgelines be protected and are not allowed to be obstructed, and only allows development that is located where it is least visible in such views (see IP Section 18.37.030(B)). These LCP provisions would suggest that LCP consistent development can't be sited and designed in a way that blocks such existing public views..."

Based on the staff's own analysis, the only proper finding is that the project raises a substantial issue of compliance with the Half Moon Bay LCP.

Sincerely,
Kevin J. Lansing

Dear Coastal Commission,

This letter is intended to express the collective voice of residents living in Half Moon Bay south of Highway 92 in opposition to construction of the proposed Hyatt Hotel. Specifically it is well known within the community that the proposed project not only significantly impacts protected views of the adjacent hills to the East but importantly would have a large negative impact on the rural character of the area. Although the arguments have been made multiple times, to reiterate the negative impacts include (1) traffic burden - a. peak evening and weekend traffic loads, 'cut-through' incursions down Seymour Street, Second Street, Poplar, Filmore, Alsace-Lorraine district, etc, (2) random automotive and foot traffic as conference and hotel persons migrate into local neighborhoods seeking bluff-top and beach access (3) additional noise component associated with point '2', (4) loss of privacy associated with point '2'. Of importance perhaps even overriding points 1-4 is that of safety (A) highway access and egress, (B) non-locals 'cruising' automobiles through neighborhoods where adults stroll and children play, and, significantly (C) foot traffic from the proposed hotel complex infiltrating the neighborhood generating noise, jeopardizing safety (incidents WILL happen) and increased odds of theft and vandalism.

All of these points will have negative impacts on the adjacent and broader community

both South of town and to the North. As with many development projects is it simply not fair for the monetary gain of a small number of investors be gleaned at the expense of entire communities.

RE: Comment on Appeal No. A-2-HMB-25-0003 (Hyatt Hotel Project) – In Support of the Appellant

Although I serve as a Planning Commissioner of Half Moon Bay, I write as a concerned citizen and resident in support of the appellant in Appeal Number A-2-HMB-25-0003 concerning the proposed Hyatt Hotel development at the southern gateway to our community along the Pacific Coast Highway. I urge the Commission to determine that a *substantial issue* exists and to take jurisdiction for a full *de novo* review of the proposed Hyatt Hotel project.

This large-scale development at the southern gateway of Half Moon Bay raises serious concerns about Local Coastal Program (LCP) consistency. The staff report concludes otherwise, but a closer look at the five evaluative factors makes clear that substantial issues are present:

1. Lack of Factual and Legal Support

The City’s approval relies on limited visual simulations and a generalized interpretation

of the “Town Center” concept. It ignores key LCP policies protecting scenic views from Highway 1 and fails to provide an objective visual analysis. This is not sufficient legal or factual support under the LCP.

2. Scale and Scope of the Project

The hotel’s size, massing, and location on a highly visible site make it a transformative project for the area. This is not minor or routine development—it represents a major change to a key coastal entry point and warrants Commission review.

3. Impact on Coastal Resources

The project will block significant views of coastal hillsides and ridgelines, which the LCP clearly designates as protected visual resources. Dismissing these impacts as “subjective” undermines the LCP’s intent and sets a dangerous precedent for future erosion of scenic protections.

4. Adverse Precedent

Allowing this project to move forward without full review opens the door to weaker interpretations of visual and visitor-serving policies. Each project may be unique, but this one would unmistakably set a precedent for more intensive coastal development without proper scrutiny.

5. Statewide Coastal Access Concerns

The project provides no meaningful low-cost visitor-serving accommodations and offers no credible economic analysis to justify the claim that TOT revenue offsets the access impacts. This directly contradicts Coastal Act goals for equitable coastal access.

Conclusion

This project is inconsistent with the LCP and undermines core Coastal Act principles. It has broad implications for Half Moon Bay’s coastline and for future coastal development statewide. I urge the Commission to find that a substantial issue exists and to conduct a full *de novo* review.

Thank you for your attention and your stewardship of California’s coast.

Sincerely,

Margaret Gossett

Hi. We are long time downtown Half Moon Bay residents (over 25 years). One of main things that brought us to this unique and special place on the San Mateo coast was the environmental character of a community where land use was viewed and experienced as a privilege, not a right. So the communities commitment to maintaining the visual beauty of the gem that is the Coastside was a paramount reason for settling in this unique place and staying here as long as we have.

We're concerned about the Hyatt development and it's disruption of the very things that make our beautiful HMB what it is. This hotel not only breaks the visual access to the coastal hillsides but also is deeply out of character for the architecture and open space we experience every day. We believe in the coastal commission and its mission. And having grown up in Southern California, both my wife and I have seen what unregulated growth can do to what was the beautiful coastal hills of the Irvine Ranch. We don't want to see that happen in HMB, nor do we want to see the precedent this type of development will set for the future.

Please accept our plea to deny this hotel development and avoid spoiling the unique beauty of the HMB coastal views and experience.

Thank you,
-Michael and Alison Grant
25 year HMB residents

Attn Coastal Commission :

Many residents of Half Moon Bay are concerned about the size and height of the proposed Hyatt Hotel as it would negatively affect the view of the coastal hills and ridge line.

The main beauty of this coastal town that attracts thousands of visitors each year as well as residents is the views of the ocean and the hills.

To protect these natural resources local regulations were passed many years ago and it is all our responsibility to ensure compliance with these laws. Breaking the rules so that the developer can maximize his profits would set a precedent and pave the way for future development in this charming town.

I urge you to vote no on this project.

I am strongly opposed to the construction of the Hyatt Hotel at the south end of HMB!!!! First the plans include obstruction of the views of the beautiful hills in this area. Our coastside is known for its beauty and is one of the main reasons I have lived here for 45 years. This hotel will be very close to a hotel that is already there at Cameron Palmer's hotel. Do we need two hotels to welcome tourists to our town from the south? How tacky! It will ruin the south entry to Half Moon Bay. The town is slowly becoming another Monterey and run for tourists not locals.

There is also the matter that all the other hotels and motels and bed & breakfast inns as well as Airbnbs on the coast -and we have plenty- are only 55% vacancy during the year. We don't need another big hotel!!!!

Please deny the project.

Thanks

Appeal of Hyatt Hotel, Half Moon Bay. May 8, 2025

Coastal Commissioners All:

A primary goal and function of the CCC is visitor serving access to the coast. This project will enhance that. Further, it will help the other visitor serving businesses in Half Moon Bay, all of which need the critical mass of visiting patrons to survive in an ever-changing economic environment.

But, to the essence of the appeal, which speaks to the impact on the view of the upland hills, this project has been repeatedly and effectively reduced in size and height, relocated for minimal viewshed impacts, and adjusted to meet the many City and environmental requirements and recommendations imposed. Over eight years, these plan modifications have been done in good faith and with positive effect.

Our LCLUP does not prohibit impacts on the upland hill viewshed but rather it says project proposals must "minimize the intrusion". This the applicant has done. The remaining small impact is at most a fleeting view past the fire station, fire tower, theater, residential buildings and Main Street trees, toward the distant hills.

If the upland hill viewshed is inviolate, the City should have said so some years ago and the LCLUP should state that mandate as an absolute. This appeal reflects the extreme application of the upland hill viewshed sentence, which is inappropriate. Those briefly interrupted view corridors are of no significance to the actual experience of driving on Highway One in HMB.

I urge the Commission to deny this appeal and permit the construction of this fully appropriate project that minimizes impacts as feasible and provides significant open space on said property, while providing visitor serving facilities..

Thank you for your attention to my comments.

Sincerely,

Chad Hooker
